ĶAḌĀ' means literally "deciding" (*ḥukm*, *faṣl*, *faṣḥ*, *tarīḳh*, cf. Ibn Ḥazm, *Milal*, iii. 51) but the root is developed in many diverging senses already in the Ḳur'ān, "commanding", "judging", "making so as to be fixed", "informing", "substituting", "discharging (obligation)" etc.; cf. al-Iṣfahānī, *Mufradāt*, p. 416, and *Lisān*, xx. 47 *sqq.* Technically it indicates *a*) the office and functioning of a judge (*ḳāḍī*); *b*) the discharging of a previously neglected religious obligation, e. g. of the daily worship or of fasting in Ramaḍān; thus opposed to *adā'*, the performance of the duty at the appointed time (Juynboll, *Handb. des Islām. Gesetzes*, p. 68, note); Lane, *Lexicon*, p. 38b); *c*) the eternal, universal decision of Allāh as to all existent things as they are continuously, very nearly the "eternal decree" of Calvinism. The point in doubt in the last use is the relation of the term to *ḳadar* (*ḳadr*), "measuring or estimating an amount", "assigning something by measure"; to *'ināya*, "providence"; and to the will (*irāda*) and knowledge (*'ilm*) of Allāh; further whether *ḳaḍā'* is one of the "essential qualities" (*aṣ-ṣifāt aḏh-ḏhātīya*) of Allāh or of His "qualities of action" (*aṣ-ṣifāt al-fi'līya*); is eternal (*ḳadīm*) or originated (*ḥādith*). For orthodox Ash'arites *ḳaḍā'* is the will of Allāh (al-Baiḍāwī on Ḳur. ii. 111) and its eternal connection (*ta'alluḳ*), while *ḳadar* is His bringing things into existence in accordance with His will. Or it is His eternal knowledge and its connection with the thing known, while *ḳadar* is His bringing the thing into existence in accordance with His knowledge. *Ḳaḍā'*, therefore, is eternal as one of the eternal qualities and *ḳadar* is originated because one of the "connections" of Allāh's quality of power. But others taught that *ḳaḍā'* is the bringing forth (*ibrāz*) of transitory things (*al-kā'ināt*) in accordance with the knowledge of Allāh, while *ḳadar* is the eternal defining of each thing with what of good and bad, advantage and disadvantage, it is to have when it exists. *Ḳaḍā'*, then, is originated and *ḳadar* is eternal. Further, *ḳaḍā'*, if it equals Allāh's will or knowledge, is one of the essential qualities, but if it is this "bringing forth" it is only one of the connections of Allāh's power, and these, according to the Ash'arites, are originated. But the Māturīdites called these "active qualities" and held that they were eternal because they were names for the Māturīdite quality *takwīn* (making to become) which the Ash'arites did not admit as a quality (al-Faḍālī with comment. of al-Baidjūrī, Cairo 1315, pp. 55, 61; al-Nasafī's *'Aḳā'id* with comm. of al-Taftāzānī etc., Cairo, 1321, p. 95). But the overwhelmingly accepted position makes *ḳaḍā'* the universal, general and eternal decree and *ḳadar* the individual development or application of that in time. A phrase quoted in the *Siḥāḥ* under ḲDR is significant, *Mā yuḳaddiruhu 'llāh min al-ḳaḍā'*, "That which Allāh measures out of *ḳaḍā'*". Al-Rāzī on Ḳur. xxxiii 37, 38 (*Mafātīḥ*, Cairo 1308, vi. 527) even applies the distinction to the problem of evil and of human responsibility. That which is by *ḳadar* comes in incidentally, almost accidentally, and the disadvantages (*ḍarar*) of the world are through it, while the good (*khair*) is by *ḳaḍā'*. Man was created by Allāh subject to lust and anger in order that, striving against these under the guidance of reason and religion, he might be rewarded. That leads in some to sin, but Allāh did

not produce this consequential sin in them by intention, although it was by His *ḳadar*. Again, that which is by *ḳaḍāʾ* being universal is always perfectly intelligible — we see it happening all the time; but some of weak understanding may ask the reason for a thing which is by *ḳadar*. Yet it must not be thought that these latter things are necessary consequences following of themselves according to the Muʿtazilite doctrine of *tawlīd* or the philosophical teaching that there is a nature in things (*ṭabʿ*). Everything is by the choice (*ikhtiyār*) of Allāh and He admits only a certain custom (*ʿāda*) in things. Among philosophers the tendency is to equate *ḳaḍāʾ* with Allāh's knowledge or with His eternal providence (*ʿināya*) or even to say that it is an expression for the existence of all existent things, taken as a whole, in the world of reason, while *ḳadar* is their external existence, separated, one after another (*Dict. of Techn. Terms*, p. 1234 *sq.*).

(D. B. MACDONALD.)

ḲAḌĀʾ (A.). In the terminology of Turkish administration *ḳaḍāʾ* (*ḳaẓā*) denotes a district governed by a *ḳaʾimmaḳām* (q. v.).

ḲADAM SHARĪF (KADAM RASŪL ALLĀH). Among the miracles (*muʿdjizāt*) popularly attributed to Muḥammad was the fact that when he trod on a rock, his foot sank into the stone and left its impress there. (This miracle is usually referred to along with others e. g. that he cast no shadow, that if one of his hairs fell in the fire, it was not burnt, that flies did not settle on his clothes etc. (v. al-Ḥalabī, *al-Sīra al-Ḥalabīya*, Būlāḳ, 1292, III, 407), or that his sandals left no imprint on the sand (v. Ibn Ḥadjar al-Haitamī, commentary on al-Būṣīrī's *al-Ḳaṣīda al-Hamzīya*, I. 176. (Ind. Off. MS., Loth, nᵒ. 826, fol. 94). No early authority refers to such a miracle, nor can any *ḥadīth* be quoted in corroboration of it, as Djalāl al-Dīn al-Suyūṭī himself pointed out (v. al-Ḥalabī, *op. cit.*, I. 497). But sufficient evidence of this miracle is considered to be provided by the numerous impressions of one or both of the feet of the Prophet, which are venerated in different parts of the Muslim world. The most famous of these footprints is that in the Masdjid al-Aḳṣā, at Jerusalem, on the rock from which Muḥammad mounted Burāḳ for his journey to heaven (Shams al-Dīn al-Suyūṭī, *Itḥāf al-Akhiṣṣāʾ fī Faḍāʾil al-Masdjid al-aḳṣā*, *Journ. Roy. As. Soc.*, xix., NS. (1887), p. 258–9). In a mosque near the southern gate of Damascus, on the road to Ḥawrān, is shown the imprint of the foot of the Prophet, when he half-alighted from his camel, but was warned by the angel Gabriel that God had given him the choice between the Paradise of this world and that of the next; whereupon he relinquished his intention of entering the city (W. G. Palgrave, *Journey through Central and Eastern Arabia*, London, 1865, ii. 19). In Cairo there are two footprints, one in a mosque called Āthār al-nabī (*Rev. des Trad. Pop.*, ix. 689), the other at the tomb of Ḳāʾit Bey [*q. v.*] (Baedeker's *Egypt*, 1914, p. 113), who, according to Aḥmad Daḥlān [*q. v.*], purchased it for the sum of 20,000 dinars; in Ṭanṭa, there are impressions of both the feet of the Prophet, in the shrine of Saiyid Aḥmad al-Badawī (*Rev. des Trad. Pop.*, xxii. 410); as, also, at Constantinople, in the mosque where Sulṭān ʿAbd al-Ḥamīd I is buried (*ibid.*, ix. 473); cf. also CONSTANTINOPLE, i. 871ᵇ.

But it is in India that this veneration for the footprints of the Prophet appears to have attained its fullest extension, and such slabs of stone are found all over the country, — sometimes venerated in buildings specially erected for their reception, as the Ḳadam Rasūl Mosque at Gawr, or kept with other relics, as in the Djāmiʿ Masdjid, Dihlī, or left disregarded in a corner of a cemetery, as in that of Shāh Djamāl, near ʿAlīgarh, or preserved in the house of some private person. Usually, there is the imprint of one foot only, but in the Ḳadam Rasūl building at Balasor (in Orissa), the stone bears the marks of both feet, as well as those of ʿAlī. (Abdus Salam, *The Qadam Rasul Building at Balasore* in *Journ. As. Soc. Beng.*, iv. (1908), 31–2.) One of the most highly venerated of these footprints is that placed over the tomb of Fatḥ Khān, the son of Fīrūz Shāh Tughlāḳ [*q. v.*]; this monarch had associated his son with him in the government as early as 760 H., and the death of Fatḥ Khān in 776 H. was a cause of great grief to his father, who erected a stately tomb over his grave, with a mosque and a madrasa attached. The footprint is said to have been brought from Madīna by the great saint of the Čishtī order, Saiyid Djalāl al-Dīn Bukhārī, known as Makhdūm-i-Djahāniyān; it is kept immersed in water, which is believed to possess healing power; a religious fair is held here every year, on the 12ᵗʰ of Rabīʿ al-awwal, the anniversary of the death of the Prophet (Saiyid Aḥmad Khān, *Description des Monuments de Dehli*, *Journ. As.*, 1860, p. 411—2). At Učh, which has a rich collection of relics of the Prophet, there is a footprint in the shrine of Bandagī Muḥammad Ghawth (ob. 923 H.), a descendant of ʿAbd al-Ḳādir Djīlī (*Gazetteer of the Bahawalpur State*, Lahore, 1908, p. 166).

The slab of stone with the footprint of the Prophet, preserved in the Ḳadam Rasūl Mosque at Gawr [q. v.] is said to have been brought from Madīna by ʿAlāʾ al-Dīn Ḥusain Shāh, king of Bengal 1494—1521; the fine mosque in which it rests was built by his son and successor, Nuṣrat Shāh, in 1530 (J. H. Ravenshaw, *Gaur*, London, 1878, p. 20). About fifty years later, Mīr Abū Turāb, who had been appointed by Akbar leader of the pilgrims' caravan, brought back from Mecca, in 1579, a stone bearing the imprint of the right foot of the Prophet; that brought by Makhdūm-i-Djahāniyān to Sulṭān Fīrūz Shāh is said to have represented the left foot. Akbar himself went out several miles from Agra to receive the holy relic, and carried it on his shoulder for about a hundred paces, his example being afterwards followed by his nobles and courtiers, who escorted the stone with great pomp and ceremony to the city. In the following year, when Mīr Abū Turāb was returning to his home in Gudjarāt he received permission from Akbar to take the footprint with him; he erected a building in Asāwal, near Aḥmadābād, as a shrine for this slab and for some hairs of the Prophet, which he had also brought from Mecca with him; after his death the footprint was placed over his tomb, which is still standing to the south of the city of Aḥmadābād, but the footprint is no longer there, having been removed (it is said) to Khambāy (Mīr Abū Turāb Valī, *History of Gujarat*, Calcutta, 1909, pp. 97-9). The footprint on the

grave of Saiyid Muḥammad Maḳbūl ʿĀlam, who is buried in the precincts of the shrine of his ancestor, Saiyid Muḥammad Shāh ʿĀlam, at Baṭuwā, to the south of Aḥmadābād, is said to be a copy made from the stone in the Djāmiʿ Masdjid at Dihlī (J. Burgess, *The Muhammadan Architecture of Ahmadabad*, London, 1905, ii. 20, 50). Similar copies on stone or on paper are sometimes found in the houses of private persons (G. A. Herklots, *Qanoon-e-Islam*, Madras, 1863, p. 153).

Closely connected with the veneration of the footprints of Muḥammad, is that paid to representations of his sandals. Copies of these are hung up in the houses of the pious, as a protection against the assaults of Satan, the evil eye, the depredations of robbers, etc.; they are also said to relieve the pangs of childbirth (al-Ḳasṭalānī, *al-Mawāhib al-laduniya*, Cairo, 1281 H., i. 337). Such representations are common in Algeria, Egypt, India and Syria.

(T. W. Arnold.)

ḲADAR. The contradictory statements of the Ḳurʾān on free will and predestination show that Muḥammad was an opportunist preacher and politician and not a systematic theologian. It has been demonstrated (Grimme, *Einleitung in den Koran*, vol. ii.) that his predestinarian position steadily hardened towards the close of his life, and the earliest conscious Muslim attitude on the subject seems to have been of an uncompromising fatalism. *ḲDR* was the root used most generally to express it (see, too, ḲAḌĀʾ) and appears to mean primarily "to measure, estimate" and then "to assign specifically by measure" as though Allāh "measured out" his decrees. On the early opposition to this, which showed itself apparently before A. D. 700 and under Christian influences, see ḲADARĪYA. In the course of the conflict two extreme views and two mediating views developed, the mediating views becoming those possible in orthodox Islām. All could appeal to Ḳurʾānic texts and to traditions. The traditions are, of course, in great part shadows thrown back from the later controversies. They may be found in al-Bukhārī, *Kitāb al-Ḳadar* and also in part of the *Kitāb al-Tibb*; see, too, al-Ashʿarī, *Kitāb al-Ibāna*, Haidarābād, p. 84 *sqq.* (*Bāb al-Riwāyāt fi ʾl-Ḳadar*). The Djabrīya [q. v.] were absolute predestinarians; man had no part at all in the actions which apparently proceeded from him. This became an heretical position in Islām. The other extreme, that man produced his own actions, was that of the Ḳadarites who eventually merged in the Muʿtazilites. At first they did not venture to use the word "create" (*khalḳ*) — Allāh alone was *khāliḳ* — of this producing, but employed supposedly safer terms, such as *īdjād*, *ikhtirāʿ*, but eventually they came to speak of man "creating" his actions. The intermediate, orthodox, parties were the Ashʿarites and the Māturīdites. Of these the Ashʿarites had thought out their position most logically, while the Māturīdites stated simply the evident facts in the case. The basis of the upholders of free will seems to have been ethical; the justice (*ʿadl*) of Allāh requires man's freedom. But orthodox Islām in general cared little for that, although some, as al-Taftāzānī and al-Rāzī, spend dialectic on the point. It maintained the Pauline parallel of the potter and the vessels; Allāh could do what he pleased with his own. The orthodox difficulty was rather man's consciousness of freedom. This the Māturīdites met by admitting that man did possess "free choice actions" (*afʿāl ikhtiyārīya*) for which he is rewarded or punished" (al-Nasafī, *ʿAḳāʾid*, ed. with comment. of al-Taftāzānī, Cairo 1321, p. 97). Man knows the difference between a voluntary grasping and an involuntary trembling, but the contradiction of this with the absoluteness of Allāh's creative power is left unsolved. Al-Ashʿarī introduced the idea of *iktisāb* [see KASB] "accepting for one's self": man accepts for himself the action of Allāh and this accepting is man's consciousness of free will. Apparently al-Ashʿarī meant that this consciousness was only another part of Allāh's creative action. Man is still an automaton although part of his machinery is that he believes himself free. Between the two wide scope was left even in orthodox Islām for discussion. The ultimate, scholastic, Ashʿarite statement, denying that man possesses any action at all — which must not, however, be taken for the only possible one in Islām — will be conveniently found in al-Faḍālī's, *Kifāyat al-ʿAwāmm* with al-Baidjūrī's commentary, and in Luciani, *Prolégomènes théologiques de Senoussi*. This attitude struck so deep that even al-Ghazālī, and that even at the end of the wonderful psychological analysis of the book of the *Iḥyāʾ* on "the marvels of the heart", could quote with approval the tradition: "These to Heaven and I care not, and these to Hell and I care not" (ed. with comm. of al-Saiyid al-Murtaḍā, vii. 308); (cf. Macdonald, *Religious Attitude in Islam*, p. 301). For *ḳadar* among mystics see art. ʿABD AL-RAZZĀḲ above.

(D. B. Macdonald.)

ḲADARĪYA is given regularly as a descriptive or surname (*laḳab*) of the Muʿtazila, but it points back to a pre-Muʿtazilite time when the Muslims were beginning to ask theological questions and

when, the first apparently among these questioners, there were doubters of the harsh predestinarianism of Muḥammad's last period. The later Mu'tazilites resented the name and held that it applied better to those who maintained Allāh's *ḳadar* of all things, good and bad, than to themselves who held that man has a certain power (*ḳudra*) over his actions. This, the orthodox said, was because they wished to avoid the saying of the Prophet. "The Ḳadarites are the Madjūs (*Zoroastrians, Dualists*) of this People", which meant that they made man a *khāliḳ al-af'āl*, "creator of actions", thus giving Allāh a partner in creating. But this saying was certainly later than the rise of the Ḳadarites and the name may well have been first invented and applied to themselves by those who claimed a *ḳadar* over their own actions. Another saying ascribed to Muḥammad in this connection is, "They are the opponents of Allāh in *ḳadar*", i. e. they profess to have a rival *ḳadar* to that of Allāh. Al-Taftāzānī (on al-Nasafī, p. 96) has a pointed story of how a certain Madjūsī silenced (*alzama*) 'Amr b. 'Ubaid on both these points. The name which the Mu'tazilites preferred for themselves in regard to this doctrine was "the People of Justice" (*'adl*); Allāh's justice required that man must be free if he were to be rewarded or punished.

(D. B. MACDONALD.)

ḲADHF (A.) is slander in a special sense. If anyone accuses a respectable person (*muḥṣan*) of incontinence, without being able to bring four witnesses to support him, he is liable by law to a definite punishment (*ḥadd*) of 80 lashes for *ḳadhf*. The regulations on this subject in the law-books are based mainly on Ḳur'ān xxiv. 4. In a case of *ḳadhf*, all male and female persons are considered *muḥṣan* who have never been guilty of incontinence and who, in addition, are believers, freemen, of age, and in possession of their mental faculties. The right to demand the punishment of the guilty one is in the view of most faḳīh's a private right of the person slandered (i. e. a *ḥaḳḳ ādamī*) so that the latter (or his heir) may also voluntarily refrain from exercising it. In the view of the Ḥanafī school, however, the *ḥadd* punishment for *ḳadhf* is a right of of God (*ḥaḳḳ Allāh*), and neither the person slandered nor his heir can avert this punishment from the guilty one. If a husband has accused his wife of unfaithfulness without being able to prove the charge in the prescribed manner, he can secure exemption from punishment by pronouncing the *li'ān* formula [see LI'ĀN]. Punishment, moreover, may not be inflicted on the father, mother or more distant ascendants of the insulted party, nor on minors and lunatics. For a slave the punishment is only 40 lashes.

(TH. W. JUYNBOLL.)

ḲĀḌĪ (A.) is the judge, who, according to the theory of Muslim law, has to decide all cases involving questions of civil and criminal law. In practice, however, there has been from quite an early period throughout the Muslim east a twofold method of administration of law, usually distinguished one from the other, with a certain amount of correctness, as "religious" and "secular". Only such questions as are popularly felt to be closely connected with religion (e. g. disputes on points of family law or inheritance, legal questions concerning pious foundations, etc.) are brought to be decided, in conformity to canon law, before the ḳāḍī, the "religious" judge; all other questions, according to the popular view current in the east, come within the province of the secular authorities, and they as laymen usually decide them by other standards.

The ḳāḍī must, according to the law, be a Muslim scholar of blameless life (*'adl*), thoroughly conversant with the prescriptions of the sacred law. Originally the theory of most *madhhab*'s even demanded that the ḳāḍī should be able to derive the laws to be applied in his verdicts independently as a *mudjtahid* [see IDJTIHĀD] from the sacred sources. Later, however, no one was any longer considered qualified to give his own interpretation of the law; the judges could only be *muḳallid*'s, who were tied down to the decisions of earlier authoritative scholars. The ḳāḍī therefore in giving his decisions has to adhere strictly to the rules which he finds laid down in the *fiḳh* books of his *madhhab*.

The administration of justice is considered a religious duty for the Muslim community. In each district the competent authority must appoint a suitable person as ḳāḍī. If there is only one, who could be considered legally qualified for the office of judge, he is bound to accept the office if appointed and even bound to seek the office if the authorities should neglect to give it to him.

The ḳāḍī has to conduct his court exactly in accordance with the procedure laid down by the law. He has to treat the parties, if they are both believers, as equals in every respect. If the defendant admits that the plaintiff is in the right, no further proof is necessary. If the defendant, on the other hand, does not acknowledge any justification for the charge, the plaintiff must support his assertions by proofs. The judgement of the ḳāḍī is decisive for the parties; there is no appeal from it.

To secure the independance of the judge, the law forbids the ḳāḍī to take presents from people who are appearing in his court. He also should avoid engaging in trade, either personally or through the intermediary of persons known to be his agents, as people might then attempt to win him to their side by offering special advantages in business.

In spite of these and many other regulations to secure as faultless an administration of justice as possible "the bad ḳāḍī's" have at all times given cause for complaint in Islām. Most judges were ignorant and corrupt. If upright men filled the office, they frequently found themselves forced to bend the law to suit the will of authority. In religious circles then there soon arose a strong

disinclination to fill the office of judge. Traditions were put into currency in which the Prophet was made to utter grave warnings against accepting the position of ḳāḍī. Pious faḳīh's e. g. Abū Ḥanīfa [q. v.] declined to fill the office of judge.

For many centuries past no Muslim judge has any longer come up to the original theoretical requirements of the law; therefore any existing ḳāḍī is regarded by Muslim scholars only as *ḳāḍī 'l-ḍarūra*, i. e. as an emergency ḳāḍī, to whom one must go, in default of a better.

On the history of the office of ḳāḍī and of the ḳāḍī's see: R. J. H. Gottheil, *The Cadi, the History of this Institution* in *Revue des Études ethnographiques et sociologiques*, i. (1908), p. 385—393; *The History of the Egyptian Cadis as compiled by Abu Omar Muhammed al-Kindi*, ed. by R. J. H. Gottheil, New York 1908 (with an introduction); cf. *The Governors and Judges of Egypt of el-Kindi*, ed. by R. Guest (Gibb Mem. xix.), 1912; and also the important remarks on the office of ḳāḍī in Cordova by Ribera in the introduction to his edition of al-Khushanī, *Kitāb al-Ḳuḍāt bi-Ḳurṭuba* (*Hist. de los Jueces de Córdoba por Aljoxani*, Madrid 1914; cf. Ḥādjdjī Khalīfa, ii. 141, n⁰. 2279).

The Prophet and the early Caliphs often decided disputes in person as judges, as did their governors and prefects in the various provinces. Justice was always administered in Muslim lands to a great extent by local authorities, notably the police officials. This was sometimes called *Naẓar fi 'l-Maẓālim* (al-Māwardī, ed. Enger, p. 128 *sqq.*; H. F. Amedroz, *The Mazalim Jurisdiction in the Ahkam Sultaniyya of Mawardi*, *Journ. Roy. As. Soc.*, 1911, p. 635 *sqq.*; de Sacy, *Chrest. Arabe*[2], i. 132 *sqq.*).

Moreover 'Umar and 'Uthmān and their successors had appointed special officers as judges (*ḳāḍī*). These ḳāḍī's, who always belonged to the *faḳīh* class, never obtained an independent position in Islām. They were often dismissed — soon after their appointment — and always remained subject to the caprice of the ruler. Cf. for example *Autobiographie d'Ibn Khaldoun*, transl. M. de Slane, Paris 1844, p. 103—110 (*Journ. Asiat.*, 4th Ser., iii. 328 *sqq.*).

The ḳāḍī's had not only to decide cases but they had also to administer pious foundations (*waḳf's*) and the estates of orphans, imbeciles and other persons. They had often to draw up contracts of marriage for women without male relations, etc. The chief ḳāḍī in the capital was one of the high officials (al-Maḳrīzī, *al-Khiṭaṭ*, Būlāḳ 1270, i. 403). In eastern countries he was called *ḳāḍī 'l-ḳuḍāt*, in the western *ḳāḍī 'l-djamā'a* (Dozy, *Suppl. aux Dict. Arab.*, ii. 363b). In later times the *ḳāḍī 'l-'askar* was also a high official (cf. al-Ḳalḳashandī, *Ṣubḥ al-A'shā*, iv. 36; *Autobiogr. d'Ibn Khaldoun*, p. 102, *Journ. As.*, 4th Ser., iii. 327; J. v. Hammer, *Des Osmanischen Reichs Staatsverfassung*, ii. 378 *sqq.*). Some ḳāḍī's were military leaders.

In the large cities, where numerous adherents of the different *fiḳh* schools lived together, a ḳāḍī was appointed, if necessary, for each *madhhab*. For example, there were in later times four ḳāḍīs in Cairo. (Quatremère, *Hist. d. sultans mamlouks*, i. i, p. 98, Note; *Autobiogr. d'Ibn-Khaldoun*, *loc. cit.*).

AL-ḲĀḌĪ AL-FĀḌIL, ABŪ 'ALĪ 'ABD AL-RAḤĪM B. 'ALĪ B. MUḤAMMED B. AL-ḤASAN AL-LAKHMĪ AL-BAISĀNĪ AL-'ASḲALĀNĪ, MUḤYĪ (MUDJĪR) AL-DĪN, Saladin's celebrated vizier, was born on 15 Djumādā ii. 529 (3 April 1135) at Asḳalān [q. v.] where his father, a native of Baisān, called al-Ḳāḍī al-Ashraf, filled the office of judge. In 543/4 (1148—9) his father placed him in the *Dīwān al-Inshā'* in Cairo as a learner. By 548 (1153) he had entered the service of Ibn Ḥadīd, ḳāḍī of Alexandria, as secretary. As his elegant reports from there attracted attention to him in Cairo, he was summoned thither as superintendent of the *Dīwān al-Djaish* by al-'Ādil Ruzzīk b. al-Ṣāliḥ Ṭalā'i', the last representative of the vizier-family of the Banū Ruzzīk. When the latter soon afterwards was overthrown by Shāwar, prefect of Ḳūṣ, al-Ḳāḍī al-Fāḍil became secretary to Shāwar's son Kāmil and after Shāwar's murder to Shīrkūh, his successor in the office of vizier. In 563 (1167—8) he became deputy for Ibn al-Khallāl, chief of the *Dīwān al-Inshā'*, under whom he had begun his official career and on the latter's death on 23 Djumādā ii. 566 (March 4, 1171) was appointed his successor, Saladin having in the meanwhile taken over the vizierate. When in the next year, on the death of the last Fāṭimid, Saladin himself assumed the rule in Egypt, al-Ḳāḍī al-Fāḍil became his right hand man in carrying through the reforms necessary in the army and taxation. He then accompanied the Sulṭān on his campaigns in Syria. He was in Egypt from 585 to 586 (1189—90) to control the financial administration and re-equip the army and navy. He then returned to Syria and remained with Saladin till the latter's death on 27 Ṣafar 589 (March 1193). When al-

Malik al-Afḍal, who had taken over the government in Damascus, very soon jeopardised his authority by stupid measures, al-Ḳāḍī al-Fāḍil went to Egypt to al-Malik al-ʿAzīz. War soon afterwards broke out between the two brothers, but in 591 (1195) peace was made through the mediation of al-Ḳāḍī al-Fāḍil. He thereupon retired into private life. He died suddenly on 6 or 7 Rabīʿ ii 596 (26 or 27 Jan. 1200). Of the numerous state documents which al-Ḳāḍī al-Fāḍil composed during his activity in the *Dīwān al-Inshāʾ*, many examples are preserved in MSS. and in Abū Shāma. Helbig gives a complete list (p. 67—75). In addition there is his correspondence with Usāma b. Munḳidh concerning the latter's *Kitāb al-ʿAṣā* from the *Kharīda* of ʿImād al-Dīn in H. Derenbourg, *Nouv. Mél. Orient.*, p. 147—52; *Vie d'Ousâma*, French transl., p. 383—392. During his official career he also edited an official journal, *Mutadjaddidāt*, of which al-Maḳrīzī gives many specimens in the *Khiṭaṭ*. These are not only notes on official letters and the answers to them but reports also on important happenings in the kingdom or on gifts of honour granted by the Sulṭān.

AL-ḲĀḌĪ AL-HARAWĪ. [See AL-ʿABBĀDĪ.]

ḲĀḌĪ KHĀN FAKHR AL-DĪN, AL-ḤASAN B. MANṢŪR AL-ŪZDJANDĪ AL-FARGHĀNĪ, was a Ḥanafī Muftī and scholar who composed a large number of esteemed juristic works and commentaries on Ḥanafī works. In particular his collection of legal decisions (*Fatāwā Ḳāḍī Khān*, in 4 vols. lith. Calcutta 1835; with the subsidiary title *al-Fatāwā al-Sirādjīya*, lith. Lucknow 1293—5; pr. Cairo 1282) has become widely know on account of its convenience. He died in Ramaḍān 592 (1196).

ḲADĪM. [See ḲIDAM.]

AL-ḲĀDIR, the Mighty, one of the most beautiful names of Allāh; cf. Aḥmad b. al-Ḥusain al-Baihaḳī, *al-Asmāʾ wal-Ṣifāt*, Allāhābād 1313, S. 15; Redhouse, *The Most Comely Names*, *Journ. Roy. As. Soc.*, 1880, S. 49.

AL-ḲĀDIR BI 'LLĀH, ABU 'L-ʿABBĀS AḤMAD B. ISḤĀḲ, ʿAbbāsid Caliph. After the deposition of al-Ṭāʾīʿ, his cousin Abu 'l-ʿAbbās Aḥmad was proclaimed Caliph in Ramaḍān 381 (Nov. 991) with the name al-Ḳādir. The latter was a grandson of al-Muḳtadir; his mother was a slave. During his long reign he was entirely under the influence of the amīrs ruling in Baghdād and only once did he give evidence of having a mind of his own. This was when the Būyid Bahāʾ al-Dawla [q. v.] wished to replace the Sunnī chief ḳāḍī by a Shīʿī but his plan was frustrated by the opposition of al-Ḳādir, whereupon the Shīʿīs were given a superior of their own under the title *naḳīb* "intendant". For the rest, all heretics, notably the Muʿtazilites, were treated with the greatest severity. In this period arose the dynasties of the Marwānids, the ʿUḳailids and the Mirdāsids, and the Ghaznawid kingdom attained its greatest prosperity, while the internal disruption under the Būyids increased, and the Ḥamdānids and Sāmānids, which latter had long been a bulwark against the Turks, collapsed. Al-Ḳādir died in Dhu 'l-Ḥidjdja 422 (Nov.-Dec. 1031) at the age of over 80. He is also mentioned as the author of some theological treatises.

ḲĀDIRĪYA, Order (*ṭarīḳa*) of dervishes called after ʿAbd al-Ḳādir al-Djīlānī [q. v.].

1. Origin. ʿAbd al-Ḳādir (ob. 561 = 1166) was the principal of a school (*madrasa*) of Hanbalite Law and a *ribāṭ* in Baghdād. His sermons (collected in *al-Fatḥ al-Rabbānī*) were delivered sometimes in the one, sometimes in the other; both were notable institutions in the time of Ibn al-Athīr, and Yāḳūt (*Irshād al-Arīb*, v. 274) records a bequest of books made to the former by a man who died in 572 (1176-7). Both appear to have come to an end at the sack of Baghdād in 656 (1258), till when it is probable that their headship remained in the family of ʿAbd al-Ḳādir, which was numerous and distinguished. In the *Bahdjat al-Asrār*, where an accurate account of his descendants is given (pp. 113—117), it is stated that ʿAbd al-Ḳādir was succeeded in the *madrasa* by his son ʿAbd al-Wahhāb (552—593 = 1157—1196), who was followed by his son ʿAbd al-Salām (ob. 611 = 1214). Another son, ʿAbd al-Razzāḳ (528—603 = 1134—1206-7), was a notable ascetic. Several members of the family perished during the sack of Baghdād, when it would appear that both these institutions came to and end.

A *ribāṭ* was at this time distinguished from a *zāwiya*, the former being a *coenobium*, the latter a place where an ascetic lived in solitude (al-Suhrawardī, *ʿAwārif al-Maʿārif*, margin of the *Iḥyāʾ*, Cairo 1306, i. 217). In the time of Ibn Baṭṭūṭa *zāwiya* had come to be used in the former sense also, and his description of the religious exercises practised at the *zāwiya* (i. 71) would probably suit what went on at ʿAbd al-Ḳādir's *ribāṭ*. The body of rules and doctrines which had his authority was sufficient to constitute a system (*madhhab*; *Bahdja*, p. 102), and by accepting the *khirḳa* from the shaikh the *murīd* signified that he subordinated his will to that of the former (al-Suhrawardī, i. 192). A long list is given in the *Bahdja* of men who attained various degrees of distinction who had received the *khirḳa* from ʿAbd al-Ḳādir, two of them at the age of seven and one at the age of one. These persons were said to "ascribe themselves" (*intasaba* or *intamā* or even *tasammā*) to

'Abd al-Ḳādir, and could bestow the *khirḳa* on others as from him; in doing so they would stipulate that the *murīd* was to regard 'Abd al-Ḳādir as his shaikh and director after the Prophet. In a tradition which is likely to be apocryphal (*Bahdja*, p. 101), dated 592 (1196), 'Abd al-Ḳādir declared that assumption of his *khirḳa* was not absolutely necessary for entry into his Order; personal attachment to himself was sufficient. It would appear that during his lifetime several persons carried on propaganda in favour of his system; one 'Alī b. al-Haddād obtained proselytes in Yemen, and one Muḥammad al-Baṭā'iḥī, resident in Baalbek, did likewise in Syria; one Taḳī al-Dīn Muḥammad al-Yūnīnī, also of Baalbek, was another propagandist, and one Muḥammad b. 'Abd al-Ṣamad in Egypt "ascribed himself to 'Abd al-Ḳādir and in treading the Path relied on him after God and His Apostle" (*Bahdja*, pp. 109, 110). Since all who ascribed themselves to him were promised Paradise, the Order is likely to have been popular; and even in recent times missionaries in Africa appear to have little difficulty in obtaining fresh adherents to it (cf. O. Lenz, *Timbuktu*, ii. 33).

That 'Abd al-Ḳādir's sons had some share in spreading it is likely, though Ibn Taimiya (ob. 728 = 1328) mentions that he had associated with one of his descendants who was an ordinary Muslim and not a member of it, and so did not agree with those who held fanatical views about him (*Bughyat al-Murtād*, p. 124). The *Bahdja* however does not bear out Le Chatelier's assertion (*Confréries Musulmanes du Hedjaz*, p. 35) that in 'Abd al-Ḳādir's life-time some of his sons had been preaching his doctrine in Morocco, Egypt, Arabia, Turkestan and India. It says much of 'Abd al-Razzāḳ, but nothing of the "mosque now in ruins, whose seven gilded domes have often served as the subject of description by Arabic historians", which this son is supposed to have built. Indeed this mosque appears to be later than Ḥamd Allāh Mustawfī (740 = 1339-40), the first author later than the *Bahdja*, who mentions 'Abd al-Ḳādir's tomb (*Nuzhat al-Kulūb*, transl. Le Strange, p. 42). Nor does it confirm the statement that this 'Abd al-Razzāḳ introduced the use of music in the ritual, and indeed the employment of this was earlier than 'Abd al-Ḳādir's time, and is discussed by al-Suhrawardī (ii. 116) without allusion to 'Abd al-Razzāḳ. E. Mercier (*Histoire de l'Afrique Septentrionale*, iii. 14) asserts that the Order of Ḳādiriya existed in Berbery in the xii[th] century A. D., and was closely connected with the Fāṭimides (whose rule terminated 567 = 1171), but he gives no authority for these statements.

Al-Suhrawardī holds that the exercises of each *murīd* should be determined by his shaikh in accordance with his individual needs, whence it is unlikely that 'Abd al-Ḳādir instituted any rigid system of *dhikr*, *wird* and *ḥizb*, and indeed those in use among different Ḳādirī communities differ (Rinn, *Marabouts et Khouan*, p. 183 *sqq.*). The initiation ceremonies given on Turkish authority by J. P. Brown (*The Dervishes*, p. 98) are quite different from those furnished by Rinn on North African authority. In one of these latter there is a tendency to set 'Alī above Muḥammad and to insist on the importance of Ḥasan and Ḥusain, which cannot well represent the views of the Ḥanbalite 'Abd al-Ḳādir. The *wird* of 'Abd al-Ḳādir in *al-Fuyūḍāt al-Rabbāniya* is given on the authority of one 'Abd Allāh b. Muḥammad al-'Adjamī, who lived 185 years (536—731), and may be regarded as mythical.

2. **Development.** Ḳādirism seems from an early period to have developed on different lines according as 'Abd al-Ḳādir was regarded as the founder of a system involving rites and practices, or as a worker of miracles. In the latter direction it meant the deification of 'Abd al-Ḳādir, the extremists holding that he was Lord of Creation after God, absolutely, whereas the more moderate supposed that he was so only in his own age (*Bughyat al-Murtād*, *l. c.*). The latter was the view of Ibn 'Arabī, who takes him as an example of a *khalīfa* who showed himself and practised sovereignty (*taṣarruf*; *al-Futūḥāt al-Makkiya*, ii. 407); such a *khalīfa* in his system is independent of the revelation to Muḥammad (*Fuṣūṣ al-Ḥikam*, § 16). But there was also a theory that 'Abd al-Ḳādir practised in his grave all the activities (*taṣarruf*) of the living (Ibn al-Wardī [ob. 749], *Ta'rīkh*, ii. 70); and Ibn Taimiya (*al-Djawāb al-Ṣaḥīḥ*, i. 325) mentions him among saints who in his time still appeared to people, being in reality impersonated by demons. In the initiation ceremonies recorded by J. P. Brown, *l. c.*, the candidate for admission to the Order sees 'Abd al-Ḳādir in dreams; in one case so often and so clearly that without having seen 'Abd al-Ḳādir's portrait he could recognize him among a thousand. The form of Ḳādirism which means the worship of 'Abd al-Ḳādir seems to prevail in North Africa, where it is called Djīlālism (for Djīlānism), and whole communities are called Djīlāla. Their system has been described as the application of Ṣūfic mysticism to beliefs that are certainly pre-Islamic, and the materialization of that mysticism under the form of a cult of hidden subterranean powers (E. Michaux-Bellaire in *Archives Marocaines*, xx. 235). Here the word *khalwa* is used for a heap of stones where women attach rags to reeds planted between the stones and where they burn benzoin and styrax in potsherds (*ibid.*, xvii. 60). Such *khalwa*'s are to be found in all the Arab villages. Similarly "in the province of Oran on all the roads and on the summits of the chief mountains *ḳubbah* are to be found in the name of 'Abd al-Ḳādir Jilali" (E. de Neveu, *Ordres Religieux chez les Musulmans d'Algérie*, p. 30). The society of the Genāwah or Negroes of Guinea has placed itself entirely under the protection of Mawlāy 'Abd al-Ḳādir with all his array of male and female demons; wherein M. Michaux-Bellaire finds traces of the powers which, according to the Ḳur'ān (and even earlier authorities) belonged to Solomon. The cult of 'Abd al-Ḳādir is most ardently practised by the women in the Khlot and Ṭlīḳ, who come to the *khalwa* for every sort of object, and to satisfy their loves and hates in all the acts of their existence. The men on the other hand chiefly go to the *khalwa* when they are ill (*Arch. Maroc.*, vi. 329).

That this development is inconsistent with Islamic orthodoxy is evident, and it is attacked by such authorities as Ibn Taimiya and Ibrāhīm al-Shāṭibī (*I'tiṣām*, i. 348 *sqq.*). The system to which the name Ḳādiriya is more ordinarily applied differs from other orders mainly in ritual, although, through circumstances connected with its origin, "it has not that homogeneity of statutes which is to be found in other congregations, which seem to form small exclusive churches outside which

there is no salvation" (Rinn, p. 186). Though the founder was a Ḥanbalite, membership is by no means confined to that school, and the Order is theoretically both tolerant and charitable.

3. Geographical Distribution. Since historical and geographical works rarely distinguish between the different *ṭuruḳ* in their accounts of religious buildings, little can be said with certainty of the date at which the first Ḳādirī *zāwiya* or *khānḳāh* was established in any country save ʿIrāḳ. The Order is said to have been introduced into Fez by the posterity of two of ʿAbd al-Ḳādir's sons, Ibrāhīm (ob. 592 = 1196 in Wāsiṭ) and ʿAbd al-ʿAzīz (who died in Djiyāl, a village of Sindjār); they had migrated to Spain and shortly before the fall of Granada (897 = 1492) their descendants fled to Morocco. The full genealogy of the Shurafāʾ Djīlāla of Fez is given in *Arch. Maroc.*, iii. 106—114, on the authority of *al-Durr al-Sanī* of Ibn al-Ṭaiyib al-Ḳādirī (1090 = 1679), who claims to have used a series of authentic documents. The *Madrasa* of ʿAbd al-Ḳādir in Fez is mentioned as early as 1104 = 1692/3 (*ibid.*, xi. 319). The order was introduced into Asia Minor and Constantinople by Ismāʿīl Rūmī, founder of the *khānḳāh* known as the Ḳādirīkhāneh at the Top-khāneh. This personage (ob. 1041 = 1631), who is called *Pīr thānī*, "Second Shaikh", is said to have founded some 40 *tekke*'s in these regions (*Ḳāmūs al-Aʿlām*). A Ḳādirī *ribāṭ* in Meccah is mentioned by Ṣāliḥ b. Mahdī in *al-ʿAlam al-Shāmikh*, p. 381, about 1180 (1669/70), but the assertion that a branch was established there during the lifetime of ʿAbd al-Ḳādir (Le Chatelier, *o. c.*, p. 44) is not improbable, since Meccah has a natural attraction for the Ṣūfīs. In the *Āʾīn-i-Akbarī* (about 1600; transl. Jarrett, iii. 357) the Ḳādiriya Order is mentioned as one that is highly respected but is not included among those recognized in India; nor does there appear to be any allusion to it in the list of Indian Ṣūfīs in the *Maʾāthir-i Kirām* (1752), though some other Orders are noticed, and ʿAbd al-Ḳādir himself is mentioned. Yet see Khāfī Khān, *Muntakhab al-Lubāb*, ii. 604 and art. INDIA, p. 489.

Some statistics (to be received with caution) of the Ḳādirīs and their *zāwiya*'s are given by Depont et Coppolani (*Confréries Religieuses Musulmanes*, pp. 301—318). Much of its development is admittedly recent, and may be due to the fame won by the namesake of ʿAbd al-Ḳādir who for so many years resisted the French occupation of North Africa (see i. 43 *sq.*). It is doubtless represented in all Islamic countries, though it would appear that certain derived *ṭuruḳ* enjoy greater popularity in many places. Thus the Ḳādirism of Fouta in Guinea, which has become a distinct sign whereby the Diakanke tribe can be recognized, is derived through the Sīdia from the Ḳādirism of the Kounta of Timbuctu (P. Marty in *Revue du Monde Musulman*, xxxvi. 183). These Kounta however form a *filiale* of the Ḳādiriya, and some of them prefer to call themselves Shādhiliya (*ibid.*, xxxi. 424).

4. Organization. The Ḳādirī community acknowledges nominal allegiance to the keeper of ʿAbd al-Ḳādir's tomb in Baghdād, and the deeds of investiture published by Rinn, p. 179, and in the *Revue du Monde Musulman*, ii. 513 and ix. 290, are from this source. It would seem however that the actual authority of this personage is chiefly recognized in Mesopotamia and India. The latter periodically send gifts which form the main source of the revenues of his establishment; the members of this family find it worth while to learn Urdu. The Meccan *zāwiya*'s are subject to the *Shaikh al-Ṭuruḳ*, who has the right to nominate their *muḳaddam*. The Egyptian branch is under the control of the Sayyid al-Bakrī, who is also *Shaikh al-Ṭuruḳ*; ʿAlī Pasha Mubārak (iii. 129; see also F. Kahle in *Der Islam*, vi. 154) reckons the order as one of the four which go back to a *ḳuṭb*, but asserts that it has neither *furūʿ* nor *buyūt*. In Africa, according to Rinn, each *muḳaddam* names his successor; in the event of one dying without having nominated, an election is made by the *ikhwān* at a *ḥaḍra*. The approval of the head of the order in Baghdād is then solicited, and has never been refused. The organization of the Order in North Africa is described somewhat fully by Rinn, Depont et Coppolani, in the works cited. The system appears to be in general congregational, i. e. the *zāwiya*'s are independent, and the relation between them and the central institution in Baghdād is very loose. The principle whereby the headship of a *zāwiya* is hereditary is generally recognized.

5. Symbols and Rites. The sign of the Turkish Ḳādirīs is said to be a rose which is green, having been adopted by Ismāʿīl Rūmī. The candidate for admission to the Order after a year brings an ʿ*araḳiye* or small felt cap, to which if the candidate be accepted the Shaikh attaches a rose of 18 sections, with Solomon's Seal in the centre. This cap is called by them *tādj*. The symbolism of this is explained by J. P. Brown, *The Dervishes*, p. 98 *sqq.* (copied by Wilberforce Clarke, transl. of ʿ*Awārif al-Maʿārif*, p. 159; the Urdū translation *Kashf Asrār al-Mashāyikh* adds nothing to Brown's information). According to him, they prefer the colour green, though they allow others; in Lane's time the turbans and banners of the Ḳādirīs in Egypt were white; most members of the Order were fishermen, and they in religious processions carried upon poles nets of various colours (*Modern Egyptians*, 1871, i. 306). In India there are festivities in honour of ʿAbd al-Ḳādir on 11 Rabīʿ II, and pilgrimages are made in many places in Algeria and Morocco to the *zāwiya*'s and shrines of the saint (Rinn, p. 177). The *Mausim* of the Djīlāla at Salé is described at length by L. Mercier in *Arch. Maroc.*, viii. 137—139; it commences the seventh day of the *Mūlūd* (*Mawlid*), i. e. the Feast of the Prophet's Birthday, and lasts four days 17—20 Rabīʿ I. Sheep and oxen are presented to the descendants of ʿAbd al-Ḳādir. M. Michaux-Bellaire distinguishes in Morocco between the ceremonies of the Ḳādiriya, who recite the *ḥizb*, and the Djīlāla, who recite the *dhikr* to the accompaniment of instruments; and again between the Djīlāla of the country, whose instruments are the *bendīr* (a sort of big tambourine without bells) and ʿ*awwāda*, and those of the town, whose instruments are the *ṭbīla*, *ṭabl* and *ghaiṭa* (*Arch. Maroc.*, vi. 330 and xvii. 60). A description of the *ḥaḍrat al-mulūk*, a performance executed with these last instruments, which leads to ecstasy, is given by him in the first passage cited. He further records some special ceremonies connected with the Awlād Khalīfa in the Gharb (*ibid.*, xx. 283). All the Hilālī of the Gharb are Djīlāla, and in all the *ḥaḍra*'s (services) of the

Djilāla the presence of at least one Khalīfa is necessary for the direction of ceremonies, and when no actual Khalīfa is present, some one there takes the name in order to perform the priestly duty. The origin of the name Awlād Khalīfa is obscure (p. 284); it may be noticed that the *Bahdja* mentions one Khalīfa b. Mūsā al-Nahrmalikī as having played a leading part in the propagation of ʿAbd al-Ḳādir's system. "The *ḥadra* of the Djilāla of the country contains neither the *ḥizb* nor the *dhikr* instituted by the Shaikh, but a plain *dhikr* of improvised words in the ceremonial rhythm of the *banādir* (plur. of *bendir*). These improvisations always terminate with the words "Thus spake Mawlāy ʿAbd al-Ḳādir" or "O Mawlāy ʿAbd al-Ḳādir!"" (Michaux-Bellaire, p. 288).

Various collections of rituals supposed to have been recommended by ʿAbd al-Ḳādir have been published in Egypt, Turkey and India. In *al-Fuyūḍāt al-Rabbāniya* he who is about to enter upon *khalwa* (retreat) is advised to fast in the day and keep vigil at night. The *khalwa* lasts forty days. "If a figure reveal itself to him saying "I am God", he should say "nay rather thou art in God", and if it be for probation, it will vanish; but if it remain, then it will be a genuine revelation (*tadjalli*)" (Dihli 1330, p. 60). Reduction of food during the 40 days should be gradual till for the last three fasting is complete. At the end he returns by degrees to his former diet.

Some practices peculiar to the Djilāla of Tangier are recorded by G. Salmon (*Arch. Maroc.*, ii. 108). Those who make vows to ʿAbd al-Ḳādir are in the habit of depositing in the *zāwiya* white cocks, which are called *muḥarrar* (Sūra iii. 31); they do not kill them, but leave them free to rove about the *zāwiya*, where however they do not long survive; the Sharīf who lives hard by takes them for his food. The four daughters of a deceased Sharīf continued to live on the revenues of the *zāwiya* and carry away the *muḥarrar* fowls. The *muḳaddam* at this *zāwiya* was the Sharīf, who conducted the ceremonies at which the Ḳurʾān is repeated without the *ḥizb* of ʿAbd al-Ḳādir being pronounced, and where dances similar to those of the ʿIsawīs [q. v.] are performed. Circumcisions are performed at the *zāwiya* on the first day of the *mawlid*. A nightly meeting called *laila* is held on the eve of this day, at which the *ḥizb* of ʿAbd al-Ḳādir is recited. At El-Qṣar, where there are also some local practices, all the potters belong to the Djilāla, among whom the richer members of the community are to be found (*ibid.*, ii. 163).

The first time that the Ḳādirīs appear to have played a political part was during the French conquest of Algeria, when the chief of the Ḳādiriya Muḥyi ʾl-Dīn, having been offered the leadership in the war against the infidel, permitted his son ʿAbd al-Ḳādir to accept it. This person was able to utilise the religious organisation of his order in order to establish the sovereignty which the French had accorded him, and when his sovereignty was threatened could fall back on his rank as *muḳaddam* of his order to win fresh recruits (H. Garrot, *Histoire générale de l'Algérie*, Algiers 1910, p. 800, 863 etc.). Since the fall and exile of this personage it would appear that the Ḳādirīs in Africa have lent their support to the French government. "In 1879 when there was a local insurrection in Aurès the shaikh of the Ḳādiriya of Menāʿa, Si Muḥammad b. ʿAbbās, displayed unimpeachable loyalty [s. art. AWRĀS, I. 523a]; and the same order helped the French government to extend their influence in the Sahara at Wargla and El-Wad. Their *Nāʾib*, Si Muḥammad b. Ṭayyib, fell on the French side at the battle of Charouin, March 2, 1901." (Israel Hamet, *Les Musulmans Français du Nord de l'Afrique*, Paris 1906, p. 276). — In the Ottoman revolution of 1908 it is said that their sympathies were with the revolutionists, but that for fear of being outdone in religious zeal by the rival Rifāʿī order they joined in Baghdād in the "pogrom" against the Jews (L. Massignon in *Revue du Monde Musulman*, vi. 461).

AL-ḲĀDISĪYA, the name of several places in the ʿIrāḳ and in Mesopotamia:

1. A town in the ʿIrāḳ, on the Eastern bank of the Tigris, 8 miles S. E. of Sāmarrā. With the latter it seems to have been closely connected in its period of prosperity. We do not know what special part al-Ḳādisiya played at that time. Perhaps, as Herzfeld, (*op. cit.*, p. 107) suggests, it is really identical with the town of al-Ḳāṭūl which Hārūn al-Rashīd or the Caliph al-Muʿtaṣim began to build before the foundation of Sāmarrā. Yāḳūt and other Arab geographers mention the glassworks of al-Ḳādisiya. In the middle ages the important Dudjail canal left the Tigris opposite the town. The ruins of al-Ḳādisiya lie in Lat. 34° 5′ N., between the two still existing out of the former three Tigris canals, called al-Ḳāṭūl; they are a short quarter of an hour distant from the bank of the Tigris. The old name has survived and is now popularly pronounced Ḳādisiya (occasionally corrupted to Djāsiya and Djisiya). We owe full accounts of these ruins particularly to Ross and Jones; E. Herzfeld also has recently investigated the ruins. Jones gives a plan of the ruins of the town, which Herzfeld says is entirely correct.

The enclosing walls which measure about 6000 paces form a regular octagon. They are flanked by towers at the corners and defended by 16 bastions at intervals. They were built of bricks which in technique, plan and preservation resemble the castra of Sāmarrā. According to all criteria, these ruins belong — in Herzfeld's opinion — to the ʿAbbāsid period, not to an older one. Ten minutes from al-Ḳādisiya, just on the river bank, are also mounds of ruins, called al-Ṣanam. They mark the site of a mediaeval or ancient town, half of which has already been washed by the Tigris. On a remarkable find of statues made here, see Cl. Rich, *Narrative of a Residence in Koordistan*, 1836, ii. 152. Al-Ṣanam perhaps was within the area of al-Ḳādisiya and is to be regarded as its port.

2. A town in the 'Irāḳ, SSW. from Kūfa, a station on the pilgrim road from Baghdād to Mecca. According to the itineraries of the Arab geographers, it was 15 Arab (= Roman) miles from Kūfa. Al-Ḳādisiya was situated in the western part of the *Taff*, that steppe region rising above the Babylonian cultivated country (*al-Rīf*) and characterised by springs (e. g. that of al-'Udhaib), which forms the transition to the high plateau of the Arabian desert. This *Taff* in the Sāsānian period was protected by a series of watch-houses (*maslaḥa*'s) and a great wall and ditch (*khandaḳ*) from the raids of Arab tribes. The last village of the *Taff*, just before entering the desert, was al-'Udhaib, also a station on the Baghdād-Mecca road already mentioned. The distance between it and al-Ḳādisiya, with which it was connected by two walls was 6 (according to another source, 4) Arab miles. On the geographical conception of the Taff cf. Yāḳūt, *op. cit.*, iii. 539 and Seybold in the *Orient. Lit. Zeitung*, vi. (1903), col. 241—4. The breadth of the 'Irāḳ is usually measured by the Arab geographers by a line which runs from Ḥulwān in the northeast to al-Ḳādisiya (or al-'Udhaib) in the southwest; cf. Streck, *op. cit.*, i. 2, 5.

The exact location of al-Ḳādisiya was unknown until quite recently. An attempt had been made to identify it with the early Muḥammadan ruins of al-Ukhaiḍir (25 miles S.S.W. of Kūfa) — for example by Ritter, *op. cit.*, xi. 956, Loftus, *Travels in Chaldaea and Susiana* (London 1857), p. 64 note, and Justi in the *Grundriss der Iran. Phil.*, ii. 546. This identification, however, is to be definitely rejected as erroneous. Besides, Ritter, *op. cit.*, x. 186 places al-Ḳādisiya much too far north, while the locations of al-Ḳādisiya and al-'Udhaib given by Wagner (*Nachr. d. Gött. Gesellsch. d. Wiss.*, 1902, p. 257—9) are fairly correct. A. Musil, on his journey of exploration in 1912, was the first to rediscover the real site of al-Ḳādisiya, cf. his report in the *Anzeiger der phil.-hist. Kl. der Wien. Akad. der Wiss.*, 1913, i. 11 (12 of the reprint). Musil there remarks that the spring al-'Oḏeyb rises in the valley of of Mseyjīd: "on the left bank of that valley, on the edge of a swampy *ḳīr* we were shown the ruins of al-Ḳādsijje or Dār al-Ḳāṣr (= Ḳādisiya)". According to the map which Musil appends to his essay in the *Wiener Zeitschr. für die Kunde des Morgenl.*, xxix. (1916), p. 461, the ruins mentioned are situated in 31° 45′ N. Lat. and 44° 8′ E. Long. (Greenwich) directly south of Nadjaf and 19 miles from Kūfa.

The locality of Kaides which Beauchamp in his excursion to the ruins of Babylon in 1780 heard of as the find-spot of a statue some considerable distance away (see the reprint of his account of his journey in the *Revue d'Assyriologie*, x. 190) is perhaps also identical with the remains of al-Ḳādisiya discovered by Musil. Kaides is probably = Ḳādis, the shorter form of the name, which is occasionally found alongside of Ḳādisiya, as for example in an old Arab poet (see al-Bakrī, ed. Wüstenfeld, p. 226). In al-Ṭabarī, etc. Firdausī writes Ḳādisī and Ḳādisiya. In the neighbourhood of al-Ḳādisiya there was a village called al-Ḳudais, "little Ḳādis". The poets give the whole district round al-Ḳādisiya the collective name al-Ḳawādis.

The Arab geographers of the ivth (xth) century (al-Iṣṭakhrī, Ibn Ḥawḳal, al-Muḳaddasī) describe al-Ḳādisiya as a small town with two gates and a mud fortress, in the midst of cultivated fields and groves of date-palms, watered by a canal led from the Euphrates, the last running water in the 'Irāḳ. In ancient times the inner arm of the Persian Gulf seems to have stretched up to the region of al-Ḳādisiya. The main arm of the Euphrates once flowed, as al-Mas'ūdī notes (*Murūdj al-Dhahab*, ed. Paris, i. 215), towards al-Ḥīra, where its ancient bed was still visible and was called *al-'Atīḳ* "the old (river)". It took its course between al-Ḳādisiya in the north-east and al-'Udhaib in the southwest; at al-Ḳādisiya there was a bridge across it called Djisr al-'Atīḳ or Djisr al-Ḳādisiya.

In the Sāsānian period al-Ḳādisiya played a prominent part as an important frontier town of the Persian empire. It was not till the Muhammadan period that the town became very famous on account of the decisive battle fought in its vicinity, with which the Arab opened their second campaign against the lands of the Euphrates and Tigris in the most successful fashion. The Muslim army was under the command of Sa'd b. Abī Waḳḳāṣ, while the Persian troops were led by the imperial commander-in-chief Rustam. Statements differ very considerably regarding the numbers on each side; the number given for the Arabs varies from 6000 to 38000 and that for the Persians 30000 to 120000 men. The latter were undoubtedly superior to the Muslims in strength. The estimate of an almost contemporary Armenian historian may be fairly near the truth when it puts the Persians at 80000 men and the Arabs at 9—10000, besides the Syrian reinforcements of 6000 men who arrived in the last stage of the fight.

It was only after the two sides had stood watching each other for weeks that they joined battle. The battle lasted three (or four) days. These days in the specifically 'Irāḳ tradition have special names, which are probably to be explained as place-names. In spite of all the heroic courage of the Arabs, the balance would finally have turned in favour of the Persians, if at the critical moment of the decision the troops hurried from Syria had not arrived in time. Their rapid and vigorous intervention decided the victory of the Arab arms. It was, however, not a cheap victory for the Muslims, as about a third of their whole force perished. About the doubtless very heavy Persian losses the accounts are contradictory. The Persian commander in chief Rustam was captured and killed in the heat of battle. Very considerable booty was taken by the victors. The most important trophy was the Persian imperial standard said to date from the early Īrānian period (on it see Sarre in *Klio*, iii. 358 *sq.*), Dirafsh-i Kāwiyān, which was cut in pieces and distributed. In the fighting with the retreating Persians the Arabs also captured the celebrated treasure of Nakhāridjān (properly Nakhwērgān) which consisted of valuable ornaments for women; cf. on it Nöldeke in the *Zeitschr. d. Deutsch. Morgenl. Ges.*, xxxiii. 523—4.

The glorious day of al-Ḳādisiya, which made the Arabs masters of the 'Irāḳ west of the Tigris, is

one of the most celebrated events in the great period of the Muslim conquests. It laid the foundations for the supremacy of the religion of Muḥammad in the nearer east. Of course tradition has woven many legends round the victory; it is frequently mentioned in the older Arab poetry.

The date of the battle is very uncertain. The statements in the different sources vary from the years 14 to 16 (635—637). One thing is certain that the battle was fought in the spring and that Baṣra was founded after it. Wellhausen (*op. cit.*, vi. 72) decides for 15 (636), while Caetani prefers 16 (637) (*op. cit.*, p. 629—633); see also Justi, *Grundr. der Iran. Phil.*, ii. 546.

The Armenian historians call the battle after Ḥīra (Armen. Herthican); see the account by Sebeos in Hübschmann, *Zur Geschichte Armeniens und der ersten Kriege der Araber* (Leipzig 1875), p. 14 and Caetani, *op. cit.*, p. 685.

In addition to the two towns mentioned above, Yāķūt knows three other places called Ķādisīya, namely two villages in the district of al-Mawṣil, on the Nahr al-Khāzir between al-Mawṣil and Irbil, and a third near Djazīra b. 'Umar in Mesopotamia; see Yāķūt, *al-Mushtarik*, ed. Wüstenfeld, p. 337. Ibn al-Athīr also mentions an al-Ķādisīya near Baghdād (*op. cit.*, xii. 91). We also find the shorter form al-Ķādis beside al-Ķādisīya, e. g. for the battlefield (cf. above), for a village near Herāt (see *al-Mushtarik*, p. 337; al-Balādhurī, p. 409, 2) and near Marw al-Rūdh (Yāķūt, iv. 7, 3). Probably in all these place-names, as Nöldeke suggests (*Zeitschr. der Deutsch. Morgenl. Ges.*, xxxiii. 1623), we have to deal with traces of a lost people of unknown nationality, namely the Kadishaeans, who appear in Syriac literature of the vth and vith centuries as a wild warlike people in the region of Sindjār. The places called al-Ķādisīya and al-Ķādis in Mesopotamia, Babylonia and on Persian territory are perhaps to be explained as settlements of branches of this stock, made by the Sāsānian kings. Of the celebrated al-Ķādisīya near Kūfa, it is at least definitely stated that its name comes from Ķādis near Herāt, from which the garrison of the fort belonging to the military cordon on the frontier had come. Cf. Nöldeke, *op. cit.*, p. 157 *sq.*, 162; J. Marquart, *Ērānšahr nach der Geographie des Ps. Moses Xorenac'i* (*Abhandlungen der Gött. Ges. der Wiss.*, 1901), p. 77, 78. (M. STRECK.)

ĶĀDJĀR (*ķaǰar* "marching quickly"; cf. Sulaimān Efendi, *Lughat-i Čaghatai*, Stambul 1298, p. 214), the name of the present ruling dynasty of Persia. It takes its origin from the Turkoman tribe of the same name settled in the district of Astarābād [q. v.], but which had not always been there. Persian historians assert that it is a branch of the great tribe of Djalāir [q. v.] and that it takes its name from Ķādjār Noyān, son of Sertāķ Noyān, who had been the tutor of Ghāzān Khān [q. v.]; this Sertāķ is without doubt the same as he who was put to death by Baidū [q. v.], because he was a partisan of Gaikhātū [q. v.] in 694 (1295) (Waṣṣāf, Bombay 1269, iii. 282; d'Ohsson, *Hist. des Mongols*, iv. 115). This tribe had, it is said, settled on the frontiers of Syria after the reign of Abū Sa'īd [q. v.], in 736 (1335); Tīmūr is said to have brought it back to Persia and into Turkestān, its native country, in 803 (1400). It was one of the seven Turkoman tribes which placed the Ṣafawī dynasty on the throne of Persia. To it belonged Shāh Ķulī *Ķurčī* (body-guard), who was twice appointed ambassador to treat for peace with the Turks in 962 (1555) and in 975 (1567) (Pečewī, i. 327, 334; v. Hammer, *Hist. de l'Empire Ottoman*, Fr. transl., vi. 69, 320; Riḍā Ķulī Khān, ix. 2 is wrong in giving the date 969). In 995 (1587), Shāh 'Abbās I finding them too numerous divided the tribe into three groups: 1. at Merw against the Uzbegs; 2. at Gandja and Erīwān; 3. at Astarābād in the fortress of Mubārakābād which he had just built; those who established themselves in the high part were given the name *Yukhārī-bash*; those who lived in the lower part adopted the name *Ashaghā-bash*. The object of settling them in this region was to protect it from the inroads of the Turkomans from beyond the frontier.

A member of the Astarābād branch was Fatḥ 'Alī Khān, the son of Shāh Ķulī b. Mahdī Khān b. Walī Khān b. Muḥammad Ķulī. To avenge the death of his two brothers he seized Astarābād. In 1135 (1723) he went to the defence of Iṣfahān against the Afghāns at the head of 1000 horsemen; but being denounced to Shāh Ḥusain as dangerously ambitious he returned to his province, abandoning the Ṣafawī king to his unfortunate destiny. Called to their help by the people of Ray, he fought without success against the Afghāns at Ibrāhīmābād in Warāwīn, and returned to Māzandarān to offer his services to Shāh Ṭahmāsp. During the advance on Meshhed he was executed by order of Ṭahmāsp's general Nādir (the later Nādir Shāh) on 14th Ṣafar 1139 (12th 1139 Oct. 1726) (Mahdī Khān, *Ta'rīkh-i Nādirī*, Tibrīz 1266, p. 21).

His son Muḥammad Ḥasan Khān, pursued by Nādir Shāh, took refuge with the Turkomans, collected supporters there and recaptured Astarābād, which he lost a little later again; it was then that the two obelisks of decapitated heads were built (*Kelleminār*) which Hanway saw (illustration in *Historical Account of British trade*, London 1753;

vol. i., reproduced in Sykes, *History of Persia*, 2nd ed., ii. 270). Muḥammad Ḥasan went to the tribe of Dāz, who expelled him under threats from Nādir. He then lived in the desert, where he heard by chance of the assassination of Nādir Shāh. He thereupon retook Astarābād (1160 = 1747). He was next attacked by Karīm Khān Zand, who besieged him for 40 days, then raised the siege and abandoned his camp (1165 = 1752). In 1168 (1755) Aḥmad Shāh Durrānī [q. v.] seized Meshhed and sent Pesand Khān at the head of 15 000 horsemen to attack Muḥammad Ḥasan's possessions, but this army was defeated at Sabzawār. Muḥammad Ḥasan followed up this success by conquering Kazwīn and Gīlān. He marched on Iṣfahān. Karīm Khān lost the battle of Gulnābād, fought four parasangs from this town, and fled to Shīrāz. In 1169 (1756) he seized Ādharbāidjān, where the Afghān Āzād Khān was in command; he annexed this province in 1170 (1757) and appointed as its governor his son Agha Muḥammad Shāh, then aged 18. Next year he marched on Shīrāz but his army melted away owing to scarcity of provisions. He then had to suppress several local revolts. His troops, exhausted by their continual marches, abandoned him; he returned to Astarābād with a body of *Ashāķabāsh* and his own private servants. Defeated in a fight with Shaikh 'Alī Khān in the desert of Kasak, the feet of his horse sank in the mire and in this position he was killed by the Kurd Sabz 'Alī, one of his servants who had gone over to the enemy (1171 = 1758).

Ḥusain Ķulī Khān, second son of the preceding, surnamed Djahān-Sūz on account of his courage and fearlessness, entered the service of Karīm Khān who also attached to his court Agha Muḥammad Khān then aged 30. The latter went to Shīrāz; his family settled in Ķazwīn. Appointed governor of Dāmghān, but carried away by his ambition, Ḥusain Ķulī attacked Astarābād and there gave himself up to plunder and massacre. He seized Māzandarān and surprised at Bārfurūsh, the capital of Māzandarān, the governor appointed by Karīm Khān, Mahdī Khān. He was shot in his tent by rebel Yomūt Turkomans at the age of 27. He was the father of Fatḥ 'Alī Shāh [q. v.].

Ķādjār Dynasty.

Fatḥ 'Alī Khān, born 1097 (1685) or 1104 (1693); accession 1133 (1721); died 1139 (1726—27); buried at Khwādja Rabī', near Meshhed.

Muḥammad Ḥasan Khān, born 1127 (1715); accession 1164 (1751); died 1172 (1758—59); buried at Shāh 'Abd al-'Aẓīm.

Ḥusain Ķulī Khān, surnamed Djahān-sūz, born 1164 (1751); accession 1184 (1770); died 1191 (1777); buried at Astarābād.

1. Agha Muḥammad Shāh, born 1155 (1742); accession 1193 (1779); died 1211 (1796—97); buried at Nadjaf (Meshhed 'Alī).
2. Fatḥ 'Alī Shāh, born 1185 (1771); accession at Teherān 1212 (1797—98); died 1250 (1834) at Ķumm. — 'Abbās Mīrzā, *nā'ib al-salṭana*, born 1203 (1788—89); died in Khorāsān before his father (1249 = 1833—34); buried at Meshhed.
3. Muḥammad Shāh, born 1222 (1807); accession 1250 (1834); died 1264 (1848); buried at Ķumm.
4. Nāṣir al-Dīn Shāh, born 1247 (1831—32); accession 1264 (1848); assassinated in 1896.
5. Muẓaffar al-Dīn, born 1269 (1853); accession June 8, 1896; died 14 January 1907.
6. Muḥammad 'Alī, born 1289 (1872); accession January 19, 1907; abdicated July 16, 1909.
7. Aḥmad Shāh, born 1314 (1898); attained his majority in 1914.

(CL. HUART.)

ĶADR (A.) another pronunciation of ĶADAR [q. v.].

ĶADRĪ, a Persian poet who commemorated the capture of the island of Kishm and of the town of Hormūz by 'Abbās I in two short epic poems, *Djangnāma-i Kishm* and *Djarūnnāma*. The former is edited by L. Bonelli in the *Rendiconti della R. Accad. dei Lincei*, vi., Semester 1, fasc. 8. Cf. Ethé in the *Grundriss der iran. Phil.*, ii. 237.

KĀF, the 22nd letter of the usual Arabic alphabet (numeral value 20; cf. the article ABDJAD). The pronunciation of *kāf* as an unvoiced palatal explosive, found as early as Sībawaihi, has survived in modern academic speech. In the present day popular speech we find some variants (in addition to *k*) notably the affricate *č* (<*ć* <*k'*). Cf. the article ARABIA, ARABIC DIALECTS, i. 396b; and Schaade, *Sībawaihi's Lautlehre*, Index.

(A. SCHAADE.)

ĶĀF, the 21st letter of the usual Arabic alphabet (numerical value 100; cf. the article ABDJAD). The form of the character goes back to the Nabataean *ķōf* and later in Arabic was assimilated in form to *fā'*, so that it had to be distinguished from the latter by pointing (cf. the article ARABIA, ARABIC WRITING, i. 383b and plate I). In Sībawaihi's time *ķāf* was pronounced as a velar *g*. This pronunciation is still frequently found among Beduins and peasants; in the ordinary popular language, however, *ķāf* is usually pronounced as *hamza*; for other modern popular pronunciations of *ķāf* see the article ARABIA, ARABIC DIALECTS, i. 396a. The modern academic pronunciation is *ķ* (i. e. velar *k*). Cf. Schaade, *Sībawaihi's Lautlehre*, Index. — Ķāf is also the title of Sūra L. of the Ķur'ān.

(A. SCHAADE.)

ĶĀF in the cosmology of Islām is the name of the mountain range surrounding the earth. On the shape of the earth there were different opinions among the later Muslims:

cf. al-Ķazwīnī, i. 143 *sq.*; al-Dimashķī, *Nukhbat al-Dahr* (ed. Mehren), p. 9; Ibn al-Wardī, *op. cit.*, p. 9 and thereon Zenker in Lane, *op. cit.*, ii. 229, 231 *sq.*; Reinaud, *op. cit.*, i. p. clxxxi *sq.* and Radloff-Hochheim in the *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xlvii. 220. Like the Hebrews and the Greeks in the period of Homer, Hesiod and the Ionian physicists, the ancient Arabs usually regarded the earth as a quite flat, circular disc; Muḥammad, to judge by passages in the Ķur'ān, entirely agreed with this view. The view held in the sacred revelation as well as in Tradition is still shared in Muslim countries by great masses of believers. The mountain Ķāf is separated from the disk of the earth by a region impassable to man. This, according to a statement of the Prophet (see the Persian version of al-Ṭabarī, *op. cit.*), is a dark stretch which it would take four months to cross. Another view connected with Greek and Iranian ideas regards the earth as immediately surrounded by a stinking, unnavigable body of water called *al-Baḥr al-Muḥīṭ* or *Uḳiyānūs* (Okeanos), which in whole or part is veiled in deep darkness and whose shores no one knows (cf. Abu 'l-Fidā', *op. cit.*, p. 19; al-Ķazwīnī, i. 104, 7; Ibn al-Wardī, p. 73; Zenker in Lane, *op. cit.*, p. 232, 234; Reinaud, *op. cit.*, ii. 1., p. 23 *sq.*). The whole, earth and sea, is then held together by the mountain wall Ķāf as by a ring.

From the descriptions given notably by Yāḳūt, al-Ķazwīnī and Ibn al-Wardī, Ķāf is a formation of green emerald, the reflection of which causes the green (to us: blue) of the heavens. Slightly diverging from this, another version says that only the rock (*al-ṣakhra*) on which the mountain Ķāf proper rests is of a kind of emerald. This rock is also called *al-watad*, the peg, because God created it as a support for the earth. The earth cannot support itself by its own strength — so some think —, it therefore requires a prop like this. If Ķāf did not exist, the earth would — as the Persian version of al-Ṭabarī says — be constantly trembling and no creature could live on it.

There were, however, more complicated views regarding the "bearers" of the earth. As the earth — so relates a tradition in al-Ķazwīnī, i. 145, 16 *sqq.*: — at first swayed to and fro unsteadily, God created an angel who took it on his shoulders and held it with his hands (a reminiscence of the heaven-supporting Atlas). This angel stands on a quadrangular block of green jacinth which in its turn is borne by a gigantic bull, which rests on a fish swimming in the water. Ibn al-Wardī (p. 12, 15 *sq.*) gives a similar account, emphasising that Ķāf arises out of the above mentioned block of jacinth. Another variant in Ibn al-Wardī (p. 13, 11 *sq.*) gives a still larger number of earth-bearers (but leaving out the angel) partly in a different order, for example, the rock supports the bull. For further variants see Wensinck, *The Ocean* etc., p. 18 (and the quotation in note 2), also J. Meyer, *Die Hölle im Islam* (Basel 1901), p. 46. The Muslim Persians describe the animal supporting the earth sometimes as a bull (cf. Djāmī, *Yūsuf u-Zalīkhā*, ed. Rosenzweig, Vienna 1824, p. 13, 2 *sq.*, and thereon Rosenzweig, *op. cit.*, p. 190a; Vullers, *Lex. Pers.-Lat.*, ii. 946b), sometimes as a monster, half bull and half fish (*gāwi māhī*; Firdawsī, *Shāhnāme*, ed. Vullers, p. 38, l. 59; 444, l. 190, and cf. Vullers, *Lex.*, ii. 947a). Baghdād folklore also knows the bull and fish as bearers of the earth; cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 301. Among the inhabitants of the Red Sea coast, the belief prevails, that the earth rests on the backs of colossal bulls, see E. Rüppel, *Reise in Abyssinien*, i. (Frankfurt a. M. 1838), p. 256. Al-Ķazwīnī gives for the bull and fish the names of the Biblical monsters, Leviathan and Behemoth, and thus shows definitely that the Muslim idea is connected with the old Biblical views, which again can in the last resort be traced to the Babylonian Chaos-tradition. The basic idea of the bull supporting the earth is, as Reinaud (*op. cit.*) has emphasised, also to be found in India. The rock already mentioned as supporting the earth and as the starting point of the mountain Ķāf may well be associated with the stone Shetiyya, which Jewish legend regards as the navel-stone of the earth sunk by God in the depths of chaos or primeval ocean, and as the support of the world. For the Jewish legend cf. Feuchtwang in the *Monatsschrift für Gesch. u. Wissensch. des Judentums*, liv. (1910), p. 724 *sq.*; W. H. Roscher, *Neue Omphalos-Studien* (*Abhandl. d. sächs. Gesellsch. d. Wiss.*), xxxi. (1915), p. 73 *sq.* It may be added that a tradition in al-Ķazwīnī (i. 144, 23) also gives the view that God made the world stand without any bond or support.

According to a very popular idea, Ķāf is the origin of all the mountains of the world. They are connected with it by subterranean branches and veins; if God wants to destroy any region, he simply orders one of these branches to be set in motion, which causes an earthquake. According to a different popular view, an earthquake is caused because the bull supporting the earth sometimes trembles under its burden.

Ķāf which is inaccessible to man is regarded as the end of the world; its name is therefore used as a symbol for this; cf. e. g. a verse in Djāmī's *Yūsuf u-Zalīkhā* (ed. Rosenzweig), p. 1, 14). This mythical mountain forms the boundary between the visible and the invisible world. No one knows what lies behind; God alone knows the creatures that live there. Many say (cf. Ibn al-Wardī, p. 188) that the area behind Ķāf belongs to the next world, is a land white like silver, 40 days' journey long and is the abode of angels. According to an alleged saying of Muḥammad (see Zenker in Lane, *op. cit.*, p. 236), there are still other lands beyond Ķāf: one of gold, 70 of silver, 7 of musk, each 10 000 days' journey long and broad and all inhabited by angels. It is also said that Ķāf as well as the region behind it is the abode of the Djinn. Ķāf itself is especially known as the abode of the fabulous bird Sīmurgh, a kind of vulture, which is essentially the same as the *'anḳā'* [q. v.] of the Arabs. Existing since the beginning of the world, this marvellous bird retired in monastic solitude to Ķāf and lives there contented and satisfied, a wise counsellor consulted by the kings and heroes of the past. Ķāf, his residence, is therefore simply called "Mount of Wisdom" in poetry, symbolically also "Mount of Contentment". In his celebrated work, *Manṭiḳ al-Ṭair* ("The Dialogues of the Birds"), the Persian poet Farīd al-Dīn 'Aṭṭār [see 'AṬṬĀR] describes the wandering of the Ṣūfī through the seven stages which the soul has to pass through till its complete merging into God, in the allegory of a very difficult, adventurous flight by a bird through

the seven valleys up to Mount Ḳāf, the throne of his all wise king Simurgh.

Ḳāf plays a part also in Arab fairy tales; in the *1001 Nights* it is several times mentioned. Oddly enough a number of Ḳur'ān expositors explain the title of Sūra l., the letter Ḳāf, as the name of the mountain Ḳāf.

In a narrower sense and localised on the earth, Ḳāf means that part of the Asiatic highlands which bounds the Muslim world in the North, especially the Caucasus and its spurs in Northern Persia. For this reason Demāwend, the scene, celebrated in the *Shāhnāma*, of the wonderful exploits of old Persian rulers and heroes is represented as the home of the Simurgh [see i. 937b].

There can hardly be a doubt that the Muslim idea of the mountain Ḳāf in the wider (mythic) and narrower sense is borrowed in its main features from the Persians. With them Alburz (Alburdj), old-Persian Hara-berezaiti ("the high mountain"), is originally the mythical mountain at the end of the earth which, like the Hellenic Olympus, also contains the palaces of the Gods. From the Avestan account one must regard the Hara-berezaiti as the backbone of the mountain system of the earth; for all other mountains of the world have grown out of it by subterranean connections. The Hara-berezaiti was imagined to be a range of mountains enclosing not only the whole earth but also a lake, named Wurukasha, which is likewise at the end of the earth, but according to the *Bundehesh* does not surround it. In the geography of this Pehlevi work moreover the name of Mount Ḳāf is actually found; cf. Windischmann, *Zoroastrische Studien* (Berlin 1863), p. 7, 73: 73 Note 2. Alburz was next located on the earth itself and identified with the mountain-wall which encloses the world of Iranian civilization in the north. The name Alburz (Elburz) is thus found in several places to-day as the name of a mountain or range on the borders of the Iranian linguistic area, notably as the name for the chain which culminates in Damāwand (cf. ALBURZ, i. 251). It should be emphasised that Yāḳūt (*op. cit.*) expressly says that Ḳāf in ancient times was called Alburz; see also Mustawfī, *Nuzhat al-Ḳulūb* (Gibb Mem., xxiii., 1.), p. 191 *sq.*). Geiger (*op. cit.*, p. 51) thinks that Lake Wurukasha originally meant a definite locality (Lake Aral or the Caspian Sea), but as early as the *Avesta* it often appears removed into the region of myth. On Haraberezaiti-Alburz and Wurukasha (Vurukasha) cf. Ritter, *Erdkunde*, viii. 42 *sq.*; Fr. Spiegel in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, vi. 85, and in *Erânische Altertumskunde*, i. 191 *sq.* (Leipzig 1871); W. Geiger, *Ostiran. Kultur im Altertum* (Erlangen 1882), p. 42 *sq.*; F. v. Andrian, *Der Höhencultus asiatischer u. europäischer Völker* (Vienna 1891), p. 287 *sq.*

An idea nearly related to that of the Iranian cosmology is found among the Hindus also. In their literature, especially in the *Purāṇas* mention is made of the fabulous mountain girdle Lokāloka, which separates the visible world from the invisible world and beyond which nothing but darkness reigns. On Lokāloka cf. Spiegel in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, vi. 86, and J. Dowson, *Classical Dictionary of Hindu Mythology* (London 1879), p. 180. According to the teaching of the Jains, the ring-shaped mountain Mānuṣottara, that lies in the centre of the continent Puṣkaravara, is the limit of mankind; cf. Jacobi in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, lx. 312.

That the Muslim idea of Mount Ḳāf possesses its prototypes in the analogous Indian and Iranian ideas of the mountains bounding the world, Lokāloka and Haraberezaiti-Alburz, was previously pointed out by Gesenius (*op. cit.*, p. 317) and Rosenzweig (*op. cit.*, p. 185).

Closely connected with the Muslim view is that of the Mandaeans. According to them (cf. H. Petermann, *Reisen im Orient*, ii. (Leipzig 1861), p. 452), the disk of the earth is surrounded by the ocean except on the north where a great mountain of rock of the purest turquoise cuts off the sea. Immediately adjoining this turquoise mountain, the reflection of which causes the blue of the sky, lies the pure world stretching to the north. Very probably the Mandaeans got their idea from Muslim sources. The contrary view of de Goeje (Ṭabarī, *Annales*, Introd., p. cdxxxvii) that the Arabs got the idea of Ḳāf from Mandaean mythology, seems less plausible.

The idea of a frontier range to be located in the north, as found in the narrower interpretation of the ideas of Haraberezaiti-Alburz and Ḳāf (cf. especially the Mandaean legend) was widespread in Asia, notably among the peoples of the ancient East. It probably owed its origin to Babylonian cosmology, which locates its cosmic mount of the gods in the north; on the Babylonian-Assyrian view cf. Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 29, 117 *sq.*; Fr. Hommel, *Aufsätze u. Abhandl.*, ii. (Munich 1900), p. 345 *sq.*, and Zimmern in *Die Keilinschriften und das Alte Testament* (3rd ed., Berlin 1903), p. 353, 355, 620. The traces of the existence of a similar view among the ancient Hebrews can still be seen in the Biblical books (cf. especially Isaiah xiv. 13); cf. thereon W. Gesenius, *Commentar über den Jesaia*, ii. (Leipzig 1821), p. 316 *sq.*, where the analogous non-Biblical views are fully discussed; Dillmann-Kittel, *Der Prophet Jesaia* (5th ed., Leipzig 1898), p. 134. Among the Hindus Meru which, according to the usual Buddhist view, is the centre and navel of the earth (cf. W. Foy in *Festschrift E. Windisch*, Leipzig 1914, p. 213 *sq.*; E. W. Hopkins, *Epic Mythology*, Strassburg 1915, p. 253, Index, and Roscher, *Neue Omphalosstudien*, Leipzig 1915, p. 72), is sometimes also interpreted as the Himalaya mountains bounding India on the north. For the Greeks, the mount of the gods, Olympus in Thessaly, marked the north frontier of their home.

(M. Streck.)

KAFA or Kaffa, also written al-Kafa, a mediaeval town on the south shore of the Crimean peninsula, called in ancient times and again at the present day Theodosia (originally a Milesian colony). The name Καφᾶ, Καφά or Καφᾶ, is first found in Konstantinos Porphyrogenetos (*De administr. imperio*, Ch. 53). Sauromates V., king of Bosporus, is said to have been killed there in the fourth century in single combat with Pharnaces of Chersonesus. The view has been put forward (F. Köppen, *Krimskiy Sbornik*, St. Petersburg 1837, p. 107) that the name may be identical with the χάβον mentioned in Strabo, Ch. 312. With these exceptions, Kafa is never mentioned till the xiiith century. As a harbour on the south coast of the Crimea, for trading-vessels as well as for war-ships, we always find Sughdāḳ (even as late as the reference in *Recueil de Textes rel. à l'Hist. des Seldjoucides*, ed. Houtsma, iii., iv. see, Index), the modern Sudak.

Kafa only rose to prominence in the second half of the xiiith century, when the Genoese established themselves in the Crimea after the republic of Genoa had purchased this place from a Tatar chief. This chief is usually believed to have been the Urān Timūr, mentioned by Abu 'l-Ghāzī (ed. Desmaisons, p. 173), son of Tūḳāi Timūr, and grandson of Djūčī, to whom the Khān Mōngke Timūr (1266—1280) had granted Kafa and the Crimea; the name is written by Abu 'l-Ghāzī (p. 178), Uz-Timūr, by Rashīd al-Dīn (ed. Blochet, p. 126), Urang Timūr; but a consul of Kafa is mentioned as early as about 1263. It was not till the xivth century that "Gazaria" or "Gazzaria", the colony founded by the Genoese on the Black Sea with Kafa as its capital, became of considerable importance. It was controlled by the "officium Gazariae" in Genoa and its statutes (1316); the administration remained in the hands of the metropolis with a limited participation by the local population. The statutes of 1290 and 1316 expressly forbid the minting of a local currency but in the xvth century this was, in practice at least, allowed; the coins (with Latin and Tatar inscriptions) bear the badge of Genoa (after 1453, when the administration of the colony was placed in the hands of the Bank of St. George, the representation of this saint) as well as the seal (*tamgha*) of the Golden Horde (afterwards the *tamgha* of the Girāy; cf. ii. 171[b]). After 1318 Kafa appears as the see of a Catholic Archbishop, whose diocese comprised the whole area from Varna to Sarāi on the Volga and from the Black Sea to the Russian duchedoms. Ibn Baṭṭūṭa (about 1330) describes Kafa as "one of the famous ports of the world" (ed. Defrémery and Sanguinetti, ii. 358: *min marāsī 'l-dunyā 'l-shahīra*) of his time. In the harbour there were about 200 naval and mercantile ships. The Muhammadans there had their mosque and ḳāḍī. By the treaty of 1380 however, the Tartars could only live in the suburbs beyond the city walls; this limitation seems to have again been removed later. In the statutes of 1449 it is only laid down that Tartars living in Kafa are not to be subject to the *Titanus seu vicarius* i. e. the *Tudun* of the Khān of the Crimea. The fortifications still in existence belong in part to the period 1341—48 (successful wars against the Khān of the Golden Horde, Djānibeg), in part to the period 1383—86 (building of the city-walls as a protection, not only for the city proper (*burgus*), but for the suburbs (*antiburgi*) also. About 1470 the population is said to have been 80,000. As early as a letter from the Bank of St. George to the Pope Calixtus VI (1455—58), of Nov. 1, 1455, in which attention is drawn to the danger threatening the Black Sea colonies from the Turks, Kafa is described as *non ambitu quidem moenium sed populorum multitudine Constantinopoli facile praeferenda*.

The Turkish conquest, inevitable after the fall of Constantinople (1453) and Trebizond (1461), could not be long averted by the Christians of the Latin East either with their own forces or the oft summoned help of the Girāy (to whom Kafa was in some degree dependent from 1434, when a Genoese army was defeated by Ḥādjdjī Girāy). In 1475 the whole peninsula had to submit to the Turks; the south shore with Kafa was directly incorporated in the Sulṭān's empire and divided into three ḳāḍīlīḳ (Kafa, Mankūb and Sudāḳ) with a Pasha in Kafa. Under Bāyazīd II (1481—1512), at the time of the first Russian embassy (1498), this office was filled by a son of the Sulṭān, Muḥammad (this information does not seem to be found in Turkish sources, as it is only given by von Hammer, *Gesch. des Osmanischen Reiches*, 2nd ed., Pest 1834—36, i. 646, from Karamzin, *Ist. Gos. Ross.*, 2nd ed. St. Petersburg, 1818—29, vi. 169 *sq.* = *Gesch. des Russ. Reiches*, transl. from the 2nd edition, Riga 1824, vi. 215). For a short period the revenues of Kafa were occasionally surrendered to the Girāy; Kafa appears as a mint of the Girāy under Mengli Girāy from 899—906 (1493—1501) and again not till the reign of Shāhīn Girāy, regnal years 5 and 6 i. e. 1195, 1196 (1781—82).

Under Turkish rule Kafa (Turkish pronunciation Kefe) gradually assumed the appearance of a Muhammadan town, although many Christian churches remained in existence. The most detailed description is by Dortelli d'Ascoli 1634 (Russ. transl. in *Zapiski Odesskago Obshč.*, etc., xxiv.; text publ. by Dashkewič in *Čteniya w. istor. obshč. Nestora Letopisca*, Book 5), who had spent over ten years in the Crimea at the beginning of the xviith century. There were then in Kafa 70 mosques, 2 synagogues [one for Rabbanites and the other for Karaites], 15 Greek, 28 Armenian (according to Beauplan [1660], 12 Greek and 32 Armenian) churches and only one Catholic. The principal mosque (*Büyük djāmi'*), later described by Pallas in 1794 (*Bemerkungen auf einer Reise in die südliche Statthalterschaften des russ. Reiches i. d. J. 1793 u. 1794*, Leipzig 1801, ii. 262), stood

in the centre of the town; the dome of the main building, over 65 feet in diameter, was surrounded on three sides by eleven smaller cupolas; the two minarets were 115 feet high. A decline in the prosperity of the town under Turkish rule was noticed by Broniewski as early as 1578; as the world's trade had taken other routes, the shores of the Black Sea no longer had their former importance; yet to the end of Turkish rule Kafa remained the most important harbour on the north side of the Black Sea. Chardin (*Voyages*, Amsterdam 1735, i. 46 *sq.*) says that in his 40 days' stay there (Aug.—Sept. 1672) he saw nearly 400 ships arriving and departing. In the town there were then about 4,000 houses of which 3,200 were Muslim and 800 Christian; there were no stone buildings with the exception of 8 churches in ruins (apparently dating from the Genoese period). Even in the xviii[th] century Kafa was still compared with Constantinople by the Turks and called Little Stambul (*Küčük Istanbul*).

In 1771 Kafa was taken for the first time by the Russians, but not finally incorporated in the empire till 1783. According to the oldest Russian plan of the city, there were then 20 mosques, 13 Greek and 22 Armenian churches, and 815 houses of which 694 were Turkish. In the description of the journey of the Empress Catherine in 1787 we already find the old Greek name (Russ. Feodosia) reappearing; the town is later called Kafa again and only definitely renamed in 1802. In the very early years after the conquest began the forced migration of the Turks and the voluntary of the Tatars; about 1794 (Pallas) Kafa had already "from a once celebrated and populous town become almost a mound of stones". About 1802 it is said to have had only 200 inhabitants. The Russian harbour of Feodosia, whose prosperity only began in the last decade of the xix[th] century (railway connections, building of commercial docks, Sebastopol being the naval port), must thus be regarded as a new foundation on the site of the Turkish Kafa. The number of the inhabitants, according to the census of 1899, was 27,238 (in 1894, only 17,000), of whom only 5,200 were Tatars. The Museum (founded in 1811) contains many inscriptions and other antiquities, particularly from the Genoese period.

Bibliography: cf. BAGHČE-SARĀI [i. 565a]; the works, mentioned there, by Broniewski, Pallas, etc., as well as the *Zapiski Odesskago Obshčestwa Istorii i Drewnostei* are indispensible for the study of the history of Kafa. In the *Zapiski* (from Vol. ii. to xxiv) the material from the archives of Genoa published in Italy (*Atti della Società Ligure di storia patria*) is utilised. On the coins: O. Retowski, *Genuezsko-tatarskiya monety goroda Kaffi* (Simferopol 1897 and 1898). Cf. also F. Brun, *Černomorye*, i. (Odessa 1879), chap. 11 (*O poseleniyakh Italyantsěw w Gazarii*); J. Kulakowskiy, *Prošloye Tawridi*, 2nd ed. (Kiew 1914). An attempt at a connected survey is W. K. Minogradow, *Feodosiya (Istoričeskiy Očerk)*, 2nd ed. (Jekaterinodar 1902). Cf. also M. G. Canale, *Della Crimea* (Genoa 1855) and Heyd, *Hist. du Commerce du Levant* (Leipzig 1885/6), Ind. s. v. *Caffa*. (W. BARTHOLD.)

KAFĀLA (A.), the pledge given by any one (the *kafīl*) to a creditor (the *makfūl lahu*) to secure that the debtor (the *makfūl bihi*) will be present at a definite place e. g. to pay his debt or fine or, in case of retaliation, to undergo punishment.

If the *makfūl bihi* is not there at the time arranged, the guarantor can be kept prisoner till the debtor comes or until it is proved that he cannot come (e. g. because he is dead).

As to the question whether the guarantor is bound to pay for the *makfūl bihi* or to suffer his punishment, the opinions of the different *madhhab*'s vary. According to the Shāfi'ī school, he is not bound to do so, not even if he has expressly bound himself to do so.

Bibliography: al-Bādjūrī, *Ḥāshiya 'alā Sharḥ Ibn Ḳāsim al-Ghazzī* (Būlāḳ 1307), i. 395 *sq.*; E. Sachau, *Muhammedan. Recht nach schafiitischer Lehre*, p. 405 *sqq.*; al-Dimashḳī, *Raḥmat al-Umma fi 'khtilāf al-A'imma* (Būlāḳ 1300), p. 81; A. Querry, *Droit musulman*, i. 482—486. (TH. W. JUYNBOLL.)

KAFF (A.), a technical term in Arabic prosody. It means the dropping of the seventh, vowelless consonant of a foot, which ends with *sabab khafīf* (see the article 'ARŪḌ, i. 463b). The following feet are liable to *kaff*: 1. *mafā'īlun*, provided that the *y* remains (> *mafā'ilu*); 2. *fā'ilātun* and *mustaf'ilun* (the latter in the *khafīf*), provided that the next foot beginning with a *sabab khafīf* does not suffer *khabn* (> *fā'ilātu*, *mustaf'ilu*). [In the last mentioned case four short syllables would follow in succession! Editor]. *Kaff* is therefore found in the metres *ṭawīl*, *madīd*, *ramal*, *khafīf*, *hazadj* *muḍāri'* and *mudjtathth*.

Bibliography: See the article 'ARŪḌ. (MOH. BEN CHENEB.)

KAFFĀRA (A.), atonement, expiation, literally, what "covers" the sin. The *kaffāra* has usually to consist in releasing a Muslim slave or — for those who are not sufficiently well off — in a three days' (and in some cases even two months') fast or as a substitute — for those who are not able to fast — in bestowing food or clothes on a definite number of poor people (from 10 to 60).

In some cases the Ḳur'ān has already prescribed a definite *kaffāra* for the sinner, e. g. Ḳur'ān iv. 94, after killing by accident or by design, Ḳur'ān v., 91, to avert the evil consequence of breaking an oath, Ḳur'ān lviii. 4 *sq.*, if a man by pronouncing the old Arab *ẓihār* formula has sworn to refrain from all sexual intercourse with his wife.

These and many other cases (e. g. the breaking of the fast prescribed in the month of Ramaḍān by fornication or marital intercourse during the day) were afterwards more precisely defined by the *faḳīh*'s and fully described in the *fiḳh* books of the different *madhhab*'s.

KAFĪL. [See KAFĀLA.]

KĀFIR (A.), originally "obliterating, covering", then, "concealing benefits received" = "ungrateful"; this meaning is found even in the old Arab poetry and in the Ḳor'ān, Sūra xxvi. 18. In the Ḳur'ān the word is used with reference to God: "concealing God's blessings" = "ungrateful to God", see Sūra xvi. 57 and xxx. 33: "That they are ungrateful for our gifts"; cf. also Sūra xvi. 85. The next development — probably under

the influence of the Syriac and Aramaic where the corresponding development took place earlier — is the more general meaning of "infidel" which is first found in Sūra lxxiv. 10 and is henceforth very common; plural *kāfirūn* or *kuffār*, once (Sūra lxxx. 42) *kafara*. The term is first applied to the unbelieving Meccans, who endeavour to refute and revile the Prophet: Sūra l. 2 and elsewhere. The subject of incredulity is sometimes more nearly defined with added *bi-*, e.g. Sūra xxxiv. 33: "We do not believe in your mission"; Sūra vi. 89. In the early Meccan period a waiting attitude towards the unbelievers is still recommended (Sūra lxxxvi. 17; lxxiii. 10 *sq.*; see also Sūra cix. entitled *al-Kāfirūn*), but later the Muslims are ordered to keep apart from them (Sūra iii. 114, also 27), to defend themselves from their attacks and even to take the offensive against them (Sūra ii. 186 and elsewhere). In most passages the reference is to unbelievers in general, who are threatened with God's punishment and Hell (cf. the article DJAHANNAM).

In the literature of Tradition also the ḥadīths — with minute elaboration in details — deal partly with the fate of the *kāfir* on the day of judgement and his punishment in hell, and partly with the believer's attitude towards him. For the rest they reflect the great controversy in early Islām on the question whether a Muslim should be considered a *kāfir* for committing a "major sin" (cf. al-Bukhārī, *Kit. al-Īmān*, Bāb 22). Thus we find ḥadīths such as: "If a Muslim charges a fellow Muslim with *kufr*, he is himself a *kāfir*, if the accusation should prove untrue"; or "The reproach of *kufr* is equivalent to murder" etc. Nevertheless, *kāfir* in theological polemics is a fairly frequent term for the Muslim protagonist of the opposite view.

Eternal damnation for the *kāfir*, has remained an established dogma in Islām. In the dogmatic controversies of the early centuries the reasons were discussed for which a Muslim could be identical with a *kāfir* and have to suffer eternal punishment. The most tolerant is the view of the Murdji'a that all the Ahl al-Ḳibla, even if they commit a mortal sin (*kabīra*) are to be considered believers and their ultimate fate is to be left to God. The most striking contrast to this is the strict view of Khāridjis (and Ibāḍis) that every Muslim, who dies with a mortal sin — and this means with them every sin which has not been repented of — on his conscience, is to be considered just a *kāfir*. Intermediate is the opinion of the Mu'tazila, who for this special case assume an intermediate between believer and unbeliever, the so-called "rejected" *fāsiḳ* (cf. the article ĪMĀN. — According to Nallino, in the *Riv. degli Studi orientali*, vii. 436 *sqq.*, the names Mu'tazila, Murdji'a, etc. [q. v.] are probably closely connected with their attitude on this point).

According to the *Lisān al-ʿArab*, vi. 459 *sq.*, the following kinds of unbelief are distinguished 1) *kufr al-inkār* = neither recognising nor acknowledging God; 2) *kufr al-djuḥūd* = recognising God, but not acknowledging Him with words, that is remaining an unbeliever in spite of one's better knowledge; 3) *kufr al-mu'ānada* = recognising God and acknowledging Him with words but remaining an unbeliever (obdurate) out of envy or hatred; 4) *kufr al-nifāḳ* = outwardly acknowledging, but at heart not recognising God and thus remaining an unbeliever, that is being an hypocrite [cf. MUNĀFIḲ].

In the systematic Fiḳh books the *kuffār* are discussed in the following passages: 1) in the *Kitāb al-Ṭahāra*. For the opinion deduced from Sūra ix. 28 that the unbeliever is unclean, we find all views represented, from the strictest to the most tolerant; just as on all questions of purity, the strictest is the Shī'a which reckons the unbeliever among its *ashyā' nadjisa*; but on this point al-Nawawī, for example, was particularly lenient; he considers the believer and unbeliever equal as regards purity. The Ahl al-Kitāb [q. v.] are usually regarded more leniently than other *Kuffār*; for their benefit for example the questions of the *dhabā'iḥ* and of *munākaḥa* with Muslims are discussed. — 2) In the *Kitāb al-Djihād* (*wa 'l-Siyar*). The *djihād* [q. v.] against the unbeliever inhabitants of the *Dār al-Ḥarb* [q. v.] is a *farḍ 'ala 'l-kifāya*. The Ahl al-Kitāb again occupy a special position as by paying *djizya* and *kharādj* [q. v.] they become dhimmī's [see DHIMMA] and can receive *amān* [q. v.]. These categories of unbelievers in the *Dār al-Islām* called *dhimmī* and *musta'min* have a legal claim to protection. Another class also distinguished from the mass of the *kāfirūn* are the renegades [see MURTADD] for whom the law prescribes death, with the opportunity first of obeying a demand to return to Islām. The others, the unbelievers proper, who in this sense are also called *kāfirūn aṣliyūn* (or *mushrikūn*, in the narrower sense) have only to expect death or slavery [see ʿABD] if they fall as prisoners of war into the hands of Muslims; if they are fortunate, they may be exchanged or released. (In many cases, e.g. in the gradual advance of Islām into Africa, the distinction between renegades and pagans was difficult to ascertain and there are writings extant which deal specially with this question, cf. Ibn Ḥadjar al-Haitamī, *al-I'lām bi Ḳawāṭi' al-Islām*, lith. 1293). — 3) In several further points the law discriminates between *kuffār* and believers; the very strict interpretation of the law is however in practice only held by a small minority.

To understand the historical development in the attitude of Islām to the unbeliever, it should be observed that it was settled in the early centuries not so much by religious as by political and social conditions. Even down to the time of the Crusades there prevailed in Islām a tolerance towards the unbeliever, especially the Ahl al-Kitāb, such as is impossible to imagine in contemporary Christendom. We find for example Christians in the highest official positions. In this early period there is no question of any religious fanaticism towards unbelievers. It was only aroused and nourished by the repeated wars with unbelievers (Crusades, wars with the Turks). War-psychology, on the other hand, at the time of the wars between Persia and Turkey could even bring it about that the Persians were called *kuffār* in Turkish fetwās etc. (see Pelese, i. 311, 319), a name which the Turks themselves had applied to them in the proclamations of the Mahdī of the Sūdān.

Since at the present day the trend of affairs has apparently been quite in the opposite direction, and Muslims have been more and more impeded in carrying out measures against the *kuffār* by the political decline of Islām and the rise of unbelieving nations (pressure of the Powers, capitulations, etc.), the very feeling of impotence in face

of these facts may have contributed not a little to the strengthening of hatred and to periodical manifestations of it (in massacres etc.). This also explains the grotesque caricature of the *kāfir*, which one sometimes finds in the popular imagination at the present day (see Snouck Hurgronje, *Mekka*, ii. 48 *sq.*) and which is connected with the ideas of the Arch-Kāfir, Dadjdjāl [q. v.] who bears *k-f-r* on his forehead (cf. Goldziher, in *Der Islām*, xi. 178).

It may also be due to the hatred of the Franks (and to dogmatic squabbles) that *kāfir* had developed into a term of abuse, so frequent in the Turkish form *giaur* (the Persian *gebr* [q. v.] is said to be the same), although in theory it is (*Zeitschr. d. Deutsch. Morg. Gesellsch.*, lviii. 562) affirmed that the Muslim commits a punishable offence if he says to the Christian or Jew: "Thou unbeliever". From the Turkish the word *kāfir* has entered into most Slavonic languages. The Spanish *cafre* and the French *cafard* also go back to *kāfir* or *kuffār*. In two cases *kāfir* has actually become a proper name, the name of a people, the Kaffirs, and of a country, Kāfiristān [q. v.].

Kāfir and *kufr* underwent a special development of meaning in the terminology of mysticism. Compare, for example, the well-known verse of Abū Sa'īd [q. v.]: "So long as belief and unbelief are not perfectly equal, no man can be a true Muslim", with the various explanations given in Muḥammad A'lā, *Dict. of Technical Terms* (ed. Sprenger, etc.), s. v., according to one of which *kufr* is just the equivalent of *ẓulmat-i ḥaḳīḳī*.

(W. Björkman.)

KĀFIRISTĀN. The name of a mountainous tract in the Hindū-Kush situated between 35° and 36° N. and 70° and 71° 50′ E., with an area of about 5000 sq. m. Till recently independent, but since 1896 a territory of Afghānistān. The northern boundary is roughly the watershed between the drainage of the Oxus and that of the Indus, the valleys to the north being occupied by Ghalča [q. v.] tribes. To the west the spur of the Hindu-Kush which runs southward from the neighbourhood of the Khāwak Pass may be considered the boundary separating it from the Pandjshīr and Nidjrāo valleys. To the east and south the range between the Kunar and Bashgul valleys and those to the north of the Kunar and Kābul valleys define its limits. The country consists of numerous valleys much isolated from each other by lofty ranges, the principal rivers draining which fall either into the Kābul or Kunar rivers, and so belong to the Indus basin. The principal are the Alingār or Kāo with its tributary the Alishang, the Pēč (Kāmah or Presun) and the Bashgul. The inhabitants, from their persistent paganism, have long been known as Kāfirs, and from them the name of the country Kāfiristān is derived. The name Siyāh-pōsh or "Black-clad" which properly belongs to one section only, (the others being classed together as Safīd-pōsh or "White-clad") has also been in use from an early period.

This tract was undoubtedly part of the Kushān kingdom in the early part of the Christian era, and has been identified with the mountain country of Kapiśa. The name Katōr applied to the country and its ruling tribe by Taimūr (Tīmūr) is identical with the title of the rulers of the neighbouring country of Čitrāl, and is no doubt the same as Katir, the name of the principal tribe at the present day. It is most probably derived from the title Kidāra used by the later Kushāns. It has been thought by Wood and Yule that the wine-drinking tribes whom Marco Polo met near Casem (i. e. Kishm in the Kōkča valley) are identical with the Kāfirs, who may have at that time extended into the northern valleys of the Hindu-kush, but the first definite mention of them is in the Emperor Tīmūr's memoirs. On his way to invade India in 800 (1398) he turned aside into their country from the Khāwak Pass to punish them for their raids on Andarāb. He calls them Katōr and Siyāh-pōsh. In spite of his claims to victory it is clear that a great part of his forces was destroyed in an ambuscade, and he returned to Khāwak without any permanent success. Bābur in his autobiography gives a very accurate account of the country and people, many of the rivers and districts being described by names they still bear.

In more recent times Elphinstone from his observations in 1809, Masson (in 1826) and Biddulph (in 1880) collected all the information available without entering the country, and the account given by the first-named is especially valuable. The first European to penetrate Kāfiristān was Lockhart in 1885, followed by Robertson in 1889 and 1890. The last named in his work on the Kāfirs of the Hindu-Kush has given the best account available of the country and people, their customs, beliefs and organization.

In the treaty of 1893 between the Indian Government and Afg̲h̲ānistān, Kāfiristān was definitely left outside the British border, and the Amīr ʿAbd al-Raḥmān proceeded in 1896 to conquer the whole and to convert its population forcibly to Islām. The Rāmgalī tribe, a branch of the Katir, was the last to submit. Robertson classifies the population under two heads, viz. the Siyāh-pōs̲h̲ tribes all closely related to each other (the principal tribe being the Katir), and the miscellaneous tribes, without any special bond of union, included under the name of Safēd-pōs̲h̲. The chief of these are the Waigalis (with the As̲h̲kun who are related to them), and the Prēsungalis or Vērōn. All seem to belong to an ancient branch of the Aryan stock, and their languages are of the Pisāča family, which, according to Kuhn and Grierson, have the characteristics of a tongue spoken after the Indian family had branched off, but before the Īrānian had been differentiated. The purest dialects are the Bas̲h̲galī, Waigalī and Vērōn, spoken in the central parts of the country. The Gawar-bati, Kalās̲h̲ā and Pas̲h̲ai form an outer group; the Pas̲h̲ai in fact being spoken in the D̲j̲alālābād valley outside the limits of Kāfiristān proper. There is also another member of the group As̲h̲kund, as to which nothing is as yet known.

The form of paganism followed till lately was much mixed with animism, but there were certain principal gods generally recognized, the chief of which were Imrā, the creator, whose principal shrine was at Prēsungal, Moni, the prophet, Gīs̲h̲ the war-god and the goddess Dizanē. In the borderlands however many districts had already accepted Islām before the Afg̲h̲ān conquest. These converts were known as S̲h̲aik̲h̲s. Sacrifices of goats and ceremonial dances were very prevalent.

The social system is entirely tribal, each tribe consisting of several clans. The tribal government is carried on by a council composed mainly of the headmen or *jast* who represent the various clans. A number of *urir* or magistrates are elected annually to carry on the actual tribal government. The houses are well built and grouped into strong villages. The Kāfirs generally are astute and clever, but untruthful, intriguing and vain, yet they are hospitable and not generally cruel. They are brave and fond of freedom, and in their own country show a great sense of dignity; very quarrelsome, but always ready to put a stop to fights among others. Theft and assassination are not in any way condemned. Slavery is prevalent, the slaves being partly hereditary and partly obtained by capture in intertribal war or by purchase.

(M. LONGWORTH DAMES.)

ḲĀFIYA (A.), a term in prosody meaning rhyme generally. The word seems (according to Goldziher, *Abhandl. zur Arab. Philologie*, i. 85 sqq.) to have originally meant a poetic utterance or a lampoon, then a poem and finally a rhyme. The theory of the *ḳāfiya* is considered a special science, distinct from *ʿarūḍ* (prosody proper). It teaches how verses should end as regards consonants, vowels, etc.

In the narrower sense, *ḳāfiya*, according to al-K̲h̲alīl b. Aḥmad [q. v.], is the group of consonants, which begins with the vowelled consonant immediately preceding the last two quiescent consonants of a verse. In the Arab view, of course, a verse ends always with a quiescent letter, whether written or not (the latter is the case with *wāw* and *yāʾ* of prolongation when they are written defectively): *yafʿal*, *yafʿalā*, *yafʿalī*, *yafʿalū*.

The ḳāfiya may include up to six consonants: 1. the principal one (in the Arab view), the *rawī* or rhyme-letter, the letter which the poet always retains at the end of the line, till he has ended his poem and after which the latter is called: *lām* in the *muʿallaḳa* of Imruʾ al-Ḳais, *dāl* in that of Ṭarafa, etc. It is to be noted that Arabic poems are all mono-rhymed with the exception of the *radjaz muzdawidj*, in which the two hemistichs in a line rhyme. According to some prosodists, it is the rule to allow the two first hemistichs of a poem to rhyme; 2. as an annex to the *rawī*, the *waṣl* or *ṣila*, i. e. a letter of prolongation or a *hāʾ* (vowelled or not) coming after the vowelled *rawī*; of the letters of prolongation, *alif* is the only one usually written in this capacity; 3. as a possible further complement, the *k̲h̲urūdj*, the letter of prolongation behind a vowelled *hāʾ* serving as a *waṣl*; as a preliminary either 4. the *ridf*, the weak letter or letter of prolongation immediately before the *rawī*; *wāw* and *yāʾ* may interchange with each other in one and the same poem; or 5. *taʾsīs*, an *alif*, placed before the *rawī* and separated from it by a consonant (*dak̲h̲īl*) which may be changed at will but must always have the same vowel; 6. the *dak̲h̲īl* just mentioned.

The *ḳāfiya* may likewise include up to six vowels: 1. *mad̲j̲rā* or *mud̲j̲rā*, the vowel of the *rawī*; 2. *nafād̲h̲*, the vowel of the *hāʾ* if it serves as *waṣl*; 3. *tawd̲j̲īh*, the vowel before the quiescent *rawī*; 4. *had̲h̲w*, the vowel immediately before the *ridf*; 5. *is̲h̲bāʿ*, the vowel of the *dak̲h̲īl*; 6. *rass*, the vowel immediately before the *alif* of the *taʾsīs* (always *a* of course).

In respect of lengths, five kinds of rhyme are distinguished, viz.: — 1. *mutakāwis*, in which the two last quiescent consonants (which, as explained above, mark the beginning and end of the *ḳāfiya*) are separated by four vowelled consonants: *fa-[ka ḳadamih]*; 2. *mutarākib*, in which three vowelled consonants stand between the two quiescent: *ʿalā [d̲j̲abali]y*; 3. *mutadārik*, in which two vowelled consonants separate the two unvowelled: *ḳad [faʿal]*; 4. *mutawātir*, in which there is one vowelled consonant between the two quiescent: *bā[ʾi]r*; 5. *mutarādif*, in which the two quiescent consonants come in immediate succession: *ḳ[āl]*.

Finally we have still to note the faults in the

ḳāfiya: 1. *iḳwāʾ*, the substitution of a *ḍamma* for a *kasra* as *mad̲j̲rā*; 2. *iṣrāf* or *iṣrāf*, the substitution of a *fatḥa* serving as *mad̲j̲rā* for a *kasra* or *ḍamma*; 3. *ikfāʾ*, the use of similar sounding consonants as *rawī* (*mīm* and *nūn*, *ṭāʾ* and *k̲h̲āʾ*, etc.); 4. *id̲j̲āza* which consists in using consonants of essentially different sound as *rawī* (*bāʾ* and *rāʾ*, *ḳāf* and *lām*, etc.); 5. *taḥrīd*, the changing of the *ḍarb* (the last foot in the second hemistich) in one and the same poem; 6. *īṭāʾ*, the repetition of one and the same word in the same meaning as a rhyme-word in the same poem; 7. *sinād*, a mistake which occurs before the *rawī*, namely *a*) *sinād al-ḥad̲h̲w*, changing of the vowel, which precedes the *ridf*; *b*) *sinād al-is̲h̲bāʿ*, changing of the vowel between *rawī* and *dak̲h̲īl*; *c*) *sinād al-tawd̲j̲īh*, changing of the vowel immediately before the quiescent *rawī*; *d*) *sinād al-ridf*, the use of *ridf* in one line but not in the other lines; *e*) *sinād al-taʾsīs*, the use of *taʾsīs* in one line but not in the others; 8. *taḍmīn* or the running of one line into another, in such a way that the end of one line only gives complete sense when we know the beginning of the next verse.

In conclusion it should be noted that it was considered the rule in reciting a poem to lengthen the vowel of the vowelled *rawī*; but this custom was not generally observed. The Banū Tamīm added a quiescent *nūn* to the *mad̲j̲rā* in place of the *waṣl*. Among the Banū Asad the *mad̲j̲rā* was suppressed. Otherwise it was permitted, when a strong quiescent consonant preceded the *rawī*, to transfer to it the vowel of the *rawī* which itself then became quiescent: *faʿlu* > *faʿul*. Finally, it often happened that, if the *rawī* was quiescent, it was given a *kasra* which was followed by a quiescent *nūn*: *faʿal* > *faʿalin*.

(MOH. BEN CHENEB.)

ĶAFĪZ, an Arab measure of capacity (dry measure) containing from 25—50 litres (5—10 gallons). In the pre-Islāmic period the use of measures of capacity with dry and liquid wares was in general use, as is shown by the usually Arabic names for these measures in contrast to the measures of weight and their names borrowed from the Greeks and Romans. It has still long been the custom to measure these wares by their weight and not by their volume. East and west in this respect have undergone opposite developments. This transition from measures to weights was furthered, on the one hand, by the easier supervision of market business done by weight and, on the other, by the experience early obtained that it is not a matter of indifference whether very large or very small measures are used to measure dry wares. As the weight of the upper layers appreciably compresses the lower, the result is that, other things being equal, larger quantities weigh more per unit of capacity than small quantities. The table of measures of capacity commonly used in the early period is given below. The ratios show that it is not homogeneous. The greatest variations prevail in the theoretical lists of measures; the figures quoted below which — presupposing distilled water at normal temperature etc. — mean so many kilogrammes in weight, are based on an original measure of one *mudd* of the year 571 (1175/6) in the Cairo Museum, which, according to its inscription, held 337 *dirhams* full of pure water. The measures usual in the early centuries of the Hid̲j̲ra seem however to have been smaller ranging down to the half of the figures here given.

Measures of capacity or dry measure:

mudd (modius)	1				1.15 litres
ṣāʿ	4	1			1.6 „
makkūk	6	1½	1		6.87 „
ḳafīz	48	12	8	1	55.0 „

Two avoirdupois weights were tacked on to this system:

wasḳ	240	60	40	5	1		275.0 kg.
kurr	1440	360	240	30	6	1	1650.0 „

That these measures of capacity are not entirely forgotten is probably due to the fact that they have been retained in the legal literature. They have disappeared from the market-place, at least in the East. In the lands round the Western Mediterranean the *ḳafīz* has however survived down to the present day, e. g. in Tunis, in Sicily (*cafiso* and *cafisone*, a measure of weight for oil, 11—20 kg.) and in Spain (*cahiz*, plur. *cahices*, a measure for grain of about 6.6 hectolitre) etc.

(E. v. ZAMBAUR.)

ĶAFṬĀN (Turkish form of the Persian *k̲h̲aftān*, which is found in the *S̲h̲āhnāma* — cf. ʿAbd al-Ḳādir Bag̲h̲dādī, *Lug̲h̲at-i S̲h̲āhnāma*, ed. by Salemann under the title *ʿAbdulqâdiri Bagdâdensis Lexicon Šahnâmianum*, p. 79 — and Asadī's *Lug̲h̲at-i Furs*, ed. P. Horn, p. 99; also Arabic *k̲h̲aftān*), was an upper garment worn in peace time, a kind of long tunic with sleeves, which in time of war was worn over the mail-shirt (tabard). This word as well as the article of dress came quite early among the Arabs under the influence of Persian fashions. Cf. al-Ṭabarī ed. de Goeje, iii. 136, 14 *sq.*; ʿArīb, p. 177; al-Masʿūdī (Paris ed.), viii. 52. — Travellers describe the *k̲h̲aftān* as a long robe, reaching below the knee, sometimes to the calves and sometimes down to the ankles, open in front and having sleeves, which were slit at the wrists or up to the middle of the arms. This garment was introduced into the Barbary States by the Turkish conquest and spread by fashion as far as Morocco (Höst, *Nachrichten von Marókos und Fes*, Copenhague 1781, p. 115) where it is sometimes found, especially among women, without sleeves (Lemprière, *A Tour to Morocco*, London 1791, p. 385). The amīrs and s̲h̲aik̲h̲s of the Syrian Beduins in d'Arvieux's time wore the ḳafṭān as a winter garment (d'Arvieux, *Voyage dans la Palestine*, Paris 1717, p. 206). — Among the Ottoman Turks in earlier days ḳafṭān was also the name for a robe of honour, which, — less important than the sable-skin —, was granted on the occasion of appointment to an office. The distribution of such robes of honour took place after the two Bairam [q. v.] festivals in the presence of the Grand Vizier under

the direction of the *ḳaftāndjī bashi*, an official whose duty it was to take charge of and keep in condition the fur-robes of honour. At the present day this garment seems to be very little worn. Hamdi Bey and Marie de Launay, *Les Costumes populaires de la Turquie en 1873* (Constantinople 1873) only mention it (p. 238) when describing a Kurdish woman from Kharpūt: A ḳaftān of fine dark green cloth, open in front and widely cut out in the form of an escutcheon on the breast, leaves the upper part of the shirt quite exposed and does not entirely cover the lower half. . . . The very long sleeves of the ḳaftān ending in a quadrangular piece are taken in above the wrists so as not to conceal the silver armlets. The sleeves are edged with galloon and notched gold lace.

Dozy, *Dict. des noms des vêtements*, p. 162 sqq.; Barbier de Meynard, *Suppl. aux dict. turcs*, ii. 525 sq.; d'Ohsson, *Tableau de l'empire othoman*, iii. 260, vii. 199; Lane, *Manners and Customs of the Modern Egyptians*[5], p. 30 sq.; Lammens, *Rem. sur les mots franç. dérivés de l'arabe*, p. 66. (Cl. Huart.)

KĀFŪR (also Ḳāfūr and Ḳaffūr, cf. *Lisān al-ʿArab*, s. v. *Ḳfr* and *Kfr*; in Sanskrit *Karpūra*, in Prakrit **Kappūra*, **kāpūra*, Malay *kapur*), camphor, the resin of *Laurus camphora* and *Dryobalanops aromatica*, was an object of commerce with India from the days of the ancient Persians; on the capture of al-Madāʾin, the Arabs found rich stores of this drug, the use of which they did not know; they took it for salt (al-Balādhurī, ed. de Goeje, p. 264; Ibn al-Athīr, ed. Tornberg, ii. 401) Ibn al-Baiṭār mentions different sorts of camphor, of which *fanṣūrī* and *riyāḥī* were considered the best; all these kinds were purified before being used. Marco Polo (ed. Soc. de Géogr., Paris 1865, i. 447; transl. Yule, revised by H. Cordier, London, 1903, ii. 299 and note 3, p. 302—4) says the camphor of Fansur was the best and most expensive; it was said to be weighed against gold. Fanṣūr — most probably an old name for Barus (cf. *Tijdschr. van het Kon. Nederl. Aardrijkskundig Genootschap*, Series 2, xvii., 1900, p. 18—22, 27—29; *Encycl. van Nederl.-Indië*[2], i. 172 sq.) on the west coast of Sumatra (Residency of Tapanuli) from which the *kapur Barus* came — is frequently mentioned by Arab writers; from the first half of the third (ninth) century we find the name in different historico-geographical reports as the place of origin of an exceptional quality of camphor.

The name of this resin is also found in the Ḳurʾān (lxxvi. 5): "The righteous shall drink there (in Paradise) out of a goblet, the contents of which are mixed with *kāfūr*"; according to the Muslim commentators, either to indicate the pleasant flavour of the beverage or perhaps as the name of a spring in Paradise (al-Ṭabarī, *Tafsīr*, Cairo 1321, xxix. 111 sq.) The latter explanation is based on the fact that at the beginning of verse 6 the word *ʿain* (spring) is found.

KĀFŪR, Abu 'l-Misk al-Ikhshīdī, also al-Lābī or al-Sūrī, called al-Lābī in a poem by al-Mutanabbī after a place in Nubia, ruler of Egypt and Syria in the fourth century of the Hidjra. Kāfūr was born in Nubia or Abyssinia between the years 291 (904) and 308 (920) (so greatly do the statements of the chronicles vary). The fact that he began life as a horribly ugly slave and rose to be ruler of Egypt and Syria and the celebrated patron of scholars and friend of al-Mutanabbī [q. v.], the greatest poet of his time, has aroused a great interest in him among the Arab historians and given him a greater fame than his importance really deserves. As the Maecenas of poets and scholars, he found kindly biographers who have praised him as a model of fidelity for his devotion — not always maintained — to the Ikhshīdids [q. v.]. His biography is adorned with numerous anecdotes about his humble origin and his rise and about his friendship with al-Mutanabbī. He is only of importance in history because he resisted the advance of the Fāṭimids [q. v.] in the west and of the Arab dynasties in North Syria and maintained by his ability for two decades the kingdom founded by the Ikhshīdids in 323 (935). After his death it soon broke up. As a young slave he is said to have expressed the ambitious wish to become one day ruler of Egypt, to a companion who had said his ideal was to become cook in a cookshop so that he might always eat his fill. As a slave he had the good fortune to be sold to the governor Muḥammad al-Ikhshīd (323—334 = 935—946); that he was almost immediately given away by him on account of a skin disease and again taken back, may well be an embellishment, to contrast his degradation with his all the more marvellous rise. Another narrator says that he was sent with money by his former master to the governor al-Ikhshīd but the latter sent the money back and retained Kāfūr in his service instead. It is also related that he was the only one to remain by his master when his comrades had negligently left the governor's room to see a passing elephant. Both these stories only show that the governor had on some occasion had his attention specially attracted to him. He must certainly have early recognised his merit and put trust in him, for he made this ugly, despised slave the tutor of his children and a general. In the latter capacity he distinguished himself in 329 (940) in a battle near Aleppo which he captured for his master. When al-Ikhshīd felt his end was near at the close of 334 (July 946), he appointed him guardian of his younger son Awnūdjūr (the name is very diversely written) whom the Caliph had previously appointed joint-ruler with his father. The real power remained in Kāfūr's hands even after Awnūdjūr became of age, although he provided for the preservation of the Ikhshīdid dynasty by getting Awnūdjūr's brother ʿAlī recognised as joint-ruler and successor in 338 (949). Later in 343 (954) Awnūdjūr, at the instigation of his friends, tried to shake of the tutelage of Kāfūr, as he felt himself restricted in his freedom of action and expenditure — he only received 400,000 dīnārs out of Kāfūr's rich revenues. He therefore

went to Ramla in Palestine in order to be able from there to exert real authority over Syria and then on Egypt. But the plan did not come to fulfilment, as his mother and Kāfūr, warned in time, were able to appease him. The relationship remained unchanged till Awnūdjūr died in Dhu 'l-Ḳa'da 349 (Dec. 960). After the death of Awnūdjūr, Kāfūr had his brother 'Alī confirmed in office as governor by the Caliph towards the end of the year. Kāfūr remained his guardian, although 'Alī was 24, and only allowed him an income of 400,000 dīnārs. The power of Egypt was again extended over Syria, so that 'Alī was mentioned next to the Caliph in the Friday service in Aleppo and northwards as far as Ṭarsūs. When 'Alī died six years later in 355 (966), Kāfūr himself assumed the government and was confirmed in office by the Caliph, as 'Alī's son Aḥmad was only 9 years old. He did not enjoy his independence long, for he died in 357 (968). His successor was the Aḥmad whom he had superseded.

Kāfūr was able to maintain order in Syria and Egypt. Shortly after the death of al-Ikhshīd, he recaptured from Saif al-Dawla, ruler of Aleppo, Damascus which the latter had taken. Kāfūr was able skilfully to maintain his position between the Baghdād Caliph and the Fāṭimid ruler of North Africa. His riches were celebrated; his estate consisted of art-treasures of all kinds rather than of gold. He was a man who loved pomp; like Saif al-Dawla, exceedingly liberal to scholars and poets, so that his court was a popular one and his favour sought. When al-Mutanabbī became estranged from Saif al-Dawla, he came on Kāfūr's invitation to Cairo, where he lived for some years. In the first period of his stay there he composed famous panegyric on Kāfūr; but the intimacy did not last long, as Kāfūr did not give him a position in the administration which he is alleged to have promised him. He excused himself by saying that he could not trust an office to a man who had posed as a prophet. Kāfūr also devoted much time to scholarly studies and is said to have written poetry. Many scholars were in his service, of whom the best known is al-Kindī who composed a history of Egypt for him.

(M. Sobernheim.)

KĀGHAD, Kāghidh (from the Persian *kāghadh*, perhaps of Chinese origin), paper. In the early period of development of Muslim culture the east was only acquainted with papyrus (*ḳirṭās*) as writing-material. It was Chinese prisoners of war brought to Samarḳand after the battle of Aṭlakh near Ṭirāz, that first introduced in 134 (751) the industry of paper-making from linen, flax or hemp rags after the method used in China. The various kinds of paper then made are the following: *fir'awnī* (Pharaoh's paper), a kind which was destined to compete with papyrus even in the land of its origin (the oldest paper with Arabic writing on it found in Egypt dates from 180—200 = 796—815); *sulaimānī*, from Sulaimān b. Rāshid, the treasurer of Khorāsān under Hārūn al-Rashīd; *dja'farī*, called after Dja'far al-Barmakī; *ṭalḥī*, from Ṭalḥa b. Ṭāhir, the second ruler of the Ṭāhirid dynasty; *ṭāhirī*, from Ṭāhir ii., of the same dynasty; *nūḥī*, in allusion to the Sāmānid Nūḥ I.

Paper mills were erected elsewhere on the plan of those in Samarḳand: al-Faḍl, brother of Dja'far al-Barmakī, who had been governor of Khorāsān in 178 (794) probably founded the paper-mill in the Dār al-Ḳazz quarter in Baghdād. Soon afterwards others arose in Tihāma, Yemen and Egypt, where paper ultimately drove out papyrus, also in Damascus, Tripoli, Ḥamā, Manbidj, Tiberias, the Maghrib, Spain (at Xativa), Persia and India. *Kāghadh-kunān*, the "paper-makers", was the name taken by the people of the village of Khūnadj or Khūna in Ādharbaidjān, two days' journey from Zandjān, on account of the excellent paper made there. The place was destroyed by the Mongols, who however founded a colony, Mughuliya, there. (Barbier de Meynard, *Dict. de la Perse*, p. 219; Ḥādjdjī Khalīfa, *Djihānnumā*, Constantinople 1145, p. 298; transl. by Norberg, i. 365).

On the preparation of paper and the different methods of colouring it, interesting details are given by J. v. Karabaček, *Neue Quellen z. Papiergeschichte* in *Mitt. aus der Samml. der Papyrus Erzh. Rainer*, iv. 75 *sqq.*

According to a statement of al-Maḳrīzī (*al-Khiṭaṭ*, ed. Wiet, ii. 34), Dja'far al-Barmakī had parchment replaced by paper in the government offices.

The paper used in the east is now almost entirely of European manufacture. In Persia we still find a Chinese paper, called *Khān Bāliḳ* (Turkish name of Pekin), a scarce paper, sought after for its durability. The Cairo printers prefer a strong yellow-coloured paper called *nabātī* (Pers. *nabāt*, sugar-candy).

A paper-mill long ago destroyed (*Kāghad-Khāne*, popularly *K'at-Hāne*) has given its name to the Imperial Kiosk and the public promenade of the "Sweet Waters of Europe" in Constantinople.

KAHF, Title of Sūra xviii. of the Ḳur'ān. — See also AṢḤĀB AL-KAHF.

AL-**ḲAHHĀR**, one of the names Allāh, cf. ALLĀH, i. 303*a*.

KĀHIN (A., plur. *kuhhān* or *kahana*; fem. *kāhina*, plur. *kawāhin*, abstract of profession *kihāna*) is the name of the seer or soothsayer (*vaticinator*) among the pagan Arabs. It corresponds to the Hebrew *kōhēn*, Aramaic, *kāhēn*, *kāhnā* (priest); it is not an arabicised form of this however, but belongs to the original stock of the old Arabic

language (otherwise Nöldeke, *Neue Beiträge zur semitischen Sprachwissenschaft*, p. 36, note 6), for the Jewish kōhēn, kāhen is entirely different in character from the Arab kāhin: the former, although in all probability at one time also a soothsayer, later appears only as a dealer in oracles and particularly as sacrificer and teacher of the Tora, while it cannot be shown that the latter, who is never a priest (which is contradictory to von Kremer — see below in the *Bibliography* — p. 74 *sqq.*, and also to Wellhausen, p. 134 and elsewhere), ever held these functions, neither was he permanently connected at all with worship and places of worship, but seems to have been quite unrestricted in the exercise of his activities.

The kāhins of course have their origin in the shamans, medicine-men, and fetish-priests, but in the form in which we first meet them in the old Arabic tales, in the Ḥadīth and, much more rarely, in the pre-Islāmic poetry, they have already passed beyond the ruder forms of shamanism. Their mantic knowledge is based on ecstatic inspiration. They have also, it is true, visions by night which reveal to them future and other events and things hidden from the ordinary mortal (al-Mas'ūdī, iii. 379, 394 *sq.*; Sprenger, i. 176 *sq.* etc.), but they are not really visionaries. Their inspiration is of demoniacal origin: a *djinnī* or *shaiṭān* "demon" (*δαιμόνιον*) who is called their *tābi'* "companion", *ṣāḥib* "comrade", *mawlā* or *walī*, "friend" ("familiar spirit"), not infrequently also their *ra'ī* or *ri'ī* (probably "seer"), speaks out of them. This personification of their ecstacy, which at once stamps them as connected with the old fashioned *shā'ir* "bard" (literally "knower"), also endowed by djinns with supernatural, magic knowledge (cf. *vates* = *poeta*), is conceived as being so substantial that the *daimonion* regularly appears as the I — his *alter ego*, the kāhin, on the other hand, appears as the "thou" of the prophetic utterance, that the latter clearly notices the approach of the spirit, feels himself struck by his foot, hears his voice from a distance etc. (Sprenger, *loc. cit.*; Hölscher, p. 85), indeed, these familiars even have their own names (like the familiar spirits of the poets, see Yāḳūt, *Mu'djam*, ed. Wüstenfeld, iv. 914, 14 *sq.* and al-Djāḥiẓ, vi. 69 = van Vloten, viii. 65). The kāhins give their utterances in the form of the *sadj'*, short sentences in rhythmic prose, with single or more rarely alternating rhyme, such as had been usual in Arabia from early times for all utterance in the higher and lower branches of divination and magic, etc. (Only very rarely is regular verse also used, e. g. *Aghānī*[1], xi. 161, 13). Besides the *sadj'*, the *zamzama* is characteristic of the kāhin's utterances, the mysterious "humming" with which it was delivered (Ibn Hishām, *Sīra*, i. 171, 7 and thereon ii. 58). The word *sadj'* may in this sense have originally meant nothing more than the "purring" or "chirping" or such like of an alleged demon's voice; the verb *sadja'a* is also used in other connections of "purring" or "chirping" of the djinns, regularly of course, of the "cooing" of pigeons and also of the "groaning" of camels; cf. in the O. T. e. g. *Isaiah*, xxix. 4). The kāhins, the majority of whom are to be considered frauds, of course often express themselves in very obscure and ambiguous language. They give greater emphasis to their utterance by striking oaths, swearing by the earth and sky, sun, moon and stars, light and darkness, evening and morning, plants and animals of all kinds etc. (For kāhins' utterances, see e. g. Hölscher, p. 87 *sq.*, 95 *sqq.*; al-Mas'ūdī, iii. 387 *sqq.*; al-Ibshīhī, Ch. 60; *Aghānī*, xi. 161, 20 *sqq.*).

Kāhins play an extremely important part in public as well as private life. They are interrogated in all important tribal and state occasions — especially before warlike enterprises, razzias, etc. in which they take part themselves as a rule, indeed, they sometimes lead them in person (cf. Deborah in the O. T.). Kings and queens therefore keep their prophet or prophetess (D. H. Müller, *Die Burgen und Schlösser Südarabiens nach dem Iklīl des Hamdānī*, i. 74, and al-Ṭabarī, ed. de Goeje, i. 762, 5), and the tribes have a kāhin or kāhina as well as a *shā'ir* "poet" and *khaṭīb* "orator". In private the kāhins especially act as judges in disputes and points of law of all kinds, so that the conception of *kāhin* is closely connected with that of *ḥakam* "judge" (al-Hudhail's, N⁰. xvii. 7; al-Ibshīhī, Cairo 1321, ii. 73, 4). Their decision is considered as a kind of divine judgment against which there is no appeal. At the same time they interpret dreams, find lost camels, establish adulteries, clear up other crimes and misdemeanours, particularly thefts and murders, etc. In these proceedings they descend to a somewhat lower scale of divination, viz. to that of the *'arrāf* or *mu'arrif* (see above i. 460ᵇ and cf. Ibn al-Athīr, *al-Nihāya*, iv. 40; al-Djāḥiẓ, vi. 62, 5 *infra*, and al-Mas'ūdī, iii. 352). For such work they received an honorarium — forbidden in the Ḥadīth — (*ḥulwān*; al-Bukhārī, ed. Krehl-Juynboll, ii. 43, 55 *et passim*). Of course, people liked to test their mantic abilities before paying them.

The influence of these men and women was naturally great and often stretched far beyond the bounds of their tribes. They were not by any means recruited solely from the lower strata of society, but sometimes belonged to most distinguished families, occasionally even the *saiyid* or chief of a tribe was also its *kāhin* (Lammens, p. 204, 257; al-Djāḥiẓ, vi. 62 = van Vloten, vii. 184; also Wellhausen, p. 134 who, however, says wrongly that such aristocratic kāhins had inherited their office). They were in any case among the leaders or the intellectual aristocracy of their tribe (cf. the chapter *Asmā' al-kuhhān wa 'l-ḥukkām wa 'l-khuṭabā' wa 'l-'ulamā' min Ḳaḥṭān* "The names of the seers, judges, orators and learned men of Ḳaḥṭān" in al-Djāḥiẓ, *al-Bayān*, i. 136 *infra*, cf. also 113, 15 *sqq.*, ed. Cairo 1333, i. 192, cf. 159).

Among famous soothsayers of both sexes were Saṭīḥ al-Dhi'bī in Syria and Shiḳḳ b. Ṣa'b of the Badjīla, (who often appear together but are both quite mythical), the probably equally unhistorical Yemen princess Ṭuraifa, a kind of Cassandra, al-Ma'mūr al-Ḥārithī of the Madhḥidj, 'Amr b. Dju'aid al-Af'kal, the chief of the Rabī'a, Sawdā' bint Zuhra among the Ḳuraish, Zarḳā' bint Zuhair among the Ḳuḍā'a, etc. (Wellhausen, p. 136; al-Mas'ūdī, iii. 352, 364 *et passim*; van Vloten, vii. 172, 174, 180 etc., etc.). The South Arabian soothsayers enjoyed a particularly high reputation (*Aghānī*, viii. 51, 4).

Practically synonymous with *kāhin* is the word *ḥāzī* (plur. *ḥuzāt*, also *ḥāz* and *ḥāzūn*, fem. *ḥāziya*, plur. *ḥawāzī*), which is not uncommonly found. It corresponds of course to the Hebrew *ḥōzē*, but is undoubtedly also a genuine Arabic word. On the other hand, we must sharply distinguish from the

kāhin, who, as above explained, owes his supernatural knowledge to internal inspiration, these practitioners of the lower forms of divination and magic, who employ external, technical means that is, who follow a mere routine that may be acquired by any one, namely the *'āif* or *zādjir* who watches the flight of birds, the *ḳā'if*, *ḳāfir* and *ḳaṣṣāṣ*, who reads footprints, the *'arrāf* or *mu'arrif* (see also above on these terms), the water-diviner, the *munadjdjim*, the astrologer, *al-nāẓir fī asrār al-kaff* or hand-reader, the *khāṭṭ* who tells fortunes from lines on the ground, *al-ṭāriḳ* or *al-ḍārib bi 'l-ḥaṣā*, who works by casting stones, the enchanter, *sāḥir* or *rāḳī*. These too are sometimes called *kāhin*, but only by an erroneous use of the word, which probably only came into vogue when Islām had put an end to the higher art of the soothsayer, *kihāna*, while external divination and magic survived. I should like here, again to insist (against Wellhausen, p. 134 and elsewhere) that the kāhin was not, like the Jewish kōhen, also supplier of oracles. It is especially noteworthy that we never find him in connection with divination by arrow (*istiḳsām*).

The prophet Muḥammad disclaimed being a *kāhin* (Sūra lii. 29, lxix. 42; also passages like lxxxi. 22 *sqq*.). But his earliest appearance as a prophet reminds us strongly of the manner of these soothsayers. He was an ecstatic and had "true dreams" like them; his *daimonion* (*ṣāḥib*) was the (holy) spirit, whose place was later taken by the angel Gabriel. His revelations are, like the utterance of the *kāhin*, comprised in *sadj'* and sometimes begin with the usual abstruse oaths; even the forms which he was still using for administering justice and settling disputes in Medina during the early years of his stay there correspond in their main features to those of the pagan kāhin and ḥakam.

It is therefore not surprising that his Meccan countrymen regarded him as a kāhin and that his protestations that he was nothing of the kind, but a "prophet", a "messenger of God" made little impression on them. The anti-prophets also, Musailima, Ṭulaiḥa, and particularly al-Aswad al-Ansī, no less than Sadjāḥ, a lady member of the family, played their parts in the guise of kāhina.

Islām with its monotheism, its doctrine of the cessation of all revelation with Muḥammad and its regulation of all social customs through the fiḳh wiped out the old soothsayers, only gradually, it is true, for we still hear in 132 A. H. of a kāhin (al-Ṭabarī, iii. 22, 3; on *kahāna* in modern Arabia, see Landberg, *La langue arabe et ses dialectes*, p. 70; on woman seers in Muslim N. W. Africa, see Doutté, p. 32 *sqq*.). Muḥammad himself probably never doubted the supernatural nature of the kāhin's utterance. But when he declared the knowledge possessed by the demons, whom he at the same time degraded to devils, to have been stolen from heaven and to be falsified and confused (Sūra lxxii. 8 *sqq*., xxxiv. 13, vi. 112; Ibn Hishām, *Sīra*, i. 131 *sq*.), he brought their prophecies into great disrepute, and thus those traditions arose, which warned believers against utilising the services of a kāhin (al-Suyūṭī, *al-Djāmi' aṣ-ṣaghīr*, sub *man atā kāhinan*; al-Bukhārī, ii. 43, 55, *et passim*; cf. also the remark of Ibn 'Abbās *ṭ-ṭā'ūn wa 'l-kihāna* etc. in al-Zamakhsharī's *Kashshāf*, on Sūra xxxi. 34).

AL-KĀHINA, the prophetess, the seer. Even her name (Damya, Dihya) — for Kāhina is simply an epithet — is doubtful. According to Ibn Khaldūn, she belonged to the Djarwa, a Jewish(?) tribe in the Awrās [q. v.], which gave chiefs to the Berbers descended from al-Abtar. When Ḥassān b. al-Nu'mān [q. v.], had conquered the Byzantines, he advanced against the Awrās where the Kāhina reigned. The latter inflicted a heavy defeat on him at Miskiyāna (between 'Ain Baiḍā' and Tebessa in the modern department of Constantine) or according to other authorities, in the Gabes territory or at the Oasis of Nīnī, and drove him back beyond the frontier of Ifrīḳiya. The difficulties in which his wars in the east had involved the caliph 'Abd al-Malik, delayed the despatch of reinforcements. During this period the Kāhina is said to have extended her sway over the whole country, and to prevent the Arabs from making new inroads, she destroyed the towns, cut down the forests and laid the country waste. At the same time she is said to have adopted as a son a prisoner named Khālid b. Yazīd al-Ḳaisī with whom she claimed foster-kinship, which, however, did not prevent her adopted son from afterwards betraying her. Her devastations estranged the people from her and when five years later Ḥassān b. al-Nu'mān returned with reinforcements, the Kāhina was defeated in a fierce battle at Ṭabarka (82 or 84 = 701 or 703) and killed in the Awrās at the place called Bīr al-Kāhina. By her advice two of her sons had gone over to the Arabs before the battle and even received commands in the Muslim army, which continued the war against the Berbers. In reality we do not even know for certain whether the Kāhina was a queen or simply an inspired woman like Lalla Fāṭima, who was the soul of the resistance of the Kabyls against the French in 1857. Almost all that is told of her is legendary, the voluntary devastation of North Africa, her defence in the castle of el-Djem (the amphitheatre of Thysdrus) and the circumstances of her death. A

Berber genealogist, Hāniʾ b. Bakūr, even says that she ruled for 65 years and was 137 years old.

(RENÉ BASSET.)

AL-ĶĀHIR BI 'LLĀH, ABŪ MANṢŪR MUḤAMMAD B. AL-MUʿTAḌID, ʿAbbāsid Caliph. While his brother al-Muķtadir was still reigning he was proclaimed Caliph under the name al-Ķāhir, but was deposed again in a few days. After the death of al-Muķtadir the Amīr al-Umarāʾ Muʾnis proposed al-Muķtadir's son Aḥmad, afterwards the Caliph al-Rāḍī as successor; instead of him, however, al-Ķāhir at the age of 35 was proclaimed Commander of the Faithful (end of Shawwāl 320 = Nov. 1, 932). Although he wished to be regarded as devout and just, his treacherous and despotic nature was soon revealed. Through torture the mother of al-Muķtadir was forced to give up her whole fortune, and al-Ķāhir also extorted considerable sums from the sons and officials of the late Caliph. On the advice of the vizier Ibn Muķla [q. v.] Muʾnis had the Caliph carefully watched, which naturally did not please the latter, and when he was intending to dismiss Ibn Muķla, the latter conspired with several others to overthrow al-Ķāhir and put Abū Aḥmad, son of al-Muktafī, in his place. But the plot was betrayed. While Ibn Muķla escaped by flight, Muʾnis was dismissed and when he went to the Caliph, the latter had him arrested and some time afterwards executed. Abū Aḥmad was built into a wall, alive. Ibn Muķla, however, did not cease in his efforts to incite the populace against al-Ķāhir and in Djumādā i. 322 (April 934) an armed crowd broke into the palace. The half-intoxicated Caliph had to surrender; but when he refused to abdicate, he was blinded and thrown into prison. Eleven years later al-Mustakfī restored him to liberty and he lived as a beggar till his death in Djumādā i. 339 (Oct. 950).

AL-ĶĀHIRA. [See CAIRO.]

ĶAHRAMĀN-NĀMA (or DĀSTĀN-I ĶAHRAMĀN), a Persian epic in prose, which, like the *Dārāb-Nāma*, *Ķirān-i Ḥabashī*, *Hūshang-Nāma*, *Faghfūr-Nāma*, *Ṭahmūrāth-Nāma* etc. belongs as regards subject matter to the prose epics which form a cycle round Firdawsī's *Shāh-Nāma*; like the two first named it is ascribed to Abū Ṭāhir Ṭarṭūsī [Tarsūsī, q. v.].

The epic which takes us back to the days of the Old Iranian ruler Hūshang and describes the exploits of the hero Kahramān called Kātil, the "slayer", has attained some importance in the popular literature of the Turks. Among them the very diffuse Persian version occupying eight books is compressed into one volume. The historical background is an effectively developed picture of the struggle between Islām and the Indian fire-worshippers. The legendary and fictitious however occupies a considerable space. In parts the Turkish version with its mixture of prose and poetry shows the favourite technique of the popular chivalrous romances and ballads. In it we also find many burlesque features which remind us very much of the *meddāḥ* tales and their humorous situations. In many passages the secondary figure of the cunning, sly and covetous paladin, Gerden-Keshān entirely overshadows the main hero Ķahramān. His foolish pugnacity is proverbial; cf. Bāķī's *Dīwān* (lith. Constantinople 1256), p. 37 (*ķaṣīda* 1).

The substance of the epic is briefly as follows. Ķahramān, son of the Persian king Ṭahmāsp, is carried off when three years old by a *dīw* and educated as one of their own children by other *dīws* on the mountain Ķāf [q. v.]. His cousin and next successor to the throne, Ķahṭarasp, voluntarily renounces his claim to the throne of Īrān after Ṭahmāsp had died prematurely from grief at the loss of his only son, and becomes a paladin in the service of Hūshang, who is chosen Shāh. Through the whole epic runs the idea, freely proclaimed, that heroism is better than a kingdom, for the king's throne is supported by the sword of the hero.

When Hūshang sets out to conquer India, he meets Ķahramān, who has now grown up into a hero of terrible valour, has escaped from the *dīw*, and well armed, is going around as a free lance on the search for home and adventure. In his arrogance and boldness he becomes involved in a series of severe duels with Hūshang's heroes, in all of which he is victorious, until finally his identity is established by Ķahṭarasp. He thereupon readily pays homage to Hūshang and goes to India with him as one of his paladins. There they succeed, after much fighting and many vicissitudes, in taking the capital by a cunning coup, in which the king of the Indians is killed.

Ķahramān to whom the principal exploits fall, mounted on a six-footed, four-eyed, unicorn sea-monster that he has tamed, wins by his heroism as a bride the daughter of the Indian ruler, who has taken part in the fighting, unconquered and

invincible (Amazon episodes are found also elsewhere in the epic). But Ḳahramān has to set out soon again to save the mother of Bahrām, another of Hūshang's heroes, from the power of a *dīw* in the inaccessible crystal mountain. He succeeds in gaining the talisman of king Ḳārūn, in liberating his bride, who in the meanwhile had been carried off, and in freeing Bahrām's mother. Returning to Persia, he marries the Indian princess and remains in the service of Hūshang's successor, Shāh Ṭahmūrath.

KĀHRUBĀ or **KAHRABĀ** is our amber; the Persian word means attracter or robber of straw. Usually, as in al-Ḳazwīnī, its peculiar quality is attributed to it without further note; Ibn al-Kabīr, however, observes that it attracts straw quickly and strongly, when it is slightly rubbed. This attraction is used poetically as a metaphor for the attraction of lovers to each other.

Amber was brought partly from the Baltic lands of Bulghār in the region of Kasan and was considered to be the resin of the Greek nut, and partly from Spain. Al-Ghāfiḳī, who mentions both kinds, notes that it encloses flies, straw, etc.

Ornaments of amber from the earlier period have not survived in the east; al-Washshā', however, mentions specimens of yellow amber worn as ornaments by women, and the alchemist al-Djildakī signs engraved in amber as talismans. In modern times beads of rosaries and cigar-holders are made of it. It has always been in frequent use as a medicine. Just as we derive the word electricity from *elektron* so the Orientals do *kahrabā'iyya* from *kahrabā*. Amber is frequently confused with *sandarūs*, which, according to al-Anṭākī, attracts rubbed straw. On the other hand, we find the difference between them emphasised.

(E. WIEDEMANN.)

ḲAḤṬABA B. SHABĪB AL-ṬĀ'Ī, an Arab general. We find Ḳaḥṭaba, whose real name was Ziyād, mentioned as early as the year 100 (718/719) among the twelve chiefs of the 'Abbāsid faction in Khorāsān, who are said to have been chosen by the Kūfan emissary Abū 'Ikrima al-Sarrādj to further the 'Abbāsid cause. When the long prepared revolution broke out in the summer of 129 (747), Ḳaḥṭaba was in Mecca to which he had gone in order during the pilgrimage to meet in person the leader of the 'Abbāsids, Ibrāhīm b. Muḥammad [q. v.]. He did not return to Khorāsān till 130 (747/748) after Ibrāhīm had appointed him his general. Abū Muslim [q. v.] gave him the supreme command in the war against the Umaiyads and he defeated Tamīm b. Naṣr, son of the Umaiyad governor of Khorāsān, Naṣr b. Saiyār, at Ṭūs. Tamīm fell in the battle and Naṣr had to evacuate Nīsābūr and flee to Djurdjān. When the governor of the 'Irāḳ, Yazīd b. 'Omar b. Hubaira, sent an army under Nubāta b. Ḥanẓala al-Kilābī to Djurdjān, Ḳaḥṭaba took the field against him; on Dhu 'l-Ḥidjdja 1, 130 (Aug. 1, 748) Nubāta was defeated and slain, and Naṣr again took to flight with the object of making his way to Hamadhān, but died on the way in Rabī' I, 131 (Nov. 748). Ḳaḥṭaba then turned his attention to the west. While his son Ḥasan was besieging Nihāwand, where the remnants of Naṣr's army from Khorāsān had united with the governor of Hamadhān's Syrian troops who had fled from there, Ḳaḥṭaba gave battle on Radjab 23, 131 (March 18, 749) at Djābalḳ near Iṣfahān to 'Āmir b. Ḍubāra al-Murrī who was coming with a large Syrian army. The latter fell in the conflict. After Ḳaḥṭaba had joined his son, the siege of Nihāwand was continued with vigour, and after several months the Syrian garrison capitulated, while their comrades from Khorāsān, who did not know of the capitulation, were all cut to pieces. Thereupon Ḳaḥṭaba marched against Kūfa via Ḥulwān and Khāniḳīn, sending his son in advance by the direct route. Ibn Hubaira advanced to meet him with a strong army, but Ḳaḥṭaba succeeded in evading him and in passing the Tigris unscathed, and then camped near Anbār. When Ibn Hubaira followed him and pitched his camp at Fām Furāt Bādaḳlā on the east bank of the Euphrates, Ḳaḥṭaba crossed the river and marched along the west bank to a place opposite the enemy camp. In the night of Muḥarram 8, 132 (Aug. 27, 749) he crossed the river again with a small body of men and surprised Ibn Hubaira who had to seek safety in flight. In the confusion of the fighting, Ḳaḥṭaba disappeared completely; whether he was drowned or killed in the fight must be left undecided.

(K. V. ZETTERSTÉEN.)

ḲAḤṬĀN is regarded by the Arabs of the Muhammadan epoch as the "father of (all) Yemen" (Ibn Hishām, *Sīra*, i. 4; al-Mas'ūdī, *Murūdj al-Dhahab*, Paris 1861—77, i. 79; *Die auf Südarabien bezüglichen Angaben Našwān's im Šams al-'Ulūm*, ed. by 'Azīmuddīn Aḥmad, p. 83 *et passim*) i. e. as the ancestor of all South Arabians, who therefore are usually described comprehensively as "Banū Ḳaḥṭān", "Ḳabā'il Ḳaḥṭān" or briefly "Ḳaḥṭān", when not called simply "Yemenis". Ḳaḥṭān is thus contrasted with 'Adnān, the symbol of ethnological unity of all the

North Arabians. In this we find agreement not only among the Arab scholars, genealogists, historians, geographers, etc. (cf. e. g. Wüstenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, and the *Register* and Reiske, *Primae lineae historiae regnorum arabicorum*, ed. Wüstenfeld, p. 132 *sqq.*) but also in the ideas of the people, as they are still to be found in Arabia (see Doughty, *Travels in Arabia Deserta*, i. 282) and as found at an earlier period notably in the poetry (see Abū Ḥanīfa al-Dīnawarī, *al-Akhbār al-ṭiwāl*, p. 348; al-Ṭabarī, ed. de Goeje, i. 1087, also ii. 1672, 1985; al-Masʿūdī, *op. cit.*, ii. 142; do., *al-Tanbīh wa 'l-Ishrāf* = *Bibl. Geogr. Arab.*, viii. 109, etc. etc.; in the statements, that reflect popular opinions, we indeed find as the counterpart of Ḳaḥṭān usually not ʿAdnān but his fictitious son Maʿadd, e. g. Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 281; al-Ṭabarī, *op. cit.*, ii. 1056, 1084; and al-Masʿūdī, *al-Tanbīh*, p. 88, or his imaginary grandson Nizār, e. g. al-Masʿūdī, *Murūdj*, v. 223, vi. 42 *sq.*, 46, 143, 150, and Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, iv. 273, or even his imaginary great-grandsons Muḍar and Rabīʿa, e. g. al-Ṭabarī, *op. cit.*, ii. 1969 *infra*, 1985 *sq.* Arabic sources usually give Ḳaḥṭān the following ancestry ʿĀbar (not ʿĀbir, see e. g. *Ḳāmūs*, s. v.) — Shālakh (or Shālaḥ) — Arfakhshadh (or Arfakhshad) — Sām — Nūḥ; they also give him a brother, Fālagh. (The line Ḳaḥṭān b. Fālagh b. ʿĀbar b. Shālakh etc. in al-Ṭabarī, *op. cit.*, iii. 2400, and al-Dimashḳī, *Nukhbat al-Dahr*, ed. Mehren, p. 249, 252 is obviously due merely to a slip). These names are of course simply arabicised forms of the Old Testament names ʿĒber (Eber) — Shelaḥ (Shelah) — Arpakhshad (Arphaxad) — Shēm (Shem) — Nōaḥ (Noah) and Peleg (Peleg) *Genesis* x. and i. *Chron.* i. Ḳaḥṭān is therefore identical with the O. T. Yoḳṭān (Ἰεκτάν), son of Eber and brother of Peleg and ancestor of various South Arabian peoples (*Genesis* x. 25 *sqq.*, and i. *Chron.* i. 19 *sqq.*); Yoḳṭān, probably to be taken as meaning the "smaller", the "younger", i. e. as compared with his brother Peleg, might be a mere ethnological invention with the object of connecting the Arabs with the Hebrews). The Arab genealogists, etc. are quite positive on their identity; they constantly assert: "Yaḳṭan (more rarely Yaḳṭān) is Ḳaḥṭān" (e. g. al-Masʿūdī, *al-Tanbīh*, p. 31; do. *Murūdj*, iii. 143; Ibn al-Athīr, *op. cit.*, i. 57, *Tādj al-ʿArūs*, sub *ḳḥṭ*; see also Doughty, *op. cit.*, i. 229; Yaḳṭan, it is true, appears occasionally through confusion as the brother or son of Ḳaḥṭān, so Ibn Ḳutaiba, *al-Maʿārif*, ed. Wüstenfeld, p. 14; al-Masʿūdī, *Murūdj*, i. 79 *sq.*, *Tādj al-ʿArūs*, *loc. cit.*, and al-Ṭabarī, *op. cit.*, i. 213). Indeed, several Arab scholars even assert — and on this they agree with von Kremer, *Altarabische Gedichte über die Volkssage von Jemen*, p. 7 *sq.* — that *Ḳaḥṭān* is only an arabicised form of *Yoḳṭān* (al-Masʿūdī, *Murūdj*, iii. 143 and *Tādj al-ʿArūs*, *loc. cit.*). But *Yoḳṭān* could not possibly become *Ḳaḥṭān* by any phonological laws. The equation Yoḳṭān = Ḳaḥṭān has in all probability rather come to be made because some old Arab — probably a Yemenī — genealogist quite arbitrarily, simply from a certain similarity of the names, identified the Biblical Yoḳṭān with an actually existing South Arabian tribe Ḳaḥṭān, so that by this artifice, the Yemenis might be linked up to the Biblical genealogical system, which reaches back to Adam, in the same way as had been done with the North Arabians under the influence of the Ḳurʾān and the Bible by tracing ʿAdnān back to Ishmael, the son of Abraham (see e. g. Ibn Hishām, *op. cit.*, p. 3 *sq.*; al-Ṭabarī, *op. cit.*, i. 1113 *sq.*; etc., etc.). Such a tribe of Ḳaḥṭān, which would surely have been of a certain degree of importance, cannot actually be proved with certainty to have existed in pre-Muhammadan Arabia. But it seems to me to be at least not impossible that the Καταγῖται of Ptolemy (*Geogr.*, vi. 7, 20, 23) are to be explained as "Kaḥṭānites" (as Knobel has already done, *Die Völkertafel der Genesis*, p. 185, and more recently Moritz in Pauly's *Real-encycl. der klass. Altertumswiss.*, new edition, s. v. *Katanitai*) and not as Ḳaṭanites" (as von Kremer, *op. cit.*, p. 8, Sprenger, *Die alte Geographie Arabiens*, p. 207 and Glaser, *Skizze der Gesch. u. Geographie Arabiens*, ii. 285, 423). The fact, that of the two or more tribes of Ḳaṭan in question none could have been important enough to be known outside of Arabia, seems to me to be against the latter interpretation. The town of Ḳaḥṭān (between Zabīd and Ṣanʿāʾ) mentioned by al-Muḳaddasī, *Aḥsan al-Taḳāsīm*, 2nd ed = *Bibl. Geogr. Arab.*, iii. 87, 94 seems also to point to an old South Arabian tribe of Ḳaḥṭān (cf. also the Āl Ḳaḥṭān mentioned there p. 104 and described as the "oldest princes of Yemen"). Finally, it is not at all improbable that the beginnings of the modern clan Ḳaḥṭān (see below) reach back to the pre-Muhammadan period.

The great tribal confederation of the Ḳaḥṭān fell — in the Muhammadan period at least — into two groups, the smaller of the Ḥimyar and the larger of the Kahlān, whom the official genealogy put together as brothers and traced their descent from Ḳaḥṭān by the following line: Yaʿrub — Yashdjub — Sabaʾ — Ḥimyar + Kahlān (Wüstenfeld, *Tabellen*, 1; al-Masʿūdī, *al-Tanbīh*, p. 80, 1 etc.; other lists, the first of them in connection with *Genesis*, x. 26 *sqq.*, are given in Ibn ʿAbd Rabbihi, *al-ʿIḳd al-farīd*, Cairo 1303, ii. 57). In the genealogical table in *Genesis*, Sabaʾ (Sh^ebā) appears as a son of Yoḳṭān. Why the Arab genealogists have inserted Yaʿrub and Yashdjub between Ḳaḥṭān and Sabaʾ (and the two are also found, but in the reverse order, in the genealogy of ʿAdnān, as grandson and great-grandson or as great-grandson and great-great-grandson of Ismāʿīl; see Ibn Hishām, *op. cit.*, p. 3 and al-Masʿūdī, *al-Tanbīh*, p. 80), is a question that can hardly be answered with certainty. The Ḥimyar [q. v.], the epigones of the Minaean, Sabaean and Ḥimyarite kingdom, were presumably for the most part settled, while the Kahlān may have for the most part been nomads or half-nomads; cf. the expressions: "the Ḥimyar and the Arabs among the Yemenis", "the Ḥimyar and the clans (*ḳabāʾil*) of Yemen" and similar expressions in Landberg, *Arabica*, v. 116 *sqq.* The numerous South Arabian tribes which we find in Muḥammad's time in most different parts of Northern Arabia and even in Syria and the ʿIrāḳ belong principally to the Kahlān.

The Ḳaḥṭān and the Maʿadd were apparently separated even in the pre-Muhammadan period by a racial hatred, perhaps originally mainly based on the opposition between the desert and the sown. This enmity was intensified by the repeated raids of the Yemenis into the lands of the Ishmaelites [see above, i. 373] as well as later by the anta-

gonism between the Anṣār (Medinites) and the Ḳuraish, which came to a head after the death of the Prophet and influenced the history of the first two centuries of Islām in the most baneful fashion. It was perhaps this feud that first linked the Yemenī tribes on the one side and the Ishmaelite on the other into closer ethnological unities. One of its more innocuous results was the *mufākhara*, the struggle for rank and glory, which continually prevailed between the two antipodes (cf. e. g. al-Mas'ūdī, *Murūdj*, vi. 136, ii. 142 etc.). The Ḳaḥṭān, in view of the splendour of the ancient South Arabian kingdoms, had the more right at first to feel the more distinguished. But Islām with the mission of Muḥammad and the primacy of the Ḳuraish brought the Ma'add a tremendous superiority. The Yemenis endeavoured to counterbalance this in the most different ways. First of all they created an entirely romantic South Arabian saga, which pictured their past greatness in the most splendid colours (see below in the *Bibliography*). They then made Kaḥṭān son of the Prophet Hūd [q. v.], known from the Ḳur'ān, whom they next partly identified with 'Ābar (Nashwān, *al-Ḳaṣīda al-Ḥimyarīya*, ed. von Kremer, p. 4.; *Die auf Südarabien bezüglichen Angaben Našwân's*, p. 83; al-Ya'ḳūbī, *Ta'rīkh*, ed. Houtsma, i. 220; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tanbīh*, p. 81; Doughty, *op. cit.*, ii. 37, etc.). They then tried to connect themselves with the 'Adnān genealogy: perhaps by partly making the ancient Djurhum [q. v.], the brothers-in-law of Ismā'īl, to be direct descendants of Kaḥṭān (Ibn Hishām, *op. cit.*, p. 4; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 9; Ibn 'Abd Rabbihi, *op. cit.*, ii. 57; al-Mas'ūdī, *al-Tanbīh*, p. 185; Abu 'l-Fidā', *Mukhtaṣar Ta'rīkh al-Bashar*, partly edited by Fleischer as *Historia Anteislamica*, p. 130, etc.), but especially by the fact that some of their genealogists gave Kaḥṭān a genealogy direct from Ismā'īl, who thus became "father of all the Arabs" (Ibn Hishām, *op. cit.*, p. 5; al-Ṭabarī, *op. cit.*, iii. 2400; al-Mas'ūdī, *Murūdj*, iii. 142; do., *al-Tanbīh*, p. 81; al-Dimashḳī, *op. cit.*, p. 246, 252; al-Sam'ānī, *al-Ansāb*, f. 443b, etc.). They may be also responsible for the theory that the Kaḥṭān, together with the 'Ād [q. v.], Thamūd, Ṭasm, 'Imlīḳ (Amalek, see 'AMĀLIḲ), Djadīs [q. v.], etc., the so-called "lost Arabs" (*al-'Arab al-bā'ida*) represent the genuine (primary) Arabs (*al-'Arab al-'ariba* or *al-'arbā'* etc.), while the Ma'add on the other hand are "arabicised (secondary) Arabs" (*al-'Arab al-muta'arriba*; cf. on this theory, as well as on the other, according to which only the 'Ād, Thamūd, etc., are *'Arab 'ariba*, the Kaḥṭān on the contrary *'Arab muta'arriba* and the Ma'add *'Arab musta'riba*, Lane, *Lexicon*, sub *al-'Arab*; Kambel, *op. cit.*, p. 179 *sq.*; al-Ṭabarī, *op. cit.*, i. 215; al-Mas'ūdī, *al-Tanbīh*, p. 188; also above i. 372b *sq.*). Finally, we may here mention the eschatological ḥadīth of South Arabian origin, which prophesies the rule in time to come of a mild, pious Kaḥṭānid; see Muṭahhar b. Ṭāhir al-Maḳdisī, *al-Bad' wa 'l-Ta'rīkh*, ed. Huart, ii. 183 *sq.*, and Snouck Hurgronje, *Der Mahdi*, p. 12 (= *Verspreide Geschriften*, i. 156).

The native lexicons (*Lisān al-'Arab*, *Ḳāmūs*, and *Tādj al-'Arūs*, sub *ḳḥṭ*) give two nisba's from Kaḥṭān, both "good Arabic": *Kaḥṭānī* and the remarkable form *Aḥḥāṭī*. A tribe Kaḥṭān (more accurately Gaḥṭān, sing. Ghaḥṭānī, plur. Gaḥāṭīn) still exists, as was briefly mentioned above. It is exclusively Bedain and pitches its tents in the desert on the eastern borders of the northern Yemen and of the southern Ḥidjāz (roughly between 18° and 23° N. Lat.); but little bodies of them penetrate in the summer far into the Nedjd, as far as Washm, and even to the province of Ḳaṣīm. It is very numerous, rich in cattle and powerful, and also very proud as the "noblest blood of the South Arabians". Its nobility seems, however, to find expression primarily in a fanatical savagery and villainous cruelty, unparalleled elsewhere even among the sons of Arabia's deserts.

A clan, Kaḥlān, has also survived down to the present day (see i. 373b).

(A. FISCHER)

ḲAHWA, an Arabic word of uncertain etymology, which is the basis of the usual words for coffee in various languages. Originally a name for wine, found already in the old poetry (see

Landberg, *Études*, ii. 1057 and *al-Aghānī*, 1st ed., vi. 110, 7, viii. 79, 12, xx. 180, 3), this word was transferred towards the end of the viiith (xivth) century in the Yemen to the beverage made from the berry of the coffee tree. The assumption of such a transference of meaning is, it is true, not accepted by some who consider *ḳahwa* — at least in the sense of coffee — as a word of African origin and seek to connect it with the alleged home of the coffee tree, Kaffa, although they also assume contamination with *ḳahwa* "wine" (see Ritter, *Erdkunde*, xiii. 566; Vollers in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.* l. 657; *Hobson-Jobson*; Landberg, *op. cit.*, ii 1057—66). On the other hand, it should be noted that the holders of this view do not prove that coffee was exported from Kaffa as early as 1400, and do not quote a similar word in the languages of Abyssinia and adjoining lands, while the usual word for coffee there (*būn* for tree, berry and beverage; see Armbruster, *Initia Amharica*, ii. Cambridge 1910, p. 58; Coulbeaux and Schreiber, *Dict. de la langue tigraï*, Vienna 1915, p. 408; L. Reinisch, *Die Kafa-Sprache etc.*, ii. in *Sitzungsber. der Kais. Akad. der Wiss. zu Wien*, phil.-hist. Cl., 1888, cxvi. 273; see also Landberg, *op. cit.*, ii. 1055 *sq.*) has passed in the form *bunn* (in rhyme also *bun*) as a name of the tree and berry into Arabic. But as it is probable that the drinking of coffee spread in the Yemen out of Ṣūfī circles and a special significance was given to wine in the poetical language of the mystics, a transference of the poetic name for wine to the new beverage would not be at all impossible.

The coffee tree was not indigenous to South Arabia and was probably introduced from the highlands of Abyssinia, where it is found in profusion growing wild, notably in Kaffa. But there is no trace of authority for the assertion (Deflers and *Handbook of Arabia*) that the coffee tree was already introduced into Yemen in the period of the Abyssinian conquest and of the fall of the Himyar kingdom, about a century before the Hidjra. In this case the older literature would hardly have left it unnoticed.

The earliest mention of coffee so far found is in writings of the xth (xvith) century. According to (Aḥmad) Ibn ʿAbd al-Ghaffār, quoted by ʿAbd al-Ḳādir al-Djazīrī in his essay (see below, *Bibliography*), the popularity of *ḳahwa* as a beverage in the Yemen was first known in Cairo in the beginning of the xth (xvith) century. It was there taken especially in Ṣūfī circles, as it produced the necessary wakefulness for the nightly devotional exercises. According to this authority, it had been brought to ʿAden by the jurist Muḥammad b. Saʿīd al-Dhabḥānī (died 875 = 1470/1) who had become acquainted with it during an involuntary stay on the African coast and on his return devoted himself to mysticism; and it soon became popular.

Another reference in al-Djazīrī, however, ascribes the introduction of the beverage to ʿAlī b. ʿOmar al-Shādhilī. Abu ʾl-Ḥasan ʿAlī b. ʿOmar of the family of Duʾsain died in 821 (1418) according to al-Shardjī. He also might have become acquainted with coffee in Abyssinia, for after entering the Shādhiliya order, he lived for a period in the entourage of the king Saʿd al-Dīn (i. e. between 788 = 1386 and 805 or 807 = 1402/3 or 1404/5, cf. al-Maḳrīzī, *al-Ilmām bi-Akhbār man bi-Arḍ al-Ḥabash min Mulūk al-Islām*, ed. Rinck, Leiden 1790, p. 24; Paulitschke, *Harar*, Leipzig 1888, p. 504 *infra*), who gave him his sister to wife. Even after he had founded his *zāwiya* in al-Makhā (to follow al-Shardjī) gifts continued to reach him from admirers in Abyssinia.

In the treatise by ʿAbd al-Ḳādir (Ibn) al-ʿAidarūs (see below, *Bibliography*) ʿAlī b. ʿOmar, the saint of al-Makhā, is alone mentioned as the introducer of the beverage *ḳahwa* (*munshiʾ al-ḳahwa*, f. 341b; *mubdiʿuhā*, f. 347b, in a verse by Shaikh b. ʿAbd Allāh al-ʿAidarūs, died 990 = 1582). His claim to fame is, it is true, qualified by the note "that, before he prepared the beverage, only the kernel of the husk i. e. the *bunn* was used and the husks were thrown on the dung-heaps (f. 342a). In a verse attributed to him, however, he praises the *ḳahwat al-bunn* as a dispeller of sleep and aid to devotional exercises (f. 342b). While al-Shardjī says not a word of his connection with coffee, ʿAbd al-Ḳādir al-ʿAidarūs numbers the introduction of the beverage among his miracles (*karāmāt*, f. 342a).

The legend as given by Ḥādjdjī Khalīfa seems to have made two individuals out of ʿAlī b. ʿOmar, of whom ʿAlī represents the founder of the Shādhiliya order, Abu ʾl-Ḥasan ʿAlī b. ʿAbd Allāh (d. 656 = 1258; see al-Shaʿrānī, *Lawāḳiḥ al-Anwār*, Cairo 1299, ii. 5) and his disciple ʿOmar the saint of al-Makhā (Mukhā). The latter was ordered to settle, by command of his teacher who had appeared to him at his own funeral, at the place where a wooden ball which he gave him should come to rest. This is how he came to Mukhā. On the charge of having misconducted himself with the daughter of the king who was staying with him for a cure, he was banished into the mountains of Uṣāb (Wuṣāb, N. E. of Zabīd). He and his disciples, who followed him into exile, are said to have sustained themselves with *ḳahwa* (here the berry) and finally to have made a decoction from it. His visitors were cured of an itch, epidemic in Mukhā, by taking coffee and this procured the saint an honourable return.

The third person who is given credit for the introduction of coffee is Abū Bakr b. ʿAbd Allāh al-ʿAidarūs. The recent essay by ʿAlawī al-Saḳḳāf (see below, *Bibliography*) contains a statement from the *Taʾrīkh* of al-Nadjm al-Ghazzī (i. e. apparently *al-Kawākib al-sāʾira bi-Manāḳib ʿUlamāʾ al-Miʾa al-ʿāshira* by Nadjm al-Dīn al-Ghazzī, Brockelmann, *Gesch. der Arab. Litt.*, ii. 291 *sq.*), according to which this Ṣūfī, who is called here a Shādhilī, once came upon a coffee tree in his wanderings and ate the berries. As he noticed their stimulating effect he took them as a food and recommended them to his disciples so that they became known in different countries. The reference here is probably to the Ṣūfī of this name who died in ʿAden in 914 (1508—9) (Alīf Makhrama, Leiden MS. 1956, f. 188; al-Nabhānī, *Djāmiʿ Karāmāt al-Awliyāʾ*, Cairo 1329, i. 263), whose grave is still honoured there. ʿAbd al-Ḳādir (Ibn) al-ʿAidarūs only mentions his fondness of coffee and quotes his *ḳaṣīda* in praise of it. On the other hand, Abu ʾl-Ḥasan Muḥammad al-Bakrī in his tractate *Ithāf al-Ṣafwa bi-Ṭuḥfat al-Ḳahwa*, f. 2b mentions Abū Bakr al-ʿAidarūs as the introducer (*munshiʾ*) of the *ḳahwa*.

According to Glaser (*Mitt. der Geogr. Gesellsch. in Wien*, xxx. 25), it is stated in a Turkish source (which he does not give) that in the

xvith century the wālī Üzdemir (cf. Aḥmed Rāshid, *Taʾrīkh*, i. 83 *sqq.*) transplanted coffee from Africa to Yemen.

This fact, that the merit of introducing coffee as a beverage is given to different individuals suggests that we have to deal with various local traditions. The tradition of Mukhā is the most firmly established and most widely known; therefore ʿAlī b. ʿOmar al-Shādhilī — who is frequently confused with the founder of the Shādhilīya order (d'Ohsson, von Hammer, Rinn) — has become the patron saint of coffee-growers, coffee-house keepers and coffee-drinkers (cf. Goldziher, *Abhandl. zur arab. Philologie*, ii. p. lxxxviii). In Algeria coffee is also known as *shādiliye* after him (Beaussier, *Dict. pratique arabe-français*, Algiers 1871). He is popularly regarded as the founder of Mukhā, which is, however, already mentioned by al-Hamdānī (*Ṣifat Djazīrat al-ʿArab*, ed. D. H. Müller, p. 74, 12, 87, 5, 119, 21), although it owed its rise to coffee. A well, a gate and the mosque over his grave preserve the memory of al-Shādhilī in Mukhā (Niebuhr, *Reisebeschreibung nach Arabien*, i, Kopenhagen 1774, 438—440; cf. also the legend in Ḥādjdjī Khalīfa, and ʿAbd al-Karīm Kashmīrī, *Bayān-i Wāḳiʿ*, French transl. by Langlès entitled *Voyage de l'Inde à la Mekke par Abdoul Kerym*, Paris 1797, p. 202 *sq.*).

Al-Shādhilī and al-ʿAidarūs (probably not Haidar, as de Sacy, *Chrest. Arabe*², i. 461 thinks) have become Christian monks named Sciadli and Aidrus in the legend given by Naironi. The motif of the camels or goats in which the enlivening effects of coffee were first noticed has so far not been found in Oriental sources. — According to a popular legend, the coffee tree shot up from goat's dung sown by the saint (Snouck Hurgronje, *The Achehnese*, Leiden 1906, i. 260).

The legends are probably correct in saying that the taking of coffee in Arabia first began among Yemenī Ṣūfīs. They were particularly fond of the beverage because its effects facilitated the performance of their religious ceremonies. They therefore considered this as its original destination (*mawḍūʿ aṣlī*) and found that it incited to good and hastened on the mystical raptures (*fatḥ*) (*Ṣafwat al-Ṣafwa* f. 342ᵇ). The pious intention, with which it was taken, made the drinking of coffee a good work (*ṭāʿa*). It received a ceremonial character, being accompanied by the recitation of a so-called *rātib*. This *rātib* consisted in the repetition 116 times of the invocation *yā ḳawī*. This usage is based — apart from the similarity in sound between *ḳahwa* and *ḳawī* — on the fact that the numerical value of *ḳhwh*, i. e. 116, is the same as that of *ḳwy*, i. e. *ḳawī*, "strong", one of the most beautiful names of Allāh [cf. above i. 303ᵃ]. According to Shaikh b. ʿAbd Allāh al-ʿAidarūs, the recitation of the *fātiḥa* [q. v.] should precede it. Shaikh b. Ismāʿīl Bā ʿAlawī of al-Shiḥr, however, prescribed the fourfold repetition of the Sūra *Yā-Sīn* (Sūra XXXVI) with a hundred-fold *taṣliya* on the Prophet as *rātib* (*Ṣafwat al-Ṣafwa*, f. 344ᵇ *infra sq.*, 345ᵇ, 347ᵃ). Thus when taken with a righteous intention and devotion and genuine religious conviction, coffee-drinking leads to the enjoyment of the *ḳahwa maʿnawīya*, the "ideal *ḳahwa*", also called *ḳahwat al-ṣūfīya*, which is explained as "the enjoyment which the people of God (*Ahl Allāh*) feel in beholding the hidden mysteries and attaining the wonderful disclosures (*mukāshafāt*) and the great revelations (*futūḥāt*)" (*op. cit.*, f. 341ᵇ, 345ᵃ *infra*, 345ᵇ *infra sq.*). — ʿAlī b. ʿOmar al-Shādhilī is reported to have said that coffee, like the water of Zamzam, serves the purpose for which it is drunk (*op. cit.*, f. 348ᵃ, cf. above ii. 588ᵃ *infra*), and the saying has been handed down of Aḥmad b. ʿAlawī Bā Djahdab (d. 973 = 1565/66; cf. al-Nabhānī, *op. cit.*, i. 330) who in his last years is said to have lived on nothing but coffee: — "He who dies with some *ḳahwa* in his body enters not into hell-fire" (*Ṣafwat al-Ṣafwa*, f. 344ᵇ).

Coffee was probably not known as a beverage in South Arabia much earlier than the turn of the viiith (xivth) century. Whether the tree was introduced long before this is doubtful. Ibn Ḥadjar al-Haitamī [q. v.] speaks in his *Fatḥ* (commentary on *al-ʿUbāb*, probably by ʿAlī b. ʿOmar al-Safī; cf. Brockelmann, *op. cit.*, ii. 403 *sq.*) of a beverage which appeared (viz. in Mecca) shortly before the 9th century A. H. (i. e. about the end of the xvth century) and was prepared from the husk of the *bunn*, a tree introduced from the region of Zailaʿ, and called *ḳahwa* (quotation in ʿAlawī al-Saḳḳāf, p. 9). Among the jurists who gave an opinion in favour of coffee, the oldest is Djamāl al-Dīn Muḥammad b. Saʿīd b. ʿAlī b. Muḥammad Kabbin al-ʿAdanī (died in ʿAden 842 = 1438, cf. Abū Makhrama, f. 159ᵇ *sq.*; according to al-Nabhānī, *op. cit.*, i. 155 *sq.*: 829 = 1425/26).

An *urdjūza* of Sharaf al-Dīn al-ʿAmrīṭī gives the year 817 (1414/5) as the date at which coffee became domesticated in Mecca (Pertsch, *Die Arab. Handschr. zu Gotha*, iv. Nº. 2107). According to the *ʿUmdat al-Ṣafwa*, however, the drinking of a decoction of coffee husks first appeared towards the end of the ixth (xvth) century, while previously only the eating of the fruit as a delicacy (*naḳl*) was known. The drinking of coffee dropped out of use again for a time, indeed, but it finally established itself and soon people drank coffee even in the sacred mosque and regarded it as a welcome tonic at *dhikr* and *mawlid*. Coffee-houses (*buyūt al-ḳahwa*) were soon opened, where men and women met to music or where they played chess or a similar game for a stake. This and the custom of handing round the coffee on the manner of wine naturally aroused the indignation of the "unco guid" of whom many had from the first set their faces against the beverage as an objectionable innovation. They found a champion in Khāʾir Bey, who was appointed chief of the police in Mecca in 917 (1511) by Ḳānṣūh [q. v.]. He carried through the proclamation of coffee as forbidden (*ḥarām*) in the same year, in an assembly of jurists of the different schools in which the unfavourable judgment of two well-known physicians and the evidence of a number of coffee-drinkers regarding its intoxicating and dangerous effects ultimately decided the issue. The *ḳāḍī* signed the protocol of the assembly. Only the then mufti of Mecca dared to decline his co-operation and became therefore the object of coarse suspicions. By putting the questions in a clever way they were at the same time able to get an opinion condemning coffee from the faḳīhs of Cairo. The rescript which Ḳānṣūh issued in reply to the protocol sent to Cairo did not completely fulfil the hopes of the opponents of coffee as it contained no absolute interdiction but only allowed measures to be taken

against any concomitant features contrary to religion. Ibn Ḥadjar al-Haitamī, as late as about 950 (1543), had a vigorous discussion, at a wedding feast (*walīmat ʿurs*) where coffee was offered to the guests, on the new beverage with a prominent muftī, who declared it intoxicating and forbidden. Ibn Ḥadjar refers to the assembly above mentioned and cannot find words strong enough to condemn its decision and the manner in which it was reached (*Ṣafwat al-Ṣafwa*, f. 352ᵇ — 356ᵃ, quotation from the *Muʿdjam Mashāʾikhihi*).

In accordance with this verdict, Khāʾir Bey forbade the taking and sale of coffee and had a number of vendors punished and their stocks burned, so that coffee husks (*ḳishr*) disappeared from the market. But Ḳānṣūh's rescript again gave the coffee-drinkers courage and when in the next year one of the leading opponents of coffee was subjected to disciplinary punishment by a high official from Egypt and Khāʾir Bey was replaced by a successor who was not averse to coffee, they were again able to enjoy with impunity the beverage, to which these measures had only attracted the attention of wider circles. Only occasionally do we still read of action being taken against disgraceful proceedings in coffee-houses. An edict forbidding coffee issued by the Sultan of Turkey during the Ḥadjdj in 950 (1544) was hardly respected at all.

In Cairo coffee was first made known in the first decade of the xth (xvith) century in the Azhar quarter by Ṣūfīs from Yemen, who held their *dhikr*'s in the mosque with their companions in opinion from Mekka and Madīna while partaking of coffee. After it had been publicly sold and drunk there for a time, the faḳīh Aḥmad b. ʿAbd al-Ḥaḳḳ al-Sunbāṭī, famous as a preacher, declared it forbidden in 939 (1532/3). Two years later in a meeting for exhortation in the Azhar mosque he so incited his hearers against the beverage that they fell upon the coffee-houses, made short work of their contents and maltreated the occupiers. The difference of opinion thus emphasised caused the ḳāḍī Muḥammad b. Ilyās al-Ḥanafī to take the opinions of prominent scholars; as a result of personal observation of the effects of coffee he confirmed the opinion of those who considered the beverage a permitted one. Although in the years following coffee was from time to time for brief periods forbidden in Cairo, the number of its devotees, even among the religious authorities, steadily increased.

Several notable theologians had given *fatwā*'s in favour of coffee, for example, Zakariyā al-Anṣārī (died 926 = 1520), Aḥmad b. ʿOmar al-Saifī (d. 930 = 1523/24), Abu 'l-Ḥasan Muḥammad al-Bakrī al-Ṣiddīḳī (died between 950 and 960 = 1543—1553), who in verses in praise of the coffee also gives the advice that the opinion of Ibn ʿAbd al-Ḥaḳḳ should be set aside and the *fatwā* of Abu 'l-Ḥasan followed (*Ṣafwat al-Ṣafwa*, f. 349ᵃ·ᵇ; cf. also al-Ṣiddīḳī's verses in Bahāʾ al-Dīn al-ʿĀmilī's *al-Kashkūl*, Būlāḳ 1288, i. 19), ʿAbd al-Raḥmān b. Ziyād al-Zabīdī (d. 975 = 1567/68) and others (*Ṣafwat al-Ṣafwa*, f. 346ᵇ *sq.*) — Gradually the view came to prevail that coffee was in general permitted (*mubāḥ*), but that under certain circumstances the other legal categories could be applied to it also.

Intercourse with the holy cities and with Egypt brought coffee to Syria, Persia and Turkey. Rauwolf in 1573 found the beverage widely known in Syria (Ḥalab). In Constantinople and Rūmili coffee first appeared in the reign of Sulaimān I (926—974 = 1520—1566). In 962 (1554) a man from Ḥalab and another from Damascus opened the first coffee-houses (*ḳahwa-khāne*) in Constantinople. These soon attracted gentlemen of leisure, wits and literary men seeking distraction and amusement, who spent the time over their coffee reading or playing chess or backgammon, while poets submitted their latest poems for the verdict of their acquaintances. This new institution was by way of joke called also *mekteb-i ʿirfān* (school of knowledge). The coffee-house met with such approval that it soon attracted civil servants, ḳāḍīs and professors also. Poets like Māmiya al-Rūmī (cf. Bahāʾ al-Dīn al-ʿĀmilī, *op. cit.*, p. 147) and later Belīghī sang the praises of coffee, and the opinion expressed in 928 by Sulaimān's court physician, Badr al-Dīn al-Ḳūṣūnī (Leiden MS. 945, f. 58) was not unfavourable. The coffee-houses increased rapidly in number. Among the servants of the upper classes were *ḳahwedji*, whose special task was the preparation of coffee, and at the court they were subordinate to a *ḳahwedjibashi*. In religious circles, however, it was found that the coffee-house was prejudicial to the mosque, and the ʿulamāʾ thought the coffee-house even worse than the wine-room. The preachers were specially eager for the prohibition of coffee and the way was paved for them by the muftīs (according to d'Ohsson: Abu 'l-Suʿūd) with an opinion that (roasted) coffee was to be considered coal and therefore forbidden (the same argument is found in the treatise by Muḥammad (ʿAlī?) Dedeh, Leiden MS. 682, l. f. 4ᵇ). The fact that current politics were discussed in the coffee-houses, the government's acts criticised and intrigues woven, was the principal cause for the intervention of the authorities. Edicts issued in the reigns of Murād III (982—1003 = 1574—95) and Aḥmad I (1012—16 = 1613—17) were not strictly enforced and still less obeyed. The religious authorities met public opinion by declaring coffee legal, if it had not reached the degree of being like coal. The grand viziers also benefited as they levied one or two gold pieces a day on the coffee-houses, and were therefore anxious to increase their number.

Murād IV (1032—49 = 1623—40) issued a strict prohibition of coffee (and tobacco). He had all the coffee-houses torn down and many forfeited their lives for the sake of coffee. Under Meḥmed IV (1058—99 = 1648—87), while the sale of coffee in the streets was allowed, the prohibition of coffee-houses was at first renewed by the grand vizier Köprülü for political reasons. This prohibition could not possibly be kept in force permanently, and later we even read of measures taken by the government to lower the high price of coffee. From Sulaimān's time a tax was levied on coffee which was at a rate of 8 aspers per *oḳḳa* for Muslim buyers and 10 for Christians; in 1109 (1697) there was added a super-tax of 5 paras the *oḳḳa*, which was called *bidʿat-i ḳahwe*, for both.

According to von Hammer, *Geschichte* etc., v. 713, the question of the correct spelling of *ḳahwe* with *k* or *ḳ* has been disputed in Turkey. *Kahwe* is actually found in several manuscripts e. g. in the opinion of al-Ḳūṣūnī above mentioned.

The coffee tree flourishes in south-western Ara-

bia and does best on the western side of the Serat at a height of 3400—6800 feet, where it finds in the depths of the valleys and on the slopes a fertile, moist soil and the uniform warm temperature necessary for it. The plantations on the slopes arranged in terraces (see the picture in *Handbook of Arabia*, Pl. xiv.), however, need regular watering; in addition, the mist (*'uml'*, *ne-khaimdni*) that rises in thick clouds out of Tihāma brings them moisture. To protect the trees from the heat of the sun and from locusts they are surrounded by shady trees like carob trees, tamarinds, etc. The tree which is raised from seed (or propagated from layers) reaches a height of 6 to 16 feet with a diameter of 2—2$^1/_2$ inches and yields berries in the fourth year. It is an evergreen and throughout the year bears both blossom and berries in various stages of ripeness so that there is really no fixed harvest-time. The main harvest, however, varying with kind and locality, usually falls in the months from March to June. After the berries have been carefully gathered and allowed to dry they are shelled in a mill. The beans and the husks are then dried in the sun a second time.

The coffee tree is found as far north as 'Asīr [q. v.] where it is said to flourish exceedingly on mount Sh-dh-y (Shadhā?) in the land of the Zahrān (north of the Wādī Lawḳa, Doka on Stieler's map). (Sharaf 'Abd al-Muḥsin al-Barakātī, *al-Riḥla al-Yamāniya*, Cairo 1330, p. 16; cf. J. L. Burckhardt, *Travels in Arabia*, London 1829, ii. 377; for other places in 'Asīr see *Handbook of Arabia*, p. 136, 137). The most southern areas of coffee cultivation are Bilād al-Ḥudjriya, Wādī Warazān and Wādī Banā. To the east we find coffee grown in the land of the Yāfi' and in the Djawf. But it is the Ḥarāz mountains, the valley of al-Farīd belonging to the land of the Banū Maṭar, the Djabal Raima and the district round 'Udain that are particularly celebrated for their excellent coffee. (For further information see Grohmann's book [s. *Bibliography*] where, too, the varieties are detailed).

The cultivation of coffee was and still is of great economic importance for Yemen. In the time of Ḥādjdjī Khalīfa, i. e. about the middle of the xviith century, the annual export was 80,000 bales. Ṣan'ā' and Bait al-Faḳīh [q. v.] were centres of coffee trade. Mukhā, which the coffee trade brought to great prosperity, declined completely in the xixth century and has now lost all importance. Coffee is now exported through al-Ḥudaida, where already in Niebuhr's time an important traffic was found, and especially 'Aden (for details see von Neimans, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xli. 397—403, W. Schmidt, and in the *Handbook of Arabia*).

It has always been the custom in Yemen to drink preferably a decoction of the husks, which like the latter is called *ḳishr*, and is to be obtained in numerous coffee-houses (*maḳhāya*). To *ḳishr* as well as to the coffee made from beans, flavourings such as cardamom, ginger, cloves, etc., are often added. In the social life of the Arab no ceremony or festival is complete without coffee, and coffee is the first thing offered to a visitor. An invitation to coffee in Mecca means an invitation to a meal. The Arabs drink coffee without sugar; only in South Arabia milk is occasionally taken; sugar has become the vogue among the Turks.

The fresh ripe fruit is pleasing to the taste and nourishing. The eating of the *bunn* — it is not stated whether fresh or dried — is particularly recommended in a *ḳaṣīda* by Ḥamza b. 'Abd Allāh al-Nāshirī (*Ṣafwat al-Ṣafwa*, i. 358^b *sq.*) on account of its various health-giving virtues. We have no information available as to whether the custom usual among the Galla and in Kaffa of eating ground coffee mixed with butter is also usual in South Arabia. In Persia the eating of dry ground coffee is not unusual.

For Arabic and Persian works on coffee in addition to those quoted above and in the *Bibliography*, see Ahlwardt, *Verzeichn. der arab. Handschr. ... zu Berlin*, N°. 5476—5480; Pertsch, *Die arab. Handschr. ... zu Gotha*, N°. 94(9), 2105—2109, 2777; *Cat. Cod. Orient. Bibl. Acad. Lugduno-Batavae*, iii. N°. 1401; Brockelmann, *Gesch. d. arab. Litter.*, ii. 317 and 333, N°. 16.

Ḳahwa is also the name of the room in which coffee is served and thus comes to mean receptionroom and "coffee-house". The word is also used in the sense of "tip" and "present". — On coffeehouses in the East, see the works mentioned below by Olearius, Chardin, Russell, von Hammer, Snouck Hurgronje. — On coffee-vessels see Lane, Snouck Hurgronje, von Oppenheim, Socin, Euting, Landberg.

(C. VAN ARENDONK.)

AL-ĶĀʾID (A.), "the leader". From the root-meaning of the word the term may be applied to any one who leads, a horse, for example; indeed, a leading-camel may be called *ḳāʾid*. More prominent is its application to a military leader. In the general significance of "officer", "army commander" the word has been in use from ancient times to the present day wherever the Arabic language is spoken, and in the Maghrib it has further been applied to certain offices. That the east has not kept pace with this development in meaning is probably, in part at least, due to the way in which, as a result of its political history, the military language had been filled with Turkish and Persian titles. In the west *ḳāʾid* means firstly the commander of a tribe liable to service or of a province, wielding both military and civil powers, who usually — in Morocco down to the present day — has a residence in the district jail (*ḳalʿa*, *ḳaṣba*). Corresponding conditions among the Arabs in Spain are revealed in the Spanish *alcaide*, commander of a fortress or bailiff (Dozy-Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*[2], Leiden 1869, p. 79). A purely civil governor (in cities for example) is not *ḳāʾid* but *ʿāmil*; on the other hand, in Morocco the headman of a village, who has another title in his civil capacity, becomes *ipso facto* a *ḳāʾid* when he takes his place at the head of a body of militia. Further titles in the Moroccan army are *ḳāʾid raḥā* (*raḥā* "mill" = the circle of an encampment) = colonel, *ḳāʾid al-miʾa* = captain, etc. If, then, the word *ḳāʾid* is also used from Morocco to Tunisia with a genitive to describe a number of court, government or public offices, as a rule plainly endowed with authority (harbour-captain, chief of the roadways, etc., cf. Dozy, *Suppl. aux Dictionnaires arabes* and Beaussier, *Dict. arabe-français*), it is either a case of an originally military function or of a coined word like our "commander", "major", etc.

It is probably a case of borrowing from the military language when certain prominent stars, e. g. the last star in the Great Bear, or mountains (landmarks) are called *ḳāʾid* (cf. Lane, *Lexicon*, s. v.). (G. KAMPFFMEYER)

ḲĀʿIDA, (A.) (lit. "sitting"), basis, foundation, later also rule, principle, etc. Cf. the dictionaries.

ḲĀʾIF. [See ḲIYĀFA.]

KAI-KĀʾŪS, a mythical king of Persia of the Kayānid dynasty. Called Kava Uç in the *Avesta*, he is regarded by Firdawsī as the son of Kai-Ḳobād and by other sources as his grandson. He was, it is related, a warrior king who undertook a campaign into Māzandarān, which was inhabited by demons and protected by the white *dīw* (*dīw-i safīd*) who caused it to rain stones upon the invading army during the night; Rustam, son of Zāl, set out to deliver the king from his imprisonment and on his way met with seven adventures which have become celebrated in poetry [see RUSTAM]. The white *dīw* was overcome in his sleep and the blood from his heart restored their sight to the king and his army. Another war led the king into Hāmāvarān, a land lying to the south of Persia, which might be the Yemen (Ḥimyar), for he set sail for it by sea from Makrān. His adventurous spirit took him as far as the mountain of Ḳāf [q. v.] which was believed to surround the earth. He married Sūdāba, daughter of the king of Hāmāwarān (al-Thaʿālibī: Sūdāma, ar. Suʿdā, daughter of Dhu 'l-Adhʿār) and in the course of a visit to his father-in-law was treacherously thrown into prison in a castle on the shore of the sea. It was Rustam who came to deliver him.

Being master of the demons, Kai-Kāʾūs used their forces to make them build castles in Alburdj (al-Thaʿālibī, p. 165: the Tower of Babel; do., Ḥamza al-Iṣfahānī, ed. Gottwaldt, p. 35; *Mudjmal al-Tawārīkh*, *Journ. Asiat.*, Ser. iii., xi. (1841), p. 325). To revenge themselves for this forced labour one of them suggested to the king the possibility of rising up to heaven. For this purpose the king trained young eagles and attaching four to his throne had himself carried off towards the stars. When the eagles felt tired, they came down again and threw the king on the ground in the neighbourhood of Āmul [q. v.], in the middle of the forest, where he was found by the nobles who had set out to look for him. A son of the king, Siyāwakhsh (Siyāwash, Çyāvarshāna), was accused by his step-mother Sūdāba, whose overtures he had resisted, of having attempted her virtue; he cleared himself by the ordeal by fire, by walking unharmed through a narrow space between two blazing piles of wood. The young prince then asked leave to fight the Tūrānians, whom he encountered near Balkh [q. v.]. The death of Siyāwakhsh, now the son-in-law of Afrāsiyāb [q. v.] and victim of the intrigues of Sūdāba, decided Rustam to invade Persia; the hero put the queen to death before the king's eyes and then hurled himself on Tūrān to avenge his country.

Kai-Kāʾūs reigned one hundred and fifty years the latter of which he passed in retirement; he left the throne to his grandson Kai-Khusraw [q. v.], son of Siyāwakhsh.

KAIKĀʾŪS, the name of two Seldjūḳ rulers in Asia Minor.

KAIKĀʾŪS I., AL-SULṬĀN AL-GHĀLIB ʿIZZ AL-DUNYĀ WA 'L-DĪN K. B. KAIKHUSRAW, BURHĀN AMĪR 'L-MUʾMINĪN, reigned from 606–616 (1210–1219). He at once made peace with Theodore Lascaris (see below Kaikhusraw I) because he had to defend his rights against his uncle Ṭoghrilshāh of Erzerūm and his brother Kaiḳobād, who were contesting his succession. The Armenians under Lifūn (Leon), who seized the opportunity to capture Heraclea and Laranda and to plunder Kaiṣariya, were temporarily induced to retire on payment of a considerable sum. Ṭoghrilshāh also soon retired to Erzerūm, but Kaiḳobād, who had seized the fortress of Anguria, held out for a considerable time and was only forced to surrender after several years' siege. He was thereupon provisionally imprisoned in the fortress of Minshār (Mardia, now Mizere, S. E. of Malaṭya; cf. Defrémery, *Hist. des Croisades, Documents Arméniens*, i. 143, note 3). By a lucky coup Kaikāʾūs succeeded in capturing the king of Trebizond, Kīr Aleks, who had to purchase his freedom by ceding the important harbour of Sinope and paying a yearly tribute (611 = 1214). The town of Anṭālia, which had been taken by Kaikhusraw shortly before, but had expelled the Turkish garrison with the help of Christian knights, was again reconquered. In 613 (1216) Kaikāʾūs made an inroad into the land of the Armenians and besieged the fortress of Gaban (Ibn Bībī in place of this mentions two citadels, Cinām and Gānūn). The army sent to raise the siege included the Constable Constantine and several Barons of the Empire; it was completely routed by the Turks and the Constable with many Barons and knights were taken prisoner. Kaikāʾūs then returned to Ḳaiṣariya, without having taken the fortress, after plundering the land and laying it completely waste. There was nothing left for the Armenians but to beg for peace and the release of prisoners. Both appeals were granted but their king had to pledge himself to pay tribute and to cede the important frontier fortresses of Luʾluʾa and Lawzad, which commanded the Cilician passes. When in 613 (1216) Kaikāʾūs's ally, the Aiyūbid of Ḥalab, al-Malik al-Ẓāhir, died, Kaikāʾūs arranged with the Aiyūbid lord of Sumaisāṭ, al-Malik al-Afḍal, that the latter should receive Ḥalab with the Sulṭān as his overlord. This plan seemed at first to be successful; the Turkish troops occupied Marzbān without difficulty (Kamāl al-Dīn, transl. Blochet, p. 158, mentions Burdj al-Raṣāṣ, as does Yāḳūt, ed. Wüstenfeld, ii. 604, and adds Tell Khālid also), Raʿbān, Tell Bāshir and Manbidj, but in place of handing the places over to al-Afḍal, as had been agreed, Kaikāʾūs put Turkish commanders over them. Friction thus arose and the Ḥalabīs gained time to appeal for help to al-Malik al-Ashraf (cf. i. 222b) whose troops defeated the

advance-guard of the Turks at Tell Kaiḥāsin (Yāḳūt, i. 869). Kaikā'ūs then retired on Ablastin, while al-As̲h̲raf drove the Turkish garrisons out of the fortresses they had taken. Furious at this failure, which he attributed to the treachery of his own emirs, Kaikā'ūs had several of them hanged and others imprisoned in a building called Rabaḍ Turrash by Yāḳūt, which was then set on fire so that they were all burned to death. Soon afterwards he himself fell ill of consumption and died in 616 (1219). His body was buried in a hospital built by him in Siwās, where the inscription on his tomb, incised in 617, can still be read. Cf. v. Berchem, *Matériaux pour un Corpus Inscriptionum Arabicarum*, Part 3, p. 5 *sqq*.

KAIKĀ'ŪS II, 'IZZ AL-DUNYĀ WA 'L-DĪN B. KAIK̲H̲USRAW II. When Kaik̲h̲usraw II [q. v.] died in 643 (1245), according to the arrangements he had made, his son 'Alā' al-Dīn Kaiḳobād, whose mother was the Georgian princess Tamar, was to become Sulṭān, but he was barely 7 years old and had two older brothers — also still quite young — 'Izz al-Dīn and Rukn al-Dīn Ḳılıd̲j̲ Arslān. 'Izz al-Dīn was the eldest. His mother was the daughter of a Greek priest (Frater Simon in Vincent de Beauvais, Book xxxi., Ch. 26, who has, however, confused 'Izz al-Dīn and Rukn al-Dīn). The all-powerful vizier of the late Sulṭān, S̲h̲ams al-Dīn Iṣfahānī, declared for him but did not yet dare to set aside the two other brothers, for the decision ultimately lay with the Mongol K̲h̲āns. The vizier therefore could not prevent Rukn al-Dīn, accompanied by several Turkish emirs, from travelling to the *urdu* of the Great K̲h̲ān and being present at the great *ḳuriltai* at which Kuyuk was proclaimed Great K̲h̲ān (1246). But in the meanwhile the Vizier (whom Frater Simon refers to as Losyr) was busy getting all power into his own hands and married 'Izz al-Dīn's mother to the great chagrin of the Turkish emirs. To attain his desires, he had several of them put to death, including, according to Vincent, a certain Sallehadinus, i. e. S̲h̲araf al-Dīn Maḥmūd, the governor of Arzand̲j̲ān, a man well-disposed to the Christians, who understood French and German (*ibid.*, chap. 27). The result, however, was that the malcontent emirs laid a complaint against him before Kuyuk, who gave them a *yarlīḳ* appointing Rukn al-Dīn Sulṭān. In addition, the K̲h̲ān ordered that the vizier should be handed over to the relatives of the slaughtered emirs. He also laid down definitely the conditions of peace; the Seldjuḳs were to pay a yearly tribute of 1,200,000 hyperpres (bezants), 500 silk robes with gold brocade, 500 horses, 500 camels and 5,000 head of smaller animals and also presents which doubled the value of the whole. This is Vincent's story (Ch. 28). Cf. thereon Barthold in *Zapiski Wost. Otd. Imp. Arkh. Obshl.*, xviii. 0128; d'Ohsson, *Hist. des Mongols*, iii. 83.

When Rukn al-Dīn then returned to Asia Minor, he was recognized as Sulṭān, and the vizier, in accordance with the orders of the Great K̲h̲ān, handed over to his enemies and put to death in 646 (1249); we have therefore coins with the name of Rukn al-Dīn as early as the year 646 (1249). In the meanwhile, however, news arrived of the death of the Great K̲h̲ān and it was not till 1251 that his successor Möngke assumed full authority. The Turkish emirs therefore worried little about the *yarlīḳ* and agreed with one another that Kaik̲h̲usraw's three sons should reign jointly. From 647 to 655 all three names appear on the coins, with the single exception that in 652 (1254) Rukn al-Dīn struck coins with his name in Ḳaiṣarīya, because he had been proclaimed sole Sulṭān there by the *ṣubas̲h̲ī* of the town, Ṣamṣām al-Dīn. Long negotiations followed between Rukn al-Dīn and 'Izz al-Dīn, which led to nothing, however, till finally the sword brought a decision and Rukn al-Dīn was taken prisoner and sent to Amasia and later to Burghlu. In the meanwhile Möngke had demanded that 'Izz al-Dīn should come to him, but the latter had little desire to undertake the dangerous journey and therefore sent his brother 'Alā' al-Dīn Kaiḳobād with rich presents. On the way, however, the prince was murdered and an enquiry instituted by the Great K̲h̲ān to find who had a hand in it led to no result. An encounter between 'Izz al-Dīn's troops and those of the Mongol *Noyon* Baid̲j̲u at Aḳsarā in 654 (1256), in which the former were routed, forced 'Izz al-Dīn at once to seek refuge with Theodore Lascaris. The imprisoned Rukn al-Dīn was thereon liberated and recognized as Sulṭān (coins of 655). But scarcely had Baid̲j̲u retired with his Mongols than 'Izz al-Dīn returned to Konya, while Rukn al-Dīn was in Ḳaiṣarīya. After long negotiations and occasional skirmishes between the troops of the two brothers, a division of the kingdom was decided upon. Rukn al-Dīn was to reign eastwards from the Ḳızıl Irmaḳ and 'Izz al-Dīn westwards. Both brothers were then to go to Hūlāgū, who was then in the neighbourhood of Tibrīz, to have the agreement confirmed. This was done, but soon afterwards the Mongols learned that 'Izz al-Dīn had entered into negotiations with their arch-enemies, the Mamlūks of Egypt, and put an end to his rule. 'Izz al-Dīn was still able to escape to Anṭālia and sailed from there with his relatives and a few faithful emirs to Constantinople, which after the fall of the Latin Empire, was again in the hands of the Greeks. There he was sure of a good reception on account of his having a Christian mother. But the presence of these Turks soon became embarrassing to the Emperor. They are

said to have begun a conspiracy to murder him and make ʿIzz al-Dīn Emperor. When the Sulṭān's Christian uncles betrayed this plan, the Greeks lost no time in banishing the Sulṭān to Ainos, while his servants were incorporated as Turcopols in the Imperial armies, or imprisoned and put to death (662 = 1264). Six years later (668 = winter 1268/1269) ʿIzz al-Dīn was liberated by troops sent to Constantinople by Mengü Timur and brought to the Crimea. There he married a daughter of Bereke Khān and died in 678 (1279/1280). On his son Masʿūd see the separate article.

Bibliography: See that of the preceding article. Specially important here is Vincentius Bellovacensis, *Speculum historiale*, Books xxx. and xxxi., chap. 26, 27. Cf. also the Mongol and Byzantine historians (Nicephorus Gregoras and Georgius Acropolita); W. v. Tiesenhausen, *Recueil de matériaux relatifs à l'histoire de la Horde d'or*, i. 482.

KAI-KHUSRAW, a mythical king of Persia, of the Kayānid dynasty. Son of Siyāwakhsh, who had left his father Kai-Kāʾūs and taken refuge in Tūrān where he had married the daughter of king Afrāsiyāb [q. v.], he was born after his father's death and brought up in this country among the shepherds of the mountains of Ḳalū (a valley near Bāmiyān), in ignorance of his illustrious origin; but this was soon revealed. At seven years old he was making bows and at ten he feared neither lions nor tigers. Then Pīrān, the vizier of Afrāsiyāb, took him into his house. In a dream Gūdarz, an Iranian noble, descendant of the smith Kāwa, learned that the heir to the throne existed in enemy territory and sent his son Gēw to look for him; the latter found him quite by chance and recognised that Kai-Khusraw had on his arm the black mark that distinguished Kayānids; he therefore took him, along with his mother Farangīs back to Persia.

There he found a rival in his uncle Fārībors. To settle the question, Kai-Kāʾūs decided that the throne should belong to the one who captured the fortress of Bahmandiz, near Ardabīl [q. v.], where Ahriman reigned. It was of course Kai-Khusraw who won, with the aid of celestial forces, and there he built a temple in honour of the sacred fire Ādhargushnasp. A journey through his empire showed him the devastations caused by the Tūrānians and he swore to undertake a war of vengeance against them. Aided by all the nobles, he sent out expeditions of which the first were unfortunate; but fortune soon changed and Kai-Khusraw took over the direction of the campaign. Afrāsiyāb, in spite of the help of the Emperor of China, was finally forced to fly and Kai-Khusraw sought him in vain beyond the seas. He was hidden in a cave in the mountains of Ādharbaidjān [q. v.] and his place of concealment could only be discovered by supernatural means. He was finally taken prisoner and beheaded. Thus was accomplished the vengeance due for the murder of Siyāwakhsh.

Having succeeded his grandfather Kai-Kāʾūs, for whom he wept for 40 days, Kai-Khusraw reigned peacefully without any incident more remarkable than the killing of a dragon which had taken up its abode on the mountain of Kūhbīd, between Fārs and Iṣfahān (Ḥamza al-Iṣfahānī, ed. Gottwaldt, p. 36). At the end of his life, he asked God to receive him into heaven and, after naming Luhrāsp as his successor, he undertook a mountain journey in the course of which he disappeared, after having washed in the water of a spring (the spring of eternal life). Those who had accompanied him perished in a snowstorm. It is clear that the figure of Kai-Khusraw corresponds to that of the Avestan hero Haosravah, who belongs to Indo-Iranian mythology.

KAIKHUSRAW, the name of three Saldjūḳ rulers in Asia Minor.

KAIKHUSRAW I, GHIYĀTH AL-DĪN, b. ḲILIDJ ARSLĀN. When the aged and enfeebled Ḳilidj Arslān II died in 588 (1192), he was staying with his youngest son Kaikhusraw, who governed Burghlū (i. e. Uluburlu) in his father's lifetime. Kaikhusraw concealed his father's death and only made it known, when he had arrived with the body in Ḳonya, in order to have homage paid to himself as Sulṭān there. His brothers, each of whom ruled over a part of the Seldjūḳ kingdom, troubled about him just as little as they had done about their father in his later years. It was some time, however, — according to some not till 592 (1196), according to others 595 — before one of them was strong enough to take Ḳonya from him. Finally Rukn al-Dīn Sulaimān [q. v.] succeeded in doing this, so that Kaikhusraw had to take to flight and after several unsuccessful attempts to gain his throne with the help of Leon of Armenia and of the neighbouring princes of Malaṭya, Ḥalab and Āmid, wandered hither and thither (cf. the poem composed by him in Ibn Bībī, p. 29 *sqq.*), till he at length found a welcome with Alexius III in Constantinople. At this time he married a daughter of a distinguished Greek named Maurozomes, and the death soon afterwards of his brother in 600 (1204) opened up a good prospect of returning to Ḳonya, because several emirs were dissatisfied with the rule of the latter's son Ḳilidj Arslān III, who was a minor. The main part in the plot was played by several members of the dynasty of the Dānishmandiya [q. v.], which had been deposed by Ḳilidj Arslān II. He actually succeeded in being proclaimed Sulṭān in Ḳonya in spite of a *fetwā* of the ḳāḍī al-Tirmidhī, who declared him unworthy of the throne because of his Christian mother and his intercourse with the unbelievers, a *fetwā* which cost the issuer's life. According to Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xii. 160, Kaikhusraw besieged Trebizond in 602 (1206), apparently without much success. In 603 (1207) he took the important seaport of Anṭāliya from Aldobrandini. From this capture date the first relations of the Seldjūḳs with the Venetians, to whom he granted a licence to trade (cf. Heyd, *Gesch. des Levantehandels*, i. 334). In 605

(1208), in alliance with al-Malik al-Ẓāhir of Halab, he undertook a campaign against the Armenians and took the fortress of Pertus. In the beginning of 607 (1210) he fell in the battle at Khonās, perhaps in single combat with Theodore Lascaris. Cf. Nicephoros Gregoras, ed. Bonn, i. 17—21, and Georg. Acropolita, ed. Bonn, p. 16 and thereon Houtsma, in *Verslagen en Mededeelingen der Kon. Akad. van Wetensch.*, Afd. Letterk., Ser. 3, ix. (1893), p. 138 *sqq.*

Kaikhusraw II, Ghiyāth al-Dunyā wa 'l-Dīn b. Kaiḳobād, ascended the throne after the assassination of his father in 634 (1237), although Kaiḳobād had not designated him as his successor but the son 'Izz al-Dīn by the Aiyūbid princess [cf. Kaiḳobād I], apparently because Kaikhusraw, as Vincent says, was the son of a concubine (she was called Māh-peri Khātūn, as the inscription on her tomb at Ḳaiṣariya tells us) and, besides, was quite an insignificant man. But he had been appointed governor of Arzandjān by his father after the dismissal of Da'ūd Shāh [see Kaiḳobād I] and was the candidate for the throne favoured by the Christian mercenaries.

The latter, with the Emir Sa'd al-Dīn Gōbāk, carried through his proclamation as sulṭān, while the unfortunate 'Izz al-Dīn with his mother and a younger brother was put out of the way. Only the Khwārizmis [see Kaiḳobād I] were discontented with this, refused to obey orders and marched out of the Seldjūḳ kingdom in order to ravage the adjoining Aiyūbid lands. Kaikhusraw on his side made peace with the Aiyūbids and endeavoured to cement it by a double marriage, at which the famous historian Kamāl al-Dīn officiated as plenipotentiary for the lord of Ḥalab. But as he did not trouble about the business of government, the Emir Sa'd al-Dīn took all the power into his own hands and began a regular reign of terror. He even declared himself an illegitimate son of Kaikhusraw I, and finally went so far that the Sulṭān had him treacherously put to death. The Sulṭān then celebrated his marriage with the beautiful Georgian princess Tamar [see Kaiḳobād I], whose portrait he even wished to put on the coins; when he had to give up this idea he chose the emblem of the lion and rising sun, as is still usual in Persia to-day. The internal weakness of the kingdom soon showed itself (638 = 1241) when a Turkoman rising broke out, caused by the appearance of a certain saint Bābā Isḥāḳ, whose messengers traversed the whole country and in their sermons denounced the luxurious life of the Sulṭān and nobles. Soon armed bands from the district of Sumaisāṭ and Malaṭya advanced in the direction of Siwās, Toḳāt and Amasia and put to flight the Turkish generals sent against them. The execution of the pious Bābā only increased the number of his followers because he was revered as a messenger of God. Only the summoning of troops stationed on the frontiers in Erzerūm, among whom were the Christian mercenaries, finally put a bloody finish to the rebels' activities. Cf. the report in Vincent de Beauvais, Book xxx. chap. 139, 140. Here the prophet is called Baba Rosoule (= Rasūl Allāh), in al-Maḳrīzī, *Histoire d'Égypte de Makrizi*, transl. Blochet, Paris 1908, p. 474, Il-Bābā (*Il* is probably a wrong reading for the Arabic article or is for Ilyās, as the name Ilyās Bābā is also found). Cf. Köprülüzāde Meḥmed Fu'ād, *Ilk Mutaṣawwiflar*, p. 232. Scarcely was this danger passed when in 639 (1241) Baidju Noyon appeared with his Mongols before Erzerūm and took and plundered the city after heavy fighting with the frontier troops. The vizier Muhadhdhib al-Dīn and his Nā'ib Shams al-Dīn Iṣfahānī hastened to gather a large army, to hire Armenian and Aiyūbid mercenaries and to advance against the Mongols with them; but the incapacity and cowardice of the Turkish troops lost the battle at Kōsädagh (Muḥarram 6, 641 = June 26, 1243). Baidju thereupon marched on Siwās, which surrendered and was therefore spared, but Ḳaiṣariya was taken by force of arms, plundered and its inhabitants massacred. He then went into winter-quarters and the vizier succeeded in concluding a temporary peace, which, however, had still to be confirmed by the Great Khān. But as Ögedei died just then and the next *ḳuriltai* was not held till 1246 (see above, i. 682a), the Turks had a few years' peace and the able Shams al-Dīn used the opportunity to seek the intervention of Bātū Khān, on a ceremonious embassy with several other prominent Turks. He was entirely successful so that on his return he received the office of vizier rendered vacant by the death of Muhadhdhib al-Dīn. The good for nothing Sulṭān, who after the battle of Kösädagh, had been about to fly to the Greeks, again gathered some courage and in 1245 began a campaign against the Armenians, against whom he had a grievance because they had handed over to the Mongols his mother, who had taken refuge with their king, with her treasures. The objective of the campaign was Ṭarsūs on this occasion, but soon it had to be abandoned, because the rainy season began, after the land had been ravaged in fearful fashion. The Armenians by the treaty of peace bound themselves to pay tribute and to cede Bragana. When the leaders again appeared at the Sulṭān's court, the latter had died suddenly a week before.

Bibliography: See above under Kaikā'ūs; of particular importance are here Vincent de Beauvais and the historians of the Mongols.

Kaikhusraw III, Ghiyāth al-Dīn, b. Rukn al-Dīn Ḳilidj Arslān was proclaimed Sulṭān, immediately on the murder of his father, by the all powerful Parwāna Mu'īn al-Dīn Sulaimān [q. v.], although he was still a minor. The events in Asia Minor during his reign will be better discussed in the article Seldjūḳs. After the execution of the Parwāna (676 = 1277) Kaikhusraw's reign was soon at an end, as his youth rendered him a mere tool in the hands of the Mongol rulers. His nephew Mas'ūd [q. v.], when he returned to Asia Minor after his father's death, was so successful in gaining the favour of the Great Khān Abāḳā [q. v.] that we have coins of his name as early as 681. The unfortunate Kaikhusraw, who was entirely in the power of the Mongol prince and claimant Ḳunḳuratai, became involved in the latter's fall and was put to death in 682 (1283) in Arzandjān by order of the Ilkhān Aḥmad.

KAI-ḲOBĀD, a mythical king of Persia, of the Kayānid dynasty. The *Avesta* knows his name in the form Kavi Kavāta, but nothing more of him; tradition only preserves of him the fact that he was grateful to the Yazatas for having made his empire glorious and for having re-established the legitimate line of kings of Irān. The only source to consult is the *Shāh-nāma* of Firdawsī. To defend Irānian soil against the inva-

sions of the Tūrānian Afrāsiyāb, the Sage Zāl, father of Rustam, after ripe reflection and consultation with the *mōbedh*'s decided on Kai-Ḳobād, who was living in the mountains of Alburdj (Hara-berezaiti) and sent his son to look for him. The latter found him in the midst of a banquet surrounded by boon companions; he greeted him, but already the new king had seen in a dream two white falcons place a golden tiara on his head and was thus informed of the coming of the embassy; the care which he had taken to make himself remote had not prevented destiny from putting the messenger on his track. Becoming commander of the Īrānian army, Rustam completely defeated Afrāsiyāb, who would have been made prisoner if the girdle by which he was being carried off had not broken. As a result of this victory, a peace was concluded which gave Persia its former frontier of the Oxus. Kai-Ḳobād spent his time in organizing the empire and traversing it, in founding cities and in lavishing riches on the heroes who had rebuilt the empire: Rustam, Kārin and others. He died at the end of a reign of a hundred years.

The *Mudjmal al-Tawārīkh* (*Journ. Asiat.*, Ser. iii., xi. (1841), p. 320) which says that Kai-Ḳobād came from the mountains of Hamadhān, Alwand, and not from Alburdj, and Hamza al-Iṣfahānī (ed. Gottwaldt, p. 35) only mention his building cities, notably Ḳobādiyān on the Oxus, and the expansion of Iṣfahān. The *Bundihish* only gives fifteen years to the reign of this king instead of a hundred.

(Cl. Huart.)

KAIḲOBĀD, the name of three Seldjūḳ Sulṭāns in Asia Minor.

Kaiḳobād I, 'Alā' al-Dunyā wa 'l-Dīn Abu 'l-Fatḥ K. b. Kaikhusraw. How he had been taken prisoner in the reign of his brother has already been told under kaikā'ūs i. The death of this brother in 616 (1219) opened to him not only the gates of the fortress of Gudhurpert, where he was then interned, but also placed him on the Seldjūḳ throne. All the Turkish emīrs do not seem to have been quite agreed about this, as they declared for another brother, Kaiferīdūn, but Kaiḳobād succeeded in gaining possession of Ḳonya, the capital, and in soon afterwards rendering the malcontent emīrs harmless. He probably received valuable help from the Christian auxiliary troops, as Ibn Bībī relates that the Emīr Comnenus played an important part in these events. We know from the account in Vincent de Beauvais (Book xxx. ch. 144), which, however, refers to the reign of his successor, that the Greek emperors of Trebizond and Nicaea as well as the prince of Lampron had pledged themselves to place a number of troops — settled in a treaty — at the disposal of the Seldjūḳ. It is certain that this agreement was already in force in the reigns of Kaikhusraw I and Kaikā'ūs I, perhaps with the single limitation that it was not till the reign of the last named that this pledge held good for the Armenians also, and was renewed under Kaiḳobād. At the beginning of his reign the Armenian king Leon II died (1219) and his daughter Isabella married the son of the Catholic prince of Antioch, which aroused a great dispute among the Armenians, the result of which was that the discontented barons under the leadership of Constantine, prince of Lampron, captured the prince, poisoned him and married his widow to Haithum, the son of Constantine. A war with the prince of Antioch was thereby rendered inevitable; the Templars and Knights of St. John received orders from Rome not to take part in it so that Bohemund could not do much against the Armenians and, according to Ibn al-Athīr, had even to appeal for help to Kaiḳobād. In any case, the latter took advantage of the dissensions among the Christians by seizing several Armenian forts on the Mediterranean coast and elsewhere, including the castle of Galonoros (καλὸν ὄρος), Candelor or Scandalor, which he chose for his winter residence and made a considerable seaport by his buildings there, so that the place became called Alaya ('Alā'iya) after him. In these circumstances there was nothing left for the prince of Lampron on his side, but to acknowledge the suzerainty of Kaiḳobād and to support him with auxiliaries in his wars.

An attempt by Mas'ūd, the Ortuḳid of Āmid and Ḥiṣn Kaifā, who succeeded his father as lord of these towns in 619 (1222), to leave Kaiḳobād's name out of the *khuṭba* and to make an alliance with the neighbouring Aiyūbid princes, cost him the fortresses of Kiakhta and Čemishkezek. The troops sent to his assistance by al-Ashraf (see i., 222b) were scattered by the besieging army, but Kaiḳobād hastened to heap tokens of honour on the captured commander and to release him, because much depended for him on the friendship of the Aiyūbids. Indeed he even sought the hand of an Aiyūbid princess. His request was granted and the marriage took place a little later. In 622 (1225), the prince of Arzandjān, Bahrāmshāh, died after a sixty years' reign, as also did the Seldjūḳ of Erzerūm, Ṭughrilshāh. Kaiḳobād thought this a good opportunity to seize where possible the lands of these rulers. Dā'ūdshāh, Bahrāmshāh's successor, did his best to avert the danger by entering into alliances with Djalāl al-Dīn Khwārizmshāh, with 'Alā' al-Dīn, Grand Master of the Assassins and with al-Ashraf, but in vain. Kaiḳobād forced him to cede his territory and he was equally successful with another member of the Mengüček family, Muẓaffar al-Dīn Muḥammad, who ruled over Coghonia (Shabīn Ḳaraḥiṣār). But before he could take Erzerūm too, he had to wage a difficult war with Djalāl al-Dīn, who was an ally of the prince of Erzerūm. After embassies had gone several times to and fro between the two rulers, Kaiḳobād made an alliance with al-Ashraf, who then fought with Djalāl al-Dīn for the possession of the town of Khilāṭ. As soon as the Khwārizmshāh heard of this, he endeavoured by a hurried march to anticipate the union of the two enemy forces, but in the battle of Arzandjān on Ramaḍān 28, 627 (Aug. 10, 1230, cf. *Actes du 10e Congrès internat. des Orientalistes*, iii. 19) he suffered a terrible defeat. The fate of the prince of Erze-

The redaction having determined to finish the work within 10 years, a second series of numbers, beginning with S, will be issued, parallel to the present series. It is the intention of the redaction to publish 3 numbers of each series yearly.

2/25

zîm was thus decided at the same time; his territory was annexed by Kaiḳobād. A war with the Georgians in 629 (1232) was speedily concluded by a treaty of peace, in which the queen Rusudān agreed to the marriage of her daughter with Kaiḳobād's son Kaikhosrew. In the meanwhile the Mongols had again appeared in these regions; Djalāl al-Dīn had met his death and large bands of Khwārizmis were raiding up and down for their own hand. Kaiḳobād then decided to occupy the district of Khilāṭ, which al-Ashraf had received after the defeat of Djalāl al-Dīn but did not defend, and to take the roving bands of Khwārizmis into his service as mercenaries. This brought about a coalition of all the Aiyūbid princes under the leadership of al-Kāmil of Egypt against Kaiḳobād. Soon their troops were on the Asia Minor frontier but they did not succeed in forcing the passes to enter the land; in addition the Aiyūbid leaders soon began to quarrel among themselves. In the end they had to be content with defending the town of Kharthabirt against the advancing Turks. But the latter could not be kept back. Al-Muẓaffar, the Aiyūbid of Ḥamā, on whom the conduct of the defence fell, was captured along with the Ortuḳid ruling in Kharthabirt. The town henceforth (from 631 = 1234) belonged to the Seldjūḳs. Kaiḳobād next besieged and captured Ḥarrān, Edessa and Raḳḳa (632 = 1235) which, however, were soon lost again to the Aiyūbids. Āmid also was unsuccessfully besieged by him and when in 634 (1237) he was about to undertake a new campaign, he was poisoned in Ḳaiṣarīya, by order of his son Kaikhosraw, it is said, because Kaiḳobād had appointed as his successor not him, but a younger son, borne to him by the Aiyūbid princess.

During Kaiḳobād's vigorous reign the Seldjūḳ kingdom attained its greatest extent and highest prosperity, for Kaiḳobād was not only an indefatigable soldier but also undertook great building operations, the remains of which in Ḳonya, Sīwās, 'Alāya and elsewhere keep alive the memory of the great Sulṭān to this day. He busied himself in opening up his lands to commerce and in developing the natural wealth of the country; with this object he even undertook an expedition to the Crimea, no doubt at the wish of the Italians. As a result his kingdom was at that time considered the richest in the world.

Bibliography: See above under KAIKĀ'ŪS. Cf. also for the war with Djalāl al-Dīn: al-Nasawī, *Sīrat al-Sulṭān Djalāl al-Dīn Mankobirtī* (Publ. *de l'École des Langues Or. Viv.*, Ser. iii., Vol. ix. x.), Arabic text and French transl. by Houdas; for the Banū Mengüček: v. Berchem, *Matériaux pour un Corpus Inscript. Arab.*, iii. 55 *sqq.*; Houtsma in *Keleti Szemle*, 1904, p. 277 *sqq*.

KAIḲOBĀD II, 'ALĀ' AL-DĪN B. KAIKHOSRAW, reigned together with his two brothers, Kaikā'ūs and Ḳilidj Arslān, as was briefly described in the article KAIKĀ'ŪS II. Here we shall only refer to a coin described by Ghālib Edhem, *Taḳwīm-i Meskūkāt-i Seldjūḳīya*, No. 113, which bears the date 663 and the name Kaiḳobād alone, although Kaiḳobād had died 8 years before.

KAIḲOBĀD III, 'ALĀ' AL-DĪN K. B. FARĀMARZ B. KAIKĀ'ŪS was installed as Sulṭān by Ghāzān Khān in 697 (1298). Of his history practically nothing is known with certainty. His name still appears on a coin of 701, so that the statement in Munadjdjim Bashi that he was again deposed in 700, seems to be wrong. Cf. v. Berchem, *Matériaux*, iii. 42 note. But as there is also a coin of Mas'ūd with the date 700, both princes seem to have borne the title Sulṭān in this year. That on the other hand Kaiḳobād was Sulṭān as early as 685, as has been deduced from the diploma alleged to have been given by him to 'Othmān Ghāzī (Feridūn, *Munsha'āt*, i. 48—53) is certainly wrong, as is the calculation in Djannābī, which gives him a reign of 20 years, 3 months and 13 days.

KAIḲOBĀD, MU'IZZ AL-DĪN, king of Dihlī, was the son of Nāṣir al-Dīn Bughrā, king of Bengal and second son of Ghiyāth al-Dīn Balban [v. BALBAN] of Dihlī. On the death of his eldest son, Muḥammad Khān, who was slain by the Mughals, Balban made his second son, Bughrā Khān, who was governor of Bengal, his heir, but the prince could not endure the restraint of his father's court, and was absent in Bengal when, in 1287, the throne became vacant, and the *amīrs* made his son, Kaiḳobād, king. Kaiḳobād, who was barely eighteen years of age at the time of his accession, had been most strictly educated by his grandfather, and signalised his sudden emancipation by unbridled licentiousness. He put to death his cousin, Kaikhosraw, son of Muḥammad Khān, and disgraced the minister, Khaṭīr al-Dīn, after whose degradation Niẓām al-Dīn, nephew and son-in-law of the *kotwāl* of Dihlī, became supreme in the state. Early in the reign a horde of Mughals, which had invaded India, was defeated; the prisoners taken were treated with great cruelty, and a large number of Mughals who had accepted Islām and settled in India were massacred.

In 1288 the king's father, Bughrā Khān, marched from Bengal with the object of asserting his superior claim to the throne of Dihlī, but was met by Kaiḳobād on the banks of the Ghāgra and changed his attitude. The meeting was affectionate on both sides and the father privately warned his son against his evil courses and against the ambition of Niẓām al-Dīn, and although these counsels effected no improvement in the young king's morals, they induced him to remove his minister by poison. Late in 1288 Kaiḳobād was struck down with paralysis, the result of his debauchery, and the kingdom was thrown into confusion. Malik Djalāl al-Dīn Fīrūz Khaldjī, recently appointed governor of Baran, attempted to maintain order in the capital, but was suspected, with good reason, by the Turkish *amīrs*, who proclaimed Shams al-Dīn Kayūmarth, the infant son of Kaiḳobād. The strife of the two factions continued while the king lay helpless, but Fīrūz Khaldjī at length overcame his opponents and ascended the throne. The wretched Kaiḳobād was murdered in June, 1290, and his body was thrown into the Djamna.

KAIL (A.), the most general term for measure. The word next has the special meaning of measure for dry goods such as grain and cereals of all kinds and finally (like *kafīz*) means

contents (or weight of the contents) of a definite measure of capacity. Another series of meanings is: measure, correct measure, tested, adjusted or official measure (or weight). In this meaning it is found on the Egyptian glass weights (e. g. *dirham kail*) and in the papyri as *kail al-dīmūs* (*μέτρῳ δημοσίῳ*) — a well known official measure for corn in general use for the levying of taxes, to be distinguished from *ḳanḳal*, which apparently means the varying, local measure.

Kaila is usual as meaning a definite measure, but we also find *kail* used, without any obvious differentiation, as a definite measure of capacity. The *kaila* is not part of the traditional system of capacity-measures of the Arabs (cf. *ḳafīz*) but like many other metrological terms in other languages has entered official language from the market-place. We therefore nowhere find the *kaila* definitely coordinated with the system of measures. In the reign of the Mongol Īl-Khān of Persia, Ghāzān Khān (694—703 = 1295—1304) we already find the attempt being made to make the *kaila* the standard measure of the corn trade. Rashīd al-Dīn tells us that this ruler proclaimed the *kaila* of Tabrīz as the official unit of capacity and fixed its weight at 2600 dirhams (8.87 kg. = 19 lbs.). The further regulation that special measures, whose contents were to correspond to the above mentioned weight for the kind of grain in question, were to be prepared for every kind of cereal (oats, wheat, rice, peas, beans, sesame, millet etc.) shows that then as now business was done by weight and not by measure. In the Turkish empire also the *kaila* was the official unit in the corn trade and the *kaila* of Stamboul (*lingua franca* = kilo of Constantinople) of about 35 l. ($7\frac{3}{4}$ gallons) was ordered to be the standard measure. But every centre of trade had (and frequently still has) a local *kaila* which often differs considerably from the normal. The same is true of the *kailadja*, dealt with below. (E. VON ZAMBAUR)

KAILADJA, a measure of capacity in local use and varying very much, whose size varies between $\frac{1}{2}$ and 2 l. (or kg. = $\frac{7}{8}$ to $3\frac{1}{2}$ pints). The term existed as early as the 3rd century A. H.

Bibliography (for the preceding article also): Sauvaire, *Matériaux*, in *Journ. As.*, Series 8, viii. (1886), 126 *sq.*; S. Lane Poole, *Arabic Glass Weights in the British Museum*, N°. 47, 51; Becker, *Papyri Schott-Reinhardt*, i. 31 and 72; al-Ṭabarī (ed. de Goeje), *Glossarium*, p. CCXXXIV and CDLXII; Behrnauer, *Institutions de Police chez les Arabes* in the *Journ. As.*, Series 5, xvi. (1860), 131; al-Khwārizmī, *Mafātīḥ al-ʿUlūm*, ed. van Vloten, p. 15. (E. v. ZAMBAUR)

ĶĀ'IM (A.), "standing upright", "perpendicular". Hence *ḳā'im-maḳām* "standing in place (of another)", "deputy"; *Ḳā'im al-Zamān* [q. v.]; *zāwiya ḳā'ima* "right angle". Also: "existing" for example in *ḳā'im bi-nafsihī* (or *bi-dhātihī*) "self-existent" (said of God). *Ḳā'im bi-* also means "executing anything"; hence *al-ḳā'im bi-amri'llāh* "He who executes God's command".

ĶĀ'IM-MAĶĀM (A.), "deputy"; pronounced and written *ḳaimaḳam* in Turkish, the name of a rank and office in Turkey. In the period before the *tanẓīmāt* reforms the word meant the officer (*rikāb ḳaimaḳāmi* or *āsitāne ḳaimaḳāmi*), temporarily commissioned to act as deputy at the court or in the capital in the absence of the Grand Vizier, the so-called *ḳaimaḳam pasha*. The case is an isolated one in which the Grand Vizier appointed an *ordu ḳaimaḳāmi* to represent him in the camp (Luṭfī, *Ta'rīkh*, iv. 19); we also find *ḳaimaḳams* for the Ser'askers and the Ḳapudan Pasha (*Djezā'ir Ḳaimaḳāmi* for the *eyālet* of the Archipelago, which was under the Grand Admiral); for the regular representatives of the lower categories of officials the now obsolete term *yer* (e. g. *ḳāḍī yeri*) was used, for the judicial officials *nā'ib*.

In the reorganisation of the army and the provincial administration on the European model under Maḥmūd II and 'Abd al-Madjīd *ḳaimaḳam* became in the army the equivalent of Lieutenant-Colonel and in the civil service the name of the official entrusted with the administration of a district (*ḳaḍā*).

Bibliography: v. Hammer, *Des Osmanischen Reiches Staatsverfassung*, ii. 96 *sq.*, 102 *sq.*, 286 *sq.*; Aḥmed Wefīḳ, *Lehdje-i ʿothmānī*, s. v. (wrong in Zenker, *Dictionnaire Turc-Arabe-Persan*, s. v.). (J. H. MORDTMANN)

ĶĀ'IM AL-ZAMĀN (A.) i. e. "Lord of the Age", a Shīʿa term. The phrase includes the two theological meanings of "representative of God on earth" and "Deputy" of the Prophet. Among the earlier Shīʿīs for example the Imām is called "the *ḳā'im*", "our *ḳā'im*" or "the *ḳā'im* of his age", synonymous with *ḥudjdja* or *khalīfa*. The political application of the word brought in the meaning of "rebellious", current among all the seceding sects, e. g. also among the Khāridjīs. Through chiliasm the name is given to the Mahdī as "resurrected" from (apparent) death who is active in the "age" through the *naḳīb* and *dāʿī* until as *ḳā'im al-ḳiyāma* he brings about his kingdom and the judgment. Among the Imāmīs the twelfth Imām, and among the Ismāʿīlīs the seventh is therefore *ḳā'im al-zamān*. But the more the Imām becomes like to God in the subdivisions of the latter, the more he falls into the background and is only occasionally referred to as "the *ḳā'im*" simply, with reference to Sūra iii. 16, xiii. 33, while the name and powers are transferred to heads of sects, who are mostly not 'Alids. Gnostic speculation equates the *ḳā'im al-zamān* to the first emanation, e. g. among the Druses to the *intelligentia prima*, *ʿaḳl*, i. e. Ḥamza. The term is mystically amplified by the interpretations of the mysteries of the initial letter *ḳāf*, the symbol of the girdle of the world.

AL-ḲĀʾIM BI-ʾAMRI ʾLLĀH, ABŪ DJAʿFAR ʿABD-ALLĀH, ʿAbbāsid Caliph. He is said to have been born in Dhu ʾl-Ḥidjdja 391 (Nov. 1001); his father was the Caliph al-Ḳādir [q. v.], who had homage paid to him as his successor shortly before his death; his mother was an Armenian or Greek slave. When he ascended the throne (Dhu ʾl-Ḥidjdja 422 = Nov.–Dec. 1031), the Caliphate had almost entirely lost its secular power and anarchy reigned practically supreme in the capital. To make himself obeyed, he ordered in 426 (1034/35) that all judicial offices should temporarily suspend their activities, which was, however, entirely without success. In his reign ended the Būyid dynasty and their place was taken by the Seldjūḳs. On Ramaḍān 22, 447 (Dec. 15, 1055) the Seldjūḳ chief Ṭoghrul Beg was officially prayed for and on the 25th the latter entered Baghdād in state, nominally as vassal but in reality as master of the Caliph (see KHUSRAW FĪRŪZ), who soon afterwards in 449 (1058) granted him the Sultanate and the title of honour of "King of the East and of the West". In Dhu ʾl-Ḳaʿda of the following year (Dec. 1058) the Turkish general al-Basāsīrī [q. v.] took possession of the capital, while the Caliph took refuge with the ʿUḳailid Ḳuraish b. Badrān [q. v.], and on the 13th (Jan. 1, 1059) prayer was offered in Baghdād for the Fāṭimid al-Mustanṣir. Al-Ḳāʾim, however, was soon again recognized as Caliph (end of 451 = 1059/1060) and although he was only a tool in the hands of the Seldjūḳs, he was treated with respect both by Ṭoghrul Beg and his successors. He died in Shaʿbān 467 (April 1075).

AL-ḲĀʾIM BI-AMR ALLĀH, ABU ʾL-ḲĀSIM ʿABD AL-RAḤMĀN, the second ruler of the Fāṭimid [q. v.] dynasty, born in 280 (893), succeeded his father ʿUbaid Allāh al-Mahdī in 322 (934) on the throne, assumed the praenomen Muḥammad and at his proclamation took the name of al-Ḳāʾim bi-Amr Allāh. His father had designated him his successor as early as 298 (911), when after the death of al-Shīʿī [q. v.] he thought his own rule sufficiently secure, and had had his (viz. the prince's) name mentioned in the Friday prayer; the prince commanded the army and conducted most of the campaigns while ʿUbaid Allāh was still on the throne; for his father had never placed himself at the head of his troops nor ever even taken a personal part in any of the numerous wars, but used to entrust his armies with their conduct and after failures, or on particularly difficult expeditions, he used to appoint his eldest son to the supreme command.

Of al-Ḳāʾim's campaigns, while heir-apparent, may be mentioned the conquest of Constantine and Tripolis as well as his efforts to conquer Egypt. He gained great successes especially in the second expedition against Egypt in 307—309 = 919—921. He had conquered Alexandria and Djīza (Gīza) and occupied the Faiyūm and Ushmunain. But disease, deficiencies in the supply of reinforcements and a strengthening of the ʿAbbāsid governors' troops on the other side and the defeat of his fleet at Rosetta forced him finally to withdraw. He had, however, consolidated Fāṭimid sway as far as Barḳa. In 316 (928) he developed the town of Masīla as his capital and called it al-Muḥammadiya.

When in 322 (934) he succeeded his father, he had at once to turn his attention to an impostor, who gave himself out to be the son of al-Mahdī. After defeating him without difficulty, he turned his attention westwards to secure his authority there. He then devoted himself to various expeditions, sent his fleet to the coast of France, where the crews plundered and took prisoners, to Genoa, which was captured for a short time, and to Calabria. In 323 (935) he sent an army of 10,000 to Egypt, which conquered Alexandria, but was soon afterwards defeated by Muḥammad b. Ṭughdj al-Ikhshīd, brother of the ʿAbbāsid governor. At home al-Ḳāʾim had to wage a continual struggle with rebellious tribes, his most redoubtable opponent being the rebel Abū Yazīd [q. v.]. After heavy fighting and many misfortunes, he succeeded in driving his opponent out of al-Mahdiya but soon afterwards in 334 (946) he was hard pressed at Sūsa with his army and finally surrounded. During the siege, he fell ill and died in a few weeks.

Al-Ḳāʾim was a fanatical champion of Fāṭimid doctrines. His reign was a period of ceaseless wars, which were waged in the fiercest and most barbarous fashion. Courage, ability and tenacity cannot be denied him. He laid sound foundations for the greatness of his successors. In this period of war-mania, it was impossible for him to attend to the works of peace. The *Bibliography* is found in Wüstenfeld, *Gesch. d. Fatimid. Chalifen* (*Abh. der Kön. Ges. der Wiss. zu Göttingen*, xxvi., xxvii., 1881) and above ii. p. 92a, at the end of the article FĀṬIMIDS and i. p. 114a, article ABŪ YAZĪD. (SOBERNHEIM)

KAIMAK. [See KIMĀḲ]

ḲĀʾIME (T. originally A.; cf. ḲĀʾIM), the name for paper-money in Turkey, an abbreviation for *Sehīm ḳāʾimesi* ("revenue bonds"); the word was originally used of drawings and documents which were written on large, long leaves in such a way that the lines ran parallel to the narrower side, as was the case with the first issues of Turkish paper-money; later the term *ewrāḳ naḳdiya* took its place.

The first *ḳāʾime* appeared in 1840 and were manuscript. They bore interest at the rate of 12½%, were to be accepted as money at the public banks and to be current throughout the kingdom. They were replaced in 1842 by printed notes of a primitive style; the smaller notes bore no interest; the rate of interest for the others was reduced to 6% and at the same time the

circulation of paper-money was limited to the capital and its vicinity. The total of this first issue was not to exceed 60,000,000 piastres; but in a very few years, as a result of the wretched condition of Turkish finances, it was swollen enormously and in 1862 calculated at approximately a milliard piastres. In this year, with the help of a foreign loan, the paper money was redeemed for 40% cash and 60% Turkish Consols (so-called *consolidés*) and made no longer legal tender.

In 1876 and 1877 the Porte found itself forced by the bankruptcy of the state and the outbreak of war with Russia to take refuge in paper-money for a second time. *Ḳā'ime* were issued for 1600 million piastres, which, however, depreciated in a very short time and at the beginning of the 80's of last century were called in along with the depreciated copper-money.

A third issue of a paper currency of a total value of 16,702,106,560 piastres dates from the world-war; it is still (1923) in circulation.

The history of the *ḳā'ime* has still to be written. (J. H. MORDTMANN)

ḲAIN. [See ḲĀ'IN.]

AL-**ḲAIN** (s. DJASR), usually BANU 'L-ḲAIN or, with ellipsis of the syllable *nu*, BALḲAIN, nisba *Ḳainī*, an Arab tribe. The official Arabic genealogy gives as its true name al-Nu'mān b. Djasr (see Wüstenfeld, *Geneal. Tabellen*, Tab. 2, 22; Ibn Duraid, *al-Ishtiḳāḳ*, ed. Wüstenfeld, p. 317; *Tādj al-'Arūs*, s. v. *ḳyn*; Ibn Khallikān, *Wafayāt al-A'yān*, ed. de Slane, Article *Waṯīma b. Mūsā*, about the middle; etc.); it therefore interpreted as originally a nickname — and probably rightly — al-Ḳain, which means, as a name, "smith", "metal worker", "swordmaker" etc. (cf. Aram. *ḳīnā*, *ḳainājā*, "smith") and is in a wider application applied to artisans generally (for the meaning "slave", which the native lexicons also give and which Baethgen, *Beiträge zur Semit. Religionsgesch.*, p. 152 uses for his deductions, I have no really certain reference). This might be derived from the Banu 'l-Ḳain having been at one time actually metalworkers, perhaps miners. Thus the Fārān b. Balī, who worked the celebrated Sulaim or Fārān mine were also called *Banu 'l-Ḳain*, "sons of the smiths" or *al-Ḳuyūn* "the smiths"; see Yāḳūt, *Mu'djam* (ed. Wüstenfeld), iii. 865 *sq.*; al-Bakrī, *Mu'djam* (ed. Wüstenfeld), p. 20 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der Arab. Stämme*, in *Abh. d. Gesellsch. d. Wiss. zu Göttingen*, xiv. 28 (Nöldeke wrongly refers this passage, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 181, note 6 to our Banu 'l-Ḳain); Sprenger, *Die alte Geographie Arabiens*, § 410 and 28, and Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 162. Our tribe, however, appears in the old poems and historical references to it to be in every respect a genuine Beduin tribe. The period of industrial activity of the Banu 'l-Ḳain would therefore have to be looked for in the very remote past (cf. Sprenger, *op. cit.*, § 420). Another explanation of the name Banu 'l-Ḳain seems to me to be not quite impossible. The names *al-Ḳain* and *Banu 'l-Ḳain* are used by the Beduin Arabs, who scorn every kind of manual labourer, as terms of contempt; cf. the glossary to the *Naḳā'iḍ Djarīr wa 'l-Farazdaḳ*, under *Ḳain*, where Bevan gives about 60 references, all from the *Naḳā'iḍ*; al-Farazdaḳ himself appears here 18 times as "Ibn al-Ḳain" or "Ibn al-Ḳuyūn", and his family three times as "Banu 'l-Ḳain", cf. also Ḳais b. al-Khaṭīm, *Dīwān* (ed. Kowalski), Nr. 10, 22; Ḥassān b. Thābit, *Dīwān* (ed. Hirschfeld), Nr. cxxix, 4; *Ḥamāsa of al-Buḥturī* (ed. Cheikho), Nr. 1333, 3 and Ṭirimmāḥ, *Dīwān* (ed. Krenkow, still going through the press), Nº. 19, 3. It is therefore imaginable at least that in our case also, we have an original term of abuse, which has remained attached to the tribe.

The Banu 'l-Ḳain formed a branch of the great system of tribes of the Ḳuḍā'a, who, in origin probably South Arabian, were settled in the historical period in the upper north, in Syria, in Mesopotamia and in the 'Irāḳ and to all appearance had gone over entirely or at least for the most part to Christianity there (see Wüstenfeld, *Tabellen*, *loc. cit.*; Ibn Duraid, *op. cit.*; Ibn Ḳutaiba, *Kit. al-Ma'ārif*, ed. Wüstenfeld, p. 51; Ibn 'Abd Rabbihi, *al-'Iḳd al-farīd*, Cairo 1305, ii. 58, etc.). That the *Ṣiḥāḥ* and following it the *Lisān al-'Arab* and the *Tādj al-'Arūs* under *ḳyn* and the scholion to al-Ḥarīrī, Maḳāmāt², p. 90 include them in the Banū Asad, is probably due simply to carelessness, to a confusion of Asad, who in the Arab genealogical scheme appears as the great-grandfather of our al-Ḳain (cf. again Wüstenfeld, *Tabellen*, Tab. 2) with the eponymous hero of the great Muḍarī tribe of the Banū Asad. As foolish as it is isolated is the statement that they had belonged to the Tamīm (*Tādj al-'Arūs*, *loc. cit.*). Their tribal area — corresponding roughly to Arabia Petraea — extended from the Sinai Peninsula along the Syrian frontiers far into the land east of Jordan (cf. Wüstenfeld, *Register zu den geneal. Tabellen*, p. 371, where all is not quite correct; Sprenger, *op. cit.*, § 420 *sq.*; Caussin de Perceval, *Essai sur l'histoire des Arabes*, ii. 232, iii. 345, 352; Nöldeke, *Über die Amalekiter u. einige andere Nachbarvölker der Israeliten*, in Benfey's *Orient u. Occident*, ii. 635; al-Hamdānī, *Djazīrat al-'Arab*, ed. Müller, i. 131 *sq.* = Sprenger, *op. cit.*, § 32; 'Urwa b. al-Ward, ed. Nöldeke, p. 32 = *Ḥamāsa* of Abū Tammām, ed. Freytag, i. 228, Schol.; *Aghānī*¹, xiv. 124; al-Ya'ḳūbī, *Kit. al-Buldān*, in *Bibl. Geogr. Arab.*, ed. de Goeje, vii. 326; Yāḳūt, *op. cit.*, iii. 459, iv. 413; al-Wāḳidī, *al-Maghāzī*, abbrev. transl. by Wellhausen, p. 373; Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, iii. 295; Ibn al-Athīr, *al-Kāmil fi 'l-Ta'rīkh* (ed. Tornberg), vi. 87 *sq.*, and the maps in Blau, *Arabien im sechsten Jahrhundert*, in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 559, and in Caetani, *Annali dell' Islām*, ii. 2, at the end of the volume. They can hardly be considered a pure stock (in Ibn Isḥāḳ they are often called "Mustaʿriba" along with all sorts of neighbouring tribes, see al-Ṭabarī, *Ta'rīkh*, ed. de Goeje, i. 1611 and 2347).

History. In the poetry and tales of the

"battles of the Arabs" and of other events in olden times the Banu 'l-Ḳain appear in typical Beduin feuds with the tribes of Kalb (*Hamdānī, loc. cit.*, p. 77; Yāḳūt, *loc. cit.*, iii. 241; Ibn al-Athīr, *loc. cit.*, i. 370; Ibn Saʿd, *Ṭabaḳāt*, ed. Sachau, III/ii. 27 *sq.* = Ibn al-Athīr, *Usd al-Ghāba*, ii. 224 = Ibn Ḥadjar, *al-Iṣāba*, ii. 45 = Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, i. 401, also Yāḳūt, *op. cit.*, iv. 49), Bahrāʾ (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 283 = Ibn al-Faḳīh, *al-Buldān*, in *Bibl. Geogr. Arab.*, v. 182 *sq.*), Ghassān (Ḥamza al-Iṣbahānī, *Taʾrīkh*, ed. Gottwaldt, p. 121, where *bbny 'l-ḳyn bn* should be read for *ybny 'lḳbryn*), Ghaṭafān (*Aghānī*[1], ii. 194), etc. At Muʾta, on the Yarmūk (Hieromax) and perhaps also at Fiḥl, they fought in alliance with other Ḳuḍāʿa tribes and the Lakhm and Djudhām under the banner of the Byzantines, whose authority was recognised more or less by all the Arab tribes camped along the frontiers of Syria (Ibn Hishām, *Sīra*, ed. Wüstenfeld, p. 792; al-Ṭabarī, *op. cit.*, i. 1611, 2347; (Pseudo-) Abū Ismāʿīl al-Baṣrī, *Futūḥ al-Shaʾm*, ed. Lees, i. 97, 114; Caussin de Perceval, *op. cit.*, iii. 212; Sprenger, *Das Leben u. die Lehre*, iii. 292, note 2; Caetani, *op. cit.*, II/i. 83, III/i. 206 etc.). In al-Ṭabarī, *op. cit.*, i. 1872 Saif b. ʿOmar says that the wave of apostacy which swept over almost all Arabia on the death of the Prophet, also affected the Banu 'l-Ḳain (cf. Caussin de Perceval, *op. cit.*, iii. 345, 352 and Caetani, *op. cit.*, II/i. 583, 585). From this statement it might be deduced that our tribe had become subject to the state of Medīna while the Prophet was still alive; but it does not appear to me to be quite credible. In the civil war between Marwān I and ʿAbd Allāh b. al-Zubair we naturally find the Banu 'l-Ḳain as South Arabians on the side of the former (al-Ṭabarī, *op. cit.*, ii. 478; al-Masʿūdī, *al-Tanbīh wa 'l-Ishrāf*, in *Bibl. Geogr. Arab.*, viii. 308, etc.) and on the occasion of the rising of Bahlūl b. Bishr Kathāra in 119 = 737 we again find them in the pay of the Umaiyads (al-Ṭabarī, *op. cit.*, ii. 1623 *sq.*, and Ibn al-Athīr, *al-Kāmil fi 'l-Taʾrīkh*, v. 156). They again played a very important part in the Damascus troubles of 176 (792) in the reign of Hārūn al-Rashīd, in which they and Ḳaisīs (Nizārīs) fought against the other Yemenīs (Ibn al-Athīr, *op. cit.*, vi. 87 *sq.*). They then disappear from our knowledge.

According to Nashwān's *Shams al-ʿUlūm* Luḳmān was a slave of al-Ḳain b. Djasr al-Ḳuḍāʿī (see *Die auf Südarabien bezüglichen Angaben Našwān's im Šams al-ʿUlūm*, ed. by ʿAẓīmuddīn Aḥmad, p. 95).

The best known member of the tribe is the poet Abu 'l-Ṭamaḥān al-Ḳainī, who flourished about 600 A. D. (see Guidi, *Tables alphab. du Kitāb al-Aghānī*, p. 417; Ibn Ḳutaiba, *Kitāb al-Shiʿr wa 'l-Shuʿarāʾ*, ed. de Goeje, p. 229 *sq.*; Ibn Duraid, *op. cit.*, p. 317; Ibn Khallikān, *Wafayāt al-Aʿyān*, Būlāḳ 1299, i. 18 and *Hamāsa*, *loc. cit.*, p. 558; — wrongly in Wüstenfeld, *Genealog. Tabellen*, Tab. 2, 24 and *Register*, p. 441, who has misunderstood the passage in the *Ḥamāsa*).

H. Ewald (*Gesch. d. Volkes Israel*, i. 337) has with all reserve connected the Old Testament Ḳayin (= Ḳain) or Ḳēnites (Ḳenī, Ḳ(ê)nîm) with our Ḳain. Nöldeke has followed him, at first only as a possible hypothesis but later with more confidence (*Über die Amalekiter*, *op. cit.*, p. 634 *sq.*, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.* xl. 181 and in Cheyne and Black's *Encycl. Biblica*, i. 130. The Ḳēnites were settled in the south of Palestine in the ancient Negeb, the later Idumaea; this would actually be the region where we find the Balḳain. Besides, the Ḳēnites were obviously nomads like the Balḳain (Stade, *Zeitschr. für d. Alttest. Wiss.*, xiv. 287 and Sayce, *Early Israel and the Surrounding Nations*, p. 91 *sq.*, and do. in Hastings' *Dict. of the Bible*, s. v. *Kenites* recognise in them from the name — see above — a tribe of smiths; but they fail to give their readers any proof that they were such in historical times. Stade's identification, following Wellhausen, *Die Composition des Hexateuchs*, p. 305, of the Ḳēnites with Cain, the brother of Abel, *op. cit.*, p. 285 *sqq.*, which Ed. Meyer, *Die Israeliten und ihre Nachbarstämme*, p. 395 *sqq.*, Procksch, *Die Völker Altpalästinas*, Vol. i, part 2 of *Das Land der Bibel*, p. 37 etc. have adopted, I consider, with Nöldeke, *Encycl. Bibl.*, *loc. cit.*, very problematic). But the two coincidences mentioned do not seem sufficient yet to justify us in identifying the Ḳēnites with the Balḳain. The Ḳēnites disappear from literature with the Exile (with the exception of the Rēkhābites, whose inclusion in the Ḳayin is, however, not absolutely certain). They may nevertheless have continued to exist. But that so small a clan, which never appears as completely autonomous in the Old Testament should have continued to exist for a millenium after the Exile and at the end of this period still possess considerable strength and prosperity, — even as the result of incorporating other tribes — I consider a very daring assumption. The name Ḳain besides was obviously not at all a rare one (see Wüstenfeld, *Register zu den Geneal. Tabellen*, p. 371, Lidzbarski, *Handbuch der nordsemitischen Epigraphik*, p. 362, also Littmann, *Zur Entzifferung d. thamud. Inschriften*, p. 45). Cf. thereon Ed. Meyer, *op. cit.*, p. 399.

Bibliography (besides the works already mentioned): al-Ṭabarī, *Taʾrīkh* (ed. de Goeje), *Aghānī* and Yāḳūt, *Muʿdjam* (ed. Wüstenfeld), see the indices thereon, Ed. Meyer, *Die Entstehung des Judentums*, p. 115 *sq.*, and Guthe, *Kurzes Bibelwörterbuch*, s. v. *Kain*.

(A. FISCHER)

ḲAINUḲĀʿ (BANŪ), one of the three Jewish tribes of Yathrib. The name differs from the usual forms of Arabic proper names but at the same time has nothing Hebrew about its type. Nothing certain is known regarding their immigration into Yathrib. They possessed no land there but lived by trading. That their personal names known to us are for the most part Arabic says as little regarding their origin as the occurrence of Biblical names among them. But there seem to be no valid reasons for doubting their Jewish origin.

In Yathrib they lived in the south-west part of the town, near the *Muṣallā* and close to the bridge over the Wādī Buṭhān, where they occupied two of the castles (*āṭām*), characteristic of Yathrib. They practised the goldsmith's art among other trades; al-Bukhārī (*Farḍ al-Khums*, Bāb i.) incidentally mentions a goldsmith of the Ḳainuḳāʿ. On their expulsion they left behind them arms and tools, which were divided among the Muslims after Muḥammad had received his fifth share. The number of their fully equipped fighting men varies in the references to it between 400 and 750.

After the dominating power in the old Yathrib had passed from the Jews to the Banū Kaila the Kainuḳāʿ were in alliance with the Khazradj [q. v.]. In Muḥammad's settlement of the relations of believers and other sections of the community they are not mentioned by the name of their tribe any more than the Naḍīr [q. v.] and Ḳuraiẓa [q. v.] but are described as "Jews of the Nadjdjār, Ḥārith, Sāʿida and Djusham" (articles 26—29) i. e. as allies of different subdivisions of the Khazradj.

After the battle of Badr (Ramaḍān 2 H. = March 624) Muḥammad's relations with the Jews of Medina became troubled. The Jews as a body had adopted an unfriendly attitude to the Prophet. From the religious point of view therefore they became inconvenient; and from the political side, as a powerful foreign body within the just converted town, they were a great danger. When Muḥammad felt his position strengthened by the battle of Badr, the idea of expelling his enemies must soon have entered his head. The Ḳainuḳāʿ, as they lived in the city itself, were those he wished to be rid of first. With this description of the situation, his attack on the Ḳainuḳāʿ (in all probability as early as Shawwāl 2 H. = April 624) is sufficiently explained. What the Muslim writers give as special reasons for the attack has hardly more than anecdotal value. Sometimes it is said to have been a jest that a Muslim made to a Jewish woman, sometimes the Ḳainuḳāʿ are said to have behaved with particular arrogance. Sūra iii. 10 *sqq.* and viii. 60 *sqq.* are said to refer to these incidents. Sūra iii. 11 refers to the victory at Badr as an example and warning, and viii. 60 speaks of vengeance against people, from whom treachery is *feared*.

After a fourteen days' siege, the Kainuḳāʿ surrendered without striking a blow; the men were bound and seemed to have to fear the worst. The energetic intervention of ʿAbd Allāh b. Ubayy, chief of the Khazradj and leader of the Munāfiḳūn, however, effected an amelioration of their lot. They departed first to the Jewish colonies in the Wādi 'l-Ḳurā, north of Medina, and from there they went to Adhriʿāt in Syria.

(A. J. WENSINCK)

AL-ḲAIRAWĀN (French Kairouan) a town in Tunisia, 112 miles south of Tunis and 40 west of Susa to which it is joined by a railway; it lies in 35° 40′ N. Lat. and 10° 2′ E. Long. (Greenwich). The population in 1910 was 22,000 including 800 foreigners of whom 300 were French.

Kairwan lies 250 feet above sea-level in the middle of a great plain traversed by the Wādī Zerūd and the Wādī Merguellil, which ultimately disappear in sebkhas or salt lakes. These rivers are subject to sudden floods, which sometimes transform the environs of the town into a lake extending up to the foot of the walls. When the rains have been sufficiently abundant, the soil yields a rich harvest; al-Bakrī mentions that in the western part called "Faḥṣ al-Darrāra", the grain sown is sometimes returned a hundredfold. But usually the ground, lacking trees or herbaceous vegetation, and covered with salt efflorescence, gives the country a desert appearance. The temperature shows considerable variations (24.8° in winter and 120.2° in summer). The rainfall is not heavy (14.5 inches per annum) and therefore running waters and springs are scarce, so that the inhabitants have to use cisterns to collect their drinking-water.

Kairwan really consists of two towns, the city proper surrounded by a battlemented wall of brick, flanked with buttresses and round towers as well as a ḳaṣba, 3350 yards round, and secondly a vast faubourg stretching to N. and N. W., the faubourg of the Zlas (Djlāṣ) so called from the popular name of the tribe occupying the neighbouring country. To the south finally there has grown up a little European quarter. The interior of the town is a network of narrow and tortuous streets. Commerce and industry are fairly busy, although Kairwan has lost much of its economic importance. The principal industries, which, it may be added, are of the nature of home-industries, are the manufacture of carpets, which occupies a thousand looms and that of woollen blankets. The working of leather (saddle-making, shoe-making) for which the artisans of Kairwan were at one time very famous, and that of copper, are still followed by several hundred workers. The importance of Kairwan in the past is particularly shown by the number of religious edifices to be seen in it. The principal is the great mosque of Sidi ʿOḳba, one of the largest buildings in North Africa, the foundation of which dates back to that of the city itself. Among the others may be mentioned the Mosque of Sidi Ṣāḥib (vulgo Ṣaḥab, Mosque of the Barber) dating from the first century A. H., but rebuilt and extended in the xviith century A. D., the mosque of the Three Gates (Djāmiʿ Tlāta Bībān), contemporary with the preceding, the Madrasa Sīdī ʿAbd al-Gharyānī (xvith cent. A. D.) and the Mosque of the Sabres (Djāmiʿ ʿAmar ʿAbbāda), finished in 1871. The oldest mosques, for the building of which were used materials from Hadrumetum (Sūsa) and even from Carthage, show an interesting mixture of Byzantine and Oriental influences. The latter are clearly seen in the decorative motifs (faïences, woodwork) analogous to those of ʿIrāḳ and Baghdād. The more recent buildings show examples, sometimes remarkable, of wooden ceilings in compartments, arabesques cut in plaster showing Hispano-Moorish inspiration. We may add that the buildings of the xviith and xviiith centuries often reveal the intervention of European architects and workmen, especially Italians.

History. The foundation of Kairwan dates from the Arab conquest. The town was in fact built by ʿOḳba b. Nāfiʿ in 50 (670) to give his troops a base of operations and depot for supplies and also to keep in awe the Berber tribes. "I intend", the historian al-Nuwairī makes him say, "to build a town which can serve as a depot of arms (*Ḳairawān*) for Islām to the end of time" (al-Nuwairī in Ibn Khaldūn, *Hist. des Berbères*, transl.

de Slane, i. 327). Kairwan was built on — or very near — the site of a small Roman town called Ḳamūdah or Ḳamūnia, the materials of which were used by the Arabs. The site of the new town, two days' journey from the shore, had been chosen to put the Muslim out of danger from an attack by the Byzantines, who still held the towns on the coast. 'Oḳba first of all built a mosque, the palace of the government, then houses for his soldiers as well as a wall 2750 yards long. Legend was not long in embellishing this foundation with marvellous tales. The site of Kairwan was, it was related, covered with impenetrable thickets inhabited by deer and reptiles which disappeared at 'Oḳba's command. A vision revealed to the conqueror the exact position of the *ḳibla* and of the *miḥrāb* of the mosque, and the existence of a spring indispensable for the inhabitants, etc. The buildings were hardly completed when 'Oḳba was disgraced and called back to the East (55 = 675). His successor Dīnār Abu 'l-Muhādjir hastened to destroy Kairwan and built a new town called Takrouna or Takrūn two miles to the North. Restored to the favour of the Caliph and sent back to Africa, 'Oḳba rebuilt Kairwan on the original site.

Kairwan was henceforth the capital of Muslim Africa and the residence of the Arab governors, but during the century which followed the death of 'Oḳba it had to submit to numerous vicissitudes. After the rising of Kusaila it was occupied by the Berbers and remained for four years in their power (64—68 = 684—688). During the Khāridjī rising it was taken and pillaged by the Wafardjūma (139 = 756—757), who committed such excesses there that the population scattered over the surrounding country. At the end of fourteen months, the Ibāḍī Abu 'l-Khaṭṭāb [q. v.], chief of the Huwāra [q. v.], drove out the Wafardjūma and entrusted the government of the town to 'Abd al-Raḥmān b. Rustam [q. v.] (141 = 758/9). In 145 = 762/3) Ibn Ash'ath was victorious over the Khāridjīs and re-established the seat of the government at Kairwan. He endeavoured to repair the damage done by the Berbers, and to protect the town from a new attack he surrounded it with a wall of brick, 12 cubits thick. These precautions did not, however, prevent the Ibāḍī tribes under the command of Abū Ḥātim [q. v.] from laying siege to Kairwan (154 = 771) in which the governor 'Omar b. Ḥafṣ, who had escaped from Ṭobna, was shut up. After the death of 'Omar, who had been killed during the siege, his successor Djamīl (or Ḥamīd) b. Ṣakr capitulated and opened the gates to the enemy. There were, however, no massacres. The inhabitants were allowed to go freely and the victor was content to demolish the fortifications. The Khāridjī occupation was of short duration. By 155 = 772, Yazīd b. Ḥātim, victorious over the heretics, had taken Kairwan again. He rebuilt the great mosque, had bazaars built for each trade-guild and earned the title of second founder of the city (al-Nuwairī).

Under the Aghlabids (800—909 A. D.) Kairwan underwent considerable expansion and reached the zenith of its prosperity. The princes of the dynasty vied with each other in enriching the town with rich monuments and multiplied the works of public utility. Ziyādat Allāh I and Ibrāhīm built waterworks and cisterns to secure the town's supply of drinking water, for the reservoirs built for the purpose in the time of the Caliph Hishām had become insufficient. "The largest and most useful of these reservoirs", says al-Bakrī, "is circular in form and of enormous size. In the centre rises an octagonal tower covered by a pavilion with four doors. A long series of arcades of arches resting one upon the other ends on the south side of this reservoir". These waterworks have not completely disappeared and one of the reservoirs restored by French engineers is still called the "reservoir of the Aghlabids". The great mosque was rebuilt from top to bottom. The primitive edifice built by 'Oḳba had already been destroyed by Ḥasan b. al-Nu'mān [q. v.] who had rebuilt it and adorned it with pillars of marble which, without doubt, came from the ruins of Carthage. Soon becoming too small, the mosque was again enlarged in 105 = 723/724, then entirely rebuilt with the exception of the *miḥrāb* in the time of Yazīd b. Ḥātim (155 = 772). Ziyādat Allāh I in his time had the whole building taken down including the *miḥrāb*, which was enclosed between two walls so as to be preserved without being seen except through a narrow grill, and replaced it by the present mosque. According to al-Bakrī, 80,000 *mithḳāls* (about £ 320,000) were expended on this work. Ibrāhīm b. Aḥmad completed the work of Ziyādat Allāh; he lengthened the principal building and built above the nave abutting on the *miḥrāb* a cupola called Ḳubbat Bāb al-Bahw (the cupola of the gate of the pavilion). 220 cubits long, 150 broad, divided into 17 naves by 414 columns, the great mosque could rival the most famous monuments of the East. Other religious buildings restored in the same period also claimed the attention of visitors, like the Mosque of the Three Gates, the Mosque of Sīdī Ṣaḥāb (Mosque of the Barber), the Mosque of the Anṣār, which according to the legend was built even before the arrival of 'Oḳba by one of the companions of the Prophet, Ruwaifi' b. Thābit, and the Mosque of Ismā'īl b. 'Obaid al-Anṣārī.

Outside the town rose the royal residences, Ḳaṣr al-Ḳadīm and al-Raḳḳāda. Ḳaṣr al-Ḳadīm, also called al-'Abbāsiya, was built in 184 = 800, 3 miles S. E. of Kairwan by Ibrāhīm b. Aghlab, who settled there under the protection of his negro guard and made it the seat of government. It is the "Castle of the Moat", where were received the ambassadors of Charlemagne. Around the palace there grew up a town provided with baths, caravanserais and bazaars and surrounded by a wall with five gates. Al-Bakrī mentions in it a mosque flanked by a cylindrical minaret surmounted with seven tiers of columns. Some distance off was another castle called al-Ruṣāfa. Al-Raḳḳāda, four miles S. W. was a creation of Ibrāhīm b. Aḥmad (263 = 876/877). This prince built here in a place celebrated for the purity of its air, a castle around which grew up an important town with bazaars and baths. It measured 24,000 cubits in circumference but enclosed large areas filled with parks and gardens.

A venerated sanctuary and capital of a powerful state, Kairwan was also a great commercial city. The shops of the merchants stood on either side of a covered street about two miles in length. It was also a city of learning where the study of Mālikī law was particularly honoured. Celebrated professors like Asad b. al-Furāt [q. v.], Ibn Rashīd

and Saḥnūn had numerous pupils there. The teaching of medicine was equally flourishing. The Jew Isḥāḳ b. Imrān, physician to Ziyādat Allāh II and his pupil Isḥāḳ b. Sulaimān founded a regular school there.

This prosperity did not end with the Aghlabid dynasty; it continued under the Fāṭimids and the early Zīrids, although the Mahdī 'Ubaid Allāh, after living some time at Raḳḳāda, had moved the seat of government to al-Mahdiya. The town suffered a great deal, however, from the revolt of Abū Yazīd [q. v.], "the man with the ass." The Nekkāris captured it in 333 = 944 and pillaged it in spite of the appeals of the notables and scholars who had come to implore the clemency of the conqueror. But in 334 = 946, the Caliph Ismā'īl retook Kairwan and after having defeated the Khāridjis built some distance away the town of Ṣabra to which he gave the name of al-Manṣūriya, in memory of his victory over Abū Yazīd, and in which he established his residence (337 = 948). His successor al-Mu'izz moved to al-Manṣūriya the bazaars and factories of Kairwan to the great dissatisfaction of the inhabitants. The new town was surrounded by a wall with five gates of which the principal, Bāb al-Futūḥ (gate of conquest) was used by the sovereign when he took the field at the head of his army. The town of Raḳḳāda on the other hand abandoned by its inhabitants and half destroyed by the Nekkāris was razed to the ground. The gardens alone were spared. During all this period Kairwan and al-Manṣūriya still had a very active economic life. The manufacture of carpets, of woollen and cotton goods flourished there. Cultivated land and orchards extended round the town. The wealth of the inhabitants is evidenced by the fact that the agents of the Fāṭimids were able to exact from them 400,000 dinars on a single occasion. According to al-Bakrī the taxes levied each day at one of the gates of al-Manṣūriya amounted to 26,000 dirhems (about £ 600). The people of Kairwan, however, complained of the tyranny of the Fāṭimids and the bulk of them remained attached to orthodoxy. Their hostility showed itself in serious bloodsheds under the earlier Zīrids. In 407 (1017—18) 3,000 Shī'is were massacred in a rising and the town of al-Manṣūriya was pillaged by the populace. Al-Mu'izz's break with the Fāṭimids was therefore received with enthusiasm by the people of Kairwan.

This act of rebellion let loose on Ifrīḳiya the Hilālī invasion of which Kairwan very soon felt the disastrous results. After the defeat of Haiderān, al-Mu'izz ordered his soldiers to evacuate the town; they sacked it first of all and he withdrew to al-Manṣūriya. He then rebuilt the walls of Kairwan on a length of 22,000 cubits and joined Kairwan to al-Manṣūriya by two walls half a mile apart (444 = 1052). In spite of these precautions the attacks of the Hilālis became more and more serious. Kairwan was abandoned by a part of the population and in 449 = 1057, al-Mu'izz decided to evacuate al-Manṣūriya and retire to al-Mahdiya. The Arabs then entered the town and wrought the most frightful havoc. "They destroyed all the beauty and all the splendour of the monuments of Kairwan. Nothing that the Ṣanhādjī princes had left in their palaces escaped the greed of the brigands. All that there was in the town was carried off or destroyed." (Ibn Khaldūn, *Hist. des Berbères*, transl. de Slane, i. 37). The inhabitants were scattered in all directions, "some went to Egypt, others to Sicily and Spain; a considerable body to Fās." ('Abd al-Wāḥid al-Marrākushī, *al-Mu'djib fī Talkhīṣ Akhbār al-Maghrib*, ed. Dozy², p. 259).

The capital of Ifrīḳiya never recovered from this disaster. Pillaged again in 1060 by the Hawāra, its possession disputed between the Zīrids and the governor, the Ḳā'id Ibn Maimūn, who tried to set up in it for his own benefit an independent principality with the support of the Hammādids, Kairwan remained under the domination of the Arabs and defenceless against the exactions of the nomads. "The latter levy contributions on every thing; the inhabitants are few in number, their trade and industries in a miserable condition" (al-Idrīsī, transl. de Goeje, p. 129). Stayed for a time in the reign of 'Abd al-Mu'min, who restored the town in part, its decline continued its rapid course under his successors and under the Ḥafṣids as a result of the continued troubles of which Ifrīḳiya was the theatre. At the end of the xivth century A. D. the town was almost deserted; its only inhabitants were the peasants who sought shelter there. It was gradually repopulated, but it was still very wretched at the beginning of the xvith century A. D. "The inhabitants", writes Leo Africanus who visited Kairwan in 922 (1516), "are at present all poor artisans, of whom some are curriers of the skins of sheep and goats, the others furriers whose handiwork is sold in the cities of Numidia, where no European cloth is to be had. But of all these trades there is not one, which is able to make a good livelihood and those who follow them live a miserable existence and are in very great poverty." Ill-treated by the rulers of Tunis, the people of Kairwan were in an almost continual state of revolt. They even definitely threw off the authority of the Ḥafṣids when the latter had accepted the Spanish protectorate after the capture of Tunis by Charles V in 1535 and recognised as chief the Marabout Sīdī 'Arfa of the tribe of Shabbiya. In spite of the help of the Spaniards Mulāy Ḥasan could not dispose of this pretender, who was supported by the Arab tribes and the Turks of the corsair Dragut. His successor Aḥmad Sulṭān was no more fortunate.

Under Turkish rule Kairwan felt the repercussion of all the troubles of the xviith century A. D. In 1701 the Bey Murād, to punish a rising of the inhabitants, destroyed the walls and the houses and only left the mosques and zāwiyas standing. On the other hand Ḥusain b. 'Alī, founder of the Ḥusainid dynasty made great efforts to raise Kairwan from its ruins. He reconstructed the fortified wall round it and restored over fifty mosques, according to the author of the chronicle *al-Mashra' al-Mulkī* (French transl. by V. Serres and Muḥammad Lasram, Tunis 1900). He had a "bardo" there, where he used to stay while his troops were going through the Djerīd to collect the taxes. The inhabitants showed their gratitude to the Bey by supporting him vigorously against his nephew 'Alī Pasha, who could only capture Kairwan, where Ḥusain had taken refuge after a five years' siege (1735—1740). The town was once more razed by the victor, but it was rebuilt and, according to Desfontaines, was in 1784 "the largest town of the kingdom next to Tunis and even better built and less filthy than it".

Trade and industry were quite busy there and the people were exempt from taxes in return for the fidelity of their ancestors to the Bey Ḥusain. Kairwan had also preserved its character as a place of sanctity and the inhabitants were very hostile to Christians. Very few Europeans, among whom were Peyssonnel, Shaw and Desfontaines had been able to visit the town. The fanaticism of the inhabitants persisted down to the end of the xixth century. After the signing of the treaty of Bardo (1881) which placed Tunisia under the protectorate of France, Kairwan was one of the centres of native resistance. To put an end to this, three columns under the supreme command of General Saussier set out from Tebessa, Tunis and Susa and united before the walls of the town. It was occupied without fighting on October 29, 1881.

ḲAIS, a little island in the Persian Gulf, in that part of it which the mediaeval Arab geographers call the "sea of 'Omān", in 54° E. Long. (Greenw.) and 26° 30' N. Lat. Ḳais, which next to Ḳishm [q. v.] may now very well be considered the most important of the Persian islands of the Gulf, is about 10 miles long and five broad; it is separated from the mainland by a strait about 12 miles wide, which affords a very secure passage. Apart from a few rocky places, the island is quite flat; it is better cultivated than most of the islands of the Persian Gulf. The mediaeval Arab and Persian geographers make special mention of its prosperous condition, noting particularly its wealth in trees (mainly date-palms) and refer to the cultivated fields, gardens and cisterns. Besides agriculture, navigation and trade, the then fairly numerous population of the island was also engaged in the pearl-fishery; for the latter see the remarks in Ibn Khurdādhbeh, Yāḳūt, al-Dimashḳī, Ḥamd Allāh Mustawfī and Ibn Baṭṭūṭa (*op. cit.*).

The name Ḳais is an arabicised form of the Persian Kīs or Kīsh (the form Kās is also found; see al-Dimashḳī, *op. cit.*). In the Portuguese and Dutch authors of the xvith and xviith centuries we find forms like QUIXI, QUEIS, CAEZ or QUECHE, QAS, GUESS etc.; cf. Vincent and Tomaschek, *op. cit.* Kenn (Khenn) is also sometimes given as the name of this island, e. g. by Vincent, Kinneir, Morier (*op. cit.*, p. 31), Ouseley, Kempthorne, Ritter and Tomaschek, and in *Selections from the records of the Bombay Government*, N°. xxiv. 20, 596. But it is, however, doubtful, whether the existence of some such second name for Ḳais, which we know mainly from English sources (see on the other hand Schlīāfī, *op. cit.*, p. 150), can be maintained. Could Kenn, the Khain of Ibn Khurdādhbeh (p. 62, 1), be the earlier name of another island near Ḳais, perhaps of the island of Farur (east of Ḳais)? See Schwarz, *Iran*, etc., p. 87. The circumstance that an Arab prince named Ḳais b. 'Umaira took possession of the island of Kīsh — it was henceforth occasionally called Djazīrat Ḳais b. 'Umaira or Banī 'Umaira, see Yāḳūt, i. 503, 2, ii. 711, 8 — may have effected the arabicisation of the old name. The latter itself does not, however, date only from the Arab chief just mentioned, as Ibn al-Balkhī, *op. cit.*, thinks, but goes back into the pre-Muhammadan period, for we find Kīsh already mentioned in the Sasanian period, as one of the seven bishoprics of the Nestorian ecclesiastical province of Persis; for this reference to Kīsh about the middle of the sixth century in Syriac literature, see Guidi in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xliii. 413; Chabot, *Synodicon orientale* (Paris 1902), p. 680; Sachau, *Zur Ausbreitung des Christentums in der Persis* (= *Abh. der Preuss. Akad.*, 1919, N°. 1), p. 58.

Historical. In classical literature the island is only twice mentioned: in Arrian's *Indica* (37, 8) under the form Kataia and in Pliny (*Nat. Hist.*, vi. 110) as Aphrodisias; cf. Vincent, *op. cit.*, Ritter, viii. 774; xii. 458 and Pauly-Wissowa, *Realenc. der klass. Altertumswiss.*, i. 2727 (s. v. Aphrodisias, N°. 7) and x. 2462 (Kataia). Perhaps we have in Kataia or Kat the prototype of Ḳāsh (Kīsh).

In the Muḥammadan period, Ḳais formed a part of the province of Ardashīr Khurra in Fārs. It was only in the later middle ages that the town attained greater importance, when, as already mentioned, a prince of South Arabian origin captured it, built a fort there and gradually began to extend his power. After the capture of Sīrāf, which then enjoyed great prosperity as the main staple of the Persian-Indian-Chinese trade, the Arab dynasty of Ḳais rose under the last Būyids in the first half of the vth (xith) century to unlimited control of the whole Persian Gulf. This Sīrāf, which was previously often regarded wrongly as a town on the coast near the island of Ḳais — actually confused with Ḳais by Ibn Baṭṭūṭa (ii. 244, 2)) — lay much farther to the north; the ruins of this famous commercial

centre are near the village of Ṭāhirī (north of Rās Nāband, in 27° 40′ N. Lat. and 52° 20′ E. Long. Greenwich; cf. Schwarz, *op. cit.*, p. 59 *sq.* and the article SĪRĀF). Sīrāf gradually became more and more deserted under the suzerainty of the princes of Ḳais, as they diverted the very considerable trade and shipping from the captured Persian seaport to their own island. They also extended their power to several other districts of the mainland opposite the island of Ḳais. Their predecessors in the occupation of this strip of land had been a South Arabian tribe, the Banū 'Umāra; cf. on their territory, the so-called Sīf 'Umāra (the 'Umāra-coast), Schwarz, *op. cit.*, p. 77 *sq.*, 76. In the little town of Huzū there, a little dynasty of a family of the Banū 'Umāra, of whom coins still survive, ruled before the coming of the ruling house of Ḳais; cf. v. Bergmann in the *Numism. Zeitschr.* (Vienna), viii. 38—39 and Tiesenhausen in the *Rev. Numism. Belge*, 1875, p. 337; Huzū (probably the modern Čīrū) and Sāwiya (reading uncertain, probably the modern Tāwūnah), both almost opposite Ḳais (in the N. W. or N. E. of it), were the most important ports of the island-rulers on the mainland. On Huzū and Sāwiya see Ibn al-Balkhī, *Fārsnāma*, p. 141; Ḥamd Allāh Mustawfī, *Nuzhat al-Ḳulūb*, text p. 120, transl. p. 118; G. le Strange, *The Lands of the Eastern Caliphate*, p. 257. A caravan route from Shīrāz ended in Huzū, the more important of these two towns; cf. Ḥamd Allāh Mustawfī, p. 185, 10, 186, 9. The same author (p. 171, 19, 184, 5, 186, 11 *sq.*) also gives the routes and distances from Ḳais to Baṣra, to Sulṭāniya and to the islands of Serendīb (Ceylon) via Hormūz. Most of the smaller islands near Ḳais likewise became subject to the rulers of the latter, for example Djāsak (probably the modern Lārek in the strait of Hormūz), where, according to Yāḳūt ii. 9, 7, the "king" of Ḳais maintained a garrison celebrated for its seamanship; see also DJĀSAK, i. 1025. At its period of greatest power, the dynasty of Ḳais also ruled over the opposite coast on the Arabian side (district of 'Omān), wherefore they are called by Yāḳūt and al-Dimashḳī "the lords of 'Omān".

The journey of the Rabbi Benjamin of Tudela falls within the period of Ḳais's prosperity (second half of the twelfth century). He notes with admiration the rich market of the island, whose chief business consisted in the exchange of Indian and Persian manufactures and produce; see the edition of the itinerary of Benjamin of Tudela by Grünhut (transl. Jerusalem 1903), p. 77 *sq.* The Jewish traveller wrongly gives the island, which he calls Kish, much too large an area; but there can be no doubt that he refers not to Ḳishm (so Grünhut, *op. cit.*, and Asher in his edition, ii. 175 *sq.*), but to our Ḳais. Benjamin of Tudela says that there were 500 Jewish families settled on the island. There must, of course, have also been a number of Persians living there. The bulk of the inhabitants, however, in the middle ages (as it is still the case to-day) were not Persians but Arabs, who were the chief settlers on most of the islands on the Persian side of the Gulf. The Venetian Marco Polo (*Travels*, Book i. Chap. 7, iii. Chap. 44) of the second half of the xiiith century knows Ḳais under the name Kisi (in Ital. orthography: Chisi) as a place of call for ships sailing from Babylon to India.

The decline of Ḳais was caused by the commercial rise of the little kingdom of Hormūz [q. v.], also under an Arab dynasty. Even under the Saldjūḳ prince Malik Dīnār of Kermān (582—591 = 1186—1194) the ruler of Ḳais of that time had vainly endeavoured to get Hormūz on the mainland from the latter in return for a yearly tribute; see Muḥammad Ibrāhīm, *Tawārīkh Āl Saldjūḳ*, ed. Houtsma, Leiden 1886, p. 160, 5 *sq.*; *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxxix. 395). Further information on the relations of Ḳais with Hormūz is given in the *Relaciones* (1610) of the Portuguese Teixeira; the book contains from a Persian source a fairly full history of the kingdom of Hormūz; see W. F. Sinclair, *The Travels of P. Teixeira*, (= Hakluyt Society, Ser. 2, vol. ix., London 1902), p. 161 *sq.*, 169 *sq.*, 183 *sq.*, 259 *sq.* and cf. Schwarz in the *Zeitschr. der Deutsch. Morgenl. Ges.*, lxviii. 531 *sq.* and HORMŪZ, ii. 325 *sq.* According to Teixeira (*op. cit.*, lxviii. 534; cf. Ritter, viii. 777) about 700 (1300) the then king of Hormūz obtained from Na'aim of Ḳais by purchase the island of Djarūn which lay opposite his capital. A few years later, he moved his residence to this island, which offered more protection; cf. above i. 694 *sq.*, ii. 325 *sq.*). This New-Hormūz, thanks to its favourable position near the narrowest part of the Gulf, soon began to compete vigorously with the rulers of Ḳais and attracted more and more of the trade with India to itself. This led to long wars and feuds between the two kingdoms, which fill a great part of their history. For a time Ḳais was actually under Hormūz. In the end Ḳais completely lost its previous dominating position as the chief emporium of the Persian Gulf. Hormūz now took its place and from the tenth century to its capture by Shāh 'Abbās I in 1622 formed a great centre of international commerce. Its place was in turn taken by Bender 'Abbās [q. v.], which had to give pride of place to Būshir [q. v.] after the middle of the xviiith century; the latter is now the most important trading port on the Persian Gulf. In the later middle ages the commercial centre of gravity within the Persian Gulf thus gradually shifted from north to south (Sīrāf-Ḳais-Hormūz) and returned in modern times to the north, although less adapted by nature. We know little of the later history of Ḳais. When the islanders became dissatisfied with their rulers, they finally called in the help of the governor of Shīrāz and as a result of his intervention Ḳais became permanently incorporated in Persia. According to Schläfli, who spent 14 days on the island in 1862, there are 8 little settlements on it; he estimated the number of the inhabitants (Arabs and 1/10 Suaheli negro-slaves) at 2500—3000.

Heyd, *Hist. du Commerce du Levant* (Leipzig 1885/6), i. 164 sq., ii. 133 sq.; Tomaschek, *Küstenfahrt Nearchs* in the *Sitz.-Ber. der Wiener Akad.*, cxxxi. phil.-hist. Cl., Abh. 8 (1890), p. 52 sq. (M. STRECK)

AL-ḲAIS, apparently an ancient Arab idol. He must have early disappeared as a deity, for Hishām b. al-Kalbī does not mention him in his *Kitāb al-Aṣnām* and he is not given in the various passages in Arabic literature that give lists of the gods of the Djāhiliya. But that he was at one time worshipped as a god may be deduced with considerable certainty from the tribal name ʿAbd al-Ḳais [q. v.] and from the well-known personal and tribal name Imruʾ al-Ḳais [q. v.; cf. the Arabic names Imruʾ Manāt, Αμριμαναθος and Μαρααλλας in Wellhausen, *Reste arabischen Heidentums*[2], p. 5 sq. and אמראלהי (= *Imraʾallāhi*) and אמראיגות (= *Imraʾ Yaghūth*) in Lidzbarski, *Handb. der nordsemit. Epigraphik*, i. 500, as well as the Hebrew Merī-Baʿal 1. Chron., ix. 40[b] and ʿAshbaʿal (Septuaginta, Luc., and also Cod. Sin. Ισβααλ, = ʾIsh-Bōsheth) 1. Chron., viii. 33, ix. 39]; further from statements like the following: "and it has been asserted that al-Ḳais was the name of an idol, which explains the name ʿAbd al-Ḳais", *Ḥamāsa* of Abū Tammām, ed. Freytag, i. 85, schol., and "others have thought that al-Ḳais was the name of an idol and for this reason al-Aṣmaʿī (in verse 14 of the *Muʿallaḳa* of Imruʾ al-Ḳais) has rejected the reading "*ya-mīra'a 'l-Ḳaisi fa-nzili*", and has preferred "*ya-mra'a 'l-ḳāli fa-nzili*", ʿĀṣim b. Aiyūb al-Baṭalyūsī, *Sharḥ Dīwān Imri'i 'l-Ḳais*, Cairo 1308, p. 5, and further from the name of the god קישה, קישא in the Nabataean inscription of al-Ḥidjr, which can hardly be other than an Aramaic adaptation of al-Ḳais (cf. Lidzbarski, *op. cit.*, p. 363; Cook, *A Glossary of the Aramaic Inscriptions*, p. 104; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xl. 167; Baethgen, *Beitr. zur semit. Religionsgeschichte*, p. 108, etc.). From the Nabataean inscription *Corp. Inscript. Semit.*, N⁰. 209, 9 (= Euting, *Nabat. Inschriften aus Arabien*, N⁰. 12, 9) it would seem that the deity possessed a sanctuary in al-Ḥidjr, in which copies of documents used to be deposited; nothing else is known about his character or the area of his cult. The appellative meaning of *Ḳais* is obscure; according to the native dictionaries, it means: "misfortune", "need", "famine", "membrum virile" and "proud gait". But none of these meanings is suitable as the name of a deity, quite apart from the fact that I cannot find a single one actually occurring in literature. De Goeje has deduced the meaning "Lord" from al-Hamdānī, *Djazīrat al-ʿArab*, ed. D. H. Müller, i. 3, 9 and perhaps p. 221, 14 (see W. Robertson Smith, *The Religion of the Semites*, London 1894, p. 170, note 4, German transl. by R. Stübe, p. 132, note 219). "Lord" would, of course, be a good name for a deity, almost too good! But in view of the poor condition of the manuscripts available for D. H. Müller's edition of the *Djazīrat al-ʿArab*, and the problematic character in any case of the two passages in al-Hamdānī, this meaning can at best only be said to be a possible one.

As to the connection between al-Ḳais and the frequent personal and not uncommon tribal name Ḳais (see Wüstenfeld, *Register zu den Geneal. Tabellen der arab. Stämme u. Familien*; the indices to Ibn Duraid, *al-Ishtiḳāḳ*, ed. Wüstenfeld, al-Ṭabarī, *Taʾrīkh*, ed. de Goeje, Caetani, *Annali dell' Islām*, ii./ii and vi., *Naḳāʾiḍ Djarīr wa 'l-Farazdaḳ*, ed. Bevan; Guidi, *Tables alphabét. du Kitāb al-Aghānī*, s. v., etc., and note also the Nabataean personal name קישי, Lidzbarski, *op. cit.*, p. 363 and Cook, *op. cit.*, p. 104), as well as the personal name ʿAbd Ḳais (*Naḳāʾiḍ Djarīr wa 'l-Farazdaḳ*, Indices, s. v.; Ibn Duraid, *op. cit.*, p. 138, 275; Wüstenfeld, *Register*, p. 30; Ibn al-Athīr, *Usd al-ghāba*, ii. 137; Ibn Ḥadjar, *Iṣāba*, i. 987) no definite statement can be made. But at any rate we should not, as has always been done hitherto, overlook the fact that Ḳais always has the article (which the Nabat. קישא, קישה also shows) in the nevertheless in all probability theophoric form Imruʾ al-Ḳais as well as in the tribal name ʿAbd al-Ḳais, while in the personal and tribal name Ḳais and in the personal name ʿAbd Ḳais it is as regularly found without the article. (That the poet ʿAbd Ḳais b. Khufāf, *Aghānī*[1], ix. 165, *Ḥamāsa*, *loc. cit.*, p. 352 and *Lisān al-ʿArab*, ii. 206 appears as ʿAbd al-Ḳais b. Khufāf may be due to an error; see *Mufaḍḍalīyāt*, ed. Lyall, Nr. cxvi. sq., ed. Cairo, ii. 85 sq. and *Aghānī*, vii. 148, 152 sq.). I would consider Ḳais, as opposed to the god's name al-Ḳais, as a simple personal name. Wellhausen sees in it the god's name before which the concept ʿAbd has disappeared (*op. cit.*, p. 8). But he does not tell us why in this contraction the article of the name of the god should also have been dropped. W. Robertson Smith (*Kinship and Marriage in Early Arabia*[2], p. 259) had practically anticipated Wellhausen.

Halévy (*Essai sur les inscriptions du Safa*, in the *Journ. Asiat.*, 1882, p. 321), Wellhausen (*loc. cit.*, p. 67) and Gottheil (*On* קושיר *and* קישי, *Journ. of Bibl. Literature*, xvii. 200) have identified our deity with the Edomite god Ḳaus, Ḳōs, Ḳauah or Ḳōsh (on the latter see especially Schrader,

Die Keilinschriften und das Alte Testament, 3rd edition, revised by Zimmern and Winckler, p. 472 *sq.* and W. Robertson Smith, *op. cit.*, p. 31). I consider the identity of the two to be exceedingly improbable. The comparisons of Ķais with another Edomite god, the Κοζε of Josephus, are, of course, utterly untenable (Κοζε = Arab. Ķuzah, see Wellhausen, *op. cit.*, p. 67, 81 *sq.*; Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xli. 714; Lagarde, *Symmicta*, i. 121, note 1; Gottheil, *op. cit.*, p. 201, etc. and cf. Thamud. and Nabat. קוס, Littmann, *Zur Entzifferung der thamudenischen Inschriften*, in *Mitt. d. Vorderasiat. Gesellsch.*, 1904, i. 46; Lidzbarski, *op. cit.*, p. 362; Cook, *op. cit.*, p. 104), as well as the identification with the Nabataean קיס (on this cf. Lidzbarski, *op. cit.*, p. 364; Cook, *op. cit.*, p. 105), with the Semitic deity (Ζεὺς) Κάσιος (on this see Dressler, in W. Roscher's *Ausführl. Lexikon der griech. u. röm. Mythologie*, Col. 970 *sqq.*) and with אלקשי Nahum, i. 1 (De Vogüé, *Syrie Centrale, Inscriptions sémitiques*, p. 105; H. Derenbourg, *Le poète antéislamique Imruʾu ʾl-Ķais et le dieu arabe al-Ķais*, in *Biblioth. de l'École des Hautes Études, Sciences religieuses*, Vol. vii.: *Études de critique et d'histoire*, 2nd Series, p. 122; Gottheil, *loc. cit.*, p. 201 *sq.*, etc.). On the other hand the name Ķais perhaps appears in קיש (Septuag. Κις) 1. Sam., ix. 1, 3 etc. and the appellative *Ķais* in קישי (Septuag., Cod. Vat. Κεισαι, Cod. Alex. Κεισαι) 1. Chron., vi. 29 = קושיהו (to be read קישיהו; Septuag., Cod. Vat. Κεισαιου, Cod. Alex. and Luc. Κεισαιου) 1. Chron., xv. 17.

Bibliography (in addition to the works already mentioned): E. Osiander, *Studien über die vorislâmische Religion der Araber*, in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, vii. 500 *sq.*; Nöldeke, Notes of W. Robertson Smith, *Kinship and Marriage in Early Arabia*, Ibid., xl. 166 *sq.* and Wellhausen, *Muhammed in Medina. Das ist Vakidi's Kitab al-Maghazi in verkürzter deutscher Wiedergabe*, p. 212, note 1.

(A. FISCHER)

ĶAIS-ʿAILĀN (*Ķaisu ʿAilāna*), one of the largest and most powerful tribal groups of northern Arabia in ancient times.

Name. For Ķais ʿAilān we often find also Ķais b. ʿAilān, most frequently *Ķais* alone (in the poetry occasionally also simply ʿAilān, see *Naḳāʾiḍ Djarīr wa ʾl-Farazdaḳ*, ed. Bevan, iii. Index iii. s. v.; the "Kaisites" are naturally called al-Ķaisiyūn, but as an ethnic-political group more usually al-Ķaisiya, see al-Ṭabarī, *Taʾrīkh*, ed. de Goeje, ii. 66, 180, 777, 1614, 1663, etc.; the nisba to Ķais-ʿAilān or Ķais b. ʿAilān is, however, ʿAilānī, see al-Samʿānī *al-Ansāb*, p. 404b and Ibn Khallikān, Būlāḳ 1299, ii. 128 *sq.*). All three forms occur in prose as well as poetry, the middle one, Ķais b. ʿAilān, remarkably rarely in poetry (Ķais-ʿAilān in poetry: *Ḥamāsa* of Abū Tammām, ed. Freytag, p. 160, 659; *Naḳāʾiḍ*, i. 117, 362 *sq.*, 370, 375, 390; al-Ṭabarī, *op. cit.*, ii. 486; *Tādj al-ʿArūs*, s. v. *ʿyl*, etc.; Ķais b. ʿAilān: Zuhair, *Dīwān*, ed. Ahlwardt, iii. 36, *Naḳāʾiḍ*, i. 373, Abu ʾl-ʿAlāʾ al-Maʿarrī, *al-Luzūmiyāt*, Cairo 1891, i. 47 and also *Tādj al-ʿArūs*, s. v. *ʿyl*; Ķais: ʿAntara, *Dīwān*, ed. Ahlwardt, xxiv. 3, Append. xxi. 5; al-Nābigha, *Dīwān*, ed. Ahlwardt, Append. liii. 1; Zuhair, *op. cit.*, ix. 17; *Ḥamāsa*, *ed. cit.*, 200, 302, 318, 657—660; *Naḳāʾiḍ*, i. 374, 376 *sq.*, ii. 902, 1041; *Aghānī*[1], xvii. 106, etc.). We never find before any of the three forms the word *Banū* ("sons") (wrongly in the indices to Ibn al-Athīr, *al-Kāmil fi ʾl-Taʾrīkh*, ed. Tornberg, to Caetani, *Annali dell'Islām*, ii. 1422 and vi. 145, and even to al-Ṭabarī, *op. cit.*, etc.). What we are to understand by ʿAilān, is difficult to conceive. Those who use the form Ķais b. ʿAilān — these are primarily the genealogists (see *Tādj al-ʿArūs*, s. v. *ʿyl* and *ḳys*) — see in him naturally, at least the great majority of them (see below), the father of Ķais and they further explain that he was the son of Muḍar and therefore brother of al-Yās (Khindif) b. Muḍar. According to them his real name is al-Nās (which, according to Ibn Duraid, *Kit. al-Ishtiḳāḳ*, ed. Wüstenfeld, p. 162 comes from al-Nās; according to al-Wazīr al-Maghribī in the *Tādj al-ʿArūs* s. v. *ḳys*, al-Nās would be the only correct form), so that ʿAilān would be his epithet (Ibn Duraid, *op. cit.*, p. 162; *Tādj al-ʿArūs*, s. v. *ḳys*; Ibn ʿAbd Rabbihi, *al-ʿIḳd al-farīd*, Cairo 1305, ii. 51; Abu ʾl-Fidāʾ, *Mukhtaṣar Taʾrīkh al-Bashar*, partly ed. by Fleischer as *Historia anteislamica*, p. 194; Wüstenfeld, *Genealog. Tabellen der arab. Stämme u. Familien*, I; Caetani, *op. cit.*, I. Introd., § 49; also al-Samʿānī, *op. cit.*; al-Yaʿḳūbī, *Taʾrīkh*, ed. Houtsma, i. 260; al-Masʿūdī, *al-Tanbīh wa ʾl-Ishrāf*, in *Bibl. Geogr. arab.*, ed. de Goeje, viii. 208; Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iii. 908; Ibn Khallikān, *op. cit.*, ii. 130; ʿAbd al-Ḳādir b. ʿOmar, *Khizānat al-Adab*, ii. 449; Caussin de Perceval, *Essai sur l'histoire des Arabes*, i. 192, etc.). But this view is contradicted directly by Ibn Khaldūn, *al-ʿIbar*, ii. 305 and indirectly by many others — practically by all who say Ķais ʿAilān and these are, as we have said, the majority —; according to them ʿAilān disappears as a separate member in the genealogical table; Ķais ʿAilān is identical with al-Nās or al-Nās (Ķais ʿAilān here also is said to be only an epithet, al-Nās(s) on the other hand the proper name) and is son of Muḍar and brother of al-Yās. At the same time they explain the genitive ʿAilān in the most different ways: as the name of a famous horse of Ķais (by calling him after this horse, an endeavour has been made to distinguish our Ķais from Ķais b. al-Ghawth of Badjīla, who also possessed a celebrated horse called Kuhba and who was similarly called Ķais-Kuhba, *Tādj al-ʿArūs*, s. v. *ḳys* and *ʿyl*, and Ibn Khallikān, *loc. cit.*), or as the name of a dog or of a bow, which were in his possession; or as the name of a slave or of some other man who had brought him up (in an isolated case in the form of the name Ķais b. ʿAilān, the word ʿAilān is regarded as the name of such a slave, see ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, i. 67, ii. 449; cf. the exactly analogous interpretation of the tribal name Saʿd (b.) Hudhaim in Ibn Ḳutaiba, *Kit. al-Maʿārif*, ed. Wüstenfeld, p. 51, Ibn Duraid, *op. cit.*, p. 319, *Ḳāmūs* and *Tādj al-ʿArūs*, s. v. *hdhm*, etc.), or as the name of a mountain, where he is said to have been born or lastly, — and most stupidly as no notice is taken of genitive relationship in the form *Ķaisu ʿAilāna* — as an otherwise quite unknown adjective, interpreted as qualifying Ķais with the meaning "needy, dependent" (see also Ibn Duraid, *op. cit.*; *Ṣiḥāḥ*, *Lisān al-ʿArab* and *Ḳāmūs*, s. v. *ḳys* and *ʿyl*; al-Samʿānī, *op. cit.*; Abu ʾl-Fidāʾ, *op. cit.*; Ibn Khaldūn, *op. cit.*; ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, and

Ḥamāsa, *op. cit.*, i. 124; Reiske, *Primae lineae historiae regnorum arabicorum*, ed. Wüstenfeld, Tables v. and viii. on p. 136; Sprenger, *Das Leben u. die Lehre des Propheten Moḥammad*, iii. p. cxxxix, etc.). Only very rarely do we find the statement that ʿAilān was an epithet of Muḍar (*Ṣiḥāḥ* and *Lisān al-ʿArab*, s. v. ʿyl) and most strange is the assertion twice made by Ibn Ḳutaiba (*op. cit.*, p. 31 and 38) and hardly reconcilable with his other statements, that Ḳais ʿAilān is identical with Ḳamaʿa b. al-Yās b. Muḍar.

These confused statements seem to one to be nothing but guesses. I should like to think myself that Ḳais ʿAilān is the real name of our confederation of tribes and that it was the genealogists who first made Ḳais b. ʿAilān out of it. As Arab tradition obviously knows absolutely nothing of a tribe or group of tribes called ʿAilān, I should further like to assume — of course with all reserve — that the combination *Ḳaisu ʿAilāna* is not to be interpreted on the model of *Taghlibu Wāʾilin*, "the Taghlib of the tribal group of Wāʾil", *Taimu ʾl-Ribābi*, "the Taim of the al-Ribāb confederacy"; *ʿAdiyu ʾl-Ribābi*, "the ʿAdī of the al-Ribāb confederacy", *Djarmu Ḳuḍāʿata*, "the Djarm of the Ḳuḍāʿa confederation of tribes", "*Wāʾilu Bāhilata*, the Wāʾil of the Bāhila group of tribes", also *Aʿshā Banī Ḳaisin*, "the Aʿshā of the Banū Ḳais", *Aʿshā Bāhilata*, "Aʿshā of Bāhila", etc., (see e. g. *Naḳāʾiḍ*, iii. Ind. iii. s. vv.), but on the model of *Ḳaisu Kubbata*, "Ḳais, the owner of the horse Kubba" (see above; the name is everywhere so explained), *Rabīʿatu ʾl-Farasi*, "Rabīʿa with the horse", *Anmāru ʾl-Shāti*, "Anmār with the sheep", *Rabīʿatu ʾl-Djūʿ*, "Hunger-Rabīʿa", *Zaidu ʾl-Khaili*, "horses-Zaid", etc. (see e. g. *Naḳāʾiḍ*, iii. Ind. iii. and also *Tādj al-ʿArūs*, s. vv.). What we are to understand, however, in this case by ʿAilān, whether, with the native explanations quoted, a horse or a dog or something of the kind is quite uncertain. According to the native dictionaries (I cannot quote an actual reference in literature) ʿAilān as a noun means a "male hyena". As a name, it is not found elsewhere, according to the native lexicons and according to ʿAbd al-Ḳādir b. ʿOmar, *op. cit.*, i. 67 (see, however, *Tādj al-ʿArūs*, s. v. ʿyl). — The Arab genealogists may have simply invented the name *al-Nās* (see above) as a counterpart to al-Yās.

Branches of the confederation: Ḳais (ʿAilān) and Khindif (according to the genealogical legend, the wife of al-Yās) comprise together the whole of Muḍar (Ibn Ḳutaiba, *op. cit.*, p. 31, al-Ṭabarī, *op. cit.*, ii. 1298, 1929, al-Masʿūdī, *op. cit.*, p. 324, al-Bakrī, *al-Muʿdjam*, ed. Wüstenfeld, p. 56, Yāḳūt, *op. cit.*, i. 463, Ibn Khaldūn, *op. cit.*, ii. 305, Caussin de Perceval, *op. cit.*, i. 192, etc.). Between the two groups there were very ancient points of dispute (see e. g. al-Bakrī, *op. cit.*, p. 56 = Wüstenfeld, *Die Wohnsitze u. Wanderungen der arab. Stämme*, from vol. xiv. of the *Abhdlg. d. Götting. Ges. d. Wiss.*, p. 81). To Ḳais-ʿAilān were reckoned the following large tribes or more accurate tribal groups: Ghaṭafān [q. v.], with ʿAbs [q. v.], Dhubyān (q. v.; the two main branches of the Dhubyān are Fazāra, q. v. and Murra, q. v.) and Ashdjaʿ-Hawāzin [q. v.], with Thaḳīf [q. v.], in whom many saw descendents of Thamūd [q. v.] (see e. g. *Aghānī*[1], iv. 76), ʿĀmir b. Ṣaʿṣaʿa [q. v.], Kilāb (q. v.; from them descended the dynasty of Mirdāsids of Aleppo, q. v.), Kulaib, Ḳushair, ʿUḳail (q. v.; this is the tribe of the ʿUḳailid dynasty of Mosul), Hilāl [q. v.] and Djusham — Sulaim [q. v.] — Bāhila [q. v.] — ʿAdwān — Ghanī [q. v.], etc. (On the branches of the Ḳais ʿAilān see especially Ibn Duraid, *op. cit.*, p. 162 *sqq.*; Ibn Ḳutaiba, *op. cit.*, p. 38 *sqq.*; Ibn Khaldūn, *op. cit.*, ii. 305 *sqq.*; Abu ʾl-Fidāʾ, *op. cit.*, p. 194 *sqq.*; Ibn ʿAbd Rabbihi, *op. cit.*, ii. 51; Wüstenfeld, *Geneal. Tabellen*, Tab. D *sqq.* and Reiske, *op. cit.*, Tab. viii. *sq.* on p. 136.)

Distribution. The Ḳais ʿAilān, according to legend, were originally settled in the low lying parts of the Tihāma (al-Bakrī, *op. cit.*, p. 57 = Wüstenfeld, *Die Wohnsitze u. Wanderungen d. Arab. Stämme*, p. 81 = Yāḳūt, *op. cit.*, i. 463 *sq.*). Somewhere about the time of Muḥammad they spread, in keeping with the large number of their subdivisions over vast areas of central and northern Arabia; we find them (still?) in the Tihāma (Ibn Khaldūn, *op. cit.*, ii. 305), then again S. E. and N. E. of Mecca (the Thaḳīf here owned the valuable town of Ṭāʾif and the Sulaim, Hilāl and ʿUḳail all sorts of famous mines; see e. g. al-Yaʿḳūbī, *al-Buldān*, in the *Bibl. Geogr. Arab.*, vii. 316, 312), in the region of Medina (Ibn Khaldūn, *op. cit.*, ii. 305 *sqq.*, 312), in other parts of the Ḥidjāz (al-Hamdānī, *Djazīrat al-ʿArab*, ed. D. H. Müller, i. 50; al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze und Wanderungen*, etc. p. 84), in the ʿĀliya (Yāḳūt, *op. cit.*, iii. 688, 697; Ibn al-Athīr, *op. cit.*, v. 53), throughout the highlands of Nadjd (al-Masʿūdī, *op. cit.*, p. 209; al-Yaʿḳūbī, *al-Buldān*, p. 312), in the Yamāma, where they occupied the important Faladj (al-Bakrī, *op. cit.*, p. 60 = Wüstenfeld, *Die Sitze u. Wanderungen* etc., p. 84; Yāḳūt, *op. cit.*, ii. 238, iii. 908; Ibn Khaldūn, *op. cit.*, ii. 312 *sq.*; Wüstenfeld, *Baḥrein u. Jemāma*, from the *Abhdlg. der Götting. Ges. d. Wiss.*, xix. 40; Wüstenfeld, *Register zu den geneal. Tabellen*, s. v. Kaʿb ben Rabīʿa), in Baḥrain (al-Ṭabarī, *op. cit.*, i. 1988) and as far as in the ʿIrāḳ and therewith the former kingdom of the Lakhmids of al-Ḥīra (al-Masʿūdī, *Murūdj al-Dhahab*, ed. Barbier de Meynard, v. 63; Sperber, *Die Schreiben Muḥammeds an die Stämme Arabiens*, reprint from the *Mitteilg. d. Seminars f. Orient. Sprachen zu Berlin*, xix./ii. 38); see also Blau, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxiii. 583 and the map on p. 559, Caussin de Perceval, *op. cit.*, i. 192 and Caetani, *op. cit.*, ii. the map on p. 576.

The great Arab campaigns of conquest which began with the rise of the Caliphate and the tremendous political revolutions produced by them in Western Asia and North Africa brought the Ḳais-ʿAilān like most Arab tribes out of their ancient dwelling-places. To all appearance, however, several branches of them had emigrated northwards even before Islām. At any rate we find them later, partly even under the earlier Caliphs, throughout Syria: at Ḥalab, in the region of Ḥimṣ, in Damascus and the Ghūṭa, in the Ḥawrān with its capital Boṣrā, in Bathaniya with its capital Adhriʿāt, in the Djawlān with its capital Bāniyās, in the Balḳāʾ and in Palestine (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 451; Ibn Khaldūn, *op. cit.*, ii. 312; Abū Ḥanīfa al-Dīnawarī, *al-Akhbār al-ṭiwāl*, ed. Guirgass and Kratchkovsky, p. 183; al-Yaʿḳūbī, *op. cit.*, p. 325 *sq.*, 329; Ibn al-Athīr, *op. cit.*, v. 331; Yāḳūt, *op. cit.*, ii. 744 etc.), in N. W. Mesopotamia, in the large

district called after them Diyār Muḍar [q. v.], with the important towns of Ḳarḳīsiyā' (Circesium), al-Raḥba, ʿArābān, al-Khānūḳa, al-Raḳḳa, Bālis (Barbalissus), Ḥarrān (Carrhae), Djisr Manbidj, Sarūdj, Tell Mawzan, Sumaisāṭ (Samosata), etc. (Ibn Ḥawḳal, *al-Masālik wa 'l-Mamālik*, in the *Bibl. Geogr. arab.* ii. 155; al-Balādhurī, *op. cit.*, p. 178 = Yāḳūt, *op. cit.*, iv. 391; al-Ṭabarī, *op. cit.*, ii. 72 = Ibn al-Athīr, *op. cit.*, iii. 373; al-Ṭabarī, *op. cit.*, ii. 1891; Ibn Khaldūn, *op. cit.*, ii. 310; Caetani, *Studi di Storia orientale*, i. 271 and Caussin de Perceval, *op. cit.*, i. 192), in the ʿIrāḳ, where they also formed an apparently large fraction of the population of al-Kūfa and al-Baṣra (al-Balādhurī, *op. cit.*, 451; al-Yaʿḳūbī, *op. cit.*, p. 310; al-Ṭabarī, *op. cit.*, i. 2986, 3454, ii. 777; *Aghānī*[1], iii. 52; Ibn al-Faḳīh, *Mukhtaṣar Kitāb al-Buldān*, in *Bibl. Geogr. arab.*, v. 170; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 183; Ibn al-Athīr, *op. cit.*, iv. 116, v. 59), in Baḥrain (Ibn al-Athīr, *op. cit.*, vii. 341; Ibn Khaldūn, *op. cit.*, ii. 313) and even near Iṣbahān (al-Yaʿḳūbī, *op. cit.*, p. 275).

In the time of Ibn Khaldūn (xivth cent.) only remnants of the once so powerful group of tribes of the Ḳais ʿAilān were still settled in Central Arabia: considerable bodies of them had settled in different parts of North Africa, ʿAdwānī tribes for example in Ifrīḳiya, Sulaimīs there also and in the far west, near Fes (according to Ibn al-Athīr, *op. cit.*, x. 401, — whether rightly or not is another question — ʿAbd al-Muʾmin, the founder of the Almohad dynasty traced his descent from the Sulaim), Fazārīs and Rawāḥīs in Barḳa, other Dhubyānīs in Barḳa, in Tripolis and in Fezzān, Ashdjaʿīs in the marches of Algeria and Morocco, Hilālīs in Ifrīḳiya and at Bône and Constantine, Djushamīs in Morocco etc. (Ibn Khaldūn, *op. cit.*, ii. 305 *sqq.*

History. The history proper of most Arabian Beduin tribes begins for us with their ("battle) -days" (see AIYĀM AL-ʿARAB). So it is with the Ḳais-ʿAilān. Their feuds were particularly numerous, which is not remarkable in so large a group with its multitudinous ramifications. Ibn ʿAbd Rabbihi discusses them in the first place in his account of the Aiyām al-ʿArab in the *ʿIḳd al-Farīd* (iii. 47—93). He describes in this place the following entirely or essentially civil Ḳaisī battles (cf. Reiske, *op. cit.*, 204—252, following al-Nuwairī, who on this matter is dependent entirely on Ibn ʿAbd Rabbihi): the Yawm Manʿidj (Manʿadj), also called Yawm al-Radha, between Ghanawīs and ʿAbsīs), the Yawm al-Nafrāwāt (between ʿĀmirīs and ʿAbsīs), the Yawm Baṭn ʿAḳīl (between Dhubyānīs and ʿĀmirīs), the Yawm Shiʿb Djabala (between ʿĀmir, ʿAbs, Ghanī, Bāhila and Badjīla on one side and Tamīm, Dhubyān, Asad, Lakhm and Kinda on the other), the endless war of Dāḥis and al-Ghabrāʾ (between ʿAbs and Dhubyān), with the "days" of Dhu 'l-Muraiḳib, Dhū Ḥusā, al-Yaʿmariya, (Djafr) al-Habāʾa, al-Furūḳ, Ḳaṭan and Ghadīr Ḳalyād(?), the Yawm al-Raḳam (or al-Raḳm, between Ghaṭafān and ʿĀmir), the Yawm al-Nutāʾa (al-Baṭhāʾa?), between ʿAbs and ʿĀmir), the first and second Yawm Ḥawra (between Sulaim and Ghaṭafān), the Yawm ʿAdaniya (other Milḥān, between Sulaim and Ghaṭafān), the Yawm al-Liwā (between Ghaṭafān and Hawāzin) and the Yawm al-Salʿāʾ (between Hawāzin and Ghaṭafān). Also the following encounters between Ḳaisīs and Non-Ḳaisīs: the Yawm Raḥraḥān (between ʿĀmir and Tamīm), the Yawm Dhāt al-Athl (between Sulaim and Tamīm), the Yawm al-Kadīd (between Sulaim and Kināna), the Yawm Burza (or Buzza?, do.), the Yawm al-Ḳifāʾ (do.), the Yawm al-Suʾbān (between ʿĀmir and Tamīm), the Yawm Aḳrun (between ʿAbs and Banū Dārim), the Yawm al-Marrūt (between Banu 'l-ʿAnbar and Banū Ḳushair and the Yawm Dārat Maʾsal (between Tamīm and Ḳais). Al-Yaʿḳūbī, *Taʾrīkh*, i. 261 also mentions as Ḳaisī the "days" of al-Baidāʾ, Faif al-Rīḥ (between Khathʿam and ʿĀmir), al-Milbaṭ and al-ʿUrrā. Cf. also the section in Ibn al-Athīr on "the 'days' of the Arabs in the pagan period" (*op. cit.*, i. 367—517), pp. 411 *sqq.*, 435 *sqq.*, 420 *sqq.*, 482 *sqq.*, 478 *sq.*, 473 *sqq.*, in the chapter which al-Maidānī in his *Madjmaʿ al-Amthāl* has devoted to the "names of the days of the Arabs" (Chap. 29), nos. 76, 12, 11, 66, 96, 122, 30, 53, 22, 55 and *Naḳāʾiḍ*, iii. Ind. iv. under the separate place-names. Within the scope of this article at least, no attempt can be made to give these wars and feuds in more accurate historical and chronological sequence. Indeed, speaking generally we may say that it is a difficult, indeed for the most part an insoluble task, to get at the historical basis of the essentially legendary traditions of the Aiyām al-ʿArab, — which we may call the epic of the Arabs. The most important and therefore also the most celebrated in poetry of the above-mentioned "days" is certainly that of Shiʿb Djabala (see DJABALA, also DHUBYĀN and also Blau, *op. cit.*, p. 583, *Mufaḍḍalīyāt*, ed. Lyall, ii. transl., p. 251 and especially *Naḳāʾiḍ*, iii. Ind. iv., s. v. *Djabalatu*). Of the encounters in the Dāḥis wa 'l-Ghabrāʾ war [see GHAṬAFĀN, ʿABS and DHUBYĀN], the most celebrated is that of al-Habāʾa. It need not surprise us to find that the Ḳaisī tribes, as we see from the above, were also continually quarrelling with one another. The individual members of the great tribal confederacies never thought of maintaining peace as a principle within the limits of their group. Ibn ʿAbd Rabbihi and al-Nuwairī really ought also to have described the al-Fidjār battles as Ḳaisī, as in them the Hawāzin, who were Ḳaisī, with the Thaḳīf at their head formed one of the two contending parties (see FIDJĀR and HAWĀZIN, also Ibn al-Athīr, *op. cit.*, i. 439 *sqq.*, al-Masʿūdī, *Murūdj al-Dhahab*, iv. 120, 153. al-Masʿūdī, *al-Tanbīh wa 'l-Ishrāf*, p. 208 *sq.*, al-Diyārbakrī, *Taʾrīkh al-Khamīs*, Cairo 1283, i. 288, 293, Wüstenfeld, *Gesch. der Stadt Mekka*, Vol. iv. of the *Chroniken der Stadt Mekka*, p. 51 *sqq.*, Sprenger, *Das Leben und die Lehre des Mohammad*, i. 148, Caetani, *Annali*, Introd., § 140. Huart, *Hist. des Arabes*, i. 92, etc. The question at issue in this was really the endeavours of the Hawāzin to deprive the Kināna of Mecca and the Kaʿba (cf. *Aghānī*, xiii. 3 *sq.*).

Like the other great central Arabian Beduin tribes the Ḳais-ʿAilān belonged to the short-lived empire of the Kinda (q. v. and Ḥamza al-Iṣfahānī, *Taʾrīkh*, ed. Gottwaldt, p. 140; Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 54; Ibn al-Athīr, *op. cit.*, i. 376. 406; Reiske, *op. cit.*, 98; Caussin de Perceval, *op. cit.*, ii. 287; *al-Mufaḍḍalīyāt*, *op. cit.*, transl., p. 250). Otherwise the only thing regarding the pre-Muhammadan history of the Ḳais-ʿAilān handed down to us is the statement that they had worshipped Sirius (?, Pococke, *Specimen hist. Arabum*, p. 4; Caussin de Perceval, *op. cit.*,

i. 349; Krehl, *Über die Religion der vorislam. Araber*, p. 24), and that the ʿAdwān had owned the *ifāḍa*, i. e. the management of the course run between ʿArafāt and al-Muzdalifa in the Meccan Ḥadjdj ceremonies [see ḤADJDJ II, 198] (Ibn Hishām, *Sīra*, ed. Wüstenfeld, p. 77 *sq.*, al-Ṭabarī, *op. cit.*, i. 1134, Ibn Khaldūn, *op. cit.*, ii. 305, etc.).

The Ḳais-ʿAilān were, of course, thoroughly antagonistic to Muḥammad at first. The Ghaṭafān and Sulaim [q. v.] especially proved very unpleasant neighbours to Medina in the first seven years after the Hidjra. But a clan of the Ghaṭafān, the Ashdjaʿ, who dwelled N. E. of Medina, considered it advisable as early as 627, after the "Battle of the Ditch" to conclude with Muḥammad a — purely political — treaty of alliance (Sperber, *Die Schreiben Muḥammads an die Stämme Arabiens*, p. 8 *sq.*) and the vastly more powerful Sulaim along with a number of Ashdjaʿīs took part in 630 in the "conquest" of Mecca on the side of the Prophet, and indeed, shortly after, we find them fighting at Ḥunain under the Muslim flag against their brother-tribe, the Hawāzin, although they must have seen that the latter's resistance to the state of Medina was the last possible attempt to break Muḥammad's hegemony over Arabia (Ibn Hishām, *op. cit.*, p. 810, 828—864; al-Ṭabarī, *op. cit.*, i. 1647; al-Wāḳidī, *al-Maghāzī*, abbrev. transl. by Wellhausen, p. 326, 358; Ibn Saʿd, *al-Ṭabaḳāt*, ed. Sachau, ii./i. 97, 109; Ibn Khaldūn, *op. cit.*, ii. 308; Caetani, *Annali*, ii. 147, 153, 444 etc. When Muḥammad died all the Ḳaisī tribes had probably submitted to the law of Islām (Ibn Saʿd, *op. cit.*, i./ii. 41 *sqq.*; Wellhausen, *Skizzen u. Vorarbeiten*, iv. 139 *sqq.*; Sperber, *op. cit.*, 38 *sqq.* etc.). After the Prophet's death, it is true, the majority of them joined more or less openly in the apostasy which set in over all Arabia. The Ghaṭafān once more were the most active in this. They several times endeavoured to overrun Medina and finally joined Ṭulaiḥa, the prophet of the Asad. But the old days of Arabia were past. Ṭulaiḥa and his followers were defeated at the well of Buzākha by Khālid b. al-Walīd, "the sword of God" (end of 632) and the rebellious central Arabian tribes had again to submit to the yoke of Medina and Islām (al-Ṭabarī, *op. cit.*, i. 1870, 1885, 1889, 1898 *sqq.*; Ibn al-Athīr, *op. cit.*, ii. 264; Caetani, *op. cit.*, ii. 604 *sqq.*; A. Müller, *Der Islam im Morgen- u. Abendland*, i. 174 *sqq.* etc.).

Henceforward the Ḳais ʿAilān show themselves good Muslims. Bodies of them took part in the battles against the Persians under Khālid b. al-Walīd, under al-Muthannā al-Shaibānī and under Saʿd b. Abī Waḳḳāṣ (al-Ṭabarī, *op. cit.*, i. 2219 *sqq.*; Ibn al-Athīr, *op. cit.*, ii. 347; Caetani, *op. cit.*, ii. 954 *sq.*, iii. 155, 281 *sqq.*). In the "battle of the Camel" (656) and at Ṣiffīn (657) they fought on the side of ʿAlī (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, p. 155 *sq.*, 183 *sq.*; al-Ṭabarī, *op. cit.*, i. 3174, 3224, 3309; Ibn al-Athīr, *op. cit.*, iii. 189).

In the period of the great Muslim conquests in which they — in so far as they had not done so earlier (see above) — had moved their settlements northwards, especially to Syria, their power had become such that from the beginning to the end of the Umaiyad period they formed one of the deciding political and military factors in the Caliphate. In this capacity they were in constant antagonism to the Kalb, the chief tribe of the Ḳuḍāʿa, who inhabited the strip of territory between the ancient Moab and Palmyra, an antagonism, at the root of which probably lay ethnic differences (but see Wellhausen, *Das arab. Reich und sein Sturz*, p. 112) — the Ḳais were Maʿaddīs (Nizārīs and Muḍarīs), that is North Arabians, while the Kalb were — or at least were considered — Yemenīs, South Arabians [see KALB B. WABARA and ḲAḤṬĀN]. — This antagonism being augmented through the Baṣra-Khurāsān trouble between the Tamīm and the Azd [q. v.], very early developed into a general vendetta between Muḍar and Yemen. The Umaiyad Caliphs relied sometimes on the Ḳais and sometimes on the Kalb according to their family connections, the result of marriages into these two extremes, which had as a result that, for example between 719 and 745, i. e. within 26 years, the actual control of the government passed five times from one group of tribes to the other. This state of things was, of course, intolerable and, in fact, the fall of the Umaiyad dynasty was really due in the end principally to this feud between Muḍarīs and Yemenīs.

Muʿāwiya I had relied on the Kalb and Yazīd I, who was born of a Kalbī mother had also depended mainly on them. As a result, the Ḳais refused their homage to their successors Muʿāwiya II, whose mother was likewise a Kalbī, and Marwān I, and declared themselves for the anti-Caliph ʿAbd Allāh b. al-Zubair [q. v.]. In 684 the Sulaim, the ʿĀmir and the Ghaṭafān — that is all Ḳaisīs — fought under al-Ḍaḥḥāk al-Fihrī on the Mardj Rāhiṭ in the Ghūṭa of Damascus for Ibn al-Zubair against Marwān, whose army consisted of Kalbīs and other men of Yemen. They suffered an unusually severe reverse, which plays a great part in the songs of the Kalbī and Ḳaisī poets and by the laws of the Arab vendetta necessarily perpetuated the hatred of the Ḳais for the Kalb (see AL-ḌAḤḤĀK B. ḲAIS AL-FIHRĪ and in addition to the literature quoted there al-Masʿūdī, *Murūdj al-Dhahab*, v. 201; al-Masʿūdī, *al-Tanbīh wa ʾl-Ishrāf*, p. 308 *sqq.*; Ibn al-Athīr, *op. cit.*, v. 204; Yāḳūt, *op. cit.*, ii. 743 *sq.*; Ibn Badrūn, *Sharḥ Ḳaṣīdat Ibn ʿAbdūn*, ed. Dozy, p. 184 *sq.*; *Ḥamāsa*, ed. Freytag, p. 260 *sqq.*, 317 *sqq.*; al-Maidānī, *op. cit.*, ii. 338, and Huart, *op. cit.*, i. 264 *sq.*). But they remained partisans of Ibn al-Zubair and maintained themselves with great tenacity in Mesopotamia under their important chief and leader Zufar b. al-Ḥārith al-ʿĀmirī al-Kilābī and his lieutenant ʿUmair b. al-Ḥubāb al-Sulamī, who did not capitulate till 691 in the reign of ʿAbd al-Malik after a siege of considerable length in their strongholds, Ḳarḳīsiyāʾ and Raʾs al-ʿAin (Resaina) (Wellhausen, *Das arab. Reich u. sein Sturz*, 115 *sqq.*, with references to the most important sources, al-Ṭabarī, *op. cit.*, ii. 643, 777; Ibn al-Athīr, *op. cit.*, iv. 188, 192, 242, 259; Dozy, *Gesch. der Mauren in Spanien*, German ed., i. 86, 101 *sqq.*, A. Müller, *op. cit.*, i. 373, 385). ʿUmair b. al-Ḥubāb was the commander of the Ḳaisī force which fought against the Shīʿa under Ibrāhīm b. al-Ashtar in August 686 on the banks of the Khāzir, a tributary of the Great Zāb, in the Umaiyad army led by ʿUbaid Allāh b. Ziyād, but to revenge the day of Mardj Rāhiṭ, they deserted in the battle (Abū Ḥanīfa al-Dīnawarī, *op. cit.*, 301 *sq.*; al-Ṭabarī, *op. cit.*, ii. 708 *sqq.*; Ibn al-Athīr, *op. cit.*, iv. 215 *sqq.*; al-

Mas'ūdī, *al-Tanbīh*, p. 312; al-Maidānī, *op. cit.*, ii. 339; Weil, *op. cit.*, i. 380 *sqq.*; Dozy, *op. cit.*, i. 100; A. Müller, *op. cit.*, i. 381; Wellhausen, *Die religiös-politischen Oppositionsparteien im alten Islam*, in the *Abhdlg. d. Götting. Ges. d. Wiss.*, Phil.-hist. Kl., n. F., v. N°. 2, p. 84; Wellhausen, *Das arab. Reich u. sein Sturz*, p. 126). In spite of this collapse of the Ḳaisīs in their great war against the Umaiyads, their smaller struggle against the Kalb continued without interruption, at first mainly under the leadership of 'Umair b. al-Ḥubāb. It took the form of a series of "days" fought mainly in the Samāwa, the desert between the 'Irāḳ and Syria and forced the north-eastern part of the Kalb to migrate for a time to the Ghawr of Palestine. The most celebrated of these "days" is the battle of Banāt Ḳain between the Fazāra and the Kalb in 692 or 693. When 'Umair with his Sulaimīs settled on the Great Khābūr (Chaboras) there resulted encounters with the Christian Taghlibīs, who dwelled in eastern Mesopotamia; these led to a bitter tribal and blood-feud, fought out chiefly on the Khābūr, the Balīkh (Bilechas), the Tharthār and in the Tigris region. The best known "days" of this conflict, which gradually reduced the weaker Taghlib to great extremity, are those of al-Ḥashshāk, where 'Umair fell (in 689; the *Naḳā'iḍ*, p. 373, 400, 508 give for this event the battle of Sindjār), and that of Mount al-Bishr (Wellhausen, *op. cit.*, pp. 125—130, *Naḳā'iḍ*, p. 401, 508, 899, also 902, 1038 and 1041; Yāḳūt, *op. cit.*, i. 632; al-Bakrī, *op. cit.*, p. 179; al-Maidānī, *op. cit.*, ii. 329, 339). We hear of bloodshed as a result of this enmity between the Ḳais and the Taghlib as late as 814 in the reign of al-Ma'mūn (Ibn al-Athīr, *op. cit.*, vi. 213).

After the capitulation of the Ḳais, 'Abd al-Malik showed himself a clever statesman and above party, he summoned Zufar b. al-Ḥārith and later also his sons to his court at Damascus and married a Ḳaisī lady of the 'Abs, called Wallāda, who became the mother of his sons Walīd I and Sulaimān besides other children. Walīd I was most probably a Ḳaisī at heart, but he took care not to irritate the Kalb. Sulaimān seems in spite of his fondness for the Yemenī (Azdī) Yazīd b. al-Muhallab to have at least had the intention of placing the interest of the empire before that of parties. As might well be expected in his reign the Ḳaisīs were partisans of the great Thaḳafī al-Ḥadjdjādj [q. v.] and of the Bāhilī Ḳutaiba b. Muslim (q. v. and *Naḳā'iḍ*, iii. index III, s. v. *Ḳais 'Ailān*). In the reign of 'Omar II, who was a pronounced advocate of the policy of conciliation, the dissensions between the two great tribal groups did not make themselves felt. On the other hand in the reign of Yazīd II, who in his struggle with the Azdī Muhallabids had naturally to rely on the support of the Ḳais, the result was a purely Ḳaisī party government. His brother and successor Hishām endeavoured to do away with this by withdrawing the Fazārī 'Omar b. Hubaira, whom Yazīd II had appointed viceroy of the 'Irāḳ and the East, and replacing him by the Badjalī Khālid b. 'Abd Allāh al-Ḳasrī, a distinguished statesman, but the Caliph finally found himself forced to allow the latter to be overthrown and replaced by a Ḳaisī, the Thaḳafī Yūsuf b. 'Omar, a relative of Ḥadjdjādj. Under Walīd II, who appeared to have fallen entirely under the influence of Yūsuf b. 'Omar, the wrath of the Yemenīs ultimately found vent in a rising stirred up by personal enemies of the Caliph, which led to the murder of Walīd II and the enthronement of Yazīd III. The new Caliph sought his support exclusively among the Yemenīs, especially the Kalb, the last Umaiyad, Marwān II, relied no less exclusively on the Ḳais, into whose territory — to Ḥarrān — he even removed his capital. Marwān II fell before the 'Abbāsids. Even in the decisive battle on the Great Zāb which he fought against them in January 750, the feud between the Ḳais and the Ḳuḍā'a proved fatal (cf. Wellhausen, *op. cit.*, p. 131 *sq.*, 140 *sq.*, 162 *sq.*, 194 *sqq.*, 199 *sqq.*, 203 *sqq.*, 224 *sqq.*, 229 *sq.*, 235 *sq.*, 341, where the necessary sources are everywhere given; A. Müller, *op. cit.*, i. 408, 435 *sqq.*, 445 *sq.*; also the pertinent sections in Weil, *op. cit.*, Dozy, *op. cit.*, Huart, *op. cit.*, Muir, *The Caliphate, its Rise Decline and Fall*, etc.). The quarrel between Ḳais and Kalb had its effect in history not only in Syria, the 'Irāḳ and Khurāsān, but also in the other provinces of the vast Arab empire, notably in North Africa and Spain, where the two parties just as well were at deadly enmity (for North Africa and Spain see especially Dozy, *op. cit.*, i. 138 *sqq.*).

In the severe fightings of the later Umaiyad period, the Ḳais had suffered losses from which they never again recovered. What we learn of them during the 'Abbāsid period is not of any great historical interest. The following are the main outlines: In the years 790, 792, 796 and 803, i. e. in the reign of Hārūn al-Rashīd, they had all sorts of new encounters in and around Damascus with their hereditary Yemenī enemies (al-Ṭabarī, *op. cit.*, iii. 609, 625, 639 *sqq.*, 688; Ibn al-Athīr, *op. cit.*, vi. 87 *sqq.*, 129; A. Müller, *op. cit.*, i. 490; see also above AL-ḲAIN B. DJASR). They rebelled under Hārūn in 794 and again under al-Ma'mūn in 828, in combination with the Yemenīs, in Egypt (al-Ṭabarī, *op. cit.*, iii. 629, 1099; Ibn al-Athīr, *op. cit.*, vi. 97, 288; Weil, *op. cit.*, ii. 146 *sq.*; A. Müller, *op. cit.*, i. 490). In 811 under al-Amīn, they fought the pretender 'Alī b. 'Abd Allāh al-Sufyānī chiefly because he had Kalbī blood in his veins (Ibn al-Athīr, *op. cit.*, vi. 172 *sq.*; Weil, *op. cit.*, ii. 187); after the death of al-Mu'taṣim in 842 they stirred up a revolt in Damascus but were quickly brought back to obedience by a severe defeat inflicted on them by al-Wāthiḳ's army on the for them ill-omened Mardj Rāhiṭ (see above) (Ibn al-Athīr, *op. cit.*, vi. 376). The Ḳaisīs of Baḥrain played a certain part in the initial stages of the Ḳarmaṭian movement in 894 *sqq.* (Ibn al-Athīr, *op. cit.*, vii. 341; cf. Weil, *op. cit.*, ii. 508, note 3).

The Ḳais appear, compared with the Kalb, to have been in general more savage, less civilised, more hardy, more treacherous and more cruel. The reason, no doubt, is that they were in much closer contact with the life of the desert than their rivals, who had been for centuries already settled in Syria, a home of ancient culture, and had naturally not remained uninfluenced by the refining influences of the Byzantine empire, whose eastern marches had been their home before the Muslim conquest. Their readiness to face battle or death is occasionally celebrated, not only in poetry (al-Ṭabarī, *op. cit.*, ii. 1930).

Famous Ḳaisīs (with the exception of those already mentioned). The best known poets of the

Ḳais were: al-Nābigha al-Dhubyānī, ʿAntara, Labīd, ʿĀmir b. al-Ṭufail, Ṭufail b. ʿAwf, ʿUrwa b. al-Ward, al-Shammākh, al-Khansāʾ, Abū Miḥdjan, al-Ḥuṭaiʾa, Taʾabbaṭa Sharran, Ibn ʾl-Iṭnābaʾ al-ʿAdwānī, Duraid b. al-Ṣimma, al-ʿAbbās b. Mirdās, Muzarrid, Khidāsh b. Zuhair, al-Nābigha al-Djaʿdī, etc. [see the pertinent articles]. The great philologist al-Aṣmaʿī [q. v.] was a Bāhilī. — Other Ḳaisīs of historical importance are given by Ibn Khaldūn, *op. cit.*, ii. 305 *sqq.*, Ibn Ḳutaiba, *op. cit.*, p. 38 *sqq.*, Ibn ʿAbd Rabbihi, *op. cit.*, ii. 51 and Abu ʾl-Fidāʾ, *op. cit.*, p. 194 *sqq.*

The Dialect of the Ḳais-ʿAilān. The Arabic philologists give us the following — as a matter of fact they are in the main common to most tribes of the Nadjd — phonetic and grammatical linguistic peculiarities of our group of tribes: They still pronounced the *hamza* as a guttural stop and they had even changed it to *ʿain* when initial (in part only) so that they said *ʿan*, *ʿanna*, *ʿaslama*, *ʿidhan* for *ʾan*, *ʾanna*, *ʾaslama*, *ʾidhan*). They had a tendency to *imāla* and to *ishmām*: and they said *tiʿlamu*, *tinṭaliḳu*, *tistakhridju* etc. for *taʿlamu*, *tanṭaliḳu*, *tastakhridju* etc., *ḥublay* for *ḥublā* or *ḥublā*, *hū* and *hī* for *huwa* and *hiya* (? always) and *min ladunhi* for *min ladunhu*. Cf. Howell, *A Grammar of the Classical Arabic Language*, iv. 930, ii./iii. 425, iv. 739, 824, 1313, 1476, note 4, ii./iii. 11 *sq.*, iv. 135, note to 1435, i. 8, i. 523, iv. 835, i. 780; Sībawaihi, ed. Bibliography given in the article itself.

(A. FISCHER)

ḲAIS B. AL-KHAṬĪM B. ʿAdī, with Ḥassān b. Thābit [q. v.] the most important poet of pre-Muḥammadan Yathrib, the latter Medina. He belonged to the Banū Ẓafar, a family of the Nabīt of al-Aws [q. v.]. In the desperate fighting between the two tribes of al-Aws and al-Khazradj, he championed the former with tongue and sword. Very little is known of the facts of his life, if we except the later, very doubtful stories. The account of the revenge he took on the murderers of his father and grandfather is however quite authentic, and by this he won particular fame with posterity. This event was later embellished with all sorts of fictitious details, some of which are echoes of the Cyrus saga and form a parallel to the legend of the young Parzival (see Singer, *Arab. und europ. Poesie im Mittelalter* in the *Abhandl. d. Preuss. Akad. d. Wissensch.*, 1918, phil.-hist. Kl., No. 13, p. 7 of the reprint). All else that we know of the life of the poet is that he took an active part in the political and military activities of his tribe. His *Dīwān* contains references to a whole series of *Aiyām* of the Aws. In the decisive battle of Buʿāth [q. v.], later often celebrated in song, he did not take part, apparently on account of a wound received previously. Not long after this battle and before the Hidjra he was treacherously murdered. Ḳais was involved in polemics with almost all the Khazradjī poets of his day, notably with Ḥassān b. Thābit and ʿAbd Allāh b. Rawāḥa [q. v.], both of them survived him by a considerable period. Although he was still alive at the beginning of Muḥammad's prophetic activity, his *Dīwān* shows no trace of a knowledge of it. All that the later sources tell of his meeting with the Prophet is pure invention.

Ḳais's *Dīwān* is preserved in an old manuscript (dated 419 A. H.) in the Top Ḳapu Serāy Library in Constantinople, as an appendix to the *Dīwān* of Ḥassān b. Thābit. The second manuscript so far known which is in the Egyptian National (formerly Khedival) Library in Cairo, seems to be a late copy of the above. The poems were collected by Ibn al-Sikkīt, but the final editor seems to have been al-Sukkarī. What has survived for us in the *Dīwān* is certainly only a fragment of the original total.

Ḳais reveals in his poems the two sides of his life, the settled and the nomadic, which was so characteristic of the Arabian oases of the time. His descriptions of war and women are celebrated. The real Beduin, the description of the riding she-camel, the ride through the desert and hunting are almost entirely lacking in his poems. Ḳais is highly esteemed by later generations, perhaps more for his chivalrous character than for his poetic gifts. His poems are a very important source for our knowledge of conditions in Medina immediately before Islām.

Bibliography: *Der Dīwān des Ḳais b. al-Ḫaṭīm*, ed. T. Kowalski (Leipzic 1914). Besides the literature given there, in the historical introduction, al-Samhūdī's *Wafāʾ al-Wafāʾ bi-Akhbār Dār al-Muṣṭafā* (Cairo 1326/27, 2 vols.) is very important for the topography of Medina and therefore also for the understanding of the Dīwān.

(T. KOWALSKI)

KAISĀN, ABŪ ʿAMRA, a client of the ʿUraina, who belonged to the Badjīla [q. v.], was one of the leaders of the Mawālī [see MAWLĀ] in Kūfa in the time of al-Mukhtār [q. v.] and was one of the latter's intimates. Al-Mukhtār made him commander of his police force (*ḥaras*, *shurṭa*). In this capacity this ardent Shīʿī took part in avenging al-Ḥusain by killing, wherever possible, those who had taken the field against him and destroying their houses. For example, he beheaded, by al-Mukhtār's command, ʿUmar b. Saʿd b. Abī Waḳḳāṣ who had commanded the troops sent against al-Ḥusain. In the battle of Madhār (67 = 686) Kaisān commanded the Mawālī; he was perhaps killed in this fierce battle. According to al-Kashshī, Kaisān's method of procedure is said to have originated among the people of Kūfa the proverb applied to one who is deprived of his wealth: "Abū ʿAmra has entered his house"; cf. al-Dīnawarī, p. 297, 1. — "Abū ʿAmra has visited him". A verse in al-Kashshī describes him as wickeder than Iblīs. — As Muḥammad b. al-Ḥanafiya was the Imām of the Kaisānīya, Kaisān is occasionally represented as his client or pupil.

KAISĀNIYA was first applied to the Kūfa group of Shī'a, the Mawālī, represented by Kaisān Abū 'Amra (see above), whose interests were championed by al-Mukhtār. The name was then extended to those who held the views, which had considerable currency among the Shī'īs led by al-Mukhtār, and continued to be influential even later. When the little known Kaisān came in time to be practically forgotten, his name was often explained as a laķab of al-Mukhtār. Mukhtāriya thus became another name for the older stratum of the Kaisāniya. The latter name, however, is also derived from a certain Kaisān, a mawlā of 'Alī, who fell at Ṣiffīn (al-Ṭabarī, i. 3293, 10), from whom al-Mukhtār is said to have derived his views. The Kaisāniya were also called Khashabiya [q. v.] from the wooden club which the Mawālī carried as a weapon.

The contemporary Kaisānīs ascribed special knowledge to al-Mukhtār and to some extent regarded him as a prophet. There must also have been among them an echo of a cult, followed especially by some Yemen clans and described as Saba'ī, the worship of an alleged chair of 'Alī's, which was compared with the Ark of the Covenant and also used as an oracle. Their Imām in succession to al-Ḥusain was Muḥammad b. al-Ḥanafiya [q. v.], whom al-Mukhtār put forward as a mere figure-head. As al-Shahrastānī tells us, the Kaisānīs held the view that he was master of all knowledge and had obtained from the two Saiyids (i. e. al-Ḥasan and al-Ḥusain) all mystical, allegorical and esoteric knowledge as well as knowledge of the celestial spheres and of the souls. In time there came to be Kaisānīs who regarded Ibn al-Ḥanafiya as the Imām in immediate succession to his father and thus excluded al-Ḥasan and al-Ḥusain. In proof of this they pointed to the tradition that 'Alī in the Battle of the Camel had entrusted the standard to Muḥammad b. al-Ḥanafiya. This view probably arose in opposition to those held by the Imāmīs and Zaidīs.

Ibn al-Ḥanafiya's death, probably in 81 = 700, resulted in a split in the Kaisāniya. Apart from those who raised his son 'Alī to be Imām, a section of them transferred the Imāmate to his son Abū Hāshim [q. v.], who was regarded as heir to the secret knowledge of his father. They were called Hāshimiya; but after the death of Abū Hāshim (98 = 716/7 or 99 = 717/8) they broke up into various branches on the question of succession. The 'Abbāsids now spread the idea that Abū Hāshim before his death had transferred his rights to the Imāmate to Muḥammad b. 'Alī b. 'Abd Allāh b. 'Abbās [q. v.].

A group of the Kaisāniya, however, did not believe in the death of Muḥammad b. al-Ḥanafiya. According to them, he lived in concealment in a ravine in the mountains of Raḍwā [q. v.] out of which he would one day emerge at the head of his followers as Mahdī [q. v.] in order to fill the earth with righteousness. His stay there is described with Messianic features by the Kaisānī poets al-Kuthaiyir [q. v.] and al-Saiyid al-Ḥimyarī [q. v.]. These views of the concealment (ghaiba, q. v.) and return (raḍj'a, q. v.) are attributed to a certain Abū Karib (Kuraib), whose followers were therefore distinguished as Karibiya (Kuraibiya) [q. v.].

According to al-Shahrastānī, all Kaisānīs held the view that religion consisted in obedience to a man; by means of allegorical interpretation (ta'wīl, q. v.) the prescriptions of law were transferred to such men. — Among the Kaisānīs also arose the view that "the intervention of new circumstances can produce the alteration of a divine decision already made" (badā', q. v.). Besides the doctrine of the return of the hidden Imām, metempsychosis (tanāsukh, q. v.) had also followers among them.

The Kaisānīs could not survive alongside of the Imāmiya [q. v.] and the Zaidiya [q. v.]. For Ibn Ḥazm the Kaisāniya was an extinct sect. — To Kaisānī influences should probably be ascribed the fact that concealment and return were attributed to 'Alids, whom the Zaidīs had championed. — A remarkable document, which is said to contain Ḳarmaṭian doctrines (see ḲARMAṬIANS) may also emanate from Kaisānī circles. In it a certain Aḥmad b. Muḥammad b. al-Ḥanafiya appears as Mahdī and Prophet (al-Ṭab., iii. 2128 sq.; Ibn al-Athīr, *al-Kāmil*, vii. 311, 16 sqq.; de Sacy, *Exposé de la religion des Druzes*, Paris 1838, i. Introd. p. clxxvii. sqq. An Aḥmad is, however, not known among the sons of Muḥammad b. al-Ḥanafiya (cf. Ibn Sa'd, *al-Ṭabaķāt*, v. 67; Aḥmad b. 'Alī al-Dā'ūdī al-Ḥasanī, *'Umdat al-Ṭālib fī Ansāb Āl Abī Ṭālib*, Bombay 1318, p. 319 sqq.).

(C. VAN ARENDONK)

ḲAIṢAR (A.), the usual name in Arabic for the Byzantine Emperor. The word, of course, represents the Greek Καῖσαρ and came to the Arabs through the intermediary of the Aramaic (cf. Fraenkel, *Die Aramäischen Fremdwörter im Arabischen*, Leiden 1886, p. 278 *sq.*). The borrowing must have taken place at quite an early period as the word in Syriac later appears almost always in the form *Ḳesar* (cf. Payne Smith, *Thesaurus Syriacus*, s. v.). The Arabs, centuries before Muḥammad, had relations with the Byzantines (cf. A. Müller, *Der Islam im Morgen- u. Abendland*, i. 10 and the article GHASSĀNIDS). Among the old Arabic poets, Imru' al-Kais in particular frequently mentions the Ḳaiṣar, who, indeed, played a great part in his life (cf. IMRU' AL-ḲAIS). The word does not occur in the Ḳor'ān but is quite frequent in the biography of Muḥammad and especially in Tradition, where Ḳaiṣar — always, we may note, without the article like a proper name — is usually mentioned in the first place among contemporary secular rulers; next to him come the king of the Persians and the Negus of Abyssinia (that the Persian Hurmuzān in al-Bukhārī, *Ṣaḥīḥ*, *Djizya*, Bāb 1 = ed. Krehl-Juynboll, ii. 292, 5 from below gives a different opinion is, of course, not to be wondered at). In the narratives mentioned a great part is played by the epistle said to have been sent by Muḥammad through Diḥya [q. v.] to the governor of Boṣrā and through him to the Emperor Heraclius, who thereupon interrogated Abū Sufyān, who happened to be within reach, regarding the new prophet. Here as well as in the story of the embassy of the Prophet to the Ghassānid al-Ḥārith b. Abī Shamir (of doubtful authenticity; cf. Nöldeke, *Die Ghassânischen Fürsten* etc., in the *Abhandl. d. Kgl. Preuss. Akad. d. Wiss. zu Berlin*, 1887, phil.-hist. Klasse, p. 42 of the reprint), Heraclius (in contrast to Kisrā) appears as a man, at heart inclined to Islām, whom only fear of his subjects prevents from openly professing the new religion. — The Traditions further record all sorts of sayings and prophesies of Muḥammad regarding Ḳaiṣar, which can at once be recognised as later views thrown back into the past. In al-Bukhārī, *Tafsīr* to sura lxvi. Bāb 2 (Kr.-J. iii. 360 middle of page) Muḥammad comforts 'Umar, who is lamenting the neediness of his existence, contrasted with the splendid court of Kisrā and Ḳaiṣar, with the words: "Art thou not content that this world belongs to them and the next to us?" In *Djihād*, Bāb 93 (Kr.-J., ii. 229 below) we read: "To the first army of my community that plunders the city of Ḳaiṣar (Constantinople) its sins are forgiven". In *Aimān*, Bāb 3 (Kr.-J., iv. 259, 6) the prophet foretells the final decline of the power of the East Roman Empire as well as that of the Persian kingdom.

In later poets also, Ḳaiṣar is still a current conception as a symbol of power and wealth — again alongside of Kisrā. Thus Ibn Djinnī (best known as a grammarian) in a verse quoted in Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, fasc. iv. 129, 4 from below, prides himself on being descended from the 'Caesars'.

Bibliography (here and in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden): Abu 'l-Fidā', *Mukhtaṣar Ta'rīkh al-Bashar*, part ed. and transl. by Fleischer as *Abulfedae Historia anteislamica*, p. 132 at end; Imru' al-Ḳais, *Dīwān*, ed. (A. SCHAADE)

ḲAISĀRĪYA (also ḲAIṢARIYA), plur. *Ḳayāsir*, the name of a large system of public buildings laid out in the form of cloisters with shops, workshops, warehouses and frequently also living-rooms. According to de Sacy, *Relation de l'Égypte par Abd Allatif* (Paris 1810), p. 303 *sq.*, the *ḳaisārīya* was originally distinguished from the *sūḳ* or *bāzār*-street probably only by its greater extent, and by having several covered galleries around an open court, while the sūḳ consists only of a single gallery. At the present day in any case the term *ḳaisārīya* is not infrequently quite or almost identical in meaning with the Persian word *kārwānserāi*, which first came into use in the nearer East in the xvith century, or the likewise modern analogous names, *khān*, *wakāla* (okella), *funduḳ* [q. v.] and *bezistān* [q. v.].

Origin. The word *ḳaisārīya* is certainly of Greek origin: καισάρεια "imperial", as abbreviation for ἡ καισάρεια ἀγορά "the imperial market". As H. Thiersch has shown, not only is the plan of the mosque — according to R. Kautzsch, however, in his *Haus und Hausrecht im alten Arabien*, Halle 1914, p. 69, the early Muslim mosque was of ancient Arab origin — to be traced to the old quadrangular court (with or without cells around it) of the *agora*, but also the *ḳaisārīya*, which was used on the one hand as a warehouse for goods (whence developed the market-place) and on the other hand, without any doubt, usually also as lodgings. The expression ἡ καισάρεια recalls the fact that the oldest of these public buildings were imperial i. e. state institutions, while in the Muslim period they were mainly due to private initiative (foundations of rich merchants, members of royal families or high officials). Thiersch thinks (*op. cit.*, p. 233) that the place where the idea of these buildings originated — like many other things in the new Muslim period — seems to have been Alexandria, which was especially rich in covered market-places and halls. Whether we should actually consider the Caesareum, the Caesar temple in Alexandria, to which the market-place and warehouses were attached (Strabo, xvii. 794), as the original in name and fact of the *ḳaisārīya* (as does Vollers in the *Ztschr. d. Dtsch. Morg. Ges.*, li. 302) is uncertain. A derivation of the word *ḳaisārīya* from the name of the Palestine town of Ḳaisārīya (see be-

low), which de Sacy (*op. cit.*) recommends, can hardly be supported with sound arguments. The word in any case was originally used only in those districts which, like Syria, Palestine and parts of North Africa had been under (imperial) Byzantine rule. The idea was only transferred later to other lands, especially to Spain and the east. In Spanish and Portuguese we find *ḳaiṣāriya* as a loan-word: Span. *alcaiceria* (*alcaceria*, *cazeria*), Portug. *alcaçarias*; cf. Fr. Cañes, *Dic. Español Latino-Arábigo* (Madrid 1787), i. 692; Dozy-Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*[2] (Leiden 1869), p. 73, 79; D. Leopoldo de Eguílaz, *Glos. etim. de las palabras españolas .... de origen oriental* (Granada 1886), p. 126.

The following notes may help to elucidate the occurrence of the word in the Islamic world. In **Egypt** we have especially good evidence of its use in Cairo. Al-Maḳrīzī (d. 845 = 1441) in his description of the city gives a large number of *ḳaiṣāriya*'s; cf. *al-Khiṭaṭ* (Būlāḳ 1270), ii. 86—91; E. Reitemeyer, *Die Städtegründungen der Araber im Islām* (1912), p. 117. Later its place was gradually taken by the word *wakāla* (*okāle*, *okelle*) and in Niebuhr's time (1761) only the market-place in the suburb of Būlāḳ was still called *Kaisarie*. — In **Fez** (see Fās, ii. 72 *sqq.*) in **Morocco** by *ḳaiṣāriya* one understands the central market shut off by gates and walls from the other parts of the town; see Dozy, *op. cit.*, ii. 432; T. Williams in the *Beitr. zur Assyriol.*, iii. 583; E. Reitemeyer, *op. cit.*, p. 148, and cf. also above, ii. 73[a] — In Granada in **Spain** the *Alcaiceria* is that quarter of the town where the raw silk is sold; see Tollhausen, *Spanisch-deutsch. Wörterb.*, i. Leipzig 1888, p. 288; F. v. Schack, *op. cit.*, ii. 327. — In **Syria** we have evidence of the use of the word *ḳaiṣāriya* as the "name of the shops of the wholesale dealers" in Beirūt (see Niebuhr, *op. cit.*, ii. 469 and K. Müller, *op. cit.*, p. 7), in Damascus (see Ibn Djubair, *Riḥla*[2], ed. Wright and de Goeje, p. 288, 21 (year 1184) and Seetzen, *Reisen durch Syrien etc.* (Leipzig 1854—9), i. 269) and also in Aleppo (see Ibn Djubair, p. 252, 15; Yāḳūt, *Muʿdjam* (ed. Wüstenfeld), ii. 307, 23; Ibn Baṭṭūṭa (ed. Paris), i. 151; A. Russell, *The Natural History of Aleppo*[2], London 1794, i. 36; German transl., i. (Göttingen 1797), p. 45). — In al-Ḥasā (Hofhūf, q. v., p. ii. 324 *sq.*) in **Eastern Arabia** the quarter of the town that contains the shops is called el-Gaiṣarīye; see *Der Islām*, viii. 32. — Going still **farther east** we find a square called *Ḳaisāriya* in Mōṣul: see Ibn Djubair, *op. cit.*, p. 235, 16; in al-Salāmiya near Mōṣul: Yāḳūt, iii, 123, 21; in Irbil: Yāḳūt, i. 186, 22; in Baghdād: see Massignon, *op. cit.*, p. 92 (the present bazaar centre); in Karbalāʾ: see Massignon, *op. cit.*; in Iṣfahān: see Ritter, *op. cit.*, ix. 49; Vullers, *Lexic. Persico-Lat.*, ii. 753*a*, and cf. also (Ispahan) Pietro della Valle, *Viaggi* (Brighton 1843), ii. 8, German transl., (Gent 1674), iii. 5; [Dupré], *Voyage en Perse* (Paris 1819), ii. 125 and W. Ouseley, *Travels in Various Countries of the East*, iii. (1819), 16; in Tibrīz: see Ritter, *op. cit.*, ix. 856; in Khwārizm (Urgandj): Ibn Baṭṭūṭa, iii. 4.

We may further note that, according to a reference in Niebuhr (*op. cit.*), about the middle of the xviii[th] century large public buildings in the **Barbary States** (N. W. Africa) were called *casseries*. In **Algiers** at the present day *ḳaiṣāriya* means barracks; see Dozy, *op. cit.* In the ruined cities of **Ḥawrān** the palaces of the erstwhile Roman or Byzantine governors are now also called *ḳaiṣāriya*; see Wetzstein, *Reisebericht über Hauran etc.* (Berlin 1860), p. 55. In general it appears that in modern times the use of the word *ḳaiṣāriya* as market-place and suchlike has to a great extent given way to newer words like *khān*, *wakāla*, *funduḳ* and *bezestān*.

ḲAISĀRĪYA or ḲAIṢĀRĪYA = Καισάρεια (Caesarea), a name bestowed in the reign of Augustus and Tiberius on a whole series of towns of the Roman East, and also in North Africa and Spain. 17 places of the name are known; see Pauly-Wissowa, *Realencykl. d. klass. Altertumswissensch.*, iii. 1288 *sq.* The Arab writers only know of two towns named Ḳaisārīya, viz.: 1. a **town in Palestine**, on the coast in 35° N. Lat. about 24 miles south of Ḥaifā. Its earlier name Στράτωνος πύργος (cf. Stark, *Gaza und die philistäische Küste*, 1852, p. 450 *sq.*; Neubauer, *op. cit.*, p. 11—15) is of uncertain etymology. To distinguish it from places of the same name, especially the north Galilaean Caesarea (Caesarea Philippi, Paneas, Bāniyās [q. v.]), this town was called more definitely Caesarea Stratonis, C. Palaestinae or C. maritima). The Arabs distinguish it by the addition of Filisṭīn (Ḳaisārīya in Palestine) from the town of the same name in Asia Minor.

The origin and antiquity of Caesarea is veiled in obscurity; but it was certainly in existence in the second century B. C. In 22 B. C. Herod I laid out a fine city, which received the name of Caesarea in honour of Augustus, on the site of the ancient settlement which had fallen into ruins (on the date cf. Otto in Pauly-Wissowa, *op. cit.*, Suppl. Heft 2, col. 68, note). Part of the plan of the new foundation was the making of a splendid harbour which gave the town a great economic importance by giving the Jews access to the Mediterranean. Caesarea rapidly developed to be the first town in the country and maintained this position for some four centuries. It was also of great importance for Christianity, which early found a footing there, as it was its spiritual metropolis in Palestine down to the time of the Council of Chalcedon (451). As late as the Arab invasion Caesarea was still a flourishing town. It vigorously resisted the advance of the Muslims and withstood them in a long siege until finally Muʿāwiya took the city by storm. The statements in the Oriental sources regarding the date of its fall and the length of the siege vary; the siege probably began in 18 (639) and ended in 19 (640)

The accounts also differ very considerably as to the number of the defenders. On the Muslim conquest see de Goeje, *Mém. sur la Conquête de la Syrie*[2], p. 166 *sqq.*; Caetani, *Annali dell' Islām*, iv. 31 *sq.*, 156—162.

Kaisāriya remained in undisputed possession of the Muslims until the First Crusade. During this it was stormed and taken by Baldwin I on May 31, 1101; see Wilken, *Gesch. der Kreuzzüge* (Leipzig 1807—1832), ii. 102—104; R. Röhricht, *Gesch. der Kreuzzüge im Umriss* (Innsbruck 1898), p. 57. Among the rich booty taken by the Christians on this occasion, the most valuable was a six-sided emerald, a vessel of green glass which was believed to have been used as a bowl of the Last Supper (this belief apparently first arose under the influence of the story of the Graal). The Genoese received those sacred relics along with a third part of the city as a reward for the services which they had rendered at its capture. The vessel is still preserved in the Cathedral at Genoa and is known as the *sacro catino*. On it see Wilken, *op. cit.*, ii. 103, 108—111; Mislin, *op. cit.*, ii. 112 *sqq.*; Fr. Kampers, *Das Lichtland der Seelen und der hl. Gral* (Cologne 1916), p. 85 *sq.*

After the battle of Ḥaṭṭīn (July 5, 1187) so disastrous for the Christians, Saladin reoccupied Kaisāriya without striking a blow; see Schultens, *Vita .... Saladini auct. Bohadino f. Sjeddadi* (Leiden 1755), p. 71 and glossary *s. v.* (p. 23). When a few years later, on Aug. 30, 1191, Richard Coeur-de-Lion occupied the city he found it in ruins. The Crusaders rebuilt the citadel in 1218. But as a result of their carelessness, the Egyptian Sulṭān al-Malik al-Mu'aẓẓam was able to recapture it within two years (in 1220). It was not till Louis IX of France took it, that Kaisāriya was again regained for the Christians. He spent a whole year (1251—1252) in it, engaged on the building of an extraordinary system of defences, notably a strong wall encircling the town. In spite of all this, Kaisāriya had to surrender after only seven days' attack to Sulṭān Baibars in 1265. The town, in which the Christians defended very stubbornly their last resort, the strong citadel, was completely destroyed after its capture; cf. Wilken, *op. cit.*, iii. 296, iv. 408, vi. 158, 303, vii. 474 *sq.*; Kugler, *Gesch. d. Kreuzzüge* (Berlin 1880), p. 387; Röhricht, *op. cit.*, p. 253. Sulṭān al-Ashraf completed the work of destruction in 1291.

The earlier Arab geographers describe Kaisāriya as a beautiful and important city strongly fortified; they particularly praise the fine fruits grown here, the woods and the running water. In Yāḳūt's time Kaisāriya was still only a village. When Abu 'l-Fidā' [q. v.] wrote (721 = 1321) it was in ruins, after the devastations wrought in 1265 and 1291. In the xviith century only a few fisher families lived here; a little later the place was quite deserted. Since 1884 the Turks have settled Bosnians there. Kaisāriya now is one of the most important ruined sites in the country west of the Jordan; numerous remains of the ancient and mediaeval city have survived. The Roman town covered an area of 400 acres, while the mediaeval — a quadrangle with walls, ditches, bastions and towers — only occupied about 1/10 of the area of the Roman site.

The harbour is now unusable; but the once great harbour buildings with the Drusus tower built by Herod are still to be traced, as well as in the southern part on the sea shore the great amphitheatre built by Herod I to hold 20,000 spectators. A little to the northeast are the remains of the hippodrome. The aqueducts are also partly preserved. The mediaeval castle, a quadrangle with a high tower, has been recently adapted by the Turks for a government office. The ruins of the city walls that still exist date from the fortifications of Louis IX. Only a few remnants are left of the great church of the Crusaders with its three naves. Much ancient and mediaeval material has been carried off in course of centuries to build other neighbouring towns. Djazzār Pasha of 'Akkā for example (d. 1219 = 1804; see above i. 1033) for his famous buildings in 'Akkā (notably the great new mosque) brought stones and pieces of buildings (especially ancient columns) from the ruins of Kaisāriya and 'Askalān [q. v.]. Kaisāriya was also used as a quarry for the rebuilding of the Franciscan monastery in Jaffa. On the ruins see especially R. Pococke (1737), *Descr. of the East* (London 1743—5), ii. 58 *sq.*, German transl. (Erlangen 1791), ii. 85—87 (with plan: copperplate V*b*); A. v. Prokesch (1829), *Reise ins heil. ḲAIṢARĪYA (in Arabic authors also ḲAISĀRĪYA and ḲAIṢĀRĪYA), a town in Asia Minor (Rūm), in 35° E. Long. (Greenwich) and 38° 15′ N. Lat. at the northern base of the Ardjish-Dagh [q. v.], 3,300 feet above sea-level on a treeless plateau, watered by the Ḳara-Ṣū, a tributary of the Ḳizil Yrmaḳ (Halys) — the latter flows about 14 miles North of Ḳaiṣariya. At the present day it is the chief town of a sandjaḳ of the wilāyet of Angora [q. v.]. The mediaeval and modern town is the successor of the ancient Mazaca, the capital of Cappadocia, to which Tiberius after its conquest gave the name Caesarea. Mazaca was a mile or two S. W. of the modern town, on the spurs of the Ardjish-Dagh, while the latter gradually grew up around the buildings which the great church-father Basilius, a native of Caesarea (329—379), erected here. Justinian I fortified this new settlement.

During the middle ages Caesarea in general shared the political history of central and eastern Asia Minor. In the viith century it passed into the hands of the Arabs, was retaken for a time by the Byzantines, but in 108 (726) again passed under Arab rule; cf. Weil, *Gesch. der Chalifen*, i. 637 and the Syriac chronicle of Dionysius of Tell-Mahrē (ed. Chabot), p. 26 *sq.* In the xith century Ḳaiṣariya was taken by the Saldjūḳs and played an important part as the second town in their empire. This was its period of greatest prosperity. In the xiith century it was the residence of the Turkish dynasty of the Dānishmendids (cf. DĀNISHMENDIYA).

In the xiiith century Ḳaiṣariya had for a considerable time to acknowledge the suzerainty of the Mongol Khāns of Persia (the so-called Il-Khāns), as is shown by the coins they struck here. Ibn Baṭṭūṭa makes special mention of the strong Mongol garrison in the town. About 800 (1398) Bāyazīd I [q. v.] took it (cf. Weil, *op. cit.*, v. 70) and it remained henceforth in Turkish hands. Ḳaiṣariya fell only for a very brief period into the power of the Mamlūk Sulṭāns, in 675 (1277) when Baibars and again in 822 (1419) when Ibrāhīm, son of Sulṭān al-Mu'aiyad advanced into this region of Asia Minor; see Weil, *op. cit.*, iv. 82, v. 140.

Ḳaiṣariya is now one of the most important towns in the interior of Asia Minor. The population of the Sandjak of Ḳaiṣariya was estimated by Cuinet in 1892 at 210,732, of whom 136,000 were Muslims, 45,318 Armenian Orthodox, 25,449 Greek Orthodox, 1,800 Protestant and 1,575 Roman Catholic Armenians. In 1813 Kinneir estimated the population at about 25,000 (including 15,000 Armenians, 300 Greeks and 130 Jews), Ainsworth in 1839 at 18,522, Cuinet in 1892 at 72,000 (43,000 Muslims, 14,400 Greek Orthodox, 9,000 Armenian Orthodox, 800 Catholic Armenians, 1,200 Protestants). In 1896 R. Oberhummer-Zimmerer put it at about 60,000, of whom 25% were Christians (including 10,000 Armenians), Baedeker in 1914 at 54,000 of whom 33% were Christians. H. Barth in 1858 estimated the number of inhabited houses at 8,000—10,000.

In the last centuries of the ancient period there must have been a strong Jewish community in Ḳaiṣariya, for the Sāsānid Sapor (Sābūr) I (241—272) is said, according to Jewish sources, to have slain no less than 12,000 Jews here about 260, in his incursion into Roman Asia Minor; cf. Ersch and Gruber, *Allgem. Encykl.*, 2nd Sect., xxvii. 184 (note 87) and Pauly-Wissowa, *op. cit.*, 2nd Series, i. 2530. In the middle ages the town seems to have been a great centre of Halakha study in Asia Minor; cf. A. Neubauer, *op. cit.*; H. Graetz, *Gesch. der Juden*[4], iv. 61, 263. The character of the present inhabitants is unfavourably criticised by several authorities (e. g. Chantre and Ramsay). During the hot months many of them live in the hills which form the last spurs of the Ardjish-Dagh.

The impression made by Ḳaiṣariya is imposing and picturesque especially on account of its beautiful situation and considerable extent. Various travellers, like Moltke (*Briefe über Zustände u. Begebenheiten in der Türkei*[6], Berlin 1893, p. 330) and Naumann have therefore considered it the prettiest and finest town in the interior of Asia Minor. Its interior is therefore the more disappointing with its filth and dirt, its numerous ruined streets and miserable cottages in the suburbs. The tuff of the neighbourhood yields excellent building material. For fear of earthquakes, the houses of the town are usually left (as Barth observes) unfinished in the upper stories.

The Arab geographers of the middle ages mention particularly among the buildings a mosque, erected in memory of Saiyid Baṭṭāl, the Turkish warrior of the faith and national hero [cf. above i. 680]. They also report that the town contained the highly venerated sarcophagus of Muḥammad b. al-Ḥanafiya [q. v.]. No remains are preserved of the important churches which existed here in the early Christian period. We find, however, important monuments of the Saldjūḳ epoch, notably the Ulu-Djāmi' of 1206, the Huen mosque of 1236 with Madrasa, also somewhat outside of the town, the round tomb or Syrtšaly Gümbet and the Kösük Oüi, a khān-like building around an octagonal tomb of 1340. The walls of the town also date from the Saldjūḳ period but have been restored at a later date. This is also true of the citadel which, now filled with Turkish houses, affords a splendid panorama.

Ḳaiṣariya is an important junction of roads and carries on a considerable trade. Local industry is limited to the manufacture of carpets and leather, the manufacture of various dyes, and (according to Barth) to the peculiar preparation of dried meat, which is sold throughout Asia Minor.

About half an hour South-West of Ḳaiṣariya rise in vineyards the ruins of the ancient Mazaca Caesarea, called by the natives Eski-Ḳaiṣariya, more usually Eski-Shehir (i. e. Old Town) and Zoezat by the Armenians. A series of not inconsiderable villages surrounds the modern town in the form of an arc from West to South-East, like suburbs. For example the little town of Talas lies 1½ hours to the South-East, the birthplace of St. Sabas († 532) with an ancient castle, powerful walls in the form of a quadrilateral, and the buildings of the American Mission (schools, hospital, etc.). ¾ hour farther to the South lies Sindjidere, where in the monastery of St. John, surrounded by well conducted schools, the Greek Archbishop lives. Talas and Sindjidere are already on the North-eastern spurs of the Ardjish-Dagh.

In the West and South of Ḳaiṣariya there was

a settlement of Christian monks at a very early period. There still exist here old monasteries and towns of caves, with churches, halls, cells and tombs. Special mention may be made of the cave-churches at Ürgüb and at the rocky cone of Matan. For further information regarding these Christian foundations see Ch. Texier, *Descr. de l'Asie Mineure*, ii. (Paris 1849), p. 53 *sq.* (and plates lxxxv.—viii.); Ch. Texier and P. Pullan, *Byzantine Architecture*, London 1864, p. 40 *sq.*; Oberhummer-Zimmerer, *op. cit.*, p. 120 *sq.*, 244—250, 298; H. Rott, *Kleinasiatische Denkmäler* (Leipzig 1908), p. 121 *sq.*, 155—170, 210 *sq.*

(M. STRECK)

ḲĀʾITBEY, AL-MALIK AL-ASHRAF ABU 'L-NAṢR SAIF AL-DĪN AL-MAḤMŪDĪ AL-ẒĀHIRĪ, Sulṭān of Egypt and Syria (873—902 = 1468—95) was purchased by Barsbey [q. v.], manumitted by Sulṭān Djaḳmaḳ, became a life-guard, then *Dawādār Ṣaghīr* i. e. writer in the office of the Grand Dawādār (see DAWĀTDĀR, i. 931), then Emir of 10 Mamlūks under Īnāl [q. v.], *Ṭablakhāna* (i. e. Emir with the right to have a band accompanying him), under Sulṭān Khoshḳadam [q. v.], inspector of houses of refreshment and shortly afterwards commander of a thousand (*Muḳaddam Alf*). In 872 (1467/8) he became *Raʾs nawbat al-Nuwwāb* (chief leader of the companies, i. e. Commander of the Mamlūks).

When Temirboghā ascended the throne in Djumādā I, 872 (Dec. 1467), he appointed his friend Ḳāʾitbey Atābek but the Sulṭān had no real power, as he had very few supporters among the Mamlūks at his command. He had not the money to win over new followers; the treasury was empty. After an unsuccessful rising by the Ustādār Khāʾirbey the crown was offered in the month of Radjab of the same year (Feb. 1468) to Ḳāʾitbey, who accepted it after some hesitation. Temirboghā retired into private life to Damietta, to which he was not taken as a prisoner but travelled in perfect liberty accompanied by some friends. Unlike other Mamlūk Sulṭāns, Ḳāʾitbey treated deposed Sulṭāns or descendants of former Sulṭāns throughout his reign with magnanimity and honour, frequently invited them to polo tournaments in Cairo, allowed them to make the pilgrimage to Mecca and even allowed them to visit the capital in his absence without any suspicion or fear of conspiracies.

Ḳāʾitbey's chief political problem was his relations with the Ottomans. The rivalry between them and the Egyptians found expression in the fighting among their vassals in Asia Minor. The ruler of Albistān [q. v.], Shāh Suwār (cf. DHU 'L-ḲADR, i. 960a) was at war with Egypt (cf. KHOSHḲADAM) and was secretly supported by the Ottomans, while Ḳāʾitbey assisted prince Aḥmad of Ḳaramān in his war with Muḥammad II. The first two expeditions sent against Shāh Suwār (872 and 873) ended disastrously through the carelessness of the Egyptian commanders and more especially the lack of discipline among their troops and the rivalry between the Egyptian and Syrian corps. Ḳāʾitbey later succeeded in depriving Shāh Suwār of the help of the Ottoman Sulṭān by agreeing to drop the assistance he had himself been giving Aḥmad of Ḳaramān. Thus weakened, Shāh Suwār was decisively defeated in 876 (1471) by the Atābek Ezbek. Shāh Suwār fell back to Zamanṭū. Besieged there he capitulated on condition that he was allowed to remain in possession of his kingdom as vassal of the Sulṭān; but he was taken prisoner, brought to Cairo and executed contrary to the laws of war. The prince of the White Sheep, Uzun Ḥasan, the ruler of Diyār Bakr and a part of Persia, was a dangerous rival to Ḳāʾitbey, and advanced from triumph to triumph; in 872 he defeated the Sulṭān of the Black Sheep and in 873 the Sulṭān of Samarḳand, but when in 876 (1471) he declared war on Muḥammad II he was defeated and thus became less dangerous for Ḳāʾitbey. He died in 880 (1475) and was succeeded by Yaʿḳūb Bey. A quarrel arose between Bayinder, the latter's governor in al-Ruhā (Edessa), and the Sulṭān's general Yeshbek, because Bayinder had given shelter to Saif, the rebel chief of the Beduins of Ḥamā. Yeshbek advanced on al-Ruhā and, although satisfaction was offered in every respect, he insisted on besieging the town, but was defeated during a sortie and killed with several of his staff; other Egyptian notables were taken prisoner. Ḳāʾitbey could not

wipe out this defeat and had to make peace, as he was threatened with a struggle with the new Ottoman Sulṭān Bāyazīd [q. v., i. 684]. Apart from continual friction regarding the ownership of Albistān, Bāyazīd felt himself threatened, because Ḳā'itbey had given a friendly welcome to his brother Djem [q. v., i. 1034 sq.], the pretender to the throne and had even encouraged him to fight against Bāyazīd. An embassy sent to Bāyazīd to endeavour to maintain peace was unsuccessful. The Ottomans invaded the southern part of Asia Minor in 891 (1486) and occupied Ṭarsūs and Adana; other Ottoman troops besieged Malaṭya. The Egyptian forces operated with success against both armies especially as Ḳā'itbey had won over 'Alā' al-Dawla, prince of Albistān. In 893 (1488) the Ottomans were no more successful. An endeavour to land a considerable body of troops in the bay of Iskanderūn [q. v.] failed. In 895 (1489/90) the Atābek Ezbek inflicted a decisive defeat on the Turks at Caesarea in Asia Minor, where several generals were captured. Ḳā'itbey showed a wise moderation in retaining his inclination for peace, recognizing the enormous resources of the Ottomans and peace was concluded in 896 (1491). The rest of the reign of Ḳā'itbey was peaceful but the domestic situation did not improve. It is true that he succeeded by his authority alone in preventing a fight between the hostile Mamlūk factions, but he could not permanently restrain their outbursts and he did not succeed in introducing a sound financial system.

Ḳā'itbey was by far the most important ruler of the Burdjī dynasty (see i. 796). He once more raised the prestige of the Mamlūk empire to a great height abroad, so that he could with good reason consider himself the first prince of Islām. For his campaigns and his buildings he required considerable means, which he could only raise by extortion, in the total absence of a regulated system of taxation. This is made a severe reproach against him by the chroniclers. In the modern view it is an obvious duty of a country to provide the necessary means for its army. It was just this lack of organised taxation that brought about the ruin of the Mamlūk empire. The Sulṭān was left to provide funds for himself by force. He either extorted them (if necessary by torture) from the high officials of the treasury, who had enriched themselves by dishonest means or "visited" the great shaikhs of the provinces and received gifts — presumably not always voluntary — from them (on one tour alone he raked in 200,000 dīnārs). He also levied contributions (e. g. to the amount of the five-monthly rental) from the real estate belonging to the pious foundations or from private individuals and forced the reservists, the Awlād al-Nās [on them cf. the article IBN IYĀS], to pay large sums in order not to be sent to the front. When the expedition planned did not take place, he gave back the money to the general amusement. He taxed Jews and Christians correspondingly. He also levied a very burdensome tax on the sale of corn. His expenses were on a corresponding scale. In the years 872—894 A. H. he expended over 7,000,000 dīnārs (70 million francs) in paying the army, a large sum for these days. His buildings as well as the renovation of older buildings required large sums. The mosque at his tomb before the gates of Cairo, the Khānḳāh (monastery) in the village of this name near the capital, the building of the castle at Aleppo, work on the mosque in Medina which was destroyed in 881 (1475/6) by a fire caused by lightning are celebrated. Although he was nearly 60 years old when he ascended the throne, he spent the earlier years of his reign in an almost feverish state of activity. Not only did he, contrary to the previous custom, daily leave the citadel for riding and excursions but he travelled round unceasingly and made the pilgrimage to Mecca and great tours of inspection to Aleppo and beyond to the Euphrates. He was able to keep his Mamlūks in control and the always rebellious Beduins in the Delta as well as the Arab tribes in Nābulus and Ḥamā. The period of his reign seemed an ideal one to the historians in contrast to those of his successors. He was of unusual, almost sadistic cruelty. He loved to be present at whippings and tortures, sometimes taking part in person; he was exceedingly strict to his son and once, as a punishment, made him live in the Mamlūk barracks and perform the most menial duties. He had only one legal wife; of his slaves the best known is Aṣil Bāī, the mother of his son Muḥammad al-Nāṣir (cf. her biography in my article in *Zeitschr. des Deutsch. Pal. Vereins* 1905, p. 191.

(SOBERNHEIM)

AL-ḲAIYĀL, AḤMAD AL-ḲAIYĀL AL-KHAṢĪBĪ, a philosopher of the third century A. H., with Isma'īlī and gnostic tendencies; al-Shahrastānī knew of works by him in Arabic and Persian; the fragments which he gives are to be compared with *Rasā'il Ikhwān al-Ṣafā*. — cf. Shahrastānī, *Milal*, Cairo 1317, ii. 17—18.

(L. MASSIGNON)

ḲAIYIM (A.), originally: "he who stands upright", then (with *bi*, *'alā*, *li* or the genitive alone): he who takes something upon himself, takes care of something or someone and hence also has authority over them. Thus we find the pre-Islāmic poet al-Ḳuṭāmī (*Dīwān*, ed. Barth, Leiden 1902, N°. 26) already speaking of a "ḳaiyim of water", i. e. apparently the man in charge of it, the supervisor, and the poet Ḥāritb b. Ṣarim (*Ḥamāsa* of Abū Tammām, ed. Freytag, p. 269, verse 2) speaks of the ḳaiyim of a woman i. e. he who provides for her, her husband. The first mentioned meaning (supervisor etc.), is then found in all possible applications, administrator of a pious foundation, of baths, superintendent of a temple, caretaker of a saint's grave, etc.; indeed, in al-Bukhārī, *Ṣaḥīḥ*, *Da'awāt*, Bāb 10 (ed. Krehl-Juynboll, iv. 189, 4), in Muḥammad's night-prayer, the expression is even applied to God as the director of heaven and earth, and this application seems also to be present in 'Omar b. Abī Rabī'a, ed. P. Schwarz, N°. 91, 11, where the poet swears by the "religion of the Ḳaiyim". Here, of course, it is most probably a question of an inversion (perhaps caused by the metre) of the Ḳur'ānic expression *al-Dīn^u 'l-ḳaiyim^u* (see below) on the model of *Bait^u 'l-Muḳaddas*. (Cf. Wright, *Grammar*^{3} ii.

§ 95 sq. and al-Ḳasṭallānī on Bukhārī, *Ṣawm*, bāb 67 end).

The meaning "provider, husband" of a woman is frequently found in the eschatological traditions, in which it is said that with the approach of the last day the number of women will increase in proportion to men, so much that there will only be one ḳaiyim for every 50 women.

The adjectival meaning "commanding" (a branch of knowledge) perhaps arises out of the same sphere of conceptions as "provider", "master"; it is found in a biographical notice of a scholar in Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, ii. 225, 16. On the other hand, ḳaiyim, also an adjective meaning "correct, right", repeatedly found in the Ḳorʾān in the expression *al-Dīn* *'l-ḳaiyim* and similar combinations may have to be semasiologically separated from the former meaning.

Bibliography (here as in the text mainly from references given by Prof. A. Fischer, Leipzig and Prof. A. J. Wensinck, Leiden): Ḳaiyim = administrator: al-Bukhārī, *al-Ṣaḥīḥ Waṣāyā*, Bāb 32 (ed. Krehl-Juynboll ii. 196, 4) and al-Ḳasṭallānī s. v.; Yāḳūt, *op. cit.*, iii. 856, 13; al-Maḳḳarī, ii. 547, 20; al-Ṭabarī, ed. de Goeje, I/ii. 814, 17; al-Ḳazwīnī, *Āthār al-Bilād*, ed. Wüstenfeld, ii. 125, 2 from below; = husband: al-Bukhārī, *op. cit.*, *Nikāḥ*, Bāb 110 (ed. Kr.-J. iii. 453, 2 from below) and *passim*; ʿUmar b. Abī Rabīʿa, *op. cit.*, poem N°. 260, 5; = correct, orthodox: Sūra ix. 36 and *passim*; xcviii. 4 and thereon al-Ḳasṭallānī's note on the quotation of this passage from the Ḳorʾān in al-Bukhārī, *op. cit.*, *Īmān*, Bāb 34 (Kr.-J., i. 19, 18). (A. SCHAADE)

AL-ḲAIYŪM (A.), one of the "beautiful names" of Allāh (see i. 303), according to some theologians the greatest name of Allāh (see *Tādj al-ʿArūs*, ix. 36, 7 from below — ult. The word is of Jewish origin and means like its prototype, the Hebrew קַיָּם, or the Aramaic קַיָּמָא (cf. Hirschfeld, *New Researches into the Composition and Exegesis of the Qoran*, London 1902, p. 69, 12 and note 89; Brünnow-Fischer, *Arabische Chrestomathie*, Berlin 1913, glossary under *ḳwm*) "the eternal". Muḥammad, who uses it three times in the Ḳorʾān (ii. 256; iii. 1 and xx. 110) may have picked it up from the Jews of Medina (the attribution of the whole of Sūra xx. as "Meccan" would then have to be revised). When late (post-Ḳorʾānic) texts e. g. al-Bukhārī, *al-Ṣaḥīḥ*, *Tawḥīd*, Bāb 24 (ed. Krehl-Juynboll, iv. 466, 12; Muḥammad's night-prayer) have the variant *ḳaiyām*, the ā in the last syllable is probably only to be regarded as another reproduction of the Hebrew *ḳāmeṣ*. The other meanings which Arab exegesists have given the word may be due to ignorance of its foreign origin (cf. *Tādj al-ʿArūs*, *l. c.*; al-Ṭabarī, *Djāmiʿ al-Bayān*, Būlāḳ 1324, iii. 5 on Sūra ii. 256).

Bibliography (here and in the text mainly from references given by Prof. A. Fischer, Leipzig): Levy, *Neuhebr. u. chald. Wörterb.*, under קַיָּם and קַיָּמָא; *Z. D. M. G.*, xliv. (1890), p. 168—171; al-Abshīhī, *Kitāb al-Mustaṭraf* (Cairo 1308), i. 5, 14 (beginning of Chap. I). (A. SCHAADE)

AL-ḲAʿḲĀʿ B. ʿAMR B. MĀLIK AL-TAMĪMĪ, an Arab general. When Sadjāḥ bint al-Ḥārith gave herself out to be a prophetess after the death of Muḥammad, al-Ḳaʿḳāʿ joined her and is said to have fought on her side. But in the period following he always retained his Muslim views, and as a subordinate of the famous Khālid b. al-Walīd [q. v.] he played a very prominent part in the earliest wars of Islām. As early as the year 11 (632) he is reported to have fought faithfully on the side of Khālid in the battle of Buzākha [q. v.] and after the capture of al-Ḥīra [q. v.] in Rabīʿ I, 12 (May/June 633) there was an encounter between the Muslims under al-Ḳaʿḳāʿ and the Persians at al-Ḥaṣīd in the vicinity of al-Anbār [q. v.] in which the latter were defeated. The exact date cannot be ascertained; according to one statement the fight was in the year 12; by others it is put in Khālid's campaign in Syria. In Radjab 14 (Aug.—Sept. 635) al-Ḳaʿḳāʿ took part in the conquest of Damascus and in the following year he commanded a squadron in the battle of the Yarmūk, which also ended in the victory of the Muslims. Special mention is made of the way in which he distinguished himself in the desperate battle of al-Ḳādisīya [q. v.] in 16 (637); Saʿd b. Abī Waḳḳāṣ was in command here, but the success is ascribed to the timely intervention of al-Ḳaʿḳāʿ. He is again mentioned among the valiant heroes who took part in the capture of al-Madāʾin in the same year, when countless booty fell into the hands of the Muslims. According to some accounts he commanded the vanguard in the battle of Djalūlā [q. v.] at the end of the same year and organised a garrison in Ḥulwān [q. v.]. He also shared in the capture of Nihāwand in 21 (641/642) and before the battle of the Camel (36 = 656) he was sent by ʿAlī to al-Baṣra to negotiate with Ṭalḥa and al-Zubair. He afterwards settled in al-Kūfa. Al-Ḳaʿḳāʿ, who is one of the favourite heroic figures in Arab legend, was also famed as a poet and celebrated his warlike deeds in several poems.

KʿAKHTA, in older spelling KAKHTĀ, sometimes AL-KAKHTĀ, the name of a place on the Kʿakhta-Ṣu, a tributary of the Euphrates, about 40 miles S. E. of Malaṭya, the residence of a ḳaimmaḳam and chief town in a ḳaḍā (circle) of the same name, which comprises the three *nāḥiyas* (communities) of Gerger, Shiro and Merdis, with a population of about 46,000 (according to Cuinet mainly Kurds; with them over 4000 Armenians) and belongs to the *liwā* (administrative district) of Malaṭya in the province of Maʿmūrat al-ʿAzīz (Kharpūt). The modern Kʿakhta which numbers only a few hundred huts with about 1000 inhabitants, almost exclusively Kurds, was famed in the middle ages for its exceedingly strong castle which, built on a steep eminence, guarded the eastern road from Sumeisāṭ to Malaṭya and was one of the frontier strongholds (*Thughūr*) of the

Muslim lands, and has again achieved fame in modern times through the discovery on the neighbouring Nemrūd-Dāghī of monuments of Antiochus I of Commagene of the first century B. C. We first meet with the name in the Oriental historians of the Crusades; in Bar-Hebraeus and Michael Syrus it is written *Gakhta*; the ancient and the Byzantine name are not known; but the bridge built in the reign of Septimius Severus about 200 A. D. over the Bōlām-Ṣu at K'akhta and the remains of Byzantine buildings on the fortress show that the place was an important frontier station, even in antiquity and at the beginning of the middle ages. The hypothesis of Ainsworth that K'akhta represents the ancient Claudias, the Ḳalawdhiya of the Arabs, is untenable (see the article ḲALAWDHIYA).

As a result of the battle of Manzikert (Melāzgird) on Aug. 19, 1071, these frontier districts were definitely lost to the Byzantine empire and became a shuttlecock between the Dānishmandoghlu of Malaṭya, the Saldjūḳs of Rūm and the Ortoḳids of Kharpūt, who disputed the ownership of K'akhta with one another and the Crusaders, who ruled in Urfa (Edessa) and Mar'ash. At the same time Armenians, who by the second half of the eleventh century had migrated into these regions in considerable bodies, had made themselves independent in various strong places like Malaṭya, Ḥiṣn Manṣūr, Gerger and K'akhta (Michael Syrus, ed. Chabot, iii. 158 *sqq.*, 198 and 205 *sq.*) and kept ground against the neighbouring Muslim rulers. To this period belongs an inscription at the citadel of K'akhta of the year 525 (1130/31) in which a certain Malik al-Manṣūr is mentioned as restorer of the defences (O. Hamdy Bey, *Le Tumulus de Nemroud Dagh*, p. 2 *sqq.*).

After Baldwin, Count of Mar'ash, and his successor Reinald had fallen in quick succession in battle with Nūr al-Dīn, the warlike Joscelin of Edessa seized their lands, which included Gerger and K'akhta; when he was captured in May 1150 by Nūr al-Dīn, K'akhta and the neighbouring strongholds like Gerger, Ḥiṣn Manṣūr, etc., fell into the hands of Ḳara Arslān of Kharpūt; Krikor, the last Armenian ruler of K'akhta, was granted another district by the victor (Michael Syrus, iii. 294 *sq.*; Chalandon, *Les Comnènes*, ii. 421, 423). Thus ended Christian rule in these regions.

On October 25, 1177, Sulṭān Ḳilidj Arslān conquered Malaṭya and drove out the last Dānishmandoghlu, who fled to Kharpūt (Michael Syrus, iii. 373) but the border strongholds like Ḥiṣn Manṣūr, K'akhta and others seem not to have been as yet occupied by the Saldjūḳs.

In the year 623 (1226) war broke out between 'Alā' al-Dīn Kaiḳobād (see KAIḲOBĀD I) and Mas'ūd, the Urtuḳid of Āmid and Mārdīn; after Mas'ūd and his allies had suffered a severe defeat at K'akhta in Shawwāl of this year, this stronghold, which had hitherto been under Mas'ūd's control, passed into the hands of the victor (Ibn al-Athīr, ed. Tornberg, xii. 300; Abu 'l-Fidā', *Ta'rīkh*, Constantinople, iii. 144; Houtsma, *Recueil*, etc. iii. 280, iv. 118 *sqq.*) and remained in possession of the Saldjūḳs of Rūm, also when they had already become vassals of the Ilkhāns. During the rising of Baba Rasūl Allāh (638 = 1240—1241), K'akhta and the surrounding country were plundered by the followers of this madman (Bar Hebraeus, *Ktābā d-Maktbānūt Zabnē*, ed. Bedjan, p. 473; *Chronik*, ed. Bruns and Kirsch, i. 517 = *Ta'rīkh Mukhtaṣar al-Duwal*, ed. Ṣāliḥānī, Bairūt 1890, p. 439) after having been devastated a few years earlier by the Khwārizmīs driven out of Rūm (Bar Hebraeus, *Ta'rīkh*, etc., p. 437 *sq.*); afterwards, under Kaikā'ūs II, it was used from time to time as a place of banishment (Houtsma, *Recueil*, etc. iv. 259, 262) and it is also mentioned in other connections (Bar-Hebraeus, *op. cit.*, p. 499, 14 = *Ta'rīkh* etc., p. 467 *sq.*, anno 1257). Munadjdjimbashi, *Ta'rīkh* iii. 271, reports that the last 'Alā' al-Dīn of Ḳonya granted a *fief* in Yighi-Eli near K'akhta to a son of 'Othmān and grandson of Ertoghrul; and Eretna, who had made himself independent as governor for the Ilkhāns in Asia Minor (728—753 = 1328—1352) ruled also in the domain of Malaṭya; on Eretna see M. van Berchem and Halil Edhem, *Matériaux pour un Corpus Inscr. Arabicarum*, Cairo 1910, p. 41 *sqq.*). In the campaigns of the Egyptian Mamlūk Sulṭāns against the Mongols, K'akhta is repeatedly mentioned (al-Maḳrīzī, *al-Sulūk li Ma'rifat Duwal al-Mulūk*, French transl. by Quatremère entitled *Hist. des Sultans Mamelouks*, ii./i., p. 61) and in 682 (1283/1284) Ḳara Sunḳor, the Egyptian governor of Ḥalab, occupied the town, which he again fortified strongly (al-Maḳrīzī, *op. cit.*; Abu 'l-Fidā', *Ta'rīkh*, iv. 18) and it is therefore expressly mentioned in the treaty of 1 Rabī' II, 684 with Leon, king of Little Armenia, as the territory of Sulṭān Ḳalā'ūn (al-Maḳrīzī, *op. cit.*; ii./i. p. 168). K'akhta seems, however, to have been temporarily lost again with other places; in connection with the Egyptian campaign against the Mongols in 715 (1315—16), in the course of which the Mamlūks conquered and destroyed Malaṭya, it is reported that the people of Ḳal'at al-Rūm, Behesnā, K'akhta and Gerger used to make raids into Muslim territory (Abu 'l-Fidā', *op. cit.*, iv. 77). Later this area must have been under the rule of the Dhu 'l-Ḳadiroghlu of Mar'ash, the vassals of the Mamlūk Sulṭāns, down to the first Ottoman conquest. When Bāyazīd I, in 801 (1398/99, according to Egyptian sources (see Weil, *Gesch. der Chalifen*, v. 70 and 74; Neshri in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xv. 352: 800 A. H.; the old Ottoman Chroniclers in Leunclavius, *Histor. Musulm.*, col. 337, 44 *sqq.*, 338, 11 *sqq.*; do. ed. Giese, p. 34 *sq.*, and 'Āshiḳ Pasha Zāde, *Ta'rīkh*, p. 74: 798 A. H.) opened hostilities against Egypt, he first of all occupied the region of Malaṭya and drove out the Turkomans, i. e. the Dhu 'l-Ḳadiroghlu, who had hitherto ruled there; on his campaign against Syria in the early months of the year 803 (1400/1401), Tīmūr conquered Malaṭya and the whole district as far as K'akhta, drove out Bāyazīd's garrisons and installed the "Turkoman" Ḳara 'Othmān (Sharaf al-Dīn 'Alī Yazdī, *Ẓafar-nāma*, Calcutta, ii. 271 *sqq.*, 278; Weil, *op. cit.*, v. 82). After Tīmūr's withdrawal, the Mamlūk Sulṭāns again entered this territory which they held till the destruction of their power by Selīm I. It is specially mentioned that K'akhta was captured by them in 820 (1417/1418; al-Maḳrīzī, *op. cit.*, ii./i. 61 note; Weil, p. 139); lastly we read in Ibn Iyās, *Badā'i' al-Zuhūr*, Cairo 1311, ii. 141, that Uzun Ḥasan seized this stronghold in 877 (1472/1473). In the report of his victory (*fatḥnāme*) from Ḥalab (end of Radjab 922) Selīm I expressly mentions the capture of Gerger and K'akhta. Under Ottoman rule it

had no longer the importance as a frontier fortress that it had in the middle ages, when it is specially mentioned as such by Abu 'l-Fidā' (*Taḳwīm*, ed. Reinaud, p. 262 sq.) and al-Dimashḳī (ed. Mehren, p. 206). Djalālzāde (middle of the xvith century) had given it a section to itself in his description of the Ottoman empire for the district of Gerger and Kiākhta (von Hammer, *Des Osm. Reiches Staatsverf.*, ii. 449); in Ewliya also (*Siyāḥet-nāme*, iv. 22) it is occasionally mentioned, but the great geographical works of the xviith century, the *Manāẓir al-ʿAwālim* of Muḥammad ʿĀshiḳ (f. 176a of the Vienna MS.) and the *Djihānnumā* of Kātib Čelebi (Constantinople 1145, p. 600 sq.) only know Kiākhta from Abu 'l-Fidā', whose statements they translate word for word; among the Anatolian Ḳaḍā's Kiākhta was placed in the outposts of the seventh stage (v. Hammer, *Gesch. d. Osm. Reiches*, ix. 8, No. 470). In the course of the last three centuries, these remote and inaccessible districts have been settled by Kurds; Kātib Čelebi, *op. cit.*, describes them as a useless, rebellious horde of highway robbers; they obeyed only their own chiefs (*bey beyleri*) and during the last century it required repeated military expeditions to restore the authority of the Porte in the region inhabited by them. In these fightings the fortress of Kiākhta also played a part, as a Kurdish Bey with his followers had entrenched himself in it; it was stormed in 1838 by Turkish troops and from this incident became known in Europe through reports of Ainsworth and v. Moltke (cf. C. Ritter, *Erdkunde*, x. 870, 874, 885 sq.). An archaeological excavation of the fortress has yet to be made; there is a brief description in Ḥamdī Bey's work on the Turkish expedition of 1883; he paid special attention to the Muslim inscriptions (still unpublished); his statements are supplemented in details by the *Sālnāme* of Kharpūt. The great iron gate, which is mentioned as early as the Saldjūḳ conquest in 1226, was brought along with the gate of the fortress of Gerger in 1882 to Diyār Bakr.

2. A town in Transbaikalia, 50° 19' N. Lat., 106° 40' E. Long., 2550 feet above sea level. Kiākhta is separated from Maimačin (Dai Ötögö) by a neutral zone of about 50 yards broad and connected with Troitskosawsk by the only high road in the district, about 3½ versts long. Lying on the Kiākhta brook (Mong. Kiakhtugorekhon) and surrounded by mountains (Burgultai = Eagle mountain) Kiākhta arose out of a Russian frontier post south of the Kiākhta brook on the Bura, a stream that forms the frontier, through the fact that here on Aug. 10, 1727 the treaty of Kiākhta was signed. The Chinese opened this point for trade between Russia and China and founded here Maimačin (trade-frontier) and the Russians the frontier post of Kiākhta. Henceforth Kiākhta has been the corridor for the exploration and penetration of Mongolia and China, for science, politics, trade (tea-trade) and commerce. Fortified with palisades, it has formed down to the present day a little republic of merchants with its own taxes (tax on tea), customs, its own administration, council of elders, fire-brigade and church. In addition to houses of stone there are still also wooden buildings in Kiākhta and great business-houses with large yards for caravans, but no shops; besides the Russian wholesale business there is the detail trade among the Mongols and Chinese. Since 1727 the famous December fair has been held annually in Kiākhta. Kiākhta is the main depot and clearing house for the so-called caravan tea. At one time rhubarb was smuggled into Russia. Now gold is smuggled into China. As a result of the treaty of Pekin 1898 and the opening of the great Siberian railway the import of tea, silk and cotton goods has considerably decreased; the export of cloths, furs and leather is rather busier. There is a steppe post and telegraph to Pekin via Urga.

KĀKŌYIDS, a dynasty, which reigned from 398 (1007) to 443 (1051) over the provinces of Iṣfahān and Hamadhān. It descends from Dushmanziyār Rustam b. al-Marzubān, a native of Dailam, who held the fief of Shahriyār and received the title of *iṣfahbadh* from the Būyid Madjd al-Dawla (cf. Ibn Isfandiyār, *Hist. of Ṭabaristān*, transl. Browne, p. 228, 230, 231, 239; Ẓahīr al-Dīn, *Taʾrīkh-i Ṭabaristān*, ed. Dorn, p. 195, 209; Mīrkhond, *Rawḍat al-Ṣafāʾ*, iv. 26).

Kākōye in the dialect of Dailam is the hypo-

coristic diminutive of *Kākū* "maternal uncle" (cf. J. de Morgan, *Mission scientifique en Perse*, v. 216, N°. 363; Riḍā Ḳulī Khān, *Farhang-i Nāṣirī*, s. v.). The surname Ibn Kākōye had been given to the founder of the dynasty, because he was the son of the maternal uncle of Madjd al-Dawla by the mother of the latter, sister of Dushmanziyār (Ibn al-Athīr, ix. 338, better explanation than p. 146), his patron.

In place of Dushmanziyār, the coins have the name Dushmanzār (cf. F. Justi, *Iranisches Namenbuch*, p. 88; genealogical table, p. 445). The dynasty consisted of five members:

1. 'ALĀ' AL-DAWLA ABŪ DJA'FAR MUḤAMMAD b. DUSHMANZIYĀR, surnamed *Ibn Kākōye*, who was the first to declare himself independent, soon after 398 (1007); he was cousin of the wife of the Būyid Fakhr al-Dawla [q. v.], mother of Madjd al-Dawla, who had him appointed governor of Iṣfahān; he seized Hamadhān (414 = 1023), Raī (419 = 1028) and Iṣfahān (421 = 1030); continual wars with the Kurds, with the *ispahbadh* of Ṭabaristān and with the Ghuzz prevented him from peacefully enjoying the possession of these places. In 420 (1029) he declared himself a vassal of Sulṭān Maḥmūd of Ghazna; in 424 (1033) he was confirmed in the government of Iṣfahān by Sulṭān Mas'ūd, who had succeeded his father; in 425 (1034) he rebelled, was twice defeated, lost Iṣfahān, tried to retake it two years later and ultimately succeeded after some time. The philosopher and physician Ibn Sīnā [q. v.] filled the ministerial office at his court, after having been dismissed from the service of the Būyid Tādj al-Dawla (Ibn Khallikān, ed. Wüstenfeld, N°. 189; transl. de Slane, i. 442); he was still minister at his death in 428 (1037). 'Alā' al-Dawla died in 433 (1041), after having built a wall round his capital in 429 (1037).

2. ẒAHĪR AL-DĪN ABŪ MANṢŪR FARĀMARZ, his eldest son, succeeded him at Iṣfahān; he fought against his brother Abū Ḥarb, who had appealed for assistance to the Ghuzz Saldjūḳs, settled in Raī; the latter was defeated. Having sought refuge with the Būyid Abū Kālīdjār b. Sulṭān al-Dawla [q. v.] he induced the latter to undertake the siege of Iṣfahān; the quarrel was terminated by a peace between the two brothers, which lasted till 435 (1044). Ẓahīr then seized the two fortresses of Kirmān belonging to Abū Kālīdjār, who in order to get them back, took Abarḳūh and defeated the Iṣfahān army. Besieged in his capital by Ṭoghrul Beg in 438 (1047) he was left in possession of his fief in consideration of paying homage till 443 (1051) when the Saldjūḳ finally obtained Iṣfahān after a long siege; he made it his capital and had the walls destroyed, saying that only a weak prince has need of walls to protect him. Abū Manṣūr received as fiefs the two cantons of Yazd and Abarḳūh. He accompanied Ṭoghrul-Beg when the latter went to Baghdād to marry the daughter of the Caliph al-Ḳā'im in 455 (1063).

3. ABŪ KĀLĪDJĀR GERSHĀSP, brother of the preceding, was reigning at Hamadhān when this town was besieged by the Ghuzz in 420 (1029). He made peace with their chief Gök-Tāsh and married his daughter; but the Ghuzz began their attacks again after the capture of Raī and forced him to take refuge in the fortress of Kinkawar. These Turks entered Hamadhān in 430 (1038); having succeeded in drawing Abū Kālīdjār after them, they attacked him but he escaped. It was immediately after this that his father 'Alā' al-Dawla surprised and defeated them. On the latter's death Gershāsp made Nihāwand his residence. Farāmarz having recaptured Hamadhān gave it as fief to his brother on condition that he had the *khuṭba* pronounced in his name. In 434 (1042) Ṭoghrul-Beg seized this town and demanded that Gershāsp should hand over Kinkawar, which its defenders refused to do. In 436 (1044) Gershāsp regained Hamadhān and declared himself a vassal of the Būyid Abū Kālīdjār; next year Ṭoghrul sent his brother Yannāl to reoccupy this town, from which the prince had fled and taken refuge among the Djawaḳān Kurds. Yannāl in 439 (1047) took Kinkawar, which was commanded by a lieutenant of Gershāsp's, 'Oḳbar b. Fāris, who, to obtain the best conditions of surrender, pretended that he still had considerable supplies. After the loss of his possessions, Gershāsp took refuge with the Būyid Abū Kālīdjār. In 441 (1049) he was in Iṣfahān and received favourably the overtures of Mawdūd the Ghaznawid who was seeking help against the Saldjūḳs, but he lost many soldiers in the desert and fell ill, which forced him to return. He died at al-Ahwāz in 443 (1051).

4. 'ALĪ, SON OF FARĀMARZ, married Arslān Khātūn, daughter of the Saldjūḳ Dā'ūd, aunt of Sulṭān Malik-Shāh, in 469 (1076). Having sought refuge in Kirmān he was given the fief of Yazd (*Rec. de Textes rel. à l'hist. des Seldjoucides*, i. 26). He was killed in 488 (1095) fighting by the side of Tutush (Ibn al-Athīr, x. 312).

5. 'ALĀ' AL-DAWLA ABŪ KĀLĪDJĀR GERSHĀSP, son of 'Alī; as prince of Yazd, he was in the service of the Saldjūḳs; he had married the sister of Sulṭān Muḥammad and of Sandjar; dispossessed of his fief, which was given to the cupbearer Ḳaradja by Sulṭān Maḥmūd, he put himself under Sandjar's protection and was present at the battle in which the latter defeated his nephew (513 = 1119). He had escaped from the fortress of Farmain, in which Maḥmūd had had him interned (*Rec. de textes rel. à l'hist. des Seldjoucides*, ii. 133).

(CL. HUART)

ḲAL'A (Pl. ḲILĀ', ḲILĀ') in Arabic the name for a fortress or stronghold built on a hill or small elevation. In Turkish it also means the interior of a city in contrast to the outer suburbs (cf. Zenker, *Türk.-arab.-pers. Handwörterbuch*, p. 707ᵃ). The word which looks good Arabic and is fairly generally regarded as a genuine Arabic word may be a loanword from Irānian. Fränkel first raised doubts as to its genuineness in *Die Aram. Fremdwörter im Arabischen* (Leiden 1886), p. 237, because it cannot be derived from any Arabic root. Quite recently A. Siddiqi, *Studien über die pers. Fremdwörter im klass. Arabisch*

(Göttingen 1919), p. 70 *sq.* has championed the Persian origin of the word. The original is considered to be the Persian *kalāt* (a fort or village on a hill), (see Vullers, *Lex. Pers.-Lat.*, ii. 859). This *kalāt*, strictly an appellative, appears at various places on Īrānian soil, especially in Afghānistān and Fārs, as a local place-name also (Kelāt, Kilāt); cf. G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 269 *sq.*, 332, 395. The form *kalāt* is of recent origin and has arisen through the addition of an inorganic *t* to the older *kalā*; cf. Andreas in the *Mitt. d. Vorderasiat. Gesellsch.* (Berlin), ii (1897), 85 *sq.* and Pauly-Wissowa, *Realencyclop. der klass. Altertumswiss.*, i. 1176. *Kalā* (also *kula*) has survived for example in place names in Māzandarān; for references see Melgunof, *Das südl. Ufer des Kaspischen Meeres* (Leipzig 1868), p. 303 *sq.* The old Īrānian form of the word must, however, have been **kalak*; this is shown by the Armenian *kʿałakʿ* (town), which is certainly of Īrānian origin, not perhaps an Aramaic loan word (from Aram. *karkhā*), which P. de Lagarde, *Armen. Studien* (Göttingen 1877), Nº. 2357 and Hübschmann in the *Zeitschr. d. Dtsch. Morgenl. Gesellsch.*, xlvii. 252 wished to make it. **Kalak* would regularly become *Kalā* (Andreas, *op. cit.*). It is still uncertain why the Arabs added an *ʿain* at the end of the word. The word certainly was borrowed very early; the prototype yielded was perhaps not *kalā*, but still the oldest form **kalak*, the final *k* of which first of all becoming *ḳ* might be weakened in pronunciation to *ʿain*. [It is also possible that the Arabs took Persian *l* as a so-called emphatic *lām*, cf. *al-ʿaskar* from *lash-kar*. Ed.]. In the Arabic linguistic area there are a fairly large number of place names, which have *kalʿa* as their first member; cf. AL-ḲALʿA, ḲALʿAT; Yāḳūt, *Mushtarik* (ed. Wüstenfeld), p. 357; al-Balādhurī, *Futūḥ al-Buldān* (ed. de Goeje), p. 533 (Index); Ibn al-Athīr, *al-Kāmil* (ed. Tornberg), xiii. 786—9 (Register); Vullers, *op. cit.*, ii. 735.

(M. STRECK)

AL-ḲALʿA. See ALCALA, ḲALʿAT BANĪ ʿABBĀS etc.

KALAH (also KALĀH, KALA, KILA and KILLAH), according to the mediaeval Arab geographers the name of an island or peninsula, which played an important part as an intermediary in the trade and navigation between Arabia, India and China. It was particularly noted for its tin-mines; it is at the same time described as a centre of trade in camphor, bamboo, aloes, ivory, etc. Its capital was likewise called Kalah; cf. e.g. al-Dimashḳī, p. 152, 11, 170, 1; al-Nuwairī (in A. v. d. Lith, *op. cit.*, (see below, *Bibl.*), p. 281; the sea washing this region, described as difficult to navigate, was called the "sea of Kalah" after it; see al-Masʿūdī, i. 370, 10, 340, 1; al-Dimashḳī; p. 152, 11, 169, 20. The identification of the situation of this territory is of importance for the history of Indo-Arabian trade. According to the statements given by the merchant Sulaimān (his journal was edited in 237=851) and Yāḳūt, a location in Further India is alone possible. The islands and peninsulas of Further India have been especially famous for centuries as producers of tin; cf. thereon Ritter, *Erdkunde*, v. 23, 24, 28, 30, 77—80, 438—439. As it is expressly stated of Kalah (e.g. by Abū Zaid al-Sīrāfī; see below, *Bibl.*) that it — at least for a time — was under the rule of the king of Zābedj (= Java; see A. van der Lith, *op. cit.*, p. 231 *sq.* and JAVA, ii. 574 *sqq.*), in identifying it, we must look in the first place to the south-western part of Further India, in the region of the Strait of Malacca. We may leave Sumatra out of this limited choice, especially as it only produces tin in small quantities and of inferior quality. The island of Bangka on the S. E. coast of Sumatra, now famous as a rich tin-producer, is to be left out of the reckoning, as the mines there have only been known since 1710 and were not worked before (cf. A. v. d. Lith, p. 263). This only leaves us the peninsula of Malacca and we would have to follow Walckenaer (in *Nouvelles Annales des Voyages*, Paris 1852, p. 19) and identify the modern town of Quedah (Queda, Kedah, Keddah) on the west coast of the peninsula in 6° N. Lat. with the Kalah of the Arab authors. The province of Quedah (on it cf. Ritter, *Erdkunde*, v. 20 *sq.*), watered by the river Kalang, which would appear to coincide more or less with the area of the "peninsula" of Kalah, is still distinguished in Malacca for its busy tin trade. The actual name of the chief town is Kadah (to-day pronounced Kedāh). Quedah is to be explained as simply a corruption through the Portuguese. In the Turkish *Muḥīṭ* of Sīdī ʿAlī (see i. 287), written about 1554 the form Kedā is found; see Bittner and Tomaschek, *Die topogr. Kapitel des indischen Seespiegels Moḥîṭ* (Vienna 1897), p. 86 and see also there the maps reconstructed by Tomaschek from the statements of the *Muḥīṭ* and from Portuguese sources (plates xxiii. and xxiv.) Queddah is at the present day an unimportant place but in earlier centuries it was a flourishing, much visited and populous harbour; see thereon Ritter, *op. cit.*, p. 25 and A. v. d. Lith, p. 261.

The identification put forward by Walckenaer is also accepted by A. v. d. Lith, p. 259, 308, de Goeje (in *De Gids*, Amsterdam 1889, iii. 297), Tomaschek, *op. cit.*, and G. Le Strange in his translation of Ḥamd Allāh Mustawfī's *Nuzhat al-Ḳulūb*, p. 104. Quatremère, *op. cit.*, p. 734 and Yule-Burnell, *op. cit.*, p. 145 consider it probable. The latter both think that Kalah might be identical with the Κῶλι of Ptolemy. But the situation required for the latter town (cf. the article *Koli* in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, xi. 1075) seems to refute this.

The equation Kadah (Quedah) = Kalah seemed to be made quite certain by the fact emphasised by Kern in A. v. d. Lith, p. 308, that Malay *d* is pronounced very like *l*; Malay *Kadah* would therefore have sounded to an Arab ear as *Kalah*. But on the other hand it should be remembered that recently G. Ferrand (see *Bibl.*) contests the plausibility of a phonetic change from *Kadah* to *Kalah*. According to his investigations, Kalah would not be Kadah at all, but is rather to be equated to Kōrah, Kra (on maps) in the northeast part of Malacca (near 10° N. Lat.).

After what has been said above we are only left with the choice between Kādah or Kōrah (Kra) on Malacca for the identification of the Kalah of the Arabs. The other attempts to locate the position of Kalah — on Ceylon (harbour of Ghāli, Galle, Pointe de Galle; so Reinaud and Dulaurier), Malabar (so Renaudot; see Ouseley, *op. cit.*), Coromandel (so Gildemeister) — should now be definitely rejected as wrong.

Besides Kalah we find occasionally in the Arab geographers also Kalah-bār, e. g. in the voyage

of the merchant Sulaimān (Reinaud, *Relation*, etc. ii. 18, 17) and in al-Masʿūdī, i. 5, 3). Reinaud wished to separate this from Kalah entirely and connect the name with Coromandel, or rather its older Sanskrit form (which Gildemeister had already compared with Kalah). But that so far west a location for Kalāh-bār is excluded is shown by Sulaimān's reference, according to which Kalāh-bār (like Kalah, see above) was a dependency of the king of Zābedj (Java); Kalah and Kalāh-bār are probably identical as Quatremère, *op. cit.*, p. 733 *sq.* and A. v. d. Lith, p. 258, 253 have said. What -bār means in Kalāh-bār is quite uncertain; the explanations of Sulaimān (*as* = *mamlaka* = kingdom) and of al-Masʿūdī (= sea) arouse little confidence.

Most probably it is from the district of Kalah in Malacca discussed above — whether it is Kēdah or Kērah (Kra) — that tin gets the name *ḳalʿī* = "the Kalaʿite" in Arabic. Like the Persian *kilʿa* (*ḳalʿa*; see the art. ḲALʿA) the Arabs usually reproduced Kalah by Ḳalʿa; hence the nomen relativum *ḳalʿī* (*ḳalaʿī*). The somewhat fanciful observation of the traveller Misʿar b. Muhalhil (in Yāḳūt, ii. 862, 5; al-Ḳazwīnī, ii. 60, 23; Schlözer, *op. cit.*, p. 18 *sq.* that tin is called *ḳalʿī* from the fort (*ḳalʿa*) of Kalah, on which alone mines of this metal existed may be described simply as an attempt to explain the form *ḳalʿī* (with *ḳ*). Besides Kēdah and Kērah, Kēlang, Klang, a district in Selangor in Malacca might possibly come into consideration; cf. thereon the article ḲALʿĪ as well as for the relationship of *ḳalʿī* to the Malay *kaling* = tin.

This same al-Ḳalʿa, which was said to be the site of a very fine tin-mine, is usually regarded by the Arab geographers and lexicographers as the place of manufacture of a celebrated kind of Indian sword, called *ḳalʿī* (*ḳalaʿī*) to distinguish it. (Further information in article ḲALʿĪ).

ḲALʿA-I SEFĪD. See ḲALʿE-I-SEFĪD.

ḲALʿA-I SULṬĀNIYE. See ḲALʿE-I-SULṬĀNIYE.

KALĀM ("speech") is defined by the grammarians as such utterance (*lafẓ*) with the voice as is compound (*murakkab*), not single words, and which conveys a meaning by convention, not nature (*waḍʿ*, not *ṭabʿ*, as in exclamations; *ḳām* not *ḳām*). So the *Adjurrūmīya*; the *Mufaṣṣal* (§ 1) says it must be a complete sentence, however simple, and Ibn ʿAḳīl (*Sharḥ al-Alfiya*) distinguishes in detail between it and *kalim* (a compound of three or more words, not necessarily giving a complete sense) and *kalima* (a single word with a meaning by convention) and *ḳawl* which covers them all. The *Dict. of the Techn. Terms* (pp. 1268—1270) gives a thoroughly scholastic discussion of *kalām* and its parts, phonetically, grammatically, lexicographically, rhetorically. See, also, De Sacy in *Anthol. Gramm.*, Arabic text, pp. 73 and 93 and notes. In lexicography *kalām* is a generic noun for speech, little or much (al-Djawharī in *Ṣaḥāḥ* and *Lisān*, xv. 428), applying to every kind of talk, *li-kulli mā yutakallamu bihi* (Ibn ʿAḳīl), or an expression for successive sounds (*aṣwāt*) giving an intelligible meaning (al-Faiyūmī, *al-Miṣbāḥ*). This is the actual usage of the root in the language. Thus *bi-kalāmī*, said by Allāh to Mūsā (Ḳur. vii. 141) is paraphrased by al-Baiḍāwī (ed. Fleischer, i. 345 *infra*) *bi-taklīmī* iyyāka, "by my speaking to thee", and on Ḳur. xlviii. 15, al-Baiḍāwī says that *kalām* is an *ism* for *taklīm* (ii. 268, 14). In the remaining two occurrences, *kalām Allāh*, Ḳur. ii. 70, is ambiguous and may mean either Allāh's actual speaking to Mūsā or the Law, while in Ḳur. ix. 6, it seems to mean clearly the content of *kalām*. The 2nd stem of the verb is used fre-

quently in the Ḳur'ān in the sense "to speak to" some one with the accus. of the person addressed (al-Ash'arī *al-Ibāna*, ed. Haidarābād, p. 27, says that *taklīm* means *al-mushāfaha bil-kalām*) and the 5th stem occurs four times (xi. 107, xxiv. 15, xxx. 34, lxxviii. 38) in the neuter sense "to speak, talk, discuss" with a *bi* of the subject discussed; in xxiv. 15 appears a shade of contemptuous reference, mere "talking with the mouth" (cf. Dozy, *Suppl.*, ii. 486a). In the later development *kalām* came to mean the statement of an intellectual position or an argument upholding such a statement, and a *mutakallim* was a person making use of such *kalām*'s; so *passim* in the *Fihrist*. By al-Mas'ūdī (*Murūdj*, Paris ed., viii. 161) *takallum* is used of the "patter" of a public story-teller and mimic by the roadside.

II. The first technical use of *kalām* seems to have been in the phrase *kalām Allāh*, meaning either the Ḳur'ān or Allāh's quality (*ṣifa*) called Speech. For these applications the way was prepared in the Ḳur'ān passages already quoted. But the order in which they came and the influences which produced them are still, like all the beginnings of Muslim theology, exceedingly obscure, and we are not yet in a position, in spite of Horten's collection of materials in *Die philosophischen Systeme der spekulativen Theologen im Islam* (Bonn 1912) even to sketch their development. It seems clear that the Muslim thinkers were affected (i) broadly by the conceptions, classifications and dialectic of Greek philosophy; (ii) much more minutely by personal intercourse and discussion with the theologians of the Oriental Christian Church and (iii), perhaps, by some ideas of the Indian philosophical schools. The last influence has been suggested tentatively by Horten, especially at several points in his *Systeme*; but he has not supported it by any detailed references or translations from Indian literature; it remains, therefore, a bare, although very possible suggestion; cf. further on it Massignon's review in *Der Islam*, iii. 408. The idea of representing the problem of the personality of Allāh as a combination of a *dhāt* or essence with *ṣifāt*, or "qualities", seems partly due to the methods of Greek theories of personality, partly to the Ḳur'ānic rhetoric which, following the fashion of the old poetry, describes Allāh by means of epithets, and partly to Christian explanations of the relation of the persons in the Trinity. The problem, however, remained of the relation between these qualities and the essence, and was eventually given up by orthodox Islām which took refuge in the statement, "they are not He (i. e. Allāh himself), nor are they other than He"; this was an admission that the relationship was a theological mystery, ungraspable by human thought. These qualities, further, were uncreated and eternal; the personality of Allāh was unthinkable without them. But rationalistic Islām, later the Mu'tazilites could not admit such a mystery and tended to reject the qualities as having necessary relationship to the essence. In these discussions the quality "Speech" was evidently prominent, and on it the influence of the Christian theologians was peculiarly felt. It is never represented by an epithet in the Ḳur'ān, i. e. Allāh is never a Speaker, *mutakallim* or *kalīm*, although the later theologians used *mutakallim* frequently of him, and there is only one certain use of *kalām* for the actual Speech of Allāh (Ḳur. vii. 141); but Allāh is represented again and again by means of verbs as "speaking", and al-Ash'arī (*al-Ibāna*, p. 23 *sqq.*) quotes over ten passages, using different expressions, as bases for the doctrine that both the Speech of Allāh, as a quality inherent in Him, and the Ḳur'ān as a manifestation of that quality are uncreated. These passages, it may be said, give distinctly the impression that the doctrine was historically reached through other means, or arose by other causes, and that these proof-texts were then sought as a Ḳur'ānic basis. The rationalistic theologians, on the other hand, denied the possibility of a material, yet uncreated, manifestation of the eternal quality of Speech. Thus when Allāh spoke to Mūsā (Ḳur. iv. 162; vii. 139 *sqq.*; xx. 8 *sqq.*; xxviii. 30) from the tree (*shadjara*) they held that the sound of the words was created in the tree as a *maḥall*, and was therefore a state (*ḥāl*) in it (cf. Goldziher on Fakhr al-Dīn al-Rāzī in *Der Islam*, iii. 245 *sqq.*). This the later Ash'arites met by explaining that Mūsā did not hear this Speech as an ordinary act of hearing, but spiritually and as coming from every direction and perceived by every one of his organs. It was thus received in his sensorium by the *ḥiss al-mushtarak*, the Aristotelian "common sense" (al-Baiḍāwī on Ḳur. vii. 139, xx. 12; ed. Fleischer, i. 341, 9, 593, 1). Further, it was recognized at least as early as al-Ash'arī (*al-Ibāna*, p. 25) that this Speech must go on without ceasing, for the quality is perfect and silence would be an imperfection in it. The Ḳur'ān (xviii. 109; xxxi. 26) and traditions (*al-Ibāna*, p. 25) speak also in violent metaphors of the *kalimāt*, separate words of Allāh, as being numberless; from all eternity Allāh has been speaking. But al-Ash'arī protests (*op. cit.*, p. 41) against the application of the term *lafẓ*, verbal utterance, to the Ḳur'ān; that is not seemly even in the case of our recital of it. Similarly the *Lisān* (xv. 427, 11) says that you must not call the Ḳur'ān *ḳawl Allāh*. Al-Ash'arī does not seem himself to have reached the position of the later Ash'arites that the Speech of Allāh is thinking, at least "ideas in the mind", *kalām* or *ḥadīth nafsī*, and therefore can go on without letters or words. Al-Ash'arī's desire was only to protect the Ḳur'ān arbitrarily from any approximation to the transitory and created, and he had not thought out what his position meant. The numberless *kalimāt* of Allāh are still speech but not like our utterance with the mouth. In part they are His creative acts, as He creates by the single word, *kun*, "come into being!" See further under KALIMA.

For the later orthodox theologians the proof of the *kalām* of Allāh was simplified down to an *idjmā'* [*q. v.*] of all peoples that Allāh has spoken to the prophets and must therefore be a speaker, possess a quality of Speech; see, e. g. al-Taftāzānī's comm. on the *'Aḳā'id* of al-Nasafī, Cairo 1321, p. 75 *sq.* Its nature has been indicated above. But the relation of this quality to the *kalām Allāh* of the Ḳur'ān was still to be defined. The Ḥanbalites continued to avoid any closer definition as al-Ash'arī had done; it was the uncreated, eternal Speech of Allāh, and that was an end of it. Some even tried to transfer its uncreated character to the very material on which it was written. For the Mu'tazilites it was simply created, like the words which reached the ears of Mūsā. The Ma-

taridites followed their normal method in dealing with theological mysteries, of putting the two elements flatly side by side and attempting no solution. Al-Nasafī (*ʿAḳāʾid*, p. 79) says: „The Ḳurʾān, the Speech of Allāh, is created and it is written in our copies, preserved in our hearts, recited by our tongues and heard by our ears. Yet it does not reside (*ḥāll*) in them". Al-Taftāzānī, as an Ashʿarite, suggests as an explanation that the word "fire" written on a piece of paper does not have in it the burning quality of fire and consume the paper.

The later Ashʿarite view of this relation may be given in the words of al-Faḍālī (d. 1236 = 1821; see AL-FAḌĀLĪ) in his *Kifāya* (ed. 1315 with al-Bādjūrī's comm., p. 50). "These Glorious Expressions [the words of the Ḳurʾān] are not a guide to the eternal quality in the sense that the eternal quality can be understood from them. But what is understood from the expressions equals (*musāwī*) what would be understood from the eternal quality if the veil were removed from us and we were to hear it"; apparently the distinction between ἐκφώνησις and ἐκφώνησις. Thus the wording of the Ḳurʾān is created, and al-Faḍālī has even a shade of doubt whether that wording goes back to the Preserved Tablet, that is to Allāh, or is due to Djibrīl or even to Muḥammad. Similarly Ibn Ḥazm [q. v.] reports (*Milal*, ed. Cairo, 1317, p. 221 *infra*) that this was the Ashʿarite doctrine even in his time and especially of al-Bāḳillānī [q. v.] and that their formula was that the Ḳurʾān was the *kalām* of Allāh only in the sense that it was an *ʿibāra*, an "expression" for the *kalām* of Allāh. Similarly in *al-Fiḳh al-Akbar*, ascribed to Abū Ḥanīfa (d. 150) with a comm. by al-Māturīdī (d. 333), the word for this relation is already *ʿibāra* and also *ḥikāya*, "reproduction" (Ḥaidarābād 1321, p. 23). There is a very complete analytical and objective, but not historical, statement of the different positions in the *Mawāḳif* of al-Īdjī with comm. of al-Djurdjānī, Būlāḳ 1266, p. 495.

In this the influence of Christian theologians seems plain. The parallel between the uncreated but creating Logos, the reason and word of God, with its earthly manifestation in Jesus and this *kalām*, as eternal quality, as creative agency and as revelation in time is very close. The position of the Ashʿarite school that the quality is practically the thinking of Allāh, although they carefully guard against confusion with *our* "thoughts" which originate in time (al-Faḍālī, p. 32) suggests the rational side of the Logos, the Hebrew חָכְמָה, the divine σοφία. But it is not allowable to ascribe *ʿaḳl*, νοῦς, to Allāh because of philosophical and etymological implications; cf. *Mawāḳif*, ed. Cairo, p. 541, ed. Sörensen, p. 161, ʿAḍā, and al-Baiḍāwī on Ḳur. ii. 41, ed. Fleischer, i. 57, 13. The Christian theologians naturally translated their Syriac *meltḥā*, ὁ λόγος with *al-kalām*. On Christian influence in Muslim theology see further in Graf, *Die arabischen Schriften des Theodor Abu Ḳurra* and the various articles cited by Horten in his *Philos. Systeme*, p. 626; especially C. H. Becker, *Christliche Polemik u. islamische Dogmenbildung* in *Zeitschr. für Assyr.*, xxvi. 175 *sqq.*

III. It is not an overhazardous conjecture that similar influence worked in developing the use of *kalām* = theology and of *mutakallim* = theologian. The Syriac *mallel* (= *takallama*) and its derivatives were parallel to λέγω and λόγος on both sides of their meanings of reason and speech. Thus *mʿmallel alāhāyūthā* meant θεολόγος and *mellia*, λογικός. Starting, therefore, with *kalām* = speech, the development was easy to intellectual argument, especially as applied to theology. How much in the dark Muslims were on the origin of this use is evident from the eight explanations which al-Taftāzānī gives (comm. on al-Nasafī, p. 10 *sqq.*): (i) Theologians begin, "The *kalām* (statement, argument) on such and such a doctrine is ..." (ii) Deals most with doctrine of Speech of Allāh. (iii) Gives same weight to Speech in theology as philosophers give to *manṭiḳ*, logic. (iv) Most essential of sciences taught by speech. (v) Speech between opponents necessary to it rather than consideration or reading. (vi) The most disputatious of the sciences taught by speech. (vii) For its weightiness it is *the* "statement" as opposed to other sciences. (viii) The cutting, impressive science from *kalm* = *djarḥ*. Ibn Khaldūn, (see below) gives only two explanations: (i) That the science deals with speech only and not action (*ʿamal*). (ii) The same as (ii) above; cf. further Haarbrücker's translation of al-Shahrastānī's *Milal*, i. 26, and remarks, ii. 388—393.

But *kalām* came only slowly to be the name for theology. At first, *fiḳh*, "intelligence", was used for the whole speculative side of theology and canon law, as opposed to *ʿilm* for the traditional side [see FIḲH]. Then theology came to be called "the greater *fiḳh*", *al-Fiḳh al-akbar*, as in the book ascribed to Abū Ḥanīfa and al-Māturīdī, referred to above. There, p. 6, it is said, "*al-fiḳh fi'l-dīn afḍal min al-fiḳh fi'l-ʿilm*", which would have been expressed later, "*kalām* is more excellent than *fiḳh*". *Kalām*, in that book, is not used technically except for the Speech of Allāh, *ḳawl* generally taking its place; in the *Ibāna* of al-Ashʿarī [q. v.] *kalām* occurs, similarly, only in titles to sections. But in the *Fihrist* (c. 377—400) *kalām* is used normally in the sense of "statement" and also technically, with *takallam* and *mutakallim*, of theology; while *fiḳh* is used, as regularly thereafter, of canon law. But there followed speedily a further development: *ʿIlm al-Kalām* came to mean not simply theology, but scholastic theology of an atomistic type, going back most strangely to Democritus and Epicurus, and a *mutakallim* came to mean a theologian, first Muʿtazilite and later orthodox, behind whose theology lay the atomistic system which was Islām's most original contribution to philosophy. The importance of this conception of the matter of the universe, as being of a grained structure and not infinitely divisible and continuous can hardly be over-emphasized. In Europe, until the xviith century, it was eclipsed by the authority of Aristotle; but it re-appeared then, first in a qualitative form (Boyle and Newton) and later quantitative (John Dalton). It would be curious to contrast the experimental researches of these with the a priori speculations of Islām. A *mutakallim*, then, was thus distinguished, although calling himself an Ashʿarite, from the Hanbalite conservative traditionalists among whom al-Ashʿarī had reckoned himself, from the mystics who found their basis in religious experience (*maʿrifa*; *khawāṭir* and *wāridāt* in *Fihrist*, p. 183, 12) rather than in *ʿilm* and dialectic, and from the philosophers (*ḥukamāʾ*) who based upon a blend of

Aristotelian and Neoplatonic philosophy; although all these might profess to hold the same doctrines of the Sunnite faith. This leaves out of account, of course, the Shī'ite system, a structure of Mu'tazilite rationalism erected on the doctrine of *ta'līm*, i. e. that the ultimate basis of our knowledge is not reason but authoritative instruction by an inerrant guide, always in the world, whom man must seek and obey (cf. e. g. al-Ghazālī's *Munḳidh*, ed. 1303, pp. 21 *sqq.* and Goldziher's *Streitschrift des Gazālī gegen die Bāṭinijja-Sekte, passim)* and the pantheistic side of Ṣūfīism which is not really Muslim at all, except in vocabulary and imagery.

It is a great misfortune that the beginning of the vth *Maḳāla* of the *Fihrist*, which deals with *Kalām* in this sense, is lost, and with it the account of the origin of this science, and that the first *fann*, especially, has reached us in so hopeless a condition (Houtsma, in *Zeitschr. für die Kunde des Morgenlandes*, iv. 217—235, essentially supplementing Flügel's ed.). Yet it is clear that the author divided the *mutakallim*'s of his day (end of ivth. cent. of H.) into five: (i) Mu'tazilites; (ii) Shī'ites, both Imāmites and Zaidites; (iii) Predestinarians and Anthropomorphists; (iv) Khāridjites; (v) ascetic Ṣūfīs. This arrangement may be due to the Shī'ism and, therefore, Mu'tazilism of the author; but the Mu'tazilites were certainly the first *mutakallim*'s. He places al-Ash'arī in the third class and has evidently no idea of the importance of his school — he seems to have been a joke (p. 181, 16): yet he died c. 330. Nor is there any mention of al-Māturīdī who had died 333. Al-Bāḳillānī died 403, four years after the last date in our MSS of the *Fihrist* (Flügel's preface, p. xii). Certainly the author of the *Fihrist* grievously misread the future, for in his third class lay orthodox Sunnite Islām. Of his fourth class only the Ibāḍites [q. v.] continued to have any importance. Nor does he show any idea of the speculative possibilities in his fifth class.

We cannot, as yet, write a connected history of the atomic theory of Islām, the essential *differentia* of the system of the *mutakallim*'s, and it may never be possible. We have only references to and short quotations from the earlier disputants upon that system. Even the extant writings of al-Ash'arī do not give us any help, and we have, so far, none of al-Bāḳillānī's writings, which probably would. Fortunately Horten has gathered up and untangled, with great diligence, in his *Philosophische Systeme* the later references and quotations, and from these it would appear that the Mu'tazilite Abu 'l-Hudhail al-'Allāf (d. 235 or 226; cf. ABU 'L-HUDHAIL and Horten, pp. 246 *sqq.)* was the founder of the atomic school and was opposed in it by two other Mu'tazilites, Hishām b. al-Ḥakam (d. 231 (?); cf. HISHĀM and Horten, pp. 170 *sqq.)* and al-Naẓẓām (d. 230; Horten, pp. 189 *sqq.*). It thus arose among the Mu'tazilites, however it may have reached them; but we cannot be sure to what extent their system was exactly that which lies behind all the reasonings of the later *mutakallim*'s. It is unnecessary to describe the system here, as it has already been given under ALLĀH, i. 307 *sqq.* It may, however, be worth while to give the following references to Horten where he deals especially with it, pp. 22 *sqq.*, 42 *sqq.*, 178, 191, 246 *sqq.*, 263 *sqq.*, 526, 551. Pp. 195, 235, 236 make it plain that the division of time into atoms, which could not be further divided, i. e., that time is not endlessly divisible, goes back to Zeno's paradox of Achilles and the tortoise; it was a solution of that paradox and made motion possible; cf. William James, *A Pluralistic Universe*, p. 228—231. Ibn Ḥazm in his *Milal*, because of his very hostility, has given us particularly full accounts, e. g. v. 92 *sqq.* But in the nature of the case it is not probable that the earlier disputants put their discussions into permanent written form, and still less permitted copies to be freely made and spread abroad. We have the classic case of al-Djunaid (d. 297 = 909), a very great theologian and ascetic Ṣūfī, on whom no shadow of real suspicion of heresy ever fell, but who openly said that the seeker of the divine Reality might expect to be called a heretic (Goldziher, *Vorlesungen*, p. 175; see, further, al-Ḳushairī, *Risāla*, Būlāḳ 1290, pp. 139 *sqq.* and DJUNAID, above, i. 1063). When he discussed questions of *tawḥīd*, that is the doctrine of the person of Allāh, with his students, it was behind closed doors. We can hardly imagine that these discussions were concerned with such questions as are in al-Ghazālī's *al-Risāla al-Ḳudsiya* or *al-Iḳtiṣād*, or even al-Taftazānī on al-Nasafī; they must have cut much deeper and have been like those which Ibn Ḥazm has exposed to us with malicious indignation, dragging those Godless *mutakallim*'s from behind their closed doors. In reply the *mutakallim*'s would have protested that he was not playing the game and did not understand their object. The Mu'tazilites preceded the orthodox theologians in open publication. We still have the *Masā'il* of Abū Rashīd, a Mu'tazilite, who wrote about 400 (1009) (Horten, *Philosophie des Abu Raschīd*; Arthur Biram, *Atomistische Substanzenlehre)*. Al-Ghazālī, at a somewhat later day, actually did put such discussions into writing in his two *al-Maḍnūn*; but it was on the basis of Neoplatonic philosophy and not of atomism (see below).

In the *Muḳaddima* of Ibn Khaldūn (d. 808 = 1406) we get another view of this development, about four centuries later than the *Fihrist* (Quatremère's ed., iii. 27—43; Būlāḳ, 1274, pp. 223—228; trans. De Slane, iii. 40—64). In Quatremère's text (pp. 44—59; trans. De Slane, pp. 64—85) there follows a section on the *mutashābih* passages in the Ḳur'ān which is not found in some of the MSS., nor in the Būlāḳ editions. Ibn Khaldūn evidently added it later from a perception (i) that his view of these passages was essential to his general position and (ii) that he had not dealt fully enough with some of the theological matters of controversy. He traced, in fact, the origin, in great part, of the science of *Kalām*, viewed as defensive scholasticism, to these ambiguous and obscure passages; it sprang, thus, more from exegetical than from philosophical pressure. There is certainly truth in this; but it seems also certain that the early Muslim theologians, under the influence of outside ideas which were pressing in upon them, made use of the obscure verses to secure a possible footing in Islām for these outside ideas. In this they were greatly aided by Muḥammad's own confused thinking, and also by a certain largeness of conception and width and freedom of ideas which belonged to his greatness; he had not been a metaphysician; but a keen psychologist. But it is especially characteristic of Ibn Khaldūn's position, and in striking contrast to his otherwise

openmindedness and genuinely scientific spirit, that he rejected all *ta'wīl*, or elucidation, of these passages as absolutely as Aḥmad b. Ḥanbal or al-Ash'arī themselves. He interpreted Ḳur. iii. 5 (cf. al-Baiḍāwī, ed. Fleischer, i. 146, 1) as meaning that only Allāh knew their meaning and that man should abstain from useless speculation. He thus secured a method of practically throwing out all the passages of the Ḳur'ān which did not suit his view of the universe, e. g. those speaking of the *djinn* [q. v.], and also, which was worse, set up a limit to man's investigation of the world.

Kalām having thus arisen from these difficulties, or impossibilities, of exegesis, the different sects developed according as the anthropomorphic Ḳur'ānic expressions bearing on the essence (*dhāt*) of Allāh or on his qualities (*ṣifāt*) were treated literally (*tashbīh*, *tadjsīm*) or as having a meaning different in his case from the literal and unknown to us (*tanzīh*) or according as *tanzīh* was applied also to the other descriptives of Allāh, the meanings of which were quite plain and possible in the literal sense because they all expressed ideas apart from the concrete. This last was the position of the Mu'tazilites, between whom and the first sect, the anthropomorphists, stood the sect which professed to follow the doctrine of "the Fathers" (*al-salaf*). So the orthodox party was driven to the use of rational proofs (*adilla 'aḳlīya*) and there arose al-Ash'arī who combined *'aḳl* and *naḳl*, denied *tashbīh*, establishing "the qualities consisting of ideas" (knowledge, power, will, life), and limited *tanzīh* as the *salaf* had done. He also established "hearing" and "sight" and "the speech which exists in the mind" (*al-ḳā'im bi'l-nafs*). He also discussed (*takallama*) with the Mu'tazilites their ethical position (*aṣlaḥ*, *taḥsīn*, *taḳbīḥ*) and eschatology and future rewards and punishments. He discussed with the Imāmīya the principle of government, and demonstrated that it was not a part of the Faith, but a convenience upon which the people had agreed. With all this compare and contrast Goldziher in *Vorlesungen*, pp. 119 *sqq.* The next great name given is that of al-Bāḳillānī (d. 403) [q. v.]. He reduced the whole to a system and established the intellectual basis and arranged the arguments. Thus he established the atom (*al-djawhar al-fard*) and the void (*al-khalā'*) — it is to be noticed that *djawhar* with the Aristotelian Neoplatonists means "substance" in the philosophical sense, and that *al-khalā'* is exactly the Lucretian *inane*, that an accident (*'araḍ*) cannot subsist in an accident and that it cannot continue through two atoms of time (see also, Ibn Khaldūn, ed. Quatremère, p. 114; De Slane, p. 157). So he made these principles only secondary in importance to the articles of the Faith, because he held that the nullity of an argument meant logically the nullity of the thing which it proved, and the converse. These principles were arguments for the Faith; the Faith was true, therefore these principles must be true. It is evident that formal logic was not the strong point of those who built up this system, however ingenious it might be; and that Ibn Khaldūn remarks. And it is further evident that with al-Bāḳillānī the historical value of Ibn Khaldūn's outline begins. He makes no mention of Ibn Ḥazm [q. v.], a theological free lance, who died in 456; but he gives the titles of two of the books of the Imām al-Ḥaramain (al-Djuwainī, q. v., d. 478), a teacher of al-Ghazālī, apparently because of his reputation although no distinctive development is attached to his name. Immediately after him the science of formal logic was taken up by the theologians who had discovered that it was only a tool for thinking and not a part of philosophy. But this led to an examination of their foundations and to the rejection of a great part of them; so that they no longer argued, as al-Bāḳillānī had done, from the nullity of the proof to the nullity of the thing proven. Their new proofs were derived, to a considerable extent, from the physics and metaphysics of the philosophers, and thus they entered upon a new method which was called *ṭarīḳat al-muta'akhkhirīn*; yet they also introduced into it a considerable amount of opposition to the philosophical positions because these seemed to be the same as their own earlier heresies. Leaders in this new school were al-Ghazālī (d. 505) and al-Rāzī (d. 606; see on him especially Goldziher in *Der Islam*, iii. 213—247) and to their books Ibn Khaldūn would still send the student of theology who wished guidance in his criticism of the philosophers, although there was in them some amount of opposition to the older method. It is to be remembered, too, that al-Rāzī was a systematic user of *ta'wīl* (Goldziher, p. 227) of which Ibn Khaldūn disapproved. But such students as wished simply to follow the path of the *salaf* in theology should take the old method of the *mutakallim's* — only there could true *'ilm al-kalām* be found — and especially should study the *Irshād* of the Imām al-Ḥaramain. This apparently means that with al-Ghazālī there came a sharp abandonment of the method of the atomists and a going to school instead with the Aristotelian Neoplatonists. Such, too, is certainly the evidence of al-Ghazālī's writings. After al-Ghazālī and al-Rāzī came still deeper confusion between theology and philosophy, until the subject matter of the two was regarded as one. Yet the *mutakallim's* had distinguished sharply the physics and metaphysics of the philosophers from their own theocentric position, using an intellectualist system in defence of dogmas laid down by divine authority. He gives as an example of this confusion the *Ṭawāli'* of al-Baiḍāwī (d. 685 = 1286) and every user of al-Baiḍāwī's Ḳur'ān commentary will recognize what he means. The learned of Persia (al-'Adjam) who followed al-Baiḍāwī had used the same method in all their works. Of the kind of *Kalām* that was left in his own day Ibn Khaldūn had no good opinion; its ambiguities (*iḳdāmāt*) and generalities (*iṭlāḳāt*) were a profanation of the Creator rather than a defense. And no *Kalām* was longer needed; it had been a defense against the Mulḥida and the Mubtadi's and they were extinct. But it was rather disgraceful for one who knew the Sunna by heart not to be able to give a reason for the faith that was in him.

Yet *Kalām* had still a long course to run, and the commentary of al-Baidjūrī on the short treatise of al-Faḍālī, already referred to, gives a good idea of the development of the system of the *mutakallim's*. Text and comment are quite modern — al-Faḍālī died in A. D. 1821 and al-Baidjūrī in A. D. 1844; they are finished scholasticism and the title, *Kifāyat al-'Awāmm fī 'Ilm al-Kalām*, "The Sufficiency of the Commonalty in the Science of *Kalām*", with reiterated statements in the text that only so much is given as is necessary for sal-

vation, shows a purely intellectual view of religion. The commentary is based throughout on atomistic reasonings; the physics and the metaphysics are atomic. The text suggests an intentional counterblast to the treatise of al-Ghazālī with a similar title, *Iljām al-ʿAwāmm ʿan ʿIlm al-Kalām*, "Reining back of the Commonalty from the Science of *Kalām*", yet the intention is nowhere expressed. In it al-Ghazālī had denounced the corrupting of the simple faith of the multitude with intellectualist arguments and had advocated very subtly what we would now call psychological methods — startingly, for modern ideas, backed by the secular arm of the state. But al-Ghazālī had opposed the *mutakallim* system and method from the beginning. On the one hand he knew, as a fact of psychology, that being convinced against one's will left one of the same opinion, and on the other, he did not approve of atomism as philosophy. He appears to make no specific reference to it in his works, and where he does give an abstract of theology, as a formal science (e. g. in *al-Risāla al-Ḳudsīya*, and in *al-Iḳtiṣād*) he stops short of absolutely philosophical bottoming. That, for him, was intellectually impossible; but such an outline of concatenated dogmatics, as in the two books mentioned, was justifiable (*Arbaʿīn*, pp. 25 *sqq.*, ed. 1328). The only real philosophy for him was, apparently, the Aristotelian-Neoplatonic amalgam, and with it he had dealt in his books which have reached us in a sceptical but respectful spirit. Probably following the economy of teaching, which he himself professed, and which he and all Islām practised, he dealt thoroughly and destructively in other books with the atomic system, and this may explain the mysterious allusions which have been called "the secret" of al-Ghazālī (e. g. W. H. T. Gairdner on the *Mishkāt* in *Der Islam*, v. 121—153). For his attitude towards the *mutakallim*'s see further AL-GHAZĀLĪ, above, ii. 147 *sq.*, *al-Munḳidh*, pp. 8 *sqq.*, and *Mishkāt al-Anwār*, Cairo 1322, 47 *sqq.*

It is significant that reform movements in Islām at the present time seem to have cut loose from the atomic philosophy, and to have gone back for leadership to Ibn Sīnā [q. v.], Ibn Rushd [q. v.] and the Aristotelians generally. Djamāl al-dīn al-Afghānī (see above, i. 1008 *sqq.*; E. G. Browne, *The Persian Revolution of 1905—1906*, Cambridge 1910, Chap. i.; Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, pp. 322 *sqq.*) and his friend and pupil Muḥammad ʿAbduh were the protagonists of this renaissance and continued the long interrupted method of al-Ghazālī, even on the side of the economy of teaching. The atomic system had crystallized and had become identified with the stiffest orthodoxy. In its origin, also, it had been, even with the Muʿtazilites, a weapon for the defence of accepted views and not an instrument of free investigation. Modern Islām, therefore, could have nothing to do with it, although it is possible that modern western atomic speculation may galvanize it into a semblance of life just as microbes have been used to defend the Ḳurʾānic doctrine of the *djinn* (Goldziher, *Koranauslegung*, p. 356). Yet it should never be forgotten that this theory is the most original contribution which Muslim thinkers have made to the history of philosophy.

Bibliography: It has mostly been given above, and almost all the bibliography under ALLĀH applies. There may be added: Goldziher, *Vorlesungen über den Islam* (Heidelberg 1910) *passim*, but especially Chap. iii.; the same, *Islamische Philosophie des Mittelalters* in *Kultur der Gegenwart*, i. 5, pp. 302 *sqq.*; T. J. De Boer, *Geschichte der Philosophie im Islam* (Stuttgart, 1901), pp. 56 *sqq.*; Maimonides, *Le Guide des Égarés*, ed. and trans. by S. Munk (Paris, 1856—66); S. Lasswitz, *Geschichte der Atomistik*, Hamburg—Leipzig 1890, i. 143—152 (not seen by me).

(D. B. MACDONALD.)

ḲALAM (κάλαμος, reed) the reed-pen used for writing in the Arabic character. It is a tube of reed cut between two knots, cut obliquely (or concave) at the thicker end, having the point slit, as with us for the quill and later for the steel pen. It has to be very firm so that it does not wear away too quickly; the best kind comes from Wāsiṭ and grows in the marshes (*baṭāʾiḥ*) of the ʿIrāḳ. It is allowed to steep like hemp and is kept in the water until its skin has taken on a beautiful dark brown colour. Its fibres should be quite straight so that the slit may also be even. To make the slit the slanted end of the *ḳalam* is laid on a long flat piece of ivory or bone, which is specially used for this purpose and is called *miḳaṭṭa* (Turk. *miḳtaʿ*); the point is then slit with a sharp backward cut with a special very sharp knife with a long handle (penknife, Turkish *ḳalamtirāsh*).

The part of the point to the left of the incision is called *insī* ("human"), because turned towards the writer and the right *waḥshī* "savage". If the former is slightly softer than the latter so much the better. It has been made a rule that in the kinds of writing called *naskh*, *thuluth* and *riḳāʿ* the *waḥshī* side ought to be twice as broad as the *insī* side; in the kinds called *dīwānī* and *shikasta*, it is the other way about. The *nastaʿlīḳ* is written with a pen slit exactly down the centre.

To protect the *ḳalam* from damage it is kept in a holder (*miḳlama*). These are of two kinds: 1) a metal box in the form of a long flat tube closed at one end by a lid with hinges and often adorned with arabesques. Attached to it is an inkwell (*dawāt*, popularly *dawāya*). This kind is peculiar to the Arabs. In Osmanli Turkish it is called *divit* (from Ar. *dawāt*); at an earlier period it was also called *ḳubūr* (strictly plur. of *ḳabr* "grave") by the Ottoman Turks, a word which is found as early as Abū Yūsuf, *Kitāb al-Kharādj* (Cairo 1302, p. 17) with the meaning of "holder", "case"; 2) a papier-mâché box adorned with lacquerwork. In it is a drawer which also holds an inkwell. This kind is used particularly in Persia and is called *ḳalamdān* "pen-box".

Sūra lxviii. of the Ḳurʾān (*Sūrat Nūn*) is sometimes called *Sūrat al-Ḳalam* from its opening: "N. — By the pen and what they write, ..." According to the traditions quoted by al-Ṭabarī (*Tafsīr*, Būlāḳ 1323—30, xxix. 107) the ḳalam was the first thing created by God so that he could write down events to come; two explanations have been given of this ḳalam: 1) the implement used for writing, a divine gift like the

latter; 2) a ḳalam of light, as long as the distance from heaven to earth, which wrote down all things that are to happen until the last judgment (cf. Fakhr al-Dīn al-Rāzī, *Mafātīḥ al-Ghaib*, Cairo 1278, vi. 330; Muṭahhar b. Ṭāhir al-Maḳdisī, *Kitāb al-bad'* wa *'l-ta'rīkh*, ed. Huart, i. text, 161 *sq.*, transl. 149).

The ḳalam is the emblem or symbol of the administrative services as opposed to the *saif*, which marks the military officer. Ibn al-Wardī († 749 = 1349) wrote a *Mufākharat al-Saif wa 'l-Ḳalam* and Ibn Nubāta († 768 = 1366) a work with a similar title; Djalāl al-Dīn Muḥammad b. Asad al-Dawānī († 907 = 1501), 'Alī b. 'Abd al-'Azīz Umm al-Walad-Zāde († 920 = 1514) and Ḳinalī-Zāde († 979 = 1572) each wrote a *Risāla Ḳalamiya* on the same subject (Brockelmann, *Gesch. d. arab. Litt.*, ii. 140, 211, 430, 433).

Huart, *Les calligraphes et miniaturistes de l'orient musulman* (Paris 1908), p. 13, 16, 17 (with pictures); L. Th. Bogdanow, *Perclo* (in Russian, St. Petersburg 1909), p. 81; F. Sarre and F. R. Martin, *Die Ausstellung von Meisterwerken muhammedanischer Kunst in München 1910* (München 1912), ii. Plate 152.

(Cl. Huart)

ḲALANDAR, a Ṣūfī religious order, founded by Ḳalandar Yūsuf (cf. ḲALANDARĪ), an Arab of Spain, contemporary with Ḥādjdjī Bektāsh [q. v.], brought to Damietta by the Shaikh Djamāl al-Dīn al-Sāwī, a native of the town of Sāwa in Persia; he is buried in the Zāwiya which he had founded there. He shaved his beard and eyebrows, since by doing this he had escaped in an amorous adventure; all his pupils followed his example. This sect, however, must have its origin in an earlier period, for it appeared in Damascus towards the year 610 (1213); it attracted attention by a strange costume adopted from the Persians and Mazdeans, which orders from the authorities forced it to abandon. The Mamlūk Sulṭān al-Malik al-Nāṣir Ḥasan, grandson of Ḳalā'ūn, in 761 (1360) forbade them to shave the beard. According to al-Maḳrīzī's account of them, they made it a rule to lay nothing aside and never to amass this world's goods; but in his time they did not wear coarse garments nor subject themselves to any mortification or any devotional exercises, saying it was sufficient for them that their hearts were at peace with God. They wanted nothing more; they made no effort to attain a degree of virtue more eminent than this state of peace at heart. To show their indifference as regards everything outside their ideal, they took the course of throwing off the restraint of all the laws of politeness usually observed in society. Their morals also were very loose. Bābā Ṭāhir 'Uryān of Hamadhān said: "I am the mystic gipsy called *ḳalandar*. I have neither fire, home nor monastery. By day I wander about the world, and at night I sleep with a brick under my head" (*Quatrains*, N^o^. vi., *Journ. Asiat.*, Series viii., Vol. vi. 1885, p. 516). The description of the odd costumes which accompanies the French translation of Chalcocondylas by B. de Vigenère (Paris 1662) and which is taken from the *Navigations* of Nicolas de Nicolay (Lyons 1568) gives on p. 23 an engraving showing one of these Ḳalandars wearing a kind of hair-shirt of wool and horse-hair coming barely down to the hips; he has his hair closely clipped, face clean shaven and on his head a felt hat surrounded by a fringe of horse-hair of the length of a hand. He wears rings in the ears, around the neck, on the wrists and under the pubis. He has no shoes; some of them used to walk quite naked in the streets. It is only fifty years ago that the Ottoman police finally succeeded in suppressing them. There was a convent of this order in Constantinople, founded in the reign of Muḥammad II with a mosque and a madrasa (Hammer, *Hist. de l'Empire ottoman*, transl. by Hellert (Paris 1835—43), xviii. 120, 131. Sometimes they have been confused with the Malāmatiya [q. v.]; cf. especially A. Le Châtelier, *Les confréries musulmanes du Hedjaz*, Paris 1887, p. 253 *sqq.*

Asiat.*, 1844, i. 479; R. du Mans, *Estat de la Perse en 1660*, ed. Schefer (Paris 1890), p. 216.

(Cl. Huart)

ḲALANDARĪ, the reputed but mythical founder of the Ḳalandariya. According to all the information available regarding the early history of these dervishes, it is more than probable that we have not here to do with a body similar to the other dervish orders introduced from Eastern Persia, but rather with a kind of wandering monks, who followed in their mental and physical mode of life the ideal which al-Maḳrīzī, *al-Khiṭaṭ* (Būlāḳ 1270), ii. 432 *sq.* attributes to them, à propos of his description of the Ḳalandarī monastery in Cairo (cf. thereon de Sacy, *Chrest. Arabe*[2], Paris 1826, i. 263—275). According to this and to descriptions which e. g. al-Suhrawardī (in Silvestre de Sacy in *Notices et Extraits des Mss. de la Bibl. du Roi*, xii. Paris 1831, p. 341) or Djāmī, *Nafaḥāt al-Uns*, ed. W. Nassau Lees (Calcutta 1859) as well as Sa'dī himself (cf. *Gulistān*, transl. by K. H. Graf, *Moslicheddin Sa'di's Rosengarten*, Leipzig 1846, p. 294 *sq.*) give of the Ḳalandar dervishes of the time, we have to deal with wandering dervishes, Malāmatī's (cf. al-Maḳrīzī, *al-Khiṭaṭ*, ii. 432; but on the other hand see the *Burhān-i Ḳāṭi'* under *Ḳalandar*, where a rigid distinction is made between *ḳalandar*, *malāmatī* and *ṣūfī*), without fixed abode and without fixed rules for their order and with an utter neglect of the laws of religion or of the forms of society. Abū Sa'īd b. Abu 'l-Khair composed a quatrain on them, which gives an excellent picture of the real ḳalandar of his time (cf. *Sitzungsber. der Kgl. Bayr. Akad. der Wissensch.*, phil.-hist. Kl., 1875, ii. 137; Ign. Goldziher, *Vorlesungen über den Islam*, Heidelberg 1911, p. 172; F. Babinger in *Der Islam*, xi. 1921, p. 66 *sq.*). What, then, is usually called the founder of a so-called order of ḳalandars, is apparently nothing more than some important

protagonist of these views. This is certainly true of Yūsuf, said to have been a Spanish Arab, who is often represented as the founder of the Ḳalandarīya, as well as of Shaikh Djamāl al-Dīn of Sāwa in Persia, who, Ibn Baṭṭūṭa says (i. 61 *sq.*), settled in Damietta and ended his days there. The expression Ḳudwa in Ibn Baṭṭūṭa here obviously means nothing more than "pattern, model". The ḳalandars seem to have originated in Central Asia and to have been strongly influenced by Indian ideas. According to al-Maḳrīzī (d. 1442), they came about 400 years before his time into Arab lands. About 610 (1213) the first of them appeared in Damascus (*al-Khiṭaṭ*, ii. 433). Here there died in 622 (1225; this, not 722 = 1322 is to be read in *al-Khiṭaṭ*, ii. 433) the Persian Shaikh Ḥasan of the Djawāliḳī sect, who flourished under Sulṭān al-Malik al-ʿĀdil Ketboghā and founded a monastery of ḳalandars not far from Cairo (Seryāḳūs = Kyriakos?). The ḳalandars may have been most numerous in Persia and the great bulk of them, still in the xvii[th] century at least, seems to have been concentrated in Ardabīl [q. v.], the stronghold of the Ṣafawīya (SAFAWIDS, q. v.; cf. Adam Olearius, *Persianische Reisebeschreibung*, *op. cit.*, 1656, p. 685: the Kalenderan). In Anatolia also and even in Rumelia in the early Ottoman period down to the xvi[th] century, they several times played a dangerous part by attacks on the authority of the state and serious risings (cf. F. Babinger in *Der Islam*, xi. 14; Pečewī, *Taʾrīkh*, Stambul 1283, i. 1283). Even in the Saldjūḳ period similar risings seem to have been led by ḳalandars. There are also various indications of connections between Ḳalandarīs and Bektāshīs.

ḲALANDARĪ has also become the name of a certain tune in Turkish.

Bibliography: cf., besides the works quoted above, also F. Babinger in *Der Islam*, xi. 94 and the references given here; also d'Herbelot, *Bibliothèque Orientale* (Paris 1697), p. 244; do. (Maestricht 1776), p. 224 s. v. *Calender*; Adam Olearius, *Persianischer Rosenthal*, Book viii. § 67; *Burhān-i ḳāṭiʿ*, ed. Th. Roebuck (Calcutta 1818), s. v.; J. P. Brown, *The Dervishes* (London 1868), where the presumably not Persian origin of the word *ḳalandar*, *karandal* etc. is also discussed (cf. besides Dozy, *Supplément*, ii. 340 also *Der Islam*, xi. 94, note).

(FRANZ BABINGER)

ḲALANSUWA, KULANSIYA (A.), the name for a cap which was worn by men either under the turban proper or alone on the head. The word, from which verbal forms are derived as denominative verbs, is apparently of foreign origin; while it used to be commonly connected with the Latin *calautica*, for which, however, the form *calautica* is difficult to quote — and besides it means a head-cloth for women —, Fraenkel wishes to derive it through the Aramaic קלנס (cf. Arabic *ḳalīs*, *ḳalis*, Dozy, *Supplément* ii., 395) from κῶνος (*conus*). The Arab grammarians and lexicographers have found in the manifold formation of the broken plural and the diminutive a reason for using *ḳalansuwa* as a paradigm for substantives of more than three radicals with such peculiarities.

Caps of different shapes are called *ḳalansuwa*; varieties of the *ḳalansuwa* are *ṭurṭūr*, *burnus*, *arḳīya*, etc. While it is related of the companions of the Prophet that they wore tight-fitting *ḳalansuwa*'s, later a long peaked sugar-cone shape, supported within by pieces of wood became fashionable, for which the name *ṭawīla* is usual. It seems to have come from Persia (cf. the head-dresses in the Dura-Ṣāliḥīya first century paintings, in J. H. Breasted, *Oriental Precursors of Byzantine Painting*, Chicago 1924) for it was regarded by the pre-Muḥammadan Arabs as a noteworthy feature of Persian dress (Jacob, *Alt-arab. Beduinenleben*[2], p. 237) and is said to have been first adopted in the reign of the first Umaiyad by ʿAbbād b. Ziyād from the inhabitants of the city of Ḳandahar, conquered by him (Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iv. 184). High, black *ḳalansuwa*'s were worn by the ʿAbbāsid Caliphs from al-Manṣūr to al-Mustaʿīn and by their viziers and ḳāḍīs. The latter adhered longest to the *ḳalansuwa*, so that in the course of the third (ix[th]) century — also popularly known as *dannīya*, pot-hat, or *ṭawīla* — it became their regular official headgear together with the neck-veil *ṭailasān* and at times was strictly forbidden to other classes of the community (al-Kindī, ed. Guest, p. 460, 586). — On the other hand criminals had a *ḳalansuwa* put on their heads when they were led through the streets. The *ḳalansuwa* was also worn among the Umaiyads in Spain, where *muḳallas* meant a Mufti wearing the *ḳaliṣ*. A headdress introduced by Tīmūr into his army was also known as *ḳalansuwa*.

The name *ḳalansuwa* appears several times in Ibn Baṭṭūṭa according to whom (ed. Defrémery and Sanguinetti, ii. 378) the Ḳipčaḳs, for example, called their *ḳalansuwa*'s by the Persian name *kulāh*. Of the Futūwa [q. v.] societies in Asia Minor (*akhīyat al-fityān*) he says (ii. 264) that their members wore several *ḳalansuwa*'s above one another, a silk one on the head, above it a white woollen one, to the top of which was tied a strip of cloth 2 fingers broad and 1 ell long; at meetings only the woollen *ḳalansuwa* was taken off, the silk one remaining on the head. A similar pendant strip of cloth is also part of the dress of the Coptic priests of modern Egypt and is there called *ḳallūsa* or *ḳalasuwa*; here the name appears to have been transferred from the cap itself to its most striking and therefore better known part.

At periods when, as in the second (viii[th]) century, both Muslims and Christians wore *ḳalansuwa*'s, the latter had to tie two knots of another colour to it (Ṭabarī, ed. de Goeje, iii. 1389); but when the *ḳalansuwa* went out of fashion with the Muslims in the third century, it remained the mark of the Christians. The word is therefore frequently found in Arab authors meaning the headdress worn by Christian monks and hermits, Greek priests and even the Pope himself. Through the Crusades the high cap with the veil seems to have found its way to Western Europe as a woman's dress.

The name *ḳalansuwa* was also given to other objects of similar shape: *ḳ. nuḥās* is the metal cap of the obelisk near Heliopolis (ʿAin Shams q. v.). *Ḳ. Turāb* in modern Arabic for a chemical sublimating vessel. *Ḳ. ḳubrāṭ* is used by surgeons for a particular kind of head-bandage; *ḳāliṣ* (*ḳālīs*) is the name of a plant, which seemed to represent a human head with a high cap. *Ḳalansuwa* was also the name of a fortress near al-Ramla in Palestine.

Supplement, ii. 395, 401; Fraenkel, *Die aram. Fremdwörter im Arabischen*, p. 53 *sq.*; Mez, *Die Renaissance des Islâms* (Heidelberg 1922), p. 26, 45 *sq.*, 130, 217, 348 *sq.*, 367; Thorning, *Beitr. z. Kenntnis des islam. Vereinswesens* (*Türk. Bibl.* xvi.), p. 215 *sq.* — Lammens, *Remarques sur les mots français dérivés de l'arabe* (Beyrouth 1890), p. 71 *sq.* (supposes an influence of *Ḳalansuwa* on the French word *calotte*).

(W. BJÖRKMAN)

KALĀNTAR (comparative from *kalān* "great") means at the present day in Persia the chief personage in a town, a kind of mayor, burgomaster, bailiff. This office is filled by election; the person elected has to be approved by the higher authority. The main duty of this official is to levy taxes.

(CL. HUART)

KALĀT (KELĀT, KILĀT, KHELĀT). 1. The town of Kalāt is the capital of the Khānate and fort of the same name, the most important part of Balōčistān, and the residence of the Khān, its ruler. The word Kalāt or Kilāt represents the Arabic *ḳal'a* or rather the Persian *kalāt* [cf. the art. ḲAL'A], which in India is usually pronounced *kila*. In Balōčī *kalāt* is the common word for a fort. On coins we find both كلات and قلات (W. H. Valentine, *Copper Coins of India*, vol. ii. 1921, p. 223). It has been known in earlier times as Kalāt-i Sēva (from a legendary Hindu king) and Kalāt-i-Nīčārī, which connects it with the Brahōī tribe of Nīčārī, which is generally accepted as belonging to the oldest branch of the indigenous Brahōīs [s. BALŌČISTĀN, i. 627, 630]. The town was unknown to the early Arab historians under its present name. It is however possible that it may represent Kīzkānān, which Arab geographers mention as the residence of the ruler of Ḳuṣdār (al-Iṣṭakhrī, *Bibl. Geogr. Arab.*, i. 176 *ult. sq.*; Ibn Ḥawḳal, *ib.*, ii. 232, 5 *sq.*). Its situation is in the modern district of Sarāwān, close to the boundary of Djahlāwān [q. v.]; thus it would have been included in the ancient province or kingdom of Tūrān, of which the capital was Ḳuṣdār (now generally written Khozdār, in Djahlāwān). [In the *Shāhnāma* Kelāt belongs to Tūrān; cf. ed. Vullers ii. 794. — Ed.]

After the Balōč tribes had passed through the Brahōī country on their way to the Indus valley, in the xvth and xvith centuries, Kalāt remained in the hands of the Brahōīs under a chief of the Kambarānī clan, from whom the line of Khāns is descended. Their power gradually extended during the Indian expeditions of Nādir Shāh and Aḥmad Shāh Durrānī [q. v.], whose suzerainty was admitted by the Khāns. The greatest of these, Naṣīr Khān, endeavoured to shake off the Durrānī yoke. He was defeated by Aḥmad Shāh, but the latter, who besieged Kalāt in 1172 (1758), was unable to take it, and Naṣīr Khān made favourable terms for himself. He built a strong fort (known as the Mīrī) and strengthened his position among the surrounding tribes. In 1834 Shāh Shudjā' al-Mulk took refuge in Kalāt with Mihrāb Khān after his failure to recover Ḳandahār. In 1838 through the intrigues of his followers Mihrāb Khān was embroiled with the British force advancing on Ḳandahār by the Bōlān Pass; Kalāt was taken by storm, and the Khān himself killed in the attack. Two years later the fort was taken by disaffected Brahōī tribes. The British Agent, Loveday, and the traveller Masson fell into their hands and the former was murdered. This led to a second British occupation for a time, but the Khāns were re-instated and remained practically independent for the next thirty years. Under the British protectorate, Kalāt remains the capital of the Khān's dominions. It is a small town situated in the high plateau 6780 ft. above the sea with a population of under 5000. The best descriptions of Kalāt are those of Pottinger, who visited it in 1810, and Masson (1831 and 1840).

2. The Khānate or State which takes its name from the town of Kalāt. This includes the provinces of Sarāwān, Djahlāwān, Kačhī and Makrān, and the tributary states of Las Bēla and Khārān.

For details see under BALŌČISTĀN.

(M. LONGWORTH DAMES)

ḲAL'AT BANĪ 'ABBĀS, a town in Algeria (department of Constantine) 24 miles N.E. of Bordj Bū 'Arrarīdj. Ḳal'a occupies at the height of 3,500 feet a natural fortress formed by a plateau surrounded on three sides by rugged and deep ravines, 1800 to 2000 feet high and joined to the adjoining country by a narrow tongue with precipices on either side. The town is divided into four quarters, which formerly were frequently fighting with one another and one of which is now almost in ruins. It is the most important centre of the tribe of Banū 'Abbās, whose territory lying between the Wādī Sāḥel and the Madjāna contains about 24,000 souls. The town itself with an exclusively native population numbers 3000 inhabitants. The few patches of tilled land at the bottom of the ravines not sufficing to maintain the inhabitants, the latter have for long had to devote themselves to industry. They used to make woollen burnuses in large numbers, which they sold in Algeria and Tunisia. At the present day many of them emigrate and follow the trade of embroidering burnuses in the towns of the Tell.

Ḳal'a was founded in the second half of the fifteenth century A.D. by the marabout Sīdī 'Abd al-Raḥmān, a descendant, according to some, of the Idrīsids, according to others, of the Ḥammādids. He established a zāwiya on the rock of Ḳal'a and put himself at the head of the Banū 'Abbās, who had risen against the Zwāwa, to whom they had hitherto been subject. His son Aḥmad built a *ḳaṣba*, proclaimed himself Sulṭān and extended his authority over the country between the Hodna and

the sea (the "kingdom of Labès" of Marmol). ʿAbd al-ʿAzīz, his successor, further increased his power with the support of the Turks, whom he assisted against the Kabyls of Kuku and supported in their expeditions against the Moroccans and the people of Tuggurt and Wārgla. The rupture of this alliance in 1552 brought about wars between the Turks and the Banū ʿAbbās, which lasted down to the end of the sixteenth century A.D. Besieged several times, during this period, Ḳalʿa could never be taken. After the death of ʿAbd al-ʿAzīz, killed in defending his capital, power was exercised by his brother; Amoḳrān. The latter extended his territory as far as the Ṣaḥara, repelled several Turkish attacks and fell fighting them in 1600. His son Sīdī Nāṣir, a man of the *Zāwiya* rather than the battlefield, dissatisfied the Banū ʿAbbās and was assassinated by them. With him the kingdom of Ḳalʿa disappeared. Henceforth the town was only the family citadel of the Moḳrānī, shaikhs of the Madjāna, descendants of Sīdī Nāṣir. Protected by its impregnable situation, it remained independent down to the French conquest. It served as an asylum for the adversaries of the Turks and the members of the great native families, who in time of war stored their grain and treasures for security with private individuals here. The honesty of the latter was proverbial. Thus Ḳalʿa benefited in the midst of the disorders, which were ruining the country, by a regular neutrality and in spite of the quarrels of the *ṣofs* [cf. i. 702[b]], inevitable in a Kabyl city, enjoyed a remarkable prosperity. It is at Ḳalʿa that Moḳrānī was buried the leader of the rising of 1871; his tomb is, however, now quite forgotten and neglected.

ḲALʿAT BANĪ ḤAMMĀD, a town in the Central Maghrib, which has now disappeared, but was in the v[th] (xi[th]) century the capital of the Ḥammādid empire (cf. the article ḤAMMĀDIDS ii. 252). Al-Ḳalʿa (Ḳalʿat Abī Ṭawīl in al-Bakrī and in the *Kit. al-Istibṣār*) was founded by Ḥammād b. Bulukkīn [q. v.] in 398 = 1007-8 on a flank of a mountain called Kiyāna or ʿAdjīsa by Ibn Khaldūn and Tākarbust (now Djabal Takerbust) by al-Idrīsī. A Roman fort had perhaps previously occupied this site; in the iv[th] (x[th]) century Abū Yazīd [q. v.] had tried to check in these regions the Fāṭimid troops, who were pursuing him on his retreat through the Maghrib. The place seemed therefore well suited to enable Ḥammād to resist the attacks of his enemies from the West, the Zenāta, who had just besieged his capital Ashīr [q. v.] and those from the east, the Zīrids of Ḳairawān. Ḥammād peopled the new town by transporting thither the inhabitants of al-Msīla and of Ḥamza, which he destroyed, and a large number of members of the tribe of Djerāwa. He built mosques, caravanserais, and various public buildings and surrounded the whole with a wall which ran round the mountain. These defences, built, according to Ibn Ḥammād, by a Christian slave, enabled Ḥammād to offer a successful resistance to the Zīrid Bādīs, when this prince came to besiege al-Ḳalʿa in 406 = 1016. Thus Ḥammād made it a habit to live sometimes at Ashīr and sometimes at al-Ḳalʿa and it was in this town that he died in 419 = 1028-29. Al-Ḳalʿa rapidly became very prosperous. "The population increased rapidly, students came there in large numbers from the most remote parts of the empire, attracted by the resources which the new capital offered to those who cultivated science, commerce and the arts" (Ibn Khaldūn). The importance of al-Ḳalʿa further increased after the sacking of Ḳairawān by the Hilālīs. Many inhabitants of Ifrīḳiya came to seek shelter there. The population was very mixed. It is worth noting that it included a small community of native Christians, well treated by the rulers, they had a church dedicated to the Virgin and administered by an official, perhaps a bishop, whom Paul the Deacon calls by the Oriental name of *califa*. The country around was quiet, thanks to an alliance made by the Ḥammādids with certain sections of the Athbedj; the harvests surpassed the needs of local consumption and were stored in granaries, where they could be kept for several years. Life was easy there, owing to the abundance of fruits and of cattle fattened on the adjoining pasturage; the markets were attended by caravans, which came from all parts of the Maghrib and even from Egypt and Syria and the ʿIrāḳ. Magnificent buildings were erected by al-Nāṣir: the Ḳaṣr al-Mulk (Government Palace), the private residence of the emirs, the Ḳaṣr al-Manār (Palace of the Signal), the Ḳaṣr al-Kawkab (Palace of the Star), the Ḳaṣr al-Salām (Palace of Bliss).

The situation altered in the second half of the v[th] century. Breaking their alliance with the Ḥammādid rulers, the Arabs began to plunder the region of Hodna and thrust their incursions up to the very gates of al-Ḳalʿa. The insecurity became such that al-Manṣūr, while continuing to make frequent stays at al-Ḳalʿa, moved the seat of government in 483 (1090/1) to Bougie, which had been founded by al-Nāṣir in 1062/3 [see Bougie, i. 766], but the attacks of the Arabs multiplied and made the lot of the inhabitants more and more precarious. In the reign of al-ʿAzīz the nomads invaded all the territory of al-Ḳalʿa and forced the garrison to take refuge in the town out of which they could not go. Thus Yaḥyā, who succeeded al-ʿAzīz, decided in 543 (1048) to remove from al-Ḳalʿa all objects of value, that were still there. Four years later, the Ḥammādid empire succumbed to the attacks of the Almohads. When master of Bougie, ʿAbd al-Muʾmin sent his son ʿAbd Allāh to lay siege to al-Ḳalʿa. The place, defended by Djawhar, Yaḥyā's brother, was taken by assault, the garrison put to the sword, 8000 inhabitants slain and many others taken prisoner. The conquerors carried off vast booty (547 = 1152—1153).

Still al-Ḳalʿa survived this disaster. Some of the inhabitants repopulated, if not the town itself, at least the Djerāwa quarter, E. of the wall. According to the author of the *Kit. al-Istibṣār*, they were still fairly numerous at the end of the vi[th] (xii[th]) century and were engaged in the making

of garments, which were celebrated. But in 580 = 1185, 'Alī b. Ghāniya captured al-Ḳal'a after a three days' siege. It was undoubtedly he who completed the destruction of the town, for it is never mentioned again after this date. Considerable ruins alone recall the existence of the ancient Ḥammādid capital. They lie about 20 miles S. of Bordj Bū 'Arīridj, on the southern slope of the Djabal Maadid, in the N. of Hodna, at a height of 3600 feet and occupy the summit of the cliffs which command the right bank of a tributary of the Wādī Selmān. The minaret of a mosque is still standing. Excavations made by P. Blanchet (1898) and again in 1908 by General de Beylié have made it possible to trace the wall and recognise the remains of various buildings: the Dār al-Baḥr, so called, perhaps, from a tank there, the palace of the Signal, the palace of Bliss and the mosque. Fragments of decoration, painted terra-cotta, stalactites of faïence, faïences of metallic lustre, and capitals have been brought to light. The study, which has been made of them, leads to the conclusion that Berber art before the Hilālī invasion was in great part Oriental in its inspiration and is revealed as a combination of Persian and Mesopotamian elements with local Byzantine art.

ḲAL'AT DJA'BAR. See DJA'BAR, i, 985.

ḲAL'AT HUWĀRA, a town in Algeria (department of Oran, a mixed commune of Mina) 20 miles N.E. of Mascara, on the Wādī Ḳal'a, one of the branches of the Hillīl. Population (1911): 2072 inhabitants, of whom 2047 natives. Carpet-making, at one time a flourishing industry here, still employs 500 workmen, although on the decline.

Ḳal'a was founded in the vith (xiith) century by Muḥammad b. Isḥāḳ, chief of the Huwāra, living in the region of Mina. He built a citadel and gathered round it his tribesmen as well as the Masrāta, a Berber clan related to the Huwāra. Isḥāḳ's descendants were faithful servants of the 'Abd al-Wād of Tlemcen and as a reward received the government of the land of the Tudjīn. After the occupation of Tlemcen by the Marīnids (759 = 1358), the people of Ḳal'a recognised the authority of the conquerors, then passed again under the rule of the sovereigns of Tlemcen after the restoration of the Zayānid dynasty. In the xvith century Arūdj seized the town (1517) and placed a garrison of 400 men there under his brother Isḥāḳ. Retaken in 1518 by the Spaniards, Ḳal'a was restored by them to the Sulṭān of Tlemcen and passed finally to the Turks towards the middle of the xvith century. It is described by the writers of this period (Leo Africanus, Marmol) as one of the principal places in the land of the Banū Rāshid (the Beni Rasi of Leo, the Beni Arax of Marmol). According to these authors, Ḳal'a was a very strong place inhabited by merchants and well-to-do artisans. During the Turkish period, Ḳal'a frequently served as a place of refuge for Beys and Turkish officials, as well as for numerous families from Oran and Algiers, so that about 1830, the population was in great part composed of Kuloghlus, i. e. of half-castes born of the marriages of Turks with native women. On various occasions the town has suffered from earthquakes but it was, on the other hand, greatly extended by the Bey of the West, Bū Shelāghem in 1736. The population was employed in agriculture and industry (manufacture of soap and especially the weaving of carpets). After 1830, Ḳal'a recognised the authority of 'Abd al-Ḳādir, who drove out the Ḳuloghlus, and was in 1845 occupied by the French. Ḳal'a was the birth-place of the celebrated marabout Sīdī Aḥmad b. Yūsuf (ixth cent. A.H.), to whom are attributed satirical sayings very popular in Algeria (Cf. R. Basset, *Les dictons populaires attribués à Sidi Aḥmed ben Yūsuf*, Paris 1890).

(G. Yver)

ḲAL'AT NADJM, the name of a celebrated citadel in Northern Syria, on the right bank of the Euphrates in 36° 53' N. Lat. and 38° 18' E. Long. (Greenwich). Its importance lay in the fact that it commanded the passage of the river here, where it was crossed by a bridge. It was here that a caravan route from Syria to Mesopotamia, much used in the middle ages, crossed the river. The route ran from Ḥalab via al-Bāb [q. v.] to Manbidj, thence in a fairly straight line to the Euphrates, then across the river in a slightly north-eastern direction to Ḥarrān. The distance from Manbidj to Ḳal'at Nadjm is given as 4 farsakh (a short day's journey), that from the Euphrates to Ḥarrān as 2 days' journey. As there are two small islands in the river at Ḳal'at Nadjm, a passage is very easily effected by a short bridge of boats.

In the middle ages Ḳal'at Nadjm was the bridgehead of Manbidj (the ancient Bambyke; cf. MANBIDJ), a very busy emporium, which the Caliph Hārūn al-Rashīd had raised to be the capital of the 'Awāṣim province [q. v., i, 515]. So long as Manbidj flourished, Ḳal'at Nadjm retained its importance; with the decline of Manbidj — by the xivth century A. D. Manbidj was already for the most part in ruins; see G. le Strange, *Palestine under the Moslems* (London

1890), p. 501 — the importance of Ḳal'at sank also, for traffic across the Euphrates turned more and more to the northern crossing at al-Bīra (Biredjik; q. v., i. 723). In ancient and mediaeval times there were on the central Euphrates, below where it breaks through the Taurus, a series of places where bridges maintained the connection between Syria and Mesopotamia; on these crossings, some of which succeeded others in course of centuries, see the references in the article BIREDJIK (i. 723). Whether there was already a bridge in ancient times at Ḳal'at Nadjm and whether the isolated hill commanding the ford was already inhabited or defended, we do not know. But it is very probable that a place so favoured by nature was used long before the coming of the Muslims. What ancient town is to be sought on the site of Ḳal'at Nadjm or the immediate vicinity can hardly be decided with certainty. Most probably we have to locate here the Caeciliana of the Roman itineraries (Καικιλία of Ptolemy); cf. the article Caeciliana in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, iii. 1172 and Streck's addition in Suppl. i. 266; Regling in *Klio*, i. 472; V. Chapot, *La frontière de l'Euphrate* (Paris 1907), p. 281; H. and R. Kiepert, *Formae orbis antiqui*, part v. (1910); L. Bell, *op. cit.* (see the *Bibl.* there), p. 23. Ainsworth, *op. cit.*, p. 224 sought Caeciliana in the ruined site of Ṣarīsāt (Srisat on Kiepert's map in Sachau (*op. cit.*), north of the Sādjūr river, whereas the map of Syria and Mesopotamia published on a scale of 1:400,000 by the cartographical department of the Prussian Survey, sheet Iᵇ. (Ḥalab) seeks to identify the ancient place in question with the modern Khirfān (Djabal al-Ḥamām, a little N. W. of Ḳal'at Nadjm). Less commendable than the identification of Caeciliana with Ḳal'at Nadjm seem to me the other identifications that have been proposed: namely with Betammali (Bethammaria), as Benzinger suggests in Pauly-Wissowa, *op. cit.*, iii. 362 (adopted on the above mentioned map of Mesopotamia and Syria, 1:400,000) (see thereon my additional note in Pauly-Wissowa, Suppl. i. 269), also with Callicome (so d'Anville, *L'Euphrate et Tigre*, Paris 1779), on which see my article on this name in Pauly-Wissowa, Suppl. i. 270. The Thilaticomum of the *Itinerarium Antonini* and the *Tabula Peutingeriana* was suggested by Mannert, *Geogr. d. Griech. und Römer*, vi. 1 (Leipzig 1831), p. 394. 397 and Ainsworth, *op. cit.*, i. 224. Nöldeke proposed (*op. cit.*, p. 13) the Gerre (Gerrha, Serre) of Ptolemy and the itineraries (see the article Gerre in Pauly-Wissowa, vii. 1270); on what are perhaps its ruins see Chapot, *op. cit.*, p. 282. Finally it should be mentioned that Chesney in *Expedit. for the Survey of the Rivers Euphrates and Tigris* (London 1850), i. 420 and in *Narrative of the Euphrates Expedition* (London 1868), p. 234, wrongly would find Djisr Manbidj — which, as will be emphasised immediately, is only an older name for Ḳal'at Nadjm — in the Ḳara or Büyük Manbidj, 10 miles to the south of it (which Nöldeke, *op. cit.*, p. 14 considers the Eragiza of the classics, Regling in *Klio*, i. 471 Betammali).

Al-Balādhurī (*Futūḥ al-Buldān*, ed. de Goeje) p. 150, 12 sqq. (excerpted by Yāḳūt, i. 478, 8 sq.) especially mentions that the bridge of Ḳal'at Nadjm was built by the Caliph 'Othmān, but expressly adds that, according to some, traces were still to be seen of an older bridge, which would seem to prove the existence of a river-crossing here, dating back to pre-Muḥammadan times. Al-Balādhurī, however, does not call the place Ḳal'at Nadjm but Djisr Manbidj, "the bridge of Manbidj". The older Arab geographers and historians know it only by this name. Even if the name Ḳal'at Nadjm perhaps only begins to appear in Arabic literature from the xiith century A. D. (to judge from the references quoted), it is clear from an important passage in the Ḥalabī chronicle (not written, however, till the xvth century) of Ibn al-Shiḥna (*al-Durr al-Muntakhab fī Ta'rīkh Mamlakat Ḥalab*, Bairut 1909; cf. on this work above II, 236) that its origin must be put back to the tenth century. Here it is stated (p. 230), that Ḳal'at Nadjm was long ago called Djisr Manbidj, and remained a little village in the Muslim period until it was refounded by a certain Nadjm, a slave (*ghulām*) of Ḥabbā al-Ṣafwānī, about 300 A. H. (912 A. D.). From this Nadjm comes the new name Ḳal'at Nadjm (N.'s citadel), which in time quite supplanted the earlier name Djisr Manbidj. Similar changes of place-names occurred elsewhere in Syria and Mesopotamia in the middle ages; for example the strong castle of Ḳal'at Dawsar, which rose farther down the Euphrates on the left bank between al-Bālis and al-Raḳḳa, received the name Ḳal'at Dja'bar (see the art. DJA'BAR) after the Arab chief Dja'bar b. Mālik (in the xith century A. D.) had taken possession of it.

The passage quoted from Ibn al-Shiḥna's history further shows that the form Ḳal'at al-Nadjm and the translation of the name founded on this as "the star-castle", which have become quite familiar in European literature (and therefore also on maps: Kal'at en-Nedjm), are wrong. The Arabic sources, moreover, show, so far as we can see, almost always the correct Ḳal'at Nadjm; the Syrians reproduce this by Ḳal'a Nagm, e. g. Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 579, 23. If the reading Ḳal'at al-Nadjm is occasionally also found in our editions of the texts — e. g. in Yāḳūt, iv. 165, 2 (against iii. 860, 22); *al-Mushtarik*, p. 357, 8; *al-Marāṣid*, ii. 443, 5) and al-Ḳazwīnī, ii. 166, 23 — it would still have to be investigated whether the manuscripts really support this reading. At the same time we do not deny that later Arabic writers, in ignorance of the origin of the name of the place, occasionally may have written Ḳal'at al-Nadjm and this may have given the etymology "star-castle". For example, Ibn al-Shiḥna (*op. cit.*, p. 229) gives a passage from a *risāla* of the Ḳāḍī al-Fāḍil (q. v.), in which the latter explains the name of the fortress in poetical fashion as "a star in the clouds", "an eagle in the sky". Similarly Ritter (*op. cit.*, x. 1062, following J. v. Hammer) writes: "The castle is said to have taken its name from its height, reaching up to the stars". Lastly Ainsworth (*op. cit.*, i. 229) takes the name Ḳal'at al-Nadjm back to al-Ma'mūn, who is said to have built an observatory here. That the Caliph had observations of the heavens made in the region between Palmyra and al-Raḳḳa on the Euphrates is certainly true (cf. above i. 498ᵇ), but his responsibility for the doubtful place-name is to be denied, after what we have said above. In this connection it may also be pointed out that we have several places called

Kawkab (= star) in Nearer Asia, for example one in Northern Syria, but an identification of the latter with Ḳal'at al-Nadjm, "the star-castle", which R. Röhricht, *Gesch. des Königreiches Jerusalem* (Innsbruck 1898), p. 237, note 3 proposes, is impossible. It is noteworthy that Ḥamd Allāh Mustawfī (*Nuzhat al-Ḳulūb*, ed. G. Le Strange, vol. i., Leiden 1915, p. 103, 22) says that the citadel of Ḥarrān was called Ḳal'a-i Nadjm. As there is no confirmation of this in Arabic sources, this must be an error of the author's.

The citadel and the bridge of Ḳal'at Nadjm play a not unimportant part in the history of the wars of Islām. Soon after their invasion of Syria the Arabs occupied this region (in 18 = 639), the Euphrates villages, as al-Balādhurī (p. 173, 9) calls it. In the accounts of the fightings between 'Alī and Mu'āwiya, which led in 657 A. D. to the battle of Ṣiffīn (on the right bank of the Euphrates opposite Ḳal'at Dja'bar already mentioned) the bridge of Ḳal'at Nadjm is frequently mentioned; cf. e. g. al-Ṭabarī, i. 3259, 11 *sq.* and Ibn Miskawaih, *Tadjārib al-Umam* (Gibb Mem. Ser., i. Nº. 7), i. 571, 7. When 'Ubaid Allāh b. Ziyād took the field against Mukhtār in 65 (685) in the 'Irāḳ, he crossed the Euphrates by this bridge; see Wellhausen, *Das Arabische Reich und sein Sturz* (Berlin 1902), p. 115. In 330 (941) after the murder of Ibn Rā'iḳ (on whom see above ii. 407) there was fighting here between the latter's troops and those of the Hamdānid Nāṣir al-Dawla; see *Zeitschrift d. Deutsch. Morgenl. Gesellsch.*, x. 470. The citadel of Ḳal'at Nadjm changed hands several times then as in later centuries; we find as its possessors, in turn, the Ḥamdānids, the Mirdāsids of Ḥalab (cf. above ii. 229 *sqq.*), the Banū Numair (see Ibn Ḥawḳal, p. 159, 7; Ibn al-Shiḥna, *op. cit.*), Sulṭān Nūr al-Dīn al-Zankī (1146—73) and his successors in Syria, the Ayyūbids. Nūr al-Dīn (according to Abū 'l-Fidā', *Taḳwīm al-Buldān*, ed. Paris, p. 233) renovated the castle — on which account Ibn Djubair, who passed it two or three decades later, calls it "a new citadel" — and placed a strong garrison in it, which was very troublesome to the neighbouring Syrian towns occupied by the Franks. Ḳal'at Nadjm was also for a time in the hands of the Begteginid princes of Irbil (on them see above ii. 591). After the death of Ṣalāḥ al-Dīn (1193) his sons and grandsons (al-Malik al-Afḍal, al-Malik al-Ẓāhir, al-Malik al-'Azīz) and his brother (al-Malik al-'Ādil) several times succeeded one another in the possession of the town (cf. above vol. i., ii. and Yāḳūt, iii. 165, 16; Abu 'l-Faradj (Barhebraeus), *Ta'rīkh Mukhtaṣar al-Duwal*, ed. Beirut, p. 393, 11; Abu 'l-Fidā' (ed. Reiske-Adler), iv. 109, 189; Weil, *Gesch. der Chalifen*, iii. 435.

When Hūlāgū in 658 (1260) began his campaign against Syria (cf. above ii. 332), he had to fight for the Euphrates crossings and the forts defending them; see Barhebraeus, *Chronicon Syriacum* (ed. Bedjan), p. 500, 17. Barhebraeus, who was then bishop of Ḥalab, and went to meet the Mongol ruler to beg that the Christians be spared, was shut up by him in Ḳal'at Nadjm (see *op. cit.*, p. 510, 17).

On the topography of Ḳal'at Nadjm and the present condition of the castle there, we have various accounts by European travellers, e. g. by Helfer and Ainsworth (on their visit together in 1830), Sachau (1879), M. v. Oppenheim (1896) and Miss Gertrude L. Bell (1909). According to their descriptions, the rocky cone about 160 feet high stands quite alone, crowned by the picturesque ruins of the citadel, falling steeply towards the river and fairly difficult of ascent on other sides also. All parts of the castle are still standing upright and are quite well preserved. Two stories are distinguished with an agglomeration of rooms of various sizes. The only parts damaged are those which were bombarded during the taking of the castle by Turkish troops about 1820. When at this time an Arab tribe refused tribute to the government and took refuge in this stronghold, the soldiers of the Pasha had to besiege and storm it, and a large gap was made in the wall in the process. A peculiar feature of Ḳal'at Nadjm are its not yet fully investigated caves and subterranean passages, which, according to the Arabs, run through below the Euphrates to the Mesopotamian side (compare the Oriental stories about a similar system of tunnels made by the Queen Zenobia in Fr. Müller, *Studien über Zenobia und Palmyra* (1902, p. 37). Ḳal'at Nadjm is now quite deserted and forms a refuge only for countless wild pigeons and bats. According to Sachau, there are still three Arabic inscriptions here. One of them is carved out over the main gateway which is flanked by two high towers and gives an account of the restoration work done by the Ayyūbid al-Malik al-Ẓāhir in 605—612 (1208—1215); beside it, is a second one which gives the name of the architect. A third inscription of the same ruler (of 1215 A. D.) may be read over the door of what was once the little mosque of the castle.

According to the Arab geographers (Ibn Djubair, Yāḳūt, al-Ḳazwīnī, *al-Marāṣid*), a little town lay below the castle rock, probably at the river's edge, which served as a market for the numerous travellers as well as for the Beduins of the surrounding desert. The remains still in existence of buildings of an earlier period at the foot of the hill on the south cannot, as Sachau observes, be considered the remains of a town on account of the way in which the ground is cut up; but the Muslim cemetery in the vicinity with the ruins of two buildings (mosques or chapels) may mark the site of the small mediaeval village. At the present day there is no bridge there. Whether traces of any earlier ones can be found seems very doubtful. Chesney (*Expedition*, i. 420; *Narrative*, p. 230; see above) has, it is true, thought to discover remains of one and M. v. Oppenheim claimed to find traces of old bridges in no less than three places (see *Berliner Zeitschr. für Erdkunde*, xxxvi. 80 *sq.* and *Byzant. Zeitschr.*, xiv. 1905, p. 7), but according to Chapot (*op. cit.*, p. 281, note 7), who likewise examined the area in question, there is nowhere any trace of such remains to be seen.

A little to the south of Ḳal'at Nadjm, but on the left bank of the stream, there lies close to the Euphrates a mound of ruins, part of which has at one time been swept away by the river, called Tell Mas'ūdiya, out of which M. v. Oppenheim dug a large ancient mosaic of the river-god Euphrates; see *Byzant. Zeitschr.*, xiv. (1905), p. 7 and Moritz in the *Beitr. zur Assyriologie*, vii./iii. 1913, p. 158. Also on the east bank opposite Ḳal'at Nadjm there lies a very winding system

of hills, called Djabal Ṣarrīn after the ancient ruined site of Ṣarrīn. S.E. of the latter (N.E. of Tell Masʿūdiya) rise two great grave-towers, one of which has in the second story a porphyry sarcophagus with the oldest known inscription in pure Syriac (73 A.D. = 385 Seleucid era). This monument of an Edessa man named Maʿnu bar Maʿnu, with inscriptions relating to the building and to the deceased, is of great value from the linguistic as well as the palaeographical side. M. v. Oppenheim and H. Pognon found and copied it independently; cf. Pognon's publication and edition of the text in his *Inscriptions Sémitiques de la Syrie* (Paris 1907—1908), p. 15—22 (and Pl. xiv.) and see thereon Nöldeke in the *Zeitschr. f. Assyr.*, xxi. 151—153. The edition of the text by B. Moritz in the *Beiträge zur Assyriologie*, vii./ii. 1913, p. 158—165 is based on v. Oppenheim's material. The ancient names of Tell Masʿūdiya and Ṣarrīn are unknown; perhaps it was one of the above mentioned stations in the itineraries (Gerre or Thilaticomum).

ḲALʿAT AL-RŪM. See RŪM ḲALʿA.

ḲALʿAT SHERḲĀT, an extensive group of ruins in the wilāyet of Mōṣul, on the right bank of the Tigris in 35° 30′ N. Lat. and 43° 15′ E. Long. (Greenwich). They rise on the edge of the desert on the sharp spur of the hilly lands, cut up by many valleys, which slope from the ridge of the Khanūḳa mountains, an eastern spur of the Djabal Hamrīn, down towards the Tigris. The name Ḳalʿat Sherḳāt is not found in the Oriental writers of the middle ages nor, so far as I can see, in those of later centuries either. Whether the spelling אשר שרקת = Ashshur šr ḳ (t) t (?), which is found in Aramaic inscriptions of the Parthian period, is really connected with Sherḳāt, as Jensen (*Mitt. der Deutsch. Orient-Gesellsch.*, n°. 60, p. 46) supposes, is very doubtful. Perhaps the name Sherḳāt — not Sherḳāṭ; cf. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), p. 792 — only dates from the xviiith century A.D.; in the literature of European travellers it seems to appear first about the time of Rich (1821). The meaning (? a personal name) is quite unknown. The Turks also give the place the name (often found where Turkish is spoken) of Topraḳ-Kalʿe = "Earth-citadel", which is without significance; cf. Rich, *op. cit.*, ii. 137 *sq.*

Ḳalʿat Sherḳāt occupies the site of the oldest capital of the Assyrian empire, the city of Ashshur, from which the whole district ruled by it also took the name Ashshur (Assyria), while the city itself apparently derived its name from the national deity of this name (hardly the reverse). The site offers many advantages for an effective defence and was presumably planned by the inhabitants of southern Mesopotamia (Babylonia) as a military bulwark against the inroads of northern barbarians. That Ḳalʿat Sherḳāt was fortified in the archaic period has been shown by the excavations of the Deutsche Orientgesellschaft. These further show that the Semitic settlement was preceded by a non-Semitic (Sumerian) occupation; Sumerian sculptures have been found which are closely connected with those from Telloh in South Babylonia (about 2600 B.C.). In the time of the third Babylonian dynasty of Ur (2298—2786 B.C.), Ashshur was a small state dependent on Babylonia. The beginnings of Ashshur may safely be put back to 3000 B.C. and perhaps even farther; thereon cf., most recently, Weidner in *Boghazköi-Studien*, Heft 6 (*Der Zug Sargons von Akkad*, Leipzig 1922), p. 96. Some not inconsiderable time before 2000 B.C. an end was made of the Sumerian colonisation of Ashshur by the invasion of the Semites.

The numerous historical inscriptions, which were brought to light by the excavations of the Deutsche Orient-Gesellschaft in Ḳalʿat Sherḳāt have extended in a most unexpected fashion our knowledge of the history of the city and kingdom of Ashshur, especially with regard to the older periods. Its chronology now begins about 2300 B.C. or even earlier. From Puzur Ashir I (2086—2072) to the fall of Nineveh, with the help of the dynastic lists of Ashshur, we can restore the series of rulers without a gap; cf. E. Weidner, *Die Könige von Assyrien, Neue chronol. Dokumente aus Assur*, in the *Mitt. der Vorderasiat.-Aegypt. Gesellsch.*, xxvi. (1921), n°. 2; with the chronological list of the kings of Ashshur given there (p. 64 *sq.*) compare the (somewhat later) list given by Schroeder in *Keilschrifttexte aus Assur historischen Inhalts*, Heft 2 (1922), p. 101 *sq.*

Ashshur retained its place as capital down to the middle of the tenth century B.C. Older rulers built other towns as royal residences, but only temporarily, for example Salmanassar I (1280—1261) chose Kalkhu (Bibl. Hebr. Kalaḥ) farther to the north at the mouth of the upper

Zāb for his capital and his son and successor Tukulti Ninurta I (1260—1232) built a new capital for himself in the immediate vicinity of Ashshur to the northeast of it, which he called after himself Kār ("wall, citadel of") Tukulti Ninurta (now the ruins of Tulūl ʿAḳr). After their death both these towns again lost their predominance to Ashshur. It was only from the tenth century onwards that the latter became more and more overshadowed by Kalakh and Nineveh and the later kings chose these two places only as the centres of their kingdom. Ashshur survived the fall of Nineveh, however; cf. Streck, *op. cit.*, CCXLIV and note 3 and p. CCXLIX, note 1. It is mentioned in the proclamation of Cyrus to the Babylonians, which is preserved in cuneiform. During the greater part of the Graeco-Roman period, especially in the 400 years of the Parthian epoch (which is represented by countless remains of buildings), it was an inhabited town, and as such — under other names (Kaini; perhaps also Labbana and Libla) — it is several times mentioned by classical authors; thereon cf. E. Herzfeld in *Memnon*, i. (1907), p. 98 *sq.*, 237 *sq.* In the Parthian strata of the ruins of Ḳalʿat Sherḳāt 43 Aramaic inscriptions, mainly in memoriam, were found, which, in so far as they were dated, cover the period of the Seleucid (Arsakid?) era (199/200—227/228 A.D.), i. e. they cease just with the rise of the Sasanians. An interesting fact is also to be deduced from these documents, that the cult of Assyrian deities and names of gods still survived in Ashshur in the third century A.D. On these inscriptions cf. Jensen in the *Sitzungsberichte der Berliner Akademie*, 1919, liii. 1042—1051, and in the *Mitt. d. deutsch. Orient-Gesellsch.*, 1920, n°. 60.

The name Ashshur appears in the Aramaic form Athūrā as early as the old Persian version of the Behistūn inscription; see Weissbach, *Die Keilinschriften der Achaemeniden* (= *Vorderasiat. Bibl.*, iii.), p. 140. By Athūrā we have here probably not to understand the whole of Assyria but only the district of Ashshur. The classical authors give the Aramaic equivalent of Ashshur in the form Ἀτουρία, Ἀτυρία; see Pauly-Wissowa, *Realencykl. d. klass. Altertumswissensch.*, ii. 2260; Herzfeld, *op. cit.*, i. 127. Ashshur presumably became more and more deserted under the Sasanians. The Syriac authors know of Athor down to the late middle ages as the name of a parish; see G. Hoffmann, *Auszüge aus syrisch. Akten persischer Märtyrer* (Leipzig 1880), p. 175, 210.

The Arab geographers of the middle ages likewise are acquainted with Athūr. It is given by them firstly as an earlier name of Mōṣul, then as the name of the province which was later usually called al-Djazīra and finally as the name of a ruin near al-Salāmiya (probably the Biblical Resen, 2½ miles N.W. of Nimrūd, the ancient Kalakh; cf. Streck, *op. cit.*, p. CCLXXVI). Sometimes Aḳūr is written instead of Athūr and sometimes the one, sometimes the other noted as a variant. Aḳūr is either to be regarded as a corruption or, perhaps better, as a parallel dialect form. Cf. for Athūr or Aḳūr: Ibn Rosteh in the *Bibl. Geogr. Arab.*, vii. 104, 6 (ard Athūr, "land of A." = Mōṣul); Yāḳūt, *Muʿdjam* (ed. Wüstenfeld), i. 119, 16; 340, 5; iii. 138, 18. For the Djazīrat Aḳūr see Yāḳūt, *Muʿdjam*, ii. 72, 17; 231, 9; this coincides with the Iḳlīm Athūr (Aḳūr), the Κλίμα (region of) A., of which only al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii. 20, 5; cf. also 27, 10; 28, 7) speaks and which, according to him, is divided into three large divisions. On (Djazīrat) Aḳūr as an older name for Djazīra see above i. and G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 86.

From the statements of the Arab geographers this much is evident that in the middle ages a ruin was still known which covered the site of the ancient Ashshur; only the name had been erroneously connected with a deserted locality near al-Salāmiya. It may here be recalled that, according to Layard, *Nineveh and Babylon* (London 1853), p. 165, the Arabs at the present day call a high hill in the corner of the ruins of Nimrūd (Kalakh) "Tell Athūr". The Arab geographers further make the observation, which is quite correct, that the earlier name of the province of al-Djazīra, which, indeed, practically coincides in area with the ancient Assyria, is derived from the deserted town of Athūr. When Athūr ultimately came to be erroneously regarded as the ancient name of the later capital Mōṣul, we have a false identification here similar to the case of Baghdād, which western travellers throughout the middle ages down to Pietro della Valle (1616—17) equated with Babylon and always called so.

On the Arabic names Athūr or Aḳūr cf. also A. Schultens, *Vita et res gestae … Saladini* (Leiden 1755), Ind. Geogr. s. v. Mosula; Fr. Tuch, *De Nino urbe* (Leipzig 1845), p. 16 *sq.*; Tuch's *Kommentar über die Genesis*, 2nd ed. by Merx (Halle 1871), p. 61 *sq.*; Layard, *Nineveh and its Remains*[2] (London 1849), ii. 245.

The ruined area of Ḳalʿat Sherḳāt is of considerable extent (nearly 180 acres), very little smaller than that of the two other royal cities of Assyria, Kalaḫ (Nimrūd) and Nineveh (Ḳuyundjiḳ). It is sharply defined; there is no doubt on any side as to how far the ancient city reached. The Tigris flowed along the east front; the north front was formed by a natural ledge of rock, which was strengthened by defensive walls and made inaccessible. On the finest part of Ashshur, in the eastern part of the north plateau, the Shammar Shaikh Ferḥān Pasha in the second half of the xixth century founded a settlement which later became a Turkish outpost, which until the Great War served as barracks for troops of regular cavalry or mounted police. Apart from this temporary use as a military post by the government, Ḳalʿat Sherḳāt has been quite uninhabited since the memory of man.

The extensive ruins early excited the interest of European travellers. Their importance was first emphasised by Cl. Rich, who examined them carefully on a Tigris journey in March 1821; see his *Narrative of a Residence in Koordistan* (London 1836), ii. 137 *sq.* In 1836 Ross visited them; see a communication by him in the *Journ. of the Royal Geogr. Society*, ix. (1839), p. 451—455. The first thorough description of the site we owe to W. Ainsworth. He visited it along with Layard and Mitford in 1840 when on an excursion to al-Ḥaḍr [q. v., ii. 204] (the caravan road to al-Ḥaḍr branches off at Ḳalʿat Sherḳāt; see his report in the *Journ. of the Royal Geogr. Society*, xi. (1842), p. 4—8). Layard again in 1847 spent two days at Ḳalʿat Sherḳāt, engaged in examining the ruins; see Layard, *Nineveh and its Remains*[1],

ii. 45—63. Later (1852) H. Rassam conducted excavations on the spot; on these cf. Layard, *Nineveh and Babylon* (London 1853), p. 581 and H. Rassam, *Ashur and the Land of Nimrod* (New York 1857), p. 1321.

A systematic examination of the whole system of ruins was first effected between Sept. 1903 and June 1914 by excavations of the Deutsche Orientgesellschaft which extended over practically the whole site of the town. Accurate plans were made of all parts examined. As the excavations proved, the kings Tiglathpileser I (1115—1103) and Salmanassar III (859—825) in particular displayed very great activity in building at Ashshur; the latter renovated completely almost all the great works of his predecessors. The most prominent buildings within the town are the great temples — the sanctuary of Ishtar, the oldest of all, showing a Sumerian stratum below it, then the Ashshur temple, also of very great antiquity, called E-Kharsag-kurkurra with a great temple tower (*zikkuratu*) belonging to it, and lastly the sanctuary of Anu and Adad. Besides there was a series of smaller temples; of special interest is a "New Year Festival House", a work of Sanherib (705—682), discovered before the city gates. Palaces also were uncovered; but we have not yet detailed information regarding them. The powerful fortifications (double wall, Tigris-quay, wall and citadel) with which the Assyrian rulers protected their capital are most impressive. Among the monuments brought to light in great number special mention should be made of two rows of steles with reliefs and inscriptions (one north of kings and one south of officials), which belong to the xivth—viith centuries and are of fundamental importance for our knowledge of Assyrian history. The topographical and archaeological investigation of the site has, at last, also given us a clear picture of the extent and significance of the erstwhile "city of the Parthians" (we have to distinguish two periods of Parthian building).

An exhaustive work on the topography and history of Ashshur based on the German ten years' excavations on a large scale is not yet available. For the present we have only the official reports, almost all by W. Andrae, the leader of the German expedition in Assyria, published in the *Mitteilungen der Deutschen Orient-Gesellschaft*, Nº. 20—22, 25—26, 28—29, 31—33, 36, 38, 40, 42—45, 47—49, 51 and 54. On two of the principal temples, on the fortificatory works and the rows of steles, Andrae has published monographs in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellsch.*, namely: *Der Anu-Adad-Tempel in Assur* (Leipzig 1909; = *Wissensch. Veröffentl.*, Nº. 10); *Die Stelenreihe von Assur* (1913; = *op. cit.*, Nº. 24); *Die Festungswerke von Assur* (1913, 2 vols.; = *op. cit.*, Nº. 23); *Die archaischen Ištar-Tempel in Assur* (1922; = *op. cit.* Nº. 39).

The yield in inscriptions from the excavations in Ashshur has been very rich and exceedingly important. They have to a very great extent extended our knowledge of Assyrian chronology, history and religion. The publication of the texts is likewise being done in the *Wissensch. Veröffentl. der Deutsch. Orient-Gesellsch.*; so far there have appeared: *Keilschrifttexte aus Assur historischen Inhalts*, 2 parts, Leipzig 1911 and 1922, ed. by Messerschmidt and Schroeder (= *Wissensch. Veröffentl.*, nº. 16 and 37); *Keilschrifttexte aus Assur religiösen Inhalts*, ed. by Ebeling, vol. i. 1915—1919 (= *op. cit.*, nº. 28), vol. ii (part 1—2), 1920 (= *op. cit.*, nº. 34); *Keilschrifttexte aus Assur verschiedenen Inhalts*, ed. by Schroeder, 1920 (= *op. cit.*, nº. 35); *Altaramäische Urkunden aus Assur* (dating from the latest period of the Assyrian empire), ed. by Lidzbarski 1921, *op. cit.*, nº. 38.

Bibliography: Apart from the references already given we may mention the following: Ritter, *Erdkunde*, xi. 666 *sq.*, 671—676; Fr. Delitzsch, *Wo lag das Paradies?* (Leipzig 1881), p. 252—255. Delitzsch also in 1903, before the beginning of the German excavations, drew up a sketch of the history of the town (especially its buildings) based on the inscriptions then known; in the *Mitteilungen der Deutsch. Orient-Gesellsch.*, nº. 20, p. 30—36; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf* (Berlin 1900), ii. 203—210; E. Herzfeld in *Memnon*, i. (1907), p. 97—116, 231 *sq.*, 237; M. Streck, *Die Inschriften Assurbanipals* (Leipzig 1916), iii. 773; B. Meissner, *Babylonien und Assyrien*, i. (Heidelberg 1920), *passim* (see Index), esp. p. 12 *sq.*, 33 *sq.*, 300 *sq.* — The best map of the region of Ḳal'at Sherḳāt is the one of Mesopotamia and Syria published by the cartographical department of the Prussian Survey on the scale of 1 : 400,000, sheet 4 C (Sāmarrā). The latest plan of the ruins of Ashshur is given by Andrae in his *Die Festungswerke von Assur* (1913), Plates i. and iii. On the flora of Ḳal'at Sherḳāt and district E. Herzfeld writes in the *Orientalist. Literaturzeit.*, Suppl. ii., Berlin (1908) on the basis of the collection made by him as a member of the German expedition in Ashshur in 1903—1905 and (somewhat enlarged) in Sarre-Herzfeld, *Archaeolog. Reise im Euphrat und Tigrisgebiet*, iv. (Suppl. Berlin 1920), p. 25—26. He gives the plant-names in the dialect of the half nomadic Djebbūr Arabs of the district. (M. STRECK)

ḲALATA. See CONSTANTINOPLE, I, 867.

ḲALĀ'ŪN, AL-MALIK AL-MANṢŪR SAIF AL-DĪN ABU 'L-MA'ĀLĪ AL-ALFĪ (the "Thousander", a name, it is said, given him because he was bought for 1000 pieces of gold) AL-ṢĀLIḤĪ AL-NAJJMĪ, the sixth Sulṭān of the Baḥrī [q. v.] Mamlūks, born in Ḳipčāḳ [q. v.], was brought to Egypt, sold to Sulṭān Ṣāliḥ Aiyūb [q. v.] and manumitted by him in 647 (1247). The beginning of his career is unknown. Under Sulṭān Baibars [q. v.] he became commander of a thousand. He later distinguished himself in a campaign in 671 (1272) against the Mongols by a skilfully executed passage of the Euphrates and again in 672 (1273) in a war against the Armenians. Sulṭān Baraka Khān, son of Baibars, sent him again against the Armenians in 677 (1278). When this Sulṭān was deposed a year later, the Emirs chose his seven-year-old brother al-Malik al-'Ādil Salāmish as Sulṭān and appointed Ḳalā'ūn his guardian and Atabek. In reality Ḳalā'ūn ruled and was mentioned in the Friday prayer and on the coins along with Salāmish; after three months Salāmish was deposed and Ḳalā'ūn in due form raised to the throne and confirmed by the Caliph. While he was at once recognised in Egypt, he had to fight a rival in Syria, the Emir Sonḳor al-Ashḳar, who was chosen

Sulṭān in Damascus by the Syrian troops, Ṣonḳor found support among the Beduins of Syria, as well as with the sons of Baibars, the deposed Baraka Khān, to whom on his deposition Karak [q. v.] had been given as an independent principality, and his brother Khiḍr, who occupied several fortresses in the southern part of Syria. Both sides gathered together their armies; there was a battle in the beginning of 679 (1279) south of Damascus, which was decided in favour of Kalāʾūn, as a result of the desertion of Damascus troops. Baraka Khān had died shortly before; his brother Khiḍr was glad to conclude peace with Ḳalāʾūn in the spring of the year 680, by which he was granted Karak as a fief. Ṣonḳor had appealed for assistance to the Mongols and they, always ready for loot, had invaded Northern Syria, plundering as they went. When the Mongols were preparing for a second campaign on a larger scale, Ṣonḳor, who had become afraid of his too ardent friends, had made peace with Kalāʾūn on condition that he was left the North Syrian fortresses of Ṣahyūn, Shaizar, Apamea and several other places to rule independently. Freed from these opponents, Ḳalāʾūn was able to devote his attention to the invading Mongols, who were reinforced by Armenians, Franks and Georgians. The armies met at Ḥims. In spite of their superiority at first, the Mongols were defeated and had to withdraw from Syria. While the Sulṭān, as we have seen, was threatened from several sides, the Crusaders, who still occupied the greater part of the Syrian coast, had not decided to collect their full strength for a decisive effort. Only the Knights of St. John in the fortress of Marḳab had enticed the governor of Ḥiṣn al-Akrād [q. v.], who was approaching it, into an ambush and inflicted a severe defeat on him in a surprise attack; after the destruction of the Mongol army, they, like the Count of Tripolis and the Templars a year later, were content to have peace on favourable terms. An agreement was also made with the city of ʿAkkā in 682 (1283). Kalāʾūn, however, punished the Armenians for the help they had given the Mongols, by invading their country and doing them great damage by plundering and ravaging it.

The Khān of the Mongols, Abāḳā [q. v.] died in 680 (1281); his successor adopted Islām, taking the name Aḥmad. Letters and embassies were exchanged between him and Ḳalāʾūn and although their relations did not result in an alliance, they were by no means unfriendly. In 683 (1284) Aḥmad was murdered. His successor Arghūn [q. v.] remained a pagan and favoured the Jews and Christians in his Empire. His plan was to induce the Pope and the king of France to cooperate with him in a crusade against Ḳalāʾūn. This scheme, however, did not materialise. The Sulṭān for his part entered into diplomatic negotiations with the republic of Genoa, with whom he concluded a commercial treaty; he had a kind of defensive alliance with king Alfonso of Castile and James of Sicily. Embassies were exchanged with the Byzantine Emperor, with the Emperor Rudolf of Hapsburg, the king of Yemen and the prince of Ceylon. The prince Tulan Mangū of Ḳipčaḳ, who became a convert to Islām, obtained from Ḳalāʾūn, as the first ruler in Islām, a title and a standard with a coat-of-arms.

It was Ḳalāʾūn's aim to extend his rule over the whole of Syria. To attain this end he did not hesitate to break his treaties with the Crusaders. For example at the beginning of 684 (1285) he fell suddenly upon the fortress of the Knights of St. John at Marḳab and undermined the walls so rapidly with his sappers, that the garrison had to surrender and depart. He adopted another plan to capture the stronghold of Maraḳiya, built in the sea near the coast and considered impregnable. It belonged to a vassal of Bohemund VII of Tripolis. Ḳalāʾūn pursued and threatened the latter so long that finally he bought it from his vassal, and let the Sulṭān dismantle it to appease him. Margaret of Tyre had to purchase peace with Ḳalāʾūn on humiliating terms. Having thus consolidated his position, he was able in 686 (1287) to think of depriving his old opponent Ṣonḳor al-Ashḳar of his possessions in Syria. In the course of several campaigns he compelled him to give up his kingdom and retire to Cairo. He threatened Khiḍr, prince of Karak, so long that the latter finally yielded up his principality to him. In 688 (1289) he decided to capture Tripolis, the largest town still in the possession of the Crusaders. Prince Bohemund had died and his mother and sister were making claims on the vacant throne. The Sulṭān intervened in the quarrel and finally began the siege of the town. Although Tripolis received help from the sea, its position soon became desperate, so that the mother of the late ruler left the town with the Genoese and Venetian colony. With the help of his sappers the Sulṭān succeeded in undermining the walls and took the town by assault. It was for the most part destroyed and not rebuilt till a few years later, several miles from the sea on the bank of the river Ḳadīsha. (From the Christian period date the great mosque, the Tailān mosque, both formerly churches, and the foundations of the citadel). The stronghold of Baṭrūn, south of Tripolis, was shortly afterwards taken. This was Ḳalāʾūn's last feat of arms. When about to depart next year to besiege ʿAkkā on the pretext that Muslims had been robbed and murdered by Christians there, he died quite near Cairo, just after starting for Syria. Besides his continuous campaigns in Syria he had also to wage war against Nubia. In two battles he was victorious against king Shamāmūn but he could only maintain his authority there as long as his armies remained. He gained no permanent success in Nubia, although he succeeded in making king Shamāmūn resume payment of the ancient tribute. He had frequently to take the field with full strength against the Beduins of South Palestine and Upper Egypt; it is a sign of his strength that he, unlike other Sulṭāns, was able to subdue the rebels completely. Ḳalāʾūn, on the whole, maintained his authority over the sacred city of Mecca, although the Sharīf from time to time endeavoured to make himself independent.

Sulṭān Ḳalāʾūn succeeded in consolidating Mamlūk power in Syria and gradually made good the damage done by the incursions and ravages of the Mongols. We find his renovations on a grand scale in the citadels of Aleppo, Baalbek and Damascus. His most famous building is the hospital in Cairo in which there were large wards for the different illnesses, laboratories, kitchens, ample storerooms with provisions and medicaments. It was connected with a mosque and a school (see below). He was the only one of the Mamlūk

Sulṭāns to found a dynasty; his descendant in the fifth generation reigned till 783 (1382).

(SOBERNHEIM)

ḲALAWDHIYA, according to Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iv. 167 a fortress near Malaṭya, undoubtedly the ancient Claudias, which is mentioned as early as Pliny, *Historia Naturalis*, v. 85 as Claudiopolis, and under the later Roman Empire was one of the *castra praesidiaria*, the fortified permanent camps on the eastern frontier between Samosata and Melitene. It was taken from the Arabs and destroyed by Constantine V Copronymos, probably in 755 A. D., together with Malaṭya (al-Balādhurī, ed. de Goeje, p. 186 *sq.*, Abu 'l-Fidāʾ, *Taʾrīkh*, under the years 133 and 138 of the Hidjra; Barhebraeus, *Kethābhā de Makhtebhānūth Zabhnē*, ed. Bedjan, Paris 1890, p. 122 below), but retaken and rebuilt by the ʿAbbāsid al-Manṣūr in 140 (757/758) (al-Balādhurī, p. 188 = Ibn al-Athīr, ed. Tornberg, v. 382; Abu 'l-Faradj, *Taʾrīkh Mukhtaṣar al-Duwal*, ed. Ṣālḥānī (Bairut 1890), p. 210, without giving a date; according to Yāḳūt, *op. cit.*, in 141 A. H.) and the Christian population transplanted to Constantinople (Michael Syrus, *Kethābhā de Makhtebhānūth Zabhnē*, ed. Chabot, ii. 518, 522). In the first quarter of the tenth century the district of Melitene again passed under Byzantine rule and was not lost again until the Saldjūḳ invasion; in the tractate περὶ παραδρομῆς πολέμου (*de velitatione bellica*) of the second half of the tenth century the place is mentioned under the name τὰ Καλούδια along with Melitene (Leo Diaconus, ed. Bonn 1828, p. 250). Armenian bands entered the district of Ḳalawdhiya and established themselves there in 1066 (Michael Syrus, *op. cit.*, iii. 158). The Byzantines were followed in their rule in these regions by the Dānishmandoghlu and their rivals, the Saldjūḳs of Konya. In this period Ḳalawdhiya is repeatedly mentioned by the Syriac chroniclers, for the last time in the year 1273 (Michael Syrus, *op. cit.*, p. 304, year 1152, p. 400, year 1185; Barhebraeus, *op. cit.*, i. 522 = ii. 545, year 1257; *id.*, i. 549 = ii. 574, year 1273); among other things they report that in October 1152 the Euphrates overflowed its banks as the result of a great landslide and made a way out at the foot of the hills of Ḳ. (see Michael Syrus, *op. cit.*, p. 306 = Barhebraeus, *op. cit.*, i. 341, ii. 348). Ḥamd Allāh Mustawfī, *Nuzhat al-Ḳulūb*, ed. Le Strange, p. 98 *sq.*, knows Ḳ. under the name Erkalawdiya as a considerable fortified place in a fertile region, which produced corn, cotton, grapes and fruit plentifully; he thinks, like Yāḳūt, that Ptolemaeus, the author of the *Almagest* came from there, and was therefore called al-Ḳalawdī.

With this the place disappears from history; for, although Ḥādjdjī Khalīfa (xviith cent. A. D.) still mentions Erḳlādiya in his *Djihānnumā*, p. 601, he only knows it from Ḥamd Allāh Mustawfī and Otter, *Voyage en Turquie et en Perse* (Paris 1748), ii. 284 (beginning of the xviiith century) translates, as usual with him, only the statements of the Turkish geographer. The site has so far not been discovered; Ainsworth, *Travels and Researches in Asia Minor* (London 1842), i. 263 wishes to identify the ancient Claudias with the modern Kiakhta [q. v.], which is, however, impossible because the Syriac chroniclers mention Ḳalawdhiya and Kiakhta together contemporaneously as different places.

(J. H. MORDTMANN)

KALB, the dog, is also in Islām one of the "unclean beasts," primarily because its flesh may not be eaten (al-Nawawī, *Minhādj al-Ṭālibīn*, ed. v. d. Berg, iii. 312); and further because, according to the Ḥadīth, there are several special regulations regarding it. For example dogs render food which they lick impure and render unavailable water intended for ritual purifications (al-Bukhārī, *Wuḍūʾ*, bāb 33). Vessels, likewise, which have been licked by dogs, require to be cleaned several times, including once with sand. In a certain way they render impure the whole room in which they are; for angels do not enter a house in which there is a dog and Muḥammad had first to sprinkle the place on which a young dog had lain concealed with purificatory water before Djibrīl would appear to him (Muslim, *Libās*, trad. 31 *sqq.*). — Dogs "cut off the ṣalāt", i. e. they make the ṣalāt worthless when they come into the immediate vicinity of the man at prayer (Ibn Mādja, *Iḳāma*, bāb 30) and one is all the more inclined to attribute this rule to the impurity of the dog, as it also holds for menstruating women. The Arab commentators, however, explain it by saying that the dog frightens the worshipper and distracts him from his devotions (al-Sindī, commentary on Ibn Mādja as cited above). This is especially true of the black dog, for "he is Satan". This saying is either to be interpreted literally as meaning that Satan occasionally appears in the form of a black dog (cf. Faust) or it only means that black dogs in general are considered particularly dangerous. Dogs in general are considered noxious and should therefore be exterminated (al-Nasāʾī, *Ṣaid wa 'l-Dhabāʾiḥ*, bāb 9—14), but as "Allāh does not create anything in which there is not a trace of his wisdom" (al-Sindī, commentary on this passage), this rule is applied only to black dogs.

It is only permitted to keep dogs for hunting, for herding and for watching (al-Nasāʾī, *op. cit.*); whoever keeps a forbidden dog has to forfeit a portion of his possessions daily (cf. *Babylon. Talmud*, *Shabbath*, fol. 63a: "whoever possesses a dangerous dog keeps good fortune away from his house"). Dealing in dogs on the other hand is strictly forbidden (al-Bukhārī, *Buyūʿ*, bāb 25).

But in spite of its impurity and dangerousness

the Arabs are able to appreciate the good qualities and services of the dog. Muḥammad himself promises a woman a divine reward for a kindness, which she had done a thirsty dog (al-Bukhārī, *Wuḍū'*, bāb 33), and al-Ḳazwīnī (p. 403) characterises the dog as "a particularly intelligent, very useful animal, patient in hunger and on the watch, whose cleverness and fidelity are shown in many ways". Al-Ḳazwīnī describes very fully the symptoms of hydrophobia; cf. thereon *Babylon. Talmud*, *Yōmā*, fol. 83b: "there are five symptoms in a mad dog: its mouth is open, its saliva runs, its ears have a foul smell, its tail lies limply on its hips and it wanders aimlessly along the sides of the streets".

The dog of the seven sleepers (Sūra xviii. 17) is a special matter. According to al-Baiḍāwī (ed. Fleischer, p. 557) it was a dog with the gift of speech, in al-Ṭabarī's view (*Tafsīr*, xv. 141, 1st ed. p. 131), a man in the form of a dog, but perhaps simply an ordinary dog. — On the dog-star (Sirius) see AL-KALB and AL-SHI'RĀ.

AL-KALB, the Dog-Star in astronomy: *Ṣūrat al-Kalb al-akbar* (the constellation of the Great Dog) and *Ṣūrat al-Kalb al-aṣghar* (constellation of the Little Dog) or also *Ṣūrat al-Kalb al-Mutaḳaddim* (constellation of the forerunner dog; προκύων), the former known as canis major and the latter as canis minor, two constellations of the southern heavens, the names and configuration of which the Arabs took out of *al-Madjisṭī* of Ptolemaios. Like the latter, the Arabs allotted 18 stars to the ṣūra proper of Canis Major, of which Sirius (*al-Shi'rā 'l-'abūr*) is of the first magnitude (actually 1.6), while outside of the constellation lie 11 stars, and to Canis Minor two stars of which Prokyon (α Canis Minoris, *al-Shi'rā 'l-ghumaiṣā'*) is also of the first magnitude (actually 0.5). As regards the stellar co-ordinates (latitude and longitude), the star-catalogues of 'Abd al-Raḥmān al-Ṣūfī (d. 376 = 986) and al-Bīrūnī (d. 440 = 1048) are based entirely on the Ptolemaic *Almagest*, while the star-catalogue of Ulugh Beg prepared for the period 1437 contains numerous new definitions of star positions.

The name Dog-Star probably goes back to ancient Egypt where the modern Sirius (σείριος = burning, brilliant — with the addition of *Kûon* = Dog-Star) was called *Sopdet*, which undoubtedly became the Greek *Sothis*. The name of the star had originally nothing to do with dog, but in the Greek terracottas which are frequently found in Egypt, Isis, to whom the star was sacred, is often represented with a dog and (according to L. Borchardt) with a particular kind of dog, the so-called Armant (Erment)-dog. Sirius alone is also reproduced in terracottas in that way; sometimes he also has a star above his head. According to Borchardt, it is not improbable that the star which appears in the star-tables from the Ramesid graves, which precedes or follows Sopdet, is the modern Prokyon.

In Babylonia Sirius was called "Arrow-Star", never Dog-Star. The older Babylonian name (according to F. X. Kugler) was *Kakkab miṣhri*, the late Babylonian *Kak Kashti* ("weapon of the bow" = "arrow").

KALB b. WABARA, the eponymous ancestor of the tribe of Kalb, a confederation of nomadic Syrian Arabs attached to the powerful Ḳuḍā'a [q. v.] group. The Banū 'Udhra [q. v.] have been the most famous among the clans of the Kalb since the Hidjra, especially in literary history. The pre-Muḥammadan annals of Kalb are very obscure and semi-fabulous. Zuhair b. Djanāb [q. v.], an almost legendary personage — reckoned among the *mu'ammarūn* or centenarians —, is said to have been one of their principal chiefs. They seem to have developed independently of other tribes in the Peninsula and to have had no relations with them. Their dialect showed curious peculiarities and we know of no pre-Islāmic poets using it. About the time of the Hidjra they were the most important Arab group in Syria.

The conquest of this country brought them to the front, not least through the close alliance made by Mu'āwiya I with their tribe, a union sealed by his marriage with Maisūn [q. v.], mother of Yazīd I. This political alliance brought them into high office, at court and in the army; to the latter they furnished disciplined contingents and captains of great bravery. Towards the middle of the first century A.H. their numbers must have been considerable: 2000 of them were receiving the pension of 2000 dirhems, the *sharaf al-'aṭā'*, a distinction reserved for the *ashrāf* or nobles. Half-settled, half-nomadic they covered with their huge flocks — for they were great herdsmen — the Samāwa the steppes separating Syria from the 'Irāḳ and hence called Samāwa of Kalb and desert of Kalb. They held the springs, the oases at the east and south of Ḥawrān, especially Dawmat al-Djandal, Tabūk and several others dotted about the Wādī 'l-Ḳurā with their palm-groves, the property of the Banū 'Udhra. In Syria they were grouped round Salamiya and Palmyra, towns which belonged to them. A part of the district of Emesa and of the lower valley of the Orontes were united in their territory and in

the Ghūṭa [q. v.] of Damascus a number of villages belonged to the Kalb. The possession of commercial centres like Palmyra and Dūmat al-Djandal leads us to suppose that this active Syrian tribe must have profited by the caravans passing by these routes, still very much used in the first century of Islām.

They seem to have inherited the ancient hegemony of the Ghassānids. Like the latter and other Syro-Arab tribes at the time of the Hidjra the great majority of them professed the Christian religion and probably were Monophysites. They gradually exchanged it for Islām; one group is even said to have sent a deputation to the Prophet. In the following of the latter several Kalbīs — we may mention Zaid b. Ḥāritha, his adopted son, and Diḥya b. Khalīfa, his diplomat — rose to fill important positions. Islām spread among the Kalb, especially from the time when frequent marriages — the first that of Nā'ila, wife of the Caliph 'Othmān [q. v.] — with the Omayyads assured them preponderance over the other tribes. Yazīd I, with his mother Maisūn, passed a part of his youth in the desert of Kalb and contracted a marriage with a Kalbīya. The supremacy of this tribe and of the powerful family of Baḥdal [q. v.] incited the Ḳais against them. Refusing to recognise Mu'āwiya II, the latter declared for Ibn al-Zubair [see 'ABD ALLĀH B. AL-ZUBAIR]. The victory of Mardj Rāhiṭ [q. v.], due mainly to the bravery of the Kalbīs, completed the rupture between them and the Ḳais. Burning for revenge, they attacked the Kalb everywhere and succeeded in driving them out of Mesopotamia and the adjoining districts of the Samāwa. Besides, with the advent of the Marwānids, their popularity had sunk for the time at the court of Damascus, where their striking triumph at the battle of Mardj Rāhiṭ gave offence. They were not long in regaining their influence. They continued to figure among the most stalwart supporters of Omaiyad rule. On several occasions, their contingents rendered effective assistance in retaking the 'Irāḳ from the rebels in the East. They were therefore proclaimed the bravest among the Ḳuḍā'a. In a word, the name of Kalbī had become synonymous with partisan of the Omaiyads. The almost constant policy of this dynasty was to rely on the Kalbī alliance and through it on the support of the other Syrian tribes. A tradition said that the Kalb would be the last adherents of al-Sufyānī [q. v.]. This state of affairs inevitably led to a violent reaction under the 'Abbāsids and precipitated the fall of the Kalb, decimated by their long struggle with the Ḳais and their active participation in all the wars of conquest. Soon their solidity was broken up and the designation of Kalbī, an object of suspicion to the Baghdād government, gradually disappeared. Ibn Sa'īd, quoted by al-Ḳalḳashandī (in his *Nihāyat al-Arab*), says that in his day there were great numbers of them settled on the shores "of the straits of Constantinople and divided equally between Christianity and Islām".

AL-**KALBĪ**, a family of scholars of Kūfa. The elder al-Kalbī, ABU 'L-NAḌR MUḤAMMAD (B. MALIK, according to Ibn al-Kūfī in the *Fihrist*) B. AL-SĀ'IB B. BISHR, whose grandfather with his sons al-Sā'ib, 'Ubaid and 'Abd al-Raḥmān had fought by the side of 'Alī in the battle of the Camel and whose father had fallen by the side of Muṣ'ab b. al-Zubair, had taken part in the battle of Dair al-Djamādjim [q. v.] in 82 (701) as a follower of 'Abd al-Raḥmān b. Muḥammad b. al-Ash'ath [q. v.]. He then devoted himself to historical and philological studies; he read the *Naḳā'iḍ* of Farazdaḳ [q. v.] with the poet himself. He lectured in Kūfa on Ḳor'ānic exegesis and history; at the invitation of Sulaimān b. 'Alī he expounded the Ḳor'ān for a time in the latter's house at Baṣra. His commentary on the Ḳor'ān was still used by al-Tha'labī († 427 = 1036; q. v.) (see *Cat. Codd. MSS. Or. in Museo Britannico*) pars ii. Nº. 821). He died in 146 (763).

His son ABU 'L-MUNDHIR HISHĀM mainly continued his father's historical studies, in which the latter had been his teacher. Both scholars have often been attacked by critics of traditions and even accused of forgery (see *Kit. al-Aghānī*, ix. 19; xi. 48; xviii. 161; Goldziher, *Muh. Studien*, i. 186); but on the other hand they did not lack warm defenders (e. g. Yāḳūt, *Mu'djam*, ed. Wüstenfeld, ii. 158). Modern research has confirmed many of their statements, which they reached sometimes by regularly scientific methods such as the study of inscriptions, against the fanatical criticism of their co-religionists (see Nöldeke, *Gesch. der Araber u. Perser*, p. xxvii.). Muḥammad, who worked for a time also in Baghdād, died in his native town of Kūfa in 204 (819), according to others in 206.

Of the 140 works of Muḥammad, listed in the *Fihrist*, pp. 95—98), there have survived: 1. *Kit. al-Nasab al-Kabīr* or *al-Djamhara fi 'l-Nasab* (*Djamharat al-Ansāb* in Ḥādjdjī Khalīfa), on the genealogies of the Arabs in a MS. of the Escorial (see Casiri, *Bibl. arabico-hispana*, Nº. 1693), of whose second volume the Brit. Museum (see *Cat. Codd. MSS. ... Mus. Brit.*, Pars ii, Nº. 915) owns a modern, almost worthless copy, perhaps only of an extract; a fragment of the work is perhaps preserved in a Paris manuscript (Bibl. Nat., de Slane, *Cat.*, Nº. 2047). Of an apparently much condensed version of the work by Abū Sa'īd 'Alī b. Mūsā al-Sukkarī (d. 465 = 1075), which is chiefly based on Muḥammad b. Ḥabīb's recension, but also uses that of Ibn al-A'rābī and other fundamentally independent sources also, the first volume is preserved in the British Museum (see *Cat.*, Nº. 1202 and also p. 783*b*). The extract by Yāḳūt is in Cairo, Khed. Library, see *Fihrist*, v. 150; Vollers, *Zeitschr. d. Deutsch. Morg. Gesellsch.*, xliii. 116). 2. *Kit. Nasab Fuḥūl al-Khail fi 'l-Djāhilīya wal-Islām* (cf. Hammer, *Denks. der Wiener Akad.*, phil.-hist. Kl., vi. 214, nº. 50) in Gotha (see Pertsch, *Die arab. Hdss.*, Nº. 2078) and in the Escorial (see Casiri, Nº. 1700, 2). 3. *Kit. al-Aṣnām*, or more accurately *Kit. Tankīs al-Aṣnām*, which Aḥmed Zeki Pasha [Ibn al-Kalbi, *Le Livre des Idoles* (*Kitāb al-Aṣnām*), Cairo 1914] has published. An apparently very full synopsis which enables us to judge of the extent and arrangement of the book is to be found in 'Abd al-Ḳādir al-Baghdādī's *Khizānat al-Adab*, iii. 242—6. The numerous extracts in Yāḳūt have been collected by Wellhausen, *Reste arab. Heidentums*², p. 10—64 [cf.

also 243) and translated and annotated. 4. An extract from the *Kit. al-Kalb* (*Fihrist*, p. 97, 18) is given by Ibn al-Anbārī in his commentary on the *Mufaḍḍalīyāt*: see C. J. Lyall, *Ibn al-Kalbī's Account of the first Day of al-Kulāb* in the *Orient. Stud. Th. Nöldeke gewidmet* (Giessen 1906), i. 125—154.

(BROCKELMANN)

ḲAL'E-I SEFĪD, a fortress in Fārs, in 30° 10' N. Lat. and 51° 30' E. Long. (Greenwich). It is built on a mountain with a flat top, in the eastern part of the valley of Kohrа, which falls steeply down on all sides. On its summit, which can only be reached by cliff-paths, lies an extensive well-wooded plateau watered by numerous springs. A strong garrison is necessary for its defence as is noted in the *Fārsnāma*. Descriptions of the fortress and the country round it are given, among Oriental writers for example by Ibn al-Balkhī in the *Fārsnāma* (the pertinent passage is copied by Mustawfī, *Nuzhat al-Ḳulūb*, 'Alī Yazdī and Mīrkhwānd (see *Bibl.*). Of descriptions by European travellers in the xixth century, that of Stolze deserves special mention; along with Andreas he explored the mountain and castle thoroughly. The statements of Kinneir who visited Ḳal'e-i Sefīd in 1810 are unreliable, according to Stolze.

The name of the fortress is given in the Persian geographers and historians as Ḳal'e-i Isfīd (Sefīd, Sepīd), the "white citadel"; Ḳal'e-i Ispīd-dīz (the "white fortress") is also found; Ḳal'e-i Sefīd is the only form in use at the present day. Translated into Arabic the name is given in Ibn al-Athīr (ed. Tornberg), xi. 46 as al-Ḳal'a al-Baiḍā'. The name "white citadel" which is found elsewhere as a name for a castle in areas where Arabic and Persian are spoken (e. g. in al-Ḥīra, al-Madā'in, in the oasis of Ruḥbe east of Ḥawrān, and in the region of Ḳairawān, in Afghanistān, etc.; for Biredjik cf. above i. 723) may very probably originate in the dazzling white colour of the building-stone used. The name Ḳal'e-i Gul u Gulāb (citadel of the rose and rose-water), borne by Ḳal'e-i Sefīd in al-Bundārī, *Tawārīkh Āl-Saldjūḳ* (ed. Houtsma, 2, p. 188, 13) is remarkable.

Ḳal'e-i Sefīd is the most noteworthy point on the mountain road which leads from Behbahān to Shīrāz and furnishes communication between Khūzistān and Fārs. It may be regarded as certain that a commanding place like this was very early fortified. The "Persian passes" through which Alexander the Great tried to enter the ancestral home of the Achaemenids and which were defended by the Satrap of Persis, Ariobarzanes, with his strong forces, have often been sought in the valley of Ḳal'e-i Sefīd; e. g. by Vincent, Mützel, Droysen, Forbiger. Ritter (*Erdkunde*, ix. 138) in differing from these, considers Ḳal'e-i Sefīd to be the stronghold of the Uxians and places the "Persian Gates" farther east. Ritter's view has been attacked particularly by Mützel in his edition of Curtius (Berlin 1841), p. 434 sq. and by Stolze (*op. cit.*, p. 262 sq.). That the region of Ḳal'e-i Sefīd does not correspond to the situation of the "Persian Gates" of the historians of Alexander and that the latter should be located elsewhere has been fairly convincingly proved by Stolze, *op. cit.*

Ḳal'e-i Sefīd is not mentioned by the Arab geographers of the middle ages. Like the adjoining town of Nawbandjān (Nawbandadjān) it must have been allotted to the Persian province of Sābūr in the Caliphate period. From the xiith century on we find cropping up in the Oriental sources a nomadic people named the Shūl, after whom the whole area, inhabited by them from the west of Shīrāz to the frontiers of Fārs and Khūzistān was called Shūlistān. There is definite evidence to show that Ḳal'e-i Sefīd belonged to Shūlistān. On the Shūl and the land of Shūlistān cf. the references in Quatremère, *op. cit.*, p. 380 sq. and also Mustawfī, *Ta'rīkh-i Guzīda* (ed. Browne, Gibb Mem. xiv.), p. 538, 658, 660, 696, 726.

Ḳal'e-i Sefīd is frequently mentioned by Persian poets and chroniclers. It is first found in Firdawsī's *Shāhnāma* (ed. Mohl, ii. 92, 245 sq.); here the conquest of the stronghold is related as one of the noteworthy deeds of the hero Rustam. As the *Fārsnāma* (written about 500 = 1106) reports, the fortress of Ḳal'e-i Sefīd had lain in ruins for many years until it was rebuilt by a certain Abū Naṣr from Tīr-Murdān (a district of the province of Sābūr) during the turmoils of the last decades of Būyid rule, that is in the first half of the vth (xith) century. The mountain, difficult of access, served not infrequently in wartime as a secure hiding-place. For example in 534 (1139) Buzāba, Governor of Fārs, retired here before Ḳarā Sonḳor, Atabeg of the Saldjūk Sulṭān Mas'ūd; cf. the article BUZABA, i. 809). The Salghurid Abū Bakr, Atabeg of Fārs from 623 to 658 (1226—1260) (on him see above i. 82) transported his treasures to Ḳal'e-i Sefīd and placed a garrison in the citadel in order to have a place of refuge here in case of a catastrophe. The last Atabeg of Fārs of the Salghurid dynasty, Saldjūkshāh, met his death at the foot of Mount Ḳal'e-i Sefīd in battle with one of Hülägü's generals in 663 (1264); see J. v. Hammer, *Gesch. der Ilchāne* (Darmstadt 1842), i. 243 and cf. also Mustawfī, *Ta'rīkh-i Guzīda*, p. 509.

Although Hülägü issued an order to destroy all the fortresses in the lands conquered by him, an exception was made of Ḳal'e-i Sefīd, as is expressly mentioned; cf. the passage in the *Ta'rīkh-i Waṣṣāf* in Quatremère, *op. cit.*, p. 382. The citadel could therefore continue to serve as a place of refuge, and was also on several occasions used as a state-prison for political opponents. Thus for example Mas'ūd Shāh of the Indjū dynasty, who ruled as governor of Fārs from 736 (1335) imprisoned his brother Muḥammad in Ḳal'e-i Sefīd (cf. above ii. 504); when later Abū Isḥāḳ, a younger brother of the Mas'ūd Shāh just mentioned, came into conflict with the Muẓaffarid Mubāriz al-Dīn and had to flee after the capture of his capital Shīrāz in 754 (1353) he went to Ḳal'e-i Sefīd (see Mīrkhwānd's account in Quatremère, *op. cit.*, p. 382; Mustawfī, *Ta'rīkh-i Guzīda*, p. 658, 11 sq.; and cf. above ii. 804). A few years later the sons of Mubāriz al-Dīn, Shāh Sulṭān and Shāh Shudjā' rebelled against their father, blinded him and imprisoned him in Ḳal'e-i Sefīd

in 759 (1358); see Mustawfī, *Ta'rīkh-i Guzīda*, p. 681; Defrémery in the *Journ. Asiat.* 1844, ii. 112. In 785 (1383) Shāh Shudjā' had his son Sulṭān Shibli sent to Ḳal'e-i Sefīd as an alleged rebel (see Mustawfī, *op. cit.*, p. 724; Quatremère, *op. cit.*, p. 382; Defrémery, *op. cit.* (1845), i. 437).

Ḳal'e-i Sefīd has attained special fame through its capture by Tīmūr. The latter on his second campaign in *Fārs* in 795 (1393) passed by the road from Behbahān to Shīrāz, besieged this barrier fortress, considered impregnable, and stormed it on the third day. All the members of the Muẓaffarid dynasty were captured and put to death (cf. Sharaf al-Dīn 'Alī Yazdī, *Ẓafarnāma*, Bibl. Ind., New Series, Nº. 616, Calcutta 1887, i. 600 *sq.*; Mustawfī, *op. cit.*, p. 751.

We read of the capture of Ḳal'e-i Sefīd by Ḥamza-Bey several centuries later, in the reign of Shāh 'Abbās I; see Quatremère, *op. cit.*, p. 384. The Māmasenī have now settled in a large part of what was once called Shūlistān; they are a robber Lūr-tribe, who belong to the Bakhtiyārī [q. v., I, 603]. They centre round Ḳal'e-i Sefīd. On them see Layard in the *Journ. of the R. G. S.*, xv. 28; Ritter, *Erdkunde*, viii. 390, ix. 137; C. de Bode, *Travels in Luristan and Arabistan* (London 1845), i. 210, 219 *sq.*, 262 *sq.* When the Māmasenī in the latter part of the reign of Fatḥ 'Alī Shāh (1797—1834) were in constant rebellion under a robber chief named Walī Khān Bakash, an army of Ādharbaidjānī troops was sent against them, who besieged Ḳal'e-i Sefīd and forced the stubborn defenders of the citadel to yield (cf. Curzon, *op. cit.*).

It should further be mentioned that below the fortress on the mountain there was at one time a second smaller castle, the name of which is variously given as Asṭak (*Fārs nāma*, p. 158, 17) or Nishnāk (Mustawfī, *Nuzhat al-Ḳulūb*, p. 132, 3); further variants of the name are given here in note 1).

The little village of Tell Espīd should not be confused with this; it lies northwest of Ḳal'e-i Sefīd in the adjacent plain on a hill some 2400 feet high; cf. Wells in the *Proc. of the Roy. Geogr. Soc.*, 1883, v. 161 and Herzfeld, *op. cit.*, p. 85.

(M. STRECK)

ḲAL'E-I SULṬĀNIYE, in popular speech usually ČANAḲ KAL'ESI ("Pot-castle"), the town and fortifications known to Europeans as the Dardanelles, the chief place in the sandjaḳ of Bigha [q. v., I, 716, cf. also DARDANELLES, I, 922], situated at the narrowest part of the straits. The modern settlement has taken the place of the very ancient seaport of Abydos; the latter name, indeed, survived down to the xvith century on Italian charts in the form Avido, Aveo, as the name for Ḳal'e-i Sulṭāniye (the bay: la bocca d'Aveo). While the form Andus [q. v.] found in Yāḳūt, *Mu'djam* (ed. Wüstenfeld), i. 374 also is to be read Abydus, the statement of Joh. Leunclavius, *Historiae Musulmanae*, Frankfurt 1591, p. 182, 55, taken from the *Codex Hanivaldanus* (Neshrī), that Abydos is called Aydos by the Ottomans can be said to be wrong. There is a confusion with Aidos in Ḳoča Eli and the whole story of the conquest in Leunclavius refers to this place and not to Abydos. Here from the days of the Roman empire was the chief customhouse of Byzantium, where every vessel entering the straits had to pay a tithe (Agathias, v. 12; cf. the customs regulations of Abydus published by A. D. Mordtmann Jun. in the *Athen. Mitteil.*, vi. 182 *sqq.*) and it was strongly fortified, as the key to the capital. In spring of 717 the town was taken along with the coasts of the Hellespont by the Umaiyad general Maslama (Theophanes, ed. Bekker, Bonn 1839, p. 395). In those days there was attached to a tower here the great chain which barred the Muslim ships' entrance to the straits (Ibn Khordādhbeh, ed. de Goeje in the *Bibl. Geogr. Arab.*, vi. 103 *sqq.*; cf. Yāḳūt, i. 374; al-Idrīsī, *Nuzhat al-Mushtāḳ*, Fr. transl. by Jaubert, *Géographie d'Edrisi*, ii. 135, 301, 303). While the siege and capture by Emīr Orkhān are as uncertain as the crossing of the Dardanelles attributed to him at this place (cf. Joh. Draeseke in the *Neue Jahrbücher für klass. Altert.*, xxxi. (1913), 476—504), the statement that in the reign of Murād about 1354 the straits were crossed in small boats at Abydus, is more worthy of belief (Dukas, ed. Bekker, Bonn 1834, p. 14, 4, 39, 13; Phrantzes, ed. Bekker, Bonn 1838, p. 45, 12). This would, it is true, be in contradiction to the Turkish account which places the crossing at Kemer opposite Hexamilia. The place did not become of any considerable importance in the Muslim period until the time of Muḥammad II, who took it in 1461, built great defensive works here for the protection of Constantinople, which he had recently captured, and founded a town here (Chalkokondylas, ed. Bekker, Bonn 1843, p. 529, 18 *sqq.*). The fortress was armed with about 30 large and a number of smaller guns. All incoming ships had henceforth to cast anchor there, to show their papers and pay toll (Chalkokondylas, *op. cit.*, p. 530; cf. thereon Kritobulos, ed. C. Müller, *Fragm. Hist. Graec.*, v. 146). The town was now regarded as the main defence of the Dardanelles, although by the middle of the xvith century we find European travellers who sailed through the straits wondering at the insufficiency of the defences; for example Pierre Belon, to whom the walls and towers, said to be built out of the ruins of Scamandria, seemed not nearly strong enough

for the "key to Turkey" (*Les observations de plusieurs singularités*, Paris 1854, p. 77[b] *sqq.*; there, also, is a picture of the Dardanelles forts following p. 78). It is certain that European fleets could pass the straits unhindered in the middle of the xvii[th] century, and that the bastions on both European and Asiatic sides were in almost complete ruins. Although about 1550, 32 great guns still barred the entrance to hostile ships (cf. Charrière, *Négociations*, Paris 1848, i. 374 and 380, where "les deux chasteaulx du Hellespont nommez Dardanneaulx", the "XXXII gros canons dont nul navire ne peult entrer ou sortir malgré eulx" as well as the search of a ship are described), a very short time after, it was no longer possible to think of any serious resistance being made by them. It was the vigorous Sulṭāna Kösem, who reigned for a period for her minor grandson Meḥemmed IV, who, with the grand vizier Meḥmed Köprülü, devoted special attention to the decaying Dardanelles forts and decided to renovate and remodel them completely. The building of Seddi 'l-Baḥr and Ḳūm Ḳal'e, the two so-called "new castles", was also decided upon at this time (cf. J. v. Hammer, *Gesch. des osman. Reiches*, Pest 1827—35, v. 516). In 1658 the work was begun under the supervision of 'Ankabūt Aḥmed Pasha, commander of the Dardanelles, and under the direction of the architect Muṣṭafā Agha, and by Sept. 1659 Sulṭān Meḥemmed IV was able to inspect the new works (cf. Na'īmā, Stambul 1147, ii. 698 *sqq.*, 704; J. v. Hammer, *op. cit.*, vi. 65 *sqq.*) and dedicate a mosque (Ewliyā, v. 307; according to him, the name Kal'e-i Sulṭāniye arose at this time in honour of Kösem Wālide, but it is probably older). The appearance of the new citadel is accurately known from European descriptions of the time. The fortress proper was surrounded by a strong wall at each of the four corners of which there rose a fortified tower. In the middle was the donjon, which had been increased in height. Nearly 30 guns were placed here in no regular order, so as not to injure the opposite works of Kilidu 'l-Baḥr when they were fired. Behind the defences lay the town proper, inhabited chiefly by Turks and Jews, numbering some 3000 inhabitants about 1680 (cf. Grelot, *Relation Nouvelle d'un voyage de Constantinople*, Paris 1681, p. 24, 28, 30 with a picture of the Dardanelles defences on p. 41); further pictures in Pitton de Tournefort, *Relation d'un voyage du Levant*, Paris 1717, i. 453 *sqq.*, Amsterdam 1718, i. 175 *sqq.*). There were definite rules regulating the passage of ships. Every merchantman had to announce its arrival with 3, 5, 7 shots to which 1—5 were fired in reply. This had to be returned with 3, 5, 7 shots and not till then could the voyage be continued. All ships coming from Constantinople had to cast anchor here to be examined and pay tolls (cf. M. de Thevenot, *Relation d'un voyage fait au Levant*, Paris 1665, p. 32 *sqq.*; Jacob Spon and George Wheler, *Voyage d'Italie, de Dalmatie, de Grèce et du Levant fait aux années 1675 et 1676*, the Hague 1724, i. 123 *sqq.*). Not more than five Christian ships could go through at the same time (cf. Grelot, *op. cit.*, p. 30). These regulations survived into the xviii[th] century, although there was considerable laxity in their enforcement (cf. R. Chandler, *Travels in Asia Minor*, Oxford 1775, p. 11). A hundred years later the defences were again in the most wretched state, vividly described by Baron Franz von Tóth (Tott) (*Mémoires du Baron de Tott*, Amsterdam 1784, iii. 43 *sqq.*). In 1770 the Russian fleet was able to sail through the straits without opposition. Von Tott thereupon hurriedly repaired the fortifications (cf. Edgár Pálleni, *Báró Tóth Ferenc, a Dardanellák megerösitője*, Budapest 1916), without, however, being able to stop their decay. The town seems to have been in quite a flourishing condition at this time, according to R. Pococke, *A Description of the East* (London 1743—1745), ii. 102—104, it was 1½ miles around and had 1200 inhabitants (200 Greeks, 100 Armenians and 50 Jews), who carried on a busy trade in silk, sailcloth and earthenware. The annual export was put at 15,000 dollars. A French Consul, as well as a Dutch and English dragoman had their offices in Kal'e-i Sulṭāniye. The potteries, which seem to have begun about 1740, were for a long time famous and gave the place the name Čanaḳ Ḳal'esi. The inhabitants lived in different quarters separated into nations. Armenians who fled from Shāh Ṭahmāsp are said to have been settled here as early as 1529 (according to Cabanel in V. Cuinet, *La Turquie d'Asie*, iii. 689 *sqq.*) but a regular Armenian colony only dates from about 1650. At the same time there is evidence of a, sometimes large, Jewish settlement, which played a prominent part in the business world (cf. Grelot, *op. cit.*, p. 24; Baron de Tott, *op. cit.*, iii. 59; J. B. Lechevalier, *Voyage de la Propontide*, Paris an VIII (= 1800), i. 14, according to whom the people were almost all Jews, who did a brisk business in provisioning passing ships (cf. thereon Grelot, *op. cit.*, p. 28). There is no documentary evidence of the presence of Greeks before 1690 in Kal'e-i Sulṭāniye. In the xix[th] century the fortress sank practically to insignificance. The bold passage of the English fleet through the Dardanelles on Feb. 19, 1807 resulted in the defences being again repaired (cf. Zinkeisen, *Gesch. des osm. Reiches*, vii. 434) but without their afterwards keeping pace with the rapid development of modern artillery. A very full description of the fortifications in 1836 is given by Helmut v. Moltke, *Briefe über Zustände und Begebenheiten in der Türkei* (Berlin 1841), p. 51 *sqq.*, 8[th] ed. (1917), p. 55 *sqq.* and by Abercromby Grant, *Narrative of a Journey to Greece in 1830*, p. 431 (with sketches). Kal'e-i Sulṭāniye and its forts only became of considerable strategic importance again during the Great War, when as a result of an indirect bombardment from the Gulf of Saros by the Anglo-French fleets the town, which had been almost deserted by its inhabitants, suffered severe damage in March 1915 and was burned down. It had previously suffered from frequent fires and especially from the great earthquake of Aug. 9, 1912. About 1890 the town had about 11,000 inhabitants, 11 larger and several smaller mosques and 4 churches, but now the number must be much smaller.

(FRANZ BABINGER)

ḲALGHA, the title of the heir-apparent among the Tatars of the Crimea from the time of Mengli Girāy (last rule 883—921 = 1478—1515). The origin of the title is unknown; in manuscripts the same word is also written *ḳāghilghāy*, which has caused W. Smirnow (*Krimskoje Chanstvo pod verchowenstwom Ottomanskoi Porti do načala XVIII wjeka*, St. Petersburg 1887, p. 350 *sq.*) to suggest that we have here to deal with a non-Turkish (probably a Mongol) word. We have perhaps to connect with *ḳalgha* the Central Asian word *ḳalkhān*, a name frequently given to the prince of Balkh (Balkh appears as the residence of the heir-apparent beside Bukhārā, the royal residence of the Khān of the Özbegs); this word also is sometimes written *Ḳaʿlkhān* (no doubt for *Ḳaghilkhān*); cf. J. Senkowski, *Supplément à l'histoire générale des Huns* etc., St. Petersburg 1824, p. 74 *sq*. When, under Muḥammad Girāy II (985—992 = 1577—84), Alp Girāy, brother of the Khān, was designated *ḳalgha*, the rank of second heir-apparent (*walī ʿahd thānī*) was created for the Khān's son, prince Seʿādat Girāy and retained in later reigns. The name Nūr al-Dīn of this prince's tutor (*atālīḳ*) was transferred to the prince himself and to his rank (Muḥammad Riḍā, *al-Sabʿ al-Saiyār*, Kazan 1832, p. 103, more fully in the abbreviated recension by Hurramī Čelebi, which only exists in manuscript; on the manuscript see A. Samojlović in the *Izv. Tavrič. učenoi arch. kom.*, Nº. 49; cf. O. Retowski, *Die Münzen der Girei*, Moscow 1905, p. 93 = *Trud. Mosk. Numizm. Obšč.*, iii. 32). Henceforth the Nūr al-Dīn along with the *ḳalgha* is found not only among the members of the ruling house but also among the members of the most important families like the Shīrin and Manḳit (cf. Radloff, *Wörterbuch*, ii. 253, where both family names are erroneously taken as adjectives). (W. Barthold)

ḲALHĀT (in Marco Polo Calatu, in Portuguese writers Calaiate), a once flourishing seaport in ʿOmān lying northwest of Rās al-Ḥadd. Ibn Baṭṭūṭa, who visited the town during his travels in ʿOmān, specially mentions the fine streets and splendid lofty mosque, which afforded a wide view of the sea and the harbour and was built by the pious *bībī* (of noble family) Maryam. The inhabitants of the town, who lived by trading in Indian products, and spoke a bad Arabic, were members of the Ibāḍiya sect (see ibāḍiya), but concealed their creed from their rulers, the kings of Hormuz [q. v.] (cf. also Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xii. 198 below), who were Sunnīs. According to Yāḳūt, who calls Ḳalhāt the most beautiful district in ʿOmān and places its foundation in the xiith century, the sectarians of this town openly professed their faith. The Portuguese broke the power of the kings of Hormuz in the beginning of the xvith century.

al-**ḲĀLĪ**, Abū ʿAlī Ismāʿīl b. al-Ḳāsim b. ʿAidhūn b. Hārūn b. ʿĪsā b. Muḥammad, a great Arab philologist, born in Djumādā II, 288 = May-June, 901 (according to others in 280), at Manāzdjird, a little town in Armenia which was then a dependency of Diyār Bakr, and died at Cordova on Djumādā I 7, 356 = April 19-20, 967 (according to others Rabīʿ II, Djumādā II, 356, and also 360 according to Ibn ʿIdhārī).

In 303 having gone to Baghdād in company with some people of the town of Ḳālīḳalā, he was confused with them and in consequence was surnamed al-Ḳālī. However, he is usually called in the East Abū ʿAlī al-Baghdādī. After studying Islāmic Tradition and particularly Arabic language and literature, al-Ḳālī, at the end of his resources, left Baghdād in 328 (939/40) and went to Spain where he did not arrive until 330 = 941/2, in the reign of the Caliph ʿAbd al-Raḥmān al-Nāṣir. The son of this prince Abū ʾl-ʿĀṣ al-Ḥakam who was fond of learning and of scholars received him very kindly, and, indeed, it is said that even he had written to the East to get al-Ḳālī to come to the West. Abū ʿAlī arrived in Cordova on Shaʿbān 26, 330 (May 16, 942), where he began to teach Tradition and especially the Arabic language and literature. As teachers he had ʿAbd Allāh b. Muḥammad al-Baghawī, ʿAbd Allāh b. Sulaimān b. al-Ashʿath al-Sidjistānī, Ibn Duraid, Ibn al-Sarrādj, al-Zadjdjādj, al-Akhfash al-Ṣaghīr, Niftawaih, Abū Bakr Ibn al-Anbārī, Ibn Ḳutaiba, Ibn Durustawaih, etc. Among his pupils we may specially mention the grammarian and lexicographer Abū Bakr Muḥammad b. al-Ḥasan al-Zubaidī.

Among his works we now only possess: 1º. *Kit. al-Amālī wa ʾl-Dhail wa ʾl-Nawādir*, a kind of anthology containing a large number of notes on proverbs, language and poetry, publ. at Būlāḳ in 1324; indexes of poets and rhymes have been published by F. Krenkow and A. Bevan at Leiden in 1913; 2º. *Kit. al-Nawādir*, part I, Cambridge, Univ. Libr., E. G. Browne, *A Hand-list of the Muhammadan Manuscripts*, Nº. 926; 3º. *Kit. al-Bāriʿ fī Gharīb al-Ḥadīth*, remained unfinished, Paris, Bibl. Nat., Nº. 4235.

Bibliography: Al-Ḍabbī, *Bughyat al-Multamis*, Nº. 547; Ibn al-Faraḍī, *Kit. Taʾrīkh ʿUlamāʾ al-Andalus*, Nº. 221; al-Maḳḳarī, *Analectes*, i. 536—560, ii. 48—52, 66, 107, 117, 124; al-Suyūṭī, *Bughyat al-Wuʿāt fī Ṭabaḳāt al-Lughawiyīn wa ʾl-Nuḥāt*, Cairo 1326, p. 198; Ibn Khallikān, *Wafayāt*, Cairo 1310, i. 74; al-Dabbāgh, *al-Falāka wa ʾl-Maflūkūn*, Cairo 1322, p. 114; al-Murtaḍā, *Tādj al-ʿArūs*, s. v. *Ḳālī*; Ibn ʿIdhārī, *al-Bayān al-Mughrib*, ed. Dozy, ii. 266; transl. Fagnan, Algiers 1904, ii. 413; al-Marrākushī, *Hist. des Almohades*, ed. Dozy, p. 16, transl. Fagnan, Algiers 1893, p. 20; Yāḳūt, *Muʿdjam al-Buldān*, ed. arab. Litt., i. 132, Suppl., ii. 692; Huart, *Litt. Arabe*, p. 160. (Moh. Ben Cheneb)

ḲALʿĪ, ḲALAʿĪ: 1. The name for tin, or for a specially good quality of tin among the Arabs, occasionally also called *al-raṣāṣ al-ḳalʿī* and *al-raṣāṣ al-abyaḍ*, i. e. "Kalʿī-lead" or "white lead"; see *Lisān al-ʿArab*, x. 167, 21; Dozy, *Supplément aux Dict. arab.*, ii. 397ᵃ; Vullers, *Lex. Pers.-Lat.*, ii. 733ᵃ; Quatremère in the *Journ. des Savants* 1846, p. 731. For other names of tin in Arabic (Ḳaṣdīr = Kassiteros, etc.) see e. g. al-Dimashḳī, *Nukhbat al-Dahr* (*Cosmography*, ed. Mehren), p. 54, 1. The word apparently comes from the Far East, from which the Arabs may possibly have got it directly, without the (not impossible) intermediary of modern Persian, which al-Djawālīḳī, *al-Muʿarrab* (ed. Sachau), p. 125, 6 demands (the original would be Persian *Kalkhā*). The correction *kalahī* for *Kalkhā* there proposed is based on Ibn Saʿīd, quoted in G. Ferrand, *Relations de voyages et Textes géograph.* ... *relat. à l'extrême-Orient* (Paris 1913—1914), p. 343. The word *Ḳalī* (in Ghīlānī: *Ḳālīk*) found in the modern Persian dialect of Māzandarān — see Melgunof in the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxii. 198 — must have come through the Arabic; from the latter the word entered Turkish: *Ḳalai* (Sāmī, *Ḳāmūs-i Türkī*, p. 1032) and thence into modern Greek: τὸ καλάι. As a loanword *ḳalaʿī* travelled still further, into Portuguese (*calaim*, *calin* = Indian tin); see Dozy and Engelmann, *Gloss. des mots espagnols et portugais dérivés de l'Arabe*², (Leiden 1869), p. 245; Yule and Burnell, *Hobson-Jobson*², (London 1903), p. 143. The cradle of the word might be the district of Kalah in the peninsula of Malacca, which was celebrated for its tin-mines (see KALAH above). The Arabic geographers and lexicographers usually derive the name Ḳalʿī from al-Ḳalʿa in India (= Kalah, q. v.); so, for example, Yāḳūt, *Muʿdjam* (ed. Wüstenfeld), iv. 162, 6; al-Fīrūzābādī, *al-Ḳāmūs* (Cairo 1301), iii. 71, 5; cf. also Ḥamd Allāh Mustawfī, *Nuzhat al-Ḳulūb* (ed. le Strange, Gibb Mem. Ser., xxiii.), p. 203, 1. At the same time the word — certainly erroneously — is also connected with an (alleged) tin-mining area al-Ḳalʿa in Ceylon (Yāḳūt, i. 21, 23; iv. 162, 14), in Spain (Yāḳūt, iv. 162, 13 sq.; Ḥamd Allāh Mustawfī, p. 203, 1) and in Yemen (Yāḳūt, iv. 162, 17; al-Fīrūzābādī, *op. cit.*).

The most usual word for tin in Malay at the present day seems to be *timah*. At the same time we find with this meaning also *kaling*, *kelang* — not *kilang*, as written by Langlès, Quatremère, Dozy-Engelmann, Yule-Burnell and others — which, according to the dictionaries, means primarily tin-plate, or tinned iron-plate (but nevertheless is the meaning tin an older one?); cf. Wilkinson, *A Malay-Engl. Diction.* (Singapore 1901), p. 497ᵇ; Wilkinson, *An abridged Malay-Engl. Diction.* (Singapore 1919) and Klinkert, *Nieuw Maleisch-Nederl. Woordenboek* (Leiden 1916). It is obvious that the Arabic *Ḳalʿī* is to be traced back not to *Ḳalʿa* (*Kalah*) but to this Malay word. Quatremère, *op. cit.*, definitely puts forward some such derivation of *Ḳalʿī*, whereas Dozy-Engelmann, *op. cit.*, and Yule-Burnell, *op. cit.*, leave the question undecided. Is the similarity of name simply an accident? It is hardly possible that the Malay *Kalang* itself is only a corruption of the Arabic *Ḳalʿī*. The further possibility has also been considered that the name of the district of Kalah — from the Malay *Kaling* — may mean simply "land of tin", a view expressed as long ago as Langlès in his edition of the voyages of Sindbād the Sailor in Savary's *Grammaire de la langue arabe* (Paris 1813), p. 499 = reprint (Paris 1814), p. 63. Yule and Burnell quote as an analogy the fact that the little state of Selangor (north of the town of Malacca) was formerly known as Nagri Kalang = "land of tin". To this we may add, quoting Wilkinson, *Malay-English Dictionary*, p. 526ᵇ, that *Kělang*, *Klang*, properly only the name of a district in Selangor and of a little township in this district, is also often extended to include the whole state of Selangor. Perhaps the origin of *Ḳalʿī* is to be sought in this Kalang.

2. The name of a particular kind of sword, which is often mentioned, especially in the old Arabic poetry. Cf., for example, Aws b. Ḥadjar (ed. Geyer, *Sitz.-Ber. d. K. Akad. der Wiss. zu Wien*, phil.-hist. Kl., 1892), xii. 33; Ruʾba b. al-ʿAdjdjādj (ed. Ahlwardt, *Sammlungen alter arab. Dichter*, iii. 137), Nº. 49, 111; scholiast to Ṭarafa, *Muʿallaḳa* (in Arnold, *Septem Moallakat*, Leipzig 1850, p. 61). On Thaʿālibī, *Laṭāʾif*, p. 102, 9, 130, 4 (quoted in Dozy, *Supplém. aux dictionn. arabes*, ii. 396ᵇ) see Fleischer in the *Sitz.-Ber. d. Sächs. Gesellsch. d. Wissensch.*, 1886, p. 45. Cf. also Ibn Saʿd, *al-Ṭabaḳāt*, I/i. 50, 11. This kind of sword is usually said to be of Indian origin (cf. for example al-Fīrūzābādī, *al-Ḳāmūs* under *ḳlʿ*.) and, indeed, Indian swords were from early times famous among the Arabs and celebrated by the poets; on this cf. Schwarzlose, *Die Waffen der alten Araber* (Leipzig 1886), p. 127 sq. and A. Siddiqi, *Studien über die persischen Fremdwörter im klassischen Arabisch* (Göttingen 1919), p. 88 sq. As a more definite place of origin we usually find the Arab geographers and lexicographers giving that al-Ḳalʿa from which the tin of this name comes. Occasionally also the Syro-Arabian desert (the Bādiya) or the district of Ḥulwān in the ʿIrāḳ is given as the place of origin; cf. *Lisān* and al-Fīrūzābādī, *al-Ḳāmūs* under *ḳlʿ*. The Yemen, which produced the finest swords next to India, is sometimes also described as the place of origin of the *ḳalʿī* sword, for example in the above quoted gloss to Ṭarafa's *Muʿallaḳa*. Jacob, *Altarabisches Beduinenleben* (Berlin 1897), p. 149, would like to decide in favour of Yemen, in particular the "fortress" (*ḳalʿa*) of ʿAden, in support of which could be quoted the fact that in a poem by ʿAlḳama (ed. Socin), Nº. 3, 4, there is mention of "pearls from Ḳalʿa" (*Ḳalaʿ*). Nevertheless, the derivation of the Arabic word from an East-Indian place al-Kalʿa (Kalah on Malacca: see KALAH) seems to me more probable. It is unnecessary to distinguish between two different kinds of sword, *ḳalʿī* and *ḳalaʿī* (see Freytag, *Lex. Arab.-Lat.*, s. v. *ḳalʿa* and *ḳalaʿa*), in spite of Schwarzlose, *op. cit.*, p. 130.

(M. Streck)

ḲĀLĪ ḲALĀ. [See Erzerum].

KALĪLA WA-DIMNA is the title of an Indian mirror for princes, formed by the corruption of the Sanskrit names of the two principal characters, two jackals, Karaṭaka and Damanaka (in the old Syriac translation the forms are still Kalīlag and Damnag); it was translated from Sanskrit into Pahlavī and thence into Arabic,

and became widely known in Muslim as well as Christian literatures.

1. **The original work.** The Indian original was composed by an unknown Vishnuite Brahman, according to Hertel probably about the year 300 A. D. in Kashmir; the main argument for this, the reproduction of denarius by *dīnāra* is, however, not cogent, as the pronunciation of the *e* as *ī* is older than Hertel supposes (see also A. Berriedale Keith in the *Journ. Roy. As. Soc.*, 1915, p. 505). It consisted of an introduction and five books each of which bore the name *tantra* i. e. "case of good sense". The book was intended to instruct princes in the laws of polity by means of animal-fables composed in perfect Sanskrit. The oldest descendant of the original work is the *Tantrākhyāyika*, rediscovered by J. Hertel (see *Tantrākhyāyika, die älteste Fassung des Pañcatantra*, transl. from the Sanskrit with introd. and notes by J. Hertel, 2 parts, Leipzig and Berlin 1909). A second recension of the original work is called the *Pañcatantra* (see J. Hertel, *Pañcatantra, etc.* in Harvard Oriental Series, Vols. 11—14): it has become a very popular book in India and is current there in countless versions. J. G. L. Kosegarten published an uncritical mixed text, Bonn 1848; on this Th. Benfey based his translation, *Pantschatantra, fünf Bücher indischer Fabeln, Märchen und Erzählungen*, transl. from the Sanskrit with introd. and notes, 2 parts, Leipzig 1859. In the introduction to this work the history of the migration of Indian literary subjects to Europe was first exhaustively investigated.

2. **The Pahlavi translation.** A rather early recension of the *Pañcatantra* was translated from Sanskrit into Pahlavi by order of the Sasanian king Khusraw Anūsharwān (531—579) by his physician Burzōe, whom he had sent to India for this purpose, and expanded by the addition of an appendix of fables from other Indian sources; of these the three first (chap. 11—13 in de Sacy) are taken from the twelfth book of the *Mahābhārata*, the other five (de Sacy's chap. 14, 15, 17, 18 and the story of the king of the mice, see below, not given in de Sacy) have so far not been found again in Indian literature, although there is no reason to doubt their Indian origin. Burzōe prefaced his translation with an autobiographical introduction which the vizier Buzurdjmihr, it appears, signed with his own name as an honour to the author (see *Burzōes Einleitung zu dem Buche Kalīla wa-Dimna*, transl. and annot. by Th. Nöldeke, *Schriften der wissensch. Gesellsch. in Strassburg*, Heft 12, Strassburg 1912).

3. **The old Syriac translation.** Burzōe's Pahlavi translation itself is lost; but by about 570 A. D. it had already been translated by the Periodeut Bōd into Syriac. This translation only survives in one manuscript, which was formerly preserved in the monastery at Mārdīn, then in the library of the Patriarch of Mōṣul and afterwards came into the possession of Mgr. Graffin in Paris. From a defective copy of this, which Socin had brought with him, Bickell prepared the first edition (*Kalilag und Damnag, alte syrische Übersetzung des indischen Fürstenspiegels*, text and Germ. transl. by G. Bickell, with an introduction by Th. Benfey, Leipzig 1876). F. Schulthess was later able to prepare a much more reliable text based on three new copies which Sachau had had prepared in Mōṣul (*Kalila und Dimna*, Syriac and German, Berlin 1911).

4. **The Arabic translation.** About three centuries later ʿAbd Allāh b. al-Muḳaffaʿ (see IBN AL-MUḲAFFAʿ, II, 404) translated Burzōe's Pahlavi version into Arabic. He wrote an original preface to his book, inserted in Burzōe's introduction probably the section on the uncertainty of religions, added after the first book of the *Pañcatantra* a chapter written by himself on Dimna's trial (chap. 6 in de Sacy), which by punishing the traitor satisfies the feeling of justice, outraged by the immoral teachings of this book, and apparently also added the chapter "monk and guest" (Nº. 16 in de Sacy). Ibn al-Muḳaffaʿ's edition was originally a stylistic work of art intended for literary connoisseurs; but from the nature of its matter, it soon became very popular and therefore much corrupted in transmission. Even the numerous quotations in Ibn Ḳutaiba's *ʿUyūn al-Akhbār* already no longer reproduce Ibn al-Muḳaffaʿ's text word for word. The fairly numerous manuscripts of the work are all of late date. Sylvestre de Sacy's edition (*Calila et Dimna, ou Fables de Bidpai*, Paris 1816) is based on an inferior manuscript and arbitrarily emended from other manuscripts (see Nöldeke, in the *Göttinger Gelehrte Anz.*, 1884, p. 676). In de Sacy's text, Ibn al-Muḳaffaʿ's preface is preceded by a new preface by an otherwise unknown Bahnūd b. Saḥwān or ʿAlī b. al-Shāh al-Fārisī, in which he gives an account of the history of the book in India, as well as a report said to have been written by Buzurdjmihr regarding Burzōe's mission to India with the commission to bring back the book; in several manuscripts this is followed by another story of Burzōe's being sent for a miraculous plant. Some manuscripts (see J. Derenbourg, *Directorium vitae humanae*, p. 323) add at the end two more fables of the heron and the duck and of the dove, the fox and the heron from other, as yet unknown sources. This latter story is also inserted in the oldest Oriental reprint of de Sacy's edition, Būlāḳ 1249 (according to Chauvin, *op. cit.*, p. 15, in the University Library of Cambridge; a copy in my possession also); from this it has passed into the more recent editions printed at Cairo, Mōṣul and Bairūt, the list of which in Chauvin, p. 13 *sqq.*, according to Cheikho (see below), p. 6, is not yet complete. Valuable contributions to the criticism of de Sacy's text from Italian manuscripts are given by I. Guidi, *Studii sul testo arabo del Libro di Calila e Dimna*, Rome 1873. The story of the king of the mice and his ministers, not given in de Sacy, which is shown by the Syriac text to belong to the Pahlavi work, was published by Nöldeke in text and translation in the *Abhandl. der Königl. Gesellsch. der Wissensch. zu Göttingen*, 1879, XXV, Nº. 4. The complete material from 16 Paris manuscripts for the story of the ascetic and the broken jug was given by Zotenberg in the *Journ. Asiat.*, Ser. 8, vii (1886), p. 117—123.

While the numerous printed editions of the East in the main reproduce de Sacy's text, A. N. Tabbara (*Kalila et Dimna, trad. arabe copiée d'après un ancien manuscrit trouvé à Damas, avec notes*, Beyrouth 1322 = 1904) claimed to have discovered a new source for textual criticism; but his manuscript (of 1080 = 1673) is too modern to afford new material and his edition is, besides, bowdlerised. On the other hand L. Cheikho found

in the Lebanon monastery of Dair al-Shīr a valuable manuscript of the year 749 = 1339, and made it accessible in an excellent edition: *La version arabe de Kalîlah et Dimnah d'après le plus ancien manuscrit arabe daté*, Beyrouth 1905. I have not seen the new edition by Khalīl al-Yāzidjī (ibid. 1908); that of Salīm Ibrāhīm Ṣādir and Shāhīn ʿAṭiya (ibid. 1910) is intended for school use. The modern European translations from de Sacy's text are given by Hertel, *op. cit.*, p. 393; to these may now be added M. Moreno, *La versione araba di Kalîlah e Dimnah*, transl. into Italian, San Remo 1910 (see *Riv. d. Studi Orient.*, vi. 201).

5. **Arabic versifications.** The translation by Ibn al-Muḳaffaʿ has been three times put into Arabic verse. The first version was made by his younger contemporary Abān al-Lāḥiḳī (q. v.; see also A. E. Krymski, *Abān al-Lāḥiqī, le Zindīq (environ 750—815), versificateur arabe des recueils des apologues indo-persans. Essai sur sa vie et ses écrits, tiré de l'unique manuscrit de Souli . . . , Bibl. Khéd. N°. 594, et d'autres sources primitives. Appendices: a. Barlaam et Josaph, essai littéraire-historique; b. Texte arabe intact d'al-Awrāq par Souli, éd. en collaboration avec* Mirza Abdoullah Ghaffarov (also in Russian with Russian title) Moskva 1913; on the manuscript cf. Horovitz in the *Mitt. des Seminars für Orient. Sprachen*, Berlin, x. 35. This version is lost; with the help of it, but on the basis of the text of Ibn al-Muḳaffaʿ about the year 1100, Ibn al-Habbārīya [q. v.] composed in ten days a poetic version in elegant and flowing language entitled: *Natāʾidj al-Fiṭna fī Naẓm Kalīla wa-Dimna*, lith. Bombay 1317 (see Houtsma in the *Orient. Stud. Th. Nöldeke . . . gewidmet*, i. 91—96). A third versification of the book entitled *Durr al-Ḥikam fī Amthāl al-Hunūd wa 'l-Adjam* was completed by ʿAbd al-Muʾmin b. al-Ḥasan b. al-Ḥusain al-Ṣaghānī after 80 days' work on Djumādā I 20, 640 (Nov. 15, 1242). It exists only in a manuscript in Vienna (see Flügel, *Die arab., pers. und türk. Hdss. der . . . . Hofbibliothek zu Wien*, i. 469, N°. 480).

6. **The later Syriac translation.** In the tenth or eleventh century a Syriac cleric translated the work from Ibn al-Muḳaffaʿ's text again into the then already dead language of his church; he endeavoured to give the book a Christian tinge and therefore amplified the verses of the Indian original, already much distorted in the Pahlavi translation, into long and weary moral discourses. He also made a series of mistakes in the translation. But as the text he used was much nearer the original than the most of our manuscripts, this translation is, in spite of its defects, of considerable value for textual criticism; it is edited by W. Wright, *The Book of Kalilah and Dimnah transl. from Arabic into Syriac*, London 1884. In contrast to the naturalism of the original, Keith-Falconer, the English translator of this version (Cambridge 1885) is even more prudish than the latter itself; on text and translation see Nöldeke in the *Göttinger Gelehrte Anz.*, 1884, p. 673 *sqq.*, 1885, p. 753 *sqq.*

7. **Persian prose and verse translations.** According to Firdawsī in the *Shāhnāma* (see de Sacy in *Not. et Extr.* X (1818), i. 140 *sqq.*), Ibn al-Muḳaffaʿ's book was translated into Persian under the Sāmānid Naṣr b. Aḥmad (914—943) by order of the vizier Balʿamī [q. v.]; but it appears that this translation was never completed. By order of the same ruler the poet Rūdhakī (d. 304 = 916) put the book into Persian verse of which, however, only 16 verses have survived in quotations in Asadī's *Lughat-i Furs*, ed. Horn, p. 18 *sqq.*

Ibn al-Muḳaffaʿ's work was translated into Persian prose probably after the year 539 = 1144 (see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 745/6) by Niẓām al-Dīn Abu 'l-Maʿālī Naṣr Allāh b. Muḥammad b. ʿAbd al-Ḥamīd, who dedicated his work to Bahrām Shāh of Ghazna [q. v., i. 586]. Naṣr Allāh in a new preface announces his intention of reproducing the work completely, including the aphorisms which seemed to him particularly valuable, with all the rhetorical adornment of artificial prose; he only gives Burzōe's introduction in ordinary prose, as an artificial style does not suit its matter. The work was lithographed in Ṭihrān in 1282 (= 1864; this disposes of Chauvin's doubts, p. 46/7), 1304 and 1305. Cf. de Sacy in *Not. et Extr.* X, i. 96 *sqq.*; E. G. Browne, *A Literary History of Persia*, ii. (London 1906), p. 349.

A metrical version of the book was given by Aḥmad b. Maḥmūd al-Ṭūsī Ḳāniʿī, a contemporary of Djalāl al-Dīn Rūmī at Ḳonya, whither he had fled before the Mongols from his native city of Ṭūs, for Sulṭān ʿIzz al-Dīn Kaikāʾūs (643—662 = 1244—1263), probably based on Naṣr Allāh's translation, which, however, he nowhere mentions; see Rieu, *Cat. of the Pers. MSS. in the Brit. Mus.*, p. 582 *sqq.*; E. G. Browne, *A History of Pers. Literature under Tartar Dominion* (Cambridge 1920), p. 111.

This work was, however, put in the shade completely by the revision of Naṣr Allāh's translation done by Ḥusain Wāʿiẓ Kāshifī (d. 910 = 1504, see KĀSHIFĪ), the court-preacher of Ḥusain Baiḳarā of Herāt [see ḤUSAIN MĪRZĀ]. In honour of Ḥusain's minister Aḥmad Suhailī he called his work *Anwār-i Suhailī*. He professed to be making the rhetorical artificial prose of Naṣr Allāh easier to understand by giving it in a new version but in reality he created an even more florid and verbose concoction, "full of absurd exaggerations, recondite words, vain epithets, far fetched comparisons and tasteless bombast and represents to perfection the worst style of those florid writers who flourished under the patronage of the Timurids" (E. G. Browne, *Lit. Hist. of Persia*, ii. 354, *op. cit.*, p. 503 *sqq.*). But as this style remained predominant in Persia and particularly in India down to the threshold of the modern period, the work had an unparalleled success and was printed in England (first complete edition London 1836), where it was used as a text book for the examination of English officials in India in Persian and repeatedly printed and lithographed in India and Persia, translated into several Indian dialects, into Pushtu, Georgian and all the principal languages of Europe (see Chauvin, p. 26—43). Ḥusain replaced the four prefaces at the vulgate of Ibn al-Muḳaffaʿ by a new introduction from a so far unidentified source; de Sacy supposes (*Not. et Extr.* X, i. 39) that in it we have the older *Djāwīdān Khirad*, which al-Ṭarṭūshī was still able to use for his *Sirādj al-Mulūk* (Būlāḳ 1289), p. 97, 10—21, 185, 25 *sqq.* The Emperor of China Humāyūnfāl is persuaded to give up the idea of abdicating his throne by his vizier, who

tells him how the Indian king Dabshalim was directed by a dream to a cave in which an old man would give him a treasure. Of the latter Dabshalim keeps only the testament of Hōshang, king of Persia, which contains 14 pieces of advice for rulers, and with these he goes to Ceylon where the Brahman Bidpai or Pilpai explains each of these precepts by stories which form the separate chapters of the book.

Dislike of the extravagant and luxurious style of the *Anwār-i Suhailī* induced the Emperor Akbar (1556—1605) to commission his vizier Abu 'l-Faḍl to prepare a new edition of the work. This bears the title *'Iyār-i Dānish* and was completed in 996 (1578). It retains the arrangement of its model but restores Ibn al-Muḳaffa''s preface and Burzōe's introduction. The work itself is not yet printed but a Hindustānī translation by Ḥafīẓ-uddīn, entitled *Khirad Afrōz*, was published by Th. Roebuck (Calcutta 1815) and by Eastwick (Hertford 1857, London 1867) on account of its elegant diction.

8. Turkish translations. Ibn al-Muḳaffa''s work was twice translated into Eastern Turkī from Naṣr Allāh's translation; see the manuscripts in Dresden in Fleischer, *Cat. Codd. Mss. orient. Bibl. Regiae Dresdensis* (Lipsiae 1831), p. 19, Nº. 136 and Munich in Aumer, *Die pers. und türk. Hdss. der K. Hof- und Staatsbibliothek*, p. 54.

Naṣr Allāh's edition was translated into old Ottoman Turkish (not into Eastern Turkī, as Hertel, p. 407 says, relying on a somewhat misleading expression of Ethé's, *op. cit.*) by Mas'ūd for 'Umūrbeg, prince of Aidin (d. 750 = 1349) (a MS. in the Bodleian, Marsh. 180). This prose text was put into verse by an unknown author who dedicated his work to Sulṭān Murād I (761—792 = 1359—1389); only about half has survived in a Gotha manuscript (see Pertsch, *Verz. der türk. Handschr. d. Herz. Bibl.*, p. 168, Nº. 189). A modern Ottoman prose version, which must have been made before 955 (1548), exists in the Bodleian MS. Marsh. 61: cf. H. Ethé, *On some hitherto unknown Turkish Versions of Kalīlah und Dimnah* in the *Actes du 6e Congr. internat. des Orientalistes*, 2nd sect., i. 241 *sqq.*

'Alī b. Ṣāliḥ, called 'Alī Wāsi' or 'Alī Čelebi, translated the *Anwār-i Suhailī* into Ottoman rhymed prose and dedicated his work to Sulṭān Sulaimān I (1512—1520) with the title *Humāyūn-nāma*; it has been several times printed in Būlāḳ and Stambul (see Chauvin, p. 50). Among the different European translations of the *Humāyūn-nāma*, the best known is the French of Galland, published after his death by Gueulette (Paris 1724); it was translated by Gonggrijp into Malay (Batavia 1866) and the latter version inspired a Javanese translation by Kramaprawira, which was put into Javanese verse by an anonymous poet. The luxuriousness of its language, in which the *Humāyūn-nāma* surpassed even its Persian original, induced the Muftī Yaḥyā Efendī and 'Othmānzāde, who died in 1139 (1726) as Ḳāḍī in Cairo, to prepare extracts from it (see Ethé, *op. cit.*, p. 242).

The *Anwār-i Suhailī* was translated, apparently with the assistance of the *Humāyūn-nāma* by Faḍl Allāh b. 'Īsā Tashkendī at the instigation of Muḥammad Mūsā Bai Bābā into modern Eastern Turkī prose (to be more accurate into the language of Tashkend and Farghāna as the colophon, or the language of Turkestān and Farghāna as the title states); the latter then had the book lithographed by the calligrapher Mīrzā Hāshim Khodjandī, according to the colophon in 1306 (1888); according to the title, the book was published in 1893.

Ibn al-Muḳaffa''s book was translated from the Arabic into Ḳazan Turkī by 'Abd al-'Allām Faiḍ Khān Oghlu and printed at Ḳazan 1889 (University Press, *Orient. Bibliographie*, iii. 1421), in the same year at Wjatschakow (ibid., iv. Nº. 3935) and in 1892 at Cirkova (ibid., vi. 167, Nº. 3166). The introduction, however, was, according to a communication from Prof. Hommel, borrowed from the *Anwār-i-Suhailī*.

9. The Mongol translation. The Mongol translation which Malik Iftikhār al-Dīn Muḥammad b. Abī Naṣr, a descendant of Muḥammad Bakrī, prepared in Ḳazwīn has not survived (see Ḥamd Allāh Mustawfī, *Ta'rīkh-i Guzīda*, ed. Browne, Gibb Mem. xiv. p. 844/5, transl. p. 233; Browne, *A Hist. of Persian Literature under Tartar Dominion*, p. 93, and correctly stated as early as Hammer-Purgstall in the *Journ. Asiat.*, 3rd Ser., i. 580). This statement is confused in Ḥādjdjī Khalīfa, v. 239, who ascribes a translation into Turkish (*bi-lughat al-Turk*) to the ancestor Muḥammad Bakrī (see de Sacy, *Not. et Extr.* X, 175; Ethé, *op. cit.*, p. 243, who does not take notice of von Hammer's correct statement). As Flügel wrongly translates *in linguam Tataricam*, Hertel (p. 414) wrongly identifies this reported Tatar translation with the above mentioned Ḳazan Turkī (so-called Tatar) translation quoted in Chauvin, p. 78, note.

10. The Ethiopic translation. An Ethiopic version, which was certainly based on a text, indigenous to Egypt, of the Arabic of Ibn al-Muḳaffa', is also lost: it is mentioned in a work composed in 1582 (see Wright, *Cat. of the Ethiop. MSS. in the Brit. Mus.*, p. 82b) (see Nöldeke, *Gött. Gelehrte Anz.* 1884, p. 676, note 5).

11. The Hebrew and older European translations. At the beginning of the twelfth century a certain Rabbi Jō'ēl translated Ibn al-Muḳaffa''s work into Hebrew from a valuable manuscript which, however, already contained the false story of Burzōe's mission and the two not genuine fables at the end of the heron and the duck and of the fox, dove and heron. From the unique manuscript, exceedingly corrupt in the beginning, J. Derenbourg published this translation along with that of Jacob b. Elazar of the xiiith century (*Deux versions hébraïques du Livre de Kalîlâh et Dimnâh* in the *Bibl. de l'École des Hautes Études*, fasc. 49., Paris 1881). Jacob's version while based on a similar text to that of Jō'ēl is, however, very free, composed in elegant rhymed prose and full of Biblical locutions. The version of the Rabbi Jō'ēl was then translated into Latin by the baptised Jew John of Capua for Cardinal Ursinus between 1263 and 1278 with the title *Directorium vitae humanae* (cf. Johannes de Capua, *Directorium vitae humanae*, publ. and annot. by J. Derenbourg in the *Bibl. de l'École des Hautes Études*, fasc. 72, Paris 1887; a new edition based on manuscripts which he has recently discovered is to be expected from Hilka). With the exception of an old Spanish version, which reproduces the same text as Rabbi Jō'ēl much more faithfully than John of Capua does (see Clifford G. Allen, *L'an-*

cienne version espagnole de Kalila et Digna, texte des mss. de l'Escorial, précédé d'un avant-propos et suivi d'un glossaire, Thesis, Paris-Macon 1906), all later translations into Western European languages with the exception of quite modern ones are based on the Latin text of John of Capua (see Chauvin, p. 59—72; Hertel, p. 366—400).

12. The Greek translation. Towards the end of the xith century, Symeon son of Seth translated Ibn al-Muḳaffaʿ's work fairly freely into Greek from a manuscript which was still free from later additions but contained the chapter on the king of the mice and his ministers. He called the book Στεφανίτης καὶ Ἰχνηλάτης, because he recognised in *Kalīla* the Arabic *iklīl* and in *Dimna* the Arabic word for "trace". See Στεφανίτης καὶ Ἰχνηλάτης. *Quattro recensioni della versione greca del Kitāb Kalīlah wa-Dimnah*, pubbl. da Vittorio Puntoni, *Pubblicazioni della Soc. Asiat. Ital.*, ii. (1889). This version was in turn translated into Latin and German as well as into several Slavonic languages.

13. The Persian translation of the Hitōpadēsha. The later Sanskrit version of the *Pañcatantra*, the *Hitōpadēsha*, was translated very freely into Persian, probably in the reign of Akbar, by a certain Tādj al-Dīn, under the title *Mufarriḥ al-Ḳulūb* (see de Sacy, *L'illustrateur des cœurs, ou traduction persane du livre indien intitulé Hitoupadesa par Tadj-eddin, ms. persan de la Bibl. du Roi, N°. 386* in the *Not. et Extr.* X, i. 226—264). This work was then translated by the highly esteemed Hindūstānī author Mīr Bahādur ʿAlī Ḥusainī in 1217 (1802) into his mother tongue (see Garcin de Tassy, *Hist. de la Litér. hindouie et hindoustanie*², i. 609 *sqq.*). A year later the latter was edited by Gilchrist as *Ukhlaqi Hindee or Indian Ethics, transl. from the Version of the celebrated Hitoopades or Salutary Counsel* by Meer Buhadoor Ulee, . . . under the superintendence of John Gilchrist, Calcutta 1803; cf. J. Hertel, *Die Akhlāq-i Hindī und ihre Quellen* in the *Zeitschr. d. Deutsch. Morg. Gesellsch.*, lxxii. 65—86, lxxiv. 95—117, lxxv. 129—200.

14. The older Malay translation. On a mixture of Ibn al-Muḳaffaʿ's work and a Tamil text of the Pañcatantra is based the Malay version *Hikayat Kalila dan Damina*, which was first brought to notice by Werndly in his *Maleische Spraakkunst*, Amsterdam 1736, and was published in 1876 by Gonggrijp at Leiden (2nd ed. 1892; cf. J. J. Brandes in the *Feestbundel aan Professor M. J. de Goeje*, Leiden 1891, p. 77 *sqq.*). This work was next translated into Javanese (Batavia 1878) and Madurese (ibid. 1879).

15. Imitations of *Kalila wa-Dimna*. Setting aside the fables included in the *1001 Nights*, Ibn al-Muḳaffaʿ's work has been three times imitated in Islāmic literature. Ibn al-Habbāriya (see above) followed up his versification with the *Kit. al-Ṣādiḥ wa'l-Bāghim* (see above p. 378 *sq.*; also printed in Cairo 1294). While this was only an imitation of the beast-fable, Muḥammad b. ʿAbd Allāh b. Ẓafar al-Ṣiḳillī (d. 565/1169 or 568/1172) in his *Sulwān al-Muṭāʿ*, which he first composed in 545 (1150) and dedicated in 554 (1159) in a new edition to the Ḳāʾid of Sicily, Abū ʿAbd Allāh Muḥammad al-Ḳurashī, intended to produce a mirror for princes, like the *Kalila wa-Dimna*; in addition to beast-fables the book also contains historical anecdotes. It was lithographed at Cairo 1278, printed Tunis 1279, Bairūt 1300; translated into Turkish by Ḳara Khalīfzāde (d. 1168—1754) and printed Stambul 1285; translated into Italian by M. Amari, *Solwan el-mota ossiano Conforti politici di Ibn Zafer, arabo siciliano del XII secolo*, Florence 1851, 1882 (Engl. transl. London 1852).

Another mirror for princes in which historic anecdotes are mingled with beast-fables for the edification of the reader, was composed about the end of the fourth century A. H. by the prince of Ṭabaristān, Iṣpahbadh Marzubān in the Persian dialect of his land. This work itself has not survived, but in the vith (xiith) and viith (xiiith) century it was twice translated into classical Persian. This was first done at the court of the Saldjūḳs of Asia Minor, Sulaimānshāh (588—600 = 1192—1204) by his vizier Muḥammad b. Ghāzī of Malaṭya; his work, entitled *Rawḍat al-ʿUḳūl*, exists in two manuscripts in Leiden and Paris. The *Marzubānnāma* of Saʿd al-Dīn-i Warāwīnī, composed between 607 and 622 (1210—1225), enjoyed greater popularity. It has been edited by Mīrzā Muḥammad (Gibb Mem. Ser., vol. viii.).

Warāwīnī's version was translated by an unknown author into Ottoman Turkish (a copy of 848 (1444) in Berlin; see Pertsch, *Verz. der Türk. Hdss.*, N°. 444); this Turkish version was again translated anonymously into Arabic (MS. Berlin, see Ahlwardt, *Verz.*, N°. 8472). A second Arabic translation, which, according to the Gotha MS. (see Pertsch, *Die Arab. Hdss. der Herz. Bibl.*, N°. 2692), is also based on the Turkish, was made by Ibn ʿArabshāh (q. v.); there is another MS. in Paris (de Slane, *Catal.*, N°. 3524) and it was lithographed in Cairo in 1278. The same author then rewrote his work in artificial prose in his *Fākihat al-Khulafāʾ wa-Mufākahat al-Ẓurafāʾ*, and added several new stories.

The same recension which had been translated into Ottoman Turkish and which is distinguished from Warāwīnī's vulgate as well as from the *Rawḍat al-ʿUḳūl* by the tenth (concluding) chapter *dar bayān-i ziyādat-i ʿumr wa-dawlat wa-sitadjhīz kardan bi dūst wa-dushman*, was translated into Ḳazan Turkī by an unnamed writer for a certain Sulaimān Bek, son of Muḥammad Bek, and printed at Ḳazan in 1864 under the title *Kitāb Dürr-i Shāhī fī ḥikāyāti Pādishāhī*.

Bibliography. V. Chauvin, *Bibliographie des ouvrages arabes ou relatifs aux Arabes* etc., ii. *Kalîlah* (Liège—Leipzig 1897); J. Hertel, *Das Pañcatantra, seine Geschichte und seine Verbreitung*, Leipzig and Berlin 1914.

(C. BROCKELMANN)

KALĪM, a Persian poet of India of the seventeenth century. His full name was MĪRZĀ ABŪ ṬĀLIB KALĪM of Hamadhān. He lived first in Kāshān, so that he is also given the *nisba* Kāshānī as well as Hamadhānī. In the beginning of the reign of Djahāngīr (q. v., 1014—1037 = 1605—1627) he came to India to his court. A considerable journey took him in the following years to the ʿIrāḳ, from which he returned in 1028 (1619) to India and lived there henceforth as court-poet of the Moghul Emperors. Under Djahāngīr's successor Shāh Djahān (1037—1068 = 1628—1656), whom he celebrated in an epic — the title of which is given in three forms: *Shāhinshāhnāma*, *Shāhnāma* and *Pādishāhnāma* — he was given the title of honour *Malik al-Shuʿarāʾ*.

He died in Kashmir in 1062 (1652); the date 1061 (1651) has less authority. His *Dīwān* contains the usual kinds of poetry, especially ḳaṣīdas and mathnawīs of a panegyric character. Manuscripts of the *Dīwān* are frequent — a lithographed edition appeared at Lucknow in 1878 — but his *Shāhanshāhnāma* seems only to exist in extracts. He is estimated to have left 24,000 verses.

(H. H. SCHAEDER)

KALĪM ALLĀH. *Kalīm* is one who speaks to you, following the equation *faʿīl* = *mufāʿil* (e. g. al-Baiḍāwī, ed. Fleischer, i. 445, 22, 583, 13, 595, 1); so in the *Lisān* (xv. 428 *infra*) which adds that the *Tahdhīb* (of al-Azharī) allows it to mean also one to whom you speak. In consequence, *Kalīm Allāh* has become the special honorific title of Mūsā, "He who spoke to Allāh", or, following the *Tahdhīb*, "He to whom Allāh spoke", because of several passages in the Ḳurʾān describing direct speech between Allāh and Mūsā — especially Ḳur. iv. 162, *wa-kallam Allāhu Mūsā taklīmā*, where the addition of the infinitive is said to show that literal and direct speech is meant and not a metaphor (*Lisān*, xv. 429, 3 *sqq.*; al-Ashʿarī, *al-Ibāna*, ed. Ḥaidarābād, 1321, p. 27 *infra*). In these passages the emphasis is always on Allāh's speaking to Mūsā, and this may be the cause of the extension of meaning of *kalīm* in the *Tahdhīb*. Further, the third stem of *klm* does not occur in the received text of the Ḳurʾān; but in Ḳur. ii. 254, there is a variant reading, *kālam Allāha* (al-Baiḍāwī, i. 130, 4) and this variant reading is given by al-Baiḍāwī as the source of the honorific title, *kalīm* = *mukālim*. Yet in this passage there is no mention of Mūsā. Cf., also, the epithet with similar meaning *nadjī*, applied to Mūsā in Ḳur. xix. 53, where al-Baiḍāwī (i. 583, 13) equates *nadjī* with *munādjī*.

Bibliography: See under KALĀM. Add Goldziher, *Die Richtungen der islamischen Koranauslegung*, p. 174; and on variants in the Ḳurʾān text, pp. 1—54; Dozy, *Supplément*, ii. 486*b*.

(D. B. MACDONALD)

KALIMA. For the primary meaning see under KALĀM. Each utterance of Allāh is a *kalima*, whether it is the single creative word, *kun*, "come into being!" or a longer expression. Thus it is a synonym of *ḳaul* (Dozy, *Suppl.* ii. 486*a*); *kalimatan bāḳiyatan*, in Ḳur. xliii. 27 is interpreted as meaning the *tawḥīd*, the first of the two articles of the Muslim creed (al-Baiḍāwī, ed. Fleischer, ii. 237, 22) and "two words" in *The 1001 Nights* (Calcutta ed., N. 854, iv. 159; in the Breslau text, iv. 327, it is *fard kalima*) means the two articles. In this wide sense the *kalima* of a poet can mean a whole *ḳaṣīda* by him (*Lisān*, xv. 428 *infra*; al-Baiḍāwī, i. 154, 17 on Ḳur. iii. 34) and it is a question whether ʿĪsā is called a *kalima* from Allāh (Ḳur. iii. 34, 40) because he is an expression of the *kalām* of Allāh, or because he was produced by the single creative word *kun*, and is thus a primary creation like Adam (al-Baiḍāwī, *loc. cit.*; Lisān, xv. 430 *supra*). From the doctrine of Allāh's *kalām* it follows that his *kalimāt* must be innumerable (see KALĀM). But all contingent existences (*al-mumkināt*) have been produced by *kalimāt* of Allāh, i. e. the creative commands *kun*; therefore the Speech of the Reality (*al-ḥaḳḳ*) is the self of the identities of the contingent existences, or the contingent existences themselves (*nafs aʿyān al-mumkināt*, *Dict. of Techn. Terms*, p. 1271, *infra*). The half page which follows the last reference shows how this is the bridge from the orthodox doctrine of Allāh's quality, Speech, to the Neoplatonic Chain and all its descendants.

Bibliography: Has been given above. See further on ʿABD AL-RAZZĀḲ (i. 61 *sqq.*); AL-INSĀN AL-KĀMIL (ii. 510 *sq.*).

(D. B. MACDONALD)

AL-ḲALḲASHANDĪ, *nisba* from Ḳalḳashanda near Ḳalyūb.

1. SHIHĀB AL-DĪN ABU 'L-ʿABBĀS AḤMAD B. ʿALĪ B. AḤMAD B. ʿABD ALLĀH (in MSS. often briefly called AḤMAD B. ʿABD ALLĀH) B. ABĪ GHUDDA, died on Djumādā II 10, 821 (July 16, 1418), wrote besides a number of smaller works a guide to the artistic composition of essays and reports, especially for the use of Egyptian government officials; just as Ibn Ḳutaiba [q. v.] in his *ʿUyūn al-Akhbār* and the supplements to that work wished to afford the secretary class an encyclopaedic survey of the most important branches of knowledge of his time, so al-Ḳalḳashandī's work, composed after 791 (1387), entitled *Ṣubḥ al-Aʿshā fī Ṣināʿat al-Inshāʾ*, presents in a much more comprehensive and systematic form practically the whole knowledge of his time and contains information of the utmost value, especially regarding the history and geography of Egypt and Syria. It has been printed as a publication of the Dār al-Kutub al-Khadīwīya (al-Sulṭānīya) (Cairo 1331—8 [1913—9], 14 vols.). Cf. F. Wüstenfeld, *Die Geographie und Verwaltung von Ägypten nach dem Arab. des Abu 'l-Abbâs al-Calcaschandi* in the *Abh. d. Kgl. Gesellsch. d. Wiss. zu Göttingen*, phil.-hist. Cl., XXV (1879); W. v. Tiesenhausen in the *Zapiski Vost. Otd. Imp. Russk. Arch. Obšč.*, i. 208; do., *Gesch. der Goldenen Horde*, i. 395; H. Sauvaire, *Extraits de l'ouvrage de K. intitulé Lumière de l'aurore pour l'écriture des hommes* (Arab. MS. of the Bodleian Library) in the *Mém. de l'Acad. de Marseille*, 1886, 1887; H. Lammens, *Correspondances diplomatiques entre les sultans mamlouks d'Égypte et les puissances chrétiennes* in the *Revue de l'Orient chrétien*, ix. (1904), 151—187, 359—392. A selection from it entitled *Ḍawʾ al-Ṣubḥ al-Musfir wa-Djany al-Dauḥ al-Muthmir* was printed in Cairo 1906. His second great work which he composed in 812 (1409) is a genealogy and history of the Arab tribes before Muḥammad with an alphabetical list entitled *Nihāyat al-Arab fī Maʿrifat Ḳabāʾil al-ʿArab*, MSS. in Berlin (Ahlwardt, *Verzeichn.*, N⁰. 9382/3) and London (*Cat. Codd. Mss. Or. ... in Mus. Brit.*, N⁰. 341/2); according to Lammens in the *Mél. de la Fac. orient. de Beyrouth*, iii/i. 150 N. 4, it has been printed in Baghdād s. d.; in this

text the author is called Muḥammad b. ʿAbd Allāh; Lammens concludes from this that the authors of the *Ṣubḥ* and of the *Nihāya* were different individuals; but here either the father is confused with the son (see Nº. 2) or the printed book contains the work of the son. The alphabetical list was worked up by Abu 'l-Fawz Muḥammad Amīn al-Suwaidī in 1229 (1814) into a genealogical survey and extended to the Caliphs and Sulṭāns with the title *Sabāʾik al-Dhahab fī Maʿrifat Ḳabāʾil al-ʿArab*, lith. Baghdād 1280, Bombay 1296. After the year 818 (1415) al-Ḳalḳashandī wrote a supplement to it entitled *Ḳalāʾid al-Djumān fi 'l-Taʿrīf bi-Ḳabāʾil ʿArab al-Zamān*, MSS. in Berlin (Ahlwardt, *Verzeichn.*, Nº. 9384) and London (Rieu, *Suppl. to the Cat. of the Arabic Mss. in the Brit. Mus.*, Nº. 595); a synopsis by al-Suyūṭī in Berlin (Ahlwardt, *Verzeichn.*, Nº. 9385).

2. His son NADJM AL-DĪN MUḤAMMAD imitated his two chief works, the *Ṣubḥ* under the title *Ḳalāʾid al-Djumān fī Muṣṭalaḥ Mukātabāt Ahl al-Zamān* (see Rieu, *Suppl.*, Nº. 1020) and the *Nihāya* under the title *Nihāyat al-Arab fī Maʿrifat Ansāb al-ʿArab*, dedicated to the Grand Emir of the Arabs of the East and of the West Zain al-Dīn Abu 'l-Djūd Baḳr b. Rashīd al-Zaiur; the autograph of the year 846 (1442) in the Bibl. Nat. of Paris (see de Slane, *Cat.*, Nº. 2049), another MS. in Cairo, Khed. Bibl. (*Fihr.*, v. 170; author Muḥammad b. ʿAbd Allāh, see Vollers, *Zeitschr. d. Dtsch. Morg. Gesellsch.*, xliii. 118; on the Baghdād printed text see above).

3. ABU 'L-FATḤ IBRĀHĪM B. ʿALĪ B. AḤMAD AL-MAḲDISĪ, BURHĀN (DJAMĀL) AL-DĪN, d. 922 (1516), Traditionist, whose works are detailed in Brockelmann, *Gesch. d. ar. Litt.*, ii. 78.

Bibliography: Wüstenfeld, *Geschichtschreiber*, Nº. 467; Brockelmann, *op. cit.*, ii. 134.

(C. BROCKELMANN)

KALMUCKS, the Turkish name for a Mongol people who call themselves OIRAT. In Radloff's *Wörterbuch* (ii. 272), the forms Ḳalmaḳ (Central Asian dialects), Ḳalmiḳ (Volga dialects; whence the Russian word) and Ḳalmuḳ (Ottoman; whence the Crimean Tatar expression *ḳalmuḳ-i bash-maḳhluḳ*) are given. In Central Asia the Turkish speaking Teleuts are called "White Kalmucks" (Aḳ Kalmaḳ) and the Western Mongols proper "Black Kalmucks" (Ḳara Ḳalmaḳ). The word is derived (probably only by a popular etymology) from the verb *ḳalmaḳ* "to remain"; it is said to denote the Oirat, who "remained" pagans, in contrast to the Dungans (the Chinese-speaking Muḥammadans), who "returned" (verb *dönmek*) (according to the well known Muslim idea) to Islām.

The word Ḳalmaḳ seems first to occur in the *Muḳaddima* (not included in the printed edition) to the *Ẓafar-Nāma* of Sharaf al-Dīn Yazdī, not, it seems, as an ethnographical term but as a geographical one. It is said that after the expulsion of the Mongol dynasty from China only their "original territory" (*yurt-i aṣlī*), i. e. Ḳaraḳorum and Ḳalmaḳ remained in their possession; the "Emirs of the Oirat" later deprived them of this also.

From the time of Wais Khān (1418—28) the Mongols on the Ili [q. v.] had to fight against the "infidel Ḳalmaḳ"; accounts of these wars are found, notably in the *Taʾrīkh-i Rashīdī* (ed. Ney-Elias, see Index). Wais Khān was twice taken prisoner by the Ḳalmaḳ and had to give his sister in marriage to the chief of the Ḳalmaḳ Isān Tāishī (properly Esen Taishi). Toghon, father of the latter, was then ruling in Mongolia on the Chinese frontier, where he was succeeded in 1439 by Esen Taishi. After the death of Esen Taishi (1455) the great nomad kingdom of the Oirat broke up; individual princes are mentioned from time to time later, as ruling in the neighbourhood of Muslim lands; in the beginning of 864 (end of 1459) a Ḳalmaḳ embassy appeared in Herāt. According to Chinese sources, the Oirat in 1552 had to submit to Altan Khān, prince of the Tümet. The name Ḳalmaḳ seems to have been extended by the Muslims to this kingdom. According to the Ottoman Saifī (wrote 990 = 1582), the prince of the Ḳalmaḳ bore the title *Altun Khān* (Turk. *Altun* = Mongol *Altan*); cf. the text in the Leiden MS. Nº. 917 and the translation by Ch. Schefer in Abdoul Kerim Boukhary, *Histoire de l'Asie Centrale*, transl. p. 292 *sq.* The Muḥammadan sources also report the restoration of the Oirat kingdom under Khara Khula (d. 1634). In Turkestān the Ḳalmaḳ, during this period also, were regarded as powerful foes to Islām. The prince of the Ḳazaḳ (Kirgiz), Tawakkul Khān, had to fly before them to Tashkend, where he was received by Nawrūz Aḥmad Khān or Barāḳ Khān (d. 1556); but Nawrūz Aḥmad is said to have replied to his guest's appeal for help that ten such princes as they two could do nothing against the Ḳalmaḳ. At a later date on the other hand we find Tawakkul described in Russia as "Czar of the Ḳazaḳ and of the Kalmucks" on the occasion of his embassy to the Czar Feodor (1594), perhaps because a few bodies of Kalmucks had attached themselves to him; according to the *ʿAbdallāh-Nāma* (MS. of the Asiatic Museum, Nº. 574, f. 352ᵃ) there were also Kalmucks (Ḳalmāḳān) in Tashkend in the army of Bābā Khān (a son of Nawrūz Aḥmad) about 1582. In the winter of 1603—4 took place the first raid of the Kalmucks into Khwārizm (Abu 'l-Ghāzī, ed. Desmaisons, text p. 275). Soon afterwards, under the Czar Wassilij Shuiskij (1606—1610), the Kalmucks for the first time entered into relations with the Russian government, although it was not till 1632 that Kalmucks settled on the Volga on a large scale. This branch of the Kalmucks had separated from their kinsmen, under the leadership of Kho Urlük, as early as 1618. The land of the Volga Kalmucks therefore did not belong to the empire founded by Khara Khula, although the relations between the two branches of the people had not yet been broken. Representatives of the Volga Kalmucks still appeared at the *ḳurultai* (parliament) of 1640; Batur, the son and successor of Khara Khula gave his daughter in marriage to the grandson of Kho Urlük. By the same *ḳurultai* the dominance of Buddhism was firmly established among all branches of the Kalmucks. The progress made by Islām described in the *Taʾrīkh-i Rashīdī* (p. 91) in connection with the above mentioned marriage contract apparently was not maintained. Most of the Muslim territories of Turkestān were under the suzerainty of the Buddhist Kalmuck prince on the Ili, the founder of the last great nomad empire in Central Asia, until the destruction of this empire by the Chinese in 1758 (subjection of Kāshgharia in 1682, conquest of Tashkend in 1723); as late as 1749 the regent (*Ataliḳ*) of

Bokhārā and his opponent had to submit a dispute to the verdict of an embassy of the Kalmuck prince (*Tūra-i Ḳalmāḳ*) (Muḥammad Walī Karmīnagī, MS. of the Asiat. Mus., c. 581^{b}, f. 101^{b} *sqq.*) A great part of the pasture grounds of the Ḳazaḳ was at once occupied by the Kalmucks. Islām was then almost completely driven out of the southern part of the modern Semirječje. From this period date several Buddhist monuments, including Tibetan inscriptions. It was only after the decline of the Kalmuck empire that these areas were again occupied by the Muḥammadan Ḳazaḳ. The wars of the Volga Kalmucks with the Crimean Tatars and their raids into Khwārizm had less effect on Islām; from 1724 the Kalmuck chiefs on the lower course of the Volga were simply considered governors (*namjestnik*) of the Czar of Russia. No connection existed then with the ruler on the Ili. The decision of the "governor" Ubashi and a great part of his people to migrate from Russia and settle on Chinese territory proved disastrous for the Kalmucks. During this migration heavy losses were inflicted on the Kalmucks in Central Asia, especially by the Ḳazaḳ (1771). Henceforth the Kalmucks were of no political significance either in Russia or in China. During the Muḥammadan rising in the Ili valley the great Kalmuck temple of Buddha near Kuldja was destroyed (Radloff, *Aus Sibirien*, ii. 403). After the Russian revolution an "autonomous Kalmuck territory" (*avtonomnaja kalmitskaja oblast'*) arose in what was formerly the gouvernement of Astrachan, between 45° and 48° N. Lat. and 44°—48° E. Long. A portion of the Kalmucks in Semirječje (less than 2000 souls) which has adopted Islām and taken to agriculture is called Sart-Kalmaḳ.

Pal'mov, *Očerk istorii kalmickogo naroda za vremja jego prebivanija v predjelach Rossii*, Astrachan 1922; *Oiratskije Izvjestija*, founded in 1922. (W. BARTHOLD)

ḲALPAḲ (T.), A Central Asian headdress, which was introduced by the Turks into Europe and became widely distributed there. The word *ḳalpaḳ* is found in the most diverse Turkish dialects in meanings which are detailed by W. Radloff in his *Versuch eines Wörterbuches der Türkdialekte*, ii. 268 *sq.* (cf. also *ḳalaḳ*, ii. 234). The Eastern Turkish *ḳalpāḳ*, Djag. East. Turk. *ḳalpāḳ*, Kirg. and Karakirg. *ḳalpāḳ*, meaning cap, felt cap (cf. also the French *colpack*) is certainly related. Cf. thereon Pavet de Courteille, *Dict. turk-oriental*, p. 408). In its original form the ḳalpaḳ is a cone-shaped sheepskin cap, flattened on top, covering the head down to the eyes and ears, for the manufacture of which skins of darker colour, in people of rank particularly a black astrachan, were used and then trimmed with softer fur of a brighter colour. Such caps have been worn among almost all Tatar tribes from ancient times to the present day. In earlier times, as G. Rosen suggests, they were a part of the national costume also among the Ottomans. Nevertheless, neither the headdress nor the word ḳalpaḳ can be proved to have existed before the middle of the xviith century. The ḳalpaḳ must, very soon after this, under the arabicising influence of Islām, have been driven out by the turban in its countless forms (cf. 286 styles in Michael Thalman, *Elenchus librorum or. mss.*, Vienna 1702, vi. 29 *sq.* on Codex Turc. VII, Bologna). But the ḳalpaḳ remained as the distinguishing headgear of prominent Christian subjects of the Sublime Porte, with, it is true, considerable alterations in its original appearance. In place of the fur a thick black felt was used and the shape became swollen almost like a melon. Of these headdresses three kinds were especially known, called after professions which particularly wore them, viz. the ḳalpaḳ of the physicians, of the money-changers and of the interpreters (*ḥekīm*, *ṣarrāf* and *terdjumān ḳalpaghi*). As late as the beginning of the xixth century the embassy interpreters, who were not Turkish subjects, had to wear the ḳalpaḳ, when they went on business to the Porte. In the house the ḳalpaḳ, which, on account of its weight, was too hot and uncomfortable for indoor wear, was placed on a stand elaborately carved, often painted and adorned with gilding, the *ḳalpaḳliḳ*, a piece of furniture, which was considered the sign of a distinguished and prosperous Christian household. When, with the coming of the fez, the ḳalpaḳ threatened to go entirely out of use among the Christian population also, an edict (*fermān*) of the grand vizier 'Izzet Meḥemmed Pasha ordered in 1842 that all non-Turkish subjects should wear the ḳalpaḳ instead of the fez. But this order was not long enforced. At the present day the ḳalpaḳ is still made and worn only by Armenians. The fine lambskins stretched over pasteboard shapes were at one time imported from Urls in Russian Tartary, and also from Khiva and Bokhārā, and manufactured and sold on the so-called Ḳalpaḳdjilar Čarshusi in Stambul. Among the peoples who adopted the name ḳalpaḳ for their corresponding headdress, special mention may be made of the Slav tribes of the Balkans (cf. Slav *klobuk*; Greek καλπάκι). Down to 1763 the ḳalpaḳ was also the headdress of the Hungarian Hussars. The high felt cap made of the finest arctic furs and adorned with valuable jewelled clasps, which is still worn as part of the state-dress of Hungarian magnates and Roumanian boyars, is also called ḳalpaḳ (Magyar *kalpag*, cf. also *kalap* = hat). The Hungarians may have adopted the headdress from the Ottomans in the beginning of the xviith century. Cf. also J. Szendrei, *A magyar viselet történeti fejlődése*, Budapest 1905, *s.v.* Among the Hussars of the German army, where the ḳalpaḳ was worn since the time of Frederick the Great, kolpak means the cloth tab above in the bearskin, the colour of which served to mark the regiment. Under the First Empire in France the ḳalpaḳ (*colback*) was introduced into the French army as the headdress of certain arms; under the Second Empire the mounted chasseurs wore a cap called *talpack*.

ḲALYŪB, a fair sized town in Lower Egypt with a railway station, 10 miles north of the central station at Cairo on the Cairo-

Alexandria railway. The town proper lies about a mile west of the station and about 3 miles from the right bank of the Nile, on the Tur'at al-Sardūsiya. Down to the middle of last century Kalyūb was the capital of the Mudīriya al-Kalyūbiya. Under the Khedive Ismā'īl the Dīwān of the Mudīriya was moved to Benha. Since that date Kalyūb has been a *markaz* (district-capital). Branch lines run to Zaķāzīķ and the Barrage du Nil. The majority of the inhabitants are Muslims. According to 'Alī Pasha Mubārak, Kalyūb possesses a Sharī'a court (*maḥkama Shar'iya*) and a hospital. Cf. 'Alī Pasha Mubārak, *al-Khiṭaṭ al-djadīda*, xiv. 114 *sqq.*; Baedeker, *Egypt*[7] (1914), p. 34; Sāmī Bey, *Ḳāmūs al-A'lām*, Stambul 1314 (1896), v. 3693[b], where (line 2—3) we should read *Ḳalyūbiyeh* for *Ḳaṣābadeh*.

A Greek Καλλιόπη — not yet, however, found — is at the base of the name. In the *Scalae* it is found under the form Καλιωπ (Maspero-Wiet, *Matériaux pour servir à la géogr. de l'Égypte*, Series i. 151).

Historical: John of Nikiu mentions Kalyūb in his *Chronicle*, Chap. 113 (ed. Zotenberg, p. 321, 509). 'Amr b. al-'Āṣ [q. v.] had a bridge thrown over the canal at this town to be able to conquer the other towns of the province of Miṣr (circa 20 = 641). In 549 = 1154/5 the Caliph al-Ẓāfir granted Kalyūb as a fief to his great favourite Naṣr b. 'Abbās. Usāma b. Munķidh so depreciated this present in the eyes of Naṣr and his father that it became one cause of the murder of the Caliph by Naṣr and 'Abbās (Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xi. 126; Usāma b. Munķidh, ed. Derenbourg, i. 245; Ibn Muyassar, ed. Massé, p. 93). In the fighting between Selim I and Tūmān-Bey, Kalyūb did not escape the raids of the Arabs (Ibn Iyās, *Ta'rīkh Miṣr*, under Ṣafar 923 = March 10, 1517). For embassies etc. Kalyūb was the last stage before Cairo. Thus, for example, in Rabī' I 925 (= March 1519 ('Alī Pasha Mubārak wrongly gives R. I 25, 923 for R. I 23, 925), Khā'ir Bey had the Sulṭān's envoy received there with the greatest ceremony by the Ḳāḍī Barakāt b. Mūsā (Ibn Iyās, *op. cit.*, iii. 109). The town had again to suffer exceedingly from the extortions and plundering of the half-savage soldiers and Mamlūks in the years 1219 and 1220 (1804 and 1805); cf. al-Djabartī, *'Adjā'ib al-Āthār*, under the years quoted. Kalyūb, as a result of its situation close to the gates of Cairo, may not have escaped on other occasions the effects of the political happenings in the capital. Ibn Duḳmāḳ (809 = 1406) and al-Ẓāhirī (839 = 1434/5) report, that in their day Kalyūb was for the most part lying in ruins.

Economic: Almost all sources praise the wealth of Kalyūb in gardens and trees, among which the acacias (*sanṭ*) are mentioned as particularly valuable. In spite of the restrictive edicts of al-Malik al-Kāmil, the ground was very badly farmed, so that Kalyūb's prosperity suffered considerably (cf. 'Uthmān b. Ibrāhīm al-Nābulusī — wrote 637—648 = 1240—1249; Brockelmann, *Gesch. d. arab. Litt.* i. 335 — who devotes a longish section to Kalyūb in his *Luma' al-Ḳawānīn al-Muḍī'a fī Dawāwīn al-Diyār al-Miṣriya*; quoted in 'Alī Pasha Mubārak, *op. cit.*, 114 *sq.*). — In 1240 (1824/25) Muḥammad 'Alī built a cotton mill in Kalyūb and later barracks and a remount depot were established there. The al-Shawāribī family deserves special mention for its share in the economic development of Kalyūb, where they also built a serai with a mosque.

There are six mosques in Kalyūb, in one of which the Friday service is held. Among these the "great Mosque", formerly called Djāmi' al-Zamālī, with its great *Manāra*, made a great impression on Ibn Djubair (578 = 1182/3 in Egypt: cf. Brockelmann, *op. cit.*, i. 478; 'Alī Pasha Mubārak, *op. cit.*, p. 114). According to the inscriptions on its minbar and above the door it was renovated in 1148 = 1735/6 by the Shaikh al-'Arab of Kalyūb, Aḥmad al-Shawāribī. Among the tombs of saints the most important is that of Sīdī 'Awwād with popular amusements and horse-racing.

'Alī Pasha Mubārak gives a very full account of the above mentioned al-Shawāribī family as one of the most prominent in the town. Al-Malik al-Ẓāhir Baibars gave them charge of the new bridge over the Baḥr Abu'l-Manadjdja (cf. also al-Ḳalḳashandī, transl. Wüstenfeld, p. 28) and granted them large estates as fiefs and an annual pension (which lasted till 1275 = 1858/9). Muṣṭafā Pasha granted them the supervision of the whole province of al-Kalyūbiya. Various members of the family also filled important posts in the administration, besides the office of Shaikh al-'Arab of Kalyūb, which seems to have been hereditary with them. Sulaimān al-Shawāribī's patriotism cost him his life: in Radjab 1213 (Dec. 1798) he was beheaded by the French for his part in an attempted rising (cf. al-Djabartī, *op. cit.*, iv. 37 *sq.*).

According to Ibn Dji'ān (cf. 'Abd al-Laṭīf, *al-Ifāda wa 'l-I'tibār* etc., French transl. by de Sacy entitled *Relation de l'Égypte* etc., p. 595) the province of al-Kalyūbiya comprised in his time (777 = 1375/76) 59 townships and yielded a revenue of 419,054 dīnārs (but on p. 590 a list of 61 townships is given). Ibn Duḳmāḳ gives 60 with a total revenue of 383,140 dīnārs. In the time of the French expedition the revenues of the province from the estates (*Descr. de l'Égypte*, i. 306 *sqq.*) amounted to: 1. for the payment of the *mīrī* 3,390,742 dinars; 2. for the *kushūfiya* 1,710,462 dinars; 3. for the *fā'iḍ* 15,119,199 dinars.

The Baḥr al-Sardūs — according to legend built by Pharaoh and enlarged by his vizier Hāmān' (Ibn Duḳmāḳ, al-Ḳalḳashandī) — was, according to the enthusiastic description in Ibn Duḳmāḳ (whom al-Ḳalḳashandī follows), a large canal, apparently with water always in it. This is indicated also by two documents of the years 891 (1486) and 1061 (1650/1) (quoted by 'Alī Pasha Mubārak) in the possession of the al-Shawāribī family. Al-Ḳalḳashandī notes that the canal in his time had disappeared and that its place had been taken by the Abu 'l-Manadjdja canal, (cf. Wüstenfeld, *op. cit.*, p. 25 *sq.*); Maspero-Wiet, *op. cit.*, p. 105). According to 'Alī Pasha Mubārak, there was only a small canal in his time: the Tur'at al-Sardūsiya. Ibn Khallikān, Buṭrus al-Bustānī and 'Alī Pasha Mubārak give several scholars, who have the *nisba* al-Kalyūbī. The best known of them is Shihāb al-Dīn al-Kalyūbī (see the following article).

(Būlāḳ 1305), xiv. 114—119 (cf. also the article RIVER).

(A. RICHTER)

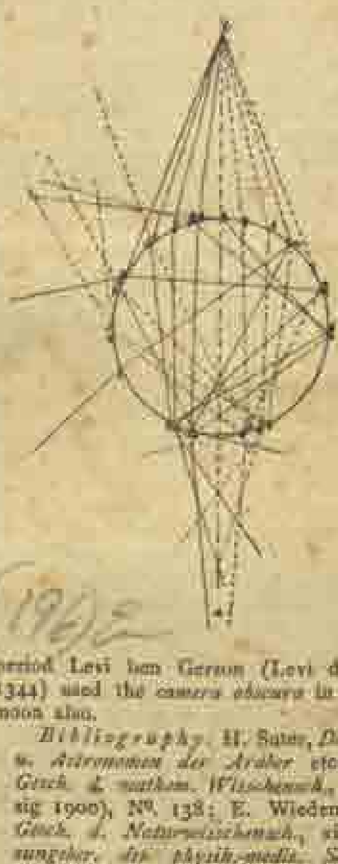
AL-ḲALYŪBĪ, AḤMAD B. AḤMAD B. SALĀMA, SHIHĀB AL-DĪN, an Arab author, pupil of the celebrated Shāfiʿī Faḳīh Shams al-Dīn (al-Shams) al-Ramlī (d. 1004 = 1596), was regarded in his day as an unchallenged authority and died towards the end of Shawwāl 1069 (July 1659). He composed numerous works, of which 21 have survived, in the fields of Fiḳh, geography, medicine, secret sciences and Adab. To the 17 works mentioned by Brockelmann, *op. cit.*, we have to add 1. a *Kit. al-Mudjarrabāt* in Göttingen (see *Verzeichn. der Hss. im Preuss. Staate, 1. Hannover, 3. Göttingen*, iii. Berlin 1894, N°. 100); 2. *Miʿrādj al-Nabī* in the Ẓāhiriya or ʿUmūmiya in Damascus, see Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ wa-Ḍawāḥīhā* (Cairo 1902), p. 74, N°. 40; Houtsma, *Cat. d'une coll. de Mss. arabes et turcs* etc. (Leiden 1889), N°. 241; 3. *Risāla fī Maʿrifat Asmāʾ al-Bilād wa-Ṭuruḳihā wa-Aḥwālihā* in Princeton, see Littmann, *A list of Arabic Mss. in Princeton Univ. Library* (Princeton—Leipzig 1904), p. 9, N°. 40; 4. a *Kit. Ḥikāyāt*, anecdotes of pious individuals, different from the *Kit. al-Nawādir* in the Brit. Mus., see Ellis and Edwards, *A Descr. List of the Arabic Mss. acquired ... since 1894* (London 1912), p. 62, Or. 7018. Of his works there have been printed: 1. *Ḥāshiya* to al-Maḥallī's (d. 864/1460) commentary on al-Nawawī's *Minhādj al-Ṭālibīn*, along with the *Ḥāshiya* of Shihāb al-Dīn al-Burullusī, Cairo 1306, 1318, 4 vols.; 2. *K. al-Ṣalawāt*, Būlāḳ 1300; 3. *al-Tadhkira fi ʾl-Ṭibb* on the margin of al-Suwaidī's *Tadhkira*, Cairo 1302, alone Cairo 1305; 4. *Ḥikāyāt Gharība wa-ʿAdjība* or *Ḥikāyāt wa-Gharāʾib wa-ʿAdjāʾib wa-Laṭāʾif wa-Nawādir wa-Fawāʾid wa-Nafāʾis*, usually briefly quoted as *Nawādir al-Ḳalyūbī*, which was only published after his death; see *The Book of Anecdotes, Wonders, Marvels, Pleasantries, Rarities and Useful and Precious Extracts*, ed. by W. Nassau Lees and Mawlawi Kabir al-Din, Calcutta 1856, 2nd ed. 1864, also in Cairo several times since 1274, last ed. 1323, 1328, the conclusion of which differs from the Calcutta edition.

Bibliography: al-Muḥibbī, *Khulāṣat al-Athar min Aʿyān al-Ḳarn al-Ḥādī ʿashar*, i. 175; after this ʿAlī Bāshā Mubārak, *al-Khiṭaṭ al-Djadīda*, xiv. 118; Sanguinetti, *Journ. Asiat.*, 1865, ii. 351; Leclerc, *Hist. de la Médecine arabe* (Paris 1876), ii. 303; Brockelmann, *Gesch. der arab. Lit.*, ii. 364.

(C. BROCKELMANN)

KAMĀL AL-DĪN ABU ʾL-ḲĀSIM ʿOMAR B. AḤMAD .... B. ABĪ DJARĀDA B. AL-ʿADĪM AL-ʿUḲAILĪ, historian of Aleppo, a member of the highly esteemed family of notables, the Banū Djarāda, whose ancestor had migrated from Baṣra into Syria with other members of the tribe of ʿUḳail about 200 (815) on account of a pestilence and had settled as a merchant in Aleppo, born in Dhu ʾl-Ḥidjdja 588 (Dec. 1192; in the *Fawāt* wrongly 586), the son of a Ḥanafī ḳāḍī, whose office had been hereditary in the family for four generations. After studying in his native city, in Jerusalem, to which his father took him in 603 (1206/7) and again in 608 (1211/12), Damascus, in the ʿIrāḳ and in the Ḥidjāz, he became in 616 (1219) professor in the madrasa of Shādbakht in Aleppo. He later filled the office of ḳāḍī there and served the two last Aiyūbids, al-Malik al-ʿAzīz (613—634 = 1216—36) and al-Malik al-Nāṣir (634—658 = 1236—1260) as wazīr and several times, by their command, acted as ambassador to Baghdād and Cairo. When his native city was captured and destroyed on Ṣafar 9, 658 (Jan. 26, 1260) by the Tatars, he fled with al-Malik al-Nāṣir to Egypt. Hūlāgū summoned him back to Syria as Chief Ḳāḍī, but he died in Cairo on Djumādā I 20, 660 (April 21, 1262) before he could obey.

His principal work was an alphabetically arranged history of the famous men of his native city, on the model of those of Khaṭīb al-Baghdādī [q.v.] and Ibn ʿAsākir [q.v.] in ten (according to some in 40) volumes entitled *Bughyat al-Ṭalab fī Taʾrīkh Ḥalab*, which on account of its too great bulk was never completed in a fair copy and was therefore already scattered to all the winds before the Mongol invasion under Tīmūr, so that even Ibn al-Shiḥna (see below) only knew of one volume of it (see *Cat. Codd. Arab. Bibl. Acad. Lugd.-Bat.*, ii. 82); odd parts are preserved in Paris (Bibl. Nat., de Slane, *Cat.*, N°. 2138), in London (*Cat. Codd. Mss. Or. in Mus. Brit.*, Pars ii., N°. 1290) and perhaps in Constantinople, Aya Sofya, N°. 3036 (see Horovitz, *Mitt. Sem. Or. Spr.*, Berlin, x. 60, N°. 51). Out of this he made a synopsis arranged chronologically entitled *Zubdat al-Ḥalab fī Taʾrīkh Ḥalab* down to 641 (1243), but died before he had finished the fair copy of this work either. The Paris MS. (de Slane, N°. 1666, another in St. Petersburg, which, however, is perhaps only a copy of the Paris one, see V. Rosen, *Not. sommaires des manuscr. arabes du Musée Asiat.*, St. Pétersbourg 1881, p. 98, N°. 160) has been utilised by G. W. Freytag, *Selecta ex historia Halebi*, Lutetiae Par. 1819; *Regnum Saahd-aldaulae in oppido Halebo*, Bonn 1820; *Historiens orientaux des Croisades*, iii. 691—732; H. Derenbourg, *Vie d'Ousâma* (*Publ. de l'Éc. des Langues or. viv.*, 2nd series, xii.1.), 569—585; E. Blochet, *L'histoire d'Alep de Kamâladdîn*, French version after the Arabic text, in the *Rev. de l'Orient latin*, 1896, p. 509—565, 1897, p. 146—235, 1898, p. 37—107, 1899, p. 1—49. A further synopsis with continuation down to Rabīʿ II 6, 951 (June 28, 1544) was made by Muḥammad Ibn al-Ḥanbalī, d. 971 (1564), entitled *Durr al-Ḥabab fī Taʾrīkh Aʿyān Ḥalab* (see *Cat. Codd. Mss. Or. in Mus. Brit.*, N°. 334; *Bibl. Bodl. Codd. Mss. Orient.*, i. N°. 810, 836, cf. ii. 597; V. Rosen, *Not. sommaires*, N°. 203).



The basic work, the *Bughya*, was twice continued in the 14th century: 1. by ʿAlāʾ al-Dīn

Abu 'l-Ḥasan 'Alī b. Muḥammad b. Khaṭīb al-Nāṣiriya, d. 843 (1439) entitled *al-Durr al-Muntakhab fī Ta'rīkh Ḥalab*; the work contains a description of the city of Aleppo followed by biographies of distinguished natives since 658; Horovitz details the MSS. in the *Mitt. Sem. Or. Spr.*, x. 60 *sq.*; 2. by Muḥibb al-Dīn Abu 'l-Faḍl Muḥammad b. al-Shiḥna al-Ḥalabī, d. 890 (1485), entitled *Nuzhat al-Nawāẓir fī Rawḍ al-Manāẓir*, MSS. in Berlin (Ahlwardt, *Verz.*, Nº. 9791); vol. i. in London (*Cat. Codd. Or. in Mus. Brit.*, Nº. 436, 2); vol. ii. in Gotha (Pertsch, *Verz.*, Nº. 1772); vol. iii. in Paris (de Slane, *Cat.*, Nº. 2139). From this one of the descendants of Ibn al-Shiḥna between 1014 and 1024 composed a synopsis with occasional notes down to his own time; MSS. of this synopsis are given by Pertsch, *Verz. d. arab. Hdss. zu Gotha*, Nº. 1724 and further in *Cat. Codd. Arab. Bibl. Lugd.-Bat.*, ii. 85, Nº. dcccciii. This synopsis was published as *al-Durr al-Muntakhab fī Ta'rīkh Mamlakat Ḥalab* by Joseph Elias Sarkis, Beirūt 1909. Extracts from it were given by A. v. Kremer in the *Sitzungsber. d. Wien. Akad.*, phil.-hist. Kl., IV (1850), i. 125 *sqq.*

Of the history of his family *al-Akhbār al-Mustafāda fī dhikr Banī Abī Djarāda*, which he composed for Yāḳūt, the latter gives extracts in his *Irshād*, vi. 18—35. Of his verses an elegy on the fall of Aleppo, of which Abu 'l-Fidā', *op. cit.*, gives specimens, is the most famous. In 610 (1213) he handed al-Malik al-Ẓāhir a congratulatory letter on the birthday of his son Malik al-'Azīz, entitled *al-Darārī fī dhikr al-Dharārī*, which is printed from the MS. Nūri 'Othmāniye, Nº. 3790 in the *Madjmū'a*, Stambul 1298, as Nº. 2. Last he wrote under the title *al-Wuṣla ila 'l-Ḥabīb fī Waṣf al-Ṭaiyibāt wa'l-Ṭīb* a guide to make all sorts of perfumes; MS. in Berlin (Ahlwardt, *Verz.*, Nº. 5463), in the Brit. Mus. (Ellis and Edwards, *A descr. List of the Arab. Mss. acquired . . . since 1894*, London 1912, p. 56, 62; Or. 6388, and in Bankipore (*Cat. of the Arab. and Pers. Mss. in the Orient. Publ. Libr.*, iv. 146, Nº. 96). Specimens of his hand-writing — he was one of the most famous calligraphers, according to Yāḳūt — are in St. Petersburg (see *Cat. des Mss. et Xylographes orient. de la Bibl. Imp.*, Nº. 147).

Bibliography. Yāḳūt, *Irshād al-Arīb ilā Ma'rifat al-Adīb* (Gibb Mem. vi.), vi. 18—46; Ibn Shākir, *Fawāt al-Wafayāt* (Būlāḳ 1299), ii. 101; Abu 'l-Fidā', *Ta'rīkh*, iv. 634; Ibn Ḳuṭlūbughā, *Ṭabaḳāt al-Ḥanafiya* (*Abh. f. d. Kunde des Morg.*, ii. Leipzig 1862), Nº. 143; Weijers, *Orientalia*, ii. 248; Wüstenfeld, *Geschichtschreiber der Araber*, Nº. 345; Brockelmann, *Gesch. d. Arab. Lit.*, i. 332. (BROCKELMANN)

KAMĀL al-DĪN al-Fārisī (Muḥammad b. al-Ḥasan, Abu 'l-Ḥasan) died about 720 = 1320. He was a scholar equal in calibre to Ibn al-Haitham [q. v.] and, indeed, perhaps surpassed him in originality. Ḳuṭb al-Dīn al-Shīrāzī had called his attention to the latter's *Optics*, which he procured and wrote an excellent commentary upon. He added a series of brilliant treatises to it. These deal more particularly with the refractions and reflections of a sphere, the rainbow, the halo, *camera obscura*, etc. As to the latter it should be noted that the first scholar whom we know to have used the *camera obscura* was Ibn al-Haitham. On the wall opposite the orifice, he showed the image of the sun during an eclipse of the sun and explained the phenomenon. That he did not succeed in obtaining a representation of the crescent moon is due, not to some error in his assumptions, but to the fact that its tips are too faint. Kamāl al-Dīn gave a more perfect theory and tested it by brilliant experiments. He first made the orifice very small and placed opposite it a surface half red and half green. He then showed how one got the sharper images the smaller the opening and that the images were independent of the shape of the orifice. The larger the opening the less these principles applied. It was to be noted that the images were reversed. With this apparatus Kamāl al-Dīn also observed on the wall the clouds and their movements as well as a bird flying past. The movements in the image are in the contrary direction to real life. At a later

The figure, taken from a manuscript, shows the path of the rays, which start from *b* and undergo a second reflection in the interior of the sphere. They produce the secondary rainbow. The primary bow would be the result of the first reflection. Goethe and Boisserée at a later date observed the secondary rainbow.

period Levi ben Gerson (Levi de Balneolis, d. 1344) used the *camera obscura* in eclipses of the moon also.

KAMĀL PASHAZĀDE. [See KEMĀL PASHAZĀDE.]

AL-KAMAR, the moon, the satellite [of the] earth, considered in quite early times the principal heavenly body next to the sun, whose path lay on the sphere next to the earth (*falak al-kamar*). Pythagoras was the first to recognise it as a dark body illuminated by the sun, from whose relative position with regard to the sun its changes in illumination or phases were seen to result; the recurrence of the latter, when the sun and moon have again reached the same positions with regard to the earth, led to the conception of the synodic month (29½ days). The Muhammadans calculate time by lunar years, each of twelve months. These are alternately "full" of 30 days and "empty" of 29 days. This gives a year of 354 days. The Iranian astronomer al-Bīrūnī [q. v.] in his *al-Ḳānūn al-Mas'ūdī* (Maḳāla iii, Ch. 7) makes the interesting suggestion that the number 360 may have been introduced for the division of the circle, because it is midway between the solar and lunar years.

But as the synodic month, to be quite accurate, is 29.5306 days, which means that the month as reckoned by the Muslims is ,0306 and the lunar year ,367 days too short, a number which in 30 years amounts to 11.01 days, in the Muhammadan calendar an intercalary period of 30 years is in use. It is called *al-madjmū'a* and the intercalary year itself *al-sana al-kabīsa*. Within an intercalary period there are 11 intercalary years.

The Muhammadan year begins (or rather should begin) with the sunset after which the crescent moon is seen for the first time (first day of Muharram). The beginning of this era was dated on the first Muharram of the year in which the Prophet migrated to Medina from Mecca (July 15, 622 of the Christian era = *al-Hidjra*).

The first appearance of the crescent moon (*ru'yat al-hilāl*) (cf. *Zīdj* of Habash al-Hāsib, Berlin MS., Ahlwardt, *Verz.*, Nº. 5750, f. 151b) on the night of Sha'bān 29 is of special importance as the fast of Ramaḍān begins with this moment. It is necessary to be able to calculate this moment when the weather prevents the observation of the first appearance of the crescent moon. This is one of the most difficult tasks of Arab astronomy. H. Suter has illustrated this from the example: "to find whether on the night of Sha'bān 29 of the year 540 A. H. the moon is visible" (cf. *Die astronomischen Tafeln des Muḥ. b. Mūsā al-Khwārizmī*, Copenhagen 1914, p. 67 *sqq.*) and C. A. Nallino gives a formula for ascertaining the smallest phases of the moon (cf. *al-Battānī sive Albatenii Opus Astronomicum*, Milan 1903, i. 269).

Even in the earliest lunar theory, as stated by Hipparchus and Ptolemy, the complicated and irregular movement of the moon during a month is apparent: it is in reality due to the double attraction of earth and sun to which the moon is subjected (the three body problem of modern astronomers). The determination of the longitude of the moon in its orbit is the main problem of lunar theory and, in order to solve it in some degree, Ptolemy was forced to substitute for the eccentric circle of the moon's orbit an auxiliary circle, the so-called epicycle, which the moon would traverse regularly in an anomalistic month (27 days, 13 hours, 18 minutes), while at the same time the centre of this epicycle moved uniformly round the earth on a second called the deferent circle in a nodical month (27 days, 5 hours, 5 minutes). In addition the plane of oscillation was, according to Ptolemy, inclined to the plane of the earth's motion (ecliptic) at 5° (to be more accurate 5° 9'), while he made the line of intersection of the paths of the earth and moon (nodal line) execute a retrograde movement and put the centre of the oscillation about 10½° nearer the apogee (distance from the earth).

The true longitude of the moon therefore consists of the four so-called great variables, equation of centre, evection, variation and annual equation. The first denotes the transition from circle to ellipse, the second the displacement of the centre of the deferent just mentioned, while the fourth was laid down by the astronomer Kepler. As to the variation, it is given by the following expression:

$$-z' = \sin(l-\lambda) + 39'\,5''\sin 2(l-\lambda)$$

in which l and λ are the mean longitudes of sun and moon. From this formula we find that the variation in the syzygies ($l-\lambda = 0°$) and in the quadratures ($l-\lambda = 90°$) i. e. $2(l-\lambda) = 180°$, quite disappears or is very small, but on the other hand is very marked in the octants. Ptolemy, in order to reconcile smaller differences between theory and observation, actually introduced a kind of variation of the line of apsides, the πρόσνευσις. After Tycho Brahe had long been regarded as the real discoverer of the variation, the orientalist and astronomer L. Am. Sédillot in his article *Sur un manuscrit arabe dans lequel la variation de la lune est signalée* (*Compt. Rend.*, 1836) asserted that it was evident from the *Almagest* of the mathematician and astronomer Abu 'l-Wafā' al-Būdjānī (328—388 = 940—998) that he was really the discoverer of the variation to which he gave the name *Ikhtilāf al-Muḥādhāt*. A long dispute arose on the accuracy of Sédillot's interpretation of the text, which ran through many years of the *Comptes Rendus*; Sédillot, Mathieu, Chasles etc. formed the one party, Biot, Binet, Bertrand etc. the other, who held the contrary view that Abu 'l-Wafā' had discovered nothing new but only substituted his *Muḥādhāt* for Ptolemy's *prosneusis*. In the end Carra de Vaux has been able to prove definitely the erroneousness of Sédillot's argument by a thorough analysis of the Arabic text in question and the citation of other Arabic and also Persian and Hebrew sources.

The Arab astronomers adopted the lunar theory of Ptolemy and developed it. They also recalculated several numerical values on which the study of the *Zīdjāt* accessible to us, e. g. those of al-Khwārizmī, al-Farghānī, al-Battānī and al-Djaghmīnī gives the information we require.

In determining the parallax of the moon (*ikhtilāf manẓar al-ḳamar*) and ascertaining its distance from the earth, the Arabs did not go beyond Ptolemy. Al-Bīrūnī in chap. 8 of *maḳāla* iii. of his *Ḳānūn al-Mas'ūdī* makes an interesting observation on the shadow thrown by a gnomon (*miḳyās*) in moonlight. As the size of the radius of the earth in relation to the distance of the moon from the earth is not infinitely small (as in the case of the sun), the staff at the same apparent altitude of the moon and of the sun throws longer shadows in the case of the moon. Al-Bīrūnī calculates the difference between the two shadows for an altitude of 45°.

The Arab astronomers devoted special attention to the exact calculation of the frequency of eclipses (*kusūf al-ḳamar*), as they made use of it to

ascertain the difference in longitude between two places on the earth. They worked out tables (based on Ptolemy) which gave the times of the beginning and ends of the eclipse for various parts of the earth as well as the area of the moon's disc covered. But it is impossible to calculate these with great accuracy from observation only. The difficulties (according to al-Bīrūnī) lie in ascertaining the point where the eclipse begins on the edge of the moon, in the indistinctness of the shadow, the lack of agreement between the astronomical instruments of the two observers, etc. The result was that the calculations of longitude from eclipses of the moon were often very inaccurate. It is true that in al-Khwārizmī's astronomical tables (H. Suter, *op. cit.*, p. 85) there is an example in which the period of commencement of the eclipse agrees perfectly with the previous calculation of it, but not every calculation was so accurate. The Fāṭimid astronomer Ibn Yūnus (d. 399 = 1009 in Cairo), who goes so far as to distinguish five phases in the course of an eclipse, gives in his *al-Zīdj al-Kabīr al-Ḥākimī* cases where the difference between calculation and observation amounted to as much as 23 minutes (cf. Caussin, *Le Livre de la Grande Table Hakémite observée par .... Aboul-hassan Ali .... ebn Iounis* in the *Not. et Extr.*, vii. 92).

Several studies on the moon, none of which are yet published, have been preserved to us from the pen of the exceedingly prolific Arab mathematician, physicist and astronomer Ibn al-Haitham (d. 430 = 1039). We may mention: 1) the great *Maḳāla fī Ḍaw' al-Ḳamar* (India Office Catalogue, N°. 734, ix.); 2) *Maḳāla fī Ikhtilāf manẓar al-Ḳamar* (ibid., N°. 734, xix) dealing only with a special case of parallax ("when the altitude of the moon is less than 30° and is western, its latitude lies south of the ecliptic and the head of the constellation of Cancer is under the western horizon so that it does not reach the meridian from below, the latitude of Medina being taken at 30° or near this figure, the parallax of the moon is in longitude the opposite of the order of the signs of the zodiac...."); 3) *fī Māʾiya al-athar alladhī fī Wadjh al-Ḳamar*, Municipal Library (*maktabat baladī*) of Alexandria ("If one carefully observes and examines these marks on the superficies, one finds them always the same in shape and never changing, either in configuration or in position or magnitude or as regards their dark character").

AL-ḲAMAR. Title of Sura liv. of the Ḳurʾān after the splitting of the moon which is mentioned in the first verse. Cf. MUʿDJIZĀT.

KAMARĀN, an **islet in the Red Sea**, on the coast of Tihāma, opposite Zabīd. The fortified town of Kamarān has always belonged to whosoever possessed Tihāma; it contained prisons of the King of Yemen, in al-Maḳdisī's times, and a spring of sweet water called al-ʿAbd. Taxes and customs duties were collected there.

The jurist Muḥammad Ibn ʿAbdūya, a disciple of Abū Isḥāḳ al-Shīrāzī, author of works on uṣūl al-fiḳh, lived in Kamarān and is buried there. When there is a storm and ships are in danger the natives throw dust from his grave into the sea, which is then supposed to subside.

In modern times Kamarān has become one of the quarantine-stations for pilgrims; cf. on this subject Snouck Hurgronje, *Mekka*, ii. 299, note 1; do., *Verspreide Geschriften* (Bonn and Leipzig 1923 *sqq.*), iii. 27, 32.

Bibliography: al-Muḳaddasī (ed. de Goeje), *B. G. A.*, iii.² 103; Yāḳūt, *Muʿdjam* (ed. Wüstenfeld), iii. 80. (V. Vacca)

KĀMIL, the fifth metre in the system of Arab prosody, is regularly composed of three *mutafāʿilun* in each hemistich: it has three ʿ*arūḍ* and nine *ḍarb*:

I	*mutafāʿilun*	»	»	⁖	»	»	*mutafāʿilun*
	mutafāʿilun	»	»	⁖	»	»	*mutafāʿil*
II	»	»	»	⁖	»	»	*mutafā*
	»	»	*mutafā*	⁖	»	»	*mutafā*
	»	»	»	⁖	»	»	*mutafā*
III	»	*mutafāʿilun*		⁖	»		*mutafāʿilātun*
	»	»		⁖	»		*mutafāʿilān*
	»	»		⁖	»		*mutafāʿilun*
	»	»		⁖	»		*mutafāʿil*

In all the feet except *mutafā* and *mutfā* one may suppress either the second vowel of the foot (*mutfāʿilun*), or the second consonant with its vowel (*ta*), or the second vowel and the prolongation of the third consonant (*mutfaʿilun*) which is exceedingly rare.

As a result of these suppressions the regular foot, *mutafāʿilun*, may become *mutfāʿilun* (= *mustafʿilun*), *mufāʿilun* (= *mafāʿilun*), *mutfaʿilun* (= *muftaʿilun*); if this is done so that a piece does not contain a single whole foot in *mutafāʿilun*, it then belongs to the *radjaz* metre. (Moh. Ben Cheneb)

AL-MALIK AL-KĀMIL. [See AL-MALIK].

KĀMRĀN MIRZĀ, **second son of Bābur**, and half-brother of Humāyūn; his mother was Gulrukh Bēgam, and he was born in Kābul city about 1509. He was cleverer than Humāyūn and had a poetical turn, but he was cruel and vicious, and a restless schemer. He repeatedly rebelled against Humāyūn, who was at last compelled by his officers to make him innocuous by blinding him in the end of 1553. He went to Mecca in 1554 and died there in October 1557. The most interesting thing about him is the devotion of his wife, Māh Čūčak Bēgam Arghūn, daughter of Shāh Ḥasan of Sind. She insisted on going on board his vessel

and accompanying him to Mecca, in spite of her father's remonstrances, saying that he had given her to Kāmrān in the days of his greatness (in 1546) and that she would not abandon him now in the time of his misery. She died at Mecca a few months after her husband.

Kāmrān was put in charge of Ḳandahār by his father, and in the beginning of Humāyūn's reign he was governor of the Pandjāb. During the interregnum, when Humāyūn was in Persia, Kāmrān and his younger brother, 'Askarī, ruled over Afghānistān. He left one son and three daughters. The son, Abu 'l-Ḳāsim, who inherited his father's poetical talents, was confined in Gwalior by Akbar in 1557, and was put to death some years later as a dangerous competitor. All three daughters were given in marriage; one of them, named Gulrukh, was a woman of a masculine spirit; she married Ibrāhīm Ḥusain Sulṭān; and she and her son were thorns in Akbar's side. (Firishta, lith. ed., p. 221, and Muhammad Ḥusain, *Darbār-i-Akbarī*).

F.), London, 1902; Badā'ūnī, *Muntakhab al-Tawārīkh*, i. 451 *sqq.*; Elliot-Dowson, iv. 498, v and vi. There is a copy of Kāmrān's *Dīwān* in the Oriental Public Library, Bankipore, *Cat.*, ii. 145, and 215, where a biography of Kāmrān is given. (H. Beveridge)

KĀMRĀN SHĀH Durrānī, the last sovereign of the Sadozai family of Afghānistān who succeeded his father, Maḥmūd Shāh, in the limited sovereignty of Herāt in 1245 (1829) and reigned till 1258 (1842). In the civil wars between the sons of Taimūr Shāh, the princes Zamān, Shudjā' al-Mulk and Maḥmūd, the prince Kāmrān proved himself a brave warrior and in 1221 (1806) he took Ḳandahār from Shudjā' al-Mulk, but lost it soon afterwards. In 1232 (1816) he took a leading part in the events which led to the disruption of the Durrānī monarchy. In revenge for an insult offered to his sister by Dōst Muḥammad he blinded and beheaded Fatḥ Khān, the Bārakzai Wazīr (Dōst Muḥammad's father), to whom Maḥmūd Shāh owed his kingdom. This led to the loss of the whole kingdom except the Herāt province. Kāmrān was debauched and indolent in his later years, but maintained himself at Herāt through the efforts of his able and unscrupulous wazīr, Yār Muḥammad Alikuzai. The siege of Herāt by the Ḳādjār Shāh of Persia in 1837—39 was the principal event of his reign. The rivalry between England and Russia was one of the principal causes of this siege, the Persians being advised by Russian officers, while Lieut. E. Pottinger, a young English officer, was the main spirit in the defence. In 1258 (1842) Kāmrān Shāh was assassinated by Yār Muḥammad, who was in league with the Persians and remained in possession of Herāt. Coins were struck at Herāt by Kāmrān.

KĀMRŪP, a district in Assam, situated between 25° 43″ and 26° 53″ N. and 90° 39″ and 92° 11″ E.; the greater part consists of a wide plain, through the lower portion of which the Brahmaputra R. flows from east to west; but south of the river there are ridges of hills, thickly covered with jungle. Under the rule of the Kōč dynasty, the first attempt to bring this country under Muḥammadan rule was made by Muḥammad Bakhtyār Khaldjī [q. v.], but his victorious progress eastward was checked when he attempted to enter Assam, and successive rulers of Bengal after him made similar fruitless attempts. In 1256 Ikhtiyār al-Dīn Yūzbak Tughril Khān invaded Kāmrūp and erected a mosque in commemoration of his victories, but disease broke out among his troops and the Assamese destroyed the general and most of his army. The thick jungles and moist, unhealthy climate of the Brahmaputra Valley proved to be effectual obstacles to the progress of the Muḥammadan troops. It was not until 1638 that they succeeded in gaining a footing in Kāmrūp and Gauhati became the capital of a Muslim governor; but 20 years later they were driven out of the country by the Ahoms, who took advantage of the confusion that resulted from the conflicts between the rival claimants to the throne of Shāh Djahān [q. v.]. In 1662 Mīr Djumla [q. v.] made a vigorous attempt to conquer the Assam valley, but though he was at first successful, the difficulty of military operations during the rainy season and the outbreak of disease among his soldiers compelled him to beat a retreat into Bengal, and Mīr Djumla himself did not survive the failure of his expedition. After intermittent struggles for some years, the last vestige of Muḥammadan rule disappeared in 1681 from Kāmrūp, and it formed part of the Ahom kingdom, until it was ceded to the British in 1826.

KĀN. [See khān].

KĀN WA-KĀN, the name of one of the seven kinds of modern poetry (*funūn*), unknown to the classical authors. It was invented by the people of Baghdād and takes its name from the formula used by story-tellers at the beginning of their recitals: "There was once upon a time". Originally the *kān wa-kān* was a rhymed tale and it was only later that it was applied to other subjects, especially of moral tendency. In the spoken language it was always in vogue in the east only, especially in its place of origin. The *kān wa-kān* is a poem composed of strophes of two lines the metre of which is given by the prosodists as follows:

mustaf'ilun fa'ilātun, mustaf'ilun mustaf'ilān
fa'lān.

But, according to the 32 specimens that I have seen, the last foot of the first verse is *mustaf'ilun* and not *mustaf'ilān*; and therefore there is a rhyme only in the last hemistich of every second verse. The principal variations are the disappearance of *s* or *f* in *mustaf'ilun* and *fa'lān* is often changed to *fa'lān*. Al-Ibshīhī, *al-Mustaṭraf*, Būlāḳ

1292, ii. 273 *sqq.*, Abu 'l-Fidā', *Ta'rīkh*, Constantinople 1286, iv. 158, and especially Ḥurūfīsh, *al-Kanz al-fā'iḳ*, Cairo 1311, p. 23, 26, 29, 33, 34, 42, 53, 55, 71, 74, 77, 80, 86, 135, 137, 144, 160, 181, 191, 204, 217 give specimens of *kān wa-kān*.

KAN'ĀN, the biblical K^e^na'an, is a personality, regarding whom the traditions, in spite of their sparsity, agree in hardly a single point. Al-Baiḍāwī (ed. Fleischer, i. 513) mentions him as the father of the famous Nimrūd (Numrūd according to the *Lisān* and the *Tādj*); he is also regarded as the ancestor of the Kan'āniyūn (*Lisān*, x. 191) and of the Berbers (al-Dimashḳī, *Nukhbat al-Dahr*, ed. Mehren, p. 266 and Ibn Khaldūn, *al-'Ibar*, vi. 93, 10 *sqq.*, 97, 11 *sqq.*). — Very little is known about him. Many refer to him the story in Sūra xi. 44 *sq.*, that a son of Nūḥ in spite of his pressing appeal refused to take refuge in the Ark with him and thus perished in the Flood with the unbelievers (al-Baiḍāwī, ad locum and al-Tha'labī, *Ḳiṣaṣ al-Anbiyā'*, Cairo 1324, p. 36 below). — Al-Ṭabarī (ed. de Goeje, i. 199) also knows of a son of Nūḥ called Kan'ān, who lost his life at the Flood, but refers the Ḳur'ān verse in question to Yām b. Nūḥ (see *Tafsīr*, ad Sūra 44 *sq.*), whom, however, he identifies with Kan'ān in i. 199, 4.

While Kan'ān appears here as the son of Nūḥ and Ibn al-Kalbī mentions Shalūm (i. e. Kan'ān) as Nūḥ's fourth son (in Yāḳūt, *Mu'djam*, ed. Wüstenfeld, iv. 311) we find him in the parallel passage to Genesis, ix. 25 (in al-Ṭabarī, *op. cit.*, p. 212) as a son of Ḥām b. Nūḥ (see also al-Ya'ḳūbī, i. 13, 8 *sq.*, 16, 1; al-Mas'ūdī, iii. 240, 294). According to a third tradition (in Yāḳūt, *op. cit.*) Kan'ān was a son of Sām b. Nūḥ and according to a fourth — not quite reliable — tradition, a son of Kūsh b. Ḥām (al-Dimashḳī, *op. cit.*). (B. JOEL)

KAN'ĀN PASHA. [See KEN'ĀN PASHA.]

ḲANĀT, plur. *ḳanawāt*, *ḳanawāt*, *ḳanī* and *aḳniya*, means in Arabic: (1) canal, aqueduct, (2) lance or stick (see *Lisān al-'Arab*, xx. 66; *Tādj al-'Arūs*, x. 304; Dozy, *Supplément*, ii. 414). These two conceptions have developed from the original meaning of "reed". The word may be said with considerable certainty to be borrowed in the western Semitic languages from the Assyrian or Accadian, where *ḳanū* = reed, bulrush; cf. Zimmern, *Akkad. Fremdwörter*, Leipzig 1915, p. 56. Hence we have in Hebrew *ḳanā*, in Aramaic *ḳanyā*; the word passed through the intermediary of the Aramaic into Arabic; there in the popular dialects of Syria and Egypt it is pronounced *ḳanāya*, *ḳanāyāt*. The Greeks and Romans took over the Semitic word as κάννα, κάννη (κάνη), canna; note the change of meaning — an exact analogy to the Arabic — of the Latin *canalis*, strictly an adjective meaning "reed-shaped", then "channel, canal". In modern Persian also *ḳanāt* is in use but there it has the special meaning of subterranean channel or aqueduct. The true Persian word for this particular kind of canal is *kārīz*, earlier *kahrīz* (Vullers, *Lexic. Pers.-Lat.*, ii. 767, 927; in the older language we also find *zāhghāz*; see Vullers, i. 58). This latter word has in turn entered Arabic as *ḳiḳrīdj* (also *ḳukārīdj*), but there means "water-holder", "cistern"; cf. *Lisān al-'Arab*, iii. 136; Lane, *Lexicon*, p. 1738; cf. also Yāḳūt, *Mu'djam*, ed. Wüstenfeld, iv. 270, 2. Only in Syria (according to Moritz, *Zur antiken Topographie der Palmyrene*, in the *Abh. Pr. Akad.*, 1889, iv. 12) do we find *kahrīz*, *ḳahrīdj*, vulgar *kahrīz*, in the meaning of "subterranean aqueduct". It may here be pointed out that the other words in Arabic for aqueduct seem also to be borrowed (probably all from the Aramaic); cf. Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 23—25; take, for example, *ḳaṣṭal* (Dozy, ii. 344; from the Aram. *ḳasṭal* = castellum; that is "any large building"; cf. the meaning of *ḳanṭara* = bridge, aqueduct, castle).

The plural *Ḳanawāt* occurs in Syria as a place-name. It is, for example, the name of a town on the western slope of the Ḥawrān, fifty miles south of Damascus, which is so called on account of its wealth of water, and is certainly a very ancient settlement, although hardly identical with the Biblical Ḳenāt (*Numbers*, xxxii. 42; I *Chron.*, ii. 23), which Wetzstein would rather recognise in Ḳ'naia (diminutive of *Ḳanāt*), a village near Kerak, four hours' journey east of Der'āt in al-Nuḳra; see Wetzstein, *Das batanäische Giebelgebirge*, Leipzig 1884 (from Delitzsch's *Psalmenkommentar*[4], p. 26). Ḳanawāt's (Kanata, Canatha) period of greatest prosperity was in the early centuries of the Christian era; splendid ruins still exist dating from the Roman period. Mention is made of the building of a new canal in the reign of Trajan; this must certainly have been simply the restoration of an already existing canal of older date. The upper town still has a well preserved ancient aqueduct. On this Syrian Ḳanawāt see Burckhardt, *Reisen in Syrien und Palästina*, Weimar 1823 *sq.*, p. 157 *sq.*; Seetzen, *Reisen durch Syrien*, Berlin 1854—59, i. 79 *sq.*, iv. 51—54; J. Porter, *Five Years in Damascus*, London 1885, ii. 90 *sq.*; G. Le Strange, *Palestine under the Moslems*, London 1890, p. 386; M. v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, i., Berlin 1899, p. 104; P. Thomsen, *Loca sancta*, Halle 1907, p. 76—77; Georgius Cyprius, ed. Gelzer, Leipzig 1890, p. 206—207; Moritz in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, x. 1856; Baedeker, *Palästina und Syrien*[7], Leipzig 1913, p. 153—155.

On the Syrian aqueducts, Ḳanṭarat Zainab and Ḳanāṭir Fir'awn, see ḲANṬARA.

Subterranean aqueducts such as we get in Persia are only rarely found in Syria, e. g. at Karyatēn on the ancient road from Damascus to Palmyra (according to Moritz, *Die antike Topographie der Palmyrene*, *loc. cit.*). The town of Damascus is supplied by a channel from the river Baradā, the water of which is led into the dwelling-houses by subterranean pipes. For information on aqueducts in Syria and Arabia in general see also J. Berggren, *Guide français-arabe vulgaire*, Upsala 1844, p. 56—57, s. v. *aqueduc*.

Among the oldest aqueducts of the Muslim period is the aqueduct of Mekka, which was begun in the time of Mu'āwiya. Zubaida, wife of Hārūn al-Rashīd, earned special merit by providing for the water supply of the holy city; in 810 (1407) she had canals made which led the water from the district of Ṭā'if, the valley of Minā and from 'Arafāt to Mekka. The channels, much neglected in course of time and often only very negligently repaired, were restored by the Turkish Wālī 'Uthmān Pāshā (1882—86). For details see Snouck Hurgronje, *Mekka*, the Hague 1888, i. 6—10, where the Arabic sources are also cited.

In view of the dryness of Īrān, artificial irrigation by means of canals has always been a necessity of existence there (cf., for example, *Polybius*, x. 25), as river water is in many places not available in sufficient quantity and the rainfall is slight. Open canals continually lose large quantities of water through infiltration and evaporation and they are also not infrequently damaged by cloud-bursts and torrential floods. The subterranean *ḳanāt* or *kārēz* (*kahrīz*) system is therefore generally preferred in Persia. By this means water is brought often from great distances to the humus-covered plains. Wells are made in the higher lying parts of the valleys, especially at the foot of hills, and the water accumulates plentifully in them and is led first by subterranean tunnels, latterly by open trenches and furrows (*djūī*), to the fields and gardens to be watered. These channels are often 50 or more feet below the surface of the ground, are vaulted and often lined with bricks and so high that a man can crawl through them. Every 30 or 40 paces a perpendicular shaft, often of masonwork, and covered at the top, leads down to the pipe. In the making of these channels the Persians reveal great skill. The searching for springs and the making of channels is a special industry, that of the *muḳannī* (see especially Bishop, *op. cit.*; see *Bibliography*). The making of a *ḳanāt* costs a great deal in proportion to the water it supplies and the annual cost of maintaining it is also not inconsiderable. It is also very important to see that the water is properly distributed, and much care is taken that the villages in turn have the use of it for the proper length of time. This business of water-distributing is perhaps the most important part of the administration of a Persian village. A special official, the *Mīr-āb*, is entrusted with the duty. He has also to see to the maintenance of the pipes etc., especially to their being kept clean; cf. thereon Gordon, *op. cit.*; see *Bibliography*.

At the present day the Persian *ḳanāt* system is, unfortunately, much neglected; many channels are now quite dry; for example, the great network of channels which once supplied the thickly populated town of Ray near Ṭihrān is now so much destroyed that it can barely supply the wants of the village of Shāh 'Abd al-'Aẓīm which is built on the ruins of Ray (Polak, *op. cit.*, ii. 118). Ṭihrān is, according to Bishop, *loc. cit.*, still supplied by 35 canals.

This method of irrigating the fields by artificial channels is called in Persia the *ābī* system of agriculture, in contrast to the natural method, the *daimī* or *bārānī* system; cf. Polak, *op. cit.*, ii. 120; Stolze-Andreas (see *Bibl.*), p. 8.

A great network of canals cuts up Central Asia. The planning of this system is ascribed to Tīmūr; but they are certainly much older and their origin may be dated at least as far back as the early middle ages. To make them, the water from springs in the oases miles apart was collected, great rivers diverted, and water led by tunnels through ranges of hills and by aqueducts over the valleys. A great many of these canals are, however, now decayed, as in Persia. There the canal is called *arīk* and the canal manager *arīk-aksakal*. A thorough account of this Central Asian system of irrigation is given by A. Th. v. Middendorf in his article *Einblicke in das Ferghana-Thal* in *Mém. de l'Acad. imp. des Sciences de St. Pétersbourg*, 1881, Series 7, vol. xxix. See also, especially for the country east of Bukhārā, H. Moser, *Durch Central-Asien*, Leipzig 1885, p. 114—119.

(M. Streck)

KANAWDJ or Kanōdj, Skr. Kanyākubdja, (known to the Arab authors as Ḳannawdj or Ḳinnawdj) was the capital of a powerful kingdom before the Muslim invasions. It is now a small town in the Farrukhābād district of the United Provinces on the R. Ganges (27° 2′ 30″ N. 79° 58′ E.). It has been supposed to be identical with Ptolemy's Kanagora or Kanagoza (see McCrindle, *Ptolemy*, p. 134; Beal, *Travels of Buddhist Pilgrims*, p. 70). V. Smith disputes this on the ground that the existence of Kanawdj at the time of Ptolemy (140 A. D.) is doubtful. The identification is however not improbable. The first undoubted mention is found in the travels of Fa-hsien (405 A. D.), when it was a place of no great importance under the Gupta kings. At the time of Yuan Chwang's visit (circa 641 A. D.) under the rule of Harshavardhana it had grown into an important capital and a centre of Buddhism. It may be noted that this traveller gives the Chinese transcription (Kano-kü-she) of the Sanskrit-name Kanyākubdja, while the earlier traveller Fa-hsien gives Ka-no-yi, answering to the Prakrit and modern form. The country of which it was the capital was known as Panḍāla. After a period of anarchy and short lived monarchies it became the capital of the Gurdjara Pratihāra kings, who founded a dynasty which lasted for two hundred years. The most powerful king of this race was Bhōdja (A. D. 480—90) under whom Kanawdj became the capital of an extensive empire, which may be stated to have included all the plain of northern India from the Satladj to Bihār and southwards to Gudjarāt and Saurāshtra. On the west it was bounded by the territories of Sind now under Muslim rule.

Al-Masʿūdī writing in A.H. 332 (943—4) says that the king of Ḳinnawdj ruled over the country bordering on Multān and Sind and southwards on al-Mānkīr, the country of the Ballahrā (i.e. the Vallabhi kings), and al-Bīrūnī [q. v.], says that Muḥammad b. al-Ḳāsim b. al-Munabbih, who had entered Sind from Sidjistān, penetrated India as far as Ḳannawdj, but the date of this invasion is not given. Probably this invader is identical with Muḥammad b. al-Ḳāsim b. Muḥammad, the conqueror of Sind who, according to the *Čač-nāma*, made war on the chief of Ḳannawdj. But, if any such expedition took place, it could not have been directed against Ḳannawdj itself, but only against its territories bordering on Sind. There is no ground for supposing that any Muhammadan invader penetrated as far as Ḳannawdj before Maḥmūd of Ghazni. His conquest overthrew the Pratihāra rule, which had already been weakened by the attacks of the Rāshtrakūtās. At the time of Maḥmūd's invasion, after his conquest of Djaipāl, the Shāhī of Gandhāra, Ḳannawdj was under Rādjyapāla, who abandoned the city and fell back on Bārī, east of the Ganges, which became the capital. After Maḥmūd's departure the Čandēls seized on Ḳannawdj and Rādjyapāla was killed. Maḥmūd returned next year and defeated the Čandēls, and the Ḳannawdj kingdom continued as a small state until it fell into the hands of the Gaharwār Rādjpūts.

In 589 (1193) the final destruction of the Hindū kingdom was brought about by the invasion of Muʿizz al-Dīn Muḥammad b. Sām, the Ghōrī king of Ghazni, and Kanawdj ceased to be a place of importance. It probably never really recovered from its destruction by Maḥmūd, as al-Bīrūnī, writing as a contemporary, says that it was mostly in ruins after the transfer of the capital to Bārī. Muʿizz al-Dīn adopted the style of the coins of Ḳannawdj in some of his issues with Sanskrit legends, and these were probably struck at Ḳannawdj after the conquest. There are not many important events in its later history.

In 948 (1540) the emperor Humāyūn was defeated here by Shēr Khān, and in the eighteenth century it was included in the territories of the Bangash Nawwābs of Farrukhābād and afterwards in Awadh. During the mutiny of 1857 the Nawwāb of Farrukhābād was defeated by the British army here.

Ḳannawdj was made a mint by Shēr Shāh after his victory over Humāyūn, and on the Sūrī coins it appears and "Ḳannawdj urf Shērgaṛh". Shērgaṛh was changed to Shāhgaṛh in Akbar's reign. Under Muḥammad Shāh and his successors, Aḥmad Shāh, ʿĀlamgīr II, Shāh Djahān III, and Shāh ʿĀlam II, the name of the mint was Shāhābād Ḳannawdj.

From Kanawdj are derived the names of the Kanawdjia section of the Brāhman caste and the Kanaudjia dialect of Western Hindi. The only important modern industry is cloth-printing.

(M. LONGWORTH DAMES)

ḲANDĀBĪL, a city in the territory of the Budha (Budhiya, var. Nudha) which corresponds to the modern Kačhī or Kač Gandāva in Balōčistān. It is probably the modern town of Gandāwa, which is not now important. Ḳandābīl was taken by the Arab invaders in the time of al-Ḥadjdjādj probably before the invasion of Sind by Muḥammad b. al-Ḳāsim [q. v.] in 89 (707). The *Čač-nāma*, a legendary history of Sindh and its capture by the Muslims, mentions Ḳandābīl as having been taken by the legendary King Čač, who advanced through Armābēl (Las Bēla) and Tūrān (the hill-country of Ḳuṣdār) into a desert, and took the fort situated on the river Sini (which should doubtless be read Sibi, as a branch of the Nāri flowed through Sībī towards Gandāva). In the reign of Yazīd II (101—105 = 720—724) it was chosen by Yazīd b. al-Muhallab as a place of refuge for his family when he rebelled. Al-Iṣṭakhrī and Ibn Ḥawḳal mention it as the principal emporium of the Budha. In the time of the Caliph al-Manṣūr (136—158 = 754—775) it is stated by al-Balādhurī that Hishām b. ʿAmr al-Taghlibī attacked a body of Arab rebels at Ḳandābīl, and ʿImrān b. Mūsā in the reign of al-Muʿtaṣim (218—227 = 833—842) conquered Muḥammad b. Khalīl there and carried the inhabitants off to Ḳuṣdār. The name of Ḳandābīl or Ḳandāʾīl is not met with in more recent times.

Its identification with Gandāwa is doubted by Raverty on the ground that the *Masālik wa'l-Mamālik* (cf. Iṣṭakhrī, p. 179 3) states that it is but five farsangs distant from Ḳuṣdār, but this is not in accordance with its position as shown in al-Iṣṭakhrī's and Ibn Ḥawḳal's map (see *Journ. As. Soc. Beng.* 1892. Plate XI) which shows it to the west of the Mihrān and a long distance North of Ḳuṣdār. There is in reality no other place with which it can reasonably be identified. Cf. also J. Marquart, *Ērānšahr* (*Abh. K. Ges. Wiss. Göttingen*, Phil.-hist. Kl., new series III, Nº. 2, Berlin 1901), p. 187 sq., 190. Gandāwa remained an important centre as is shown by the Balōč ballads of the commencement of the xvith century, and it is probable that the *ḳ* of the Arab writers represented a vernacular g, as in Ḳandahār for Gandhāra and other cases. It is an ancient walled town standing on a mound, and was long the capital of the province of Kačhī, which from it obtained the name of Kačhh Gandāva. The disappearance of the name Ḳandābēl from history may be therefore accounted for by the decay of the Arab rule and the revival of indigenous government which naturally gave the chief town its original vernacular name.

ḲANDAHĀR. 1. The name given by the Arab historians to the Indian Kingdom of Gandhāra, situated in the valley of the Kābul river as far as its junction with the Indus. Its capital was Waihind or Ohind as noted by al-Bīrūnī (Sachau i. 206); and at an earlier period al-Mas'ūdī speaks of Kandahār as the country of the Rādjpūts (Rahbūt) and as situated on the river of Kābul which flows into the Indus (Sprenger p. 381). It was from this Ḳandahār that the name was carried to the settlement of the Gandhārians on the banks of the Arghandāb, which afterwards became famous as the modern Ḳandahār.

Bibliography: Sachau, *Alberūnī's India*, Trübner's Or. Series, London 1888; Bellew, *Races of Afghanistan*, Calcutta 1880.

(M. LONGWORTH DAMES)

ḲANDAHĀR. 2. A city in Afghānistān (which also gives its name to a province) situated 31° 27′ N. and 65° 43′ E. at an elevation of 3,462 ft. between the Tarnak and Arghandāb rivers. It is an important centre of trade and administration, with a population estimated at 31,000. The province, now the principal territory of the great Durrānī tribe of Afghāns, is identified with the Harahwati of the Achaemenians, the classical Arachosia, and the mediaeval Zamīn-dāwar and Zābul, and historians have generally assumed that the town was founded by Alexander and named Alexandria Arachosia, but this does not rest on good evidence, and it is very improbable that the name Ḳandahār can be derived from Alexandria. Its identity with the name Gandhāra, the ancient Indian Kingdom occupying the valley of the Lower Kābul River, on the other hand, appears to be well established. Kandahār was the form used by the Arab chroniclers for Gandhāra; the Ḳandahār of Mas'ūdī, for instance, has nothing to do with modern Ḳandahār. There seems some ground for accepting Bellew's theory that the name was brought to Arachosia by emigrants from Gandhāra. The most probable period for such an emigration is the fifth century, when the Ephthalites conquered Gandhāra, as related by the Chinese pilgrim Sung-yun, who visited Gandhāra about A. D. 520. Buddha's begging-bowl, still preserved in the Shrine of Sulṭān Wais outside Ḳandahār, was probably brought there by refugee Buddhist monks. It was not however till the 12th or 13th century that the new Kandahār began to be famous. It is not mentioned by the Arab historians in their record of the conquest of Arachosia (al-Rukhkhadj): the capital was then Bust which was taken by 'Abd al-Raḥmān, and the same place was a mint-town of the Ṣaffārids. It was not until after the destruction of Bust by 'Alā al-Dīn Djahān-sōz in 545 (1150) that Ḳandahār began to rise into importance. Shams al-Dīn II, the Kart ruler of Herāt, is stated by Khwāndamīr to have besieged Kandahār, and as his reign began in 676 (1278) it may be held that by that period Ḳandahār had become the capital, and henceforward it plays a prominent part in history. It was conquered by Tīmūr and formed part of the province bestowed on his grandson, Pīr Muḥammad. At the close of the 15th century it formed part of the Kingdom of Ḥusain Bāiḳarā of Herāt, and the name Ḳandahār first appears as a mint on his coins. Under Ḥusain, the Arghūn Chief, Dhu 'l-Nūn Beg, obtained the government of Zamīndāwar in addition to other provinces and made Ḳandahār his capital. After his death in the wars with Shaibānī the emperor Bābur drove his son Shāh Beg Arghūn out of Ḳandahār in 913 (1507), but Shāh Beg soon recovered the town with the aid of Shaibānī and held it for several years, but Bābur finally took it in 928 (1522) and it remained part of the territories of the Mughal Empire of India, although always regarded by the Ṣafawī Shāhs of Persia as properly belonging to Khorāsān. Kāmrān succeeded Bābur in the possession of Kābul and Ḳandahār, and held them even when his brother Humāyūn was expelled from India. A Persian attack on Ḳandahār in 941 (1535) failed. In the disputes between the brothers which followed Humāyūn's exile, Humāyūn besieged Ḳandahār with the aid of a Persian army and after its fall made it over to the Persians, but re-took it from them afterwards. In the early part of Akbar's reign Ṭahmāsp Shāh succeeded in taking Kandahār 965 (1556) and Akbar did not recover it till the latter part of his reign, 1003 (1594). Persians again took it from the Emperor Djahāngīr in 1031 (1621), but Shāh Djahān's army occupied it in 1047 (1637). The last transfer was in 1058 (1648) when Shāh 'Abbās II took it, and the Mughal Emperors were never again able to conquer this province.

Ḳandahār remained under the Ṣafawī Monarchy until the rising of the Ghalzai tribe to power under Mīr Wais (v. GHALZAI). The success of the Ghalzai rebellion in driving the Persians out of Ḳandahār emboldened them to invade Persia itself, and Maḥmūd became Shāh of Persia. Kandahār itself came into his brother's power, and the Ghalzais maintained their hold on it until Nādir Shāh took it after a year's siege in 1151 (1738). During the siege he built a new town outside the old city and named it Nādirābād. The Ghalzais were driven away from the neighbourhood, and the Abdālīs, who had been removed to the Herāt province, were allowed to return. They are still the most important element in the province. Aḥmad Shāh, one of their leaders who had held high command under Nādir Shāh, obtained possession of Ḳandahār without difficulty after the latter's death, and made it the capital of the Durrānī Kingdom which he founded (v. AḤMAD SHĀH, ABDĀLĪ, DURRĀNĪ, AFGHĀNISTĀN). He built a new town and gave it the name of Aḥmadshāhī with the epithet of *ashraf al-bilād*, "most illustrious of cities", which appears on all coins struck there during the Durrānī rule, but has been replaced under the Bārakzais by the old name Ḳandahār. The vicissitudes of Ḳandahār were not at an end: it passed rapidly from one pretender to another in the course of the wars between Zamān Shāh and his brothers, Maḥmūd and Shudjā'

'al-Mulk, and, after Dōst Muḥammad Bārakzai had obtained the principal power, the inevitable rivalry set in and Ḳandahār was held for long by his brothers Kohandil and Purdil. In 1839 it was occupied by a British Indian army in support of Shāh Shudjā' al-Mulk, and held till 1842 when the British left Afghānistān. After Dōst Muḥammad's death Ḳandahār again passed from one to another during the civil wars between his sons (*see* 'ABD AL-RAḤMĀN KHĀN). In the war of 1879—80 after the deposition of Yaʿḳūb Khān, Ḳandahār was for a time erected into a separate state under the Wālī Shēr 'Alī, but after Aiyūb Khān's invasion and his final defeat by Roberts at Ḳandahār the British Government decided to put the whole country under 'Abd al-Raḥmān as Amīr, and the separate state of Ḳandahār came to an end. Since then it has remained peacefully under him and his successors.

The changes in the political relations of Ḳandahār are reflected in its coinage. It first appears under Ḥusain Bāiḳarā of Herāt; then under Humāyūn. Then for a long season only a few copper coins of Persian origin are known. Rupees were struck by Djahāngīr and Shāh Djahān. These are followed by a long series of anonymous copper coins of Persian origin bearing figures of antelopes, peacocks, the hand of Fāṭima or the sword, Dhu 'l-fiḳār. Maḥmūd the Ghalzai struck rupees, and Nādir Shāh also, both in the names of Ḳandahār and Nādirābād. Then follows a full series of all the Durrānī Kings, followed by anonymous coins in the name of the "Ṣāḥib-i-Zamān", or "Amīr-i-Kullamīr". Last of all come the coins of the Bārakzai dynasty, and even the temporary Wālī, Shēr 'Alī, is represented.

The site of Ḳandahār has been several times altered. The town taken by Nādir Shāh appears to have been on hilly ground; it was no doubt the Ḥusainābād built under the Ghalzais and named after the Persian King Ḥusain Shāh, afterwards dethroned by Maḥmūd. Nādirābād seems to have been some distance away on the open plain, while Aḥmadshāhī, the modern Ḳandahār, was nearer to the old city, according to Elphinstone. Masson about 1830 describes the ruins of the old town dismantled by Nādir Shāh as on the slope of a hill about two miles distant from the walled town of his days. The tomb of Aḥmad Shāh is in Ḳandahār.

(M. LONGWORTH DAMES)

ḲANDAHĀR. 3. A fort in the Dekhan, 77° E. 19° E. which gives its name to a taʿalluḳa in the dominions of the Niẓām of Haidarābād. This place appears to be the mint-town of some rupees of Ḳandahār struck in the reign of the Mughal Emperor Muḥammad Shāh from 1157 to 1159 (1744-45). As the city of Ḳandahār in Afghānistān had been separated from the Mughal Empire since 1058 (1648) and was at this period in Nādir Shāh's possession, it is impossible that these rupees should have been struck there.

KANDŪRI. The Persian word *kandūra* or *kandūri* means a leather or linen tablecloth; in Hindūstānī this word means also a religious feast held in honour of a venerated person like Fāṭima. In this latter meaning the word has been imported, apparently from India into the Indonesian archipelago. In Acheen the word is unchanged. In Java it is slightly altered into *kenduri* or *kenduren*; it may be noted that nowadays the more usual term in Java is: *sedekah* or *sidekah*, from the Arabic *ṣadaḳa*, *slametan*, from the Arabic *salāmat*, or *ḥādjat*, a well known Arabic word, meaning need, want of a man's presence at a feast, and hence the festival itself. In general it is a feast given with a religious purpose, or at least in conformity with religious law, just like the *walīma* in the books of *fiḳh*. The occasions which give rise to it are numerous, for instance: days of commemoration, domestic events, especially circumcision, the completion of teaching the Ḳurʾān, certain periods, such as pregnancy, sowing and harvest, and sundry reasons like setting out on a journey, occupying a new house and other enterprises, the averting of epidemics and calamities, etc. According to the Law each *kandūri* should have a religious character; the poor must be invited, forbidden things should be avoided, but the strong local *'ādat* is always prone to look for means of effecting a compromise. Every complete *kandūri*, especially those in commemoration of deceased relatives and those given on the anniversary of a saint, is sanctified by means of recitation of the Ḳurʾān, *dhikr*'s or prayers; popular superstition, however, regards such *kandūri*'s as consisting of actual offerings of food to the deceased. Almost every *kandūri* is opened by a prayer, the commemorative ones by the *duʿāʾ kubur*. In Acheen some months are called *kandūri* with a second word indicating the food the sacred meal consists in.

(PH. S. V. RONKEL)

KANEM, a country in the Central Sūdān, east and north-east of Lake Tchad. Until recent years Kanem was only known from the accounts of Barth, who visited a part of it in 1851, and Nachtigal, who crossed it in 1871 on his way to Borku. But from 1900 onwards, the work of French scientific missions, as well as the explorations of officers and officials entrusted with the administration of the "territoire militaire du Tchad", have made it possible to rectify and complete the data furnished by these two travellers.

The name Kanem, taken in the widest acceptation, is applied, according to Nachtigal, to a region bounded on the north by the caravan route from Kawar to Lake Tchad, in the south by the Baḥr al-Ghazāl [q. v.], in the east by the depression of the Egueï, in the west by the Lake, and lies between 14°—16° N. Lat. and 12°—14° E. Long. (Greenwich). The surface may be estimated at 27,000 to 30,000 square miles. Kanem, in the stricter sense, only occupies about a quarter of this huge area, between Lake Tchad on the west, Baḥr al-Ghazāl on the south and the mountainous massiv of the Manga, which separates it from the Egueï, on the east.

The most characteristic topographical feature of Kanem is the existence of numerous sand dunes

running N. W. by S. E., separated from one another by hollows several hundred yards broad and sometimes four or five miles long. Dunes and depressions are specially marked in the northern part. The hollows, which are given the name of wâds, are dry except during the rainy season, when ponds are formed in the deepest parts; their bottoms consist of soil impregnated with natron. Below this, to a depth of 3 to 30 feet, lies a vast water-bearing stratum; wells therefore are dug into the beds of the wâds. The existence of this subterranean water supply has suggested that the present Kanem is simply an ancient lagoon formerly fed by the waters of the Bahr al-Ghazal and now dried up. The wâds themselves would be the beds of the ancient exits or *bahr* of the Tchad. The shore itself is in process of transformation. It is bordered by elongated islets lying S. S. E. by N. N. W. and separated from one another by narrow channels. The islets, which number 300, of which 80 are inhabited, lie from two to three miles from the shore. They are divided into two groups, the Kûri archipelago in the south and the Buddûma archipelago in the north. The gradual desiccation of the south-east part of Lake Tchad has added a certain number of islands to the mainland. Peninsulas and bays, which cut into the shore, have thus been formed and force sailors to make numerous detours.

The climate of Kanem is that of tropical regions. Two seasons are distinguished, the rainy season from July to September, and the dry season from February to June. The intermediate period, from October to January, corresponds to winter and is marked by a perceptible drop in the temperature; in the bottoms of the wâds the thermometer goes sometimes down to zero Centigrade (= 32° Fahrenheit). The rains themselves are unequally distributed and diminish from south to north. The very luxurious vegetation of the southern part becomes less and less rich as one ascends northwards. It flourishes on the slopes of the wâds, the bottoms of which remain barren. The date-palm grows wild in many of these wâds. It even forms a regular oasis at Mao, in the centre of Kanem, but disappears in the northern part, which is of prairie character. Cultivation is limited to the area around the villages, built on the slopes of the dunes close to the wooded zone. The commonest crop is the millet, to which may be added beans and cotton in the *bahr* of the Tchad. The rearing of horses, cattle, sheep and camels is also a very important source of income for the inhabitants. Fishing around the lake and hunting in the interior also contribute to the support of the inhabitants. The fauna is very rich and varied. The elephant is becoming scarce, but the rhinoceros, the hippopotamus, lion, buffalo and panther abound in Kanem proper and the ostrich, antelope, gazelle and giraffe on the northern steppes.

The number of inhabitants is difficult to estimate. It is certainly not above 80,000 to 100,000 or about two to the square mile. The population is settled, with a few nomads. The principal settlements are in the south Ngûri, in the S. E. Mondo, in the centre Mao, "a junction of roads, a centre of gravity and of confluence of races ... the first oasis in the date country, still rich in millet, suited both for the rearing of camels and cattle". (Largeau).

The population is far from being homogeneous. The diverse elements which compose it belong some to the negro group and some to the Arab group, more or less altered. To the first belong the Kanembû, the Buddûma, the Kûri; to the second the Ulâd-Slimân and the Shoa; the Tundjur and Tubu are classed between the two.

The Kanembû, descendants of the first settlers in Kanem, constitute the basis of the population, upon whom they have imposed their language. They are dark grey (*azrak*) in colour and tall in stature. Industrious and peace-loving, they are settled and devote themselves to agriculture. They profess Islâm and are fairly strict Muslims. In their midst live groups of individuals called Haddâd (in Kanembû *dogoa*) who, although differing from the Kanembû neither in language nor in physical type, are considered as belonging to an inferior race and are despised. These natives are distinguished from the others by their weapons and by their mode of life. They use bows and arrows, while the Kanembû use spears, and live chiefly by hunting. Very warlike in disposition, they have played an active part in the civil wars which desolated the country in the course of last century.

The Buddûma and the Kûri inhabit the islands of Lake Tchad, to which they retired when they abandoned the mainland. The Buddûma, who occupy the northern archipelago, live by fishing, cattle-raising and the cultivation of millet. Before the French occupation, they practised piracy to the detriment of their neighbours of Kanem and even at the expense of the natives of Barnû [q. v.]. They have, for the most part, remained fetish-worshippers, although they have adopted some Muslim customs. The Kûri, on the other hand, while leading the same sort of life as the Buddûma, are completely islâmised.

The Ulâd Slimân and the Shoa represent the Arab element in Kanem. The first, who came from Tripolitania and Fezzân [q. v.] in the middle of the nineteenth century, have preserved the Semitic type quite pure. They have light complexions, speak the Arab dialect of Tripolitania and dress like the Arabs of the north. Nomads and robbers, possessing, thanks to their rifles, an incontestable superiority over the negro tribes, their sole means of existence was the slave trade and brigandage. Since the French occupation, some sections of them have taken service with Europeans, while others have left the country and entered the service of the Sanûsiya.

Of Arab origin, like the Ulâd-Slimân, the Shoa have been long established in the Sûdân. But if they have retained the use of the Arab language, which they speak quite purely, their physical type has been markedly altered by mixture with the black population. The Islâm which they profess is fairly strict among the tribes of the north, where many of them are affiliated to the Tidjâniya brotherhood; among the tribes of the south, however, their faith has been contaminated by fetishist practices and the orthodox regard them as *Kirdi*, i. e. idolaters. The Shoa live almost entirely by cattle-rearing; nomads in the dry regions near the desert, they become settled in the moister southern regions. They are represented in Kanem by the Ulâd Serrar, the Banû Wail and the Dagana of the Bahr al-Ghazal.

The Tubu or Teda, who came originally from Tibesti, are fairly numerous in Kanem. But, as

a result of contact with negroes, they have lost some of their distinctive features, notably the slimness of the body and elasticity of gait. They are also much less fanatical than their kinsmen who have remained among the mountains. Lastly, while the Tubu, strictly so-called, are nomads and live almost entirely by brigandage, the Tubu of Kanem or Dazagada Kanuma are for the most part settled. They follow agricultural pursuits, for which they are not fitted, without great success. The principal bodies of them are the Gadoa, the Warabba, the Doguda and the Yorumma, related to the Kecherda of the Baḥr al-Ghazal. Their language is connected with the Kanuri spoken in Bornū.

The Tundjur are the descendants of Hilālī Arab tribes, who, after sojourning around Tunis, migrated to Dār Fūr at the end of the fifteenth century. There they passed to Wādāi and finally settled themselves in Kanem towards the middle of the seventeenth century. Much mixed with negroes since then, they form a group intermediary between the Arabs, the Kanembū and the Tubu. Arabic is their proper language, but they also speak Tubu and Kanembū. They are found especially in the region of Mondo and acknowledge the authority of a chief called *fugbu*.

History. According to the Arabic sources studied by Marquart, who modifies on this point the data of Barth (cf. BORNŪ), the kingdom of Kanem seems to have been founded by the Zoghāwa, whose territory extended in the ninth and tenth centuries A. D. from Dār Fūr to Lake Tchad and Kawar. Al-Bakrī mentions the inhabitants of Kanem as idolators and al-Idrīsī seems also to consider them as such. Some time after the tenth, but not later than the twelfth century, Kanem was occupied by the Tubu (Teda) who came from Borku and Tibesti, conquered the Zoghāwa and introduced Islām. This occupation seems to coincide with the accession to the throne of the Yazanīs, who claimed to be descendants from Saif b. Dhī Yazan [q. v.] and became the disseminators of Islām, which had been introduced by al-Hādī al-ʿOthmānī, the predecessor of the Yazanīs. The *Kitāb al-Istibṣār* (ed. von Kremer, Vienna 1852, p. 32, transl. Fagnan, p. 61) places the conversion to Islām of Kanem about 500 = 1106/7. According to a Hausa legend, Abū Zaid al-Fāzāzī (end of the xiith and beginning of the xiiith century) preached Islām in Kanem and Borku. Another tradition refers the introduction of Islām to the beginning of the twelfth century, in the reign of King Ūmé. In any case this religion was solidly established in Kanem in the thirteenth century. Some Muslims from Kanem founded a Mālikī school in Cairo between 640 and 650 (1242—1252). The soi-disant descendants of Saif remained in power as long as the kingdom existed. They preserved their complexion "fair like the Arabs" down to Selmaʿa, son of Bikoru, who was the first negro king of the country. This dynasty considerably extended the kingdom of Kanem, the boundaries of which were carried by Dunama I, Selmaʿa and Dunama II up to the frontiers of Egypt. The Sulṭāns of Kanem maintained friendly relations with the Ḥafṣids. A rapid decline followed this period of prosperity. The Bulala, a Kanembū tribe which at the beginning of the xivth century A. D. had withdrawn to the S. E. of Lake Tchad, attacked the Sulṭāns of Kanem and after a century of incessant fighting ended by conquering the country. Ndjimi, capital of Kanem, was taken by the invaders. Sulṭān ʿOmar b. Idrīs (796—800 = 1394—1398) had to retire to the country west of Lake Tchad, where one of his successors founded the kingdom of Bornū [q. v.]. In the sixteenth century the sovereigns of the new state in their turn took the offensive against the Bulala in order to re-conquer Kanem. This end was achieved by Idrīs Katakarmabi (1504—1526 A. D.). The conquered Bulala had to pay tribute and Kanem became a province of Bornū. The submission of the Bulala remained, however, somewhat precarious. During the xvith century the Sulṭāns of Bornū found themselves forced to resort to force in order to oblige their neighbours to respect the treaties that had been made. Thus we find Idrīs Alaoma (1571—1603) sending five expeditions against the Bulala, who were supported by the Tubu. The Sulṭān of Bornū was victorious over his adversaries but his authority and that of his successors were hardly recognised except by the people around the shores of the Lake; the interior of the country slipped from them. Very soon the weakening of Bornū enabled the Bulala to recover their independence. But towards the middle of the xviith century they were in their turn conquered by the Tundjur from Wādāi. They then left Kanem and went to settle in the west of Baḥr al-Ghazal, then in Fitri, where their descendants still are to-day. The Tundjur imposed their authority on the various peoples of Kanem but had to endure the attacks of the Bornuans who drove them into the region of Mondo and reduced them to the state of tributaries. The Bornuan troops, commanded by a Hausa slave named Dalatou, settled permanently in Kanem, where their descendants are known as Dalatna. Their chief (*alīfa*) settled at Mao and became the representative of the Sulṭān of Bornū, to whom he paid an annual tribute. This restoration of the Bornuan suzerainty was of short duration. From the beginning of the xixth century Kanem was attacked by new enemies, the Wādāians, who claimed the country as a former possession of the Bulala settled in Wādāi. The Sulṭāns ʿAbd al-Karīm Sabūn (1805—1819) and Muḥammad Sharīf occupied parts of the south almost without striking a blow. Bornū, invaded by the Fulbe, was unable to intervene, and Kanem occupied with the feuds of the Tundjur and Dalatna was in a state of complete anarchy. The Dalatna ended by triumphing over their rivals but recognised the suzerainty of Wādāi. Their chief, the *alīfa* of Mao, received the title of *agīd al-baḥr*, and became the representative of the Sulṭān of Wādāi, in the name of whom he gave investiture to the Kanembū and Ḥaddād chiefs. The natives who would not submit to the Wādāians took refuge in the islands of Lake Tchad. The arrival of the Ulād Slimān (1846) provoked new disorders. Driven out of Fezzān by the Turks these nomads reached the country north of Lake Tchad and began to plunder it. Severely defeated by the Tuaregs in 1850 they moved on to Bornū. The Sulṭān then took into his service the remains of the tribe and entrusted the Ulād Slimān with the defence of the frontier against the Wādāians. The Ulād Slimān took advantage of this to reconstitute themselves and to plunder friends and enemies without distinction.

At the period of Nachtigal's visit to Kanem

1871) they were the real masters of the country. The Tundjur of Mondo tried to resist them but being decisively beaten in 1883, they were reduced to slavery. The Ḥaddād of Ngumo alone succeeded in keeping in check these nomads, who dreaded their poisoned arrows.

The situation was none the less much disturbed. The Kanembū and the Ḥaddād were fighting between themselves while the Wādaians made frequent inroads. Finally, after the death of Shaikh ʿAbd al-Djalīl, the various factions of the Ulād Slimān began to fight with one another.

The French occupation put an end to this anarchy. Kanem was included in the zone of French influence, as determined by the Anglo-French agreement of March 21, 1899. After being visited by the Joalland and Foureau-Lamy missions (1900) it was effectively occupied between 1901 and 1905. Accepted without opposition by the Kanembū, European domination met with an obstacle in the hostility of the Sanūsīya, who in 1900 established a zāwiya at Bīr Alali, in the north of Kanem. Muḥammad al-Barrānī, the deputy for the grand master of the brotherhood, at the head of bands of Arabs from Tripolitania, Tuaregs and Ulād Slimān, endeavoured to arrest the advance of the French. The evacuation of the zāwiya in 1902 determined a number of the Ulād Slimān to abandon the struggle. The malcontents, who had been joined by Tubu brigands, continued hostilities down to January 1905, when their chief, Shaikh Aḥmad, finally made his submission.

KIANGHRI (also written KANGRI, with the subsidiary form Čangrī), capital of the liwā (administrative district) of the same name in the wilāyet (province) of Ḳasṭamūnī, on the Adjī Ṣu, a tributary of the Ḳizil Irmak (Halys), the ancient Gangra, famous even in ancient times as a stronghold, was sometimes used by the Byzantines as a place of banishment and later in the wars with the Arabs and the Dānishmand-Oghlu again became important on account of its almost impregnable citadel. On their campaigns against the Byzantines the Umaiyads repeatedly penetrated as far as Khandjara (variant Djandjara), e. g. in the year 93 = 711/12 (al-Ṭabarī, ed. de Goeje, ii. 1236 = Ibn al-Athīr, ed. Tornberg, iv. 457; al-Yaʿḳūbī, ii. 350, who calls the town Ḥiṣn al-Ḥadīd), in the year 109 = 727/28 (al-Yaʿḳūbī, ii. 395) and in the year 114 = 731/32 (Bar-Hebraeus, *Kṯābā de Maḵtbānūṯ Zabnē*, ed. Bruns and Kirsch, ii. 125; cf. al-Ṭabarī, ii. 1561, and Theophanes under the year 6224). When as a result of the defeat at Manzikert in 1071 the eastern frontier provinces were abandoned by the Byzantines, the Saldjūḳs and the Dānishmand-Oghlu shared the spoil: the former established themselves in Ḳonya, while the latter spread through the northern half of Asia Minor from Amasia to Ḳasṭamūnī; among the conquests of the first Dānishmand-Oghlu in 468 (1075/6) we find Kianghrī mentioned; cf. *Taʾrīkh Āl Dānishmand* in Amāsiali Ḥusain Ḥusām al-Dīn, *Amāsia Tārīkhi*, Stambul 1322, ii. 286 *sqq.*; Hezārfenn, *Tanḳīḥ al-Tawārīkh* in the *Z. D. M. G.*, xxx. 470. In the year 1101 an army of Crusaders left Constantinople for the land of the Dānishmand-Oghlu, in order to liberate Boemund of Antioch, who had been captured by them at Malāṭya and imprisoned in Niksār, conquered Angora and reached Kianghrī (= praesidium Gangara), but the attack on the fortress failed and soon afterwards the army was completely wiped out by the allied Saldjūḳs and Dānishmand-Oghlu at Amāsia (Albertus Aquensis, liber viii. caput 8, Ibn al-Athīr, ed. Tornberg, x. 203; cf. *Z. D. M. G.*, xxx. 476; Chalandon, *Les Comnène*, i. 224 *sqq.*). The emperor John Comnenus captured Kianghrī in 1134 with the help of his heavy siege artillery, after having stormed it in vain a year before (*Chronicle* of Niketas, i. ch. 6 and especially also Joannes Prodromos; see Chalandon, *op. cit.*, ii. 84 *sqq.*); but very soon after the departure of the emperor the fortress was retaken by the Dānishmand-Oghlu and never again passed into the hands of the Byzantines. In the period following we find Kianghrī in possession of the Saldjūḳs of Ḳonya (see Chalandon, *op. cit.*, passim). After the decline of the Saldjūḳ empire Kianghrī belonged to the territory of the Isfandiyār-Oghlu of Ḳasṭamūnī, was taken from them in 795 = 1392/3 (so Neshrī) or 797 = 1394/5 (so ʿAshīḳpashazāde and the anonymous Ottoman chronicles) by Bayazīd I with the greater part of their lands, but restored to them by Tīmūr in 804 (1401) and finally in 822 (1419) definitely annexed by Meḥemmed I (ʿAshīḳpashazāde, *Tārīkh*, p. 88 *sq.*; Leunclavius, *Historiae Musulmanae Turcorum*, Frankfurt 1591, col. 475; the statements of von Hammer, *Gesch. des Osman. Reiches*, i. 70, 248 and ii. 176 are due to a misunderstanding). In the period of peace that now followed under Ottoman rule, Kianghrī falls completely into the background; it is scarcely mentioned by the historians; we have, however, full descriptions of the town from Ewliyā, *Siyāḥetnāme*, iii. 250 *sq.*, and Ḥādjdjī Khalīfa, *Djihānnumā*, p. 645. Among European

travellers we find it first mentioned in 1553—55 by Dernschwam in his *Tagebuch einer Reise nach Konstantinopel und Kleinasien*, ed. Babinger, Munich 1923, p. 196; nearly 300 years later Ainsworth was the first European to describe it from his own observations and in our own time it has been occasionally visited and described by German explorers in Asia Minor. The castle, in its day stormed by Arabs, Dānishmand-Oghlu, Byzantines and Crusaders, lies in ruins; the tomb still survives of Ḳarategin, who captured the town for the first Dānishmand prince and is now revered as a saint. The system of cisterns, which dates from pre-historic times, on the castle hill, which Ewliyā and Ḥādjdjī Khalīfa fully described, has not yet been closely examined, nor has the "Medjid Tash" (Tash Masdjid), i. e. the monastery of the Mewlewī dervishes, with its inscriptions, which, as Ainsworth was told, are said to date from the Arab Caliphs. Of the 27 large and small mosques some are said to date from the Byzantine period (see Cuinet); the principal mosque was built by Sulaimān I in 966 (1558/9).

The extensive deposits of rock-salt at Maghāra, two hours south-east of Kʿanghrī (Cuinet, iv. 427 and Märcker) are famous; their product was known even to the Byzantines under the name Γαγγρενὸν ἅλας (Nikolaos Myrepsos, end of the xiiith century, in Du Cange, *Glossar. ad scriptores med. et inf. Graec.*, s. v.). The severe earthquakes, which have repeatedly shaken the town in modern times, are mentioned in the mediaeval ages also; al-Ḳazwīnī, *Āthār al-Bilād*, ed. Wüstenfeld, p. 368, gives a full account of one of these catastrophes, which destroyed the town in Aug., 1050.

The number of inhabitants may be approximately estimated at 30,000 in 5,000 houses; among them were about 150 Greek and 50 Armenian families, who may now have left it as a result of the Great War.

(J. H. Mordtmann)

KĀNĪ, Abū Bakr, a notable Ottoman poet and prose stylist of the old school. Born in 1124 (1712) in Toḳād in Asia Minor, while still a young man he attained a great reputation in his native town as a stylist and poet. He belonged to the Mewlewī order and was allotted to the Shaikh of the Mewlewī monastery in Toḳād to serve him. An important landmark in his career was the passing of Ḥakīm Oghlu ʿAlī Pasha through Toḳād in 1165 (1754/5); he had been summoned from Trebizond to Constantinople to fill the office of Grand Vizier for the third time. Kānī presented him with a ḳasīda of welcome and a chronogram which made such an impression on the aged statesman that with the permission of the Shaikh of his order he at once took him to Constantinople and procured him a position in the imperial Dīwān. The way to the highest offices of state was thus opened to Kānī; but ambition was foreign to his nature. The careless and somewhat unrestrained life that he had been leading in his native town — he was only a lukewarm Muslim and only at the end of his long life returned again to the devout life of the order — seemed to him more desirable; so he took advantage of the fall of his patron, which took place after only two months of office, to give up his position in Constantinople. Henceforth his activities lay mainly in the provinces; — in Silistria, in Wallachia and in Bucharest. He acted for a considerable time as Dīwān secretary to the voivod Alexander; there is a picture of them together in the Museum of Sinaya. Finally Yegen Meḥmed Pasha, who had previously been a close friend of his, summoned him to Constantinople, when he became Grand Vizier (1196 = 1782). But this brought nothing but misfortune to Kānī. Kānī showed himself indifferent to all ceremony and conducted himself towards the Grand Vizier with as little politeness as in the old days when there was no difference of rank between them. He also chattered about matters that should have been kept secret. Yegen Pasha enraged at this had him condemned to death and it was only with difficulty that the punishment was reduced to banishment to Lemnos. All his property was confiscated, so that he had to struggle with poverty. He died in Rabīʿ II, 1206 (Jan.-Feb., 1792) and was buried in Aiyūb. Surūrī and Sünbül-Zāde Wehbī composed chronograms on his death.

Kānī is one of the most remarkable figures in Ottoman literature of the post-classical romantic period during which Persian influence died down and was replaced by a more national spirit. As a poet Kānī was not specially distinguished; he even lacks one of the principal features of most Ottoman poets: smoothness and polish of language. In his poems there are many inequalities and harsh passages: this is closely connected with his manner of working and his habit of extemporising verses on any stimulus or on any occasion. Kānī himself, it should be added, never collected and arranged his poems nor put the finishing touch to his *Dīwān*. Only at the instigation of the Reʾīs ʾl-Kuttāb Meḥmed Rāshid Efendi were the poems which could still be found in existence collected by Nūrī and the *Dīwān* published. A portion of the poems have been lost. He wrote poems in Arabic and Persian in addition to Turkish.

His poetical works consist of numerous hymns, *mesnewī's* and *takhmīs*, *ḳasīda's*, chronograms and some hundreds of ghazals. What distinguishes his poems from those of other poets is his fondness for wit and humour, his humorous phraseology, while otherwise humour is entirely lacking in the old Ottoman poets.

A much higher estimate must be placed on Kānī as a prose-writer in his *Münsheʾāt* and we have the very high opinion expressed by Abu ʾl-Ḍiyā Tawfīḳ that, as regards his style, a nation produces not more than five or six of his rank. In his letters Kānī gives rein to his humorous mood and produces the most peculiar and unexpected flowers of speech. He might be compared with Rabelais. Many witty sayings and anecdotes of him are recorded. His happy disposition and his humour made him thoroughly

popular and gave his hearers and readers that attraction to him, his letters (of which about 120 exist) and his poems, which is only partly intelligible to our taste and ideas. His works are especially important for the phraseology, as he often uses popular expressions not found in the literary language and says most unusual and unexpected things.

(TH. MENZEL)

KANĪSA (plural *kanā'is*), synagogue, church, the arabicised form of the Aramaic *kenishtā* "meeting (place), school, synagogue" (cf. J. Levy, *Neuhebr. und Chald. Wörterbuch*, ii. 359 *sq.*). The Syrian form *kenūshtā* in the Peshittā on the New Testament is a rendering of συναγωγή and sometimes also of ἐκκλησία (cf. Payne Smith, *Thesaurus Syr.*, i. col. 1773), whereas the form *knīshtā* in Christian Western Aramaic represents συναγωγή as well as ἐκκλησία (cf. Schulthess, *Lex. Syropal.*, Berlin 1903, p. 95). The latter term is nearly always rendered by *'idtā* in the Peshittā. The *Lisān al-'Arab*, viii. 83, 4 *sq.* is nearly right in so far as it derives *kanīsa* from *kunishtā*; al-Khafādjī (*Shifā' al-Ghalīl*, Cairo 1282, p. 195), however, rejects this view and expresses the opinion that the word denotes an especially Christian institution and goes back to *kalīsa*, an abbreviated form of *kalīsiyā* (ἐκκλησία). Al-Bustānī also considers the word as being the arabicised ἐκκλησία (*Muḥīṭ al-Muḥīṭ*, Beyrouth 1286, p. 1847ª).

In Arabic *kanīsa* denotes the Jewish as well as the Christian place of worship; this appears also from the various statements of the lexica: some refer to churches, others to synagogues exclusively (cf. al-Djawharī, *Ṣaḥāḥ*, Būlāḳ 1282, i. 473 *ult.*; al-Zamakhsharī, *Asās al-Balāgha*, Cairo 1299, ii. 212, 20; *Lisān al-'Arab*, *loc. cit.*; Yāḳūt, *Mu'djam*, ed. Wüstenfeld, iv. 314, 3). According to al-Fīrūzābādī, *al-Ḳāmūs*, Būlāḳ 1272, i. 549 *r.*, *kanīsa* denotes the place of worship (*muta'abbad*) of the Jews, the Christians or the Kāfir's; cf. also *Tādj al-'Arūs*, iv. 235 *infra*.

In early literature *kanīsa* is often found in the meaning of "church". Two documents on papyrus of the year 88 (707) mention the church of a monastery called (*Munyat*) *Kanīsat Mārya* in Egypt (*Papyri Schott-Reinhardt*, i., ed. C. H. Becker, Heidelberg 1906, p. 111, 8, line 4, p. 112, 1, line 4). In a satyrical verse Djarīr speaks of the churches of Taghlib (al-Mubarrad, *al-Kāmil*, ed. Wright, p. 485, 3). The treaties which 'Umar or his generals are said to have concluded with the inhabitants of several towns usually contain stipulations concerning the *kanā'is* (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 173; al-Ya'ḳūbī, *Ta'rīkh*, ed. Houtsma, ii. 167, 18; al-Ṭabarī, i. 2405, 2 *sq.*, 2588, 7; Eutychius, ed. Cheikho, ii. 17, 7; Ibn 'Asākir, *al-Ta'rīkh al-kabīr*, Damascus 1329 *sqq.*, i. 178; cf. also Abū Yūsuf, *Kit. al-Kharādj*, Būlāḳ 1302, p. 80). In the Ḥadīth it is related how Umm Ḥabība and Umm Salama told the Prophet of a church in Abyssinia adorned with images (al-Bukhārī, *Ṣalāt*, bāb 48, 54; *Djanā'iz*, bāb 70; *Manāḳib al-Anṣār*, bāb 37).

Kanīsa further occurs with a following noun in the genitive, e.g. Kanīsat Ḥanas (in Alexandria, Yāḳūt, *op. cit.*, i. 257, 31), K. al-Ghurāb (on Cape St. Vincent in South Portugal, Yāḳūt, *op. cit.*, i. 377, 19; al-Idrīsī, *Nuzhat al-Mushtāḳ*, partly ed. by Dozy and de Goeje, text, p. 180; transl., p. 218), K. al-Kaff (in Egypt, with an impression of Jesus' hand, Yāḳūt, ii. 22, 2 *sq.*), K. Yoḥannā and K. Maryam (in Damascus, Yāḳūt, ii. 591, 10, 596, 23); K. al-Ḳumāma (Church of the dust heap, an intentional corruption of K. al-Ḳiyāma, Church of the Resurrection, in Jerusalem, al-Mas'ūdī, *Murūdj al-Dhahab*, Paris 1861—77, i. 111; iii. 405; cf. also G. Le Strange, *Palestine under the Moslems*, London 1890, p. 141 *sq.*, 202 *sqq.*), K. al-Bāghūta (al-Bā'ūtha); in al-Ḥīra, al-Hamdānī, *Ṣifat Djazīrat al-'Arab*, ed. D. H. Müller, p. 127, 2), etc.

Al-Maḳrīzī denotes synagogues as well as churches by the word *kanīsa* (*al-Khiṭaṭ*, Būlāḳ 1270, ii. 464 *sqq.*, 510 *sqq.*).

In Spain and in the Maghrib the Form *Kanīsiya* (perhaps influenced by *iglesia*) was in use; it is still current in Morocco and Tunisia (vgl. Dozy, *Supplément*, ii. 493.

In the modern language *kanīsa* denotes a church, *kanīs* a synagogue (al-Bustānī, *loc. cit.*). For the Egyptian dialect cf. S. Spiro Bey, *Arabic-English Dictionary*, 2nd ed., Cairo 1923, s. v.).

Al-Kanīsa or al-Kanīsa al-Sawdā' was a town with a stronghold in the frontier province of Northern Syria, which Hārūn al-Rashīd restored from its ruins (Yāḳūt, iv. 314; cf. i. 927, 20; al-Iṣṭakhrī, *B G A*, i. 63, 7; 68, 5); vgl. Le Strange, *op. cit.*, p. 477 *sq.*). — Al-Muḳaddasī, *B G A*, iii.², 453, 9) mentions a place K. al-Madjūs at a day's journey from Arradjān. — A harbour in Yemen on the Red Sea in the neighbourhood of Zabīd also bore the name of al-Kanīsa (al-Fīrūzābādī, *loc. cit.*; *Tādj al-'Arūs*, *loc. cit.*). — According to *Tādj al-'Arūs*, *loc. cit.*, Kunaisiya occurs in several names of places in Egypt.

On the rules for churches laid down by the Muslims cf. the art. NAṢĀRĀ.

Bibliography: In addition to the literature mentioned in the art. cf. S. Fränkel, *Die aramäischen Fremdwörter im Arabischen*, Leiden 1886, p. 275.

(C. VAN ARENDONK)

KANO (in Hausa KANU), a town in the Central Sūdān 300 miles west of Kūka and 290 E. S. E. of Sokoto, 1200 feet above sea-level, situated in 12° 27' N. Lat. and 8° 20' E. Long. (Greenw.). Kano lies in the middle of a marshy plain dominated by the isolated rocky hills of Goron Duchi and Dala. The town is surrounded by a fortified wall (*birni*) 20 to 25 feet high and measuring, according to Barth, nearly 20 miles in circumference. A portion of the area thus mapped out is occupied by tilled fields especially in the West and North-west. The houses are grouped in the South between Dala and the wall. The town divided into two by a marshy pond called Djakara (Robinson: Jakhara) is formed of mud

houses. Only the houses of great personages or of Arab traders or rich Hausa merchants are provided with an upper story. The number of inhabitants, estimated by Barth at 30,000, would, according to Monteil, amount to 50,000 or 60,000, according to Robinson, to 100,000, according to the reports of the English officials in Nigeria, to 200,000. This population comprises very diverse elements, Hausa, Fulah, Kanūri and Arab; of whom 2/3 (Robinson) or 4/5 (Monteil) are slaves. In addition to the fixed population there is a very large floating one, reaching, according to Monteil, the figure of two million individuals a year.

This accession is explained by the economic rôle of Kano, the commercial metropolis of the whole of the Sūdān and at the same time a much frequented stage on the pilgrim route to Mekka. Representatives of all the negro races from the mouth of the Niger and Senegambia to Bornū and Wadaï meet there with Tuaregs and Arabs from Ghadāmes and Tripolitania. Every day a market is held there attended by over 30,000 people. Business is done through the intermediary of brokers, and owing to the scarcity of currency settlements are made most often with cowries; some transactions are carried through by simple barter. The principal articles of commerce are clothes and garments of local manufacture, leather, salt brought from Bilma, natron and above all the *kola* nut from the Western Sūdān, which is perhaps the most important element in the commerce of Kano. To these we must add sugar from Egypt, gunpowder, paper, iron-mongery, cotton goods of European origin, ostrich feathers and ivory to a small extent and finally slaves. The articles sent to or brought from Ghadāmes or Tripolitania are carried by Arabs settled in Kano to the number of 400 or 500. But the Sūdānese trade, which makes up 4/5 of the total transactions, is entirely in the hands of Hausa merchants.

Kano is not only a great centre of commerce; it is also a centre of native industries. Weaving and dyeing flourish there. The manufacture of cotton goods is so active that the town has been given the name of the "Manchester of the Sudān." Robes (*tobe*) dyed black are much esteemed and exported to all the neighbouring lands. Metal work occupies numerous smiths, who make hunting spears and stirrups as well as ornaments in copper and silver. The leather dyed yellow and red called morocco is very much esteemed and exported as far as Morocco and the markets of Tunisia and Tripolitania. The same is the case with the leather sacks indispensable for caravans.

The province of Kano is very fertile. As early as the xvith century we find Leo Africanus remarking the abundance of cattle, the richness of the soil, the extent of the fields of rice, cereals and cotton. The observations of modern travellers coincide with those of this early writer. The province of Kano, says Barth, includes 27 walled towns with 300,000 inhabitants and an equal number of slaves. "All the ground", says Monteil, "is cultivated for a distance of 60 miles round the town." Robinson notes the large number of separate farm places surrounded by plantations of tobacco, indigo, cotton and dura (*sorghum vulgare*).

A tradition noted by Robinson attributes the foundation of Kano to a group of refugees from Daura, a place three days' journey to the North, led by a certain Kano, son of Bano. The latter, it is said, built a new town at the foot of the rocks of Goron Duchi and Dala, on the top of which two villages had long been planted. According to Barth, Kano was the son of Biram and brother of Daura. He would thus be one of the seven "legitimate Hausas" (see HAUSA, ii. 291b). Another tradition to the effect that Kano had been appointed by his father *Sarikin baba*, i. e. chief of the dyers, attests the antiquity of this industry in the town. The date of the foundation is uncertain but it seems that by then Kano was already of some importance. In the second half of the xvth century A. D. education was held in honour in the town. Scholars had settled there on returning from the pilgrimage and were teaching theology and Māliki law. The celebrated 'Abd al-Ḳādir al-Marghīlī taught there. At the beginning of the following century, Leo mentions Kano as a town filled with rich merchants and artisans. These facts seem to invalidate Barth's statement that at this date Kano could only have been a citadel built on the rock of Dala. The king of Kano had subjected to his authority the kings of Zegzeg and Katsena, but he was in his turn conquered by the Sulṭān of Timbuktu, Muḥammad Askia, and was reduced to the state of a tributary. Later the kings of Kano had to endure incessant fighting against the Sulṭāns of Bornū, who even annexed Kano to their empire. The Bornūan governor, however, was driven out by king Korafa and Kano regained its independence. The invasion of the Fulah at the beginning of the nineteenth century increased the commercial importance of Kano, as the merchants of Katsena sought refuge there after the capture of the latter town by 'Othmān Dan Fodio in 1814. Kano was, however, not long in falling in its turn. On the dismemberment of the Fulah empire, the town was included in the kingdom of Sokoto. The country was administered by a governor (*serki*), who paid the Sulṭān of Sokoto an annual tribute (100 horses, 15,000 robes and other garments, 10,000 turbans etc. in the time of Barth). The Anglo-French agreements of Aug. 5, 1890 and June 14, 1898 having placed Sokoto within the zone of British influence, British representatives attempted to settle in Kano. These first attempts were unfortunate. Rev. C. H. Robinson (1893) and Wallis, a British official of Nigeria, were able to visit the town where the French traveller Monteil had already spent three months (1891—1892) in his journey from St. Louis to Lake Tchad, but Bishop Tugwell's mission was badly received and he had to withdraw. The effective occupation of Kano only took place in 1903 after a military expedition led by Sir Frederick Lugard.

(G. YVER)

KANSU, a frontier province in the north-west of China proper; it is bounded on the south and east by the provinces of Sze-čuan, Shensi and Shansi, in the west and north by the territory of Kukunor, Chinese Turkestan (formerly included in Kansu, but since 1884 the separate province of Sin-Kiang) and Mongolia. With its present area of 5910 geogr. sq. m. = 125,483 sq. miles, Kansu is the third largest province of China but as regards density of population it is lower than all the other provinces of China with the exception of Kuangsi. The province first formed under the Emperor Ḳūbilāi in 1282 A. D. is said to have received its name from two towns in the extreme north-west, Kančou-fu and Sučou; both towns are already mentioned in the *Ḥudūd al-ʿĀlam* and in Gardīzī (cf. W. Barthold, *Otčet o poězdkě v Srednyuyu Aziyu*, p. 92), the former in the form Khāmču (in the Mongol period Ḳamču or Ḳamčī), the second as Sakhčū (later Shukčū or Sūkčī).

Down till the xiiith century A. D. this territory was for the most part under the rule of foreign peoples of Turkish (Uigur) or Tibetan (Tangut) origin; immediately before the Mongol conquest there was a Tangut kingdom here under the rule of the Hia (or Si-hia) dynasty (1032—1227) with its capital in Ning-hia. Rashīd al-Dīn (ed. Blochet, p. 484 *sqq.*) in giving a list of the twelve provinces (*shinā*, chin, *shin*) reckons two with capitals Kinčānfū (now Sian-fu, capital of Shensi) and Ḳamčū (Kančou) respectively to Tangut (Tangkūt). In reality Kančou was at this time the capital of Kansu; Kansu and Shensi then as now combined in one governorship, the only difference being that the residence of the governor was in the capital of Shensi and not, as now, in the capital of Kansu. The boundary between Kansu and Shensi was formed by the Hoang-ho, so that the present capital of Kansu, Lančou-fu, then belonged to Shensi. In connection with Kinčānfū Marco-Polo (ed. Yule and Cordier, ii. 24) mentions prince Mangalai (d. 1280; called Mingḳālā by Rashīd al-Dīn), Ḳūbilāi's third son, as ruler of Tangut, while Rashīd al-Dīn (p. 495 *sq.*) gives his son Ananda; Rashīd al-Dīn says that Ananda was the founder of the dominance of Islām in this region. He was born about 1270 (in the early years of the viith [xivth] century, he was 30 years of age, ibid., p. 603, *c*) and was brought up by Muhammadan foster-parents (ibid., p. 599 *sq.*); but it was only after the conversion of Sulṭān Ghāzān in Persia (i. e. about 1295; cf. GHĀZĀN, ii. 1149 *sq.*) that he openly professed Islām (Rashīd al-Dīn, p. 602). The greater part of his army, said to have numbered 150,000 men, was converted to Islām (ibid., p. 600); the people of Tangut, except the peasants, likewise adopted Islām (ibid., p. 599). Taken to task by his cousin, Ḳūbilāi's successor Tīmūr (1294—1307), for his conversion, Ananda remained faithful to Islām and after a period of interruption was restored to his dominion. In 1307 a party wished to raise him to the throne; he was therefore killed after the success of another claimant, Tīmūr's nephew Khaishān (1307—1311) (d'Ohsson, *Histoire des Mongols*, ii. 525 *sqq.*). Not till 1323 was Ananda's son Ürüktīmūr again appointed prince of Tangut (Blochet, in Rashīd al-Dīn, p. 362, note *c*).

As Marco Polo (ed. Yule and Cordier i., 203 and 219) shows, there were already Muslims in Kansu before Ananda's day; on the other hand he says nothing about the dissemination of Islām south of the Hoang-ho (cf. the erroneous statement in the article CHINA, i. 851, following *Mission d'Ollone*, p. 435, that Marco Polo mentions "the presence of Muslims in the province of Yunnan only"). The Turkī speaking Salar (cf. CHINA, i. 850), who live at the present day on the south bank of the Hoang-ho, are mentioned as living there as early as the Ming dynasty (1368—1644) and described as unruly subjects (W. W. Rockhill, *The Land of the Lamas*, London 1891, p. 40), although no Muhammadan risings are mentioned for this period. The story which reached Tīmūr's lands about 1398 to the effect that the founder of the Ming dynasty had had about 100,000 Muslims slaughtered and had completely rooted Islām out of his kingdom (Niẓām al-Dīn Shāmī and ʿAbd al-Razzāḳ al-Samarḳandī in Barthold, *Ulugbek*, Petrograd 1918, p. 42 *sq.*, note 6) finds no confirmation in any Chinese source. Under Manchu rule (from 1644) risings of the Muslims of Kansu are mentioned by 1646 and 1648 and have been several times repeated in the xviiith and xixth centuries.

In Kansu those who profess Islām are at the present day certainly more numerous than in the other provinces (the figures are very variously estimated; cf. the article CHINA, i. 847). The most important centre of Muslim life and culture was until quite recently Ħočou (south-west of the capital Lančou-fu), "the Chinese Mekka". Hočou was at an earlier date considered a purely Muslim city (about 30,000 inhabitants); in the year 1884 the traveller G. Potanin (*Tangutsko-Tibetskaya Okraina Kitaya*, St. Petersburg 1893, i. 169) was told that there were no longer any Muslims at all there; later the Muslims were only allowed to live in a separate suburb there (*Mission d'Ollone*, p. 233). The Muhammadan area in Kansu is divided into two separate tracts, Hočou-Sining in the south-west and Ninghia-Kintsip'u in the north-east; in the intervening area the Chinese have built hill-forts (ibid., p. 253). Kintsip'u, sometimes called "the Chinese Medina", was first founded by the religious reformer and leader of a rebellion, Ma Hua-lung (cf. CHINA, i. 849).

In the xviiith century there still seem to have been more Muslims in Shensi than in Kansu (Dabry de Thiersant, *Le Mahométisme en Chine*, i. 41 and 156); their language and dress were also different from those of the Chinese (ibid., p. 155). This suggests that the modern Dungans or Tungans (cf. CHINA, i. 850) did not adopt the Chinese language until a later date.

The rebellions were usually local movements, not general risings under the banner of Islām. During the great rebellion in Kansu, which began in 1872, there was perfect quiet in Shensi (Dabry,

op. cit., i. 159). The rebellion which had begun in 1861 or 1862 in Shensi was only spread to Kansu by the expulsion of the rebels from Shensi. The fighting was carried on with even greater bitterness in Kansu than in Shensi and had the most disastrous effects on the Muslim population as well as on the economic prosperity of the province generally. Just as at an earlier period the number of Muslims in Shensi had been considerably reduced by the expulsion of the rebels into Kansu, so now (since 1872) a considerable part of the Muslim population of Kansu has migrated westwards under the leadership of the valiant Boyan-akhūn. The birthplace of Boyan-akhun (also written in Chinese Bo-yan-hu or Pai Yen-hu; his Muslim name was Muḥammad Ayyūb) is variously given; he had lived for a long time in Pekin and only moved to Kansu shortly before the rising. In December, 1877, Boyan-akhūn with the remainder of his army crossed the Russian frontier into Semirečye; the Chinese authorities demanded (of course without success) that he should be handed over to them. After his death in 1883, he was celebrated in songs as a national hero by the Dungans settled in Semirečye; whether his memory is still revered in Kansu also, does not seem to have been ascertained. The last rising (1895/1896) was started by the Salar and is said to have been provoked by the proclamation of their Chinese governor ordering that in future one Chinese should be regarded as equal in value to ten Muslims. There seems to have been no activity in Kansu against the present Republican government.

ḲANṢŪH, AL-MALIK AL-ASHRAF SAIF AL-DĪN *min Baibardī* (i. e. Baibardī's Mamlūk) AL-GHŪRĪ (originally pronounced in Eastern Persian with ō and later there and in Egypt with ū, of the "al-Ghūr" division of Mamlūks from Afghānistān, which was specially instructed in the Ḳor'ān and theological subjects. He served for a long time as a *Silāḥdār* (lifeguard) and *Djamdār* and only when he was about 40, he became governor of the province of al-Baḥriya [see BAḤRIYA], and in 893 (1490) *Ḥādjib* [q. v.] *al-Ḥudjdjāb* (president of the military court) in Aleppo, where he gave proof of his great energy in the suppression of a rising. In 903 (1497) he became *Muḳaddam al-ulūf* (commander of a thousand Mamlūks) and two years later *Ra's nawbat al-Nuwwāb* (commander of the Mamlūk officers) under Sulṭān Djānbalāṭ [q. v.]. The latter's rival and successor Ṭūmānbāi I during his brief reign in 906 (1500) appointed him Grand Dawādār [see DAWĀTDĀR] and, as often happened in the last period of the Mamlūk dynasty, at the same time Grand Ustadār (Grand Chamberlain), vizier and *Kāshif al-Kushshāf* (chief inspector of domains). The choice of the Mamlūks therefore, as a result of his high position, naturally fell upon him, when after a few months they were discontented with Ṭūmānbāi; after considerable hesitation he accepted, as he was now over sixty. By inflicting heavy taxes and levies and issuing a depreciated currency he ruthlessly raised the money to pay the old Mamlūks and to buy new ones in order to create a following. In his financial measures he did not even respect the privileges of the pious foundations and by depreciating the currency injured commerce and trade, and extorted money from merchants, women, eunuchs and from his own court-officials down to the very door-keeper. All this is made a very grave reproach against him by his contemporaries; it was even cast up against him in the Friday sermon. The chroniclers number him among the "bad Sulṭāns". He hurried on the financial ruin of his country by over-heavy taxes on the sales of goods and by oppressive customs duties, even although he made good use of a great part of the money by strengthening fortresses (notably Aleppo), making roads and wells in the Ḥidjāz and in providing water by good aqueducts (e. g. the aqueduct in Cairo). One great source of revenue in these days was the harbour and customs dues on Indian goods, which then had to be brought to Europe via Egypt ('Aden, Djidda, Suez, Alexandria) or Syria (Hormūz, Baṣra, Aleppo). To avoid these oppressive dues, the Portuguese staked everything on finding the sea route to India, which Vasco de Gama finally succeeded in doing. The Portuguese then gradually established themselves on the coasts of India and brought their great quantities of goods directly to Europe by the Cape of Good Hope. In this way the excessively high costs of passing through Egyptian ports as well as the cost of overland transit were avoided and the profits went to the Portuguese. These losses in revenue could not be tolerated by the Sulṭān al-Ghūrī; besides, he felt it his duty as first ruler in Islām, as plenipotentiary of the Caliph and as a servant of the holy places of Mekka and Medina to come to the help of the oppressed Muslims in India. The first encounter with the Portuguese took place in 909 (1503) when the latter robbed an Egyptian ship coming from India of its cargo and sent it to the bottom. Sulṭān al-Ghūrī tried at first to get redress by peaceful means by sending the Grand Prior of the Sinai monastery to the Pope with a letter of complaint, threatening to destroy the holy places in Jerusalem if King Manuel of Portugal did not cease from oppressing Muslims in India and from conducting hostilities against his merchant-ships. The mission failed in its object as King Manuel knew quite well that the Sulṭān's interest in the great profits derived from Christian pilgrimages would prevent him from going to extremes. Sulṭān al-Ghūrī had

therefore to make up his mind to equip a considerable fleet, especially as 17 Arab ships were destroyed in 910 (1504) in the Indian harbour of Panane. The Sulṭān was interrupted even in the building of his fleet by the fact that the Knights of St. John in Rhodes captured a consignment of wood intended for Egypt. To secure a base for his naval war against the Portuguese, the Sulṭān dispatched several expeditions to keep the coast of Arabia under his control; his able general Ḥusain fortified Djidda with walls and towers and made the harbour a base for the fleet. The first encounter in the Indian harbour of Shaul between Ḥusain and Lorenzo, son of the Portuguese viceroy, in 914 (1508) ended in favour of the Egyptians, who were supported by the fleet of the Muslim governor of Diu. Lorenzo perished and the Admiral's ship was burned. But the very next year the Admiral avenged his son's death, destroyed a part of the Egyptian fleet (the Indian ships kept aloof) and forced Ḥusain to a hurried retreat into the Red Sea. Hostilities between the Portuguese and Egyptians continued in the following years, a strong Portuguese fleet even attacked ʿAden but without any lasting success. A new fleet was then sent to India by the Sulṭān. But when it reached Djidda, the political situation in Egypt had changed. In 922 (1517) the Ottoman Sulṭān Selīm I seized Cairo and thereby became protector of the Holy Cities as well as master of the western coast of Arabia. Sulṭān Selīm, who cared little about expansion towards India, as his interests lay in the direction of Asia Minor and the Balkan lands, at the request of the Mekkans, recalled Ḥusain, in spite of his successes, along with his subordinates, who held other parts of Arabia, and had him executed on account of his numerous acts of cruelty to the people of Arabia. The Egyptian fleet had to return. The Portuguese on their side were content with the successes they had won, as they had succeeded in diverting commerce from the route through the Red Sea. After the appearance of the Portuguese in the East and the alteration of the trade-route the most important source of revenue for Egypt gradually dried up so that Sulṭān al-Ghūrī, for want of an intelligent system of taxation, had to fall back on extortion and the oppression of his subjects as he could do nothing else in view of the disorganisation of the finances. Thus it was not possible for him to pay his Mamlūks well so that his rule now lacked a firm support. His foreign policy also was unsuccessful. From fear of the powerful Selīm, he made an alliance with the latter's most bitter enemy Ismāʿīl [q. v.], the ruler of Persia. In 922 (spring of 1516) Sulṭān Selīm entered Asia Minor, ostensibly to fight against Shāh Ismāʿīl. Sulṭān al-Ghūrī went to Aleppo under the pretext of acting as intermediary between the two rulers. To show his peaceful intentions he had brought with him the Caliph and the chief ḳāḍīs but had in secret promised Ismāʿīl his support. Selīm learned of this through spies and was not deceived by the friendly reception accorded his envoys by Sulṭān al-Ghūrī. To make war inevitable, he maltreated al-Ghūrī's envoy, had his attendants killed and sent him back ignominiously on a mule, with a declaration of war. Sulṭān al-Ghūrī's cause was hopeless from the first as he was not sure of his generals. He could neither protect his subjects from the extortions and acts of cruelty of his governors nor could he rely on their fidelity. Although several times warned, he entrusted the command of the left wing to the governor of Aleppo, Khāʾirbek; but at the first charge the latter left the battle with his troops and soon after the beginning of the battle the aged Sulṭān fell from his horse, struck with apoplexy. According to his biographer, his body was never found; others say that a Mamlūk cut off the head from the body and took it to Sulṭān Selīm. On the rapid occupation of Syria and Egypt and the last desperate battle of the Mamlūks see the articles SELĪM and ṬŪMĀNBĀY II. Although Sulṭān al-Ghūrī had tackled his task with energy, he could neither make friends nor bring order into the chaos of the finances. His attention was always directed only to immediate profit and to making ends meet somehow, while he was not sure of his Mamlūks and Amīrs. He had no sense of justice nor a proper appreciation of relative strengths. Besides there was his aversion to the new arms, artillery and rifles, due to a certain disdain of using long range weapons, which it did not require personal bravery to carry. The rapid victory of the Turks and the superiority of the Portuguese was certainly to some extent due to the objection of Sulṭān al-Ghūrī and his knights to proper training with fire-arms, as is specially mentioned by Ibn Iyās.

[In the Ḳurʾān in the Sulṭānīya Library, Cairo, written for him, his name is spelt Ḳānṣawh Ghawrī, see E. Denison Ross in *Bulletin of the School of Oriental Studies*, ii. 334 (London 1922). Red.]

Bibliography: Weil, *Geschichte der Chalifen*, v. 384—416; v. Hammer, *Gesch. des Osmanischen Reiches*, Pest 1827 *sqq.*, ii. 462 *sqq.* (in both, the principal Oriental manuscript sources as well as the contemporary chronicles and consular reports of the west are given). Ibn Iyās deals with the reign of Sulṭān al-Ghūrī in the *Badāʾiʿ al-Zuhūr* [see IBN IYĀS]; but only the end is printed in the Cairo edition, the years 906—922 are contained in the Paris manuscript, Bibl. Nat., de Slane, *Cat.*, N°. 1824 (years 906—913) and in the St. Petersburg manuscript, Rosen, *Les manuscrits arabes de l'Inst. des Langues orient.*, N°. 46 (the years 913—922). The full biography by Ibn al-Ḥanbalī has not previously been utilised; see Ibn al-Ḥanbalī's *Durr al-Ḥabab fī Taʾrīkh Aʿyān Ḥalab*, MS. Vienna, Flügel, *Die arab. ...... Handschr. der Hofbibl.*, ii. On his building operations or detailed particulars will be given in the coming work on inscriptions in Aleppo in the sections "citadels and city-wall"; on his buildings in Damascus see M. Sobernheim, *Die Inschriften der Zitadelle von Damaskus*, N°. 24—26 in *Der Islam*, xii. (1921); on commerce in his time see B. Moritz, *Ein Firman des Sultans Selim* in the *Festschr. Ed. Sachau .... gewidmet*, Berlin 1915, p. 425—27. On his wars with Portugal see S. Ruge, *Gesch. des Zeitalters der Entdeckungen* (Samml. Oncken, ii. 9) and H. Schäfer, *Gesch. Portugals*, iii., Hamburg 1850, p. 200 *sqq.*; R. S. Whiteway, *Rise of Portuguese Power in India*, London 1899. For his coins see *Or. Coins*, of in the *Cat. Brit. Mus.* iv. 214—216. (M. SOBERNHEIM)

ḲANṬARA, plur. *ḳanāṭir*, means in Arabic (1) bridge, particularly a bridge of masonry or stone; also (2) aqueduct (especially in the plural), dam, and finally (3) high building, castle (similarly *ḳasṭal* = aqueduct from *ḳasṭal* = castellum; see ḲAṢR); cf. *Tādj al-ʿArūs*, iii. 509; Dozy, *Supplément*, ii. 412; de Goeje, *B.G.A.*, iv. 334; and particularly R. Geyer in the *S.B. Ak. Wien*, 1905, vol. cxlix. Nº. 6, p. 114—119. The original meaning of the word, "arch", is found in the earliest Arabic lexicographers; cf. Dozy—de Goeje, *Description de l'Afrique et de l'Espagne par Edrîsî*, p. 369. *Djisr*, a bridge of wood or boats, is the opposite of *ḳanṭara*, which is of stone; in time, however, the two words came to be used as synonyms (see Dozy, *op. cit.*, i. 194).

No satisfactory explanation has yet been given of the origin of the word. The oldest reference is found in a verse of Ṭarafa (iv. 22; see *The Diwans of the Six Ancient Arabic Poets*, ed. Ahlwardt, 1870, p. 55). On account of this early occurrence of the word, Yāḳūt (*Muʿdjam*, ed. Wüstenfeld, iv. 187) considers the word to be genuine Arabic. But we may with considerable certainty regard it as a loan-word. Vollers and Geyer thought it borrowed from Latin or Greek. The former connected (*Z.D.M.G.*, li. 370; *Z.A.*, viii. 100 *sq.*) *ḳanṭara* with the mediaeval Latin word *cintrum* (French *cintre*, arch, vault), while Geyer (*op. cit.*, p. 118—119) sought the original either in κανθήλιος = basket, *cantherius* = wickerwork used in the making of roofs and buildings, or in κάμπτρα, κάμπτρον = depository (cf. also καμπτός = vaulting), from which Vollers, *Z.D.M.G.*, li. 302, derived Egypto-Arab. *ḳanṭar*. But all these explanations had best be rejected, because there are phonetic objections to them and they partly rely for the meanings of the words cited on obsolete, far-fetched glosses; cf., on the other hand, Fränkel in the *Z.A.*, xix. 270 *sq.*, and Nöldeke, *op. cit.*, p. 408. Ḳanṭara is most probably to be derived from the Aramaic and, as Nöldeke, *op. cit.*, thinks, in the first place from *ḳeṭīrā* = band, arch (see Payne-Smith, *Thesaur. Syriac.*, col. 3591; note specially *ḳeṭīrā* in Bar Bahlūl, *Lexic.*, col. 1768). The above mentioned word *djisr* also comes from the Aramaic (Fränkel, *Die aram. Fremdwörter im Arab.*, Leiden 1886, p. 285 and D. H. Müller in the *W.Z.K.M.*, i. 31), but can actually be traced back to the Assyrian or Accadian; cf. Meissner in the *Z.A.*, ix. 269, and Zimmern, *Akkadische Fremdwörter*, Leipzig 1915, p. 31.

Al-Ḳanṭara has survived in Spanish in the diminutives *alcantarilla* = little bridge, gutter and *alcantarillado* = arched aqueduct; see Dozy—Engelmann, *Glossaire des mots espagnols et portugais dérivés de l'arabe*[2], Leiden 1869, p. 47; *Diccionario de la Lengua Castellana por la Real Academia Española* [13], Madrid 1899, s. v.

Al-Ḳanṭara and al-Ḳanāṭir are frequently found — sometimes with descriptive additions e. g. Ḳanāṭir Firʿawn — as names for places like quarters of a city (notably in Baghdād) in areas where Arabic was, or is, spoken in the mediaeval or modern East. In his geographical dictionary (*Muʿdjam*, ed. Wüstenfeld, iv. 180, 185—192, vi. 179—180) Yāḳūt gives a dozen places named al-Ḳanṭara and four called Ḳanāṭir; cf. also, for example, the indices to al-Ṭabarī, ed. de Goeje, p. 759—760, and Ibn al-Athīr, *al-Kāmil*, ed. Tornberg, xiii. 790. For the numerous districts of Baghdād named after particular bridges under the Caliphate see the index to Guy le Strange, *Baghdad during the Abbasid Caliphate*, London 1900, p. 368.

Of the places named al-Ḳanṭara, the following are worthy of special mention:

1. An oasis on the southern slopes of the Atlas in Algeria at the exit of a narrow pass through which run the road and railway from Constantine to the desert regions; it is a station on the Constantine-Biskra line, 35 miles north of the latter. This, the most northern oasis in Africa, consists of three villages with about 3,500 inhabitants and possesses a very dense date grove. From its situation it was an important military station and, as Roman inscriptions found there show, settled in ancient times. It is presumably identical with the station *Ad Calcem Herculis* of the Roman itineraries; see Dessau in Pauly-Wissowa, *Realencyklop. der klassischen Altert.-Wissensch.*, iii. 1345. The name al-Ḳanṭara is derived from the Roman bridge, restored in 1862 by the French, which spans in one huge arch the ravine, the 150 feet wide Fumm al-Ṣaḥrāʾ = the mouth of the Ṣaḥrāʾ (so-called by the natives), through which flows the Wād al-Ḳanṭara; cf., for example, Vivien de St. Martin, *Diction. de Géographie Universelle*, Paris 1879, i. 66 and Kobelt, *Reiseerinnerungen aus Algerien und Tunis*, 1885, p. 332.

2. Alcántara, a little town of great antiquity in the province of Caceres (district of Estremadura) in Spain, near the Portuguese frontier, with 3,200 inhabitants. It receives its name from an imposing granite bridge, built in 105 A. D., which crosses the Tagus in six great arches to the northwest of the town. The place is also famous for the order of knighthood founded there in 1176 to defend the frontier against the Moors, which became called the Alcantara Order after its headquarters were moved to this town in 1213; see Baedeker's *Spain and Portugal*[4], Leipzig 1913, p. 459.

3. A small town with a mosque in Egypt, on the Asiatic side of the Suez canal, half-way between Port Saʿīd and Ismāʿīliya, a station on the railway connecting these two towns. It lies on a low narrow tongue of rising ground, which runs out between the large Menzaleh lake in the north and the little Balāḥ lake in the south. But it hardly takes its name from this "land bridge", but from a bridge which already existed here probably in the early Middle Ages.

The Arab geographer Ibn Faḍl Allāh al-ʿUmarī, who wrote about 741 (1340), mentions the arch of a bridge, called Ḳanṭarat al-Djisr, near the old caravan station of al-ʿAḳūla, under which the superfluous water flowed into the desert at the time of the Nile's inundation. There was still a bridge here at the beginning of the nineteenth century, built over a canal connecting the two lakes already mentioned. The modern al-Ḳanṭara has only arisen on its present site since the making of the Suez Canal. The old settlement was a short half-hour's journey to the east and is marked by the mound of ruins Tell Abū Sēfe (on the maps also called Tell al-Aḥmar). This place may be regarded as the key to Egypt, for it has always been used by conquerors as the gateway to the Nile valley. Its strategical importance led to its being occupied in remote antiquity. Tell Abū Sēfe (with ruins of a temple of Rameses II and remains of the Ptolemaic and Roman period)

marks the site of the ancient Egyptian town of Zaru (*Ṯ'r w*), the capital of the fourteenth district of Lower Egypt, which was already a fortress in the time of the Middle Kingdom. In the later classical and Byzantine literature it appears as Sile, Sele (Selle); according to a Latin inscription found here, it had a Roman garrison in 288 and was later also the see of a bishop. In the Middle Ages it was called al-ʿAḳūla (on the name al-ʿAḳūla = "the bend" see above s.v. DAIR AL-ʿAḲŪL), a name which was temporarily supplanted by that of the castle of al-Ḳuṣair during the Mamlūk period. In the World War (1914—1918) al-Ḳanṭara played an important part in the struggle for the Suez Canal. From November, 1914, to March, 1916, there were frequent encounters there between English and Turkish troops; cf. thereon, for example, Baer, *Der Völkerkrieg. Eine Chronik der Ereignisse seit dem 1. Juli 1914*, Stuttgart 1914 *sq.*, iv. 220—24, viii. 367, xi. 318, xvii. 47 *sq.*, 128, 130, 132.

In remote antiquity as well as in the late Middle Ages and modern times, al-Ḳanṭara was the point of departure for the caravan road from Egypt to Syria. Since the World War the new railway line to Syria has branched off here from the Port Saʿīd-Suez line, and runs from al-Ḳanṭara via Ḳaṭya, al-ʿArīsh and Ghazza to Ludd, where it links up with the line from Yāfā to Jerusalem.

Hartmann in the *Z.D.M.G.*, lxiv. 688, 691, 696; lxx. 486 *sq.*, 511 and in *Petermann's Geogr. Mitteil.*, 1916, lxii. 373—377; Alt in the *Palästinajahrbuch des deutsch. evangel. Instituts*, x., Berlin 1914, p. 60—63 and Dalman, *loc. cit.*, xx., 1924, p. 44—46. On excavations and finds in the region of al-Ḳanṭara see Clédat in the *Recueil de travaux relatifs à l'archéol. égyptienne et assyrienne*, Paris 1915, xxxvii. 38 *sq.* and 1919, xxxviii. 1 *sq.*, 70 *sq.*

4. A sanctuary among the ruins of the ancient Petra on the Sinai Peninsula; cf. Savignac, *Le Sanctuaire d'el Kantara* in the *Rev. Biblique*, New series, 1906, iii. 391 *sq.*

5. Ḳanṭarat Zainab in the valley of the Nahr Bairūt in Syria, an ancient Roman aqueduct of which considerable remains exist at the present day; according to Arab legend, it was built by Queen Zenobia (Zainab); cf. Fr. Müller, *Studien über Zenobia and Palmyra*, Diss. Königsberg 1902, p. 14 *sq.*

6. Ḳanāṭir Firʿawn („Pharaoh's aqueduct"), a great aqueduct in the south of Syria, which, beginning at Dilli, at the western foot of the lava plateau of Ledjā (west of Ḥawrān), runs in a south-western direction for some sixty miles as far as Muḳīs (Gadara), providing many villages with the necessary drinking-water in the summer months. It is identified by Wetzstein — probably rightly — with the Ḳanāṭir mentioned by Ḥamza al-Iṣfahānī (*Annales*, ed. Gottwaldt, p. 117). But the Ghassānid Djabala b. al-Ḥārith, who reigned about 500 A.D., can hardly, as Ḥamza says, be the builder of this marvellous piece of work; see Nöldeke, *Die ghassan. Fürsten*.... in the *Abh. Pr. Akad.*, 1887, iv. 50; it certainly dates back to ancient times. For further information see Wetzstein, *Reisebericht über Hauran und die Trachonen*, Berlin 1860, p. 123—125.

The diminutive Ḳunaiṭira (popularly Ḳnāṭra or Ḳonēṭri) is occasionally used as a place name, e.g. a village in the district of Djawlān (Eastern Jordan); see Baedeker's *Palestine and Syria*[5], 1912, p. 268. (M. STRECK)

ḲĀNŪN, the name of a month, which is found as early as in inscriptions from Palmyra (see S. A. Cook, *A Glossary of the Aramaic Inscriptions*, s.v.) and corresponds to Marḥeshwān. It later appears among the Syriac names of the months (see Payne Smith, *Thesaurus Syr.*, s.v.) as *K. ḳedēm* or *ḳadmāyā* and *K. ḥrāy* or *ḥrāyā*. Here the two *K.* are the ninth and tenth months respectively. Al-Bīrūnī, *Kitāb al-Āthār al-bāḳiya*, ed. Sachau, p. 60, transcribes the Syriac forms exactly as *K. ḳadīm* and *K. ḥrāy*. In Arabic terminology they are called *K. al-awwal* and *K. al-ākhir*. In the Ḥadīth the former appears in a remarkable connection. In Muslim, *Ashriba*, Trad. 99, a reason is added for the regulation, often mentioned elsewhere, that vessels should be kept covered: "for there is a night in the year in which the *wabāʾ* passes no uncovered vessel". In another version of the same tradition it is added: "foreigners (*aʿādjim*) among us used to fear this in *Kānūn al-awwal*". (A. J. WENSINCK)

ḲĀNŪN, a musical instrument, consisting of a flat thin quadrilateral box strung with wire chords, which is laid on the knees and played with a key of metal fixed on the forefinger, like the zither (Lane, *Modern Egyptians*, ii. 70, 72; Salvador Daniel, *Musique Arabe*, p. 37).

ḲĀNŪN (from the Greek κανών), canon, custom, law. The development of the Muslim empire, its vast conquests which brought it into contact with peoples of very different characters, who for the most part had laws already codified, the rise of commerce and industries and the institution of regular troops forced the governors to establish alongside of the *sharīʿa* or religious law a series of special enactments by the application of the principle of *ʿurf*, *lex principis*. It is these edicts that are called *ḳānūn* (plur. *ḳawānīn*). The Berbers give this name to their own statutes, their customary law; see Hanoteau et Letourneux, *La Kabylie et les coutumes Kabyles*, Paris 1873, ii. and iii.; Morand, *Les Kanouns du Mzab* in the *Études de droit musulman algérien*, Algiers 1910; Masqueray, *Formation des cités chez les populations arabes sédentaires*, Paris 1886, p. 74 *sqq.*; *Archives berbères*, i. and ii.; *Le droit Kabyle*, 2[nd] ed., Paris 1917; Henri Basset, *Essai sur la littérature des Berbères*, Algiers 1920, chapter v.: *La littérature juridique des Kanouns*. (CL. HUART)

ḲĀNŪN-I ESĀSĪ, "fundamental law", the name given to the constitution of the Ottoman empire dated Dhu 'l-Ḥidjdja 7, 1293 (Dec. 24, 1876), promulgated by a *khaṭṭ-i sherīf* of the same date addressed to the Grand Vizier Midḥat Pasha. It maintains the order of succession of the family of ʿOthmān and explicitly gives the Sulṭān the title of *Khalīfa* (art. 3), protector of the Muslim religion (art. 4). It confirms his sacred and non-responsible character (art. 5). It enumerates the rights of Ottoman subjects (art. 8—26), the duties and responsibilities of the ministers (art. 27—38) and other officials (art. 39—41); establishes a parliament (*medjlis-i ʿumūmī*), consisting of two chambers, the Senate (*Heyʾet-i aʿyān*) and the

Chamber of Deputies (*Hey'et-i mebʿūthān*); the first is to consist of members nominated directly by the Sulṭān and its numbers must not exceed a third of the second (art. 60), which is elected by the people on a ratio of one deputy for every 50,000 Turkish subjects (art. 65). It establishes the permanency of the magistracy (art. 81). No tax can be levied if it is not passed by a law, *ḳānūn* (art. 80). The administration of the provinces is based on the principles of decentralisation (*tewsīʿ-i meʾdhūniyet*) and the separation of powers (*tefrīḳ-i wezāʾif*); it is based on elected municipal councils (art. 108—112). In case of trouble, the state has the right to proclaim an autocratic government, *idāre-i ʿurfiye*; it is the state of siege which is meant by this name (art. 113); banishment on the Sulṭān's decision is provided for those who stir up trouble. The principle of compulsory elementary education is laid down (art. 114). In spite of the formal terms in art. 115, according to which not a single article of the constitution could be suppressed or not put into operation for any reason or under any pretext, the fundamental law of the empire, although continuing to figure at the head of the *Sālnāme* (official annuals), was actually suspended after the fall of Midḥat Pasha and only re-established by the military revolution which marked the close of the reign of ʿAbd al-Ḥamīd II.

The same name was given to the Persian constitution proclaimed by a *firmān* (royal proclamation) dated Djum. II 14, 1324 (Aug. 5, 1906) and promulgated on Dhu 'l-Ḳaʿda 14, 1324 (Dec. 30, 1906) in the reign of Muẓaffar al-Dīn Shāh. It deals only with the formation and activities of the national assembly; it was granted in reply to the demand of the refugees in the English legation. A supplementary constitution, promulgated by Muḥammad ʿAlī, successor to Muẓaffar al-Dīn, on Shaʿbān 29, 1325 (Oct. 7, 1907), laid the foundation for constitutional law in Persia. It laid down more especially that Shīʿī Islām is the official religion of the State, that Ṭihrān is the capital, that the national flag is green, white and red (in three horizontal stripes) with the emblem of the Lion and Sun. It provided for the equality of citizens of Persia before the law, the protection of life and property; arrests could not take place without a written order from the President of the Tribunal of Justice. It recognises the freedom of the press, except for heretical publications or those harmful to religion, as well as the right of association and assembly. Legislative power is divided between two chambers. The ministers must be Muslims, they are responsible to the two chambers; lastly it provides for the establishment of provincial and departmental councils (*andjuman*).

(Cl. Huart)

ḲĀNŪN-NĀMA, the name given to the fundamental law of the Ottoman Empire promulgated by Sulṭān Muḥammad II on the advice of his Grand Vizier, Muḥammad of Caramania. It is divided into three sections called *bāb* (chapter), which treat respectively of the great dignitaries of the Empire, of customs and ceremonies and lastly of the fines for crimes and revenues set aside for special appropriations.

Sulṭān Sulaimān completed these ordinances by issuing several *Ḳānūn-nāme*'s. The one reorganised the administration of the military fiefs (*zeʿāmet, timār*) established by Murād I; the second codified the administration of the farms in Egypt; the third laid down the rights and duties of the *reʿāyā*, "subjects" Muslim and non-Muslim in respect of feudatories; the fourth dealt solely with the police regulations and the penal laws.

ḲAPLĀN GIRĀY, the name of two Khāns of the Crimea in the eighteenth century.

1. Ḳaplān Girāy I reigned three times: 1119—1120 (1707—1708), 1125—1128 (1713—1716) and 1143—1149 (1730—36). He died on the island of Chios in Shaʿbān, 1151 (Nov.-Dec., 1738). Immediately after the death of his father Salīm I, in Shaʿbān, 1116 (Nov.-Dec., 1704), he set up as a claimant to the throne but was not proclaimed Khān till after the death of his brother Ghāzī III. His own three depositions were on each occasion the result of the unfortunate course of military operations; the first (according to Smirnow, 9 months before the battle of Poltawa, i. e. Oct., 1708) after an unsuccessful campaign against the (then not yet completely islamised) Circassians, the second as a result of his arriving too late on the scene of operations on the Danube, the third (when he was now enfeebled by old age and illness) after his campaign to Persia, by which without even reaching the frontiers of Persia he exposed his own country to the invasion of the Russians. He was generally regarded as a skilful politician but an unfortunate general.

2. Ḳaplān Girāy II, grandson of Ḳaplān Girāy I and son of Khān Salīm II, only reigned for a short period: 1183—1184 (1770). He fought unsuccessfully against the Russians in the Dobrudja, was falsely accused of having had dealings with the enemy and deposed on Shaʿbān 4, 1184 (Nov. 23, 1770). He died in Rabīʿ II, 1185 (July-Aug., 1771) of the plague at the age of 32.

(W. Barthold)

ḲAPLAN MUṢṬAFĀ Pasha, a native of Merzifon, an Ottoman general and statesman of the time of Sulṭān Meḥmed IV (1648–87), one of the ablest and most successful collaborators of the Grand Vizier Köprülü Aḥmad Fāḍil (Fāżil) Pasha and therefore closely involved in Turkey's struggle under the Köprülü's to regain her old position of power.

He was brought up in the court service, was Silāḥdār of the Sulṭān and in 1650 was appointed Wezīr and Wālī of Baghdād. He spent a number of years as Wālī of important provinces, in Wān, Ḳonya and Damascus, until the Hungarian campaign gave him an opportunity to distinguish

himself, notably before Neuhäusel in 1663, at Kanischa and elsewhere. The Grand Vizier gave him his sister in marriage in order to ally him closely to him. Aḥmad Fāḍil Pasha cleverly managed to transfer the most important affairs to his brothers-in-law. In 1660 Ḳaplan was appointed Grand Admiral (*Ḳapudan-i Deryā*) ("a tiger on land and a crocodile at sea", as Rāshid describes him à propos of his appointment in allusion to his name) (Ḳaplan = panther). He filled this important post for six years, commanded the Ottoman fleet with vigour and caution during the heavy fighting of the time and cooperated with special distinction in the conquest of Crete. He then took part in the campaign against Poland and conquered Lemberg along with the Khān of the Crimea. He then became Wālī of Aleppo in 1672, of Diyārbakr in 1675, of Baghdād for a second time in 1676 and in 1677 of Diyārbakr again. After the death of the Grand Vizier Aḥmad Fāḍil Pasha his frank nature still enabled him to maintain his position against the new Grand Vizier Ḳara Muṣṭafā, who was not inclined in his favour. Even the severe defeat which he suffered in 1678 in the Ukraine in the swamps between the fortress of Tschechrin and Romodanowski, where he lost the whole of his army and equipment, brought him only temporary dismissal and disgrace. Soon afterwards he became Grand Admiral for a second time. He died in November, 1680, in Smyrna, which he happened to have entered with the fleet, and was buried there. In Baghdād he had restored the mosque and *türbe* of Shaikh Muḥammad Ḳudūrī.

(TH. MENZEL)

ḲAPU, gate, the Ottoman Porte, properly the palace of the Sulṭān or of the Grand Vizier. The name (by synecdoche, cf. "court") may be of Central Asian origin; it recalls names like the Japanese mi kado, for example, literally "exalted gate", etc. (cf. J. Six in *Acta Orientalia*, ii. 205 *sq.*). Among the Ottomans *Ḳapu* has been long in use in the above sense and used alternately with the Arabic *bāb* or the Persian *der*. The name may have passed from Turkish into Arabic about the Mamlūk period, as, for example, the passage i. 469, 2 from below, in Ibn Khaldūn, *Histoire des Berbères*, transl. de Slane, Algiers 1847, where *kāb* = palace, shows. — *Ḳapu Ḳulī* "gate-slaves" (the meaning of this expression is explained and a list of the troops concerned given in Aḥmad Djewdet, *Ta'rīkh*, xii., Stambul 1301, p. 224, 1 from below; cf., on the other hand, J. von Hammer-Purgstall, *Gesch. des Osm. Reiches*, iv. 566). — The name "lofty gate" for the office of the Grand Vizier (*Pasha Ḳapusu*, *Bāb-i 'ālī*, "Sublime Porte, Fulgida Porta") probably did not come into use before 1654, when the Grand Vizier Derwish Meḥmed Pasha was given a building near the Serai for an office by Sulṭān Meḥmed IV.

(FRANZ BABINGER)

ḲAPUČI, gate keeper, porter (*Ar. bawwāb*, Pers. *darbān*), formerly the lowest grade and outermost guard of the Imperial Serai chosen from the Yaničars, who guarded its gates, 50 at each gate. By day they carried a rod of bamboo, by night they were armed with sword and dagger. They were used as messengers to carry to the grandees of the Empire and foreign princes invitations to court festivities or documents of state. Some performed the duties of eunuchs. They wore white helmet-like caps (*ṭarḳūf*, *zuffia*). Their number and pay varied. While they numbered 300 at the beginning of the sixteenth century (cf. T. Spandugino, *Commentari dell' origine de' principi Turchi* (Florence 1551, p. 130; in Schefer's edition, Paris 1896, p. 116 *sqq.*) and each Ḳapuči received up to 7 aspers a day, their pay had risen to 20—50 aspers daily about 1511 (cf. the Bailo Andrea Foscolo report of March 6, 1511, quoting Marino Sanuto, in J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 627; cf. ii. 234 as well as Spandugino, ed. Schefer, p. lix.); under Sulṭān Murād III in 982 (1574) their number was 356 (cf. *Z.D.M.G.*, 1861, xv. 283) and under Sulṭān Meḥmed IV (1648—1687), according to Ḥusein Hezārfenn's (*d.* 1103 = 1691) *Ḳānūnnāme* (written in 1080 = 1669; cf. F. Pétis de la Croix, *État général de l'Empire Othoman, par un militaire turc*, Paris 1695, and J. von Hammer, *Staatsverfassung des Osman. Reiches*, ii. 44 *sq.*), they had risen to 1962, who received 5,785,004 aspers a year. The *Ḳapuǰiler* were divided into 45 companies, each of which was under its own company-commander (*bölük bashî*), who held a fief in place of salary. The commander of the gatekeepers was the *Ḳapuǰiler Bashî*, a kind of chamberlain. According to the evidences of Menavino, Navagero and Spandugino, the number of *ḳapuǰiler bashî*'s in the first half of the xvi[th] century was only four. Above them was the *ḳapuǰiler kyayasî*, head-chamberlain.

(FRANZ BABINGER)

ḲAPUDAN PASHA, formerly the title of the supreme commander of all the Ottoman fleets, who had also unlimited control of the imperial arsenal. The origin of this rank dates back to the beginnings of Ottoman sea power under Sulṭān Meḥmed II. The first naval captain (*Ḳapudan-i Deryā*; the word *Ḳapudan* comes from the Greek Καπετάνος) was Balṭa-Oghlu Suleimān Beg, probably of Bulgarian origin, the Παλτόγλης or Παλτόγλους or Παλτογλῆς of the Byzantine chroniclers (Chalcocondylas, p. 390, 519; Kritobulos, i. 22, 28, 33, 37, 39, 41; Dukas, p. 270, 4; cf. 'Ālī, *Kunh al-Akhbār*, v. 168, 174). Till 1533 the Sandjakbeg of Gallipoli was at the same time *Ḳapudan Pasha* (cf. [Ramberti], *Cose de' Turchi*, Venice 1543, p. 142[a]; T. Spandugino, *Commentari dell' origine de' principi Turchi*, Firenze 1551, p. 146, 164; Nic. de Nicolai, *Navigations et pérégrinations orientales*, Lyon 1567, p. 77; N. Barozzi and G. Berchet, *Le relazioni degli ambasciatori Veneti*, p. 356: capitano dell' armata di Gallipoli; cf. Feridūn Bey, *Munsha'āt al-Selāṭīn*[2], i. 464: *Gelibolu Ḳapudanî*). With the increasing sea power of the Ottomans and the foundation of an arsenal of their own, especially under Sulaimān the Great when the dreaded Khair al-Dīn Barbarossa

for so long commanded the fleet, the headquarters of the High Admiral were removed from Gallipoli to Constantinople. While the office of Ḳapudan Pasha, who had the 19th wilāyet of the Empire as well as 13 sandjaḳs under him and disposed of an income of 885,000 aspers (cf. Sir P. Ricaut, *The Present State of the Ottoman Empire*, London 1687, p. 102 *sq.*), was already one of prestige, with the increasing size of the Ottoman navy it soon became one of the first in the Empire. As long as the Sandjak-beg of Gallipoli was at the head of naval affairs, his jurisdiction only extended to Pera and Nicomedia and in larger naval enterprises a special Pasha was appointed beside him, who acted in supreme command as admiral (Spandugino, *Commentari*, Firenze 1551, p. 165). Later, especially from the time of Barbarossa, the Ḳapudan Pasha was one of the regular and active members of the Dīwān and was not only one of the most powerful but also one of the best paid dignitaries in Turkey. In rank he was equal to the *Ser Asker*, directly below the Grand Vizier and the *Shaikh al-Islām*. On account of the revenues attached to the post it was always an object of ambition in the Turkish official world and was granted by the Sulṭān as a mark of special favour without regard to practical or theoretical training and fitness. Down to about 1780 the Kapudan Pasha was also given the governor-generalship of the islands subject to the Porte in the Aegean Sea, some of the sea-provinces of Asia Minor and the controllership of the arsenal on the north shore of the Golden Horn in Galata, where he had his residence among the wharves. In the sixth century the title was abolished under Sulṭān ʿAbd al-ʿAzīz and replaced by that of *Baḥriye Nāẓiri*, Director of the Arsenal. All naval establishments were under him, the Minister of Marine; a naval council (*Shūrā-i Baḥriye*) assisted him and advised on technical matters and affairs of administration. In June, 1876 under Murād V, the title was revived but only for a short time; it was then definitely replaced by that of Minister of Marine.

A list of all *Ḳapudānān-i Deryā* is given in J. v. Hammer-Purgstall's *Geschichte d. Osmanischen Reiches* (at the end of each volume) and in the work — which first appeared as a feuilleton of the newspaper *Djerīde-i Ḥawādith* — by Rāmiz Pasha-Zāde Meḥmed Efendi, *Kharīṭa-i Ḳapudānān-i Deryā* (of 761—1258 [= Chronogram of the title]; 220 pp., 12°, Stambul 1285 = 1868/69) and in Meḥmed Rāʾif, *Mirʾāt-i Istambul*, Stambul 1314, p. 481—497.

Bibliography: Ḥādjdjī Khalīfa, *Tuḥfat al-Kibār fī Asfār al-Biḥār*, Stambul 1141; I. Mouradgea d'Ohsson, *Tableau général de l'Empire Othoman*, vii., Paris 1824, p. 424, 429 *sqq.*; J. v. Hammer, *Staatsverfassung des Osmanischen Reiches*, Vienna 1818, ii. 291. (FRANZ BABINGER.)

ḲARA, the Turkish word for black or dark colour in general. It is commonly used with this meaning as the first component of geographical names, for example Ḳara Āmid (on account of the black basalt of which this fortress is built); Ḳara Dagh (on account of its dark forests), etc. Beside Ḳara we find in place-names the form Ḳaradja. In personal names it refers to the black or dark brown colour of hair or to a dark complexion. It has, however, at the same time also the meaning "strong, powerful" and has to be interpreted in this sense in the name Ḳara Osmān or in names like Ḳara Arslān. In this connection also we have the name Ḳara Khān, which was assumed by the Ḳarakhānids in Eastern Turkestan.

Bibliography: Von Hammer, *Geschichte des osmanischen Reichs*, i. 80; Maḥmūd Kashgharī, *Dīwān Lughāt al-Turk*, Constantinople 1333, iii. 167. (J. H. KRAMERS)

ḲARA ARSLĀN IBN DĀʾŪD with the *laḳab* FAKHR AL-DĪN, third Amīr of the line of the Ortoḳids [q. v.] of Ḥiṣn Kaifā and great-grandson of the founder of this dynasty.

Statements differ regarding the year in which he succeeded his father Dāʾūd b. Soḳmān. According to Abu 'l-Faradj Barhebraeus (*Chronicon*, ed. Bedjan, Paris 1890, p. 305), Dāʾūd died in the Greek year 1455 (1143—44). The Arabic sources do not give the year; in any case Stanley Lane-Poole, who bases his view that Dāʾūd did not die till about 543 (1148) on a mistaken interpretation of Ibn al-Athīr (*Kāmil*, xi. 73) (*Coins of the Urtuḳi Turkomāns* in *Numismata Orientalia*, Part ii., London 1876, p. 6), puts the date too late. Münedjdjim Bashī (iii. 377) gives 540 (1145). Even before his father's death we find Ḳarā Arslān at war with the Crusaders. When in Ramaḍān, 532 (May, 1138) the Byzantine Emperor John, in alliance with the Franks against the Atabek Zangī of Mawṣil, besieged the fortress of Shaizar near Antioch, he retired when he heard that Ḳarā Arslān had crossed the Euphrates with 50,000 men to come to the help of the town (Kamāl al-Dīn al-ʿAdīm, *Taʾrīkh Ḥalab*, in the *Recueil des Historiens des Croisades, Documents Orientaux*, iii. 677). Ḳarā Arslān does not, however, seem to have had at all a friendly reception from Zangī on his arrival; the Atabek, indeed, ordered him to go back to his father. His relations with Zangī continued to be strained, as is shown in the account in Kamāl al-Dīn (p. 684) that a battle was fought between the two in 536 (1141—1142) at Bahmurd, in which Ḳarā Arslān was defeated. Peace was restored next year again. According to Abu 'l-Faradj's account of his accession (see above), Zangī went so far as to attempt to secure the succession of Ḳarā Arslān's elder brother Toghrïlsh, who had escaped to Mawṣil. Sulṭān Masʿūd of Konya, however, gave help to Ḳarā Arslān and Zangī had to abandon his plan.

However strained may have been Ḳarā Arslān's relations with Zangī, his alliance with the latter's son Nūr al-Dīn of Aleppo was a most faithful one. In 544 (1149—1150) he accompanied the latter on an expedition against the town of Sindjār, which, however, was later again restored to Nūr al-Dīn's brother Ḳuṭb al-Dīn. In 559 (1164) he again assisted him, along with Nadjm al-Dīn of Mārdīn and other princes, at the capture of the fortress of Ḥārim, where many Frankish knights were taken prisoner (Ibn al-Athīr, xi. 92, 185). For the rest Ḳarā Arslān does not seem to have been of a particularly warlike disposition. He would have preferred to keep out of the last named expedition, if the fear of his own subjects, whose fanaticism had been aroused by Nūr al-Dīn (and apparently also the fear of Nūr al-Dīn himself), had not compelled him to take part. Very little else is chronicled of his activities; for example, the capture of the Kurdish stronghold of Shāṭān (Ibn al-Athīr, xi. 185) in 546 A. H. and the unsuccessful

siege of 'Āmid on a campaign against the Danishmandid Yaghi Arslān in 1163 A. D. (Abu 'l-Faradj, *op. cit.*, p. 329).

The Arabic and Syriac sources are unanimous in giving the year 562 (1166—67) as the year of his death. Ibn al-Athīr (xi. 217) tells how before his death he commended his son and successor Nūr al-Dīn Muḥammad to the protection of his powerful ally Nūr al-Dīn of Aleppo. The latter kept the trust and prevented his own brother Ḳuṭb al-Dīn from seizing Ḳarā Arslān's territory. Stanley Lane-Poole, on the other hand, relying on coins of the year 570 A. H. of Ḳarā Arslān, places his death in 570 or even not till 571 (*op. cit.*, p. 16).

Ḥiṣn Kaifā [q. v.] seems to have been his usual residence. There still exist here the remains of the great bridge of one arch over the Tigris which, according to Ibn Ḥawḳal (*B. G. A.*, ii. 152), he had restored. Abu 'l-Faradj, however, calls him, like his father, lord of Ḥiṣn Ziyād (i. e. Khartabirt) (Kharpūt). It is very possible that this town belonged to Ḳarā Arslān's territory, for in 1122 it was in the hands of the Ortoḳid Balak and Ḳarā Arslān's son 'Imād al-Dīn later (581) founded there a collateral line of the Ortoḳids. But the town of 'Āmid most probably never belonged to his possessions; it was only presented to his successor by Saladin in 579 (Ibn al-Athīr, xi. 324). At his death he is, however, described as ruler over Ḥiṣn Kaifā and the greater part of Diyār Bakr (Ibn al-Athīr, xi. 217).

Wilken, *Geschichte der Kreuzzüge*, ii., iii., Leipzig 1813, 1817; *Recueil des Historiens des Croisades*, *Documents Arméniens*, Paris 1869, p. 155, 357, and *Historiens Orientaux* (besides Kamāl al-Dīn also Abu 'l-Fidā' and Abū Shāma). On Ḳarā Arslān's coins (remarkable, like the coins of other Ortoḳid and Atabeg lines, for their pictorial types) see Stanley Lane-Poole, *op. cit.*, and his *Catalogue of Oriental Coins in the British Museum*, iii. (1877), 118. On inscriptions with the name of Ḳarā Arslān cf. M. v. Oppenheim, *Inschriften aus Syrien, Mesopotamien und Kleinasien*, i.; *Arabische Inschriften* by M. v. Berchem, Leipzig 1909, p. 83, 85. (J. H. KRAMERS)

KARABADHIN. [See AḲRABĀDHĪN.]

ḲARA-BĀGH (Turkish-Persian: "black garden", because of the black and fertile soil of its high valleys), the present-day name of the mountainous part of Arrān [q. v.] forming a province of Transcaucasia bounded by the Kurr, the Aras and the district of Erīwān; area about 6,750 sq. miles and 250,000 inhabitants (half Ādharbaidjānī and half Armenians); capital Shūsha; mountains: Kūmish (12,480 feet) and Ḳapudjik (12,360 feet). Its horses are famous for their swiftness, and reptiles, scorpions and tarantulas are found there. It is in this province that Fatḥ 'Alī Ākhoundzāde [q. v.] lays the scene of his comedy: *Monsieur Jourdan, botaniste parisien*.

At the beginning of the reign of Shāh 'Abbās I, in 996 (1588), the Ottoman general Farhād Pasha, in alliance with the governor of Shirwān, Dja'far Pasha, invaded Ḳarā-bāgh and seized Gandja (v. Hammer, *Hist. de l'Empire Ottoman*, vii. 221; Sykes, *History of Persia*, ii. 257—258). This province was at that time the hereditary fief of the Turkish clan of Djewānshīr, the family of Sarū-lu, a descendant of Avshār or Afshār, eldest son of Yulduz, third son of Oghuz (Abu 'l-Ghāzī, ed. Desmaisons, St. Petersburg 1871—74, p. 27). This clan emigrated from Turkestān with Hūlāgū and was brought back from Asia Minor by Tīmūr and scattered over Turkestān, Persia and Afghānistān, especially around Kābul and Ḳandahār. Its chiefs were called from father to son alternately Panāh and Ibrāhīm Khalīl; it was Panāh III who built Shūsha in 1165 (1752) and gave it the name of Panāh-ābād, whence the name *panāh-ābādī* given to the coins which he struck there. His son Ibrāhīm Khalīl Khān, having succeeded him, found himself attacked by the Persians; after two fruitless sieges, Āghā Muḥammad Khān (later Shāh) Ḳādjār captured Shūsha but was assassinated there on the morning of Dhu 'l-Ḳa'da 21, 1211 (June 18, 1797), five days after entering the town, by three of his servants who feared his vengeance. Ibrāhīm, who had fled, came back two months later; he submitted to the Russian general, a Georgian by origin, Prince Sisianoff (Zizishwili), after the capture of Gandja in 1219 (1804) and agreed to pay a tribute of 6,000 ducats; he received the rank of lieutenant-general and a Russian garrison occupied his capital. His eldest son, Abu 'l-Fatḥ Khān, was the brother-in-law of Fatḥ 'Alī Shāh and had remained faithful to the Persian alliance; he brought his father back to the Ḳādjār party and the latter attempted to liberate his capital, but Dja'far Ḳulī Khān, son of Muḥammad Ḥasan Khān and grandson of Ibrāhīm, warned the Russians of the Persian advance. 600 Russian soldiers left the citadel and in the middle of the night of Rabī' I 23, 1221 (June 10, 1806) attacked the camp of Ibrāhīm Khalīl, who was killed with his family in the fighting. The Russian major commanding the garrison installed another of his sons in his place, Mahdī Ḳulī Khān, who reigned till 1238 (1822) when he fled to Persia. The Ḳādjārs had, however, renounced all claim to Ḳarā-bāgh by the treaty of Gulistān (Oct. 12, 1813).

AL-**KARĀBĪSĪ**, the cloth-merchant, the *nisba* of several Arab authors; viz.:

1. the mathematician AḤMAD B. 'UMAR, the date of whose death is not known and among whose works, a commentary on the translation of Euclid is specially celebrated; see *Fihrist*, p. 265, 13, 282, 1; Ibn al-Ḳifṭī, *Ta'rīkh al-Ḥukamā'*, Cairo 1326, p. 57, 5.

Only one of his works has came down to us, viz. his *Kitāb Misāḥat al-ḥalaḳ* (Oxford and Cairo; cf. *Bibl. Bodl.*, *Codd. Mss. Or.*, i. No. 913; and *Fihrist al-Kutub al-'arabiyya fi 'l-Kutubkhāne al-Khedīwiyya*, v. 204).

2. the traditionist and faḳīh ABŪ 'ALĪ AL-

Ḥusain b. ʿAlī b. Yazīd al-Muhallabī, who had at first belonged to the Ahl al-Raʾy, but after the arrival of al-Shāfiʿī at Baghdād attached himself to him; at the same time he remained an absolute supporter of the belief in predestination (*ḳadar*); nothing has survived of his writings on criticism of traditionists and fiḳh. He died in 245 (859), according to others in 248 (862).

Reiske–Adler, ii. 204; Ibn Taghrībirdī, ed. Juynboll, i. 753, 763.

3. the Ḥanafī faḳīh Asʿad b. Muḥammad (d. 570 = 1174), whose *Kitāb al-Furūḳ fi 'l-Furūʿ*, which Ḥādjdjī Khalīfa, *Kashf al-Ẓunūn*, ed. Flügel, iv. 419, No. 9041 confuses with the *Talkhīṣ al-Uṣūl* of al-Maḥbūbī (Brockelmann, *G.A.L.*, i. 380, No. 34), is preserved in Cairo; see *Fihrist al-Kutub al-ʿArabiya fi 'l-Kutubkhāne al-Khedīwiya*, iii. 96.

(C. Brockelmann)

KARA-ČELEBI-ZĀDE, epithet of the Ottoman historian, jurist and Shaikh al-Islām, ʿAbd al-ʿAzīz Efendi. Born in the year 1000 = 1591/92 at Stambul, the son of the then military judge of Rumelia, Ḥusām al-Dīn Ḥusain b. Muḥammad b. Ḥusām al-Dīn Efendi (d. in Muḥarram, 1007 = Aug., 1598 at Brussa and buried there; cf. al-Saiyid Ismāʿīl Belīgh Brūsewī, *Taʾrīkh-i Brūsa*, Brussa 1302, p. 314—316; Ewliyā, *Siyāḥatnāme*, Constantinople 1314—1318, ii, 55; he bore the *makhlas* Ḳara-Čelebi-Zāde which passed to all his descendants and caused frequent confusion), he enjoyed the tuition of his elder brother, the chief district judge Muḥammad Efendi (cf. M. Thuraiyā, *Sidjill-i ʿOthmānī*, iv. 155; Ewliyā, *op. cit.*, i. 407; J. von Hammer, *Constantinopolis*, ii. 25; M. E. died Dhu 'l-Ḥidjdja 6, 1042 = June 14, 1633 and is buried at Aiyūb in Stambul) and studied also under the Mufti Ṣanʿ Allāh Efendi. He then filled a series of offices: in August, 1612 he became Müderris at the medrese of Khair al-Dīn Pasha, in April, 1613 at the new medrese of ʿAlī Pasha, in April, 1616 at the medrese of Pīrī Pasha, in April, 1617 at the medrese of Ḳalender Khāne, in December, 1619 so-called "eighth" (*ṣaḥn-i thāmin*) at the mosque of Muḥammad the Conqueror; in Jan., 1621 he was transferred to the Sulaimānīya at Brussa, but by October of the same year appointed to the Sulaimānīya in Adrianople and in May, 1623 summoned to the same institution in Stambul. In June, 1623 he was involved in a mutiny of the ʿUlamāʾ at the mosque of the Conqueror and sent as a punishment to Brussa to the medrese of Molla Khusraw, but pardoned on the accession of Murād IV and in Jan., 1624 recalled to Stambul to the Sulaimānīye. In March of the same year he became judge of Yeni Shehir, was dismissed in December, appointed judge of Mekka in February, 1626 and dismissed once more in December, 1627; returning to Stambul, after a short stay in Adrianople, he was appointed city-judge of Stambul in Jan., 1634. In this capacity he had to take measures for the security of the city during the preparations for the Polish campaign: cf. J. v. Hammer, *Gesch. des Osm. Reiches*, v. 178). But when in July of the same year the shortage of grease provoked discontent among the people of Stambul and brought down the wrath of Murād IV upon the judge responsible for the regulation of the market (cf. *Z.D.M.G.*, xviii. 722) he was dismissed from his office and sentenced to death by drowning. A letter in the Sulṭān's hand ordered the Superintendent of the Imperial Gardens (*Bostāndjī Bashī*), Dudje Efendi, afterwards governor of Bosnia, to take the disgraced magistrate in a boat and to supervise the execution of the sentence on one of the Princes' Islands. The boat was just reaching Prinkipo, where the sentence was to be carried out, when fortunately for Kara-Čelebi-Zāde, a second letter, procured by his patron, the Grand Vizier Bairam Pasha (d. 1638), brother-in-law of the Sulṭān, arrived which altered the drowning to banishment to Cyprus and at the last moment prevented the execution of the death sentence (cf. Naʿīmā, *Taʾrīkh* Stambul 1147, i. 577). Pardoned by December, 1634, he was appointed military judge of Rumelia. During the rebellion which cost Sulṭān Ibrāhīm his throne and life in the summer of 1648 Kara-Čelebi-Zāde distinguished himself by such shamelessness that even the frank Naʿīmā (ii. 166; J. v. Hammer, *op. cit.*, v. 449) has not the courage to repeat his utterances. After Ibrāhīm had been disposed of, he gained the favour of the youthful Muḥammad IV, who again appointed him military judge in Aug., 1648. The real object of his ambition, which he pursued by every means in his power, was the office of Shaikh al-Islām. After he had first been granted the title of a Shaikh al-Islām (Naʿīmā, ii. 231), a case probably unique in Ottoman history, he was removed in October, 1649 from his position as military judge and appointed Shaikh al-Islām in place of Bahāʾī Muḥammad Efendi, dismissed on May 2, 1651 (*Bulios Müftisi; cf. von Hammer, *op. cit.*, v. 531—535). On the fatal Sept. 2, 1651 he once more fell into the imperial disfavour and was banished to Chios. Two years later he was given permission to go to Brussa and in 1655 for the barley-money (*arpaliḳ*; see i. 460) which he had so far enjoyed he received the revenues of Chios and the office of judge of Mudania, which he exchanged in March, 1657 for that of Gallipoli. On the evening of Jan. 11, 1658, death finally ended Ḳara-Čelebi-Zāde's eventful career. He was buried at Brussa in the cemetery of Shaikh Muḥammad Dewedjī; his tomb may still be seen there.

Ḳara-Čelebi-Zāde is not a very pleasing figure in Ottoman history, as he was a ruthless, selfish and intriguing man. His prestige as a scholar is therefore all the more marked. He was the author of a series of historical works, of which two have so far been printed. With the *Mirʾāt al-Ṣafā* his chief production is the *Rawḍat al-Abrār*, a historical work in four parts dedicated to Sulṭān Ibrāhīm I, which covers the period from Adam down to 1056 (1646/47). The book, of which there are several good manuscripts in Europe (cf. G. Flügel, *Die arab., pers. u. türk. Hss. . . . zu Wien*, ii. 96, No. 865; Tornberg, *Codices . . . Bibl. Reg. Univ. Upsaliensis*, p. 193, No. 277 and p. 197, No. 286, which appears not to be complete), was printed in Muḥarram, 1248 (1832/33) at Būlāḳ

(large 4°, six parts, 637 pp.; on p. 637 full title). His *Sulaimān-nāme* has also been printed (Būlāḳ 1248, large 8°, 230 pp.): it is the epic of the legislator Sulaimān in which he describes his glorious reign to his death (1520—1566) in a pleasing flowery style (a MS. in Vienna; cf. Flügel, *op. cit.*, ii. 230). He extended his historical work from 1056 to 1068 (1646—58) by a supplement (*Dhail*) of which there are copies in the Vienna National Library (cf. Flügel, *op. cit.*, ii. 262), in the Johanneum of Graz and in the possession of Dr. J. H. Mordtmann. Several other smaller historical works from his pen exist in manuscript, e. g. an account of the conquest of Eriwān (1635) and Baghdād (1638) entitled *Ta'rīkh-i Fatḥ-i Riwān wa-Baghdād* (cf. Flügel, *op. cit.*, ii. 262). Ḳara-Čelebi-Zāde's translations from the Persian and Arabic as well as other writings are detailed by Ḥādjdjī Khalīfa, ed. Flügel, ii. 113, v. 253. He also dabbled in poetry under the name 'Azīz. A poem entitled *Gülshen-i Niyāz*, written in 1634 on the occasion of his banishment, exists in MS. in the Prussian State Library in Berlin (cf. Pertsch, *Verz. d. Türk. Hss.*, p. 415 *sq.*) and in the British Museum (cf. Rieu, *Cat. of the Turk. MSS.*, p. 191ᵃ; see also Ḥādjdjī Khalīfa, *op. cit.*, v. 233, N°. 10,840).

Bibliography: cf. besides the already mentioned sources the biography in Na'īmā under the year 1068; Ḥādjdjī Khalīfa, *Fedhlike*, ii. 152 (biography); the best sketch of his life with all details is given by Ismā'īl Belīgh Brūsewī, *Güldeste-i Riyāḍ-i 'Irfān*, Brussa 1308, p. 317—322; *Sidjill-i 'Othmānī*, iii. 330; Mustaḳīm-Zāde, *Dawḥat al-Mashāyikh al-Kibār*, Vienna MS., Mxt. 153 (Flügel, ii. 409 *sq.*); Rif'at Efendi, *Dawḥat al-Mashāyikh*, Stambul n. d., p. 58—62; *'Ilmiye Sālnāmesi*, Stambul 1334, p. 461 *sqq.* (with reproduction of Ḳ.'s signature); J. v. Hammer, *Gesch. der Osm. Dichtkunst*, iii. 426 *sqq.*; do., *Gesch. des Osm. Reiches*, v. 178, 184. — Ḳ.'s collection of manuscripts is still preserved in the library of the Shāhzāde mosque in Stambul. A catalogue of the books (16 pp., 4°, Stambul n.d.) has been printed. — On the family, of which several members achieved fame, cf. especially Ḥādjdjī Khalīfa, *Taḳwīm al-Tawārīkh*, p. 191; also Ismā'īl Belīgh, *op. cit.*, p. 315, where the ancestors of Ḳara-Čelebi-Zāde are dealt with; cf. also Wüstenfeld, *Die Gelehrtenfamilie Muḥibbī*, p. 48). (FRANZ BABINGER)

KARĀČI (KURRACHEE). 1. An important city and seaport on the coast of Sindh situated 24° 51' N. 67° 4'. E. Population (1901) 116, 663. The administrative centre of the province of Sindh at the present day, and gives its name to a district.

The name does not appear to be of great antiquity, and is probably due to the settlement of a Dodāi Balōč tribe called Kulāčī, originally Rādjpūt (see *Glossary of Panjab Castes*, Lahore 1911), from whom the town of Kulāčī (in the Dēra 'Ismā'īl Khān District of the N. W. Frontier) also took its name. Following a common practice in the Sindhī language the *l* has become *r*. (Cf. Kāīl in the Pandjāb and Kōurī in Sindh).

The harbour of Karāčī was naturally a good one, although when first surveyed by English sailors it was impeded, as Pottinger tells us (1808), by a bar, which prevented vessels drawing more than 16 ft. from entering. The population was at that time only 9000, but it had already become the principal port of Sindh. The *Imperial Gazetteer of India* (*Bombay*, Vol. II) asserts that Karāčī began to be known as a port about 1729, and that its rise was due first to the silting up of Khārak and afterwards of Shāhbander, a statement which is not easy to understand. Khārak (an island in the Persian Gulf occupied by the Dutch from 1748 to 1765) could have had no influence on Karāčī, and Shāhbandar is too far to the Eastern side of the Indus Delta to have affected it. The real cause was the gradual deterioration of the two ports of Dēwal and Sindi (often spoken of jointly as Dial-Sindi) which were situated on the two sides of the west mouth of the Indus. These were still in use in Thevenot's time (*Travels in India*, published 1687) and Manucci visited Sindi on his way to India in 1655. During the 18ᵗʰ century the advance of the land cut off these ports from the sea, but Karāčī, lying outside the Delta to the west, was not liable to such rapid silting. It also took the place of Tatta as the principal city of S. W. Sindh. Under the Kalhōra rulers of Sindh it was made over to the Khān of Kilāt, and under his suzerainty was held for a time by the Djām of Las, but after the fall of the Kalhōras the Tālpur Amīr, Fatḥ 'Alī Khān, took Karāčī in 1795 and erected a fort on Manora point to protect the harbour. Henceforward the trade grew considerably. Pottinger's account in 1808 has been alluded to above. Burnes found the population in 1831 to be 15,000.

Sir Charles Napier made it his landing place in 1841 and after the annexation of Sindh in 1843 he undertook its development with the object of making it the military and civil centre of the administration and also an important port equipped to deal with the trade of the Pandjāb as well as of Sindh. Through his judgment and foresight he was able to lay the foundations of the progress made in more recent times. Sir Bartle Frere improved the harbour in 1854 by the construction of the Napier Mole which connects Kiamāri Island with the mainland. The Manora breakwater was constructed in 1869—73, and the harbour has gradually been restricted in area, and at the same time deepened and otherwise improved. In 1883, a good supply of water from the Malir R. was brought in. General Haig in his work on the Indus Delta identifies the harbour of Karāčī with Alexander's Haven which Nearchus reached by sailing westwards from the western mouth of the Indus. As the coast here has not changed so much as in the actual Delta, it is possible to identify some of the places mentioned. The Island of Bibakta appears to be Manōra point, and Eiros seems to be the high ground east of the harbour now known as Clifton. In spite of this identification, however, Karāčī as a town has no ancient or mediæval history, although the harbour must always have been of use as a haven of refuge. Its enormous development in modern times is due to the opening up of the trade of N. W. India by railways. It is the outlet for the wheat, cotton, oilseeds and hides of the Indus valley.

2. Karāčī District. A modern administrative district taking its name from the town of Karāčī, lying between 23° 35' and 26° 21' N. and 66° 42' and 68° 48' E. with an area of 11,970 sq. m., and a population in 1901 of 607,

828. Its boundaries are on the N. the District of Lārkāna, on the E. the R. Indus and the Ḥaidarābād District on the S. the sea, and on the W. the Kīrthar Mts. and the Ḥabb River. Besides Karāčī the most important town is Tatta, the ancient capital of S. Sindh, which first rose to importance about the beginning of the 16th century, and was an important centre of trade and government in the 17th century, and still a large and flourishing town in Nādir Shāh's time (1742). It was an important mint of the Mughal emperors from the time of Akbar till that of Muḥammad Shāh, when Sindh ceased to form part of the empire. Nādir Shāh and the Durrānīs both used this mint; their other mints in Sind were Bhakkar and Ḥaidarābād which latter mint probably also issued the coins of Nādir and the Durrānīs bearing the name Sindh alone. Tatta, which is now far inland was in the 16th century accessible to seagoing ships and was visited by a Portuguese fleet in 964 (1556). The Portuguese had apparently been called in by the Tarkhān chief 'Īsā Tarkhān, who had obtained possession of Tatta after the death of Shāh Ḥusain Arghūn, but, finding the city unprotected in the absence of 'Īsā at the siege of Bhakkar, they turned their arms on their ally and plundered Tatta unmercifully. The port alluded to by the Portuguese as Bandel, which was also plundered on this occasion, was probably Shāhbandar. [See Saiyid Djamāl's *Tarkhān-nāma* in Elliot and Dowson, *Hist. of India*, i. 324 and Danvers, *Portuguese in India*, i. 408]. The town of Tatta quickly recovered from this disaster, and its final decay was due no doubt to natural changes in the Indus Delta.

(M. LONGWORTH DAMES.)

ḲARADAGH. [See MONTENEGRO].

ḲARA DENIZ, the Turkish name for the Black Sea, the Pontus Euxinus (abbreviated to Pontus) of ancient and Byzantine geography. The Arab geographers took over the Greek names Pontus and Maeotis (Sea of Azov) in the forms *Nunṭus* and *Ma'uṭis*, which early became *Nīṭash* and *Mānīṭash* in Arabic writing and language (Juynboll on *Marāṣid al-Iṭṭilā'*, iv. 194) and in these corrupt forms have survived down to the latest works of Oriental geography. Other names were also used, for example Sea of Trebizond (*Baḥr Ṭarabazunda*), Sea of the Crimea (*Baḥr Ḳirim*), Russian Sea (*Baḥr al-Rūs*; cf. *mer de Rossie* in Villehardouin, ed. Wailly, § 226), which are explained by the commerce of the Muslim East with Trebizond and the coast lands of South Russia (Yāḳūt, *Mu'djam*, ed. Wüstenfeld, i. 499; al-Dimashḳī, *Nukhbat al-Dahr*, ed. Mehren, passim; Abu 'l-Fidā', *Taḳwīm al-Buldān*, ed. Reinaud, passim; al-Mas'ūdī, *Murūdj al-Dhahab*, ed. Paris, i. 260 *sq.*; cf. Marquart, *Osteuropäische u. ostasiatische Streifzüge*, p. 162, 333); on the other hand, in the passages where *Baḥr al-Rūm* — which otherwise means the Mediterranean Sea only — refers to the Black Sea (e. g. Gardīzī in Marquart, *op. cit.*, p. 161; al-Dimashḳī, *op. cit.*, p. 138, 18, 259, 4 *sq.*) *Baḥr al-Rūm* should be emended to *Baḥr al-Rūs*. The name *Baḥr al-Khazar*, which originally meant the Caspian Sea, was, on the other hand, transferred to the Black Sea (Ibn Khordādhbeh, *B. G. A.*, vi. passim; Ḳudāma, *B. G. A.*, vi. passim; al-Mas'ūdī, *Kit. al-Tanbīh*, *B. G. A.*, viii. passim), as al-Mas'ūdī (p. 67) thinks, because a connection was erroneously thought to exist between the two seas; as at the same time the name Ma'ūṭis (Mānīṭash) was extended to the Black Sea (al-Mas'ūdī, *Kit. al-Tanbīh*, p. 138, 140; *Murūdj*, i. 272 *sq.*; al-Dimashḳī, *op. cit.*, p. 138, 11, 143, 12, 228, 17), the name Sea of the Khazars may have been at first limited to the Sea of Azov and only by a mistaken use have come to include the Black Sea.

All these names were driven out of use by the name Ḳara Deniz, evidence of which is first found in the xiiith century and which is no doubt the name given to the Black Sea by the Turco-Tatar inhabitants of its shores in Southern Russia; it was understood by the western authors of the time to mean "Great Sea" (locus classicus, Rubruquis, ed. Bergeron, p. 2: en la mer du Pont que les Bulgares appellent la grande mer; Mare Majus in Haython, Vincentius Bellovacensis, Marco Polo, chap. 1; Mar Majour in Ghillebert de Lannoy and Bertrandon de la Broquière; mar mayor in Clavijo; the Grete See in Chaucer, *Prologue*, l. 59), more rarely as Black Sea (Schiltberger, who, however, also writes "Grosses Meer"; mare nigrum, quoted for the year 1338 in Yule, *Cathay* etc., new ed. by H. Cordier, iii., London 1914, p. 81; il mar nero in a document of 1473 in Berchet, *La Repubblica di Venezia e la Persia*, Venezia 1865, p. 12), by the Arabs as "Black Sea", *al-Baḥr al-Aswad* (Abu 'l-Fidā', *Taḳwīm al-Buldān*, p. 31, 34; al-Dimashḳī, *op. cit.*, p. 139, 143, 145, 220; *al-Baḥr al-A'ẓam* in Ibn Khordādhbeh, p. 110 is to be explained otherwise); among the Greeks we find only *mavri thalassa* and this only for the first time in the treaty with Venice concluded in 1265 (*Fontes Rerum Austr.*, part II, xiv. 62); in literature from the xvith century (see Leunclavius, *Pandectes Hist. Turc.*, Ch. 148). The Italians and French used Mare Maggiore, Mer Majour down to the first half of the xviiith century: henceforth we find the name Black Sea throughout geographical literature. The older reproduction of Ḳara Deniz by "Great Sea" shows that *Ḳara* in this connection does not refer to the colour but means, as often in proper names, "great, powerful, terrible" (cf. ḲARA), in keeping with the dangers of the voyage, particularly in bad weather, upon this sea so liable to storms and of such extent. All other attempts to explain the meaning, especially those which seek to find the name "Black Sea" among the Greeks and Byzantines, or, like L. de Saussure in his brilliant essay *L'origine des noms de Mer Rouge, Mer Blanche et Mer Noire* (*Le Globe*, xliii. 23 *sqq.*), to trace it to the cosmographic conceptions of the Far East, are to be rejected; nor should one quote in support of "black" Sea the fact that the Turks called the Mediterranean Aḳ Deniz (White Sea), as if by contrast, any more than we could justify the mediaeval nigromantia (a corruption of nekromantia) by saying that white magic was invented as a pendant to it. — The name "Sea

of the Khazars" has survived into modern times in corrupt form *Baḥr-i Ḥazar* (the result of transposition of the diacritical points) as a name of the Sea of Azov.

After the Black Sea had been treated as a *mare clausum* during the centuries under Byzantine rulers, in the latter half of the Middle Ages it was opened up under the Komnenoi and Palaiologoi to the Genoese and Venetians and thus to European trade with the Near and Far East; in Kaffa [see KAFA], Tana, Amasra and Samsūn there arose autonomous Frankish colonies and smaller settlements in Sinope and Trebizond. After the fall of Constantinople Meḥemmed the Conqueror closed the Black Sea to foreign shipping by barring the Straits; the destruction of Amasra (1459), Sinope and Trebizond (1461) and Kaffa (1475) completed the ruin of Frankish commerce and the Black Sea became a Turkish inland sea, a Πόντος Ἄξενος, on which only the Turkish flag was allowed to wave. It was only with the advance of the Russian empire to the north coast of the Black Sea that the latter was opened first to Russian commercial navigation by art. X of the treaty of Küčük Kainardja in 1774, and ten years later, in 1784, to Austrian and in 1799 to British commerce; in the xixth century the other European powers obtained liberty of access to the Black Sea: France in 1802 and following her the smaller seafaring nations; the last treaties on this matter were concluded in 1827. Down to quite recently foreign warships were not allowed to pass through the Straits and into the Black Sea.

Bibliography: The history of the various appellations of the Black Sea has not yet been written. The main work on commerce at the close of the Middle Ages is W. Heyd, *Histoire du Commerce du Levant*, Leipzig 1885—1886; reprint 1924; for commerce under Turkish rule: Ch. Peyssonel, *Traité sur le commerce de la Mer Noire*, Paris 1787; for the later period: Hommaire de Hell, *Les steppes de la Mer Caspienne*, Paris and Strasburg 1843—1845. — The political and diplomatic events which led to the opening of the Black Sea in the xviiith century are fully discussed in [P. Hadji Mischef], *La Mer Noire et les Détroits de Constantinople*, Paris 1899; cf. thereon the notes in Djewdet, *Ta'rīkh*, ii. 284 and vii. 485 *sqq.*; the documents concerned are given by Noradounghian, *Recueil des traités internationaux de l'Empire Ottoman*, vol. i. and ii., Paris and Leipzig 1897—1900. (J. H. MORDTMANN).

ḲARAFERIYA, a small town in Macedonia, situated about 40 miles to the S.W. of Selānīk, on the Ana Dere, a tributary of the Indje Ḳara Ṣu, in the neighbourhood of the Gulf of Salonica. The ancient Greek name is Βέροια, in modern Greek Vérria (Slav. Ber), to which form the Turks have added the adjective Ḳara. According to the Byzantine authors the town was sacked as early as 1331 by Turkish pirates belonging to the country of Ḳarasi. They landed with 70 ships and laid waste the region of Vérria and Trajanopolis, but they were finally driven back by the emperor Andronicus. Ḳaraferiya was an important military point; in 1347 it was occupied by the Servians and in 775 A.H. (1373/4) it was conquered for the first time by the Ottoman Turks. From the reign of Murād II, from whom dates the conquest of Selānīk (1430) down to the Balkan war, Ḳaraferiya belonged to the Ottoman Empire. In November, 1912 Ḳaraferiya was one of the last Turkish supports in the defence of Selānīk, which was at last taken on November 8 of that year by the Greeks; since the peace of Athens (Nov. 14, 1913) it has belonged to Greece.

Ḳaraferiya is situated at the foot of the richly wooded Aghostos Dagh in a fertile region which produces all kinds of crops and vegetables and is famed for its tobacco and especially its vineyards on the mountain slopes. The silk-growing has given rise to a rather important weaving-industry in the town. In the neighbourhood are still ruins of the ancient Βέροια. In the last period of Turkish domination the number of its inhabitants was a little less than 10,000 of whom about one fourth Muslims, the rest being composed of Greeks, Bulgarians and Wallachians. It was the chief place of a Ḳaḍā of the same name in the wilāyet of Selānīk.

ḲARAGÖZ, principal character in the Turkish shadow-play. The shadow-play has been known to the Muhammadan peoples since about the xiith century of our era. Its origin is perhaps to be sought, as Jacob suggests, in Eastern Asia, but, as regards the matter of the plays, there seem to be connections with the Hellenistic mime (Horovitz, Reich). The modern Turkish shadow-players attribute the invention of their art to the patron saint of their gild, Shaikh Küshteri (i. e. Tustarī, the man from Tustar [Shūshtar] in Persia), after whom they call their shadow-stage *Shaikh Küshteri Maidānī* "Shaikh-Küshteri place". According to the Turkish biographers a certain Shaikh Meḥemmed Küshteri migrated from Persia to Asia Minor in the xivth century and was buried in Brussa. On the various legendary accounts of the origin of the shadow-play see Ritter, *Karagös*, i. 5. The shadow-players talk among themselves a kind of professional language, in which gipsy elements predominate. Another circumstance in favour of a connection with the wandering gipsies is the fact that the principal figure, Ḳaragöz, is represented as a gipsy. The shadow-play is a favourite image of the transitoriness and worthlessness of all that is mortal with poets, especially those who are fond of mysticism. The idea often expressed by the mystics that all things in the world have only a shadow-existence and only owe their being to the light permeating things from the Primeval One, who alone possesses reality and substance, found in the shadow-play a symbolical application. The shadow-players are fond of calling attention to this edifying aspect of their performance in the so-called stage-ghazel (*perde ghazeli*).

The external apparatus of the shadow-play consists of a stand like that of the European marionette theatre, only that in place of the open stage a canvas is stretched across and illuminated by an oil-lamp. Against this canvas (*perde*) the

shadow-player presses coloured figures about a foot high made of dried skin; this is done by means of guiding rods which are put into the figures through holes provided with links. All the figures that appear are controlled by one player. Two musicians are his only assistants. The performances usually take place in the early hours of the nights of Ramaḍān but are also given as entertainments at domestic festivals, such as circumcisions.

The following is the course of the typical performance of the Turkish shadow-play: an introductory picture (*göstermé*) is shown on the canvas before the beginning of the performance. This is removed during introductory music on a reed-pipe and one of the two principal characters, Hadjiwad, comes on the scene singing a song. At the end of the song Hadjiwad calls out *Hai Ḥaḳḳ*, "O God", as the introductory religious formula of the play, recites the stage-ghazel, praises God and curses Satan and then proceeds to pay a tribute of homage to the Sulṭān. After a conventional introduction he begins to express in rhymed prose his longing for his companion Ḳaragöz and to sing to him before the door of his home — where the scene is supposed to be laid — in languishing tones. Ḳaragöz rushes out in anger and a fight ensues between the two at the end of which Hadjiwad usually disappears to return after an interval. The prologue proper then begins, consisting of a dialogue (*muḥāwere*) between Hadjiwad and Ḳaragöz, and this is followed after a stereotyped transition-formula by the piece proper, the dramatic part (*faṣl*). The piece again concludes with unvarying turns: Ḳaragöz gives Hadjiwad a box on the ear and the latter goes to tell the "master of the curtain" that Ḳaragöz has torn the curtain down and destroyed it. Ḳaragöz then asks for indulgence to the defects of the play and goes off after threatening to punch Hadjiwad still harder the next time — here the piece is announced for the next evening.

The principal characters are always Hadjiwad and Ḳaragöz. The former is a cultivated elderly gentleman somewhat given to opium eating who is wellknown to all the characters who appear and often acts as their confidant. Ḳaragöz is an uneducated, rough gipsy, the type of simple, natural vivacity contrasted with the decrepit representative of prudence and deliberation. Like his relatives in the European marionette theatre he is the real favourite with the public. He is bald and sometimes still appears with the phallus, both features which indicate a certain connection with the ancient mime. Both characters wear special caps, peculiar to the shadow-play.

The humour of the dialogue between Hadjiwad and Ḳaragöz depends for the most part on countless puns and plays on words which are always brought about by Ḳaragöz misunderstanding the learned words of his friend and giving them humorous interpretations. The preludes are not limited to any particular piece (*faṣl*) but are chosen for presentation at will according to the length of the following play. The substance of the dialogue has almost always the same object, to attain humorous effects by the contrast between Hadjiwad's learning and Ḳaragöz's stupidity. Hadjiwad, for example, gives Ḳaragöz lessons in spelling, proposes games which he does not understand, goes with him as a singing Ramaḍān-night watchman round the streets, when Ḳaragöz sings all the songs out of tune and misunderstands them, or gives him sentences to be said rapidly, or plays games with him which necessarily end in a fight, etc.

The production of the dramatic part (*faṣl*) which follows the prelude shows certain peculiarities in scenic technique which are the natural result of the paraphernalia of the shadow-stage. The white surface of the canvas, only rarely relieved by a few figures in the wings, always represents the Küshteri square in front of Ḳaragöz's house, which latter is, as it were, represented by the frame of the canvas. As Ḳaragöz has continually to accompany the action with comments from the window of his house, there are often several scenes of action in one, one quite remote, the real scene of action, and the square before Ḳaragöz's house. The possibility of mixing up the characters into crowds with the conducting-rod is used to present remarkable scenes of recognition.

The players have a fixed stock of pieces, which is practically the same with all companies and, except for a few modern pieces, is considered to have "been handed down from olden times." The pieces are sometimes dramatic versions of popular books (*Ferhād* and *Shīrīn*, *Ṭāhir* and *Zühre*, *Medjnūn* and *Lailā* etc.), in which case Hadjiwad appears as trusted adviser and Ḳaragöz as servant of the heroes concerned, or suchlike; sometimes they are pictures of everyday life in Stambul. In the latter we are given a series of Stambul types, among which one recognises pathological (the drowsy opium-eater, the pugnacious drunkard, the lame beggar, the dwarf, the crazy man) and racial types (the young Stambul Efendi, the Persian, the Armenian, the Jew, the rough woodcutter from Ḳasṭamuni, the Ḳaiṣarli, the Laz, etc.). The effect is very often attained by the formation of a series of incidents. A whole series of characters, differing as much as possible from one another, is brought successively into the same comical embarrassing situation, or they bring Ḳaragöz, around whom the action then usually develops, into some such situation so that the tension increases with each successive character until it is finally relieved by a character superior to the situation.

Pieces of this kind are, for example: *Yalowa Ṣafasi*, "The pleasure-excursion to Jalowa". A young Efendi, usually called Čelebi, wishes to take a trip with his sweetheart to the seaside resort of Yalowa and buys a bag and a jug in which to put provisions for the journey. While he is away to make the final preparations, Ḳaragöz appears and teases the young woman, who has remained behind with the sack and jug, with stupid stories about a fatal accident that has overtaken her lover, that he has set the sea on fire with a match he had thrown away and has been burnt or that he has been swallowed by an eater of *boza*, and so on. Then a series of typical characters appear all of whom wish to go to Yalowa with the young woman and are hidden one after the other by the obliging girl in the sack and jug, in which a new fight begins for the little room available with every new-comer. After 5 or 6 people have disappeared in the narrow jug, Čelebi returns and pulls out all the stowaways again. — Another piece of the same kind is *Ḳanlï Nigâr* "Bloody Nigâr". The young Efendi is stopped in the street by two

ladies of his acquaintance, each of whom assert they have a good right to him and try to pull him with her. As neither will abandon him, women-neighbours are called in to decide which is worthy of the pretty young man. But when the neighbours decide in their own favour, the two women (one is called "Bloody Nigar") drag the young man into their house, undress him, thresh him and throw him out on to the street to punish him for his infidelity. A series of characters then come up who see the young man sitting naked and volunteer in turn to fetch his clothes out of the women's house; first comes Ḳaragöz, then Ḥadjiwad, then the drunkard, then a negro and next a dwarf. In the attempt to get the young man's clothes, they all meet in turn with the same fate. They are likewise undressed and thrown naked upon the street so that naked figures keep accumulating round the door of the house. In the end the problem is solved by the robber captain Ṣarï Efe from Brussa, whom the women respect, and the naked forms receive their clothes again. — Another is *Mandïra*: — Ḳaragöz finds himself malevolently abandoned by his wife and enters into relations with a lady who meets him on the street and takes her to his house. To his question whether she also has no lover she replies: "apart from him who comes afterwards, no one". Then various lovers of the woman come in turn, ask for Ḳaragöz's new house-mate and send all kinds of love-verses to her through him which the latter delivers to her in quite a distorted fashion, and ask her to take a trip with them to Mandïra. But they are always driven away by Ḳaragöz and to his repeated question whether there is still any one coming the woman only answers with the above phrase. This goes on for a considerable time until finally Ḳaragöz is turned out of his own house by the drunkard and then collects the admirers he has driven away in order to recapture his own house. In the mêlée which follows all take to their heels. — In the "Singer's competition" (*Ḳaragözün Shā'irliyi*) Ḳaragöz as a strolling singer (*'āshyḳ*) disposes of a number of droll singers who have assembled for a competition. In the "writer-play" (*yazïdjï oyunu*) he appears as a public letter-writer who writes letters which are absolute nonsense for his clients. — In the "Boat-play" (*ḳayïḳ oyunu*) he acts in his particular way as a ferry-man assisted by Ḥadjiwad. In the "Swing-play" (*salïndjaḳ oyunu*) he lets a swing to the most varied customers, lastly to a Jew who apparently dies on it and is buried by his co-religionists in the most ludicrous fashion and is then brought to life again. Another time we find Ḳaragöz as a rich gentleman (*Ḳaragözün Aghālïghï*) and in this capacity he has to deal with a series of people who wish to get positions in his service and with a beggar.

The series of incidents is often made up of vain attempts by Ḳaragöz to gain admittance to a house or a garden, for example in the "Garden-play" (*Baghče Oyunu*), in the "Bath" (*Ḥammam*), the "Surprise" (*Baṣḳïn*), or of his unsuccessful attempts to ascertain something about his wife's doings by questioning the neighbours, who in turn misunderstand his questions and give the stupidest answers ("The Well *Ḳuyu*").

Pieces in which we do not have this succession of incidents are, for example, "The Poplar" (*Kawli Kawaḳ*), in which an amusing act is spun round a brief touching episode: the singer Ḥasan's son is stolen by the spirit of the poplar but restored on the poetic appeal of his father. Ḳaragöz is first of all bewitched by the spirit of the poplar, then released by Ḥadjiwad and, when he wants to cut down the poplar as a punishment, he is seized by two Albanian foresters and punished with the bastinado, which is made the more severe in a comical way as the foresters continually go wrong in counting the blows and have to begin all over again. — In the "Circumcision" (*sünnet*) Ḳaragöz is circumcised when a full grown man and the usual games are played which are used to distract a boy from the pain. A shadow-player appears, for example, so that we have here a play within a play, also an *orta oyunu*-player, two jugglers, etc. — A kind of competition in magic between two witches, in which the young Efendi and his sweetheart and then Ḳaragöz and Ḥadjiwad are turned into animals, is the "Witch-play" (*Djadïlar*). — In the "Lunatic asylum" (*Tïmarkhāne*) Ḳaragöz is infected by some lunatics escaped from an institution and chained by Ḥadjiwad in an asylum and treated by a Frank doctor. — In the "Wrong Bride" (*Sakhte Gelin*) Ḳaragöz is brought as bride to the drunkard, in order to cure him of his craving. — Lastly the play the "Bar" (*Maikhāne*) shows the doings of a famous sot named Bekri in a bar. The pieces so far mentioned substantially form with several other less important and less well-known pieces (*Tokhmakdjïlar*, "The broken ones", *Ḳïrykhlar*, "The coffee-crushers", *Balïḳ Oyunu*, "The fish-play", *Djanbazlar*, "The rope-dancers", *Edjzakhāne*, "The chemist's shop") the usual repertoire of the shadow-players.

Very few of these plays have so far been published and translated and those usually in an abbreviated form. The texts printed in the east are almost all bad and defective. For further particulars see the *Bibliography*.

(H. Ritter)

ḲARAGÖZLÜ ("Black-eyed"), a Turkish people around Hamadān, to which they pay their tribute (Curzon, *Persia and the Persian Question*, London 1892, ii. 270 and 472). The Ḳaragözlü are several times mentioned in the history of the domestic troubles in Persia in the second half of the xviiith century; cf. J. v. Hammer, *Geschichte des Osmanischen Reiches*², Pest 1836, iv. 475; *Taʾrīkh-i Zandiye*, ed. Beer, Leiden 1888, p. 33, 42 and 93. In the first half of the xixth century the Ḳaragözlü are said to have numbered some 12,000 souls (C. Ritter, *Erdkunde*, viii. 404 and ix. 78). Ḳaragözlü is also the name of a small Turkish clan in Fārs, which belongs to the ʿInānlu group of the tribal confederacy Īlāt-i Khamsa (Tumanskiy, *Ot Kaspiyskago morya k Khormuzskomu prolivu i obratno*, St. Petersburg 1896, p. 78). A Tatar village in what was formerly the gouvernement of Yelisawetpol in the district of Djewanshir is also called Ḳaragözlü.

(W. Barthold)

ḲARA ḤIṢĀR, "Black Castle", the name of several places in Asia Minor, which, although distinguished by epithets, are often confused with one another; lists of them, none of which is complete, are given in a later addition to Yāḳūt's *Muʿdjam*, ed. Wüstenfeld, iv. 44, then by Ewliyā, *Siyāḥatnāme*, Constantinople 1314—18, ii. 384 = *Narrative of Travels by Evliya Efendi*, *O.T.F.*, London 1850, ii. 203 (cf. J. v. Hammer, *Gesch. d. Osm. Reiches*, Pest 1827—35, iv. 619), in Aḥmad Wafīḳ's *Lahdje-i ʿOthmānī*, Constantinople 1293, p. 911, and in ʿAlī Djawād, *Taʾrīkh we-Djoghrāfiya Lughāti*, Constantinople 1313, i. 599. They are alike in being situated on heights, sometimes difficult of access and fortified; the majority date probably from the middle ages only and were mainly built as places of refuge for the inhabitants of the surrounding country during inroads which were continually made in the wars of the Byzantines with the Arabs and Saldjūḳs and later in the wars between the small states that arose in Asia Minor; many were later abandoned under the peaceful rule of the Ottomans and disappeared from our maps.

The most important places of this name are: 1. Ḳara Ḥiṣār-i Ṣāḥib (in Nashrī, *Z.D.M.G.*, xiii. 193 = Leunclavius, *Hist. Musulm.*, Frankfort 1591, col. 140, Ṣāḥibīn Ḳara Ḥiṣārī; Saibearacar in Caterino Zeno, *Commentarii del Viaggio in Persia*, Venice 1558, fol. 14ᵇ), also called Afiūn Ḳara Ḥiṣārī ("the opium K. Ḥ."). The former name is derived from a notable man of the last period of the Saldjūḳs of Ḳonya, Ṣāḥib Atā' Fakhr al-Dīn ʿAlī Beg (d. 687 = 1288/9), who had retired there with his treasures before the Ḳaramānians and Mongols and whose successors ruled the town and district under the protection of the Germiyān-Oghlu of Kütāhya (Houtsma, *Recueil de textes rel. à l'hist. des Seldjoucides*, iv. 308, 325, 327, 334, where Ḳ. Dewele means this Ḳ.; Ibn Faḍl Allāh, *Masālik al-Abṣār*, transl. by Quatremère in the *N.E.*, xiii. 350, 357; Aḥmad Tawḥīd in the *Revue Historique publiée par l'Institut d'Histoire Ottomane*, first series, p. 563 *sq.*). The popular name Afiūn Ḳara Ḥiṣār later became generally used in place of Ḳ. Ḥ. Ṣāḥib, which is still the official name. Afiūn Ḳ. takes its name from the extensive cultivation of opium in the neighbourhood which is mentioned as early as Belon, *Les observations de plusieurs singularités et choses mémorables*, Paris 1555, fol. 183ᵃ; cf. Blau in the *Z.D.M.G.*, xxiii. 280.

Ḳara Ḥiṣār-i Ṣāḥib is now identified with the Byzantine fortress Akroinós, Akroïnoi, in the vicinity of which the legendary Saiyid Baṭṭāl in 739 perished with his followers on a campaign against the Byzantines (Theophanes, *Chronogr.*, ed. de Boor, i. 390, 411) and where the Comnenus Alexius I negotiated with the Saldjūḳ Sulṭān in 796 (Anna Comnena, *Alexias*, ed. Reifferscheid, ii. 285); in the course of the xiiith century it must have been taken from the Byzantines by the Germiyān-Oghlu. Khiḍr Pasha (d. 750 = 1349), son of Sulaimānshāh of Germiyān, and other members of this dynasty are mentioned as presidents (*Čelebi*) of the Mewlewī settlements in Ḳ. (cf. Ghālib Dede, *Tadhkira-i Shuʿarā-i Mewlewiye*, MS., N⁰. 1257 of the Vienna Nat. Libr., fol. 54ᵃ and 90ᵃ = ʿAlī Enwer, *Samāʿkhāne-i Edeb*, Stambul 1309, p. 48 *sq.* and 102). During the invasion of Asia Minor by Tīmūr after the battle of Angora (1401) Ḳ. also was visited by the victor's raiding parties (Sharaf al-Dīn ʿAlī Yazdī, *Ẓafarnāme*, Bibl. Ind., Calcutta 1887—88, ii. 446, 457, 484, 492 = *Histoire de Timur-Bec* etc., Fr. transl. by Pétis de la Croix, Delf(t) 1723, iv. 21, 31, 60, 68; Dukas, *Hist.*, ed. Bonn, p. 77). In 832 (1428/9) the kingdom of the Germiyān-Oghlu passed to the Ottomans and Ḳ. with its lands became incorporated in a sandjaḳ of the eyālet of Anadolu (cf. *Djihānnumā*, p. 641). As a stronghold near the Ḳaramānian frontier it remained of military importance so long as Ḳaramān was still independent; at the beginning of the war with Uzun Ḥasan in 877 (1472/3) prince Muṣṭafā fell back on its defences and made raids from it upon the Ḳaramān-Oghlu who were allied to the Persians (ʿĀshiḳ Pasha Zāde, *Taʾrīkh*, Istanbul 1332, p. 177; Saʿd al-Dīn, *Tādj al-Tawārīkh*, i. 524; Caterino Zeno, *op. cit.*) and in 895 (1489/90) Ḳ. formed the base of the operations of the Hersek-Oghlu Aḥmad Pasha against the Egyptians who had invaded Ḳaramānia (Saʿd al-Dīn, *op. cit.*, ii. 65). But Ḳ. became still more important as a junction of the caravan routes leading from Smyrna to trading centres of the interior, like Angora, Ḳaisarīya, Tokat, etc. In recent years the Smyrna-Cassaba railway there joins the Anatolian railway system which starts in Stambul. On the dissolution of the old eyālet of Anadolu the sandjaḳ of Ḳ. was attached to the

province of Brussa; the town of Ķ. is the residence of the *mutaṣarrif*; its population was estimated at 25,000 in 5,000 houses (20,000 Muslims, 5,000 Armenians, some 300 Greeks), but later figures are not available.

Of the few relics of classical antiquity the majority must have been brought here from ruined sites in the neighbourhood, like Sandiklar (Prymnessos), Iscḥe Ķaraḥiṣār (Docimaeon) and Čifut Ķaṣaba (Synnada); the monuments of the time of the Germiyān-Oghlu, e. g. the Ulu Djāmiʿ of Khodja Beg and the tomb of Sulṭān Dīwānī, and the older buildings of the Ottomans have not yet been thoroughly investigated.

The feature of the town, the steep cone of trachyte which rises 650 feet above the level of the town which lies around it, with the late Byzantine defences renovated by the Germiyān-Oghlu, still bore in Niebuhr's time the name Esk Baran Ḳalʿesi, ("the fortress which affords shelter to the Beg"); this citadel was probably never really a permanent settlement and is now left to fall to pieces, although it has been from time to time used for the internment of political prisoners (ʿAshiḳ Pasha Zāde, *Tārīkh*, p. 243—4), the last occasion being in 1802 when French prisoners of war from Egypt were kept there. The "Arabic" foundation inscription at the entrance, which Niebuhr and Oberhummer saw, has not yet been copied.

Some 15 miles or 5 hours north of Ķara Ḥiṣār-i Ṣāḥib lies:

2. Isdje Ķaraḥiṣār — the correct name, not Eski Ķ., as in Hamilton, *op. cit.*, i. 461, 467, de Laborde, *op. cit.*, p. 68 *sq.*, Texier, *Description de l'Asie Mineure*, i. 145—152, and following them C. Ritter, *Kleinasien*, i. 605, 642 *sq.*, nor Itchki or Istya (Ramsay, *Mitt. Dtsch. Arch. Inst. in Athen*, vii. 132 *sqq.*, x. 348), nor again Ischischi (Körte, *op. cit.*, i. 88 *sqq.*) or Ishite K. (v. Diest, map in *Petermann's Mitteilungen*, Erg.-Heft Nº. 125 —, a village of 251 houses near the quarries of the ancient Docimaeon, from which the marble of Synnada came; the quarries have again been worked in modern times by European enterprise (*Sālnāme Brūsa*, 1325 A. H., p. 125).

3. Ķara Ḥiṣār-i Sharḳī, also called Shābīn (or Shebin, Shab) Ķara Ḥiṣār, or Ķaraḥiṣār-i Shābkhāne, from the alum-mines in the neighbourhood which were worked in ancient times and still more in the middle ages and produced a particularly esteemed kind of this mineral.

As was first pointed out by Blau in 1865 on the authority of a Byzantine inscription the town is the ancient and mediaeval Colonia and bore this name down into modern times. After the reforms of Justinian it belonged to Armenia Prima; in the *Notitiae Episcopatuum* it appears as the see of the bishop of Armenia Secunda. In 162 (778) the town was captured by Yazīd b. Usaid al-Sulamī in a raid on the Pontus (Ghévond, *Hist. des Guerres des Arabes en Arménie*, p. 106, quoted by Blau; cf. al-Ṭabarī, ed. de Goeje, iii. 493; cf. Ibn Khordādhbeh, *B. G. A.*, vi. 108). On the other hand the Kalūniya which, according to Eutychius, ed. Selden and Pococke, p. 385, was taken by the Sāsānid Shāpūr with Cappadocia and the Ḳalūniya, which the Ḥamdānid Saif al-Dawla captured in 335 (946/7) (*Z.D.M.G.*, x. 467; Yāḳūt, *Muʿdjam*, ix. 168) are almost undoubtedly identical with Colonia Cappadociae, which, according to Niketas (p. 72 and 689), is the later Aḳ-sarāi. This strong fortress must have been lost to the Byzantines after the battle of Manzikert. The Dānishmand-Oghlu first established themselves there (Anna Comnena, *Alexias*, ed. Reifferscheid, ii. 164); later we find the Saltuḳids of Erzerūm in possession (Niketas Chon., *Ann.*, ed. Bonn, p. 185, 294) who were dispossessed in 598 (1201/2) by the Saldjūḳs of Ḳonya; they in turn were succeeded by the Mangudjaḳs, vassals of Ḳonya. After the fall of the Sulṭanate of Ḳonya, the descendants of Eretnā ruled there and various princes of the house of the Aḳ-Koyunlu and Ḳara-Koyunlu (cf. Saʿd al-Dīn, i. 287 = ʿAlī, *Kunh al-Akhbār*, v. 178 = Leunclavius, *Hist. Musulm.*, col. 474, 12 *sqq.*); in 1473 after the battle of Terdjān the town was taken by Meḥemmed the Conqueror and incorporated in the Ottoman empire (ʿAshiḳ Pasha Zāde, *Tārīkh*, p. 378 and 181, who describes the town as the Ḳara Ḥiṣār of Kamākh, and Saʿd al-Dīn, i. 541 and 542; Leunclavius, *Hist. Mus.*, col. 589, 11 *sqq.*). Ḳara Ḥiṣār-i Sharḳī formed a sandjaḳ of the eyālet Erzerūm (Ewliyā, *Travels*, ii. 205; Ḥādjdjī Khalīfa, *Djihānnumā*, p. 422, 424); this district now belongs to the wilāyet of Sīwās and the seat of government is in the town of the same name.

The old name Colonia was taken over by the Saldjūḳs in the Armenian form Koghōniya, which we find in Ibn Bībī's chronicle (Houtsma, *Recueil*, iii. 291—295, iv. 151, 152, 319) and on the coins of Eretnā (Aḥmed Tawḥīd, *Meskūkāt-i Ḳadīme-i Islāmiye*, iv. 439). If, as seems almost certain, the Mavro-Kastron mentioned by Michael Attaliota, ed. Bonn, p. 125, and Skylitzes, p. 679, "on a high hill difficult of access in Armenia", is identical with Colonia, Ḳara-Ḥiṣār seems to have already been in use alongside of Colonia; among the Greeks of the xviii[th] century we again find the form Gαrαsαris, corrupted out of Ḳara Ḥiṣār, in use as well as Colonia.

The imaginative description of the town in Ewliyā Čelebi and scanty references in the *Djihānnumā*, both of the second half of the xvii[th] century, are corrected and supplemented by the descriptions of modern travellers. The town, built on

the slopes of a hill below the ancient fortifications possessed — according to Cuinet, with whom travellers agree — 12—13,000 inhabitants (7500 Muslims, 3000 Armenians and over 1500 Greeks) and was the residence of the *mutaṣarrif* and of an Armenian Bishop and of the Greek Metropol of Nicopolis; there is no more modern information available. The citadel surrounded by a ring of walls, in which old well-shafts suggest a pre-Hellenic settlement, is no longer inhabited; within this fortress on the summit of the hill lies a small fortified redoubt with an octagonal watch-tower. The defences date from the Byzantines and were further developed by the Muslim rulers.

Schiltberger (*Reisebuch*, ed. Langmantel, p. 57) calls Karasserie "ein fruchtpare lant an weinwachs" (a land rich in vine-yards); more famous than the vine-yards which still exist were the rich alum-mines in the adjoining village of Shabkhāne, in which were obtained the valued "alume de rocca di Colonna" (i. e. Colonia) (Pegolotti in Heyd, *Histoire du Commerce du Levant*, ii. 565); these are the *aluminis minera iuxta Sabastiam quae valet unum argentarium* of Vincentius Bellovacensis, xxxi. col. 143; they were also mentioned by Rubruquis (ed. Bergeron, p. 147). Meḥemmed the Conqueror took possession of them for the state treasury (Saʿd al-Dīn, i. 342) and from the rent they yielded when farmed out the garrison of the fortress was later paid (*Djihānnumā*, p. 424).

4. Ḳara Ḥiṣār-i Behrāmshāh (Bairāmshāh) is first mentioned by Ḥamdullāh Mustawfī, *Nuzhat al-Ḳulūb*, p. 97; Sīdī Reʾīs (xvith century) visited the place on his journey from Siwās to Ḳonya and Ḳirshehir (*Mirʾāt al-Mamālik*, Stambul 1312, p. 96). In Kātib Čelebi's time (xviith century) it was a ḳaḍā of the eyālet Siwās (*Djihānnumā*, p. 622); it is now the residence of the *Mudīr* of the nāḥiye of the same name of the ḳaḍā of Maʿden in the sandjaḳ Yozghad in the wilāyet of Angora, a day's journey east of Yozghad. The place is not marked on our maps.

5. Ḳara Ḥiṣār-i Demirdji, a village in the Ḳaḍā Čorum of the wilāyet of Angora, a few hours north of the famous ruined site of Üyük, given in the *Djihānnumā*, p. 625, among the Ḳaḍā's of the sandjaḳ of Čorum. W. Hamilton in 1838 was the first European to visit and describe it (*Researches etc.*, i. 379, 381, 403; following him Ritter, *Kleinasien*, i. 147, 149 *sqq.*), next came in 1859 H. Barth (*Reise von Trapezunt nach Scutari*, p. 42) and A. D. Mordtmann (in *Ausland*, 1863, p. 785; *Sitzungsber. Bayr. Ak.*, 1861, p. 191 *sq.*). The ruined site of Ḳara Sarāy which belongs to it is mentioned under this name in the *Djihānnumā* also. On our maps this Ḳara Ḥiṣār appears without an epithet; it may be identical with the Ḳara Ḥiṣār which the older Ottoman chroniclers mention in connection with the fightings of prince Muḥammad with the Yürük chief Gözleroghlu about 805 A. H. (Leunclavius, *Hist. Musulm.*, col. 386; Saʿd al-Dīn, i. 209).

6. Ḳara Ḥiṣār-i Teke (*Djihānnumā*, p. 638; Aḥmad Wafīḳ, ʿAlī Djawād, *loc. cit.*) also called Ḳara Ḥiṣār-i Adalia (Ewliyā, *Travels etc.*, ii. 705), is mentioned by Yāḳūt, *Muʿdjam*, iv. 44 as a village a day's journey from Anṭākiya (or rather Anṭāliya). In the time of Ibn Faḍl Allāh a certain Zakariyā, a former Mamlūk of the lord of Adalia, had made himself independent there and ruled a small territory which included 3 towns and 12 strongholds (*N. E.*, xiii. 372 *sq.*). The place is still mentioned in the surveys of Meḥemmed the Conqueror (*Revue Historique publ. par l'Institut d'histoire Turque*, part ii. 76) and as a ḳaḍā of the sandjaḳ of Adalia in the *Djihānnumā*, *loc. cit.* According to Aḥmad Wafīḳ, Ḳ. is the capital of a nāḥiye of the ḳaḍā of Sirik in Adalia, in the wilāyet of Konya; the *Sālnāme* of this wilāyet, however, only knows the place-name Sirik, *sc.* is the older name found on our maps. Sirik, a miserable village on a tributary of the Köprü Ṣu (Eurymedon), is the ancient Selge (Ritter, *Kleinasien*, ii. 515 *sqq.*, 653; G. Hirschfeld, *Reise im südwestlichen Kleinasien* in the *S. B. Pr. Ak. W.*, 1875, p. 134). The similarity of names is accidental because Sirik is originally the name of a Yürük clan.

Besides these towns of the name Ḳara Ḥiṣār and Dewele Ḳ. dealt with separately (see above, i. 952) the following are also given:

Ḳara Ḥiṣār in the land of Osman (Yāḳūt, *op. cit.*); this may refer to Ḳaradja Ḥiṣār, also called Ḳaradja Shehir near Inönü in the ancestral lands of the Ottoman Sulṭāns for which even in the older historians Ḳara Ḥiṣār is often written.

Ḳara Ḥiṣār in the land of Ibn Torghut (Ibn Faḍl Allāh, *op. cit.*, p. 350): no other reference is known, unless it is an older name for Torghudlu Ḳaṣabasi near Manisa.

Ḳara Ḥiṣār, capital of the Ḳaḍā of Naʿllu-khān, wilāyet of Angora (Aḥmad Wafīḳ, *op. cit.*), not given in the *Sālnāme* nor marked on the maps.

Ḥammām Ḳara Ḥiṣāri, village of the nāḥiye of Günyüzü, Ḳaḍā of Siwri Ḥiṣār, wilāyet of Angora (*Sālnāme*); also on the maps.

Wān Ḳara Ḥiṣāri (Ewliyā, *op. cit.*); no other reference known. (J. H. MORDTMANN)

KARAK. [See KERAK].

ḲARAḲALPAḲ ("black caps"), a Turkish people in Central Asia. In the Russian annals a people of this name (Černii Klobuki) is mentioned as early as the twelfth century; whether these "black caps" are identical with the modern Ḳaraḳalpaḳ cannot be definitely ascertained. It is not till the end of the xviith century that we find records of the Ḳaraḳalpaḳ in Central Asia. According to the embassy report of Skibin and Troshin (1694), they then lived on the Sir Daryā, 10 days' journey below the town of Turkestān. There they are again mentioned in the xviiith century as neighbours of the land of the Khāns of Khīwa; about 1722 a treaty was concluded by the ambassador Vershinin between Peter the Great and the Khān of the Ḳaraḳalpaḳ, Abu 'l-Muẓaffar Saʿādat ʿInāyat Muḥammad

Bahādur (*Polnoye Sobraniye Zakonow*, 1722, Nº. 4101). The eastern part of the lands of the Volga Kalmucks between the Ural mountains and the Volga used to be raided by the Ḳarāḳalpaḳ. Even then the Ḳarāḳalpaḳ lived not only by their herds and by their raids but also by agriculture — with artificial irrigation of their fields — and by fishing (on Lake Aral). They are said to have migrated to Central Asia from the Volga region. About the middle of the xviiith century the winter quarters of a body of the Ḳarāḳalpaḳ were on the central course of the Sir at Khawās (north of Ura-Tübe); the prince (*tura*) of these Ḳarāḳalpaḳ entered into an alliance in 1755 with the *Atalïḳ* of Bukhārā, Muḥammad Raḥīm; 5,000 families of the Ḳarāḳalpaḳ were settled at Samarḳand and received from there 400 ass-loads (*kharwār*) of corn; the son of the *tura* joined the army of the *Atalïḳ* (Muḥ. Wafā Karmīnagī, MS. of the Asiatic Museum, c. 581 b, f. 148b). Radloff (*Aus Sibirien*, Leipzig 1893, i. 228) visited in 1868 north-east of Samarḳand some settlements of the Ḳarāḳalpaḳ, who had immigrated "from the Amū-Daryā not long ago". A considerable number (about 20,000) still live in Farghāna at the present day. The Ḳarāḳalpaḳ are said to have been driven out of the lower valley of the Sir Daryā by the Ḳazaḳ towards the end of the xviiith century; they are still mentioned in the xixth century a little farther south on the (now dried up) Yeni Daryā à propos of the campaigns of Muḥammad Raḥīm, Khān of Khīwa, against the land of Kungrat (1807—1811). The Ḳarāḳalpaḳ were then subject to the Khān of Kungrat and lived, in part, on the lower course of the Amū Daryā, especially on the arm of the river known as the "Ḳazaḳ"; there they succeeded in holding their own even at a later date against the Ḳazaḳ. After the union of Kungrat with Khīwa (1811) the Ḳarāḳalpaḳ also had to submit to the Khān of Khīwa, but made frequent attempts to throw off this yoke; in 1827 the town of Kungrat was even captured by them for a time; after the suppression of this rising a part of the Ḳarāḳalpaḳ migrated to Farghāna (*History of Khīwa*, MS. of the Asiatic Museum, 590 ob, f. 300b—305b). In 1855 the leader of the rebel Ḳarāḳalpaḳ, Ir-Naẓar-bī, adopted the title of Khān (*ibid.*, f. 516a); the fortress built by him near where the Ḳazaḳ flows into Lake Aral, the ruins of which still bear his name, did not fall till the following year, and then through treachery, into the hands of the Khīwans. After the Russian conquest of Khīwa in 1873, when the Khān had to cede to Russia all his possessions east of the main arm of the Amū and the most north-western arm of its delta (Talïḳ or Taldïḳ), the land of the Ḳarāḳalpaḳ also became Russian. The area, then separated from Khīwa, was first administered as a separate circle (*otdyel*), later as part of the gouvernement of Sir Daryā; after the revolution it was constituted a separate territory (*oblast'*). The Ḳarāḳalpaḳ form about half the population there, according to the latest census over 110,000 souls. In addition there are about 20,000 Ḳarāḳalpaḳ in Khīwa and as many in Farghāna.

The dialect of the Ḳarāḳalpaḳ was first investigated in 1903 by S. Ilyelyayew; some of the texts then written down were later published (1917) in the *Protokoli Zakaspiyskago Kružka Lyubitéley Arkheologii* etc., parts 3 and 4. Information on the Ḳarāḳalpaḳ is given in all books on Turkestān and its population; e. g. Fr. v. Schwartz, *Turkestan*, p. 17; Kostenko, *Turkestanskiy Kray*, St. Petersburg 1880, i. 329 *sq.*; Masal'skiy, *Turkestanskiy Kray*, St. Petersburg 1913, p. 390 *sq.*; *Aziatskaya Rossiya*, St. Petersburg 1914, an official publication, i. 163 *sq.*; Vambéry, *Das Türkenvolk in seinen ethnologischen und ethnographischen Beziehungen*, Leipzig 1885, p. 373 *sq.* No special monograph has so far been devoted to the study of the Ḳarāḳalpaḳ people. (W. Barthold)

ḲARA KHALĪL. [See Čendereli].

ḲARA KHITĀI (or Ḳara Khitāi), the usual name since the vith (xiith) century in Muḥammadan sources for the Kitai people, mentioned by the Chinese from the eighth century A. D. onwards, who were probably Tungus (according to another view Mongol). In the Turkish Orkhon inscriptions the Kitai are several times mentioned as enemies of the Turks in the extreme east of the area visited by the Turks in their campaigns; according to Chinese sources, they lived in the southern part of Manchuria. From the beginning of the tenth century the Kitai carried on a campaign of conquest, conquered the northern part of China and founded a dynasty which as a Chinese ruling house was called Liao (916). Even the founder of the dynasty, Apaoki, was able to subdue Northern Mongolia, which had been conquered by the Kirghiz about 840; Apaoki himself visited Karakorum in 924 and is said to have received an Arab, i. e. Muḥammadan, embassy there (Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, London 1910, i. 265), the first record of the appearance of Muslims in this region; it was probably only a trading caravan (Mongolia, of course, lay outside the usual range of Arabic geographical literature, for which the Kirghiz were the extreme north-eastern people). The house of Liao succeeded in holding its ground against the national Sung dynasty which had arisen in South China since 960; not till about 1125 were the Kitai driven from China and Eastern Asia by another Tungus people, the Djurdjen.

Even before settling in China the Kitai had adopted Chinese civilisation to a greater extent than other nomadic peoples; in contrast to the cult of the rising sun predominant among the other nomads of the East, they had borrowed from the Chinese the cult of the South; with this fact is no doubt connected the spread of this cult among the Mongols, and throughout the Mongol Empire in Central Asia generally (see W. Barthold's essay in the *Zapiski vost. otd. arkh. obshč.*, xxv. 55 *sq.*). As the Djurdjen did later, the Kitai formed a system of writing of their own based on the Chinese hieroglyphic system (about 920 A.D. with some 1000 characters). A statement in the official "History of the Liao" (*Liao-shi*) where, according to de Groot's translation, there is mentioned an alphabet prepared for the Kitai ("small characters, few in number and all arranged in rows") by the foreign wise man, Tiet-ts'ih (according to F. W. K. Müller, perhaps *tarsā* = Christian), is explained by Marquart to mean that about this time (the statement refers to the reign of Apaoki) the sounds of the language were reproduced in an alphabet of western origin (perhaps modelled on the Uighur) (*Sitzungsber. d. Preuss. Akad.*, 1912, p. 500 *sq.*); documents or inscriptions in this alphabet have so far not been found. On the other hand we have specimens of Kitai writing in the alphabet

modelled on the Chinese. Quite recently P. Pelliot (*Journ. Asiat.*, Ser. 11, iv. 174) mentions a Chinese "maigre vocabulaire" of the language of the Kitai.

As early as the first quarter of the eleventh century (according to some 403 = 1012/3, according to others 408 = 1017/8) an attack was made by the Khitā or Kitai (not yet called Karā Khitāi) against Muslim lands; they are said to have advanced within 8 days' journey of Balāsāghūn [q. v.] and were only driven back from there by the Ilek Khāns [q. v.]. In what connection this campaign stands with events in Eastern Asia is not known; Marquart's attempt (*Osttürkische Dialektstudien*, Berlin 1914, *Abh. der Kön. Ges. der Wiss. in Göttingen*, *phil.-hist. Klasse*, New Series, vol. xiii., N°. 1, p. 194 *sq.*) to find with the help of de Groot some reference in the *Liao-Shi* which might be connected with this campaign has not been successful. On the campaign itself see Ibn al-Athīr, ed. Tornberg, ix. 209 *sq.*; Marquart, *Osttürk. Dialektst.*, p. 54; Barthold, *Turkestan* etc., ii. 294.

More important for the Muslim world was the western movement of the Kitai after the destruction of their empire in China by the Djurdjen (in Muslim sources later called Čurčit) about 1125. It was not the migration of a whole people; a part of the Kitai remained in China under the rule of the Djurdjen and at a later date, in the time of Čingiz Khān [q. v.], took the opportunity to rebel against the dynasty and to restore the kingdom of the Kitai as a Mongol vassal state. Kitai is, of course, still the usual name for China among Mongols and Russians; in Muḥammadan sources the Kitai who remained in China as well as those who migrated westwards are called Karā Khitāi. The Chinese historians continue to regard the Kitai dynasty expelled from China as a Chinese imperial dynasty under the name "Western Liao", with posthumous titles, reign periods, etc. — probably the only example of the members of a dynasty of foreign origin being regarded as Chinese emperors even after their expulsion from China. But the statements of the Chinese annals regarding the Western Liao are very inaccurate as regards chronology and in other respects also very meagre. The Chinese can only report one march of the Kitai through the modern Chinese Turkestān; from Muḥammadan sources we know that it was not this migration that led to the formation of a Kitai kingdom in the West; on the contrary, these Kitai were completely defeated by Arslān Khān Aḥmad b. Ḥasan, prince of Kāshghar, a few days' journey beyond this town. Ibn al-Athīr (cf. the account in his *Chronicle*, xi. 55) places this battle in the year 522 (1128); perhaps it took place a few years later, as it is mentioned as a very recent event in the letter sent in name of Sulṭān Sandjar to the Caliph's vizier in Ramaḍān, 527 (July 6—Aug. 4, 1133) (Barthold, *Turkestan* etc., i. 35 and 37). Presumably another branch of the migration of the Kitai by a more northern route met with more success; we get the fullest account of it from Djuwainī (*Taʾrīkh-i Djahān-Kushāi*, ed. Mīrzā Muḥ. Ḳazwīnī, ii. 86 *sq.*; translation in d'Ohsson, *Hist. des Mongols*, i. 441 *sq.* and following him in Bretschneider, *Mediaeval Researches* etc., i. 225 *sq.*). According to this account, the Karā Khitāi advanced through the land of the Kirghiz (on the Yenisei), then south-westwards to the region of the modern Čugučak, where they built the town of Imil. From there as a base they occupied without opposition the town of Balāsāghūn [q. v.], whither the Muslim ruler of this region of the Ilek Khān dynasty had summoned them against his enemies; it was only from here, i. e. from the North, that they conquered Kāshghar and Khotan and later Mā-warāʾ-al-Nahr and Khwārizm; the king of this land, Atsïz (1128—1156), had to bind himself to pay a yearly tribute of 30,000 dīnārs. On the fighting in Mā-warāʾ-al-Nahr and Khwārizm we are particularly well informed by Ibn al-Athīr as well as by a few earlier sources like ʿImād al-Dīn (Houtsma, *Recueil de textes rel. à l'hist. des Seljoucides*, vol. ii.) and Rāwandī (*Rāḥat al-Ṣudūr*, ed. Muḥ. Iḳbāl, esp. p. 172 *sq.*); the material is utilised in Barthold's *Turkestan* etc. and in Marquart's *Osttürkische Dialektstudien*. In Ramaḍān, 531 (May-June, 1137) the Khān of Samarḳand, Maḥmūd, was defeated at Khodjand and on Ṣafar 5, 536 (Sept. 9, 1141) his powerful overlord, Sulṭān Sandjar, in the desert of Ḳaṭwān north of Samarḳand. After this the kingdom of the Karā Khitāi stretched from the land of the Kirghiz (on the Yenisei) in the north for a time as far as Balkh in the south, from Khwārizm in the west to the land of the Uighurs (see BISHBALÏK) in the east, with its ruler's residence on the Ču [q. v.] at Balāsāghūn. The ruler bore the title *Gūrkhān*, which is explained by Djuwainī (ii. 86 below) as "Khān of Khāns" (*Khān-i Khānān*); the word *Gūr* is perhaps reproduced by the Chinese Ye-lu (family name of the Liao emperors). Unlike the other nomad empires no fiefs were granted either to the relatives of the *Gūrkhān* or to other persons of high rank; the first *Gūrkhān* is said to have allowed no one command of more than 100 men. On the other hand almost everywhere (Balāsāghūn perhaps formed the only exception) the native dynasties continued to exist as vassals of the *Gūrkhān*; these vassal states probably formed the greater part of the empire. The level of taxation was, as in China, fixed by the number of houses; a dīnār was levied on every house. The language of the government seems to have been Chinese. The son-in-law of the *Gūrkhān* is called *fūmā* (Chinese "son-in-law") in Djuwainī (thus Defrémery in his note on Mīrkhond, *Hist. des Sultans du Kharezm*, Paris 1882, p. 124; in the edition by Muḥ. Ḳazwīnī, ii. 17, 18 and 20, *furmā*); in the account of the Khitā in ʿAwfī (*Lubāb al-Albāb*, ed. Browne, ii. 385) we appear to find the well-known Chinese word *paiza* (so to be read for *bā mujza*), later also adopted by the Mongols. Even under the rule of the pagan Karā Khitāi the Muslims appear, however, to have retained their leading positions; the wealthy merchant prince, Maḥmūd Bāī, is mentioned by Djuwainī (ii. 89) as vizier of the last *Gūrkhān*. In Kāshghar about this time we find a Christian bishop (Assemani, *Bibl. Orient.*, III, part ii. 502); to the same period also belong the oldest Christian inscriptions on the Ču (*Zapiski vost. otd. arkh. obshč.*, viii. 26; W. Barthold, *Zur Geschichte des Christentums* etc., Tübingen 1901, p. 58); but Islām also seems to have made progress during this period. In the story of the conquests of the Karā Khitāi, the country of the princes of Balāsāghūn appears as the frontier land of the Muslim world; in the beginning of the xiiith century two Muḥammadan principalities are mentioned north of the Ili [q. v.] (one in the northern part of the

modern Semiryečye and one at Kuldja). After the destruction of the kingdom of the Ķarā Khitāi and of that of the Naiman prince Kūčlük, which succeeded it although over a much smaller area, the last Ķarā Khitāi, as is apparent from the account of the journey of the Chinese envoy Wu-ku-sun (1220—1221), had to adopt Muslim customs and Muslim garments (Bretschneider, *Mediaeval Researches* etc., i. 29). All this says little in favour of Marquart's (*Osttürkische Dialektstudien*, p. 209) idea of the civilization of the Ķarā Khitāi, which, according to him, stood "brilliantly out from its miserable surroundings".

The first *Gūrkhān* died, according to Ibn al-Athīr, xi. 57, in Radjab, 537 (Jan. 20—Febr. 18, 1142); he was followed by his widow "and his son Muḥammad". Marquart wants to read *ibnatu ʿammihī* for *ibnuhu Muḥammad* (*Osttürk. Dialektst.*, p. 237); but it is nowhere stated that the wife of the *Gūrkhān* was also his cousin; moreover, according to Chinese sources, she was only regent for her son who was still a minor. The latter, of course, cannot have been called Muḥammad; but how the text is to be emended must remain unsettled (the reading *wa-ibnuhu Muḥammad* is also found in the Būlāķ edition, xi. 36). In the Muḥammadan sources we find no complete list of the *Gūrkhāns* with particulars of their dates; the only references to these are scanty and contradictory. Djuwainī in his chapter on the Ķarā Khitāi (ii. 88 *sq.*) only mentions the widow and the brother of the first *Gūrkhān*; in another passage (ii. 17) he also mentions, as do the Chinese annals, the rule of the daughter of the first *Gūrkhān*; the same queen is mentioned by Rāwandī (*Rāḥat al-Ṣudūr*, p. 174), but he makes her reign down to his time, i. e. to the beginning of the thirteenth century, which cannot be correct. A more accurate list of the *Gūrkhāns* is given by the Chinese annals, but their tradition also is obviously inaccurate, especially in its chronological data. Marquart's endeavour (*loc. cit.*) to bring the Muḥammadan and Chinese sources into agreement and thus to date the reigns of the different rulers seems in general to be successful. According to him, the widow of the *Gūrkhān* reigned till 1150, his son till 1163, his daughter till 1178 and his grandson till 1211. The latter is mentioned in the Chinese annals and, according to the usual pronunciation of the characters concerned, was called Či-lu-ku; Marquart (following De Groot) reads Tīgu.

Under this ruler took place the fall of the Khitāi kingdom, brought about partly by the activities of the Muslim rulers in the west and partly by the Mongol inundation, then just breaking; cf. the accounts thereon in Barthold and Marquart and also the articles BUKHĀRĀ, BUKHĀRĀ, ČINGIZ KHĀN and MUḤAMMAD B. TAKASH. As happened elsewhere also, it was here not always the conflict of religions that was the deciding factor. The Khwārizmshāh Muḥammad, afterwards leader of the Muḥammadan movement, relied in the early years of his reign for assistance against his Muslim enemies on the pagan Ķarā Khitāi, as well as the spiritual rulers (*ṣudūr*) of Bukhārā. The rising of ʿOthmān, prince of Samarķand, against the Ķarā Khitāi is explained by Djuwainī (ii. 91) as due to the refusal of the *Gūrkhān* to give his daughter in marriage to this prince. Later, under the influence of the estrangement between ʿOthmān and his Muḥammadan liberator and father-in-law Muḥammad, this matrimonial alliance nevertheless took place (*ibid.*, ii. 124); the rising of the Muḥammadan population of Mā-warāʾ al-Nahr against their liberator had to be put down with ruthless vigour and bloodshed (609 = 1212). In contradiction to the view of these happenings given by Djuwainī, the *Gūrkhān* was in reality deprived of his power a year earlier, in 1211, by Kūčlük, prince of the Naiman. The attitude of this originally Christian, later pagan (probably Buddhist) ruler to the Muslim population did not always remain uniform; he appears as an ally of the Muslim enemies of the *Gūrkhān* and as an ally of the prince of Kāshghar (cf. the text of Djamāl al-Ķarashī in Barthold's *Turkestan* etc., i. 133). He afterwards became a most bitter enemy of Islām. In his reign took place the first and only persecution of Islām in Central Asia; public Muslim worship was suppressed, the Muslims forced either to adopt Christianity or the religion of the pagans or at least to adopt the clothing of the Ķarā Khitāi. Those who resisted were, like the Protestants under Louis XIV, punished by having soldiers billetted on them. The only source on this point is Djuwainī (i. 49 *sq.*). By Čingiz Khān's victory over Kūčlük the religious persecution was ended; the former Muslim subjects of the Ķarā Khitāi, who had as early as 1211 been in negotiation with Čingiz Khān, received complete freedom of religion under Mongol rule. The Muslim dress was now adopted (cf. above) by the remaining Ķarā Khitāi, which was the very reverse of Kūčlük's law. Neither inscriptions nor buildings nor any other trace whatever of the rule of the Ķarā Khitāi have survived in Central Asia.

On the rule of a former "Amīr" of the *Gūrkhān* and his descendants in Kirmān see BURĀĶ, ḤĀDJIB and KIRMĀN. (W. BARTHOLD)

ĶARA KIRGIZ. [See KIRGIZ].

KARAKOL, KARAGHUL. [See ĶARAUL].

ĶARAĶORUM (ĶARAĶORAM), a chain of mountains in the centre of Asia lying north of and almost parallel to the Himalaya. The range extends westwards as far as 73° of Long.; it has not yet been definitely ascertained how far it runs eastwards. At one time the eastern limit was thought to be the pass of the Ķaraķorum, but, according to the views of several famous geographers, the range runs much farther into Tibet and the Tang-la should, they think, be regarded as a part of the Ķaraķorum. This idea was first put forward by Klaproth in 1836 and is now held by Burrard, Sven Hedin and others who further regard the Trans-Himalaya as belonging to the Ķaraķorum system. If this is accurate, the whole system would be about 1250 miles long.

The highest elevations are found in the part west of the pass of Ķaraķorum. There we find several peaks over 26,500 feet high and countless summits over 23,000 feet. The highest peak — probably the second highest in the world — is Mount Godwin Austen, indicated on the *Survey of India* maps as K 2, but which seems to have been long known as Chogo-ri among the natives. This giant attains a height of 28,265 feet.

This western part of the Ķaraķoram possesses a wild and imposing natural beauty; it is covered with eternal snows over a considerable extent. The snow line runs from 15,500 feet north of the principal chain to 17,000 in the south.

If we exclude the polar regions the largest glaciers in the world are found in this part of the Ķaraķorum. The Siachen glacier is 45 miles long and covers a surface of about 1,000 square miles. The Baltoro, Hispara and Biafo glaciers are only a little less than the Siachen. The plateau out of which rises the Ķaraķoram has an average height of 10,000 feet. The whole region is excessively dry because the rain (snow, hail) falls almost exclusively on the high mountains. The vegetation in the valleys is very slight and is confined to the vicinity of torrents and streams. At the terminations of the glaciers we find — very often on a little plain — a very beautiful alpine flora.

The Ķaraķorum is the most important watershed in Central Asia, dividing the rivers which running northwards empty their waters into the deserts of this part of the world, and running southwards into the Indian Ocean.

The principal pass is the *col* of Ķaraķorum (18,550 feet), through which runs the important trade route between Chinese Turkestan and Kashmir. It is difficult and dangerous. In their long journey countless beasts of burden perish of exhaustion or in the avalanches. The mountains take their name from the pass. But, as Ķaraķorum means "black debris", the name is not very appropriate. It is found for the first time in a map by Elphinstone published in 1815. On this map the range in question is indicated by the name Moor Taugh or Karrakoorrum Mountains.

The first traveller to write on the mountains now called Ķaraķorum was Mīrzā Ḥaidar, a prince of Chinese Turkestan, à propos of his journey from Yarkand to Leh, capital of Ladak, in 1533. The exploration proper of the Ķaraķorum only began in 1808 when Elphinstone visited these regions. The more systematic and detailed exploration of the high mountains proper was only begun in 1892 by Sir Martin Conway's expedition, which has been followed by several others.

(Ph. C. Visser)

ĶARAĶORUM, a town in Mongolia on the Orkhon, in the thirteenth century for a short time (about 1230—1260) the capital of the Mongol Emperors, now in ruins. The fullest accounts of the town are given among European travellers by Rubruk (Latin edition in *Recueil de Voyages et de Mémoires*, 1839, iv. 345 *sq.*; transl. by W. W. Rockhill, Hakluyt Society, 2nd series, especially p. 220 with the translator's notes) and among Muslim historians by Djuwainī [q. v.], *Ta'rīkh-i Djihān Gushā*, ed. Mīrzā Muḥammad Ḳazwīnī, especially i. 169 *sq.* and 192. The fullest account of the ruins (by the members of the Orkhon expedition of 1891) is in *Sbornik Trudow Orkhonskoy Ekspeditsii*, part i. (1892); in Radloff's *Atlas der Alterthümer der Mongolei* is a plan of the ruins (Pl. xxxvi.) and a squeeze of a large (not completely preserved) Persian inscription (Pl. xlviii.); on the latter see E. Blochet in *T'oung Pao*, 1897, viii. 309 *sqq.* As Djuwainī rightly remarks, a little below Ķaraķorum there were the ruins of the old (viiith—ixth century) Uighur capital Ordu baliķ ("court-town") which, from being in ruins, was then called Mo-baliķ ("bad town") and is now known as Khara-Balgasun ("black town"). The city built by the Mongol Emperor Ögedei (1229—1241) was also at first officially known as Ordu-baliķ; the name Ķaraķorum was a popular one. On linguistic grounds Ķaraķorum cannot, as Rockhill supposes, be a corruption of *Ķara Küren* ("black camp") but means "black debris" (cf. Radloff, *Versuch eines Wörterbuchs* etc., s. v. *Korum*), a name still frequently found in mountainous regions. As Djuwainī expressly remarks, this was the original name of the mountain region round the sources of the Orkhon. The statement ascribed by Rockhill (following d'Ohsson) to Djuwainī that the town was half a farsakh long does not seem to be found in the printed text of the *Ta'rīkh-i Djihān Gushā* nor in manuscripts. Rubruk describes Ķaraķorum as a small town not larger than the faubourg St. Denys in Paris; the monastery of St. Denys far surpassed in size the palace of the Mongol emperor. The ruins of the Mongol Ķaraķorum indeed indicate a town of very moderate size; the Uighur Ordu-baliķ was considerably larger. On the other hand there was much building in Ķaraķorum during the city's brief period of splendour; Rubruk as well as Djuwainī give full descriptions of the imperial palaces built in the city and around it, some by Chinese and others by Muḥammadan architects; according to Rubruk, Russian and Western European architects also shared in the building operations at a later date. Two *farsakh* east of Ķaraķorum lay, according to Djuwainī, the palace of Targhu-baliķ ("city of precious stuffs brought as presents").

After the Mongol Emperors had removed their residence to China, Ķaraķorum was only the seat of the governor of Mongolia; according to Marco Polo (transl. Yule-Cordier, London 1903, I 226), who was not himself in Ķaraķorum, the palace of the governor was in the citadel. After the Mongol dynasty was driven out of China (1368) the Emperors returned to Ķaraķorum; after the dissolution of the dynasty in the 15th century the city lost all importance; at the present day the great Buddhist monastery of Erdeni-Tsu is there.

(W. Barthold)

ḲARA-ḲOYŪN-LU (Turkish "those of the Black Sheep"), a Turkoman dynasty which reigned in Persia and Mesopotamia from 777 (1375) to 873 (1468). In the reign of the Djalā'irid Sulṭān Uwais, Bairām Khwādja, chief of the family of the Bahārlu, had obtained an important position at the court of the Sulṭān through his valour; at the latter's death he seized al-Mawṣil, Sindjār and Ardjīsh. When he died in 782 = 1380, his son Ḳara Muḥammad Turmush, who was in the service of Sulṭān Aḥmad, son of Uwais, came back to succeed him and fell in a battle in Syria (792 = 1390). The son of this Ḳara Muḥammad, Ḳara Yūsuf, proclaimed himself independent and chose Tabrīz as his capital. He made war on Tīmūr, took refuge with Bāyazīd Yildirim and took advantage of the conqueror's campaign in Asia Minor to seize 'Irāḳ 'Arabī, but he could not defend Baghdād against Mīrzā Abū Bakr, sent against him by Tīmūr, and retired to Egypt to the Mamlūk Sulṭāns, who kept him prisoner for some time. On Tīmūr's death he was released, collected the thousand men who had accompanied him, took Diyār Bakr after overcoming a thousand difficulties, defeated Mīrzā Abū Bakr in the vicinity of Nakhčewān (809 = 1406), recaptured Tabrīz and settled himself there. The following year he again defeated this prince, accompanied by his father Mīrān Shāh, who fell on the field of battle. He took as colleague on the throne his son Pīr Budaḳ, who had been adopted by Sulṭān Aḥmad. He took Diyār Bakr from Ḳara 'Othmān Bayendiri, put Sulṭān Aḥmad to death after his defeat and capture not far from Tabrīz, seized 'Irāḳ 'Arabī (813 = 1410) and made peace with Ḳara 'Othmān after defeating him. He destroyed the army sent against him by Shaikh Ibrāhīm, king of Shirwān, and Kustendil, king of Georgia. In 822 (1419) he captured al-Sulṭāniya, Ḳazwīn and Sāwa, towns of 'Irāḳ 'Adjamī. Shāh Rukh, son and successor of Tīmūr, was leading a vast army against him when he fell ill and died in Dhu 'l-Ḥidjdja of the same year (December) in the town of Ūdjān, at the age of 65, after reigning 14 years. His body was despoiled by the Turkomans and lay for two days without burial; then he was buried at Ardjīsh beside his grandfather Bairām Khwādja.

His eldest son Amīr Iskandar, having reunited the scattered members of his tribe, took the field against Shāh Rukh and was defeated after a battle lasting two days (824 = 1421); but he seized the opportunity of his opponent's return to Khorāsān to regain Ādharbaidjān. He defeated and slew Shams al-Dīn, Sulṭān of Akhlāṭ (828), Sulṭān Aḥmad, chief of the Kurds, and 'Izz al-Dīn Shīr (830 = 1426). He recaptured Shirwān and al-Sulṭāniya. He fought again with Shāh Rukh in 832 (1429) and, despite the bravery of his brother Djahān Shāh, he lost the battle and fled into Asia Minor; then, taking advantage of the fact that the Tīmūrid sovereign had placed on his throne his other brother Abū Sa'īd, he returned to the charge, captured his brother and put him to death. On the complaint of the people of Shirwān, who had been ruined by the plundering, Shāh Rukh sent a new army in 838 (1434) with which Djahān Shāh and Shāh 'Alī, his nephew, joined forces. Not being able to make a stand, Iskandar fled and came back again when Djahān Shāh had been installed by the Tīmūrid, but he was defeated and shut himself up in the castle of Alendjaḳ, where he was murdered by his son Ḳobād at the instigation of one of his wives, who had fallen in love with the young man (841 = 1437). He had reigned for sixteen years.

Mīrzā Djahān Shāh, appointed by Shāh Rukh (839 = 1435), engaged in the reorganisation of Ādharbaidjān and added to it new provinces, 'Irāḳ 'Adjamī (856 = 1452), Iṣfahān, in which the inhabitants were massacred, Fārs, Kirmān and Khorāsān (862 = 1458), where he established his capital in the town of Herāt. He was obliged to make peace with the Tīmūrid Sulṭān Abū Sa'īd, who took the field against him, by giving up the latter province to him because his son Ḥasan had escaped from his prison and had succeeded in taking Ādharbaidjān. After an exceedingly swift march, on which he laid the country passed through waste and many beasts of burden perished, he captured his son and banished him from the country. Another of his sons, Pīr Budaḳ, whom he had deprived of his office as governor of Fārs because of his evil conduct and relegated to Baghdād, rebelled in 869 (1465) and sustained a siege for a year. He then obtained by a ruse the submission of Pīr Budaḳ, put him to death and replaced him by his other son Muḥammad Mīrzā. He reigned undisputed over the whole of Ādharbaidjān, the two 'Irāḳs and Kirmān as well as over the coast of 'Omān. Winter prevented him from putting into operation his plans against Diyār Bakr (871 = 1466). On his return, while out hunting, he was surprised by his enemy Uzūn Ḥasan Bayendiri and killed while trying to escape, at the age of 70 after a reign of 32 years (on the 12th of Rabī' II = Nov. 11).

Ḥasan 'Alī, his exiled son, whom Uzūn Ḥasan had welcomed, and whose brain was affected by his 25 years in prison, gathered together a body of bad characters and marched on Tabrīz where his brother Ḥusain 'Alī, the dervish, who had been crowned king in spite of himself, had just been murdered as a result of feminine intrigues. He ascended the throne, distributed his wealth to the mob and avenged his brother. Abandoned by the army leaders who went over to the camp of Uzūn Ḥasan, he tried to raise the people of Hamadhān but was captured and put to death in 873 (1468). This was the end of the main branch of the family.

The branch which reigned at Baghdād consists of the following succession of princes: 1. Shāh Muḥammad, son of Ḳara Yūsuf (died 837 = 1433), had been entrusted by his father with the administration of this province, but he was deprived of it after 23 years by 2. his brother Espān, who reigned 12 years and died in 848 (1444). 3. His son Fūlād succeeded him; it was in his reign that Djahān Shāh took Baghdād and thus put an end to this line.

(CL. HUART)

ḲARAḲUM (Turkish "black sand"), a desert in Russian Turkestān, between the Amū Daryā, the Ust Urt and the ranges of hills on the Caspian, contrasted with Ḳizil-Ḳum ("red sand"),

the desert between the Sir Daryā and the Amū Daryā. The Ḳarāḳum (area 148,000 sq. miles) is a still more dreary waste and possesses even fewer fertile areas than the Ḳizil-ḳum. The sandy stretches north of the Sir as far as Lake Čalkar are called "little Ḳarāḳum"; cf. Franz Machatschek, *Landeskunde von Russisch-Turkestan*, Stuttgart 1921, p. 15 *sq.*, 285 and Index. The Ḳarāḳum mentioned by Djuwainī in the *Ta'rīkh-i Djihān Gushāi* is, in the opinion of the editor, probably identical with the little Ḳarāḳum (the readings of the MSS. are not certain; cf. edition by Mīrzā Muḥ. Ḳazwīnī, Gibb Mem. Series, vol. xvi., part i. 69 *sq.*, ii. 101 *sq.*).

(W. BARTHOLD)

ḲARĀḲŪSH, BAHĀ' AL-DĪN IBN 'ABD ALLĀH (i.e. son of an unknown father) AL-ASADĪ (mamlūk of Asad al-Dīn Shīrkūh) AL-RŪMĪ (born in Asia Minor) AL-MALIKĪ AL-NĀṢIRĪ, officer of Malik al-Nāṣir Yūsuf (i.e. Saladin), a eunuch, received his liberty from Shīrkūh and was appointed an Amīr. By the time of Shīrkūh's death (564 = 1169) he was already playing an influential part; it is said that it was due to him and the Ḳāḍī 'Īsā al-Hakkārī that the Caliph al-'Āḍid appointed Saladin vizier. After the suppression of the rebellion fomented after al-'Āḍid's death by his Chamberlain, the eunuch Mu'tamin al-Khilāfa, Ḳarāḳūsh was appointed Chamberlain. In this capacity he had the surveillance of the family of the late Caliph and is said to have administered his office with great strictness. To prevent the family of the Caliph increasing, he separated men and women. Saladin gave him the task of building the citadel of Cairo and extending the city walls to include Cairo and Fusṭāṭ; later he was asked to fortify and defend 'Akkā. When the town fell in 587 (1191) after eighteen months' fighting he was taken prisoner; Saladin ransomed him a few months later for the high sum of 20,000 dīnārs. After the death of Saladin in 589 (1193) he entered the service of his son al-Malik al-'Azīz 'Othmān and was trusted to represent the Sulṭān when the latter was out of Egypt. When the Sulṭān felt his end approaching (595 = 1199) he designated his son al-Malik al-Manṣūr his successor and Ḳarāḳūsh his regent. In keeping with this wish, the young ruler appointed him Atābeg although Ḳarāḳūsh was now very old. He only held his post for a very short time as most of the Amīrs and the head of the chancellery, Ibn Mammātī, declared him incapable of ruling, presumably on account of his great age. His supporters, who considered him the most worthy, consulted Saladin's adviser, al-Ḳāḍī al-Fāḍil [q. v.], but the latter, who had retired from political life, would not be drawn into the question. Finally the Amīrs asked al-Manṣūr's uncle, al-Malik al-Afḍal, to take over the regency. After this we find only one mention of Ḳarāḳūsh, when Sulṭān al-'Ādil, who had seized the throne in 596 (1200), had two of his nephews taken to the house of Ḳarāḳūsh as prisoners. He died a year later. Contemporary historians, like 'Imād al-Dīn al-Kātib al-Iṣfahānī, bestow the highest praise upon him, as do later writers, like al-Maḳrīzī and Ibn Taghrībirdī, and describe him as the ablest man of his day. They give him particular credit for his activity as a builder. Besides the buildings already mentioned, his house, his hippodrome and the bridge at Gīzeh, which he built out of stones from the Pyramids at Memphis, are mentioned.

In the same period a "Ḳarāḳūsh" became notorious as a type of stupidity. A series of absurd verdicts are related in a work entitled *Kitāb al-Fāshūsh fī Aḥkām Ḳarāḳūsh*, "the book of the stupidity in the judgments of Ḳarāḳūsh". According to Ḥādjdjī Khalīfa, the above mentioned Ibn Mammātī was the author of this book. Casanova (see *Bibl.*) in his elaborate study on Ḳarāḳūsh quotes three manuscripts: 1) a Cairo manuscript which contains a brief selection from the *Kitāb al-Fāshūsh*; the author is there given as Ibn Mammātī; 2) a Paris manuscript the author of which is given as al-Suyūṭī, certainly wrongly as in the introduction Ibn Taghrībirdī is wrongly quoted and given a wrong praenomen, which one can hardly credit of al-Suyūṭī; 3) a Cairo manuscript which is a later version, in which Ḳarāḳūsh is called a Sulṭān and the number of his "verdicts" is increased, by 'Abd al-Salām al-Laḳānī of the year 1200 (1786). These "verdicts" have nothing to do with state-craft but are court verdicts; they are typical, well known anecdotes, current among other nations also. A special investigation has not yet been made of the problem. Casanova endeavours to show that the work is a pamphlet against Ḳarāḳūsh, whom, he says, Ibn Mammātī hated as an exceedingly severe man. It is not known whether Ibn Mammātī collected and published these anecdotes in the life-time of Ḳarāḳūsh. Ibn Khallikān rightly points out that it is impossible that a man such as is described in the anecdotes could have held high offices of state. Nor is anything known of a particular feud between Ibn Mammātī and Ḳarāḳūsh except that Ibn Mammātī had protested in 595 (1199) against the appointment of this then very old man; Ḳarāḳūsh is described by the Frankish chroniclers as advanced in years even in 585 (1189) at the siege of 'Akkā; he is said even to have known Godfrey de Bouillon. One thing is clear from Ibn Khallikān's observation: the anecdotes given by Ibn Mammātī were referred to our Ḳarāḳūsh.

(SOBERNHEIM)

KARAM (BANU 'L-), a dynasty of 'Aden, from 476—533 (1083—1138) conducted an Ismā'īlī condominium — at first as viceroys of the Ṣulaiḥids of Ṣan'ā' — in two branches, the Banū Mas'ūd and the Banū 'Abbās Abi 'l-Zuraiʿ; from 533—569 (1138—1173) the latter alone — the Zurai'ids, also called Banu 'l-Dhi'b (sons of the wolf) — held the now independent sultanate, only recognising the Caliphate of the Fāṭimids.

The Banu 'l-Karam belonged to the Djusham clan of the tribe of Yām in the Hamdān group and were closely related to the Ṣulaiḥids [q. v.]. They were therefore the principal supporters of

the founder of this dynasty, the Ismā'īlī Fāṭimī *dā'ī* 'Alī b. Muḥammad and of his son and successor al-Mukarram. When the Banū Ma'n, whom the *Dā'ī* had allowed to remain as vassals after the conquest of 'Aden in 439 (1047), rebelled, al-Mukarram and his wife, the Sulṭāna Saiyida Ḥurra, to whom 'Aden belonged as her dowry, transferred the governorship to the two brothers Mas'ūd and 'Abbās, sons of al-Karam, in 476 (1083); the former received the castle of al-Khaḍrā' and the revenues of the coast-lands while the latter got the revenues of the landward part of the country and the castle of al-Ta'kir at the gateway to the interior (not to be confused with the stronghold of the same name above Djubla, not far from the road from Djanad to Yarim). Their joint annual tribute amounted to 100.000 dīnārs. Mas'ūd and al-Zuraiʿ, son and successor of 'Abbās, fell before the gates of Zabīd, performing their feudal duty under the command of the major-domo of the Saiyida, al-Mufaḍḍal Abū 'l-Barakāt. The division of the territory into two parts was for the time being maintained. Mas'ūd was followed in succession by his son b. 'Abu 'l-Gharāt and the latter's sons Muḥammad and 'Alī; al-Zuraiʿ's heir was his son Abu Su'ūd and the latter's son Saba. But the manner of division of the country afforded the latter line an advantage from the first in view of greater facilities for expansion into the interior and the easier defence of the strongholds won by the two families there. It was the mountains in the north of the al-Ma'āfir district that were specially concerned. It proved to be of importance that al-Zuraiʿ had taken possession of Dumluwa in 480 (1087), a fortress in the Djabal al-Ṣilw above the bend where the road from Djanad has to curve round the mountain and is at its farthest east point. Under the vigorous Sabā, if not earlier, not only had their lands there been considerably increased but even Dhubḥān about 100 miles W.N.W. of 'Aden on the road to Mokhā and Zabīd had been occupied. Sabā's father, along with Abu 'l-Gharāt, had succeeded in getting the tribute reduced to half and then to a quarter by successfully refusing to pay more to the Saiyida. Sabā was able to stop it altogether when the difficulties of the widow increased. The changed conditions attracted attention in Cairo: the eleventh Fāṭimid, al-Ḥāfiẓ 'Abd al-Madjīd, soon after his accession received Sabā into the Ismā'īlī hierarchy as *dā'ī* in 525 (1131). Dumluwa remained the royal residence. A two years' war in the Wādī Laḥdj brought about a decision between the families of the two brothers. 'Alī b. Abī 'l-Gharāt began by purchasing the support of numerous warriors. When he had shot his bolt, Sabā gained the upper hand by throwing his great wealth into the conflict and 300,000 borrowed dīnārs in addition. He was finally victorious on the same day, it is said, as his ally in 'Aden, Bilāl b. Djarīr, stormed the castle of al-Khaḍrā'.

Henceforth the ZURAIʿIDS ruled alone. But Sabā died six months after his entry into 'Aden in 533 (1138). He is buried there at the foot of al-Ta'kir. By the next year his son and successor 'Alī al-A'azz had died of consumption. He had designated as his successors his infant sons, who were in Dumluwa under the guardianship of their tutor Anis and the minister Yaḥyā b. 'Alī. But Bilāl, whom he had dismissed and menaced, was now in 'Aden and gave the crown to another son of his former patron Sabā, namely Muḥammad who had taken refuge from 'Alī al-A'azz on his father's death with Manṣūr, son of the above mentioned major-domo al-Mufaḍḍal. The reign of this Muḥammad b. Sabā from 534 to 548 or 550 (1139 to 1153 or 1155) marks the zenith of Zurai'id power. He put to death the last prince of the line of Mas'ūd in 545 (1150/1), 'Alī b. Abī 'l-Gharāt, who had still held out after his defeat with some members of his family and a few faithful followers in a few mountain strongholds, for example in the Djabal Manif, north of Laḥdj. In 547 (1152/3) he purchased from his former protector Manṣūr, the heir of Saiyida, 28 towns and strongholds including al-Ta'kir with Djibla and Ibb in the north-east and Dhū Ashraḳ in the south-east. He had received the rank of *dā'ī* immediately after his accession, for the Ḳāḍī sent from Cairo to invest 'Alī al-A'azz found Muḥammad already in actual power. It is to this ruler that we are mainly indebted for our knowledge of the history of the Zurai'ids. For, with some men not so fully interviewed, like Anis and Bilāl already mentioned, he is the main authority for the section on the dynasty in the *Ta'rīkh al-Yaman* of 'Umāra, who visited him personally and on 'Umāra are based e. g. al-Djanadī, al-Khazradjī and Ibn Khaldūn. 'Umāra praises Muḥammad very highly, notably as a Maecenas. But one cannot help thinking that he — himself an enthusiastic Ismā'īlī — was biassed in favour of his royal co-religionists. Whether Muḥammad for the rest interpreted his duties as *dā'ī* in a religious sense, we do not known nor can we tell whether the request of the founder of the Mahdī dynasty, 'Alī b. al-Mahdī, who had asked Muḥammad in the presence of 'Umāra in an audience shortly before his death for help against Zabīd, was rejected for purely political and military reasons or for religious reasons as well. In his son and successor 'Imrān the religious interest predominated. The real power passed into the hands of the vizier family of Bilāl. The latter himself, who had already had the share in the government in the reign of Muḥammad, which was due him for his help in securing the throne, had died not long before — or very shortly after — the change in the throne, leaving a vast estate. He was succeeded in office first by his son Mudjīʿ and after the latter's early death by his other son Yāsir who ruled quite independently. When 'Imrān died in 560 (1164/5) and in keeping with his wishes was buried in Makka, Yāsir had his 3 sons, who were still minors, imprisoned in Dumluwa in charge of the eunuch Abu 'l-Durr Djawhar al-Mu'aẓẓamī. But the Zurai'ids were to be spared the fate of being definitely dethroned by their own people. The last blow came from without: in 569 (1173/4) Saladin's brother Tūrānshāh conquered 'Aden along with the rest of Yemen. In the following year Djawhar surrendered him Dumluwa by treaty and a year later Tūrānshāh had Yāsir, whose hiding-place was betrayed, beheaded.

(K. STROTHMANN)

KARĀMA is strictly the infinitive of *karuma* (to be *karīm* "generous" in the widest sense); but in usage it is a noun of similar meaning to *ikrām* and *takrīm*, to show one's self *karīm* to any one (*Lisān*, xv. 456, 1 *sqq.*). It does not occur in the Ḳur'ān although *karīm* is very frequently used of Allāh and his workings (al-Rāghib al-Iṣfahānī, *al-Mufradāt*, *sub voce*). It has come, therefore, in the devotional language of Islām, to mean the exhibition by Allāh of his generosity, favour, protection, help towards any one, e. g. al-Baiḍāwī on Ḳur. x. 63 (ed. Fleischer, i. 419, *ult.*), a *locus classicus* on the *walīs*; and *karāmāt* mean individual cases of this generosity. In a special sense, the *karāmāt* then come to mean the miraculous gifts and graces with which Allāh surrounds, protects and aids his Saints (*al-awliyā'*). A Ḳur'ānic basis for these was sought in the story (Ḳur. iii. 32) of the food which came miraculously to Maryam in the locked *miḥrāb* and in the transporting in a moment from Yemen of the throne of Bilḳīs by a unnamed companion of Solomon (Ḳur. xxvii. 40). As neither Maryam nor the unnamed companion was a prophet these could not be evidentiary miracles (*mu'djizāt*). See the whole discussion in al-Taftazānī on al-Nasafī's *'Aḳā'id*, Cairo 1321, pp. 134 *sqq.* But the real basis lay in the innumerable narratives of *karāmāt* in the lives of the *walīs*, exaggerated and distorted reflections of indubitable facts in the ecstatic religious life. The fact of these all orthodox Islām admits, even so philosophical an historian as Ibn Khaldūn (ed. Quatremère, i. 169, 199; transl. de Slane, i. 190, 227) and a peripatetic philosopher like Ibn Sīnā (*Ishārāt*, ed. Forget, pp. 209, 219, 221 *sqq.*). These were evidently driven by the pressure of facts to fall back on the hypothesis of still unsolved mysteries in nature; cf. Goldziher, *Die Richtungen der islamischen Koranauslegung*, Leiden 1920, p. 139, note 3. Only the Mu'tazilites, who were certain that nature held no mysteries for them and that they need only apply reason to their theological positions, protested and found, even in the Ḳur'ān, basis for their protest. See al-Zamakhsharī on Ḳur. lxxii. 26, 27 (*al-Kashshāf*, ed. Nassau Lees, ii. 1530) and on the whole development Goldziher, *op. cit.*, pp. 144 *sqq.* The coincidence in sound, in derivation and in meaning between these *karāmāt* and the χαρίσματα of the early Christian Church (I Cor. xii.) is most striking and can hardly be accidental. The religious phenomena behind both are the same; but the verbal link is not clear; the Syriac Church called the χαρίσματα simply "gifts", *mauhebhātha*, in Arabic, *mawāhib*, which indeed occurs in this sense; it is possible that the Greek word taken over into Syriac may have suggested to users of Arabic their own *karāmāt*. Technically, such a *karāma* is one of the *khawāriḳ al-'āda*, "the breakers of usage"; for there is no Nature in orthodox Islām, only, and at best, a custom which Allāh has established (Goldziher, *Vorlesungen*, p. 130). It differs from the *mu'djiza* or "evidentiary miracle" in that it is not worked by Allāh for a prophet in proof of his mission and is not accompanied by a *da'wat nubūwa* or a *taḥaddī*, a claim of prophetship or a challenge to the unbeliever. It differs from the *ma'ūna*, "help", in that while the recipient of the *ma'ūna* is a Muslim he has had no special religious experience; and from the *irhāṣ*, an anticipatory miracle worked for a prophet before his call. It differs from the *istidrādj* and *ihāna* as these are wrought at the instance of unbelievers to lead them astray and bring them to shame (*Dict. of Techn. Terms*, i. 444 *sqq.*; al-Nasafī, *'Aḳā'id*, *loc. cit.* with accomp. commentaries). A *walī* should conceal his wonders, while a prophet must display them; a *walī* may not know about them, while a prophet cannot help knowing. Yet the *karāma* of a *walī* may be regarded as a *mu'djiza* for the prophet whose follower he is. Finally, a *walī* should disregard them as much as possible and should look on them as tests rather than as privileges.

(D. B. MACDONALD)

ḲARAMĀN is the name — derived from the Turkoman dynasty of the Karamān-Oghlu [*q.v.*] — 1) of a district in Asia Minor, 2) of a town in Turkey, capital of a *ḳaḍā* of the same name.

The boundaries of the district of Karamān (Ḳaramān-ili, Caramania) have varied. All the lands which were permanently under the Karamānids are occasionally so called, that is Lycaonia, the Cilician Taurus and the whole southern Anatolian coast territory as far as Adalia. When the Karamānids were finally overthrown, their lands became one Ottoman province (wilāyet) with Konya as the residence of the Pasha. The sandjak of Iç-ili [*q.v.*] was afterwards separated from the Pashalik; the northern larger portion was called Khāridj, probably in contrast to Iç-ili (Ḥādjdjī Khalīfa, *Djihān-numā*, p. 615 *sq.*; cf. also Ewliyā Čelebi, *Siyāḥat-nāme*, Constantinople 1314—18, iii. 20), and comprised in the xviith century the sandjaks of Aksarāi, Aḳ-shehir, Konya, Ḳir-Shehir, Ḳaisarīya, Nigde. After the administrative reforms of 1864, the name of the province was changed to Ḳonya [*q.v.*]. The population of Caramania is overwhelmingly Turkish (picture of a Muslim of Caramania in d'Ohsson, *Tableau de l'Empire Othoman*, Paris 1788—1820, ii., opposite p. 137); even the Greeks, or at least those inhabitants who belong to the orthodox Greek church, speak Turkish. They are known as Ḳaramānlī and write Turkish in Greek letters; in Constantinople they have their newspaper *Nea Anatoli* printed in this way. During the nationalist fighting in 1919 and 1920, the Ḳaramānlī under the protection of the nationalist government cast off the Oecumenical Patriarch and for a time chose a patriarch of their own. They are very probably not Greeks at all by origin but descendants of the ancient Lycaonians. In the mountains of Caramania live Yürüks and Turkomans. The name Caramania for the coastlands from Mersina to Adalia seems to have become

obsolete. In 1812 it was described by Fr. Beaufort in his book *Karamania* (second edition, London 1818).

4. The **town** of Ḳaramān is the ancient Lāranda (Τὰ Λάρανδα; cf. Pauly-Wissowa, *Realenc. d. class. Altertumswiss.* xii.¹ col. 793). It lies 55 miles S.E. of Konya in the plain at the foot of the Taurus, on one of the great roads which lead from the coast (Selefke) across the Taurus into the interior of Anatolia. It is not known when it fell into the hands of the Saldjūḳs for the first time; as was the case in the rest of Anatolia, the process of islamisation probably was rapidly completed here. Lāranda also belonged to the Dānishmandids from whom Ḳilidj Arslan retook it in 1165 (Michael Syrus in the *Rec. des Hist. des Crois.*, *Doc. Arm.*, i. 300). In 1190 Frederick I Barbarossa entered Lāranda on his way to Cilicia and in 1210 it again fell into the hands of the Christians when Leon II, King of Armenia, conquered it for the Knights-Hospitaller. In 1216 it had, however, again to be surrendered to Sulṭān ʿIzz al-Dīn Kaikāʾūs (*Rec.* etc., *Doc. Arm.*, i. 644). Shortly afterwards (about 1230) Lāranda was among the towns which were abandoned to the invading Khwārizmis (Ibn Bībī in Houtsma, *Recueil de Textes rel. aux Seldjoucides*, iv. 191). In connection with this event Bahāʾ al-Dīn Walad, father of Djalāl al-Dīn al-Rūmī, migrated about this time from Khorāsān to Lāranda where Djalāl al-Dīn al-Rūmī married in 623 (1226) and where Sulṭān Walad was born (*Les Saints des Derviches Tourneurs*, transl. by Huart, i., Paris 1918, p. 19, 26, 268).

The town attained great importance through the dynasty of the Ḳaramān-Oghlu [q. v.] who made it their capital in the beginning of the xivth century, when they did not yet feel secure in Konya. Several princes of this dynasty lived there even at a later period. They embellished the town with fine buildings and fortified the citadel. During this period the town was often under Egyptian suzerainty (Ibn Baṭṭūṭa, ed. Paris, ii. 284; Ibn Faḍl Allāh, *Masālik al-Abṣār*, in the *N. E.*, xii. 342 sq.). In the wars with the Ottomans, Lāranda was repeatedly occupied by the latter and the Ḳaramānid ruler was forced to take refuge in the mountains. Finally in 1467 it was captured under Meḥmed II and totally incorporated in the Ottoman Empire in 1486 by Bāyazīd II. Henceforth Lāranda was known as Ḳaramān, although the old name has always been retained in official language.

The modern Ḳaramān is a town of about 5,000 inhabitants (according to Banse, p. 106; *Ḳāmūs al-Aʿlām* gives 7,500, ʿAlī Djawād 10,000). It lies on a low hill on the southern edge of the Lycaonian plain about 4,000 feet above sea-level. The highest part of the hill (about 300 feet higher) has on it the citadel now falling to pieces; it consisted of round and square towers linked by walls; the outer wall is built from stones from older buildings with Arabic inscriptions. Among the most important buildings of the Ḳaramānid period is the Emīr Mūsā Medresesi where several princes of the dynasty are buried. The dome has fallen in; pillars of it are still standing which once belonged to Roman buildings. There is also the Khātūniye Medresesi, one of the finest buildings of the Ḳaramānid period (pictures in van Berchem, *op. cit.*, p. 118 and 120, and Woermann, *Gesch. d. Kunst*, ii. 446). According to the inscription (*Taʾrīkh-i ʿOthmānī Endjümeni Medjmūʿasī* [also entitled *Revue historique publ. par l'Institut d'histoire ottomane*], N°. 11, p. 711), it was built in 783 (1381) by the daughter of Murād I, who married the Ḳaramān-Oghlu ʿAlāʾ al-Dīn (or ʿAlī); there is now very little left of it. Mention may also be made of the *zāwiya* built by the same ʿAlāʾ al-Dīn in 772 (1370), where Djalāl al-Dīn al-Rūmī's mother is reputed to be buried (now called Agha Tekke; cf. van Berchem, *op. cit.*, p. 116), and of the *türbe* where the Ḳaramānid Ibrāhīm Beg and two of his sons are buried. The inscriptions in it are now destroyed (*T.O.E.M.*, N°. 13, p. 831). The *türbe* is situated near the Ḳaramān-Oghlu mosque or ʿImāret Djāmiʿi which was founded by this same Ibrāhīm Beg in 836 (1432) (picture in van Berchem, *op. cit.*, p. 127) and has a finely ornamented gateway and is richly adorned with tiles in the interior.

The houses of the town are built of clay (*toprak*); the inhabitants are reputed to be very dirty and the climate with its great variations in temperature here is said to be very unhealthy. There are a number of looms (*kellim*'s and *sedjdjāda*'s) in Ḳaramān and tanneries. The town is on the Anatolian Railway between Konya and Eregli; it has always been an important station on the trade route to Cilicia.

The Ḳaḍā of the same name, the capital of which is Ḳaramān, belongs to the sandjak of Konya. It has about 30,000 inhabitants (according to Cuinet ii. 417) of whom the great majority are Muhammadans. The Taurus in the south is here called Ala Dagh and in the north rises the Ḳara Dagh. As the chalk soil is as a rule well watered by the streams from the Taurus there are good crops. Most of the farmers in the plains are Muhādjirs (settlers from Rumelia). The mountain valleys are tilled by Turkomans who have settled there. The produce of the soil consists of different cereals, vegetables, fruit (raisins), cotton and opium. Salt is also produced. The wool for the carpet factories is yielded by the many sheep reared there.

(J. H. Kramers)

ḲARAMĀNĪ MEḤMED PASHA, an Ottoman Grand Vizier and historian. He first saw the light, probably in Caramania, as son of a certain ʿĀrif Čelebi and was a descendant of the great mystic Djalāl al-Dīn al-Rūmī [q. v.]. He seems to have come when quite young to Stambul where he made the acquaintance of the celebrated

Grand Vizier Maḥmūd Pasha-i Welī [q.v., executed 1474] and through his influence was educated in a medrese founded by him (cf. J. v. Hammer, *Gesch. des Osm. Reiches*, ii. 123 *sq.*). At an early age — in 869 (1464), it is said — he became secretary of state to the signet (*nishāndji*) with the rank of vizier. But in 862 (1454—5) i. e. soon after the capture of Constantinople he must already have been in high office, as is shown by the epithets *al-Amīr al-kabīr wa 'l-wazīr al-kabīr* in his Arabic grant of foundation (*waḳfiya*), dated Dhu 'l-Ḳa'da 4, 862 (= Sept. 13, 1458), in the Pruss. Nat. Library in Berlin (cf. W. Ahlwardt, *Katalog der ar. Hss.*, iv. 227, N°. 4763, fol. 74 *sqq.*).

He attracted the attention of Meḥmed II, the Conqueror, more and more, became his adviser in the organisation of the offices of state and in the making of new laws. The celebrated *Ḳānūn-nāme* (cf. *Mitt. zur osm. Gesch.*, i. 13 *sqq.*, Vienna 1921) is probably for the most part his work. When in May, 1478 the Grand Vizier Aḥmad Gedik Pasha was dismissed, Meḥmed II summoned the unwarlike but intellectually distinguished Meḥmed Pasha to be Grand Vizier. As such he achieved fame by composing a dispatch to Uzun Ḥasan, praised alike for style and matter (cf. Ferīdūn Bey, *Munsha'āt al-Salāṭīn*², Stambul 1274, ...). On Rabī' I 5, 886 = May 4, 1481, on the day after Meḥmed's death he was most cruelly murdered by mutinous janissaries in Stambul in the Takht al-Ḳal'a (Un Kapan) quarter (cf. M. Guazzo, *Historie ove si contengono le guerre di Mahometto*, Venice 1545, p. 28; cf. also Andrea Navagero in Muratori, *Rerum italic. script.*, xxiii. 1167, Milan 1733). He is buried in Stambul near the Ḳum Ḳapu in the new Nishāndjï mosque called after him (cf. Ḥāfiẓ Ḥusain, *Ḥadīḳat al-Djawāmi'*, Stambul 1281, i. 209; J. v. Hammer, *Gesch. des osman. Reiches*, ix. 90, N°. 449; do., *Constantinopolis*, Pest 1822, i. 430; [Sehī's statement, *op. cit.*, p. 23, is incorrect). Meḥmed Pasha also dabbled in poetry and published his verses under the *makhlaṣ* Nishānī. He is more important as a historian. He wrote a treatise (*risāla*) in two parts (*ḳism*) on the history of the Ottoman Empire; the first part covers the period from 'Othmān to Meḥmed II (1451), the second from 1451 to 1480 (885) i. e. to shortly before the deaths of Meḥmed II and himself. Specimens of the work, which is written in Arabic, were published in Turkish by Mukrimin Khalīl in the *Revue Historique*, vol. xiv., Stambul 1924, part 2 and 3, from the MS. in the Aya Ṣofia, N°. 3204 (*Defter*, p. 192). The historian Rūḥī Edrenewī [q.v.] follows him.

Ḳ. M. P. had two wives, through whom he became connected with famous and wealthy families viz.: Shāh Khatun, daughter of the celebrated author 'Alā' al-Dīn 'Alī al-Bisṭāmī (called Muṣannifek, cf. i. 734; he was also a politician, cf. Kritoboulos, ed. C. Müller, p. 146: Σάμις Ἀλῆ and Chalkokondylas, ed. I. Bekker, p. 326, 17) and Sittī Sultān Khatun, daughter of the wellknown chief of 'Alā'iya, Luṭfī Beg, cf. Miklosich-Müller, *Acta et Diplomata*, iii. 284 *sqq.* and L. de Mas Latrie, *Histoire de l'Île de Chypre*, iii. 64—68, Paris 1861, and 'Āshiḳpashazāde, *Ta'rīkh*, Stambul 1332, p. 174 and 192). By his first marriage he had a son, Zein al-'Ābidīn 'Alī Čelebi, from the second a daughter, Ruḳaiye Khatun. His marriage with the daughter of the Beg 'Alā'iya (q. v. incorporated in the Ottoman Empire in 1471) apparently brought him considerable wealth, which he used for splendid endowments in Constantinople and Adrianople. This explains the hitherto obscure spiteful passage in the history of 'Āshiḳpashazāde, *Ta'rīkh*, p. 192, where all sorts of wicked things are said about the "*nishāndji pasha*", which must be due to personal quarrels (probably the withdrawal of *waḳf*-estates in Elwān Čelebi).

A grandson of Ḳaramānī Muṣṭafā Pasha, son of the above Zein al-'Ābidīn 'Alī Čelebi, was the Molla Muṣṭafā (d. 966, 1558, cf. 'Aṭā'ī, *Dhail* to the *Shaḳā'iḳ al-Nu'māniya*, Stambul 1288, p. 15 *sq.*); the statement that the family of Ḳara Čelebi-zāde goes back to Ḳ. M. P. (*Sidjill-i 'Othmānī*, ii. 111) is probably based on confusion with the vizier Rūmī Meḥmed Pasha (cf. Ismā'īl Belīgh Brussewī, *Gulditesti Riyāḍ-i 'Irfān*, Brussa 1302, p. 314 *sqq.*; J. v. Hammer, *G.O.R.*, ix. 129, N°. 754; Ḥāfiẓ Ḥusain, *Ḥadīḳat al-Djawāmi'*, ii. 195).

Hammer, *Gesch. des Osm. Reiches*, ii. 246 *sq.* (the statement there made that Ḥādjdjī Baba [i. e. Ibrāhīm b. 'Abd al-Karīm al-Ṭūsī, cf. Tashköprüzāde, *Shaḳā'iḳ al-Nu'māniya*, Stambul 1269, p. 226] was Meḥmed P.'s father is due to a mistake); J. v. Hammer, *Gesch. des osm. Reiches*, i. 281 (Nishānī), 40 (error regarding Ḥādjdjī Baba repeated).

(FRANZ BABINGER)

ḲARAMANLI, a family who ruled Tripolitania in almost complete independence from 1711 to 1835. The founder of the dynasty, Aḥmad Ḳaramanli, seems to have been a Kulughli. In 1123 (1711) he took advantage of the absence of the Pasha Maḥammad Abū Ammis to have himself proclaimed by the people, conquered and killed at Zuwāgha Khalīl Pasha who was sent to overthrow him, bribed Muḥammad Pasha who commanded a new expedition (1124 = 1712) and purchased from Sulṭān Aḥmad III a *firmān* confirming him in authority with the title of *beylerbey*. He put down insurrections at Tādjūrā and Maslāta and that of 'Alī al-Ṣanhādjī, gave the government of Barḳa and of Benghāzī to his brother al-Ḥādjdjī Sha'bān Bey, who was killed ten years later in a rebellion suppressed by the Pasha. He also rebuilt the fortifications of Tripoli, notably the Burdj al-Mandrik, and built near the gate of Manshiya the mosque which bears his name and the madrasa adjoining it. In his reign a French squadron bombarded Tripoli in 1728 (1141—1142) and a treaty was concluded which lasted till 1766 (1180—1181).

He was succeeded in 1158 (1745—46) by his son Muḥammad Pasha under whom piracy developed and who concluded a treaty with England. He died in 1167 (1753—1754) leaving the power to his son 'Alī Pasha. In his reign the reins of authority became more and more loose and thefts and murders made life in Tripoli miserable; the troops were no longer paid regularly, the people

thought of appealing to the Porte. Matters were made worse by divisions in the family of the Pasha. His third son, Yūsuf, had his eldest brother Ḥasan assassinated on his authority in the arms of his mother (1790 = 1205—1206), then, supported by the Shaikh Khalīfa b. Maḥmūd, chief of the Djabal Nafūsa, he rallied under his flag the Arab and Berber population hostile to the Turks, openly raised the standard of revolt against his father and besieged Tripoli. On these events, an adventurer named ʿAlī Pasha Burghūl, a former official of the Odjak of Algiers, succeeded in obtaining a *firmān* from the Porte and seized Tripoli. In face of a common enemy, the Ḳaramanli were reconciled and asked help from the Bey of Tunis, Ḥamūda Pasha, who was also threatened by the return offensive of the Turks against their former Barbary possessions. With a Tunisian army they retook Djerba commanded by an ally of the usurper, Kara Muḥammad al-Turkī, and Tripoli in which ʿAlī Burghūl had made himself detested by both Arab and Jew (Djumādā II 25, 1209 = Jan. 16, 1795). The latter fled to the East and in 1803 he succeeded in getting himself appointed Pasha of Egypt but was assassinated by a Mamlūk as soon as he arrived.

ʿAlī Pasha's rule was transitory; his son Aḥmad II Bey was next proclaimed. But taking advantage of his absence in Tādjūrā, his brother Yūsuf Bey had himself proclaimed (1210 = 1795—1796) and received a *firmān* from Sulṭān Selīm confirming him in his dignity. Aḥmad resided at Derneh with the title of Bey.

Yūsuf was the most important ruler of the Ḳaramanli dynasty. He completed the fortifications of Tripoli, built a navy with which he forced Sweden to pay tribute to him (1213 = 1798—1799) and in secret agreement with Napoleon resisted Portugal whose fleet commanded by the English captain Campbell bombarded Tripoli. This expedition was celebrated in a Latin poem (*Carmen heroicum de rebus a Lusitanis ad Tripolim gestis*, Lisbon 1800; 2nd edition with French transl., Paris 1846, *La guerre de Tripoli*). Yūsuf had to sustain a more serious fight with the United States (1217 = 1801—3). An expedition commanded by Commodore Morris and another under Commodore Barron forced Yūsuf to accept a treaty which abolished the enslaving of Christians (Rabīʿ I 4, 1220 = June 4, 1805). The Americans had tried to use the help of the Bey of Derneh, Aḥmad, brother of the Pasha; they deported him to Egypt after the peace. In 1232 (1815) the cruiser Decatur confirmed the advantages previously obtained; on the relations of Tripolitania with the United States see E. Dupuy, *Américains et Barbaresques*, Paris 1910, p. 132—297; Lane-Poole, *The Barbary Corsairs*, London 1890, p. 274—291. A little later all the countries of Europe, even the weakest, supported by the strongest, finally succeeded in disposing of the last attempts at piracy (on the relations of Tripoli with France see E. de la Primaudaie, *Le littoral de la Tripolitaine*, Paris 1866, p. 182—195, and with England see the references given by Playfair, *The Bibliography of the Barbary States*, i. *Tripoli*, London non dated, p. 49—52).

In addition to these difficulties, Yūsuf had to suppress revolts in the interior of the country; those of Gharyān in 1218 (1803—1804), of Ghadāmes in 1221—1225 (1806—1810), of Maḥmūd Sharīf, governor of Fezzān, in 1227 (1812), of the Djabal Nafūsa in 1231—1236 (1815—1821) and of his own eldest son Muḥammad in the east of the regency in 1237 (1821—1822) (cf. Della Cella, *Viaggio da Tripoli alla frontiere occidentali dell' Egitto*, Genova 1819, p. 19—23), without reckoning the intertribal wars such as that between the B. Bishr and the B. Saif al-Naṣr (cf. Muḥammad al-Tūnisī, *Voyage au Ouadai*, French transl., Paris 1851, p. 564—565) or that of the Sort and the Ahnfela. Fezzān, to add to his troubles, made itself independent under ʿAbd al-Djalīl b. Ghaith of the Saif al-Naṣr, whom Yūsuf had sent to suppress a rising of the Bornu (1242-1246 = 1826—1830). Deprived of the resources supplied him by piracy, Yūsuf sought to procure supplies by imposing extraordinary super-taxes on the Jews whom he had at first protected, then by altering the value of the coins and finally by imposing a tax on gardens. The revolt became general; the insurgents meeting together at Manshiya proclaimed the dethronement of Yūsuf and replaced him by one of his grandsons, Muḥammad (according to others Aḥmad), and came to besiege Tripoli. An army led by the two sons of the Pasha was forced to retreat; not having succeeded in getting the help of the Bey of Tunis Yūsuf decided to abdicate. He did this in favour of his son ʿAlī but this step only increased the troubles. If the European Consuls, ʿAbd al-Djalīl, master of Fezzān, Ghūma, chief of the Djabal Nafūsa, recognised ʿAlī, the rest of the country remained faithful to Muḥammad. The Ottoman Porte took advantage of the occasion with the secret support of England; after having sent a *firmān* to ʿAlī, Turkey sent out under the command of Nadjīb Pasha a fleet which took Tripoli without striking a blow (Muḥarram, 1251 = May, 1835) and reestablished the authority of the Porte in Tripolitania. Yūsuf remained till his death a prisoner in his own house, ʿAlī was deported to Constantinople, Muḥammad committed suicide and his brother Aḥmad fled to Malta.

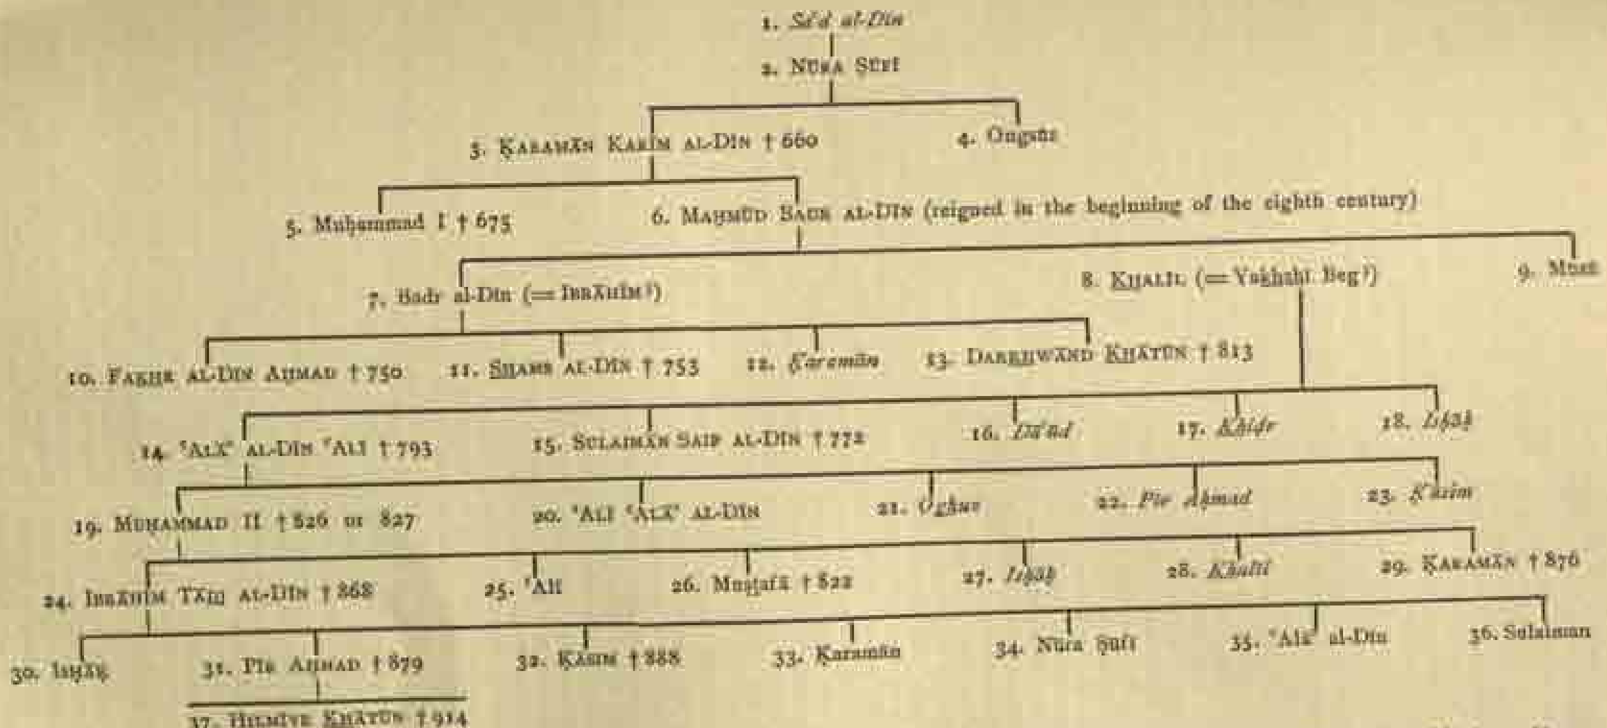
(René Basset)

ḲARAMĀN-OGHLU, the most important of the various Turkoman dynasties, which arose in Asia Minor after the break up of the Saldjūḳ empire at the end of the viith (xiiith) century. They were for a time the most serious rivals of the Ottomans. The name goes back in the first place to the Turkoman chief Ḳaramān, who attained a certain degree of independence during the Mongol troubles in the middle of the viith (xiiith) century and was granted by the Sulṭan Rukn al-Dīn a territory, from which he himself had come, in Cilicia. His native district was then known as Ḳamar al-Dīn-Ili (now Iċ-Ili) after the Amīr Ḳamar al-Dīn, who had been appointed commander of the conquered Armenian fortresses after the war between ʿAlāʾ al-Dīn Kaiḳobād I and Lesser Armenia (625 = 1223; Ibn Bībī in Houtsma, *Recueil*, iii. 329). Munadjdjim Bashī (iii. 24) derives the name Ḳaramān from Ḳamar al-Dīn, following Ibn Bībī's statement. This explanation of the name is hardly more than a popular etymology. The derivation from a geographical or ethnic name is nevertheless very probable as similar derivations are found among other Asia Minor dynasties and elsewhere (cf. Isfendiyār-Oghlu, Germiyān-Oghlu [q. v.]). It is most probable, that the Ḳaramānids originated in the subdivision of the Turkoman tribe of Sālūr [q. v.] called Ḳaramān. That the town of Lāranda and the surrounding country later became called Ḳaramān [q. v.] and that even the whole southern coast territory of Anatolia is called Caramania, is however due to the name of the dynasty itself. Among the older Ottoman chroniclers the general name Ḳaramān-Oghlu is used almost regularly for every reigning Beg of the dynasty and the European authors of the xvth century also speak of the "Grand Karaman". The Byzantine authors have never had a clear idea of the identity of the Ḳaramān-Oghlu. They confuse them with the Germiyān-Oghlu and sometimes call the princes of Ḳonya Ἀλιδέρας Ἀλιζούρας etc. which goes back to the Germiyān-Oghlu ʿAlī Shīr.



There are two kinds of sources for the earliest history of the Ḳaramānids. The one is hostile to them; it belongs to the school of Saldjūḳ historians and is represented by Ibn Bībī and the later Ottoman chroniclers; the other group is only represented by Shikārī, whose *Ḳaramān Tārīkhi* is a Turkish prose translation of a Persian poem in the style of the *Shāhnāma*. Shikārī sings the praises of the Ḳaramānids, but unfortunately gives no facts (on the *MS.* of Shikārī cf. Khalīl Edhem in the *T. O. E. M.*, N°. 11, p. 597; Munadjdjim Bashī also used Shikārī). Al-Djannābī occupies a position midway between the two traditions. An extremely important addition to our knowledge is formed by the inscriptions of the Ḳaramānids edited by Khalīl Edhem.

The ancestral home and the later regular place of refuge of the Ḳaramān-Oghlu is the almost inaccessible mountainous country in the north-western Taurus on the frontier between Cilicia and Lycaonia, where the town of Ermenek [q. v.], the ancient Germanicopolis, lies. Ḳaramān, according to Ibn Bībī (Houtsma, *Recueil*, iv. 321), was a Turkoman charcoal-burner, who used to sell his charcoal in Lāranda, but this statement is biassed; in Djannābī (p. 213) and Shikārī, Ḳaramān's father, is called Nūra Ṣūfī (son of Saʿd al-Dīn in Shikārī), who was a mystic Shaikh held in great esteem by the Sulṭān of Ḳonya. Djannābī calls this Nūra Ṣūfī an Armenian but this statement is probably suggested by the name Ermenek. Besides it is improbable that Ermenek had anything at all to do with Armenia; it never belonged to Lesser Armenia (*Rec. Hist. des Crois. Doc. Arm.*, i. p. xxiii), and there is no obstacle to the derivation of the name from Germanicopolis. The name Nūra (نوره) for the father of Ḳaramān is further guaranteed by an inscription given by Khalīl Edhem from the *türbe* of Ḳaramān (Karīm al-Dīn Ḳaramān b. Nūra) in Bālḳāsūn in the sandjak of Ermenek; Nūra Ṣūfī's *türbe* is said to be at Deyirmenlik in the ḳaḍā of Muṭ [one of the sons of Ibrāhīm Beg (see below) was also called Nūra Ṣūfī]. The Ḳaramān-Oghlu thus have their beginnings in Ṣūfī circles, just as now seems to be probable for the Ottomans (*Giese, Zschr. f. Semitistik*, 1924, p. 246 *sq.*) and for the Ṣafawids (cf. Babinger, *Z. D. M. G.*, 1922, p. 132). Djannābī's statement that Nūra Ṣūfī was a follower of Bābā Ilyās needs only the correction that the latter was not the instigator of the Bābāʾī rising in Amasia (this was Bābā Isḥāḳ) but a Khorāsānī Ṣūfī who strongly influenced the whole religious development of Asia Minor (cf. Köprülü Zāde Fuʾād, *Ilk Mutasawwiflar*, p. 232, 233). It is in any case significant that Ibn Bībī calls the Ḳaramānids Khawāridj, which name was also given to the Bābāʾīs, cf. also Khair Allāh, *Tārīkh*, Constantinople 1292, ii. 58, where it is said that Nūr al-Dīn Ṣūfī (sic) was *Khalīfa* of Bābā Ilyās for Iċ-Ili.

Nūra Ṣūfī is said (according to Djannābī) to have taken the fortress of Selefke by treachery and his son Karīm al-Dīn Ḳaramān was granted this fortress as a fief by the Sulṭān; according to other sources, he received the beglik of Ermenek (Munadjdjim Bashī) and the Sulṭān Rukn al-Dīn hoped therefore to regain the fealty of himself and his brother Ongüz, who had been made *Mīrākhor* of the Sulṭān, after they had begun to stir up unrest in this region. After Ḳaramān's death, which is placed in 660 (1261) (by Munadjdjim Bashī; Shikārī makes him be poisoned by the Sulṭān), his sons and his brother were imprisoned in the fortress of Kāwala (كاوله: Ibn Bībī, *Recueil*, ix. 322; After the death of the Sulṭān (661=1267) they were released by the vizier Muʿīn al-Dīn Parwāna.

Soon afterwards Ḳaramān's son Muḥammad began his activity. He came to an arrangement with the rulers of Syria, who where then at war with the Saldjūḳs, and the vizier Parwāna found it impossible to bring him to obedience again, among his mountains. Then, when the Saldjūḳs and their overlords, the Mongols, were engaged in Mesopotamia with the wars against the Mamlūks, the Ermenek Turkomans began to covet the plain of Ḳonya. Muḥammad Beg made use of Djamrī, the false claimant to the throne, who gave himself out to be a son of the Saldjūḳ ʿIzz al-Dīn who escaped to the Crimea. In the name of this false Sulṭān, Muḥammad seized Ḳonya which was poorly defended and Djamrī entered its citadel as Sulṭān (Thursday, June 7, 1275 = Dhu ʾl-Ḥidjdja

GENEALOGICAL TABLE OF THE ḲARAMĀN-OGHLU

This genealogical list is reconstructed and somewhat different from that of Khalīl Edhem Bey (*T.O.E.M.*, N°. 14, p. 880). The table in v. Hammer, i. 682, is obsolete. The names written in capitals are found on coins and inscriptions, those in italics only in Shikārī. — 4. in Ibn Bībī, *Recueil*, iv. 322, is called Bunsuz. — 7. The Badr al-Dīn of Shikārī and Ibn Baṭṭūṭa is here tentatively identified with the Ibrāhīm mentioned in the epitaphs of 10 and 11 as their father. — 8. This Khalīl would be the Yakhshi Beg of Munadjdjim Bashī. According to Shikārī he reigned for 17 years. — 9. Inscription of the year 740 at Ermenek. — 13. Tomb inscription of the year 813 at Ermenek. — 14. is the Abu 'l-Fatḥ 'Alā' al-Dīn Khalīl of the inscriptions (see the text), identified with Shikārī's 'Alā' al-Dīn Ibn Khalīl and with 'Alī, the husband of Nafīse. — 15. is buried in the Khātūniya Medrese at Lāranda, according to the inscription of 772. — According to Shikārī, he was appointed by his brother (14) regent of Lāranda and poisoned at the instigation of Artena-Oghlu. — 19 and 21 are, according to Shikārī, sons of the Ottoman princess. — 24. On a coin of Rukn al-Dīn; according to Shikārī, he was the son of a Saldjūḳ princess. — 26. Killed in the battle of Ḳaiṣariya (822) against the Mamlūks. — 29. Epitaph at Adrianople 870. — 30. Coin of 880. — 32. Epitaph at Lāranda of 888 (according to Anonymus, ed Giese, p. 117, he died in Muḥarram, 887). — 31—36. are according to the Ottoman chroniclers, sons of the sister of Murād II who married Ibrāhīm. Shikārī in part has other names. — 37. Epitaph of 924 at Lāranda.

(J. H. KRAMERS).

10, 674, if we read 674 instead of 676 in Ibn Bībī). Muḥammad Karamān-Oghlu administered the conquered territory for him as wazīr and married the daughter of Sulṭān Rukn al-Dīn. An important administrative enactment of his was that he replaced Persian by Turkish as the official language for the first time and introduced a kind of mixed book-keeping which also became a model for the Ottomans (cf. thereon v. Hammer, *Gesch. d. Osm. Reiches*, i. 55). At first Muḥammad and Djamrī (who had taken the name Siyawush) successfully held their own against the Saldjūḳ troops and extended their territory. Finally the Mongol Khān Abāḳā (q. v.) sent his son Oghuz against Ḳonya. On hearing of this Muḥammad and Djamrī hurried out of Ḳonya, carrying with them the vast booty which they had taken at the capture of the city. After the withdrawal of the Mongol army, they again tried to reach the town but the inhabitants under the leadership of the Ḳāḍī Maḥmūd al-Urmawī refused them admittance and the Turkomans retired to their mountains, burning and plundering as they went. Soon afterwards Muḥammad and two of his brothers were killed in a fight with Mongol and Saldjūḳ troops. Djamrī escaped to the north-west; in an encounter between his troops and those of the Sulṭān in the neighbourhood of the Saḳaria he was taken prisoner and afterwards executed. This last battle, according to Ibn Bībī, took place in Muḥarram, 676 (June, 1277). It is therefore probable that Muḥammad's death took place in 675 (1276), which is made the more probable by various epitaphs in Ḳonya (*T. O. E. M.*, p. 702). Shikārī has a somewhat different account (cf. also von Hammer, *Gesch. d. Ilchane*, p. 297, who gives Muḥammad the *laḳab* Shams al-Dīn). No inscriptions are known of Muḥammad; he was, of course, not a reigning prince but acknowledged the Egyptian Sulṭān Baibars as his overlord.

Some years later the power of the Karamānids revived under Maḥmūd Beg, whose *laḳab*, according to Khair Allāh, was Badr al-Dīn. In his inscription of the year 802 (1399—1400) he is called the son of Karamān, which agrees with Shikārī, who says that Maḥmūd had previously taken part in many of his brother's enterprises; Munadjdjim Bashī's statement that he was the son of Muḥammad may therefore be considered to be wrong. Maḥmūd's principal residence was probably Ermenek, where he founded a mosque (702 = 1302). According to Munadjdjim Bashī, he recaptured Ḳonya and in 708 (1308) became completely independent. Driven out of Ḳonya in 719 (1319) by the Amīr Čūbān, general of the Mongol Sulṭān of Persia, he retired again to Ermenek. According to Ibn Faḍl Allāh (*Masālik al-Abṣār* in the *N. E.*, xiii. 344 *sq.*), however, the Karamānids were not entirely independent at the beginning of this period; they called themselves Amīr and frequently placed themselves under the protection of the Egyptian Sulṭāns while they on the other hand endeavoured to live on good terms with the Mongols. They were at that time bitter enemies of the Armenians against whom they felt themselves powerful through the protection of the Egyptian Sulṭāns.

The statements of the historians regarding the succession of the princes after Maḥmūd and their names are contradictory and the inscriptions throw little light on the question. According to Shikārī, Maḥmūd had three sons: Badr al-Dīn, Khalīl and Mūsā, of whom Badr al-Dīn reigned first, being followed on his abdication by Khalīl, then came Badr al-Dīn for a second time. Fakhr al-Dīn, his son succeeded him after his death; he was killed through the intrigues of Artena, Beg of Ḳaiṣariya, and succeeded by Shams al-Dīn's second son, also called Shams al-Dīn, who was poisoned by his brother Karamān after reigning 14 months. The above mentioned Mūsā b. Maḥmūd then ascended the throne to be replaced four years later by Khalīl's son ʿAlāʾ al-Dīn, passing over the brief reign of Badr al-Dīn's third son Karamān. According to Shikārī, this ʿAlāʾ al-Dīn was one of the greatest of the Karamānids and is called by him Abu 'l-Fatḥ. In agreement with the statements of Shikārī is Ibn Baṭṭūṭa (ii. 281, 284), who visited a Sulṭān Badr al-Dīn in Lāranda in 733 (1332), to whose territory Ḳonya also belonged. But his brother Mūsā had, it is said, already reigned in Lāranda before him but had ceded the town to the Mamlūks from whom it later had been reconquered by Badr al-Dīn; that Mūsā had very close relations with Egypt is confirmed by Ibn Faḍl Allāh also (*Masālik al-Abṣār*, in *N. E.*, xiii. 347). We must therefore assume that the brothers reigned in different parts of Karamānia at the same time. Two epitaphs in the Emīr Mūsā Medresesi in Lāranda prove that Fakhr al-Dīn Aḥmad b. Ibrāhīm b. Maḥmūd died in 750 (1349/50) and Shams al-Dīn b. Ibrāhīm b. Maḥmūd in 753 (1352). They must certainly be the two sons of Badr al-Dīn (who, in that case, may perhaps have borne the name Ibrāhīm) mentioned by Shikārī.

It is more difficult to ascertain the identity of ʿAlāʾ al-Dīn. An inscription of 772 (1370/1) on the gate of the *zāwiya* in Lāranda, where Djalāl al-Dīn Rūmī's mother is said to be buried, records that the zāwiya was built by Sulṭān Abu 'l-Fatḥ ʿAlāʾ al-Dīn Khalīl b. Maḥmūd b. Karamān and that Saif al-Dīn Sulaimān b. Khalīl (who, according to Shikārī, was a brother of ʿAlāʾ al-Dīn) is buried there. Munadjdjim Bashī (iii. 26) also knows an ʿAlāʾ al-Dīn, son of Yakhshi Beg, son of Maḥmūd; as there is no documentary evidence for the existence of this Yakhshi Beg, he may perhaps be identified with Shikārī's Khalīl (as Khalīl Edhem Bey in the *T. O. E. M.* has already done; Yakhshi is probably not a proper name at all here; cf. Ibn Baṭṭūṭa, ii. 310). Shikārī makes his ʿAlāʾ al-Dīn marry the daughter of the Ottoman Sulṭān Murād II, while according to Munadjdjim Bashī it was ʿAlāʾ al-Dīn's son ʿAlī Beg who made this marriage. The contract of marriage between Murād II's daughter Nefīse and Karamān-Oghlu ʿAlī Beg is, indeed, still preserved in Ferīdūn's *Munshaʾāt*, i. 105 *sq.*) (in the printed text, p. 107, the date is 788 = 1386, but Khalīl Edhem Bey has shown that 783 = 1381/2 is more probably correct). There is an inscription of this Ottoman princess in the Khātūniye Medrese at Lāranda of the year 783, in which the reigning prince is called Amīr ʿAlāʾ al-Dīn Khalīl b. Maḥmūd, i. e. the same name as in the above mentioned inscription of 772, but without the title of Sulṭān. The difficulty now is whether the ʿAlāʾ al-Dīn Khalīl of the inscriptions is identical with Shikārī's ʿAlāʾ al-Dīn Ibn Khalīl and with ʿAlī, the husband of the princess Nefīse. Very strongly in favour of this identity is a *waḳfnāme* of ʿAlāʾ al-Dīn's grandson Ibrāhīm of the year 859 = 1454/5 (given by Khalīl Edhem Bey in the *T. O. E. M.*, N°. 13, p. 831), where this Ibrāhīm is called: b. Muḥammad b. ʿAlāʾ al-Dīn b. Khalīl b. Maḥmūd b. Karamān

(cf. on the question van Berchem, *Inschriften* etc., p. 118—125 in addition to Khalīl Edhem Bey). Probably throughout the whole period different Karamānians ruled in different places (like Lāranda, Ḳonya, Ermenek, Akshehir, Aḳserāi). (Ibn Baṭṭūṭa, ii. 258, mentions a Yūsuf b. Ḳaramān as lord of 'Alāiya). The extent of their territory varied considerably during this period. Lāranda was probably the principal royal residence. Ḳonya, which had been conquered by "Yakhshi Beg" (Munadjdjim Bashi), did not always belong to them. They had to fight with the Artena-Oghlu at Ḳaiṣarīya, who were vassals of the Mongols and, according to Shikārī, once took Ḳonya and Lāranda, with the Mamlūks of Syria, the Armenians, the Franks of Cyprus and with the other Turkoman rulers of Asia Minor, at whose expense they extended their territory considerably; they even advanced as far as Brūsa. Finally in 788 (1385) they came into conflict with Sulṭān Murād I (battle of Ḳonya) and in 793 (1390) the battle of Aḳ Čai in Kermiyān was fought against Bāyazīd I Yildirim, in which 'Alā' al-Dīn (or 'Alī) was captured and put to death by Timūr Tāsh Pasha, while his kingdom was annexed and his two sons taken to Brūsa as prisoners. (Most of the Ottoman writers mention these events; Shikārī's account differs considerably).

The crushing defeat of the Ottomans by Tīmūr gave the Ḳaramān-Oghlu again an opportunity to revive and a third period of struggle ending in final overthrow begins. 'Alā' al-Dīn's son Muḥammad was liberated from imprisonment in Brūsa by Tīmūr's grandson Mīrzā Muḥammad (according to another story, he fled to Tīmūr) and was given a portion of his territory by Tīmūr again (about 805 = 1403). There are coins of his struck in Tīmūr's name. Ḳonya is said to have become his again in 816 (1413/14) (Munadjdjim Bashi). He began to fight the Ottoman pretenders and occasionally supported Djunaid [q.v.], the Izmir-Oghlu. With the Ottoman Sulṭān Meḥmed I he had concluded a treaty before the latter's ultimate success, by which he is said to have ceded half of his lands to the Sulṭān (*Tādj al-Tawārīkh* etc., also Chalcocondylas), but in the same year we find Muḥammad attacking Brūsa on a pretext of avenging his father's death. After 34 days' siege of the citadel and the destruction of the town he withdrew. The lands of the Germiyān-Oghlu were under his rule for $2^{1}/_{2}$ years at this time (inscription at Kutahiya; cf. *T. O. E. M.*, N°. 2, p. 110 *sq.*). There were new campaigns against the Ottomans in 817 (1414) and 818 (1415). Muḥammad was on one occasion captured by Bāyazīd Pasha but again released.

The Turkish chronicles tell us nothing of the years 818—824 (1415—1421). The Egyptian historians (al-'Ainī, al-Maḳrīzī, Abu 'l-Maḥāsin), however, fill the gap. After Muḥammad had sought help from the Egyptian Sulṭān for his war against the Ottomans and had even recognised him as his overlord (as is evidenced by his coins also) hostilities began, in which the Ramaḍān-Oghlu [q. v.] was also involved and during which Muḥammad's brother 'Alī fled to Egypt. This produced an Egyptian expedition against Muḥammad in 822 (1419). Ḳaiṣarīya and Ḳonya were captured and 'Alī installed in his brother's place in Ḳonya. Muḥammad took refuge in the mountains at first but was later captured in an encounter near Ḳaiṣarīya and sent to Cairo.

In 824 (1421) he received permission to return and again ascended the throne. He met his death at the siege of the Ottoman fortress of Adalia, which is fully described by the chroniclers (probably 826 or 827). His son 'Alī went over to the Ottomans, who gave him the sandjaḳ of Sofia, while his son and successor Ibrāhīm returned to his native mountains with his father's body. Of the second Muḥammad various inscriptions exist in Ḳonya. There are also inscriptions of his brother 'Alī in Nigde, where he held sway before and after the Egyptian period. After his brother's death he endeavoured to make himself independent again but when Murād V supported his nephew Ibrāhīm he did not succeed. In this period the power of the Ḳaramān-Oghlu was considerable; Sanudo estimates the size of his army at 30,000 men on a war footing and 60,000 on a peace footing (Murat., *Inschr. Ital.*, xxii. col. 962).

Ibrāhīm b. Muḥammad Tādj al-Dīn reigned from about 827 (1425) to 868 (1463) (coins of the years 827 onwards) and is the last great member of the dynasty, which after the extinction of the Germiyān-Oghlu was now the only dangerous rival of the Ottomans. Ibrāhīm had married the sister of Murād II and was at peace and war alternately with the Ottomans. The fact that he was the Sulṭān's brother-in-law often saved him from destruction. He had also an alliance with the Emperor Sigismund; the early Ottoman chroniclers bitterly reproach him for his dealings with the unbelievers as well as for his repeatedly breaking faith after solemnly concluded treaties (Anon., ed. Giese, p. 63, 64, 68). Murād II had made up his mind to exterminate the Ḳaramānids and for this purpose he made an alliance with the Turkomans of the Dhu 'l-Kadr dynasty. The latter about 840 (1436/7) took Ḳaiṣarīya and the surrounding country from the Ḳaramānids; Ibrāhīm lost Aḳshehir and Beyshehri among other possessions to Murād II. An attempt to regain the lost territory after Murād's death (855 = 1451) failed. Meḥmed II is said to have acted in this campaign as friend and protector of the Christians (Ducas, p. 233). Ibrāhīm was more successful in the south; in 1443 he took the fortress of Gorigos in Cilicia from the Cypriotes (*Rec. Hist. des Crois., Doc. Arm.*, i. 638). Before his death Ibrāhīm wished to abdicate in favour of his son Isḥāḳ. But Isḥāḳ was the son of a slave and the other six sons whose mother was Murād's sister besieged Ibrāhīm and Isḥāḳ in Ḳonya; both had to take to flight and Ibrāhīm died in the fortress of Kāwala (or Gawāle; 868 = 1463).

His successor was his son Pīr Aḥmad whose side Meḥmed II had taken. Isḥāḳ fled to Uzun Ḥasan, prince of the Aḳ-Ḳoyunlu. The confusion that followed in the struggle for the throne finally brought about the end of the dynasty. With the help of the Ottomans Pīr Aḥmad defeated his brother in the battle of Ermenek (869 = 1465) and henceforth regarded himself as the vassal of Meḥmed II (inscription of 870 = 1466 at Ḳaiṣarīye). But he soon came into conflict with his overlord because he had come to an arrangement with the Venetians. In 872 (1467) the Ottomans permanently occupied Ḳonya where the Ottoman prince Muṣṭafā became wālī; a part of the Ḳaramānian population was transferred to Stambul. Pīr Aḥmad retired to Lāranda and Nigde, where he fought the Ottomans and his brothers alternately. He made

an alliance with his brother Ḳāsim for a time (inscription of the two at Nigde of the year 874 = 1469/70). But they could not stand against Gedik Aḥmad Pasha and lost Lāranda. After Ermenek and Minan had also been taken by the Ottomans, where Pīr Aḥmad's family and treasures fell into their hands, the latter threw himself from a cliff but did not kill himself. He was still able to go to Tarsus where he died about 879 (1474), according to the *Tādj al-Tawārīkh*. Isḥāḳ had withdrawn to Selefke, where his widow continued to hold out for some time after his death.

Ḳāsim b. Ibrāhīm then maintained himself till his death (Muḥarram, 887 = Febr.-March, 1482), according to Anonymus, ed. Giese, p. 177; his epitaph at Lāranda is dated 888). He also sought the assistance of Uzun Ḥasan but could not recapture Lāranda. Then in 887 (1482) he joined the pretender Sulṭān Djem [q. v.] who had at one time governed Ḳonya in succession to his brother Muṣṭafā and on other occasions also had been served by Ḳaramānian troops. Ḳāsim was afterwards pardoned by Bāyazīd II but with his death the rule of the Ḳaramānids ended. His other brothers had already gone over to the Ottomans.

After Ḳāsim's death his generals placed Torghut-Oghlu Muḥammad, who belonged to the Ḳaramān nobility, on the throne, but he also came into conflict with the Ottomans and had to flee to Aleppo in 892 (1487).

It was to their geographical situation that the Ḳaramānids owed the great power they held for a time. Their mountains formed a refuge which it was almost impossible to capture, from which they could make successful descents into the plains of Ḳonya and Cilicia again and again. The possession of the various Cilician passes and other routes over the Taurus brought them a considerable revenue from the tolls which they levied on the Genoese and Cypriote merchants, who carried on a busy trade by these routes with Asia Minor, while their revenue from the customs in the coast towns ruled by them (Scandelor, Manavgat, Anemur, Selefke, Lamos) must have been considerable. Their wealth put them in a still stronger position; their buildings in Lāranda, Ḳonya and Nigde are evidence of this wealth, especially the ruins of the Khātūnīye Medrese in Lāranda or Ḳaramān [q. v.]. Ḳaramānian art is a continuation of Saldjūḳ art in contrast to Ottoman art which rather follows Byzantine models (Woermann, *Gesch. d. Kunst*, Leipzig and Vienna 1915, ii. 445). Of importance in the history of civilization is their encouraging the use of Turkish instead of Persian, as has been already mentioned. The contrast between the Ḳaramānians and the Ottomans seems, however, to have been very marked (Ducas, p. 195, says: ἦσαν γὰρ ἀεὶ ἐχθραὶ διακείμενοι οἱ τοῦ Καραμὰν μετὰ τοῦ Ὀθμάν).

Bibliography: The most important monograph on the Ḳaramānid is Khalīl Edhem Bey's work on the inscriptions of the Ḳaramān-Oghlu, *Ḳaramān-oghullary ḥaḳḳynda wethā'iḳ-i maḥkūke* in Nos. 11—14 (Dec., 1911 to Jun., 1912) of the *Revue Historique publiée par l'Institut d'Histoire Ottomane* (*Tārīkh-i ʿOthmānī Endjümeni Medjmūʿasi* = *T.O.E.M.*); he is the only author who has used Shikārī. Of the earlier historians there are Ibn Bībī (vol. iv. of Houtsma's *Recueil de Textes relatifs à l'Histoire des Seldjoucides*, Leiden 1902); ʿĀshiḳ Pasha Zāde, Constantinople 1332; F. Giese, *Die Alt-Osmanischen Chroniken*, Breslau 1922; Saʿd al-Dīn, *Tādj al-Tawārīkh*, Constantinople 1279; Munadjdjim Bashi, *Ṣaḥā'if al-Akhbār*, Constantinople 1285; Ḥādjdjī Khalīfa, *Taḳwīm al-Tawārīkh*; al-Djannābī's *Ta'rīkh*; the Egyptian historians mentioned in the text. See also Ibn Baṭṭūṭa, *Tuḥfat al-Nuẓẓār*, ed. Defrémery and Sanguinetti, Paris 1853—1859, ii.; Feridūn Bey, *Münshe'āt-Salāṭīn*, i., Constantinople 1274; the Byzantine Chalcocondylas (ed. Becker, Bonn 1843) and Ducas (ed. Becker, Bonn 1834). — We may also mention: Aḥmed Tewḥīd, *Meskūkāt-i Ḳadīme-i Islāmiye*; Ismāʿīl Ghālib, *Meskūkāt-i Islāmiye Taḳwīmi*, Istambul 1328; Cl. Huart, *Epigraphie de l'Asie Mineure* in *Revue Sémitique*, 1895, p. 346 *sq.*, 355 *sq.*, 371; Max van Berchem's edition of the Arabic inscriptions in the *Inschriften aus Syrien, Mesopotamien und Kleinasien*, collected by Max von Oppenheim, Leipzig 1909, p. 119—125; J. H. Löytved, *Konia; Inschriften der Seldjukischen Bauten*, Berlin 1907, p. 79—84; J. v. Hammer, *Geschichte des Osmanischen Reiches*, Pest 1827, i. and ii.; *Recueil des Historiens des Croisades, Documents Arméniens*, Paris 1869, i.; J. von Hammer-Purgstall, *Geschichte der Ilchane*, Darmstadt 1842, i. 297.

(J. H. Kramers)

KARĀMAT ʿALĪ, born (date uncertain, early in the xixth century?) at Djawnpūr [q. v.], of a Shaikh family, which had held the office of *khaṭīb* under Muhammadan rule; his father was *sarishtadār* in the Djawnpūr Collectorate. He studied theology and other Muslim sciences under various celebrated teachers of the time, esp. Shāh ʿAbd al-ʿAzīz, *muḥaddith* of Dihlī, who was also the teacher and afterwards follower of Saiyid Aḥmad of Barēlī. Between 1820 and 1824, Saiyid Aḥmad made a tour through Bengal and Northern India, collecting a band of disciples, and Karāmat ʿAlī was one of the most devoted of the younger men who followed him, but he does not appear to have taken part in the *djihād*, which Saiyid Aḥmad waged against the Sikhs [q. v.], or to have ever been in the Afghān borderland, where Saiyid Aḥmad was slain in battle in 1831. The Saiyid's old master, Shāh ʿAbd al-ʿAzīz, now became his khalīfa, and an active propaganda for the revival of Islām was organised in Bihār and Bengal. With this peaceful propaganda Karāmat ʿAlī was identified, and he may be regarded as its most successful apostle, as he was certainly its most brilliant exponent. During the early decades of the 19th cent. there were several minor reform movements in Eastern Bengal, led by men with more zeal than learning, notably by Ḥādjdjī Sharīʿat Allāh [v. FARĀ'IḌĪ, ii. 57], who in 1252 (= 1836-7) met Karāmat ʿAlī in Calcutta. By 1855 the two schools had made some progress towards a rapprochement, and in the meeting then held at Barisal, Karāmat ʿAlī was able to agree on several points with the representative of the other movement, Mawlawī ʿAbd al-Djabbār, though on the question of the lawfulness of *Djumʿa* and *ʿĪd* prayers in British India, he could not overcome the stubborn opposition of ʿAbd al-Djabbār, and he had to appeal to the humour of ʿAbd al-Djabbār's followers by pointing out that their leader mistook grasshoppers (which were unlawful food) for locusts (which were lawful (*Ḥudjdjat-i-ḳāṭiʿa*, p. 29-32).

Karāmat ʿAlī's life was a double struggle; first, he combated the Hindu customs and superstitions

which had crept into the practise of Islām in Eastern Bengal, against which he wrote a book, entitled *Radd al-Bidʿa*, besides inveighing against them throughout his writings; and secondly, he tried to bring back into the fold of orthodoxy the new heterodox schools against which he waged a successful war; to this subject, also, he devoted a special book, *Hidāyat al-Rāfiḍīn*, besides constant references to "the ignorant" in his voluminous writings. He kept in touch with the Musalmāns of Bengal, and distributed to the needy all the presents that he received. He was a trained *ḳārī* and an expert calligraphist.

Garcin de Tassy (*op. cit.*, ii. 162) says that he competed for the prize offered by Sir Charles Trevelyan for the best Hindustani essay on the influence of the Greeks and Arabs on the Renaissance in Europe, but that his essay was not accepted for want of an English translation, which according to the rules should have accompanied the essay. He was thus interested, unlike the majority of contemporary Indian Mawlawīs, in the relation of Islām to the wider questions of the world at large. He died on the 3rd of Rabīʿ II, 1290 (= 30th May, 1873) and was buried in Rangpūr (*Tadjallī-i-Nūr*, ii. 136), in the province in which he had laboured for the regeneration of Islām all his life. He was succeeded in his work by his son, Mawlawī Ḥāfiẓ Aḥmad (ob. 1898), and his nephew, Muḥammad Muḥsin. His following was so large that there was hardly a Bengal village without his disciples and he still exerts a living influence in certain districts of that province.

He wrote chiefly in Urdū. Raḥmān ʿAlī (*op. cit.*, p. 171—2) gives a list of 46 of his works, without claiming that it is exhaustive. One of his works, *Miftāḥ al-Djannat*, has run through numerous editions and is accepted in India as a correct statement of Islamic principles. His writings may be divided into four classes: 1) general works, like *Miftāḥ al-Djannat*; 2) works on the reading and verbal interpretation of the Ḳurʾān, and formal prayers and ablutions; 3) works on the doctrine of spiritual preceptorship (*Pīrī Murīdī*), the cornerstone of orthodox Islām in India; in accepting this doctrine, Karāmat ʿAlī stands in sharp opposition to the Wahhābī sect and merges insensibly in the *Taṣawwuf* schools, which he brings into relation with the traditional religious orders; 4) polemics against Sharīʿat Allāh, Dūdū Miyān, the Wahhābīs, etc.

The common conception that Karāmat ʿAlī was a Wahhābī is refuted by the detailed exposition of his own views as set forth in his *Mukāshafāt-i-Raḥmat*; he had not seen any Wahhābī books, but had made verbal enquiries and found that they were so fanatical (*ḍiddī*) that they called all who did not agree with them *mushrik* (p. 38-9); he and his school carefully distinguished between *shirk*, which was the negation of Islām, and *bidʿa*, which was only an error in doctrine (p. 39). In his *Ḥudjdjat-i-ḳāṭiʿa* he draws a clear distinction between a *fāsiḳ* (sinner) and a *kāfir* (infidel) and inveighs against those who would deny funeral prayers to those who did not pray but repeated the *kalima* (p. 21); if non-Muslims conquer Muslim lands, the *Djumʿa* prayer and the two *ʿĪd* [q. v.] prayers were not only lawful but obligatory (p. 13 *bis*). He laid great stress on authority, successively handed down by living teachers, and based his doctrine on the orthodox Sunnī books of the Ḥanafī school (*Mukāshafāt-i Raḥmat*, p. 37). He accepted the six orthodox books of tradition (*Ṣiḥāḥ sitta*), the commentaries (*tafāsīr*), the principles of ceremonial law as interpreted by the masters (*uṣūl-i fiḳh*), and the doctrines of *taṣawwuf* and *pīrī murīdī* (pp. 38, 35), even basing the mission of Saiyid Aḥmad on a ḥadīth from Abū Huraira (p. 32): in every century a teacher is born to revivify the faith: Saiyid Aḥmad was such a teacher for the xiii.th cent. and should be followed until another teacher arise for the xiv.th cent. (p. 34). All this was in direct antithesis to Wahhābī teaching and the "reform" amounted merely to the abolition of Hindū rites and ceremonies or those introduced through ignorance (p. 36), or to a revival of Islām according to the accepted orthodox schools (p. 50). The political effects of Saiyid Aḥmad's life brought his followers into conflict with the authorities, but the writings of the school show that there was no connection, political or doctrinal, with the sect founded by Muḥammad b. ʿAbd al-Wahhāb in Arabia.

Bibliography: The European accounts of Karāmat ʿAlī are unsatisfactory, being based on secondary information and failing to distinguish between this school of reform and Wahhābīism, and in some places there is confusion between the subject of this article and Mawlawī Saiyid Karāmat ʿAlī of Djawnpūr (1796—1876), who represented the British Government at the court of Dōst Muḥammad Khān at Kābul, 1832—1835, and was superintendent (*mutawallī*) of the Hughlī Imāmbāṛa, 1837—1876 (v. *Nineteenth Century*, May, 1905, pp. 780—782; Sir W. W. Hunter, *The Indian Musalmans*, p. 114; C. E. Buckland, *Dictionary of Indian Biography*, p. 229; Nūr al-Dīn Zaidī, *Tadjallī-i Nūr*, ii. 139); *Census of India, 1901*, vol. vi. part i. (Bengal, p. 174 (Calcutta, 1902); *Journ. As. Soc. of Bengal*, vol. lxiii., part iii., pp. 54-6 (Calcutta, 1894); Garcin de Tassy, *Hist. de la Littérature Hindouie et Hindoustanie*, ii. 162 (Paris, 1870). (It is doubtful whether the *Muʿdjiza-i raḥḳ-i Masīḥa*, Dihlī, 1868, mentioned there, was a work by the subject of this article); Saiyid Nūr al-Dīn Zaidī, *Tadjallī-i Nūr* (biographies of the famous men of Djawnpūr), pp. 135-6 (Djawnpūr, 1900).

A correct appreciation of Karāmat ʿAlī's doctrines can only be gained by a study of his own writings, the most important of which are the following: *Miftāḥ al-Djannat* (Calcutta, 1243) (frequently reprinted); *Kawkab-i durrī* (? Calcutta 1253) (translates passages from the Ḳurʾān for the benefit of those who know only a little Arabic); *Bayʿat-i Tawba* (Calcutta, 1254) (defends the legality of repentance at the hands of a *pīr*, and other practices of the religious orders); *Zīnat al-ḳārī* (Calcutta, 1264), (on the correct principles for the reading aloud of the Ḳurʾān); *Faiḍ-i ʿāmm* (Calcutta, 1282), (a tract on speculative theology, expounding the doctrines of Shaikh Aḥmad Sarhindī); *Ḥudjdjat-i ḳāṭiʿa* (Calcutta, 1282), (a polemical tract against the school of Sharīʿat Allāh and his son Dūdū Miyān, whose name (commonly spelt Dudhu Miyān) Karāmat ʿAlī always writes in this way); *Nūr al-Hudā*, (Calcutta, 1286), on the doctrines of *taṣawwuf*, of the *mudjaddidiya* school, apparently the new school of Saiyid Aḥmad of

Barēlī); *Mukāshafāt-i Raḥmat* (? Calcutta, 1286), (gives an account of the life and work of Saiyid Aḥmad of Barēlī, and discusses and disowns the Wahhābīs); *Zīnat al-Muṣallī* (Calcutta, 1259), (instructions for ablutions and prayers, etc.); *Zād al-Taḳwā* (Calcutta, 1287, reprint), (treats of the beliefs and practices of Islām, and *taṣawwuf*; accepts the Naḳshbandiya teaching). A list (not complete) of Karāmat ʿAlī's works is given in Raḥmān ʿAlī's *Tadhkira-i ʿUlamā'-i Hind*, p. 171 (Lucknow, 1894); 46 separate works are mentioned.

(A. Yusuf Ali)

ḲARA MUṢṬAFĀ PASHA, the name of two Ottoman Grand Viziers.

I. Ḳara [Kemānkesh (i. e. archer)] Muṣṭafā Pasha, an Arnaut by origin, taken from the Janissaries became first *kyaya* and was then dismissed; in 1043 (began July 8, 1633) he was appointed *Segban bashi* (general of the Janissaries) and became successively Agha of the Janissaries in Shawwāl, 1044 (began March 9, 1635), Grand Admiral (*Ḳapudan-i Derya*) on Djumādā I 5, 1045 (= Oct. 17, 1635) and Grand Vizier in Shaʿbān, 1047 (began Dec. 19, 1637). During his period of office which lasted till his execution by order of Sulṭān Ibrāhīm I on Muḥarram 1, 1053 = March 22, 1643 (cf. J. v. Hammer, *Gesch. d. Osman. Reiches*, v. 326 *sqq.*) he distinguished himself by economy and a talent for administration, which all the historians recognise with admiration. Ḥusein Wadjīhī, the author of a history of the Ottoman Empire covering the period between 1048 (1638) and 1070 (1659), was Ḳ. K. Muṣṭafā Pasha's keeper of seals. A number of buildings owe their origin or restoration to him; he founded mosques, built bridges and planned settlements (for example Ortuḳābād near Siwās). The best verdict on him is that of the contemporary Ism. Bullialdus in *Ducas Historia Byzantina*, Paris 1649, p. 263 infra: *vir, quamvis incruditissimus, ut qui nec legere, nec scribere sciebat, in rebus gerendis negotiisque expediendis solertissimus ac promptissimus*. Ḳara Muṣṭafā Pasha is buried in Stambul at Parmaḳ Ḳapu on the Dīwān Yolu in the madrasa built by him (Naʿīmā, *Taʾrīkh*, ii. 30 *sq.*).

II. Ḳara Muṣṭafā Pasha, the besieger of Vienna. He belonged to Merzifūn where he was born in 1044 (began July 27, 1634), according to other stories about 1620 (cf. Barozzi-Berchet, *Relazioni degli ambasciatori e baili veneti a Constantinopoli*, Venice 1879, ii. 207, according to whom he was 52 about 1677), the son of a *Sipahi* captain named Urudj (according to other sources Ḥasan Agha) who fell before Baghdād. His father was a friend of Köprülü Meḥmed Pasha who had the boy educated. His first rank was Silihdār, next Talkhīdjī (master of oratory), in Dhu 'l-Ḥidjdja, 1068 (began Aug. 30, 1658) *Mīrakhōr* (chief marshall) and in Muḥarram, 1070 (began Sept. 18, 1659) he became Beylerbey of Silistria with the rank of vizier (cf. Barozzi-Berchet, ii. 134 *sq.* and *Voyages du Sieur A. de la Motraye*, the Hague 1727, i. 439); in Ramaḍān, 1070 (began May 11, 1660) he was appointed governor of Diyārbakr, in Radjab, 1072 (began April 20, 1662) Grand Admiral (*Ḳapudan-i Derya*), in Ramaḍān, 1073 (began March 9, 1663) *Rikāb Ḳāimmaḳāmi* (deputy for the Grand Vizier *a latere*) and two years later dismissed from the office of Grand Admiral; in 1672 he was *Ḳāʾimmaḳām* at Adrianople (d'Arvieux, *o. c.*, Knolles-Rycaut, *o. c.*, ii. 263, 277). In 1086 (began March 28, 1675) he was betrothed to the Sulṭān's daughter Küčük Sulṭāne. In Shaʿbān, 1087 (began Oct. 9, 1676) he was appointed Grand Vizier. His policy as Grand Vizier was that of his great predecessors and may be summed up in the one word, war: — war, for the sake of domestic peace, war, to please the Sulṭān, war, for the glory of the Ottoman Empire, and more particularly for his own prestige. Ambition and avarice are said to have been the motives of his actions (cf. Barozzi, *op. cit.*, ii. 207; Rycaut, *The Present State of the Ottoman Empire*, p. 89 *sq.*) and contemporary western chroniclers generally describe him as unjust, cruel and avaricious (cf. Barozzi, *op. cit.*, ii. 207: venale, crudele ed ingiusto). In his boundless ambition and avarice he allowed himself to be tempted in the late summer and autumn of 1683 to a campaign against Austria and the siege of Vienna, although he had no ability as a general. He had already conducted an unsuccessful war against Russia in the spring of 1677 and had been forced to consent to an armistice (at Radzin on Feb. 11, 1681) disadvantageous to the Porte and the campaign which he began in 1683 against the Emperor Leopold V brought about his ruin. After he had given Tököly, the chief rebel in Hungary, the Hungarian crown, he advanced into Austria laying the country waste as he went along. On July 14, he began the siege of Vienna with 200,000 men; the city was heroically defended by Count Starhemberg with 10,000 men. The city was near its fall when the German-Polish army of relief appeared and on Sept. 12, 1683, completely defeated the arrogant foe. Muṣṭafā Pasha escaped with the remnants of his force to Hungary. On Dec. 25, 1683, he was executed by the Sulṭān's orders. His body was buried in Belgrade in the mosque erected by him before setting out for Vienna and his skull brought to Adrianople to Sulṭān Meḥmed IV and buried in the mosque of Saridja Pasha (epitaph in J. v. Hammer, *Gesch. d. Osm. Reiches*, vol. ix., p. xxxiv.). The statement, made by J. v. Hammer, *Gesch.*, vi. 519 and 740 and in *Wiens erste aufgehobene türkische Belagerung*, Vienna 1829, p. 119 *sqq.*, supported with documents of Cardinal Leopold von Collowitz (of Sept. 17, 1696) and adopted by V. v. Renner, *Wien im Jahre 1683*, Vienna 1883, p. 465, that the Turk's skull preserved in the armory of the Historical Museum of the City of Vienna, the former arsenal, is Ḳara Muṣṭafā's is wrong. The question of the talismanic shirt (ʿadā) also preserved there and of the skein of silk is more uncertain. Cf. A. Camesina in the *Berichte und Mitteilungen des Altertumsvereines zu Wien*, viii., Vienna 1865, Appendix, p. xlix. *sqq.* and also J. v. Karabaček in the *Katalog der Historischen Ausstellung der Stadt Wien 1883*, Vienna 1883, Nº. 541. —

Ḳara Muṣṭafā Pasha was exceedingly rich and left a vast estate. According to Sieur A. de la Motraye (*op. cit.*, p. 349), he possessed over 1500 odalisques, the same number of slave-girls, 600—700 black eunuchs and fabulous treasures, all of which passed to the state. He is said to have left 12,000,000 ducats (cf. Franz Wagner, *Historia Leopoldi Magni*, Augsburg 1719, i. 631). Besides several madrasas (cf. J. v. Hammer, *Gesch.*, ix. 158, Nº. 188, 189) he founded a number of mosques, — in Stambul, at Galata, at Adrianople, Belgrade, Djidda and in his native place. His palace (Tirnaḳdji Yalli at Ḳuru Česhme near Constantinople) was sumptuously furnished (cf. J. v. Hammer, *Gesch.*, vii. 362); his splendid tomb in Stambul was destroyed by the mob (Barozzi, *op. cit.*, p. 334). His son was Ḳainaḳ Muṣṭafā Pasha; on his descendants see *Sidjill-i ʿOthmānī*, iv. 402, 5 *sqq.* from below. A sister was married to Ḳaplan Pasha (d. 1091 = 1680 at Smyrna; Magni, *Viaggi per la Turchia*, Parma 1679, p. 488). — Ḳara Muṣṭafā Pasha has been repeatedly made the hero of dramas and romances; cf., for example, *Cara Mustapha Grand Vésir, Histoire contenant son élévation, ses amours dans le sérail, ses divers emplois, le vrai sujet qui lui a fait entreprendre le siége de Vienne et les particularités de sa mort*, Paris 1684, 12°, and Pierre Martino, *L'Orient dans la littérature française au XVIIe et au XVIIIe siècle*, Paris 1906.

ḲARA OSMĀN OGHLU. [See DEREBEYS].

ḲARAPAPAKH ("Black-caps", so called from their head-dress of black lamb-skin), a Turkish people formerly living on the river Borčala or Debeda in the eastern part of the gouvernement of Tiflis, who migrated about 1828 partly to Turkish territory (to the vicinity of Kars) and partly to Persian territory (district of Sulduz, south of Lake Urmia). In the district of Kars they form about 15% of the population; about 1883 they numbered 21,652 of whom 11,721 were Sunnis and 9,931 Shīʿīs (K. Sadovskiy, *Kratkaya zamětka o Karskoi oblasti* in the *Sbor. Mater. etc. Kavkaza*, iii. 315—350); about 1893, 28,366 (N. Aristow, *Zamětki ob etničeskom sostavě tyurkskikh plemen* etc., St. Petersburg 1897, p. 139 *sq.*, quoting *Prav. Věstnik*, 1896, Nº. 74; according to the census of 1897, 29,879. In the "Caucasus Calendar" (*Kavkazskiy Kalendar'*) for 1910, 99 villages of the territory of Kars are given as inhabited by the Ḳarapapakh, of which 63 are in the district of Kars, 29 in that of Ardahan (Russ. Ardagan) and 7 in that of Kagïzman; the number of the Ḳarapapakh is given as 39,000 (*ibid.*, p. 546, article by A. Dirr).

A small village of Ḳarapapakh, inhabited by Tatars, is also mentioned in the gouvernement of Yelisawetpol, in the district of Kazakh (which bounds on the gouvernement of Tiflis). On the Ḳarapapakh in the district of Salduz cf. C. Ritter, *Erdkunde*, ix. 939, 1018 and 1032, following Fraser and Rawlinson (up to 1838), and more recently V. Minorsky (member of the Commission for the Rectification of the Turco-Persian frontier, 1911—1914) in *Materiali po izučeniyu Vostoka*, vīp. 2, Petrograd 1915 (see Index).

These Ḳarapapakh, who are all Shīʿīs, were at one time in Russian service and still preserve the certificates given to their ancestors by Russian generals in recognition of their services. After their transfer (it is said there were only 800 families under the leadership of Mahdī Khān affected) to Persian service the district of Sulduz was allotted to them as *tiyūl* (fief) by ʿAbbās Mīrzā [q. v., i. 13] in return for which they were to furnish 400 horsemen. As landowners the chiefs (Khān, Aghā) of the Ḳarapapakh attained considerable prosperity under Persian rule. After the occupation of the district by the Turks (1905) their situation became much less pleasant, because the Turkish authorities favoured the peasants at the expense of the landowners. In a petition sent on Radjab 15, 1329 (July 12, 1911) to the Russian and English delegates of the commission, the Ḳarapapakh expressed the wish that Persian rule should be restored to their land or that they should be given the opportunity of migrating to the interior of Persia. Salduz was thereupon adjudicated to Persia (protocol of Nov. 4/17, 1913). The Turkish troops had already been withdrawn during the Balkan war (1912). How the situation has developed since the world-war I do not know.

(W. BARTHOLD)

ḲARASĪ, 1) the name of the founder of a Turkoman dynasty in Asia Minor in the viith century A. H. (thirteenth A. D.), the dynasty which was the first to succumb to the Ottomans; 2) the name of the territory ruled by this dynasty, now a sandjaḳ of Turkey.

1. Ḳarasî is said to be a contraction of *Ḳara ʿIsā* or *Ḳara Ese*, the name of a Turkoman chief, a vassal of the Saldjūḳ Sulṭān Ghiyāth al-Dīn Masʿūd, who conquered the province of Mysia for him from the Byzantines in the reign of Andronicos II Palaiologos (Ducas, p. 13). The name of the father of Ḳarasî is also given by the Byzantine historians (Nicephoros Gregoras, i. 214) as Καλάμης, which Mordtmann identifies with the Λαμίσης or Λαμίσσης of Pachymeres (ii. 316, 389), which name perhaps conceals ʿĀlamshāh or Ḳalamshāh (cf. Ibn Baṭṭūṭa, ii. 281).

Although Ḳarasî did not conquer the whole of Mysia at once (Edremid and Assos remained Greek down to the xivth century) he must have had considerable power not least on account of the fleet which he created and with which he conducted raids on Rumelia. His territory became a refuge for the inhabitants of Eastern Anatolia, fleeing before the Mongols, as well as for the Turks when they were driven back after conquering the Dobrūča under Ṣary Ṣālṭyḳ Ghāzī [q. v.]. How long Ḳarasî reigned is not known. About 1330 we find two other rulers in the land, namely Yakhshî Khān in Bergama and Demir Khān in Balikesri. They are mentioned by Ibn Baṭṭūṭa (ii. 316, 317) and in the *Masālik al-Abṣār* (*Notes et Extraits*, xiii. 339, 366; the مرحان mentioned on p. 339 is probably a corruption for Demir Khān), with which authorities the Byzantine writers agree, except that they (Kantacuzenos, i. 339) make Γιαξῆ the father of Ταμιρχάνης, while the *Masālik al-Abṣār* makes the two brothers and sons of Ḳarasî.

The account given by the Ottoman historians, who all follow ʿĀshiḳpāshāzāde (p. 43—45 of the Stambul edition of 1332), is different. They only deal with the dynasty in connection with the annexation of its land by Orkhān. According to them, Ili ʿAdjlān Beg ruled in Ḳarasî and maintained friendly relations with Orkhān; he even sent his youngest son Ṭursun to be educated at Orkhān's court. After ʿAdjlān's death his eldest son (whose name the chroniclers do not give) succeeded him. He made himself so hated by his subjects that his vizier Ḥādjdjī Ilbeki went to Orkhān to seek help against the tyrant. The younger brother Ṭursun thereupon promised Orkhān the towns of Bergama, Balikesri and Edremid, if he would in return leave him in possession of Ḳirildja Ṭūzla and Maḥram (Assos). In keeping with this agreement Orkhān conquered from the Greeks Ulubād (Lopadion) and several other fortresses which still lay as Greek enclaves between the Ottoman lands and Ḳarasî. He then advanced on Balikesri whence ʿAdjlān's son fled to Bergama. At Orkhān's instigation, negotiations for peace were opened between the two brothers; Ṭursun, however, was killed by his brother on the walls of Bergama during the discussion of terms. The latter was then completely overthrown by Orkhān. He had also to leave Bergama and died two years later in Brūsa of the plague. Ḥādjdjī Ilbeki was given the administration of Ḳarasî Ili and the Timariots were left in their fiefs. These events are put by the Ottoman historians to 735 or 737 (1434 or 1436).

If we compare this with the statements first given, we could equate the elder son of ʿAdjlān with Ibn Baṭṭūṭa's Demir Khān (as Aḥmad Tawḥīd does); for the latter traveller gives a very unfavourable account of Demir Khān. Yakhshî Khān would then be the same as ʿAdjlān; Ibn Baṭṭūṭa himself says that Yakhshî Khān only means the "good Khān" (ii. 316) so that his real name might have been ʿAdjlān. It is more important that, as Mordtmann makes probable, the Ḳarasî dynasty existed somewhat longer than the Ottomans say. The Byzantines as late as 1343 still mention a Sulaimān, a descendant of Ḳarasî (Nik. Greg., p. 741; Kantacuzenos, ii. 476, 507), who was married to a daughter of Ventatzes. This is in keeping with the fact that in Orkhān's letter of Muḥarram 1, 741 (June 27, 1340) in which he tells the prince of Djānik of the conquest of Ulubād nothing is said about the land of Ḳarasî (Ferīdūn, *Münshaʾāt*, i. 76). Mordtmann therefore supposes that the country did not finally pass to the Ottomans till a few years later (about 1345) and that the chroniclers have mixed up two events. In any case the Ḳarasî-oghlu dynasty did not arise again later under Tīmūr, as was the case with most other Turkoman dynasties.

There are neither inscriptions nor coins of the Ḳarasî princes; a small mosque at Balikesri is presumably of the pre-Ottoman period.

With the conquest of Ḳarasî Ili a number of able statesmen and soldiers passed into the Ottoman service, such as Ākhī Khalīl, who had led the Muhādjirs out of the Dobrūča, Ḥādjdjī Ilbeki already mentioned, Fāḍil Beg and the celebrated Ghāzī Ewrenos Beg [q. v.].

The lands ruled by the Ḳarasî Oghlu are given in detail by Münedjdjim Bashî, iii. 36.

2. The sandjaḳ of Ḳarasî belongs to the wilāyet of Khudāwendigyār; towards the end of last century it formed for a short time a separate wilāyet along with the sandjaḳ of Bighā [q. v.].

Ḳarasî coincides with the ancient Mysia. The rivers Simaw and Ṣu Sighirli divide the land into a western and eastern half. The eastern half is very inaccessible owing to the irregular form of its thickly wooded mountains and it has no towns of any size; the mountainous centre of the west, also thickly wooded, gives place to flat country as it approaches the coast. The most populous and easily accessible parts are in the region along the railway from Banderma to Smyrna; the capital Balakesri [q. v.] is here. In the south-west is

Bergama [q. v.] the most important town; in this region besides the citadel-crowned rock of Pergamon we have several isolated hills (the Ḳazaḳ Dagh in the north and the Ḳara Dagh in the west). The Pergamene plain is very fertile and thickly populated; besides the Turks there are many immigrant Greeks and Muhādjir settlers and Yürüks. The Greek element greatly preponderates in the little towns on the coast, especially in Edremid. The Muslim element increases as we go eastwards, but the Greeks in the interior speak Turkish. According to Sāmī, the total number of inhabitants of the sandjaḳ is 340,000, of whom half are Turks.

Ḳarasi comprises the following ḳaḍā's: Balakesri, Aiwaliḳ, Kemer Edremid, Edremid Erdek, Banderma, Kūnān, Bighadič and Sandirghi. The exports of the sandjaḳ are considerable owing to the fertility of its soil, its wealth in minerals and its cattle-rearing; according to Sāmī, the exports are six times the value of the imports.

(J. H. Kramers)

AL-ḲARASṬŪN (Ḳarisṭūn), means the steelyard or Roman balance, while the common balance is usually called *al-mīzān* (for other names in place of ḳarasṭūn see below). The general observations that follow here apply to both kinds of balances.

In the systematisation of the sciences a science of weights, balances, etc. is included, for example by al-Fārābī in his *Iḥṣāʾ al-ʿUlūm* and by Ibn Sīnā in the *Risāla fī Aḳsām al-ʿUlūm al-ʿaḳlīya*. Ḥādjdjī Khalīfa says (i. 493) that there are works, both short and long, on this subject but unfortunately he gives no titles. The references in the *Ikhwān al-Ṣafāʾ* should be compared (Bombay ed., 1/ii. 118; Dieterici, *Logik*, p. 55). In the *Ikhwān al-Ṣafāʾ* it is said that every science and art has a "balance" with which to measure; astronomy the astrolabe, geometry the straight line, circle and angle. At the same time a magnitude with which one measures is called a "balance", for example in mensuration the ell, rope, etc. In the science of the weighing-machine that of centres of gravity (*Marākiz al-thiḳl*) has also to be considered, as al-Akfānī specially mentions (*Beitr.*, iv. 105).

The balances used in ancient and mediaeval times were all steelyards and consist of a beam (*ʿamūd*, in al-Djawharī also *ḳaṣaba*) turning on a horizontal fulcrum (*miḥwar*), a lever the centre of gravity of which is below the fulcrum. On the one arm of the beam is hung the article to be weighed and on the other the weights which are to weigh it, usually in scales. The arms may or may not be of equal length; we have equal armed and unequal armed balances accordingly. In standards with arms of equal length, in which to ensure accuracy in weighing a movable running weight (*rummāna*) is used, we have a combination of the two forms. The points, to which the running weight is moved and which are often marked with numerals, are called *arḳām*, *marākiz*, *nuḳra*, *shaʿīra*.

When the beam is horizontal, the balance is known to be in equilibrium. This may be seen approximately with the unaided eye. Sometimes an equilateral triangle is placed below in the centre of the beam, the altitude *h* of which is marked; from the centre of the beam hangs a pointer (*shāḳūl*); if the pointer coincides with the line *h*, the beam is horizontal. Sometimes, as in our balances, a scissors-shaped fork (*fayārān*) is used above the balance and one watches when the tongue (*lisān*) standing up in the middle of the beam lies between the arms of the fork; or sometimes a pointer is attached to the fork above pointing downwards and one watches when the end of this pointer is exactly opposite the tongue below. Finally the tongue may be placed below and the fork hung downwards, turning on the fulcrum of the balance. If there is not equilibrium the tongue falls outside the fork which is always perpendicular. Of technical expressions we might further mention *al-wazn*, the weight as measure of heaviness (*al-thiḳl*) and lightness (*al-khaffa*), the scale (*al-kaffa*), the threads to which the scales are attached (*al-khaiṭ*), the hook on which the scales or the weights are hung (*al-ʿaḳrab*), the arrangement for suspension (*al-ʿilāḳa*).

Almost the only weights used in scientific works are the *dirham* and the *mithḳāl* (7 *mithḳāl* = 10 *dirham* and one *mithḳāl* = 4—4.5 grammes). The absolute value is usually of no importance in the cases we are concerned with, as it is only a question of relations of the weights. Further, 1 *mithḳāl* = 6 *dānaḳ* = 24 *tassūdj* = 96 *arzz*. The normal weight, the standard, with which the other weights are to be compared, is called *sandj* or *sandja*. Weights etc. have been discussed and studied by H. Sauvaire (see the *Bibl.*).

In the theoretical discussion of the balance the first point to be considered is the definition of heavy and light body, the establishment of the centre of gravity, that of stable and unstable equilibrium, which is given by the relative positions of centre of gravity and centre of balance, the investigation of the question if it matters whether the weights are attached directly to the beam or to rods attached to it which are perpendicular or inclining to it.

By a fortunate chance there has been preserved to us the very important work "The Balance of Wisdom", *Mīzān al-Ḥikma*, by Abū Manṣūr Abu 'l-Fatḥ ʿAbd al-Raḥmān al-Khāzinī (c. 1100 A.D.). That he was really the author is certain from a passage in al-Baihaḳī (see *Beitr.*, xx. 73). All the above questions as well as the theory of the definition of specific gravities and some special applications of the balance for measuring time and for levelling are fully discussed by him.

In the general part he carefully considers the achievements of earlier workers in this field, for example the classical writers like Archimedes, Aristotle, Euclid, Menelaus and Pappus. He used the pseudepigraphic work of Aristotle — without, however, mentioning his name —, the μηχανικὰ προβλήματα (cf. Th. Ibel, *op. cit.*, p. 123). M. Steinschneider's statement that there is a translation of the work in the British Museum is wrong, as Mr. E. Edwards informs me. The work is, however, mentioned among those of Aristotle by Ibn al-Ḳifṭī, p. 43, 11. Among Muslim writers Thābit b. Ḳurra, Ibn al-Haitham and Abū Sahl al-Kūhī were specially used by al-Khāzinī. He also deals with a series of balances which have been made by different students (see below). For specific gravities he relied mainly on al-Bīrūnī's work *Maḳāla fī*

'l-Nisab allatī baina al-filazzāt wa 'l-Djawāhir fi 'l-Ḥadjm, on the relation between metals and jewels as regards volume.

A popular discussion of the theoretical considerations involved would take us too far and would have only subordinate interest for Orientalists (cf. the works by Th. Ibel and E. Wiedemann, mentioned below).

The steelyard or Roman balance (*al-ḳarasṭūn*) is a lever with two arms of unequal length, the centre of gravity of which lies below the centrum of balance. The object to be weighed G_1, is placed on the shorter arm at a distance l_1 from the fulcrum, the travelling poise G_2 (*al-rummāna*) is movable along the longer arm. If equilibrium exists at a distance l_2, $G_1\, l_1 = G_2\, l_2$ or $G_1 : G_2 = l_2 : l_1$, i. e. the weights G_1 and G_2 are at equilibrium in inverse proportion to the distance $l_1 : l_2$ (see further below). This principle of the lever is used by different writers as an example of inverse proportion (*takāfu'*). The principle seems to be first laid down by Archimedes (*Opera omnia*, ed. Heiberg, ii. 152); Arabic references are to be found in Aḥmad b. Yūsuf Abū Dja'far al-Miṣrī's work (about 850; Suter, N⁰. 78) on proportion and relationship (*Fi 'l-Nisba wa 'l-Tanāsub*), in an anonymous work in Gotha, N⁰. 1158, 12, in the *Ikhwān al-Ṣafā'* (E. Wiedemann in the *Beitr.*, lviii.), al-Khāzinī (do. in the *Beiträge*, xlviii.). But the ḳarasṭūn is also used as an example for direct proportion in which the greater the weight the greater the distance of the running poise from the fulcrum; so, for example, in al-Miṣrī.

The steelyard is usually called al-ḳarasṭūn. A form frequently occurring, due to a slip in writing, is *al-farasṭūn* (on *ḳarasṭūn* cf., for the rest, Dozy, *Supplément*, ii. 327). The origin of the word has been much discussed. According to P. Duhem, who is followed by H. Diels, with better grounds, *ḳarasṭūn* is the Greek χαριστίων which name Simplicius gives to the σταθμιστικὸν ὄργανον of Archimedes and which means the beam of the balance, and received this name from its inventor Charistion. Cf. H. Buchner, *op. cit.*, and E. Wiedemann, in the *Beitr.*, lxiv. 218 at the end.

Instead of *al-ḳarasṭūn* the word *ḳabbān* or *ḳaffān* is frequently used and at the most different periods. The word comes from the Persian *ḳappān* and perhaps from the Latin *campana* (steelyard). In Egypt a man who has to do with the steelyard is called *ḳabbānī*; there was *al-Dīwān al-ḳabbānī* at which contracts to purchase were concluded. The usual pound was called *al-raṭl al-ḳabbānī*. In his *Fiḳh al-Lugha* (Bairut 1885, p. 318) al-Tha'ālibī gives the word among those taken over from the Greek and equates *al-ḳarasṭūn* to *al-ḳabbān* and *al-ḳusṭās* = *al-mīzān*. (On the etymology of various words for scales and weights cf. S. Fränkel, *Die aramäischen Lehnwörter im Arabischen*, Leiden 1886, p. 198). According to Prüfer (information by letter) our modern steelyards are now called *al-mīzān al-maskūfī* ("the Russian balance") in Egypt.

Al-Djāḥiẓ mentions the *ḳarasṭūn* among the things which the Muslims had received from the Greeks (*Kitāb al-Ḥayawān*, Cairo 1323, i. 41); he further talks of the *ḳarasṭūn* as a means to keep 300 *raṭl* in equilibrium with 30 *raṭl* (*Kitāb al-Tarbī' wa 'l-Tadwīr*), "work on the quadrilateral and round figure", ed. van Vloten, p. 114.

As the two arms of the beam were of different lengths the superior weight of the longer had to be balanced either by a suitable form of the beam or by a special weight attached to the shorter arm. Thābit b. Ḳurra's work on the *ḳarasṭūn*, which is preserved in Arabic and in Latin translations (cf. Buchner, *op. cit.*), is devoted to this problem.

To increase the steelyard's capacity for weighing, several large running-weights are used (see fig. 1): but attachments can also be fixed to the shorter arm of the lever at two distances from the fulcrum, but in this case compensatory weights must be used. If the spaces are in the relation of 1 : 2, the weights of the articles on it are as 2 : 1, when the position of the running poise is the same; two divisions are marked on the longer arm. It is the same when different running-weights are used; a corresponding number of these divisions is called *bāb*.

In order to be able to weigh the *dirham* and the *mithḳāl* with the same divisions, 'Omar al-Khaiyāmī puts the scale for the *dirham* (silver) at a greater distance from the fulcrum than for the *mithḳāl* (gold). If the lever is in equilibrium for the *dirham*, a compensatory weight (*mi'yār al-ta'dīl*) must be added to the shorter arm for the *mithḳāl*.

The beam of the balance may also have divisions marked on the upper and on the lower side and be so arranged that either side may be turned upwards, so that one can weigh with two quite different systems of weights.

In many steelyards, for example those in use in Egypt at the present day, the scale hangs on to the *luḳma* (the "bit"), a piece of metal shaped like . The running poise is a cylinder of brass the interior (*ḳalb*) of which is filled with lead. Attached to it is the hook; the pointed part that moves along the divisions is called *mirāya* (index). The whole apparatus, about five feet long, rests on a wooden support, *shaltsh*; the rod itself is called *badan*.

In the work by Eliyā (mentioned below) methods are given for ascertaining and correcting errors. These may arise from the balance and its attachments having false weights, from the poise being wrong, the beam bent or crooked or the divisions being wrongly marked.

Al-Khāzinī gives two pictures of older standards, one of the generally known (*mashhūr*) ḳabbān (fig. 2) and another (fig. 1) of the *ḳusṭās al-mustaḳīm* of the great mathematician 'Omar b. Ibrāhīm al-Khaiyāmī, author of the celebrated quatrains. The illustration shows the different divisions, the running poises, the different places for the attachments and the marginal notes of the text.

A place in Fez was called al-Ḳarasṭūn, probably because a ḳarasṭūn was placed there (see Dozy, *op. cit.*, s. v.).

The following are Arabic works on weights and balances besides those of al-Khāzinī:

Treatises of Euclid on the balance (*mīzān*), ed. Wöpcke in the *J. A.*, Ser. iv., vol. xviii (1851), p. 27. According to Wöpcke, it comes from the Banū Mūsā, according to M. Curtze and L. Heiberg from Euclid (cf. Th. Ibel, p. 35). The work ascribed to Euclid on "Light and Heavy" is preserved in Arabic and often mentioned.

Works with the title "On the ḳarasṭūn" were written by the Banū Mūsā (about 950), Thābit b. Ḳurra (826—901), Ḳusṭā b. Lūḳā (864—923) and Ibn al-Haitham (965—1036).

Important information on balances, especially the ḳarasṭūn, is also contained in the work on masses and weights by Eliyā bar Shinnāyā (975 to a year later than 1049), Archbishop of Nisibis, which is perhaps based on a work by Ḳusṭā b. Lūḳā, *Kitāb fi 'l-Awzān wa 'l-Makāyil*. Part of it was dealt with by H. Sauvaire in the *J. R. A. S.*, 1877, vol. ix. 291, and 1880, vol. xii. 110; such information is also contained in the work by Ḥasan b. Ibrāhīm al-Djabartī (1698—1774) entitled: *al-'Iḳd al-thamīn fīmā yataʿallaḳu bi 'l-Mawāzīn*, or as it is also called: *al-Durr (al-'Iḳd) al-thamīn fī 'Ilm al-Mawāzīn*.

According to his son 'Abd al-Raḥīm al-Djabartī, weighing machines in Egypt etc. had fallen into great confusion about 1758, which was completely cleared up by his father, who may therefore be regarded as the reformer of Egypt in this respect. In the composition of this work he was assisted by the Shaikh al-Ḳabbān, 'Alī b. Khalīl.

Other authors and their works are: Abu 'l-'Abbās Nadjm al-Dīn al-Khazradjī (1247—1310), *al-Īḍāḥ wa 'l-Tibyān fī Ma'rifat al-Mikyāl wa 'l-Mīzān*, "science of mass and weights"; Ibn Abi 'l-Fatḥ al-Ṣūfī al-Miṣrī (about 1494): Two treatises on the steelyard (*Risālāt al-Ḳabbān*). A number of MSS. on the subject in the Viceregal (now Egyptian) library in Cairo is given by H. Suter in his translation of the math.-astron. part of the catalogue in the *Zeitschr. für Mathematik und Physik., hist.-litter. Abteil.*, year xxxviii.

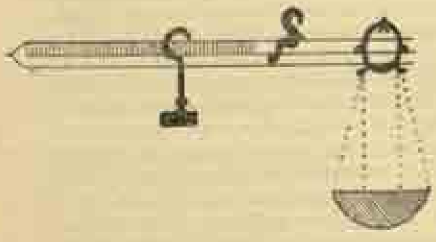

Fig. 2.

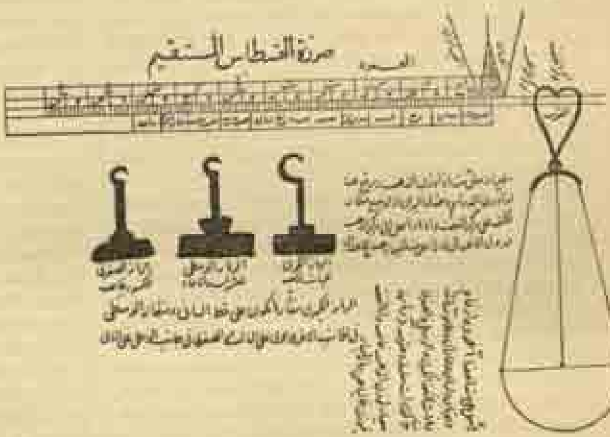

Fig. 1.

Above the beam of the balance is written *al-'amūd*, to the right of it *al-fayārān, markaz* (mark) for gold, for silver. Below are the hook (*al-'aḳrab*). Below the weights is written: the large, middle and small *rummāna* (running poises) for the hundreds, tens and units, for the fractions. Partly below again is information relating in part to the separate running poises. Above on the left of the scale instructions are given for putting on the running poises. Above this the six parts of the balance are given: 1) the beam with the indicator etc.; 2—4) the three *rummāna*'s etc; 5) the scale etc.; 6) the compensatory weight. The illustration is taken from "The Balance of Wisdom".

(1893): Ya'īsh b. Ibrāhīm b. Yūsuf b. Yatmāk al-Amawī al-Andalūsī etc.

Bibliography: As the steelyard (*al-ḳarasṭūn*) and the common balance (*al-mīzān*) are very often treated together in the same works, I give the whole literature here together. Very full references are also given in the works of Buchner, Ibel, Bauerreiss and Wiedemann: N. v. Khanikoff, *Analysis and extracts of the Book of the Balance of Wisdom written by al-Khāzinī* in the *J. A. O. S.*, vi. (1859), 1—123; H. Sauvaire, *On a Treatise on Weights and Measures by Eliā, Archbischop of Niṣībīn* in the *J.R.A.S.*, x. (1878), p. 253—284 and xii. (1880), p. 110—125. Besides the imperfect manuscript in Paris used by Sauvaire there is a complete one in Gotha, Nº. 1331; P. Duhem, *Les origines de la statique*, part I., Paris 1900; Th. Ibel, *Die Wage im Altertum und Mittelalter* (Dissertation, Erlangen 1906); E. Wiedemann, *Die Schrift über den Karasṭūn* in the *Bibl. Math.*, third series, vol. xii. (1912), p. 21—39; H. Bauerreiss, *Zur Geschichte der spezifischen Gewichte im Altertum und Mittelalter* (Dissertation, Erlangen 1914); E. Buchner, *Die Schrift über den Ḳarasṭūn von Thābit b. Qurra*, in the *Sitzungsber. der med.-phys. Sozietät Erlangen*, part lii. *sq.* (1920/21), p. 141—188; Carra de Vaux, *Notes de l'histoire des sciences* in the *J. A.*, 1917, series 11, vol. x. 453.

In the following, the works of E. Wiedemann are collected from the *Beiträgen* (*B.*) *zur Geschichte der Naturwissenschaften* in the *Sitzungsberichte der med.-phys. Sozietät* (*S. B.*) *zu Erlangen*. When the whole part deals with the subject only its number is given. 1) *Wagen bei den Arabern* (*gefälschte*): *B.*, iv., *S. B.*, xxvii. 388—392; 2) *Über die Lehre von Schwerpunkten*: *B.*, v., *S. B.*, xxxvii. 405 and 427; 3) *Zur Mechanik bei den Arabern*: *B.*, vi., *S. B.*, xxviii. 7—10; 4) *Auszüge aus der Schrift des Archimedes über die schwimmenden Körper*, *B.*, vii., *S. B.*, xxviii. 152—162; *Über al-Fārābī's Aufzählung der Wissenschaften*: *B.*, xi., *S. B.*, xxxix.

96; 6) *Lehre vom Schwimmen, Hebelgesetze, Konstruktion des Ḳarasṭūn*: *B.*, xxi., *S.B.*, xl. 133—159; 7) *Über Verfälschung von Drogen usw. nach Ibn Bassām und al-Nabarāwī* (only section iii. need be consulted: references in al-Nabarāwī and Ibn Bassām on balances, weights and measures), *B.*, xl., *S.B.*, 201—206; 8) *Über die Wage des Wechslers von al-Khāzinī und über die Lehre von den Proportionen von al-Bīrūnī*: *B.*, xlviii., *S.B.*, xlviii. 1—15.

Among the **metrological works** are: H. Sauvaire, *Matériaux pour servir à l'histoire de la numismatique et de la métrologie des musulmans* . . . . part 2: *Poids*, in the *J.A.*, series 8, vol. iii. 368—445; iv. 270—321; v. 498—506; part 3: *Mesures de la capacité*, *ib.*, vol. vii. 124—177, 394—468; viii. 272—297. Part 4: *Mesures de longueur et de surface*: viii. 479—536; *Mesures de capacité et de poids dans les ouvrages de médecine arabe*, vi. 80; J. A. Decourdemanche, *Étude métrologique et numismatique sur les misqals et les dirhams arabes*, Paris 1906, and *Traité pratique des poids et mesures des peuples anciens et des Arabes*, Paris 1909.

The following works deal particularly with **specific gravities** etc.: Clément Mullet, *Essais sur la minéralogie arabe. Tableau des densités des pierres précieuses* in the *J.A.*, series 6, vol. xi. (1868), p. 250—253; E. Wiedemann, 1) *Zu al-Bīrūnīs Schrift: Ueber das Verhältnis, das zwischen den Metallen und den Edelsteinen im Volumen besteht*, *B.*, viii., *S.B.*, xxxviii. 163—166; 2) *Bestimmung der spezifischen Gewichte*, *B.*, viii., *S.B.*, xxxvi. 166—180; *a*) Abū Manṣūr al-Nairīzī (not the commentator on Euclid): *Bestimmung der Zusammensetzung gemischter Körper*; *b*) Notes by 'Omar al-Khayyāmī: *Bestimmung des Gehaltes von Legierungen zweier Metalle an diesen*; *c*) An essay on specific gravities ascribed to Plato; 3) *Bestimmung der Zusammensetzung von Legierungen nach al-Khāzinī* (contains a collection of the passages publ. down to 1908 from al-Khāzinī's work, *B.*, xv., *S.B.*, lx. 105—159; 4) *Vorbereitung der Bestimmungen der spezifischen Gewichte nach al-Bīrūnī*, *B.*, xxxvi, *S.B.*, xlv. 33—34; 5) *Ueber die Gewichte der Kubikelle u.s.w. verschiedener Substanzen nach arabischen Schriftstellern*, *B.*, xxxiv., *S.B.*, xlv. 168—173; 6) *Ueber das al-Bīrūnīsche Gefäss zur spez. Gewichtsbestimmung* in the *Verhandl. der deutschen Physik. Gesellschaft*, x. 339—343.

(E. WIEDEMANN)

ḲARASU. [See AL-FURĀT].

ḲARAṢU-BĀZĀR, a small town in the Crimea, east of Simferopol, in 45° 10' N. Lat. and 34° 30' E. Long. of Greenwich. In 1736 after the destruction of Baghče Saray [q. v.] by the Russians, Ḳaraṣu-Bāzār was for a short time the residence of the Khān; but this town was also taken by the Russians under General Douglas in 1737. The town has preserved its oriental aspect down to the present day: there are many *khān*'s there with warehouses and coffeehouses. The large Tāsh Khān, said to have been built as a fortress in the seventeenth century, now serves the same purpose. The town was several times pillaged by the Don Cossacks in the seventeenth century. Cf. Velaminof Zernof, *Matériaux pour servir à l'histoire du Khanat de Crimée*, St. Petersburg 1864, Index.

(W. BARTHOLD)

ḲARATEGIN, a district on the Wakhsh or Surkhāb (Turk. Ḳizil Ṣū), one of the rivers which form the Āmū Daryā, called Rāsht by the Arab geographers [cf. i. 339]. The principal place (or "the fortress", *al-Ḳal'a*, al-Iṣṭakhrī, p. 340) of Rāsht corresponded as regards its situation perfectly with the modern Garm, the only town in Ḳarategin. Rāsht then formed one of the frontier lands of Islām and was defended on the east against the inroads of the Turks by a wall built by Faḍl b. Barmak [on him cf. i. 665, ii. 57]. In ancient times there ran through this region the road from Western to Eastern Asia described by Ptolemy. Ḳarategin is frequently connected with the "highlands of the Komeds" Κωμηδῶν ὀρεινή (e.g. as recently as Chavannes, *Documents sur les Turcs Occidentaux*, p. 164, on the authority of Sewertzow in the *Bull. de la Soc. de Géogr.*, part iii. for 1890, p. 420—431); but in the middle ages the name (Arabic Kumīdh or Kumādh, Chinese Kiu-mi-t'o) was borne by the country below Rāsht. In the middle ages and later the valley of the Wakhsh seems to have had no great importance for trade; as far as has been so far ascertained, only the embassy sent by Shāh Rukh to China (1419—22) used on its return journey the road between Farghāna and Balkh described by Ptolemy.

Like all the highlands on the upper course of the Āmū Daryā Ḳarategin also was under its own rulers down to quite modern times; in the pre-Mongol period only one Amīr of Rāsht, Dja'far b. Shamāluk (Gardīzī in Barthold, *Turkestan* etc., i. 9, under date 337 = 948/949) is mentioned. Under Tīmūr and later the name of the country Ḳayir Tegin (or Tigin) is found, in the printed edition of the *Ẓafar-nāma*, i. 189, erroneously Tir Tegin; when and how the present form arose is unknown. In the manuscripts of the *Bābur-nāma* (ed. Beveridge, f. 33b and f. 63b Karātigin, f. 69b and f. 81 Ḳayittigin) and of the *Ta'rīkh-i Rashīdī* (transl. Ross, especially p. 241) both forms are found. *Ḳarategin* is popularly explained as a Turkish word for "blackthorn" (cf. Radloff, *Wörterbuch*, ii. 135, Ottoman *Ḳara dikān*) or as the name of the two first Ḳirghiz tillers of the soil (I. Minayew, *Svyedeniya o stranakh po verkhovyam Amu Daryi*, p. 241, following Arendarenko). As is narrated in the *Baḥr al-Asrār* of Maḥmūd b. Walī (India Office MS., Ethé, *Cat.*, No. 575, f. 277a, in Radjab, 1045 (Dec., 1635—Jan., 1636) 12,000 families of Ḳirghiz, then still pagans, went through Ḳarategin to Ḥiṣār. At the present day the Ḳirghiz (Ḳara Ḳirghiz) form a part of the population of Ḳarategin along with the Tādjīk (and a small number of Özbegs).

In the nineteenth century the princes of Ḳarategin, like the princes of Badakhshān [cf. i. 552 *sqq.*], claimed descent from Alexander the Great. Ḳarategin was then under the suzerainty of the Khāns of Khoḳand; their subjection is said to have taken place under Muḥammad 'Alī Khān (1822—42) in 1250 (1834) (Nalivkin, *Kratkaya istoria Kok. Khanstva*, p. 134 *sq.*); but already under 'Ālim Khān (beginning of the nineteenth century) we find men from Ḳarategin forming a considerable part of the standing army founded by this Khān (*Ta'rīkh-i Shāhrukhī*, ed. Pantusov, p. 42 *sq.*). A campaign from Khoḳand against Ḳarategin in 1275 (1858) under Malla Khān (1858—62) is also mentioned (Nalivkin, *op. cit.*, p. 190); the ruler of Ḳarategin was at this time Muẓaffar Khān

(later also called Muẓaffar Shāh). When in the year 1869 Ḥiṣār had to submit to the Amīr of Bukhārā, Karategin also was occupied by the troops of the Amīr and Muẓaffar Khān taken as prisoner to Bukhārā; the conflict thus engendered between Bukhārā and Khōḳand was only settled by the verdict of the Russian governor-general (K. v. Kaufmann) and Muẓaffar Khān again restored to his principality; but after his death Karategin was definitely incorporated in Bukhārā. Ḳarategin also became involved in the last fighting in Farghāna before the final subjection of this country by the Russians (1874—1876); the Beg Muḥammad Raḥīm Shāh advanced to resist the insurgents with force, although they had been favoured by his brother Muẓaffar Shāh (apparently not identical with the prince already mentioned). The frontier between Farghāna and Ḳarategin (on the heights east of the valley of Kičik Karamuk Su) was defined by a treaty concluded between Skobelew and another brother of the Beg, Ṣafī Khān on August 28 (Sept. 9), 1876.

It was not till 1878 that Ḳarategin was for the first time visited by a European (W. Oshanin). In the following decade the governor Khudāi Naẓar Atālïḳ and his successor Almās Beg had a mountain road, one of the best in Central Asia, built through Ḳarategin on the right bank of the Wakhsh, which made Ḳarategin much more accessible, but in winter Ḳarategin is completely cut off from neighbouring lands. Oshanin and later travellers describe Ḳarategin as a fertile country with numerous villages and orchards, and as one of the most prosperous provinces in the kingdom of the Amīr of Bukhārā. It is said (Logofet, p. 322 sq.) that in Ḳarategin all the inhabitants without exception make a living by agriculture (including gardening), and that there is no landless proletariat there; anyone who neglects his piece of land for three years loses any right to it. On the other hand Rickmers (p. 340) says that many peasants go from Ḳarategin to Farghāna, work there as day-labourers and servants and bring their savings home, so that Russian money is taken more readily there than Bukharian. The only town is Garm; as regards the number of inhabitants, estimates, as usual in the east, are very contradictory: according to Oshanin 2,300 houses, to Masalskiy 4,000 people, to Logofet 15,000. Information regarding administration, taxes, etc. is given in particular by A. Semenow (Journey of 1898). The question: "When will the White Czar (*pādishāh-i safīd*) take us to himself?" was frequently asked Semenow by the people embittered by the arbitrary conduct of the tax-collectors.

Bibliography: Down to 1878 the best authority is Abramow in the *Izv. Russkago Geograf. Obshč.*, vi. 108 *sq.* and Arendarenko in the *Voyenniy Sbornik*, May 1878, p. 116 *sq.*; after him Minayew in the *Swyedeniya otranakh* etc., p. 196 *sq.*, 233 *sq.*; notes from Oshanin's journal in the *Izv. R. Geogr. Obshč.*, 1880—81; Kostenko, *Turkestanskiy Kray*, ii. 197 *sq.*; also *Proc. R. Geogr. Soc.*, 1880, p. 575; quoted by W. Geiger, *Ostiranische Kultur*, p. 22. Later travellers: A. Semenow, *Etnograf. ocherki Zarafshanskikh gor, Karategina i Darwaza*, Moscow 1903; D. Logofet, *V gorakh i na ravninakh Bukhari*, St. Petersburg 1913, p. 322 *sq.*; W. R. (W. Barthold)

ḲARAUL (Ḳaravul, Ḳaraghul), an Eastern Turkī word meaning guardian, watcher, guard, sentinel (borrowed by the Russian in the last sense); a hunter who watches game from a distance; the chief of a body of these hunters is called *ḳaraul-begi*. In Ottoman Turkish *ḳaraḳol* means a police-station. The word is connected with the root *ḳara-*, *ḳarala-*, to observe, watch or guard. — At the present day in Bukhārā, the rank of *ḳaraul-begi* corresponds to that of lieutenant (F. Kounmietsov, *Lutte des civilisations et des langues*, Paris 1912, p. 83).

In Persia the name *ḳaraul-khāna* is given to the watch towers erected on the mountain tops, commanding the surrounding country (Chodzko, *Specimens of the Popular Poetry of Persia*, Or. Transl. Fund, p. 228, note).

Youssouf, *Dict. turc-français*, s. v.; Barbier de Meynard, *Dict. turc-français*, s. v.; Mme Carla Serena, *Hommes et choses en Perse*, Paris 1883, p. 56.

(Cl. Huart)

ḲARA YAZÏDJÏ, leader of a serious rebellion in Asia Minor from 1599 to 1602. His proper name was ʿAbd ul-Ḥalīm and he was chief of the corporation of Segbāns (*Segbān bölük bashi*). His followers consisted of Kurds, Turkomans and a large body of soldiers who had fled from the army in Hungary, chiefly on account of the Grand Vizier Čighāla's harsh and cruel treatment of them. They are therefore called *Firārīs*; another name is *Djalālīs*; their rebellion is known as the *Khurūdj-i djalāliyān*. Ḳara Yazïdjï's first act was the occupation of Ruhā or Urfa (= Edessa) in 1008 A.H. The former Beglerbeg of Abyssinia, Ḥusein Pasha, who had been sent as an inspector to Anatolia in the previous year and had also rebelled against the Sulṭān, took refuge with Yazïdjï on hearing that Sinān Pasha Zāde Meḥmed Pasha had arrived at Ḳonya in order to bring him to book. They sustained together a siege in Ruhā in which they were finally compelled to cast bullets from silver coins, but in the end Ḳara Yazïdjï made terms with the government troops by handing over Ḥusein Pasha to them. The latter was sent to Constantinople and put cruelly to death. Ḳara Yazïdjï was then appointed governor of Amasia. In this town he again began a reign of terror; as Ewliya Čelebi tells (ed. Constantinople 1314, ii. 184), the inhabitants hid themselves and their possessions in the mountain caves. Meḥmed Pasha again succeeded in driving him into the mountains round Siwās and, after passing the winter in Diyār Bakr, marched a second time against him. But Maḥmūd Pasha, Beglerbeg of Siwās, and other notables went to Constantinople and convinced the authorities that Ḳara Yazïdjï had abandoned his evil ways. Accordingly the latter was given the sandjak of Čorum, on condition that he would swear fealty. But, with his brother Deli Ḥasan (in Naʿīmā, i. 128 the name is once written Ḥusein) he continued his propaganda, so that Ibrahim Pasha, former governor of Damascus, and Ḥasan Pasha, former governor of Baghdād,

were sent against them; these two Pashas were utterly defeated at Ḳaisarīye on the 11th of Shawwāl, 1008 (April 25, 1600) by 20,000 rebels. After this victory Ḳara Yazîdjî regarded himself as an independent sovereign over the regions which he had taken from the Ottoman power. Finally he was defeated on the 22th of Shawwāl, 1010 (April 5, 1602) by the vizier Ḥasan Soḳolli, at Sepasli. The rebels fled to the mountains of Djānik; here Ḳara Yazîdjî died in Ramaḍān of the same year (according to *Sidjill-i ʿOthmānī*, Constantinople 1311, iii. 301 *sqq.*, his death took place already in 1009). He was succeeded by his brother Deli Ḥasan and three chieftains called Shāhwerdi, Yular Ḳapdi and Ṭawīl; his body was cut by them into several pieces which were buried in different spots in order that the ʿOthmānlî's might not have it in their power to burn the corpse. The new chiefs afterwards waged war successfully against the already mentioned Ḥasan Pasha, who was killed by them in Toḳāt.

The inner history of this rebellion, which continued until its bloody suppression by Murād Pasha in 1605, has not yet been sufficiently studied. It does not seem unreasonable to seek religious pro-Shīʿa motives behind it (cf. Babinger in the *Z. D. M. G.*, lxxvi. 143), as a name like Shāhwerdi suggests. On the other hand the moment was very favourable for a rebellion, the bulk of the ʿOthmānlî power being then occupied in Hungary at the siege of Ḳanizha. On the name Djelālī cf. Babinger, *Isl.*, xi. 14, note 3.

ḲARĪʾ. [See ḲIRĀʾA, ḲURʾĀN].

ḲARĪB, the name of a modern metre used by the Turks and Persians and called *al-muḍāriʿ* by the Arabs. Its measure is in each hemistich: *mafāʿīlun*, *mafāʿīlun*, *fāʿilātun*.

The principal variations are: *mafāʿīlun* by *ḳabḍ* [q. v.], *mafāʿīlu* by *kaff* [q. v.], *faʿilātun* by *khabn* [q. v.], *fāʿilāt* = *fāʿilān* by *ḳaṣr* [q. v.] and lastly *fāʿilā* (= *fāʿilun*) by *ḥadhf* [q. v.].

In Persian, it should be added, *mafāʿīlun* may become *fāʿīlun* (= *mafʿūlun*) by *kharm* [q. v.].

Bibliography: See the article ʿARŪḌ. (Moh. Ben Cheneb)

KARIBĪYA. [See KURAIBĪYA].

KARĪM, of persons: generous, benignant, liberal, honourable, noble, high-born; of things: bounteous, plenteous, honourable, noble, splendid. *Al-Karīm* is one of the ninety-nine attributes or "excellent names" (Sūra vii. 179) of God, but in the twenty-seven passages in which the word occurs in the Ḳurʾān it is only twice applied to Him. It is applied to Muḥammad, to an angel, and, ironically, to misbelievers, but it more frequently qualifies things, e. g. the recompense and provision awaiting the faithful, the Ḳurʾān, the letter sent to Bilḳīs, queen of Sabaʾ [q. v.], the entry of the faithful into paradise, plants, cornfields, dwellings, the mode of addressing parents, etc. In Ḥadīth the term is often applied to Yūsuf, who is called *al-Karīm ibn al-Karīm* (al-Bukhārī, *Manāḳib*, bāb 13; *Tafsīr*, Sūra 12, bāb 1). *Al-Karīmatān* denotes the eyes (Aḥmad b. Ḥanbal, *Musnad*, iii. 283).

Bibliography: The lexica, s. v. (T. W. Haig)

KARĪM KHĀN ZEND (Muḥammad), a member of a family of no special distinction belonging to a tribe of the Lūr, was in reality king of Persia at the end of the xviiith century without having the title, as he always retained the surname of *Wakīl* (plenipotentiary), under which his name has remained popular. He was at first one of the lieutenants of the Bakhtiyārī general ʿAlī Mardān Khān who, taking advantage of the anarchy that followed the assassination of Nādir Shāh Afshār, seized Iṣfahān and placed on the throne the last scion of the Ṣafawī dynasty, Shāh Ismāʿīl III, aged eight (1164 = 1757). The murder of ʿAlī Mardān, the defeat of the governor of Ādharbaidjān and of Muḥammad Ḥusain Khān, lord of Māzandarān, gave him possession of the whole of western Īrān. Attacked in Shīrāz by Muḥammad Ḥasan, son of Fatḥ ʿAlī Khān Ḳādjār, who had just seized Iṣfahān, he saw the army of his adversary melt away; a year later, the Ḳādjār prince was killed in a battle against Karīm Khān's lieutenants. Khorāsān, however, eluded Karīm Khān; this province remained in the hands of the blind Shāh Rukh, a descendant of Nādir Shāh. Karīm's two generals were his two brothers Ṣādiḳ and Zakī of whom the latter afterwards made himself notorious for his cruelties. The former directed a campaign against the Ottomans: the town of Baṣra, besieged for 13 months (1189 = 1775), surrendered to the Persians and remained in their hands till the death of the Wakīl. He busied himself in restoring peace to the country and in developing agriculture and commerce; although not in any degree educated, he attracted scholars to his court and proclaimed himself their protector. His usual residence was Shīrāz which he adorned with a number of buildings still standing to-day (mosque, caravanserai and baths); the tomb of the poet Saʿdī was restored by his orders; the tomb of the poet Ḥāfiẓ in beautiful Tabrīz marble on which were inscribed two odes by the celebrated poet; the *Haftten* (seven bodies) was consecrated to the memory of the pious dervishes who inhabited it; it is a pleasure house the interior of which is adorned with paintings of Biblical scenes or imaginary portraits of Saʿdī and Ḥāfiẓ; not far from it is the garden of the Wakīl, better known as the *Djahānnumā* (mirror of the world), the name given it by Fatḥ ʿAlī Shāh; the garden called Bāgh-i Dilgushā (garden which rejoices the heart), now occupied by kitchen-gardens.

He died at the age of 74 on the 23rd of Ṣafar, 1193 (March 13, 1779) — the date corrected according to Olivier. After his death, Persia fell back into a state of anarchy from which it was only raised by the coming of the Ḳādjār dynasty.

ḲARĪN means a companion of any kind (*muṣāḥib* in the *Ṣiḥāḥ* and the *Lisān*, xvii. 214 *sq.*; *ṣāḥib* in al-Baiḍāwī on Ḳurʾān, xli. 24); thus Abū Bakr and Ṭalḥa and Abū Bakr and ʿUmar are called "the two *ḳarīn's*." It is plain, too, that for Muhammad and pre-Muslim Arabia the word also suggested a spirit-companion. That is the overwhelming usage of the Ḳurʾān. In theology, every human being has, as a *ḳarīn*, a *shaiṭān* and also an angel appointed to accompany him and, respectively, to tempt him to evil or to incite him to good (*Lisān*, loc. cit.). The *shaiṭān* is sometimes called a *djinni* and will be cast into the Fire at the Judgment along with his human comrade whom he has led astray. These two *ḳarīn's* are therefore different from the recording angels which accompany each human being (Ḳurʾān, lxxxii. 10—12). The basis of this is both Ḳurʾān and Ḥadīth. The word occurs in the Ḳurʾān eight times; in Ḳurʾān, xxxvii. 49, a human companion is evidently meant (*khalīl fi 'l-dunyā*, al-Baiḍāwī); in Ḳurʾān, iv. 42 (bis), the *Shaiṭān* is a *ḳarīn*; in Ḳurʾān, xli. 24, the plural *ḳuranāʾ* is used, but the context and especially the word *ḳayyaḍa* (see al-Baiḍāwī on this) shows that tempting spirits are meant; closely parallel is Ḳurʾān, xliii. 35, 37, where a *shaiṭān* is "ordained" (*ḳayyaḍa*) by Allāh as a *ḳarīn*; on Ḳurʾān, l. 22 al-Baiḍāwī is in doubt whether by *ḳarīn* a *shaiṭān* or an angel is meant, but on v. 26 he is certain that it is a *shaiṭān*. In this he follows the oldest exegetical tradition on the whole subject given in al-Ṭabarī's *Tafsīr*, xxvi. 93 *sq.* Even the prophets have such a *shaiṭān*, but that of Muḥammad was converted by him to Islām; a great many traditions bearing on this are given in the *Aḥkām al-mardjān* of Muḥammad ʿAbdallāh al-Shiblī, bāb x., p. 26 *sq.* (ed. 1326). A very suggestive and full ethical-theological treatment of the whole subject is in the *Iḥyāʾ* of al-Ghazālī, *Kitāb ʿadjāʾib al-ḳalb*, ed. with comm. *Itḥāf al-sāda*, vii. 264 *sq.*, where the traditions are given in detail; cf. D. B. Macdonald, *Religious Attitude in Islam*, p. 274 *sq.* At the other extreme is the folkloristic development in popular Islām; for it see S. M. Zwemer, *Influence of Animism on Islam*, chap. vi. Much of this, too, may easily have been in the mind of Muḥammad and his world.

Another use of *ḳarīn* in old Arabia was for the *djinnī* who accompanied a poet and brought to him his verses. This use has been transferred in Islām to the angel who consorted with the Prophet and brought him his revelations (*Lisān*, loc. cit.; Goldziher, *Abhandlungen zur arab. Philologie*, i. 5 *sq.*; D. B. Macdonald, *op. cit.*, p. 19 *sq.*).

KARKARALI, a Cossack village and the capital of a district in the territory of Semipalatinsk, 49° 2′ N. Lat., 76° 7′ E. Long. (Greenw.); it has about 3000 inhabitants of whom two-thirds are Muḥammadans. (W. Barthold)

al-**KARKH**, the name of an important quarter of old Baghdād. The word Karkh, which comes from the Aramaic (*Karkhā*), is found in Greek and Roman writers as Carcha, Charcha and Charax (see Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, Suppl. i. 275, 283) and means town; cf. Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iv. 252, 16; Streck, *op. cit.* (see *Bibl.*), p. 92, 186; G. Le Strange, *Baghdad*, p. 63). There was still in the Muslim period a whole series of places or parts of towns called al-Karkh within the area of influence of Aramaic culture, in the ʿIrāḳ, Khūzistān and al-Djazīra; they were distinguished from one another by the addition of a geographical name (like Maisān, Sāmarrā). Yāḳūt, iv. 252—257, gives 9 such places; see also al-Ṭabarī (ed. de Goeje), Indices, p. 762. Our Karkh is often more exactly defined as Karkh Baghdād.

As the Aramaic name shows, the al-Karkh quarter was already in existence before the foundation of Baghdād by al-Manṣūr (145 = 762), as a small independent township said to have been founded by the Sāsānian Shāpūr II (309—379 A.D.), which, like the other earlier settlements on the site of the future capital of the Caliphs, was no doubt mainly inhabited by Aramaic Christians (cf. above, i. 564). This pre-Muslim Karkh was selected by the Caliph al-Manṣūr to be the mercantile centre and it soon became the busiest quarter of Baghdād owing to its commercial character. Al-Karkh was at first quite separate, south-east of the so-called round city of al-Manṣūr and a fair distance from it; but as new roads and squares grew up all around it, it soon became merged in the sea of houses of the great capital.

Al-Karkh was watered by the Nahr ʿĪsā, the most northerly large canal of the Euphrates in the ʿIrāḳ, as well as by its branches, the Nahr Ṣarāt and the Nahr Karkhāyā. The latter is the "Karkhian Canal" (Karkhāyā = כרכיא; see Frankel, *Die aram. Fremdw. im Arab.*, Leiden 1886, p. xx) which left the Nahr ʿĪsā below the small town of al-Muḥawwal near the village of al-Barāthā (see above, i. 655) and supplied the southern part of the western half of Baghdād, i.e. the mercantile quarter and its neighbourhood, with its branch channels, which in places ran underground. Numerous bridges carried the busy traffic over it. On the Nahr Karkhāyā and its canal system see Ibn Serapion, ed. G. Le Strange in the *J. R. A. S.*, 1895, p. 24, 17—25; p. 286—8, 292—3; al-Khaṭīb al-Baghdādī, ed. Salmon (see the *Bibl.*), p. 66—68, 154—5; Yāḳūt, iv. 252; Streck, *op. cit.*, p. 85—90; G. Le Strange, *Baghdad*, p. 52—56, 63—80; Herzfeld in Sarre-Herzfeld (see the *Bibl.*), ii. 110.

In the civic history of Baghdād, especially during the Būyid period (xth—xith century), al-Karkh, which was regarded as a Shīʿa stronghold, is frequently mentioned (cf. above, i. 567). Under the Būyids who had ʿAlid sympathies the already frequent encounters and frictions between the Sunnis and Shīʿīs of the capital became more and more serious. Sanguinary street fighting between the two hostile sects often accompanied by pillaging and incendiarism was the order of the day. Al-Karkh was usually in the very centre of this civil strife; its inhabitants were always at daggers drawn with the Sunnis of the adjoining quarters (Bāb al-Baṣra etc.). Sulṭān Djalāl al-Dawla (416—435 = 1024—1044) under whom the situation had become unusually serious was even on one occasion, in 422 (1031), reduced to take refuge with his Shīʿī co-religionists in al-Karkh. In 445 (1053) a considerable part of al-Karkh was laid in ashes as a result of these feuds. A great fire had previously devastated al-Karkh under the Caliph al-

Wāthiḳ (227—232 = 842—7); but the destruction was very soon made good.

In course of time numerous mosques and tombs arose in the area of al-Karkh in the wider sense, by which the whole southern half of Baghdād west of the Tigris was often meant. The most celebrated is the tomb-mosque of the local saint Ma'rūf b. al-Faizurān al-Karkhī (d. 200 = 816) and the alleged tomb of Zubaida, the wife of Hārūn al-Rashīd, barely 300 yards south of it. Both mausoleums (see also I, 569) still exist and are important starting points for studying the topography of old Baghdād. In their present form they were renovated by the Caliph al-Nāṣir (575—622 = 1180—1225); but they have been frequently restored since then. On the tomb of al-Karkhī, which as early as the ixth century was one of the most popular places of pilgrimage in Baghdād and which lies in the middle of an impressive cemetery as in the 'Abbāsid period, cf. Streck, *op. cit.*, p. 159; G. Le Strange, *op. cit.*, p. 98—100, 350; Massignon, *op. cit.* (see the *Bibl.*), p. 49, 108; Herzfeld, *op. cit.*, ii. 172—3. For the so-called grave of Zubaida see G. Le Strange, *op. cit.*, p. 100, 161 *sq.*, 350 *sq.*; Massignon, *op. cit.*, p. 108 *sq.*; Herzfeld, *op. cit.*, p. 173. On other mosques and tombs in the west side of Baghdād see Massignon, *op. cit.*, p. 64 *sq.* or 94 *sq.*

Al-Karkh was not only the largest but also the most long-lived quarter of the western half of Baghdād. When the quarters around it had gradually fallen into ruins, it stood quite isolated — as early as Yāḳūt's day for example (beginning of the xiiith cent.) — like a separate town, as it had been in the earliest period after the foundation of Baghdād. It was a mile distant from the then still inhabited quarter of Bāb al-Baṣra (in the south-east of the old round city of al-Manṣūr). In the later middle ages (cf., for example, Ibn Baṭṭūṭa in the xivth century) the name of the Bāb al-Baṣra quarter was not infrequently extended to all the quarters of western Baghdād still standing i.e. even to include al-Karkh; cf. G. Le Strange, *op. cit.*, p. 336; Herzfeld, *op. cit.*, ii. 114 *sq.* We may here point out that the topography of al-Karkh and its vicinity in Yāḳūt is not quite in agreement with the other sources. It appears that the local knowledge of the author of the *Geographical Dictionary* at the time of writing was no longer quite reliable. Cf. G. Le Strange, p. 84, 159.

Al-Karkh is also known as a rare mint; there are coins of the reigns of the Caliphs al-Muktadir, al-Ḳāhir and al-Rāḍī, dated in the years 308, 315, 318, 321, 325; cf. *Numismatische Zeitschrift*, Vienna 1893, vol. xxxiv. 321; Lavoix, *Cat. des Monn. Mus. de la Bibl. Nat.*, i. 285; *Numismatic Chronicle*, 1902, p. 272; 1919, p. 197. The wine of al-Karkh was highly esteemed; in poems of the older 'Abbāsid period (e.g. in Abū Nuwās, Ibn Mu'tazz) it is often mentioned; cf. G. Jacob in *Oriental. Studien, Th. Nöldeke ... gewidmet*, Giessen 1906, p. 1065.

At the present day the part of Baghdād on the right bank of the Tigris, which barely makes up a third of the area of the city, is called Karkhiaka, properly (Turkish) Ḳarshy Yaḳa = the other side (lying opposite the city proper on the east bank), a reproduction of the popular Arabic *Hādak el-Djānib*. This name has therefore no connection with al-Karkh (the contrary view is held by Le Strange, *op. cit.*, p. 66). Ḳarshiaka was for long merely an insignificant suburb; but in recent years it has increased somewhat in importance and will certainly continue to do as the railway station of Baghdād is there. Since the second half of the xviiith century Arabs of the tribe of 'Uḳail ('Ogēl, 'Agēl) have settled here, who with other caravan people form at the present day a considerable part of the inhabitants of this western town. Cf. thereon Černik's expedition in *Petermanns Geograph. Mitteil.*, supplem. part 44, Gotha 1875, p. 28, 30; v. Oppenheim, *Vom Mittelmeer zum persischen Golf*, Berlin 1900, ii. 74, 238; Cl. Huart, *Hist. de Bagdad dans les temps modernes*, Paris 1901, p. xi. *sq.*, 188 *sq.*; Massignon, *op. cit.*, p. 99.

Reise im Euphrat- und Tigrisgebiet*, ii., Berlin 1920, p. 105, 110, 112, 114 *sq.* — Cf. the plans of Baghdād in G. Le Strange, *Baghdad*, plan iii. and vii. and in Herzfeld, who (probably rightly) differs somewhat from G. Le Strange on the exact localisation of al-Karkh; see also the plan of modern Baghdād (scale 1 : 10,000), prepared by the cartographical section of the deputy General Staff of the German Army in 1917.

(M. STRECK)

KARKHA. [See KERKHA].

AL-**KARKHĪ**, ABŪ BAKR MUḤAMMAD B. AL-ḤASAN (or AL-ḤUSAIN), was one of the most important mathematicians of the Arabs; he also calls himself AL-ḤĀSIB (the arithmetician). He lived in Baghdād in the time of Abū Ghālib Muḥammad b. Khalaf Fakhr al-Mulk, vizier of the Būyid Bahā' al-Dawla [q. v.] and his son Sulṭān al-Dawla Abū Shudjā'. The date of his death is not known but it may lie between 410 and 420 (1019—1029). The two of his mathematical works that still exist are entitled *al-Kāfī fi 'l-Ḥisāb* (the requisite for arithmetic) and *al-Fakhrī* (i.e. the book dedicated to the vizier Fakhr al-Mulk). The first exists in a unique manuscript in Gotha, the second in Paris, Oxford and Cairo. The Arabic text of neither of these works has yet been published but there is a German translation of the former by A. Hochheim, *Kâfî fîl Hisâb des Abu Bekr Muh. b. Alhusein Alkarkhi*, in 3 parts, Halle a/S. 1878—80, and a synopsis of the second in French by F. Woepcke, *Extrait du Fakhrî*, Paris 1853. The second work is the most important next to the *Algebra* of al-Khaiyāmī that has come down to us on this branch of mathematics. In it al-Karkhī closely follows the Greek mathematician Diophantus of Alexandria; for the first time among the Arabs indeterminate equations appear in this work and they are solved after the fashion of the Greek mathematicians;

whether al-Karkhī deliberately took no notice of the Indian methods or was not acquainted with them cannot be decided. In his book on arithmetic, like almost all Eastern Arab mathematicians (except 'Alī b. Aḥmad al-Nasawī, about 980—1040), he does not use Indian numerals but writes out all the figures in words.

Bibliography: There is not a separate article on al-Karkhī in any of the Arab biographical works so far published; he is only occasionally mentioned in Ibn Khallikān, ed. Cairo 1310, ii. 65; transl. by de Slane, iii. 279. Cf. also M. Cantor, *Vorlesungen über Gesch. d. Mathem.*³, i. 718—720; H. Suter in the *Abhandl. z. Gesch. d. mathem. Wissensch.*, x. 84.

(H. SUTER)

ĶARĶĪSIYĀ (also ĶARĶĪSIYA), a town in al-Djazīra on the left bank of the Euphrates, close to the confluence of the Khābūr, a little above 35° N. Lat. Ķarķīsiyā is simply an Arabic reproduction of the Graeco-Roman name (τὸ) Κιρκήσιον, (τὸ) Κιρκήσιον κάστρον or κιρκίσιον (Κιρκισία in the *Notit. episcop.*, ed. Parthey, p. 87), Circesium, Syriac Kerkusion, Latin = castrum Circense, "the castle with the circus"; cf. Nöldeke, *op. cit.* (see *Bibl.*), p. 3. Ḥamza al-Iṣfahānī in Yāķūt, iv. 65, 21 sq., still knew the etymology of the place-name (Ķarķīsiyā, arabicised from Kirkīsiyā, from *kirkis* = arab. *ḥalbe*, Hippodrome). The name Circesium for the place at the mouth of the Khābūr in any case first appeared, when a Roman military station was built there. This perhaps may have been even before Diocletian. It was, however, this Emperor who first made the place of great importance by making it a powerful fortress on the extreme frontier of the Roman Empire in Southern Mesopotamia. From this it seems quite impossible that Circesium could have been a latinisation of the Aramaic *Karkā* = town (see the article AL-KARKH), as Moritz, *op. cit.* (see *Bibl.*), p. 37, supposed; see Streck's arguments in the *Z. A.*, xxvii. 259.

A situation so favoured by nature as the mouth of the Khābūr must certainly have been already inhabited in remote antiquity. But the names of the settlements there have — as frequently happens in the East — changed several times in the course of centuries.

The old native name of the place was perhaps the Nabagath mentioned by Isidor of Charax (cf. Herzfeld, *op. cit.*, i. 174). Another name is perhaps preserved in Chabora i. e. the town on the Khābūr; see Streck in Pauly-Wissowa, *op. cit.* (see the *Bibl.*). In the inscriptions of the Assyrian kings of the ninth century (Tukulti-Ninurta II, Assurnasirpal) we find mention of a place named Sirḳu (Sirḳi) which, according to the itinerary of Tukulti-Ninurta, was the last western stage along the Euphrates on the road to the mouth of the Khābūr. Following Maspero (*De Carchemis oppidi situ*, Paris 1872, p. 13), this Sirḳu has been connected with Circesium and the latter name actually derived from the Assyrian one; see for example Sayce in the *Proceed. of the Society of Biblical Archaeology*, xviii. 174; S. Schiffer, *Die Aramäer*, Leipzig 1911, p. 20 and 22, and Meissner, *Babylonien und Assyrien*, i., Heidelberg 1920, p. 344; it is queried by Scheil, *Annales de Tukulti Ninip*, ii., Paris 1909, p. 48. This identification is untenable; see against it Streck in the *Z. A.*, xxvii. 259 sq. and Horn in the *Z. A.*, xxxiv. 150 sq. The site of Sirḳu is besides to be sought on the right bank of the Euphrates; on the probable situation cf. Forrer, *Die Provinzialeinteilung des Assyrischen Reiches*, Leipzig 1920, p. 15. According to the above mentioned itinerary of Tukulti-Ninurta, Rummunina (on the reading see Horn, *op. cit.*, p. 151) must probably be located in the region of the junction of the Khābūr with the Euphrates.

Simply on account of the similarity of names, Circesium used to be identified with Carchemish, the great Hittite city, for example in the older Biblical commentaries, by the Jewish traveller Benjamin of Tudela, also by Ritter, *op. cit.*, x. 15 and by Chesney, *op. cit.* (see the Bibl.), p. 150. The lack of foundation for this identification was shown notably by Maspero in the above mentioned work and by Nöldeke, *op. cit.*, p. 1 sq. Besides, the site of Carchemish has been identified for several decades beyond all doubt in the ruins of Djirbās or Djarābis on the right bank of the middle Euphrates, a few hours' journey below Biredjik.

In the fourth century A. D. Circesium passed into the hands of the Persians by the shameful treaty made by the Emperor Jovian (363). The Arabs next captured it in the conquest of al-Djazīra. The occupation by the Muslims, which took place, apparently without fighting, under the commander Ḥabīb b. Maslama who was sent by 'Iyāḍ b. Ghanm, probably happened in the year 19 (640), not 16 (637), as many sources say. Cf. thereon al-Balādhurī, *Kitāb al-Futūḥ* (ed. de Goeje), p. 176, 2 (and cf. p. 111, 175, 178, 179); al-Ṭabarī (ed. de Goeje), i. 2478; Ibn al-Athīr, *al-Kāmil* (ed. Tornberg), ii. 409 sq.; Yāķūt, *Mu'djam* (ed. Wüstenfeld), iv. 65 sq.; Weil, *Gesch. des Chalifen*, i. 82; Caetani, *Annali dell' Islām*, ii/iii. 402, iii/ii. 734, 755 sq., 799. Ķarķīsiyā became the capital of the district of Khābūr in the province of Diyār Bakr. On account of its very characteristic situation, Ķarķīsiyā is mentioned by all the Arab geographers in their descriptions of the river-courses and roads, but no detailed account of it is given. The place probably did not attain any great size in the Islāmic period either. The high percentage of Jews (500 families) found by Benjamin of Tudela in the second half of the xiith century there is remarkable; see the Hebrew text of his travels edited and translated by Grünhut and Adler (Jerusalem 1903, Frankfurt a/M. 1904), i. 49, 21 sq. and ii. 47.

In the history of the wars of mediaeval Islām we find Ķarķīsiyā often mentioned. When 'Abd al-Malik was engaged in his campaign against Muṣ'ab, governor of the 'Irāķ and brother of the anti-Caliph 'Abdallāh b. al-Zubair, he had to devote his attention to Ķarķīsiyā in 71 (690), where the Ķaisī Zufar b. al-Ḥārith was ruling independently and had successfully resisted the governor of Ḥims, who had been sent against him. After a siege of some length, Zufar had to submit to the Caliph's army (cf. the account in Ibn al-Athīr (ed. Tornberg), iv. 275 sq.; Weil, *Gesch. der Chalifen*, i. 431; J. Wellhausen, *Das Arabische Reich und sein Sturz*, Berlin 1902, p. 115—116, 119—120, 126. In the wars fought in the ivth (xth) century on Mesopotamian soil in the Ḥamdānid epoch, we find Ķarķīsiyā playing a part along with al-Raḥba, a day's journey down the Euphrates from it; cf. Freytag in the *Z. D. M. G.*, x. 451—2. The rulers of Egypt repeatedly extended their power as far as Ķarķīsiyā, for example the Ṭūlūnid Aḥmad, from

whom, however, the Caliph al-Mu'tamid's vigorous brother al-Muwaffaḳ was able to retake it in 268 (881); see Wüstenfeld, *Die Statthalter von Aegypten zur Zeit der Chalifen*, *Abh. G. G. W.*, (1876), vol. xxi., part iii. 20. Several centuries later the Egyptian Sulṭān Baibars again advanced his frontier up to the Khābūr, when he took Ḳarḳīsiyā from the Mongols in 663 (1264); cf. Weil, *Gesch. der Chalifen*, iv. 96.

At the present day the site of Ḳarḳīsiyā is marked by a miserable village of 30—40 houses and hovels of clay and an extensive ruined site adjoining it. It is now called Busaira (Beṣīra; wrongly written Başaira by the Turks); older travellers give the form Abū Serai etc. Busaira is probably a corruption of Abū Serai (as, along with other authors, Moritz, *op. cit.*, p. 37, thinks); it has been with less probability taken as a derivative from Buṣr, the older name — recorded by Abu 'l-Fidā' for 732 (1331) — of the present Dēr ez-Zōr (see Herzfeld, *op. cit.*). According to Herzfeld, the old name Ḳarḳīsiyā still survives locally in the form Ḳarḳīsa.

Busaira lies on an irregularly shaped tongue of land formed by the Khābūr at its junction with the Euphrates and is about half an hour's journey distant from its mouth. Communication with the hinterland is broken by a ditch so that we have a well-marked peninsula. The plan of the old fortress can still be easily recognised; it forms a rectangle, the longer side of which runs along the Khābūr, while the shorter faces the Euphrates from which it is now about 1000 yards distant. Four more or less well preserved towers and a fort-like building (praetorium, serai) can still be seen, from which Moritz (*op. cit.*) suggests that the modern name Abū Serai (Busaira) may be derived. The fairly extensive town lay to the north-east of the fortress and is still marked by numerous walls of earth. Descriptions of the modern ruins are given by Sachau, Moritz and Herzfeld; plans of them are in Sachau and Herzfeld (see *Bibl.*).

The important part once played by Ḳarḳīsiyā as a trading centre as a result of the important roads which meet here — from Syria to Babylonia, Mōṣul to Syria — has in modern times been to a great extent regained by the town of Dēr ez-Zōr on the Euphrates (see above, i. 936) above mentioned, a few hours' journey above the mouth of the Khābūr.

KARLOWITZ. [See CARLOWITZ].

ḲARLUḲ (ḲARLUGH), in early Arabic sources KHARLUKH, in Persian KHALLUKH, in Chinese KO-LO-LU, name of a Turkish people, who are mentioned in the Turkish Orkhon inscriptions and in the Chinese *T'ang Shu*; cf. E. Chavannes, *Documents sur les Tou-Kiue (Turcs) occidentaux*, St. Petersburg 1903, Index. The Ḳarluḳ attained some political importance after 766, when, after the decline of the empire of the Western Turkish Khāḳāns, they occupied the valley of the Ču [q. v.]. Their princes did not assume the title of Khāḳān (Kaghan) but only that of Yabghu (Arabic Djabghūya) al-Ṭabarī mentions a Djabghūya of the Ḳarluḳs in Ṭokhāristān on the upper Amū Daryā as early as the year 119/737. With the Djabghūya al-Kharlukhī (*op. cit.*, ii. 1612, 10) corresponds the Djabghūya al-Ṭukhārī (ii. 1604, 3 and 1612, 9). At the present day an affluent of the Surkhan is still called Ḳalluḳ or Ḳarluḳ; cf. W. Barthold, *Die alttürkischen Inschriften und die arabischen Quellen*, St. Petersburg 1899, with reference to W. Radloff, *Die alttürkischen Inschriften der Mongolei*, second series, p. 27, note 1. According to al-Ya'ḳūbī, *Ta'rīkh*, ed. Houtsma, ii. 479, the Djabghūya of the Ḳarluḳs adopted Islām in the year 162 (778/779); cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 25; it should however be observed that the same fact at the same date is narrated concerning many other rulers, which makes it suspicious. al-Gardīzī (in Barthold, *Turkestan v epokhu mongolskago nashestviya*, ii., St. Petersburg 1900, p. 207) mentions an invasion of the Djabghūya in Farghāna in the year 792/3. In the reports of the Arab geographers of the ivth/xth century the Ḳarluḳs are still infidels. According to Ibn Ḥawḳal (*B.G.A.*, i. 11, 17 *sq.*) their territory extended 30 days' journey from the frontier of Farghāna. According to the Persian sources, however, their territory was not so extensive (cf. especially the still unpublished *Ḥudūd al-'Ālam*; al-Gardīzī in Barthold, *Otčet o poězdke v Srednyuyu Aziyu*, St. Petersburg 1897, text, p. 81 *sq.*, transl., p. 104 *sq.* and 'Awfī in Barthold, *Turkestan*, i. 99 *sq.*; Marquart, *Osttürkische Dialektstudien* in the *Abh. G. W. Göttingen*, new series, xiii./i., p. 40 *sq.*). In so far as they were the nearest neighbours of the Muḥammadan territory, the Ḳarluḳs, more than the other Turks, were influenced by Persian civilisation. They even differed in their features from the usual Turkish type. Maḥmūd al-Kashgharī, *Dīwān Lughāt al-Turk*, Constantinople 1915—1917, comprises the Ḳarluḳs and the Ghuzz under the common name of Turkomans.

It cannot be ascertained with certainty what was the relation between the dynasty of the Ilek Khāns [q. v.] and the Ḳarluḳs. At any rate the Ḳarluḳs are often mentioned in the history of this empire, especially in Samarḳand, as unruly Praetorians just like the Ghuzz in the Saldjūḳ empire. In al-Djuwainī's report (*Ta'rīkh-i Djahān Gushā*, ed. Mīrzā Muḥ-

al-Kazwīnī, Gibb Memorial Series, 1912—16, ii. 87) concerning the conquest of Central Asia by the Kara Khitāi [q. v.], the latter appear as the allies of the Khān of Balāsāghūn [q. v.] against the Karluks; the Kara Khitāi of Samarkand, on the other hand, are the allies of the Karluks against Sulṭān Sandjar (cf. especially al-Rāwandī, ed. Muḥ. Iḳbāl, Gibb Memorial Series, new series, ii., p. 172). Later the Kara Khitāi induced the Karluks in Samarkand to abandon their warlike life and to take to agriculture. According to Ibn al-Athīr, this took place in 559 (1163/64) (*Kāmil*, ed. Tornberg, xi. 205), but this date seems to late; cf. W. Barthold, *Turkestan*, ii. 358. In the second half of the xiith century the Karluks are mentioned for the last time (by al-Kātib al-Samarkandī; cf. the text as edited by Barthold, *Turkestan*, i. 71 *sq.*) as enemies of the Khān of Samarkand; in the history of the xiiith century they no longer appear. A Karluk state N. of the Ili with the capital Kayāligh is however still mentioned; cf. especially *Ta'rīkh-i Djahān Gushā*, i. 56 *sq.*; other reports in Barthold, *Turkestan*, ii. 433 *sq.*, 477. The son of the Karluk prince Arslān Khān, who had submitted to the Mongols and taken part in the expedition against the Khwārizmshāh Muḥammad, was given in fief Ugand in Farghāna by the Great Khān Mangu (1251—1259; cf. *Ta'rīkh-i Djahān Gushā*, i. 58); there is no later mention of this dynasty. To the same division of the Karluks perhaps belonged the dynasty of the princes of Almaligh (cf. the art. KULDJA). The name Karluk seems later to denote an Özbeg family only.

(W. BARTHOLD)

KARMAṬIANS (KARMAṬĪ, plur. KARĀMIṬA: Carmathians). In the strict application of the word, the name was given to the rebel federations of Arabs and "Nabataeans", which were organised in Lower Mesopotamia after the servile war of the Zandj [q.v.] from 264 (877) and based on a system of communism into which initiation was necessary; active propaganda extended this secret society among the masses, peasants and artisans; — in al-Aḥsā, where they founded a state independent of the Caliph of Baghdād; — in Khurāsān, in Syria and in Yemen, where they formed lasting hotbeds of discontent.

In the broader sense, the name Karmaṭian means the great movement for social reform and justice based on equality, which swept through the Muslim world from the ninth to the twelfth centuries of our era; this movement, captured and controlled by an ambitious family, the Ismā'īlī dynasty (cf. ISMĀ'ĪLIYA, SAB'IYA), who founded the Fāṭimid anti-caliphate in 297/910, became abortive and finally succumbed with this dynasty before the counterstroke of the Crusades.

The movement was characterised, from the point of view of knowledge, by the adaptation of the Arabic language to certain technical achievements of foreign origin, especially Hellenistic (Neo-Platonic, pseudo-Hermetic and "Sabaean" writings); from the political point of view, by the exploitation of the 'Alid legitimist tradition on behalf of a conspiracy, carried on in a strict secrecy, in which the name of the supreme leader was never pronounced; from the point of view of worship, by the use of an allegorical and methodical catechism, Kur'ānic in origin, adapted to all creeds, to all races and all castes. The movement was based on reason, tolerance and equality, with a system of graduated initiation and the ritual of a gild which — encouraging the rise of the trade gild movement (see the art. SINF) and universities — seems to have reached the West and to have influenced the formation of European gilds and freemasonry.

I. Etymology and early history.

The etymology of the word *karmaṭ* (not *kirmiṭ*) is disputed. It appears as a descriptive adjective in the name of the first leader of the insurrection, Ḥamdān Karmaṭ (cf. 'Alī b. Karmaṭ, a heretic quoted by the Nuṣairī author Maimūn Ṭabarānī). Vollers has connected it with the Greek γράμματα, but it is more probable that we should see in it a borrowing from the local Aramaic dialect of Wāsiṭ, where *karmaṭū* to this day means *mudallis* (Arabo-Aramaic dialect of the Midān, cf. Anastase, in *Machriq*, x. 18, p. 857). From the year 255 (868) we find mentioned in the same region, along with the *Furātiya*, a corps of Kurmāṭiya among the rebellious troops of the Zandj (al-Ṭabarī, iii. 1757; cf. iii. 1749: Rashīd Karmāṭī).

The name *Karmaṭ* in palaeography means a particular kind of *warḳāt*; in addition there is a special secret Karmaṭian alphabet used in the Yemeni texts recently studied by Griffini.

The Karmaṭian insurrection was begun by Ḥamdān in the neighbourhood of Wāsiṭ; in 277/890 he founded a *dār al-hidjra* (an entrenched place of retreat) east of Kūfa for his partisans, whose various voluntary contributions supported the common chest: these contributions were alms at breaking the fast (*zakāt al-fiṭr*), for the right to use the place of refuge, a fifth of all income (*khums*), right of all participation in the agapes (*bulgha*; cf. the art. NUṢAIRI); community of all objects of general utility (*ulfa*) was prescribed. These details, which we know from Sunnī sources, are perhaps accurate; at the agapes they ate "bread of Paradise"; this detail which we find in the contemporary trial of al-Ḥallādj is perhaps simply a transference of the consecrated bread (*pektā*) used among the Mandaeans of Wāsiṭ (*manghūtila* = *nāṣūrāyā*; cf. al-Ṭabarī, year 278 (891), on the Karmaṭian Faradj b. 'Othmān of Naṣrāna; or to be pointed Naṣurāya).

We find along with Ḥamdān his brother-in-law 'Abdān (d. 286/899), author of a manual of initiation for the seven degrees (*balāghāt sab'a*). Both seem to have been dependent on leaders whose identity remained a secret, living outside of Sawād, the *Ṣāḥib al-Ẓuhūr*, who is said to have invested Ḥamdān, and the *Ṣāḥib al-Nāḳa*, who had dismissed 'Abdān and put in his place Dhikrawaih al-Dindānī. Dhikrawaih in 288/900 gave the signal in the desert of Syria among the Banū 'Ulaiṣ for the general Karmaṭian rising — so long prepared (expected in Khurāsān for the year 290/902) — and proclaimed as leader the *Ṣāḥib al-Nāḳa*, under the Ismā'īlī regnal name Abū 'Abd Allāh Muḥammad, with the dynastic name of "Fāṭimid". He was killed in 289 (901) at the siege of Damascus and his place was taken by his brother the "Ṣāḥib al-Khāl", who as ruler took the name Abū 'Abdallāh Aḥmad, and who was captured and executed at Baghdād in 291 (903). The Karmaṭian movement in Lower Mesopotamia, drowned in blood, ceased to be an active factor in politics in 294 (906) with the death of Dhikrawaih.

In time the movement regained strength in

al-Aḥsā, where the *Ṣāḥib al-Nāḳa* had sent as his representative Abū Saʿīd Ḥasan b. Bahrām al-Djannābī in 281 (894); with the support of the Rabīʿī tribe of the ʿAbd al-Ḳais, al-Djannābī seized the whole of al-Aḥsā (286 = 899) and made it an independent state, the bulwark of Karmaṭian power and the terror of the Caliphate of Baghdād. His son and successor Abū Ṭāhir Sulaimān (301—332 = 914—943) began to lay waste Lower Mesopotamia, cut the pilgrim routes and finally seized Mekka on the 8th of Dhu 'l-Ḥidjdja, 317 = Jan. 12, 930), from which he carried off the Black Stone six days later to take it to al-Aḥsā. Abū Ṭāhir, like his father, was only the emissary of a secret organisation, its "commissary for foreign affairs" for al-Aḥsā; while waiting the opportunity to enthrone the expected Imām there, he appointed a representative council over it, the *ʿIḳdān* (i.e. the elders of the tribe) for the political administration of home affairs. This organisation was still in existence in 422 (1030) after the decline of the military power of the Karmaṭians; it seems to have maintained local autonomy down to the xviiith century, when the revival of propaganda took the form of a new Ismāʿīlī dynasty (Makramis). The capital was al-Muʾminiya (new name given to Hadjar) on the site of the present Hufūf).

In Yemen, Karmaṭian propaganda, directed from 266 (879) by Manṣūr al-Yaman (title of Ibn Hawshab) with the *dār al-hidjra* near ʿAdanlāʿa, failed against the resistance of the local Zaidī chiefs and could only found some little principalities, the Ṣulaiḥīs of Ṣanʿāʾ and the Makramīs of Nadjrān (texts studied by Griffini).

In Khurāsān the movement began in 260 (873) at Raiy with Khalaf; then it spread to Marw al-Rūdh and Ṭālaḳān in Djūzdjān, where the Amīr became a Karmaṭian adept. Dailam which was to become a bulwark of the Ismāʿīlī dynasty (see the art. ALAMŪT, ASSASSINS), was next taken for the cause, finally Muḥammad al-Nasafī al-Bazdhaʿī (d. 331 = 942) undertook the conversion of the Sāmānid rulers. His execution destroyed the political hopes of the party: the small Karmaṭian centres of eastern Khorāsān — if we except the works of Nāṣir-i Khusraw — only produced a moderate literary activity (texts studied by Ivanow).

In Syria the centre seems to have been Salamiya; but, except for some biassed Sunnī records, we do not know what happened there after the insurrection of 288 (901), nor the part played in it by the future ʿUbaid Allāh, the first Fāṭimid Caliph. Syrian Karmaṭianism is still dormant, without showing any signs of activity nor of contact with the Druzes, who are its distant brethren.

The small local bodies, among which Karmaṭian manuscripts have survived down to our days (for a list of them see the art. ISMĀʿĪLIYA, ii. 549 *sqq.*), have not been the scene of any serious doctrinal activity apart from the writings of the Syrian Rashīd al-Dīn Sinān (xivth cent.), the *Dasātīr* of the Indian Maḥmūd Fānī (Mobed Shāh) (xviith cent.) and the Turkish and Persian texts of the Ḥurūfīs (xvth—xviith cent.).

II. The position of the Karmaṭians relative to the Fāṭimids.

The general tendency of Karmaṭian doctrine was to consider ʿAlid legitimism as a means rather than an end. The **Imāmate**, the supreme authority, is not a hereditary monopoly transmitted in a dynasty; it is an intellectual characteristic, a divine investiture, an imperative mandate (*ṣūrat al-amr*) conferred (*tafwīḍ*) on the new holder of the title from among the initiates by a sudden illumination of his intellect, which makes him "substituted" or "spiritual son" of his predecessor. Such is the justification, given in the formula of initiation in the Druze books, for these alleged "usurpations" of genealogy, which are the rule in the annals of the Karmaṭians from ʿAbd Allāh b. Maimūn down to Ḥasan ʿalā dhikrihi 'l-salām. And this is the meaning of the definitions of the imāmate given by adepts like Ibn Masarra, Raʾīsī, Ibn Hāni and the Ikhwān al-Ṣafāʾ. Indeed, when the *Ṣāḥib al-Nāḳa* in 288 (900), and ʿUbaid Allāh in 297 (909) had assumed a Fāṭimid dynastic title, neither the one nor the other plainly indicated their genealogical connection with the ʿAlid Ismāʿīlī line (cf. al-Maḳrīzī, *Ittiʿāẓ*, ed. Bunz, p. 7—11). And if this claim was of importance with respect to the public, in the opinion of their enemies, it seems that it hardly interested those initiated into the true doctrine, who expected above all else a chief, possessing a special divine appointment, of the "intellectual order", whether he was ʿAlid or not.

The official version of the ancestry of the family of ʿUbaid Allāh compiled by his Ḳāḍī, the Mālikī al-Nuʿmān b. Abī Ḥanīfa al-Tamīmī (born 259, d. 363 aged 104), is a laudatory and lying composition specially written in reply to a Buwaihid attack. The versions of two Sunnī anti-Karmaṭian pamphlets by Muḥammad b. Rizām al-Ṭāʾī, president of the "Maẓālim" in Baghdād in 320 A. H., and by Muḥammad Akh Muḥassin Ibn al-ʿĀbid, an ʿAlid of Damascus, who died about 375 A. H., are hardly of any more value. S. de Sacy, Guyard and de Goeje thought they could rely on them as Ibn al-Nadīm, al-Nuwairī and al-Maḳrīzī had done. But a result of a comparison with the statements contained in the biographical collections (*ṭabaḳāt*) of orthodox Imāmī *muḥaddithūn*, in which the early Karmaṭian propagandists have a prominent place, shows that there are serious errors in the exposé by these two opponents. Maimūn Ḳaddāḥ (d. about 180 A. H. at latest) was not a "Bardesanian"; he was a client of the Makhzūmī clan (Kuraish), a native of Mekka, a well-known theologian, the official *rāwī* of the fifth and sixth Imāms, Bāḳir and Ṣādiḳ. His son ʿAbd Allāh, who was official *rāwī* of Ṣādiḳ (which provoked the irony of the poet Abu 'l-ʿAlāʾ al-Maʿarrī), did not die in 250 A. H. but in 210 at latest, "in prison in Kūfa under al-Maʾmūn"; Dindān (and not Zaidān) is the *sobriquet* of a known Imāmī author, Aḥmad b. al-Ḥusain al-Ahwāzī, who died about 250—270 A. H., etc. In these circumstances the statements made in the two Sunnī sources mentioned regarding the assassination of ʿAbdān, the illegitimacy of ʿUbaid Allāh and the usurpation of the soi-disant "son" of Dhikrawaih in 288—291 A. H. have to be received with caution.

After the proclamation of the Fāṭimid Caliphate in the Maghrib the general attitude of the Karmaṭians in al-Aḥsā as in Yemen and in Khurāsān was one of expectancy, which the assassination of the *Ṣāḥib al-badhr* (267 = 909) by ʿUbaid Allāh amply justified. Let us take al-Aḥsā for example: Abū Saʿīd had from the first paid the fifth to the *Ṣāḥib al-Nāḳa*; after various evasions, which the intrigues of the court of Baghdād do not quite explain, Abū Ṭāhir sent it to al-Ḳāʾim; but with so little conviction of his legitimacy, that he welcomed and enthroned in 319 (931) as the

expected Imām: a madman, Abu 'l-Faḍl al-Zāhirī al-Ṭammāmī (a kind of Heliogabalus, soon put to death). The Black Stone was restored to the Meccans in 340 (951) by order of the Fāṭimid Caliph al-Manṣūr; but in 360 (970) the Karmatian chief Ḥasan b. Aḥmad thought it no breach of his oath of initiation to give his Buwaihid allies a document, which was solemnly read at Damascus, testifying to usurpation of civil authority by the first Fāṭimid Caliph. In 422 (1030) the Druze writer Muḳtanā' in vain urged the Karmatian *Sāda* of al-Aḥsā to rally to the cult of Fāṭimid Ḥākim.

On the other hand there are abundant proofs of the adoption of Karmatian doctrine by the Fāṭimid dynasty. It was at the *dār al-hidjra* of the Maghrib, Īkdjān (or Guedjol) founded by the Karmatian *Ṣāḥib al-badhr*, that 'Ubaid Allāh took refuge before his proclamation as Caliph. The oraisons of Mu'izz (publ. by Guyard) are pure Karmatian in style as well as the ritual of the lodge of initiation (*madjlis*; the present masonic term is *maḥfil*) which he founded in Cairo. The Druze religion is simply a Karmatian heresy. The introduction by 'Ubaid Allāh of the *Ṣalāt 'ala 'l-Nabī* at the end of the *adhān* (Ibn Ḥammād, in the *J. A.* of 1855, p. 542) is to be traced to the part of *nāṭiḳ*, recognised in the Prophet by the Karmatians.

III. The Karmatian Doctrine.

It is no longer possible to rely, as used to be done, on the accounts of Karmatian doctrine given by the Sunnī anti-Karmatian writers on heresies; al-Mas'ūdī has judiciously said of the latter that they contradict one another and that the Karmatians themselves recognise nothing of their doctrines in them. Except for a few lines that are accurate in the *Tanbīh* of al-Malaṭī (d. 377 = 987) we have to come down to the xiith century of our era to find a conscientious author, al-Shahrastānī, able to give us authentic Karmatian fragments, some quite old (of Maimūn Ḳaddāḥ and Aḥmad Kaiyāl) from original sources, which he does not mention, but which Fakhr Rāzī (*Masā'il 'ashr*) has identified with the *Fuṣūl arba'a* of Ḥasan Ṣabbāḥ (on Sabaeism: ii. 47—155 of the Cairo edition of 1317) and the *Ṣiwān al-Ḥikma* of Abū Dja'far Sidjzī b. Bāya († 370/980) (on Hellenism: ii. 155—193, of the Cairo edition of 1317).

To deal with the problem more minutely one must search the polemical literature of the Imāmīs and particularly the apologetic treatises in which the various extremist sects endeavour to convert one another, starting from their common technical terms. Lastly the encyclopaedic collection of the *Ikhwān al-Ṣafā'*, which has not yet been thoroughly studied since Dieterici, is invaluable for the synthetic understanding of Karmatian thought.

According to them, the world is a sum total of phenomena which repeat themselves in cycles, playing and replaying the same drama to us time after time: — this spectacle, presented to intelligences (invariable in number) so that they may be illuminated, is the gradual disappearance of the material veil, perceptible by our senses, a multiform and transitory mirage; then the intelligences are born (*khalḳ thānī*) by gaining consciousness of a pure intellectual evidence of a unique and impersonal thought, which is divinity itself.

The divine essence, in fact, outside of which nothing exists, is only the evidence of a single idea, an authentication of indifferentiated intelligibility and devoid of all content; the *nir eremtismus* (*tawḥīd*) of the Karmatians, still more rigorous than the *ta'ṭīl* of the Djahmiya, denies all divine attributes and postulates an absolute monism of fundamental intellectualism.

True worship consists in knowing how to recognise — as the result of a graduated initiation — what have been the stages of the creative evolution of the universe outside of God; what exactly leads the initiated by a process of inverse gnostic involution to forget these stages and to become absorbed in God.

a) Creative evolution: — the divine essence or supreme light (*nūr 'aḳlī*), alone in the beginning and in the end, gives forth first of all the *nūr sha'sha'ānī*, "glistening" and "victorious (*ḳāhir*) light" which then engenders the universal intelligence (*'aḳl kullī*) and the soul of the world (*nafs*); the latter under various modes produce human intelligences (those of the prophets, imāms and elect; the others are only phantoms of nothingness). The *nūr sha'sha'ānī* in the second degree gives forth the *nūr ẓulāmī* "tenebrous light"; that is matter, passive, "vincible" (*maḳhūr*), destined to disappear; it appears in various modes as stars at the skies (*aflāk*), as perishable bodies on earth.

b) Gnostic involution: — the intelligences of the prophets, imāms and their adepts are sparks of "sparkling light" suddenly illuminated in the midst of the tenebrous light, blind and unreal matter like reflections in mirrors, following the cyclic intermittances of the initiatory illumination; these sparks shine, on becoming conscious of their divine identity, in a liberating intuition, in which, losing all individuation, they find themselves "delivered from the five tyrants": — the sky, which makes day alternate with night, nature, which gives desires and regrets, law, which commands and forbids, the state, which controls and punishes, necessity, which forces one to daily labour.".

c) The immaterial succession of initiatory investitures (*mabda, ta'wīl*). Initiatory illumination makes the separated intelligences cohere, divine sparks individualised for a moment, following two convergent hierarchic series; decreasing, of the initiators (*nāṭiḳ, ṣāmit, bāb*); and increasing, of the initiated (*dā'ī, ḥudjdja, imām*). Historically the list of their titulars was classed in cycles of limited number; the intelligences, in invariable number, "transmigrate" from cycle to cycle (without "finding" again "their" personality, since they have only the appearance of individuality).

d) Planetary denominations of the cycles of transmigration (*adwār, akwār, ḳirānāt*). The cycles just mentioned are named from their material veils, i.e. from the planetary revolutions, periods and conjunctions. This is a very fine point which must be appreciated. The Karmatians are nominalists; they do not believe that the name determines the thing and they unanimously assert that the planetary bodies have no directing influence on the intelligences; but the divine volition (*amr*) which regulates the intermittances of the initiatory illumination makes them coincide inevitably with the astral periods which form the tracing, the shadow cast by these cycles of illumination, and provides the horoscope of intelligences which form part of it (change of cults, *milal*, every 960 years, of empires every 240 years, of sovereigns every 20 years, of epidemics every year, of genethliac subjects every

month and every day). When the moment comes for the final cessation of every action (*ikkār* = *dalāfīr* of the Ḥadīth, *saikār*) cycles and periods will come together.

e) **The degrees of individual initiation.** Initiatory illumination is transmitted to the adept by degrees as in the ancient initiations (Greek, Manichaean) and in modern freemasonries. It emanates from the divine volition following a method of irrefutable and infallible authority (*ta'līm*, whence the name *ta'līmiya* given by al-Ghazālī to the Karmaṭians). The adept submits himself for it (in the fourth degree) by a declaration — a solemn contract with a clause (*ṣilāḥ ma'alīḳ*) of triple repudiation of his favourite wife if he should reveal the secrets (*ifshā' al-sirr*, which constitutes Karmaṭian adultery, *zinā*). Its formula has been studied by Goldziher (cf. the art. NUṢAIRIYA). We find it first used during the revolt of the Zandj (al-Ṭabarī, iii. 1750) and Usāma alludes to it in his *Memoirs*. The Sunnī heresiographers record 3, 5, 7 ('Abdān and Ibn Ḥamdān) or 9 degrees; but the names which 'Abd al-Ḳāhir al-Baghdādī gives them are doubtful: *tafarrus*, diagnostic of the future adept, described as "fertile" or "sterile" earth, *ta'nīs* (taming), *tashkīk* (apprenticeship to methodic doubt), *ta'līḳ* (taking of the oath), *rabṭ*, *tadlīs*, *ta'sīs*, *khal'* and *salkh*. The programme for the five high grades (secret) is little known. The "letter of 'Ubaid Allāh to Abū Ṭāhir", an apocryphal curiosity (recalling certain modern anti-masonic productions), analysed by al-Baghdādī, puts in various maxims of cynical impiety, among others the mediaeval parable *De Tribus Impostoribus* (the earliest reference to it; cf. *R.H.R.*, 1920). Al-Maḳrīzī's reference to the *maḳrīzī* of Cairo (transl. by de Sacy and Casanova) shows that initiation simply amounted to showing that the exterior rites (*ẓāhir*) of all the revealed cults conceal under equivalent and inadequate allegories the same hidden meaning (*bāṭin* whence the name *Bāṭiniya* of the Karmaṭians), purely negative and without mystery; initiation being reduced to teaching of the use of wholly speculative philosophical reasoning, which propounds without practical differentiation the antithesis, opposite conceptions like "law" and "breach of law", "*tawḥīd*" and *ilḥād*"; cf. DAHRIYA). But this is only, as we have seen, one aspect of the fundamental intellectual monism of the Karmaṭians.

IV. Its Imāmī technical vocabulary; its criticism of the other extremist Shī'i sects (Ghulāt).

Terrified by the wide and rapid spread of Karmaṭian doctrines in the most cultivated centres of the Muslim world the Sunnī heresiographers strove to discover and denounce an anti-Muslim offensive in it, originating in a foreign religion — Mazdeism, Mazdakism (*Khurramiya*), Manichaeism —, in racial hatred, setting Iranian against Arab, the tribe of Rabī'a against that of Muḍar (*Shu'ūbiya*). They quoted parallelisms which are not very convincing.

The hypothesis of the Sabaean origin of the Karmaṭians, which is also found among them, is more attractive. It seems to have been put forward by the Karmaṭians themselves with a view to gaining citizenship in the Sunnī Muslim state, presenting their syncretism as the heritage of Abraham (*khalīliya*) from those mysterious "Sabaeans" mentioned by the Ḳur'ān. Such is probably the leading idea in the Sabaean tale developed among others by al-Shahrastānī in some pages borrowed without acknowledgment from the Karmaṭian Ḥasan Ṣabbāḥ. The documents hardly permit us to connect effectively the Karmaṭians with the pseudo-"Sabaeans" of Ḥarrān or Wāsiṭ.

In reality an examination of the Karmaṭian technical terms shows that this doctrine was formed before the end of the second century A. H. in the Imāmī circles of Kūfa. The Karmaṭians retained, embedded in their system, various series of Imāmī special terms, which we find again among other extremist sects, Isḥāḳiya, Sharī'iya, Namīriya (Nuṣairiya), Khaṭṭābiya, Ḥallādjiya; e. g.: *mīm'ānī*, *ma'ānī*, *rūḥānī*, *djismānī*, *sha'shānī*, *maḳdānī*, *nāmūs*, *lāhūt*, *nāsūt*, *djabrūt*; *faiḍ*, *ḥulūl*, *maḳām*, *ḳawāla*, *taḥwīn*, *taḳdīr*, *ta'yīd*; the mystic sense of the 28 letters according to the *djafr*. The last orthodox Imāmī Muḥaddithūn received into the Karmaṭian *isnād*'s are Mufaḍḍal b. 'Omar and Muḥammad b. Sinān al-Ẓāhirī (also admitted by the Nuṣairīs).

The first clearly Karmaṭian author is Abu 'l-Khaṭṭāb Muḥammad b. Abī Zaynab al-Asadī al-Kāhilī (d. 167 = 783 at Kūfa); he substituted in place of the "personifying" Ḳur'ānic exegesis of the early Shī'is an abstract allegorical exegesis; in cosmogony he replaced the use of letters (cf. Mughīra) by their corresponding numerical values (mystic meanings of *djafr*); it was he also who seems to have invented the pledge guaranteeing the secret of initiation: for the Khaṭṭābiya, his adepts, are the only Imāmī sect whom al-Shāfi'ī (*Kitāb al-Shahādāt*) will not allow to take the oath on the ground that they make of the *taḳiya* (negative practice of secrecy) a positive precept justifying false testimony (to keep a secret).

After him, Abū Shākir Maimūn al-Ḳaddāḥ al-Makhzūmī (d. towards 180 = 796) gave definite dogmatic form to the Karmaṭian doctrine of emanation; he substituted the abstract first principles for the five *aitām* (deified historical personages), demiurges of the first Ghulāt. He denies that the divine essence has any attributes and defines the "eternal Ḳur'ān" as a pure divine illumination in intelligences.

If one compares Karmaṭian dogma with the preceding Imāmī systems, their naively "materialising" (*tadjsīm*) and "personifying" (*tashkhīṣ*) notions and their idolatry of 'Alī and his descendants, we see at once after the connection a transposition: here they are intellectualised, objectified in abstractions. Finally the Karmaṭians, considering only rank and the external role played, restore to Muḥammad priority over 'Alī. Not that they in turn deify Muḥammad — it is simply his predestined role of pre-eternally foreseen messenger or herald (*nāṭiḳ*) that they look at. They are (to use the exact term) not *Muḥammadiya* but *Mīmiya* (the letter *mīm* means in *djafr* the name, *ism*; that is to say the mission of onomaturgy, *nāṭiḳ*, devolved on the prophet), in opposition to the *'Ainiya* (the letter *'ain* in *djafr* means the original sense, *ma'nā*, whence: the hidden meaning, the "silent" (*ṣāmit*) role of "tacitly designated" chief, devolved on 'Alī), like Dāwūd and Nakha'ī.

During the polemics that went on in Kūfa between Imāmī writers down to the third century A. H. the Karmaṭian authors, Abu 'l-Khaṭṭāb, Faiyāḍ and Nahīkī, were "Mīmiya"; they place Muḥammad (*nāṭiḳ* = *aṣl* = *ḳā'im* = *mabī*) above 'Alī (*ṣāmit* = *nafs* = *walī* = *waṣī*). The Nuṣairī Kha-

sīlī, modifying the doctrine of the 'Alīya to suit the exigencies of controversy, maintains 'Alī (*ma'nā* = *imām*) above Muḥammad (*ḥidjāb* = *ḥudjdja*) and Salmān (*ism* = *bāb*). To the Nuṣairī arguments that Muḥammad is the "veil" uncovering the divine appearance called 'Alī, the Druzes reply with good Ḳarmaṭian logic that a "veil" only covers and that Muḥammad has given more perfect evidence of God by his words than 'Alī by his silence. Internal sanctity is set aside in favour of the gift of prophecy and sinlessness neglected for infallibility.

It is the same polemical attitude which dictates to Maimūn Ḳaddāḥ the order in which he enunciates his two first principles (followed in that by Kaiyāl, Baradha'ī, the Druzes and Ḥasan Ṣabbāḥ): first the intellect (*'aḳl* = *nafs nāṭiḳa* = *awwal* = *sābiḳ*) and secondly the soul (*nafs* = *nafs ḥaiwānī* = *thānī* = *tālī* = *lāḥiḳ*). Then comes the "fiat" (*kun, idjādī*), the central sign of divine intervention, before the second pair of principles, simply reduplication of the first among the Druzes (*'aḳl* and *nafs*) and in Ḥasan Ṣabbāḥ (*fatḥ* and *khayāl*). The identification of the five Ḳarmaṭian first principles with those of the Hellenistic philosophers, like the physician Rāzī (intellect, soul, matter, space and time) does not seem to be primitive and represents a later effort at syncretic conciliation.

In psychology the Ḳarmaṭians deprive each human individuality of all definitive reality; his body being removed *a priori* like an unreal veil, there only remains a momentary principle of individuation to which they refuse any name implying internal finality, like *rūḥ*, *nūr*, *ma'nā* (employed by the early Imāmīs); they substitute for it the term *'aḳl* "intelligence", indicating a simple causation on the part of God, "ab extra", a role of an observer who takes no actual part in what he sees.

They criticise the gross materialism of the first Ghulāt (and of the Nuṣairīs) who believe that souls are fallen stellar bodies, fallen from the higher heaven (of which the sun or the moon is the threshold) and destined to return there by that same predestined attraction which caused them to adore the divine apparitions imperfectly seen in the course of the cycles of bodily transmigration (*tanāsukh*). For the Ḳarmaṭians there is no corporeal transmigration even for the damned (they have only been phantoms) in the bodies of animals and we cannot even speak of true spiritual "transmigration" for the elect, since the immortality of the intelligence is only impersonal whether it assumes modes as "sparks" or not.

Contrary to the Nuṣairīs, who refuse initiation (and immortality) to women, the Ḳarmaṭians admit them (*risālat al-nisā'* in the Druze canon).

The Ḳarmaṭians profess an integral nominalism; the letters of the alphabet are only intellectual symbols; the name is the mask of the thing, not its manifestation (Nuṣairī view); each symbol ought to be *destroyed* to permit access (*taḥṣīl*) to the pure Idea. The obligatory duties of religion etc. are only supererogatory counsels leaving free play to all human faculties (*ibāḥa*).

V. Its connections with Hellenistic philosophy.

Ḳarmaṭianism preserved from its place of origin an old stock of primitive Islāmic terms, Ḳur'ānic and others, in which it retained the archaic special meanings they had before the third century A. H. (e.g. *amr*, *ẓill*, *'arḍ*, *kun*, *sam'*, *shāhid*, *balāgh*, *ghāya*, *yaḳīn*, *inshā'*, *iḳlīd*, *rifḳ*, *taṣlīm*). From the same period it retained an ignorance of certain problems, which were only put forward later, among the Imāmīs after Ibn al-Ḥakam, among the Sunnīs after Naẓẓām, such as the perception of sensation, the conceptual process, the modality of a harmony between the movements of the limbs and the intentions of the heart which accompany them. The Ḳarmaṭians on these three points profess a kind of fatalism, a blind occasionalism, something like that of Djahm.

They, however, like the Mu'tazila in another field, marked the very first awakening of Muslim philosophic reflection at its contact with Hellenistic science: by the systematic employment of the word *'aḳl*, intelligence, to designate the principle of individuation which constitutes man. This brought them not only to the abstract allegorical exegesis analysed above, in which dialectic gives place to logic, but also to the direct acceptance of scientific bases, of natural constants — viz. consideration of arithmetical properties (numbers 3, 5, 7, 9, etc.) permitting the calculation of the astronomical calendar (new-moon festivals: against the Sunnīs) —, of the four elements and the "humours" (*ṭabā'i'*), specific remedies (*'aḳāḳīr*), the foundation of medicine.

Without going further or assimilating the whole corpus of Hellenistic philosophy, as the *Ikhwān al-Ṣafā'* attempted to do, Ḳarmaṭianism prepared many minds to understand it; it presented to them as divine prophets the ancient philosophers of Greece: Pythagoras, Empedocles and Plato, the masters of hermetism (Agathodaemon, etc.), stimulating in consequence its adepts to read works coming from these foreigners as freely as the Ḳur'ān.

The same licence was to a less degree allowed for certain Persian sources (books of Djāmāsp; the "amshaspands", being regarded as prophets) and much later for Hindu sources also.

VI. The rôle of Ḳarmaṭianism in the evolution of the Islām.

The influence of Ḳarmaṭian authors, especially of the encyclopaedia of the "Faithful Friends" (*Rasā'il Ikhwān al-Ṣafā'*), on diverse Muslim thinkers belonging to the Sunna or to orthodox Imāmism has been considerable.

In philosophy, it inspired the political theory of idealistic imāmism (*istī'dād lil-nubuwwa*) of al-Fārābī and Ibn Sīnā (Rāzī had polemics on this subject with Kaiyāl), the emanation theory of the ten *'uḳūl* (Ibn Sīnā). The famous parable of the self-taught (Ḥaiy b. Yaḳẓān) would also be of Ḳarmaṭian origin (cf. the art. SHUṬṬĀR).

There were in the same way various infiltrations into dogmatic theology: abstract allegorical exegesis of the Ḳur'ān, *tanāsukh* of Ibn Ḥā'iṭ and Ibn Yanūsh, and the *nūr Muḥammadī*.

In mysticism, it is still clearer from Sahl al-Tustarī [q.v.] to Suhrawardī of Aleppo (*nūr ḳāhir*). The mystics who attack Ḳarmaṭianism use its vocabulary (al-Ḥallādj, al-Tawḥīdī, al-Ghazālī [q.v.]). Ibn Taimīya rightly pointed out the adoption of Ḳarmaṭian theses in works of the Andalusian school of Sunnī mystics, Ibn Barradjān, Ibn Ḳasyī, down to their pupil, the great mystic Ibn al-'Arabī [q.v.]. When he defined the five periods of creative evolution and of gnostic involution (same number in al-Farghānī; three times in 'Abd al-Karīm Djīlī) and when he identified the spirit (*rūḥ*) with in-

telligence (*ʿaḳl*) in his monist descriptions of the fundamental unity of being (*waḥdat al-wudjūd*) in reference to the Ḳorʾānic themes of the covenant (*mīthāḳ*) and the Nocturnal Ascension (*ḳāb ḳawsain*), — Ibn al-ʿArabī only took up Ḳarmaṭian exegesis again in a more moderate form.

The remarkable organization of trades and Muslim gilds goes back to the Ḳarmaṭians (cf. the art. SINF).

KARMISĪN. [See KIRMĀNSHĀH].

KARNAK. [See AL-UḲṢUR].

KARNĀL. (1). A town of 23,559 inhabitants (1901); situated a few miles W. of the Djamnā R. in 29° 41′ N. 76° 59′ E. The town is the administrative centre of a district of the Pandjāb, but historically and ethnologically it belongs to Hindustān rather than the Pandjāb. The language commonly used by the inhabitants is a dialect of Western Hindī. It is no doubt a place of great antiquity, and the name is traditionally derived from Karna of the *Mahābhārata* (Karnālaya = Abode of Karna). But it was not of great importance in early times, and is not mentioned in the accounts of the invasions of India by Maḥmūd Ghaznawī and Muʿizz al-Dīn. Its prosperity seems to have commenced with the construction of the canal from the Djamnā by Fīrōz Shāh Tughlaḳ (see Shams-i-Sirādj, *Tārīkh-i Fīrōz Shāhī*, Elliot and Dowson, *Hist. of India*, iii. 300). The country became productive and rich, and being on the direct road to Dihlī from the north became an object of attention to invaders and rebels. Thus in 980 (1573), while Akbar was engaged in Gudjarāt, Karnāl, Pānīpat, and Sōnpat were plundered by Ibrāhīm Ḥusain Mīrzā. Djahāngīr halted at Karnāl in 1013 during his pursuit of his rebellious son, Khusraw (Elliot and Dowson, *o. c.*, VI, 296, also Beveridge's trans., *Jahāngīr's Memoirs*, Vol. I.). In 1120 (1708) during the reign of Bahādur Shāh, Karnāl was attacked and plundered by the Sikh rebels (Elliot and Dowson, *o. c.*, vii. 419). But the most noteworthy event in its history was the great victory of Nādir Shāh over Muḥammad Shāh 1152 (1739) which was fought just outside the walls of the town. The imperial army was before the battle encamped on the banks of the canal, where it was re-enforced by the 30,000 cavalry of Burhān al-Mulk, Nāẓim of Awadh (Oudh). But Nādir Shāh's army was under better discipline and provided with abundant artillery, and the defeat of Muḥammad Shāh's forces was sudden and complete. After the break-up of the Mughal empire following on this invasion (and those of Aḥmad Shāh Durrānī and the Mahrāttas), Karnāl and the surrounding district again became a prey to the Sikhs. Gadjpat Singh of Djīnd took possession of it in 1763 after the battle of Sirhind but Nadjaf Khān recovered it in 1775. After this the Sikhs and Mahrattas contended for its possession with varying results. The intrepid adventurer, George Thomas, drove out the Sikhs in 1798, but only held it for a short time. Gurdit Singh, the Sikh chief of Lādwa, then held it for a space until driven out by a British force under Skinner in 1805, after Lake's defeat of the Mahrāttas at Dihlī.

After these events Karnāl became the headquarters of a British district and was for several years the most advanced military post towards the north-west. Partly on account of its unhealthiness and partly owing to the advance of the British frontier to the Satladj it was given up as a military post in 1841, but remained the centre of a civil district. When the mutiny of 1857 broke out, Karnāl was held by the British with the assistance of the Sikh Rādjā of Djīnd and the Musulmān Nawwāb of Karnāl, and remained an important link in the chain of communications between the Pandjāb and Dihlī. Its later history is uneventful. The canal originally constructed by Fīrōz Shāh and afterwards extended by ʿAlī Mardān (whose name it bore) in the reign of Shāh Djahān I, was entirely remodelled by British engineers and now irrigates a very extensive tract. The only building of importance is the tomb of the Saint Bū ʿAlī Ḳalandar, locally said to have been built by Ghiyāth al-Dīn (probably Tughlaḳ), but the architecture shows it to be a much more modern building. Bū ʿAlī Ḳalandar died in 725 (1323) and Ghiyāth al-Dīn died the following year, so the tradition as to the original foundation of the tomb is probably correct. Both Pānīpat and Karnāl claim to have this saint's tomb.

2. A district in the province of the Pandjāb lying between 29° 11′ and 30° 15′ N. and 76° 11′ and 77° 17′ E. Area 3153 sq. m. Population (1901) 883,225 of which 241,412 are Muslims. Its eastern boundary is the R. Djamnā, the District of Dihlī lies to the S., that of Ambāla to the N., and the territory of Paṭiāla and other Sikh States to the W. In addition to the Djamnā, the small rivers called Čitāng and Saraswatī flowing from N. E. to S. W. traverse part of the district. The first named is absorbed in the Western Djamnā canal system. The Saraswatī joins the Ghaghar and the joint stream is lost in the Rādjpūtāna desert although, when the Saraswatī held a greater supply of water, it was a famous river, and the stream probably joined the old course of the Satladj, otherwise called the Hākra. It gave its name to the town of Sarsuti or Sirsa. The territory in the N. of the Karnāl district was the Kurukshētra of the *Mahābhārata* still locally called Kulkhētar. Sthāneśwara (now Thānēsar) was the principal town. Towards the end of the 6th cent. it became the centre of a powerful kingdom to which Harshavardhana succeeded in 606 A. D. He spread his rule over Northern India from the Bay of Bengal to the Satladj and Gudjarāt and was an enthusiastic supporter of Buddhism. He was visited by Yuan Čwang at his camp at Kanawdj in 635

A. D. who also visited the capital Sthānēśwara before his reception by Harsha. After Harsha's death his empire rapidly broke up and Thānēsar lost its importance. It was sacked by Maḥmūd Ghaznawī, and traversed by Mu'izz al-Dīn Muḥammad b. Sām whose defeat and subsequent victory over Prithwī-Rādj took place at Tirāorī, a small town farther to the south near Karnāl in 588 (1192). This place is called Tarāīn and Talāwarī by the chroniclers, but Tirāorī is the actual name in use at the present day. At this place there is a fine serāī of the Mughal period converted into a fort by the Sikhs in the 18th cent. A few miles from Karnāl is also the small town of Kundjpura founded by Nidjābat Khān, an Afghān claiming Ghorghushti descent, in the time of Muḥammad Shāh. It was a fort in a marsh, and was called by its founder Kundj-pura, or the Crane's town; hence the family takes its present name of Kundjpuria. Nidjābat Khān afterwards took the side of Nādir Shāh but fought against Aḥmad Shāh Durrānī. All the sovereign powers of the Nawwābs were taken from them in 1849. Nawwāb Muḥammad 'Alī Khān upheld the authority of the British Government during the mutiny of 1857. The family, though reduced through family feuds, still holds a good position. The Mandal family of Karnāl also has the title of Nawwāb. It claims Afghān origin, but is probably in reality Djaṭ [q. v.]. The Nawwāb Aḥmad 'Alī Khān did good service to the British Government in 1857, and received substantial *djāgīrs*. The family still continues prosperous.

In the South part of the district the principal place is Pānīpat [q. v.].

The Muslim families of Pānīpat are of a good stamp. Among them is a branch of the Sayyids of Bārha. The Nawwāb of Pānīpat is the head of the local Anṣārīs descended from Khwādja 'Abd Allāh of Herāt, whose son settled at Pānīpat in the reign of 'Alā' al-Dīn Mas'ūd Shāh 639 (1241). Nawwāb Bakr Allāh Khān in the early part of the 19th cent, and his son N. Amān-Allāh Khān, both did good service to the British Government, and the present Nawwāb holds large estates.

The other principal Muslims of the district of Karnāl are Rādjpūts of the Čawhān, Mandhār, Ghōrēwāha and Juriwar clans. Some of these clans have sections which still retain the Hindū religion. The conversion to Islām is generally asserted to have taken place in the reign of Fīrōz Shāh Tughlaḳ.

KARNĀTAK. [See CARNATIC].

KARRĀMĪYA, sect, called after Abū 'Abdallāh Muḥammad b. Karrām (or Karām or Kirām; see *Mīzān al-I'tidāl*, iii. 127, and for further ancestors Ibn al-Athīr, *Kāmil*, vii. 149). Of this person, who is called al-Sidjistānī, a fairly full biography is given by al-Sam'ānī in the *Ansāb*, 476b, 477a. According to this, he was of the Banū Nizār, was born in a village of Zarandj, was brought up in Sidjistān, and afterwards went to Khorāsān, where he attended the courses of Aḥmad b. Ḥarb, the Ascetic (d. 234); at Balkh he heard Ibrāhīm b. Yūsuf al-Mākiyānī (d. 257), in Merw 'Alī b. Ḥadjar (d. 244), and in Herāt 'Abdallāh b. Mālik b. Sulaimān, and he recited many traditions on the authority of Aḥmad b. 'Abdallāh Djawybārī (d. 247) and Muḥammad b. Tamīm Faryānānī: "had he known these two, he would have left them alone", both being notorious fabricators. After spending five years in Mekka he returned to Sidjistān, where he sold all his possessions. He proceeded to Nīsābūr, where he was imprisoned by the governor Muḥammad b. Ṭāhir b. 'Abdallāh (according to the *Tādj al-'Arūs* on two occasions); after his release in 251 he left Nīsābūr and proceeded to Jerusalem, where he ended his days in 255. The sanctuary of his followers there, called Khānḳāh, is mentioned by Muṭahhar b. Ṭāhir (*Livre de la Création*, ed. Huart, v. 149) a hundred years later, as also by al-Muḳaddasī.

2. Doctrines. The opinions of this person were set forth in a work called *'Adhāb al-Kabr* "The Torment of the Tomb", of which some citations are given in the *Farḳ bain al-Firaḳ*, pp. 202—214, where there is the fullest account of the sect, with some of whose members the author held debates. His chief theological doctrine, which caused the inclusion of his sect among the Mushabbiha, was that the Divine Being is a Substance (*Djawhar*), for which some of his followers substituted Body (*Djism*), though without human members, and in contact (*mumāssa*, for which the euphemism *mulāḳāt* was substituted) with the Throne, which is located in space. This was apparently a deduction from the Ḳur'ānic *'ala 'l-'arshi 'stawā*, and, indeed, the rest of his theology would seem to have been an endeavour to work the Ḳur'ānic texts into certain parts of the Aristotelian philosophy, notably the distinction between Substance and Accident, and that between *dynamis* and *energeia*. Thus his followers could maintain that God was "speaking" before He spoke, and could be worshipped before there were any worshippers. The doctrine of the eternity of the world was reconciled with the Ḳur'ānic creation by some subtle expedients; God, he held, was subject to certain Accidents, such as willing, perceiving, speaking, coming in contact; over such accidents He has power, but not over the world and the objects therein, which were created not by His will, but by the word *kun*. Thus, it would seem, the tense in *kun fayakūnu* could have its proper meaning.

Another doctrine to which allusion is often made in *kalām* works is that faith (*īmān*) is constituted by a single utterance of the two *shahāda*'s, and involves neither conviction nor works. This view, though similar to the chief thesis of the Murdji'a, is said to have been held by no one before him (Ibn Taimiya, *Kitāb al-Īmān*, Cairo 1325, p. 57, who refutes it at length). The rest of his opinions, as recorded in the *Farḳ*, seem to have been in the direction of moderation. Thus the infallibility of Prophets was confined within certain limits, and a reason was found (somewhat in the style of Ibn Ṭufail) why those

whom no prophetic message had reached ought to believe in prophetic missions; he held that there might be two *Imām*'s simultaneously, and that each would have a right to his followers' allegiance, even when the two were at variance. His innovations in the *furūʿ* were such as to render the law more flexible.

3. **History of the Sect.** It would seem that the Karrāmī doctrine spread chiefly in Khorāsān, and in 370 the author of the *Farḳ* debated with a member of the sect in the presence of the Sāmānid commander Muḥammad b. Ibrāhīm b. Sīmdjūr. It was favoured by Sabuktakīn of Ghazna out of respect for the asceticism of Abū Bakr Isḥāḳ b. Maḥmashādh (d. 383), the chief of the Karrāmīs in his time, who is said to have converted some 5,000 *dhimmī*s. This person's son Muḥammad encouraged Maḥmūd b. Sabuktakīn in a violent persecution of the Bāṭinīs; of this there seems to be an echo in the Life of the Ṣūfī Abū Saʿīd (357—440; ed. Jhukovski, 1899, i. 84—91), where Isḥāḳ b. Maḥmashādh makes common cause with the ḳāḍī Ṣāʿid (a Ḥanafite) against the saint; the numbers of the Karrāmīs in Nīsābūr at the time are given as 20,000. In 403, however, this ḳāḍī, who had made the pilgrimage, and been favoured by the Caliph Ḳādir, complained of the Karrāmī heresy before Maḥmūd at Ghazna; Muḥammad b. Isḥāḳ thereupon repudiated the doctrine, while those who openly adhered to it were penalized. Many, however, continued to hold it at Nīsābūr; Ibn al-Athīr in 488 records a civil war in that city between the Karrāmīs and the joint forces of the Ḥanafīs and Shāfiʿīs, the leaders of the first and second of these being descendants of the leaders in Maḥmūd's time. Yāḳūt (s. v. Bādjistān) mentions a Karrāmī preacher who acquired popularity at Nīsābūr in the middle of the sixth century; and ʿAbd al-Ḳādir Djīlānī (d. 561; *Ghunya*, Cairo 1288, i. 81) speaks of them as still numerous in Khorāsān. Fakhr al-Dīn Rāzī (d. 606; *Asās al-Taḳdīs*, Cairo 1328, pp. 96—98) apparently thinks of them as still existing. It is probable, however, that the sect was practically exterminated when the lieutenants of Čingiz Khān massacred the inhabitants of Khorāsān, and when writers of a later time allude to its doctrines (e.g. Ibn Taimiya and the author of the *Mawāḳif*) they probably derive their knowledge from earlier works.

4. **Literature of the Sect.** In the *Farḳ* it is stated that the sect was subdivided into three minor sects, which, however, were mutually tolerant; these were called Haḳḳāḳiya (?), Ṭarāʾiḳiya (?) and Isḥāḳiya. Shahrastānī mentions twelve minor sects, of which he enumerates six: Isḥāḳiya (as above), ʿĀbidiya, Nūniya, Zarībiya, Wāḥidiya, and Haiṣamiya. Of these the first was doubtless named after that Isḥāḳ who was mentioned above; whereas the last was named after one Muḥammad b. al-Haiṣam, who is called their *Mutakallim* in the *Milal*. The works wherein the founders of these minor sects put forth their views seem to have obtained little notoriety; the author of the *Bayān al-Adyān* (485; Schefer, *Chrestomathie Persane*, i. 152 text), though living at Ghazna, just knows the name of the main sect; and ʿAbd al-Ḳādir (*loc. cit.*) in giving the names of Karrāmī authorities is in error in each case. The work of the founder ʿ*Adhāb al-Ḳabr* seems to be known only from the citations in the *Farḳ*.

(D. S. Margoliouth)

KARS, a town in Armenia, called Ḳars in Ibn al-Athīr, Ḳarṣ in Yāḳūt and Ḥamd Allāh al-Ḳazwīnī, Ḳārṣ in Sharaf al-Dīn ʿAlī Yazdī and later. According to a doubtful etymology, the name comes from the Georgian *kari* "gate"; *karis-kalaki* is said to mean "town at the gate" (from its situation on the frontier between Armenia and Georgia). The town (τὸ Κάρς) is first mentioned by Constantine Porphyrogenetes (*De administr. imperio*, ch. 44) as the capital of the chief of the Armenian princes (ἄρχων τῶν ἀρχόντων). From 961 Mushegh, a brother of the king of Ānī, Ashot III (cf. above, i. 353ᵃ), ruled in Kars, and his successors. A manuscript of the Gospels found in Jerusalem with miniatures of importance for the history of culture dates from the last of these princes, Gagik (1028—1064). The king, queen and their daughter are represented seated in Oriental fashion and wearing Oriental costume; Kars, although it did not then belong to the Caliph's empire, was apparently under the influence of its culture. Gagik continued to hold his principality even after Ānī had been incorporated in the Byzantine empire (1044). It was only when danger threatened from the Turks that he was induced to renounce his rights voluntarily in favour of the Emperor Constantine X Ducas (1059—1067) and received in return a town in the Cilician Taurus. But even the Byzantines could not avert the danger, for in the very same year Ānī and Kars were both conquered by the Turks. Kars remained a Muḥammadan town till 603 (1206—1207), when it was taken by the Georgians (Ibn al-Athīr (ed. Tornberg, xii. 169). It was besieged in vain by the Khwārizmshāh Djalāl al-Dīn (cf. above, i. 1004) in 623 (1226) and taken by the Mongols in 1239 and, according to Ḥamd Allāh al-Ḳazwīnī (*Nuzhat al-Ḳulūb*, ed. Le Strange, p. 93), it belonged at a later period with Ānī to the province of Georgia (Gurdjistān wa-Abkhaz) in the kingdom of the Īlkhāns (cf. above, ii. 465 *sq.*) and later again apparently to the kingdom of the Djalāïr (cf. above, i. 1003ᵃ). Unlike Ānī, Kars was never a Muslim mint. In 1386 Kars was captured by Tīmūr; it is said to have been levelled to the ground (*Ẓafar-Nāma*, i. 400). The town was then in the possession of a prince named Ḳrāʾ-Bakht, who does not appear to be mentioned elsewhere. It was not till the year 1579 (according to Ḥādjdjī Khalīfa, *Djihān-numā*, p. 407, however, 988 = 1580) that Sulṭān Murād III (1574—1595) had Kars rebuilt as an Ottoman fortress by Lālā Muṣṭafā Pasha; during the operations a marble slab is said to have been found with an inscription recording an earlier erection of the time of Sulṭān ʿIzz al-Dīn (probably Ḳilidj Arslān II, 1156—1188). Kars was raised to be the capital of an eyālet of six sandjaḳs under Ottoman rule and also became a place of pilgrimage; the tomb of the Ṣūfī Abu 'l-Ḥasan al-Kharaḳānī (d. at the beginning of 425 = Nov., 1033) was shown there (cf. Samʿānī, ed. Margoliouth, fol. 194ᵇ), but he can never have been in Kars. The tomb is said to have been revealed by the saint himself in a dream — a story often told of other places. The

first Friday mosque was built by Lālā Pasha over the tomb of the saint.

Kars was conquered by Shāh ʿAbbās in 1604 and in 1616 rebuilt by the Turks, attacked in vain in 1628 and 1744 by the Persians and captured for the first time by the Russians on June 23 (July 5), 1828. On Nov. 16 (28), 1855, Kars had to surrender to the Russians after a long defence under General Williams (later Sir Fenwick Williams of Kars). In the war of 1877—1878 Kars was stormed in the night of 6/18 Nov., 1877, and ceded to Russia by the peace of 1878; in 1918 it was returned to the Turks by the treaty of Brest-Litowsk; this cession remained in force even after the treaty of Brest-Litowsk became void.

The number of inhabitants of Kars about 1860 was 12,300 (*Ritter's Geogr.-statistisches Lexikon* s. v.), in 1878 only 8,672 (according to the *Encyclopaedia Britannica*). Under Russian rule the number seems to have fallen considerably at first and then to have risen again rapidly (1889 only 3,041, in 1897 20,805, in 1908 18,397, mostly Armenians). The old Armenian church which had become a mosque (probably the Ḳîzîl Kilīsa monastery mentioned by Ewliyā Čelebi; as a mosque called Ḥasan Katghudā Djāmiʿi) now became a Greek Orthodox church. There were, in addition, two Armenian churches and three mosques (two Sunnī and one Shīʿī). No accurate information is available in Russia regarding conditions since the restoration of Turkish rule; this fact is said to have been fatal for the Armenian population.

(W. BARTHOLD)

KARSHĪ, an Uighur word for "castle, palace", probably borrowed from a native language of Eastern Turkestān and later adopted by the Mongols. The town of Nakhshab or Nasaf [q. v.] has taken its modern name of Karshi from a palace built for the Khān Kabak (1318—1326; see the art. ČAGHATĀI KHĀN), 2 farsakh from the town, all trace of which has long since disappeared. Cf. Sharaf ad-Dīn Yazdī, *Ẓafar Nāma*, ed. Muḥ. Ilāhdād, Calcutta 1887—1888, i. 111; G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 470 *sq*.

(W. BARTHOLD)

KARSHŪNĪ is the name, the origin of which has not yet been explained, for the Syriac alphabet adapted to suit the Arabic language. Yūsuf Daryān, Archbishop of Tarsus, wrote recently on the name in the *Mashriḳ*, 1904, vii. 785—790, but his suggested derivation of the name from an unknown Syriac *karkūnā*, diminutive of *karkā*, which would describe the alphabet as the "small", "round", is quite improbable. Just as the Jews used their alphabet to reproduce the language of the countries that afforded them hospitality, not only for the sake of secrecy but also as a sign of nationality, so also the Syrians must have written the language of their conquerors in their own alphabet soon after they had adopted Arabic for everyday use. The letters lacking in the Syriac alphabet were supplied by pointing those already in existence, but in doing this more attention was paid to the sound than the shape of the Arabic letters. *Khā* and *ghain*, for example, are usually reproduced by Syriac *kāf* and *gāmal* with *rukkākhā*, *djīm* by the Jacobites usually by a point inserted in the letter, by the Nestorians by a hook below it. *Ẓā* and *ḍād* are written by the Nestorians after the Arabic fashion with points over *ṭēth* and *ṣādhē*, but among the Jacobites often by a point in the *ṭēth*, because they had come to be identical in pronunciation. The feminine ending is usually represented by *hē* with two points above it in the Arabic fashion. Vowels are placed, sometimes in the Syriac, and sometimes in the Arabic way, but *ū* and *ī* are almost always represented by *ḍamma* and *kasra*. Whether there were different rules in different periods and localities can only be ascertained after an accurate examination of manuscripts but nothing of the kind has so far been attempted.

(C. BROCKELMANN)

KART, the name of a dynasty which ruled Herāt from 1245 to 1389 A. D. It was founded by Shams al-Dīn Muḥammad I, Kart, who was descended from the Shansabānī house of Ghūr, the family to which the brothers Ghiyāth al-Dīn Muḥammad and Muʿizz al-Dīn Muḥammad b. Sām belonged. As Herāt recovered from the devastating raids of the armies of Čingiz Khān, Shams al-Dīn gradually gained power, and by 1245 had established himself as ruler of the state, and used the title of Malik, borne by his descendants. In 1251 Mangū, the Great Khān, when reorganising the administration of his empire, confirmed Shams al-Dīn Kart as governor of Herāt, Sīstān, Balkh and the country lying between those provinces and the Indian frontier. During the latter part of Shams al-Dīn's reign his son Rukn al-Dīn acted as his coadjutor, but predeceased him, dying in 1283, and when Shams al-Dīn himself died, in 1285, he was succeeded by Rukn al-Dīn's son, Fakhr al-Dīn. As the power of the Mongol Īl-Khāns of Persia declined, that of the Kart Maliks of Herāt increased, and Fakhr al-Dīn befriended the powerful Amīr Čūbān, who had been regent of Persia during the minority of Abū Saʿīd Bahādur Khān, the fourteenth Īl-Khān. When Abū Saʿīd Bahādur, apprehensive of the growing power of this family, attacked it, Amīr Čūbān sought an asylum with Ghiyāth al-Dīn, who received him but in 1327 treacherously put both him and his son Djalaw Khān to death. Ghiyāth al-Dīn himself died in 1328 and his two elder sons, Shams al-Dīn II and Ḥāfiẓ, who succeeded him in turn, died in 1329 and 1331. The historian Ḥamd Allāh Mustawfī attributes their deaths, following one another at such short intervals, to the divine displeasure incurred by Ghiyāth al-Dīn's treachery towards Amīr Čūbān.

Ḥāfiẓ was succeeded by a third brother, Muʿizz al-Dīn, who sent an army to the assistance of Malik Ḳuṭb al-Dīn of Kirmān, driven from his capital by the Amīr Mubāriz al-Dīn. This army was defeated and a second army sent to the aid of Ḳuṭb al-Dīn was shut up in Kirmān and compelled, at the end of 1340, to capitulate. Muʿizz al-Dīn, who died in 1370, left two sons, Muḥammad, who held the government of Sarakhs, which he retained after his father's death, and Ghiyāth al-Dīn Pīr ʿAlī, who succeeded him in Herāt. In 1380 the Amīr Tīmūr sent an envoy to Herāt, to claim the

allegiance of its ruler and his presence, with a contingent, at the forthcoming muster of his army, but Ghiyāth al-Dīn Pīr ʿAlī detained him on various pretexts while he provisioned the city and completed its defences. The envoy was obliged to return to Samarḳand and report the failure of his mission, and in the spring of 1381 Tīmūr marched to Herāt and captured the city, its ruler and his eldest son, Pīr Muḥammad, after a few days' siege. Some of its leading citizens were deported to Shahr-i Sabz and its defences were dismantled, but the Malik and his two sons, the younger of whom had been induced to surrender the strong fort of Ishkalča, were pardoned, and Ghiyāth al-Dīn Pīr ʿAlī was permitted to retain Herāt as a vassal of Tīmūr until 1389, when the dynasty was extinguished.

(T. W. HAIG)

KARṬĀS. (See ḲIRṬĀS).

KĀRŪN, the largest river in Southern Persia. It rises in the north-eastern part of the district of ʿArabistān (earlier called Khūzistān), a little above 32° N. Lat. on the Zardeh-Kūh (Kūh-i Zard, mentioned as early as the xivth century by Ḥamd Allāh Mustawfī; see the *Bibliography*), which belongs to the Bakhtiyārī mountain system, to be more accurate on one of the range named Kūh-i Rang, one of the highest mountains in S. W. Persia (estimated at 13,000 feet). The actual source of the river, according to Sawyer (*Bibl.*; *op. cit.*, p. 486, with a picture), is about 10 miles above the place called Ser-i Česhme-i Kurang "main source of the Kurang (Kārūn)". The Zāʾindeh or Zendeh-Rūd, also called Iṣfahān-Rūd, likewise rises on the Zardeh-Kūh and flows eastwards towards Iṣfahān (on it see Ritter, *op. cit.*, ix. 22; G. Le Strange, *op. cit.*, p. 207; cf. also ii. 529ᵃ and the article ZENDE-RŪD). As the source of the Kārūn is only about 100 miles from Iṣfahān, Shāh ʿAbbās I, the Great, thought of leading the Kārūn into the Zendeh-Rūd by a tunnel through the mountains. The work although almost finished at his death, was not continued by his successors, however; the remains of it may still be seen at the present day; cf. Layard, *op. cit.*, p. 50 *sq.*

The valley of the Kārūn is not yet sufficiently known, particularly in its upper course; among those who have explored it are Kinneir, Rawlinson, Selby, Ainsworth, Layard, Chesney, Loftus, Houtum-Schindler, Mackenzie, Lynch, Bateman Champain, Wells, Sawyer and Graadt van Roggen. We may call the upper part its course down to its exit from the mountains at Shuster, the middle course from Shuster to Ahwāz or Nāṣiriye, where it breaks through the spurs of the Djabal Ḥamrīn; its lower course runs through the alluvial plain formed by the Kārūn system. As a result of the great windings, which the river takes in its course, it covers about 500 miles from its source to its mouth in the Shaṭṭ al-ʿArab, while a straight line between the two points is only about 150 miles. In its upper course the Kārūn makes two great loops in about 32° N. Lat. Shuster which is a little above this line and only a little south of the source of the river is in a straight line only a third of the distance the river has covered from the source. The course of the Kārūn is at first a south-easterly one; it then runs from east to west, while the next section runs north-west to Shum where the second smaller loop is formed towards the south-west and then the river runs north-west again. This direction is maintained till Chamani Yorga (20 miles as the crow flies N. E. of Shuster) is reached. From there to its the mouth the Kārūn runs S. W., although at times it describes very wide curves.

At Shuster, a little above the town, the Kārūn divides into two navigable arms which unite again about thirty miles away at the village of Band-i Ḳīr (near the mediaeval ʿAskar Mukram; see above, i. 488ᵇ) and thus form an island. The western arm is the main stream, the Kārūn proper, it is now called Āb-i Shuṭaiṭ (popular for Shuṭaiṭ = little river; cf. i. 970ᵃ for the same name for a bed of the Tigris) and further down also Āb-i Buzurg Shuster (= great water of Shuster). The east arm is artificial in origin and is now called Āb-i Gerger; the Arab geographers of the middle ages know it by the name of Masruḳān (Mashruḳān, Masruḳān) which is explained as a corruption of the Persian Ardashīr-Kān (= Ardashīr's trench). The form Ardakhshīrgān is noteworthy: it occurs in a Syriac chronicle edited by Guidi in the *Actes du 8ᵉ Congrès des Orientalistes*, Leiden 1891, p. 32, and cf. thereon Nöldeke in the *Sitz.-Ber. Ak. Wien*, 1893, cxxviii., Abh. ix. 42). The first Sāsānian king is said to have been the maker of this water-course. The Persian geographers of the xvith century call the western water-arm, which carries the bulk of the water, Čahār Dānikah (= 4/6), the eastern Dū Dānikah (= 2/6); cf. Le Strange, *op. cit.*, p. 236. These names are still known locally, according to Layard (*op. cit.*, p. 27). It may further be noted that in the 4ᵗʰ century, according to Arabic sources, the Masruḳān canal did not enter the main stream, the Kārūn proper, at ʿAskar Mukram, but ran parallel to it and reached the Persian Gulf by a course of its own.

The Kārūn delta begins a little above the village of Sābla. Three channels break off from the main arm, which continues its course till its junction with the Shaṭṭ al-ʿArab at Muḥammara; these all run S.-E. to the Persian Gulf and finally end their course in estuaries (*Khawr*, *khōr*) which are at times swamps. Their names are:

1. The Shaṭṭ (or Rūd) al-Ḳadīmī (= the old stream) which leaves the Kārūn about an hour's journey above Sābla and broadens out into the Khōr Mūsā (also called Khōr Mūī Allāh; *mōī* in ʿIrāḳ Arabic = water). In it we have probably the oldest course of the Kārūn.

2. The Shaṭṭ al-Amaya (as it is usually written on maps) or al-Aʿmā = the blind stream), probably so called because its bed is usually choked with mud. In Ritter (ix. 159, 166, following Rennouard) the name is wrongly explained as "wanderer" (the form *al-Amara* in Ritter, xi. 1028, 1030, is certainly wrong). The same name is also given to an arm of the Shaṭṭ al-Ḥai, below Ḳūt al-ʿAmāra (see Ritter, x. 169; Ainsworth, *op. cit.*, ii. 259, and the maps). Cf. also the analogous name Didjla al-ʿAwrāʾ for the present lower course of the Tigris; see above, i. 970ᵇ, as well as

Islām, xiv. 22 (a different explanation of ʿAwrā is proposed by Reinaud, *Journal asiatique*, 1861, xviii. 208). It is also called Shaṭṭ Kobān (Gobān) from the district of Kobān (Goban) which lies on its right bank; Portuguese writers of the xviith century reproduced the name as Rio de Galão (cf. Tomaschek, *op. cit.*, p. 75 *sq.*). This second arm begins at Sabla and finally expands into the Khōr Silidj (Selege in Kinneir, *op. cit.*, p. 292); it is perhaps the second oldest arm of the Kārūn.

3. The Shaṭṭ Bamishīr (Bahmishīr, Behemshīr) which leaves the Kārūn 6 miles below Sabla and expands into the Khōr Bamishīr before entering the sea. This third branch from the Kārūn is considerably wider and holds more water than the other two. According to the *Persian Gulf Pilot*, p. 284; see the *Bibl.*) it is 54 miles long (40 as the crow flies). This may now be regarded as the natural mouth of the Kārūn. Bamishīr is a corruption of Bahman-Ardashīr, the name of the first Sāsānian king, to whom is ascribed the making of a whole series of canals in southern ʿIrāḳ. The most southern district of this province, on the coast, was called Bahman-Ardashīr after him, as was a town opposite Ubulla (east of Baṣra) on the left bank of the Didjla al-ʿAwrā (Shaṭṭ al-ʿArab; cf. Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, i. 770, 10, where the arabicised form Bahmanshīr is also given). It appears as if in the middle ages Bahmanshīr was regarded as the Persian equivalent of Didjla al-ʿAwrā. Different scholars (like Rawlinson, Ainsworth, Le Strange) have made the further deduction that the Shaṭṭ Bamishīr is to be identified as the old mouth of the Euphrates or Tigris (before the formation of the modern Shaṭṭ al-ʿArab). But it is very easy to suppose that the name Bahmanshīr (Bamishīr) was at a later date transferred from the Didjla al-ʿAwrā (Shaṭṭ al-ʿArab) to its eastern neighbour, the third branch of the Kārūn. For Bahman-Ardashīr and Didjla al-ʿAwrā cf. especially Reinaud, *op. cit.*, p. 207 *sq.*; Tomaschek, *op. cit.*, p. 78; Ainsworth, *op. cit.*, ii. 173, 182; G. Le Strange in the *J. R. A. S.*, 1895, p. 300 and *op. cit.*, p. 43.

The two western branches of the Kārūn, the Shaṭṭ al-Aʿmā and the Bamishīr, form two long islands with the Shaṭṭ al-ʿArab which runs parallel to them, the main Kārūn in the north and the Persian Gulf in the south. The eastern one, bordered by the Shaṭṭ al-Aʿmā (Kobān) and the Bamishīr is called Kobān (Goban, Gubban); the western between the Bamishīr and the Shaṭṭ al-ʿArab is now usually called Djazīra ʿAbbādān, a name it already had in the middle ages, from the town of ʿAbbādān (see above, i. 7a) which probably lay at the mouth of the delta originally. The latter island is also called *Djazīrat al-Khiḍr* after the prophet al-Khiḍr [q. v.] highly revered in Muslim popular belief especially in the ʿIrāḳ as a patron of water, who had or still has a sanctuary near ʿAbbādān (Chidder Abbadan in Niebuhr, *Reisebeschreibung nach Arabien* etc., ii., Copenhagen 1778, p. 206) which is mentioned as early as the xiiith and xivth centuries by al-Dimashḳī (*Nukhbat al-Dahr*, ed. Mehren, p. 97, 18) and Ibn Baṭṭūṭa (ed. Defrémery and Sanguinetti, ii 19, 3). With ʿAbbādān the most important place in it in the middle ages seems to have been al-Muḥriza (Muḥrizā) and the island seems to be occasionally called after it; in Portuguese sources of the xviith century the island is therefore called "ylha Marzique", cf. Tomaschek, *op. cit.*, p. 76; for Muḥriza see Yāḳūt, i. 502, 19; 712, 13; iii. 598, 4; iv. 709, 5; al-Dimashḳī, *op. cit.*, p. 97, 8; al-Ḳazwīnī, *Āthār al-Bilād*, ed. Wüstenfeld, p. 280, 14. The Persians gave this island the name Miyān Rūdān (= between the rivers, *Mesopotamia*); see e. g. Yāḳūt, iv. 708, 19, and Le Strange, *op. cit.*, p. 48.

It has already been pointed out that the Kārūn at an earlier period probably entered the sea through the Shaṭṭ al-Aʿmā — apart from the river-bed represented by the Shaṭṭ al-Ḳadīm, which is perhaps the oldest bed. According to the Arab geographers of the middle ages, the different branches and tributaries of the Dudjail (Kārūn) united at a place called Ḥiṣn al-Mahdī. Whether the Nahr Sidra (= Lotus-river) which also enters there must be considered the main arm of the Kārūn from Ahwāz onwards, is doubtful: cf. Le Strange, *op. cit.*, p. 237; Schwarz, *op. cit.*, p. 306. The reunited Kārūn called Nahr Ḥiṣn al-Mahdī (see Schwarz, *op. cit.*) then enters its estuary (Faiḍ Dudjail) which ends at Sulaimānān on the coast. On Ḥiṣn al-Mahdī and Sulaimānān cf. Le Strange, *op. cit.*, p. 48, 243, and in the *J. R. A. S.*, 1895, p. 302; Schwarz, *op. cit.*, p. 306, 329—330, 400). Ḥiṣn al-Mahdī perhaps lay in the neighbourhood of the present Sabla; Sulaimānān is perhaps to be located somewhere in the region of the Khōr Silidj; the end of the course of the Kārūn in the middle ages would thus coincide practically with the modern Shaṭṭ al-Aʿmā. In the middle ages there must have been several other separate smaller mouths of the Kārūn. In these topographical investigations it should not be forgotten that southern ʿIrāḳ and Khūzistān, the delta of the great rivers, has undergone far-reaching changes in its hydrographic structure in the course of thousands of years. In ancient times the Persian Gulf extended much farther into the mainland, so that the Kārūn, Kerkha, Euphrates and Tigris had all separate mouths; cf. above, i. 675 *sq.*, and Andreas in Pauly-Wissowa, *Realencykl. d. klass. Altertumswiss.*, i. 1394, 2811. During the middle ages and in modern times the coastline had been steadily advancing southwards.

The bed of the Kārūn from Sabla to Muḥammara seems to be the work of human hands. In the tenth century the Būyid ʿAḍud al-Dawla (see above, i. 143) had a canal made, which was called ʿAḍudī after him, to secure direct communication between the Tigris and Kārūn (= Baṣra and Ahwāz). As in those days apparently the Kārūn flowed into the Persian Gulf through the Shaṭṭ al-Aʿmā, the ʿAḍudī in its main lines probably corresponded with the present course of the Kārūn between Sabla and Muḥammara. It is very doubtful if the work of the Būyid Sulṭān was something quite new; it is more likely that he undertook the restoration of an older channel which had fallen into neglect and become silted up. A century earlier we have evidence from the Arab geographers of the existence of a canal called Nahr al-Djadīd (= New Canal) which led from Ḥiṣn al-Mahdī (near Sabla?) to the Tigris and may well have coincided with the ʿAḍudī. From a still earlier period we have the Bayān canal (see above, i. 970b); considering its course it may wholly or in part have coincided with the ʿAḍudī or Nahr al-Djadīd. Whether there was in ancient times — about the period of Alexander — an artificial channel connecting the Kārūn and Tigris following the same direction cannot be ascertained with certainty; on this question cf. Andreas in Pauly-Wissowa, *op.*

cit., i. 1394. In modern times the name Ḥaffār (usually written Ḥafar in books of travel and in maps) has come into use for the stretch of the Kārūn between Sābla and Muḥammara, which suggests that here we have a work of human hands, not a natural bed dug out by the river itself. At the present day, however, this name is limited to the short stretch, only about an hour's journey long, from the beginning of the Shaṭṭ Bahmishīr (the mouth proper of the Kārūn at the present day) to Muḥammara. This lower Ḥaffār is (according to Stolze-Andreas, *op. cit.*, p. 48) about 600 yards broad and 20—25 feet deep, while the Kārūn above Sābla before the beginning of the delta is a mile broad and 25—30 feet deep. It should also be noted that in the second half of the xviiith century Sulaimān, the powerful Shaikh of the tribe of Kaʿb (on him see below) destroyed the connection between the Kārūn and the Shaṭṭ al-ʿArab by placing a dam (*band*) across the Ḥaffār at Sābla and led the water into the Shaṭṭ al-Aʿmā. The district of Ḳobān was thereby soon raised to great prosperity. But at Karīm Khān's [q. v.] second invasion the dam in the Ḥaffār was destroyed (cf. Kinneir, *op. cit.*, p. 90). On the communication between the Kārūn and Tigris by the ʿAḍudī, Nahr al-Djadīd, Bayān and Ḥaffār canals see Kinneir, *op. cit.*, p. 90, 293—294; Layard, *op. cit.*, p. 55—56; Tomaschek, *op. cit.*, p. 76—77; Ainsworth, *op. cit.*, i. 174, 184; *Persian Gulf Pilot*, p. 296; Le Strange, *op. cit.*, p. 48, and in the *J. R. A. S.*, 1895, p. 308—309; Schwarz, *op. cit.*, p. 309, 314, 390.

While still in the mountains the Kārūn receives a number of abundant tributaries, for example above Shūsh the Āb-i Bāzuft on the right and the Āb-i Burz (Bors) on the left. A little above Chamani Yorgha the Taīak joins it. But the most important tributary is the river of Dizfūl [q. v., i. 983 *sq.*], the Dizfūl-Rūd or Āb-i Diz. This has no name of its own at the present day; it was the same in the middle ages as it figures in the Arabic sources simply as the "river of Djundai-Sābūr". On Djundai-Sābūr, which must have lain to the S. E. of Dizfūl, see i. 983 *sq.* and more recently Schwarz, *op. cit.*, p. 346 *sq.* The Dizfūl-Rūd, which, like the Kārūn, has a very winding course, rises out of the confluence of two little streams in the district of Burūdjird in Little Luristān (cf. von Bode, *op. cit.*, ii. 274). It joins the Kārūn at Band-i Ḳīr; in earlier times the confluence seems to have been a little further south (cf. Le Strange, *op. cit.*, p. 239); it may have at one time flowed into the Kerkha [q. v.], as modern tradition still says (see Layard, *op. cit.*, p. 65). As to the Kerkha, which now loses itself in the marshes below Ḥawīza [q. v., ii. 294b], it must be assumed from the statements of the Arab authors and the ancient river-bed, which can still be traced, that the bulk of its waters joined the Kārūn a few hours' journey below the town of Ahwāz (on this see also Billerbeck, *op. cit.*, p. 30). Another arm of the Kerkha but hardly the main stream (contrary to Rawlinson; cf. Andreas in Pauly-Wissowa, *op. cit.*, i. 1394) may have at one time entered the Shaṭṭ al-ʿArab in the region of Kurna.

The Dizfūl-Rūd, the upper course of which still requires more thorough geographical exploration, has as its principal tributary the Bāla-Rūd which enters it about 7 miles S.W. of Dizfūl. Another important tributary of the Dizfūl-Rūd is the Shāwūr (Shāpūr, also written Shaour, Shovor), a narrow but deep water-course which rises a few miles above the ruins of Sūs [q.v.] and falls into the Dizfūl-Rūd about 15 miles (as the crow flies) west of Band-i Ḳīr. In the middle ages the Shāwūr, like the Kerkha, was called the "river of Sūs" because it flowed past this town — which, it may be noted, is at the point where the Kerkha, Dizfūl-Rūd and Kārūn are nearest one another. The Shāwūr and the Dizfūl-Rūd were at one time and in part still are connected with the Kerkha and the Kārūn by canals. On the Dizfūl-Rūd and Shāwūr cf. Ḥamd Allāh Mustawfī, *Nuzhat al-Ḳulūb*, ed. Le Strange, p. 215, 11; 218, 13, 15; G. Le Strange, *op. cit.*, p. 233, 239, and in the *J. R. A. S.*, 1895, p. 312; Schwarz, *op. cit.*, p. 303—305; Ritter, ix. 193 *sq.*; Layard, *op. cit.*, p. 56 *sq.*; v. Bode, *op. cit.*, ii. 193; Loftus, *op. cit.*, p. 329, 342, 346; J. Dieulafoy, *op. cit.* (see the *Bibliography*), passim; Sawyer, *op. cit.*, p. 490 *sq.*

The Kārūn is not only connected with the Tigris and Kerkha in the west but in the east it is linked up with the Djarrāḥī or Kurdistān-Rūd or Āb-i Kurdistān (the Ṭāb of the Arab geographers; see Le Strange, *op. cit.*, p. 270; Schwarz, *op. cit.*, p. 5 *sq.*; see also the article ARRADJĀN, above, i. 460). At Sābla a canal navigable by boats leaves the Shaṭṭ al-Aʿmā and runs to Dawraḳ (Dōraḳ)-Fellāḥiye (see the art. DAWRAḲ) on the Djarrāḥī.

The more important towns on the Kārūn in mediaeval as in modern times lay on its central course between Shuster and Ahwāz. At the two termini of this stretch stood the two capitals of the mediaeval province of Khūzistān, Ahwāz and Tustar (Shuster). Ahwāz, formerly the capital proper of this district, has a very important situation. This is at the gateway of the Kārūn where the river breaking through its last barrier, the Djabal Ḥamrīn range, enters the plain and henceforth offers no impediment to navigation to the sea. The later place of this name is built near the ruins of the old city; a mile south is the modern town of Nāṣiriye, which is growing rapidly (cf. Herzfeld, *op. cit.*, p. 77). Cf. on Ahwāz above, i. 208, and Schwarz, *op. cit.*, p. 315 *sq.*, and Graadt van Roggen, *op. cit.*, p. 202 *sq.* (with plans); for Tustar see the article SHUSTER, and on the site (particularly the bifurcation which begins there) Graadt van Roggen, *op. cit.*, p. 174 *sq.*

Places worth mentioning between Shuster and Ahwāz are: the large village of Wais, where a dead arm of the Kārūn runs to the east, and Band-i Ḳīr (usually pronounced Ḳīl), a place of considerable importance owing to its situation at the junction of the two arms of the Kārūn and the mouth of the Dizfūl-Rūd. Band-i Ḳīr is the successor of the mediaeval ʿAskar Mukram, the ruins of which (called Lashkar; Lashkar is the Persian equivalent of the Arabic ʿAskar) lie 3 miles north of it. On ʿAskar Mukram see above i. 488b, and Schwarz, *op. cit.*, p. 377 *sq.*

The lower course of the Kārūn from Ahwāz to Muḥammara has no places of great importance on its banks. Among them are Ismāʿīliya and Sābla, remarkable for its situation at the beginning of the bifurcations of the delta; it has the ruins of a castle which was at one time the favourite resort of Sulaimān, the influential Shaikh of the Kaʿb already mentioned (cf. Kinneir, *op. cit.*, p. 57). Muḥammara [q.v.] at the junction of the Kārūn and the Shaṭṭ al-ʿArab is, however, a place of unusual

importance. It is undoubtedly the best harbour in Persia, easily accessible at any time, and is destined to have a still greater future. The fact is noteworthy that all the places of any importance that we have mentioned on the central and lower Kārūn lie on its east bank.

In the mountainous upper course there are no longer any towns of importance. In late antiquity and in the middle ages the most prominent were Sūsan (also called ʿArūdj or ʿArūḥ and Djāталiḳ; see the art. SŪSAN) on the right bank and Īdhadj or Māl-Amīr [q. v.] opposite on the left bank. Both are famous for the very fine remains dating from the Elamites and Sāsānians. Along the upper course in parts runs a road protected by many forts, now mostly in ruins. The Kārūn in general is one of the most historically interesting rivers in Persia owing to the numerous ruins from ancient times which are everywhere found on its banks.

The dwellers on the Kārūn in its upper course and on its middle course to beyond Shuster are the Bakhtiyārīs [q. v., i. 603[a]], one of the three principal tribes of the Great Lurs. In the lower half of its central course and the whole of the lower stretch the powerful Arab tribe of Kaʿb (popularly pronounced Tshaʿb, Shaʿb, Shaʿab) are predominant; their Shaikh lives in Dawraḳ-Fellāḥiye. (On this tribe which has only become important in these regions since the xviiith century see Kinneir, *op. cit.*, p. 85—87, 91; Buckingham, *Travels in Assyria, Media and Persia*, London 1830, ii. 195 *sq.*; Selby, *op. cit.*, p. 214; Layard, *op. cit.*, p. 36 *sq.*; v. Bode, *op. cit.*, ii. 110—120; Loftus, *op. cit.*, p. 285 *sq.*; Ainsworth, *op. cit.*, ii. 205—218; Ritter, *op. cit.*, ix. 159—160, xi. 1038, 1063—1064. From Ahwāz to Muḥammara we find also Bawī and Idrīs tribes who are subject to the Kaʿb (cf. Selby, *op. cit.*).

In the military history of the middle ages the Kārūn basin only occasionally occurs as the scene of fighting; cf. thereon Schwarz, *op. cit.*, p. 299—300. During the World War of 1914—1918 the possession of this territory became very important on account of its oil-fields; cf. thereon Schweer, *op. cit.*, p. 140—144, and the section relating to the ʿIrāḳ and southern Persian fronts in books on the war.

As early as the Sāsānians powerful dams (*shadhrawān's*) with the necessary sluices had been erected at various places to enable the water thus dammed back to be led by numerous small canals to fields on a higher level, especially on the central stretch of the Kārūn. During the whole of the middle ages this irrigation system was kept in excellent repair and transformed the land it watered into flourishing gardens. Since then, however, most of these works have fallen more and more into ruins as a result of neglect and great stretches of once fertile country have become desert again. The most celebrated was the gigantic dam at Shuster, which was regarded in the east as one of the wonders of the world. Its erection is ascribed to the Sāsānian king Sapor I (241—272 A.D.). It is very probable that the tradition is correct which says that Roman prisoners of war were forced to build it for him; the modern name, Band-i Ḳaiṣar = Caesar-dam, also points to its Roman origin. On this great system of dam and sluices here, which after considerable restoration is still partly in use to-day, see Ritter, *op. cit.*, ix. 186 *sq.*; Nöldeke, *Geschichte der Araber und Perser zur Zeit der Sasaniden*, Leiden 1879, p. 33; Justi in the *Grundriss der iran. Philologie*, ii., Strassburg 1896 *sq.*, p. 518; Le Strange, *The Lands of the Eastern Caliphate*, p. 235; Schwarz, *Iran im Mittelalter* etc., p. 296. At Wāʾis, a few hours' journey below Band-i Ḳīr, the ruins of a great dam may still be seen (cf. Herzfeld, *op. cit.*, p. 76). In Ahwāz, at the rapids there, considerable remains of a triple ancient system of dams still exist. Band-i Ḳīr (= Bitumen-dam) has got its name from the ancient dam coated with bitumen. At the beginning of this century the Persian government thought of restoring the province of ʿArabistān to its former high degree of prosperity by restoring the old system of canals with dams and sluices. It was intended to begin with the island formed by the Āb-i Shuṭaiṭ-Kārūn and the Āb-i Gerger between Shuster and the Band-i Ḳīr and the Dutch engineer Graadt van Roggen was appointed to make a survey. He published the valuable results of his investigations in an important treatise illustrated with numerous plans and sketch-maps (*Notices sur les anciens travaux hydrauliques en Susiane* in the *Mém. de la Délégation en Perse*, vii., Paris 1905, p. 167—207); he also went fully into the old irrigation systems of Shuster and Ahwāz. Unfortunately political jealousies have prevented the execution of this most useful project of the Persian government.

The Kārūn is the only river of Persia that admits of navigation. Communication is maintained with the Persian Gulf through the Shaṭṭ al-ʿArab and the Shaṭṭ Bamishīr. There is evidence as early as the Umaiyad period that there was regular traffic up the river as far as Ahwāz (cf. Schwarz, *op. cit.*, p. 300). The Kārūn is navigable as far as Shuster. The only obstacle is the rapids caused by the gypsum rocks below Ahwāz (see the very full description by Wells, *op. cit.*, p. 136 *sq.*) which make unloading and reshipment necessary; in 1891 a little railway was put in use for this purpose. The Āb-i Gerger is also navigable; but in it also reshipment is necessary at Shilīlī (6 miles below Shuster). One can sail up the Dizful-Rūd as far as the vicinity of Dizfūl (cf. *Persian Gulf Pilot*, p. 298). The first to show that steamers could ascend the Kārūn as far as Shuster was Selby in 1842, accompanied by Layard, although in 1836 Major Estcourt, accompanied by Ainsworth, had previously reached Ahwāz in a steamer of smaller size. In 1888 the Kārūn was opened to international navigation. At the present day there ply on it boats of the firm of Lynch who have long had a concession, the Persian Nāṣirī company founded in 1889 and a Persian government steamer. If the bed of the river received a certain amount of regulation and the caravan roads from Shuster to Iṣfahān were improved, we should have an important route for traffic, which would shorten by about half the journey from the Persian Gulf to Iṣfahān, the centre of Persian commerce, which now mainly follows the difficult road from Bushīr via Shīrāz. Steamers of an average size can go as far as Ahwāz; from there to Shuster only small boats of shallow draught.

The shipping on the Kārūn has in the last few years become specially important for the transport of the petroleum obtained in Southern Persia. The Kārūn valley possesses a series of oil-wells, e.g. at Ahwāz. The oil-fields of Maidān-i Naftūn (east of Shuster) are particularly productive, perhaps the richest in all Persia. The exploitation and

development of the Persian oil-fields is now in the hands of the Anglo-Persian Oil Company. The yield of the oil-fields, where the most modern methods are now in use, has grown to such an extent that the transport of oil down the Kārūn in tank-ships is now no longer sufficient and two special pipes have had to be laid in addition. On the oil industry in the Kārūn valley the best authority is Schweer, *op. cit.*, p. 22 *sq.*, 110 *sq.*, 177 *sq.*

We conclude by dealing with the names of the Kārūn: in its upper course it is called Āb-i Kurang = "water of the Kurang". Kurang (cf. Wells, *op. cit.*, p. 146; Le Strange, *op. cit.*, p. 232) is said to be a corruption of Kūh-i Rang = "variegated hill", the name of the mountain already mentioned in which the river rises. Whether this explanation is correct, need not be discussed here. Kurang, or Karun, seems to have become Kārūn in the mouths of the Arabs. Among the Portuguese historians of the xvi[th] century we find the name as Rio Caron; cf. Tomaschek, *op. cit.*, p. 83. They presumably only refer to the lower course of the river, which alone is called Kārūn at the present day. This name is quite unknown to the Arab and Persian writers of the middle ages. They give the river various names. It is usually called Dudjail (= little Tigris) by the Arabs, apparently because it was near the larger river. As the name Dudjail was also found elsewhere (for example a Tigris canal above Sāmarrā; cf. i. 970[a]; a water-course near Kūfa, see Schwarz, *op. cit.*, p. 299, note 6) it was more accurately specified as Dudjail al-Ahwāz = the Dudjail of Ahwāz (Khūzistān or its capital; see the art. AHWĀZ, i. 208). According to Ḥamza al-Iṣfahānī in Yāḳūt (ii. 555, 21) Dudjail represents the translation of the Pahlavi *Didla Kūdak*. The Kārūn was also called "river of Khūzistān or of Ahwāz" (Āb-i Ahwāz is still usual for the stretch near the town of Ahwāz; see above, i. 208). It was also called "river of Tustar" (Shuster) after the second principal town of the mediaeval Khūzistān; in Ibn Baṭṭūṭa (ii. 24, 2) we find the name Nahr al-Azraḳ = "the blue river", from the blue colour of its mountain water which was generally esteemed for its remarkable freshness. We have already discussed above local names for particular parts or arms of the river, for example in the information between Shuster and Band-i Ḳīr and in the delta. Brief reference may be made to the cuneiform names Ulai (also in O. T.), Idide, Ḫudḫud and to the names found in Greek and Roman literature: Aduna, Eulaeus, Hedyphon, Koprates, Pasitigris, which were used not only for the Kārūn itself, but also for its tributaries, like the Dizfūl-Rūd with the Shāwūr. For the cuneiform inscriptions cf. Streck, *Assurbanipal*, Leipzig 1916, p. cccxxxix., 26, 787, 788, 813; for the classical references cf. Pauly-Wissowa, i. 435—436, 1393; v. 2459, vi. 1661—1663, vii. 2504, xi. 1563.

(M. STRECK)

ĶĀRŪN occurs in Ḳurʾān xxviii. 76—82; xxix. 38; xl. 25. In the second and third passages he, with Hāmān, is an unbelieving minister of Firʿawn in oppressing the Israelites; he behaves proudly towards Mūsā and says that he is an enchanter and a liar. In Ḳur. xxviii. he is the Biblical Korah (Num. xvi.) and he behaves proudly towards the people of Mūsā but it is because of his immense wealth which he believes to have been given to him on account of his knowledge (*ʿalā ʿilm[in] ʿindī*). He makes a great public display

of his wealth and is swallowed up by the earth with his palace (*dār*). He is thus an example of those who prefer the fleeting wealth of this world to gaining by alms and humility and righteousness the abiding riches given by Allāh in the world to come. This is apparently a moralized echo of a story heard and remembered vaguely by Muḥammad. To this the commentators and the compilers of prophetic *ḳiṣaṣ* have added a long and involved legend derived in whole or in part from rabbinic literature. For this, on the rabbinic side, see the *Jewish Encyclopedia*, vii. 556 *sqq.* and, on the Muslim side, the notes in Sale's translation of the Ḳur'ān and al-Thaʿlabī, *Ḳiṣaṣ*, Cairo 1314, p. 120 *sqq.* It is plain that Hāmān has become a minister of Pharaoh because he is bracketed with Korah in rabbinic literature for rapacious wealth. The legend of Ḳārūn has had two special developments. 1. From his wealth and knowledge (above and Ḳur. xxviii. 78) he has become one of the founders of alchemy. See the preliminary statement of the *Fihrist* on alchemy (p. 352, l. 1); and al-Masʿūdī alludes to this (*Murūdj al-Dhahab*, viii. 177). 2. He is associated in Egypt with lakes. Thus what is left of Lake Moeris in the Faiyūm bears his name (Baedeker, *Ägypten*[6], p. 184; Joanne, *Égypte*, p. 611; Herodotus, ii. 149). Also, beside the Birket al-Fīl to the south of Cairo, near the Mosque of Ibn Ṭūlūn, there was formerly a Birket Ḳārūn which had evidently associations of supernatural legend. Al-Maḳrīzī describes it (*al-Khiṭaṭ*, ed. 1325, iii. 261 *sq.*) and tells that Kāfūr who builds beside it was said to have been driven from his house by *djinn*. It figures also in the Story of Djūdar the Fisherman in Zotenberg's (cf. *Not. et Extr.*, xxviii., i. 167 *sqq.*) Egyptian Recension of "The 1001 Nights" (Nights 606—624) as a place where spirits take refuge from magicians. Von Hammer suggested in a note to his transl. of this story (*Der Tausend und Einen Nacht noch nicht übersetzte Märchen*, etc., trans. Zinserling, ii. 32; trans. Trébutien, i. 291) that Ḳārūn had here become combined with the Egyptian Charon.

(D. B. MACDONALD)

KĀRWĀN (older former *kār-bān*, "He who protects trade") the original of the word caravan, means in Persian a number of merchants who organise themselves into a body to defend themselves against robbers and brigands (Ar. *ḳāfila*). The beasts of burden are camels, horses and mules; the camels are usually arranged in files of seven animals (*ḳaṭār*); the camel-driver rides on an ass at the head of the procession. The caravan drivers are slow and do not hurry, but their work is hard and trying; a man has often ten or twelve camels to watch and guide; sometimes thirty or forty are managed by three men. The men have to unload their beasts on reaching a stage and feed and tend them: it is only when this has been done that they can think of themselves. In the middle ages the signal for departure was given by beating kettledrums (*kūs*).

In desert regions, the caravan camps under the tents that it carries with it; but sovereigns and generous benefactors have had built from stage to stage and at the resting-places, buildings called *kārwānsarāy* "caravan-houses". Their plan is always practically the same; — a square courtyard surrounded by walls with no windows looking outwards, upon which abut a series of rooms each with a door and window or sometimes little huts without a roof, intended to serve as a lodging for the night for the merchant and his goods. The beasts of burden remain hobbled in the courtyard. These caravanserais are as far as possible supplied with running water or at least a well. In Persia the bulk of these buildings still standing date from the Ṣafawid dynasty and are traditionally attributed to Shāh ʿAbbās the Great. There is nothing there but the four bare walls; the travellers carry everything that is necessary with them, beds, carpets, cooking utensils, etc. In the towns especially, however, there is to be found near the caravanserais a caterer who has always ready the dishes loved by Orientals.

The Shīʿīs consider it a work of piety to be interred near the mausoleum of ʿAlī at Nedjef (Meshhed ʿAlī) and of Ḥusain at Kerbela (Meshhed Ḥusain), both places situated in Ottoman territory. For this purpose corpse-caravans have been organised, which carry from the remotest corners of Persia dead bodies by thousands. The bodies placed in wooden coffins or rolled in mats or carpets are tied in twos, threes or fours to the back of a horse. At every stage the corpses are loaded and unloaded like packages. As the journey lasts several weeks, these caravans give out an unbearable stench and never camp at less than three or four miles from the villages they pass.

(CL. HUART)

ĶARWĀSH b. AL-MUḲALLAD ABU 'L-MANĪʿ, MUʿTAMID AL-DAWLA, an ʿUḳailid. After the murder of al-Muḳallad in 391 (1000/1) he was succeeded as Amīr by his eldest son, Ḳarwāsh. In 392 (1001/2) the latter sent an army against al-Madāʾin, which then owed allegiance to the Būyids. The ʿUḳailids, however, had soon to retreat and when they made an alliance with the Banū Asad under Abu 'l-Ḥasan ʿAlī b. Mazyad, Bahāʾ al-Dawla's [q. v.] deputy, Abū Djaʿfar al-Ḥadjdjādj, at once took the field against them and summoned the Banū Khafādja to help him. In Ramaḍān of the same year (July–August, 1002) the armies met; Abū Djaʿfar was defeated but gathered his forces together again and soon inflicted a heavy defeat on the ʿUḳailids near Kūfa. In the year 397 (1006/7) Ḳarwāsh undertook an expedition against Kūfa but was defeated. A few years later (401 = 1010/11) he abandoned the ʿAbbāsids and had the *khuṭba* read for the Fāṭimid caliph, al-Ḥākim bi-Amri 'llāh, but on the approach of an army under Bahāʾ al-Dawla's general, Ḥasan b. Ustādh Hurmuz, at once returned to his allegiance. In 411 (1020/1) Ḳarwāsh was attacked and defeated by the Mazyadis and the Caliph's troops and was only allowed to retain his position by the Caliph's grace. But peace did not last long. The Banū Khafādja invaded Ḳarwāsh's lands and when he took the field against them they made an alliance with Dubais b. ʿAlī b. Mazyad (417 = 1026/7). An army from Baghdād also joined the

allies. The vanguards met near Kūfa: Ḳarwāsh took to flight and the allies for the time being occupied the town of al-Anbār. Internal feuds then broke out. Two ʿUḳailids, Nadjdat al-Dawla Kāmil b. Ḳurād and Rāfiʿ b. al-Ḥusain, who were joined by Badrān, a brother of Ḳarwāsh and lord of Naṣībīn, made an alliance, advanced against Ḳarwāsh with a strong army and the two forces soon met. In the midst of a desperate conflict, however, a reconciliation was effected on the battlefield and Badrān was allowed to retain Naṣībīn. In the meanwhile Manīʿ b. Ḥassān, commander of the Banū Khafādja, plundered the town of al-Djāmiʿain, which belonged to the Mazyadīs, whereupon Dubais made peace with Ḳarwāsh. After Manīʿ had twice burned down the town of al-Anbār, he submitted to the Būyid Abū Kālīdjār [q. v.], while Ḳarwāsh assisted the people of al-Anbār to fortify their town. In the struggle between the Turkish prince Barstoghan and the Būyid Djalāl al-Dawla [q. v.] Ḳarwāsh was on the side of the latter. In the year 432 (1040/1) they quarrelled for various reasons, but friendship was soon restored after Djalāl al-Dawla had sent an army against al-Anbār and Ḳarwāsh had to pledge himself to obedience. In the years 432 and 433 Mesopotamia was invaded by the Ghuzz [q. v.] (cf. the article MARWĀNIDS); on Ramaḍān 20, 435 (April 21, 1044), however, they were defeated by Ḳarwāsh in combination with the other ʿUḳailids and Dubais at Raʾs al-ʿAyn and had to retire to Diyār Bakr and Ādharbaidjān. Ḳarwāsh had also to wage war on his brother Abū Kāmil Baraka. Their good relations were interrupted by 440 (1048/9); their nephew, Ḳuraish b. Badrān, joined his uncle Ḳarwāsh and put Abū Kāmil to flight. In Muḥarram, 441 (June, 1049) it came to fighting between the two brothers; but as several of the followers of Ḳarwāsh went over to Abū Kāmil, the latter had little difficulty in taking him prisoner and bringing him to al-Mawṣil. Although Ḳarwāsh continued to be nominally recognised as suzerain, he no longer played an active part in politics, and as Abū Kāmil found him too independent, Ḳarwāsh was deprived of his freedom in 442 (1050/1), although he was still treated with respect. After the death of Abū Kāmil in 443 (1052) his nephew Ḳuraish was recognised as Amīr. Ḳarwāsh died on Radjab 1, 444 (Oct. 27, 1052) in the fortress of al-Djarrāḥiyya near al-Mawṣil. According to one story, Ḳuraish had him assassinated.

Bibliography: Ibn al-Athīr, ed. Tornberg, ix. 94—403; Ibn Khallikān, ed. Wüstenfeld, Nº. 745, transl. by de Slane, iii. 415 *sqq.*; Ibn Shākir al-Kutubī, *Fawāt al-Wafayāt*, ii. 131 *sq.*; Ibn Khaldūn, *al-ʿIbar*, iv. 257—264; al-Hilāl al-Ṣābiʾ, *Kitāb al-Wuzarāʾ*, ed. ḲARYA, a village or small town (*balad*). It is not now used of a large town or city (*madīna*) unless it is qualified by an epithet denoting greatness; but in the Ḳurʾān, where the word is of frequent occurrence, it is applied without a qualifying epithet to cities of whatever size, including Mekka and Jerusalem. It is now used chiefly of such villages and small towns as are in India styled *mawḍiʿ*, that is to say fiscal units which are not the chief town of any district or local area.

Bibliography: The lexica s. v. (T. W. HAIG)

AL-**ḲAṢĀB**, a town in South Arabia in the Wādī Baiḥān. The town comprises 12 strong castle-like buildings and 400 houses — the Jewish quarter 50 houses — and is surrounded by palm-groves. It has four main streets with shops in which a busy trade is carried on. The goods come mainly from ʿAden and are brought via Bīl-Ḥāt. Cotton, which is much grown here, is used for the manufacture of excellent cloths which are much sought after in South Arabia. Indigo is also much cultivated and a number of dyeworks produce the well-known blue-coloured material which is in great demand throughout the south. There are also seven sesame-mills in the town. In addition to cotton and indigo, the fertile soil yields wheat, barley, millet, the red variety (*pennisetum spicatum Körn.*), and summer-millet, dates, grapes and vegetables. The Jews of al-Ḳaṣāb, the capital of Baiḥān, are, as almost everywhere in South Arabia, mainly silversmiths and leather workers.

Bibliography: C. Landberg, *Arabica*, v., Leiden 1898, p. 30—34. (A. GROHMANN)

ḲAṢABA means primarily the interior part of a country or town and hence a fortified castle, such as is occupied by a commander and his forces, and the town in which such a castle stands, the chief town of a district. It is also applied to a new well. In India, where it is locally pronounced *ḳaṣba*, it is applied to the chief town of a *pargana* or *maḥall*, which is the smallest subdivision of a fiscal district, and is distinct from the *mawḍiʿ*, the village or small town which is a complete fiscal unit, and from the *mazraʿ* or hamlet, which is included in the area and in the fiscal accounts of the *mawḍiʿ* of which it is an off-shoot.

Bibliography. Besides the lexica: *The Imperial Gazetteer of India*, Oxford. (T. W. HAIG)

In the Muslim East, the name is especially applied to the citadel in fortified towns in opposition to the rest of the town. It is the centre of defence and also the governor's residence. Sometimes it is a town beside the town. It is not uncommon to find the two parts of the city taking opposite sides and having violent quarrels. The history of Fez, Taza or Rabaṭ give numerous examples of this. The *ḳaṣba* developed in the Maghrib especially after the Almohad period (twelfth century); the great ornamental gateways (usually single and simply swung, differing from the outer, more complicated of towns), which were built at this time between a town and its *ḳaṣba* (a dialectical form of the word) are among the most beautiful monuments that survive from this brilliant period (e.g. the gate of the Ḳaṣba of the Udaiya at Rabaṭ, Bāb Agnāw at Marrākush).

Under the Sharīfī dynasties of Morocco (from the xvith century) and especially under the ʿAlawīds (xviith century to the present day) the word was commonly used to designate little forts of very simple plan, built here and there in the country where the sovereign maintained small garrisons to watch the country; the name is also given near the towns to the different cantonments supplied by particular tribes liable for military service (Ḳaṣba of the Filāla, Ḳ. of the Sharārda at Fez &c.).

Europeans extend the word more or less legi-

finately in the country to the dwellings of important ḳā'ids or to large fortified towns in the Atlas — and in certain towns (Algiers, for example) in the native quarter. (H. BASSET)

ḲASAM (A.) (verb *aḳsama*), is with *yamīn* the general term for oath. As *ḳasama* means "to divide", we seem to have here the usual transition between the meanings "to cut" and "to decide" so that *ḳasam* would be the deciding, strong word (cf. קָסַם), while *ḥilf* (verb *ḥalafa*), which also means swearing, would be used in special circumstances (see the art. *ḳīla*).

The oath plays a great part in the social life of the Arabs and is mentioned by Zuhair (*Dīwān*, i. 40) as the principal means of ascertaining the truth, along with interrogation by a person in authority and absolute clearness. The oath is the word into which the person taking it puts his whole strength. As the tribe forms a moral unit with joint responsibility, the oath in important matters becomes a tribal oath. This, called *ḳasāma*, consists in 50 men of the tribe swearing to their being right; this may be the oath of an accuser (*Ḥamāsa*, ed. Freytag, p. 25; Ibn Hishām, ed. Wüstenfeld, p. 777 *sq.* etc.) or an oath of purgation (Zaid b. 'Alī, ed. Griffini, p. 230, 9 *sqq.*; al-Bukhārī, *Manāḳib al-Anṣār*, bāb 27). Those participating swear not as witnesses — on the contrary, they need not have been present at the deed — but as responsible persons. That the swearer stakes his whole soul on his word is often expressly stated in the wording of the oath. He swears upon his soul or upon his life (*binafsī*, *biḥayātī*, *la-'amrī* or simply *'amrī*), upon his honour and strength or upon particular things with which honour is associated, for example the forelock or the lance (*Ḥamāsa*, p. 441, verse 5); this oath is exactly the same as that by the tribe or by kinship (Sūra iv. 1; Ṭarafa, *Dīwān*, N°. 4, verse 72, in Ahlwardt, *The Divans of the six ancient Arabic Poets*, etc.) or the very common oath by the fathers (*wa-abī*, *wa-djaddika* etc.) and by the god who supports the life of the swearer, in the Ḥidjāz especially by Manāt, al-'Uzzā and al-Lāt (Wellhausen, *Reste arab. Heid.*², p. 26, 34; Ibn al-Kalbī, *Kitāb al-Aṣnām*, ed. Aḥmad Zakī Bāshā, Cairo 1332 [1914], p. 14, 16 *sq.*, 19); among Muslims one also swears by the faith. The man taking the oath puts all that he values on his word. It is assumed that falsehood and injustice are negative forces so that a false oath imperils the soul and all that is precious to it. The oath is a pledge to God (*'ahdu 'llāhi*, *mīthāḳu 'llāhi*, *dhimmatu 'llāhi*) and if the person taking it lies or does not keep his promise (*wafā'*) he imperils his own soul and offends the divine being. The oath therefore has often the form of a hypothetical surrender of (*barā'a*) the things the swearer values most, e. g. *anā barī'un min ḥawli 'llāhi wa-ḳuwwatihi in fa'altu hādhā* (cf. al-Ṭabarī, iii. 618, 10; 622, 2, 9 *sq.*; al-Mas'ūdī, ed. Paris, vi. 296; al-Ya'ḳūbī, ed. Houtsma, i. 505 *sq.*, 509 *sq.*). Formulae of this kind are common in the official oath taken by different ranks in the Mamlūk kingdom (al-'Umarī, *al-Ta'rīf bi 'l-Muṣṭalaḥ al-Sharīf*, Cairo 1312, p. 146—164; al-Ḳalḳashandī, *Ṣubḥ al-A'shā*, xiii., Cairo 1337 [1918], p. 205 *sqq.*). The *barā'a* oath is connected with another kind of oath, invoking a curse upon oneself in certain contingencies. This is a formula like the following: "May Allāh slay me if I do not kill thee"; "I will eat blood if I do not do such and such a thing". Of frequent occurrence is this formula: "May my hand waste away if I do this (or do not do it)" e. g. al-Nābigha, v. 39; Ibn Hishām, p. 830, 18). Ibn al-Fāriḍ, for example, swears with the exclamation *hādhī yadī* "this hand of mine!" (line 264 of his *al-Tā'iyat al-kubrā*, ed. Kairo 1319). The Prophet said on one occasion: "May I be wretched and despised if I am not just" (al-Bukhārī, ii. 306, 2; cf. al-Ḳasṭallānī, vi. 57). This form of oath is used in the *li'ān* ceremony when married people take oaths in giving evidence against one another in cases of alleged adultery (Sūra xxiv. 6—9; cf. Juynboll, *Handbuch des islāmischen Gesetzes*, p. 192). A curse can also have a positive value and be used to strengthen an assertion, as in *ḳātalahu 'llāhu mā ashdja'ahu*, i. e. "May Allāh slay him. How brave he is". The curse is here used *li-'l-ta'adjdjub*, as in Sūra lxxiv. 19, 20 (see al-Baiḍāwī on the passage). The expression already mentioned "May my hand waste away" is often used in this way.

The taking of a vow is connected with the invocation of a curse upon oneself under certain conditions. It is especially common as an oath of vengeance among the Arabs; thus Imru'u 'l-Kais says he will neither eat meat nor drink wine nor anoint himself with oil nor touch a woman nor wash the *djanāba* off his head until he has taken vengeance (*Aghānī*, viii. 68, 15 *sq.*; cf. 68, 2; ix. 149, 2; xiii. 69, 8; Ibn Hishām, p. 980, 3 *sq.*; 543, 5 *sq.* etc.). To take this vow (*nadhr*) is called *nadhara*. The man concerned dedicates himself thereby and takes an increased obligation (*'ahd*) upon himself. Such oaths are as a rule taken before a battle (*Ḥamāsa*, p. 301; 'Antara, xxi. 84 etc.). Vice versa, one may give force to one's word by taking a special obligation upon oneself in case of breaking it. This pledge, of course, must be inviolable in character and usually takes one of three forms: giving of camels to be sacrificed, releasing of slaves (male or female) or divorce from a wife. These pledges may be made more or less severe; thus one can promise to divorce or release present and future wives and slaves (e.g. al-Ya'ḳūbī, p. 505 *sq.*, 509 *sq.*, and in the oaths taken by officials of the Mamlūks), a kind of oath which was banned by al-Shāfi'ī but nevertheless often occurs (cf. "he swore by his wife", Zaid b. 'Alī, ed. Griffini, p. 205, 10 *sq.*). In taking the oath one must endeavour to remember its character as a serious, sacred expression. It is best to swear at sacred places, in ancient times at the holy stone or idol (*Aghānī*, ix. 9 *sq.*). In pre-Islāmic days and later the Ka'ba was a particularly favourite place for taking an oath (Ibn Hishām, p. 317, 18; Ibn al-Kalbī, p. 19; al-Ṭabarī, iii. 861, 4 *sqq.*), especially by *al-Ḥaṭīm* (al-Ṭabarī, i. 3464, 10); this oath is still considered a very strong one (Snouck Hurgronje, *Mekka*, ii. 306; al-Batanūnī, *al-Riḥlat al-Ḥidjāziyya*, Cairo 1329, p. 127). One swears by the tombs of saints at the same time laying a hand on the tomb (see e.g. Jaussen, *Coutumes des Arabes au pays de Moab*, p. 311; Musil, *Arabia Petraea*, iii. 338, 342), just as a hand is laid on the northern window of the tomb of the Prophet in Medina, in taking an oath (*Shibbāk al-Tawba*, see e.g. al-Batanūnī, *op. cit.*, p. 246). Oaths are taken in the mosque, for example, especially on the *minbar* (e.g. al-Ṭabarī, ii. 92, 18 *sq.*). Special seasons make the oath more serious,

notably the period after the *ṣalāt al-ʿaṣr* (see Goldziher in the *Archiv für Religionswiss.*, ix. 297 *sqq.*). There is evidence of oaths in connection with sacrifice from the pre-Islāmic period (Zuhair, i. 50; *Ḥamāsa*, p. 423, 10). Swearing by the sacrificial animals is common, still more frequent by the lord of the sacrificial animals (e.g. *Ḥamāsa*, 715, verse 6). Among the traditional forms of oath is the *hāla*. According to al-Djawharī, *Ṣiḥāḥ*, s. v., it consists in taking the oath by the fire of the tribe into which salt is thrown. This ceremony, referred to by al-Kumait (*al-Hāshimiyyāt*, ed. Horovitz, N°. 4, verse 36), still survives (Landberg, *Arabica*, v. 133 *sq.*).

The magic circle is often used at the present day; this, which is sometimes divided by lines at right angles, often has something put in it, such as dung, ashes or a piece of cloth. One solemn oath consists in sticking a sword in the ground in the centre of the circle and placing ants beside it; this is the *shemle wa-nemle* oath. Sometimes one takes a piece of wood in the hand and swears "by the life of this wood"; this is the *ʿĀn al-ʿūd*. Other popular customs could be mentioned, such as laying a hand on the tent-pole, taking bread and coffee in the hand, turning towards the *ḳibla* etc. (see the works of Musil, Jaussen, Landberg, Burckhardt and Doughty). Increasing the gravity of the oath by various procedures is acknowledged in official Islām and called *taghlīẓ al-yamīn* or *taʿẓīm al-yamīn*; for example, the Ḳurʾān or al-Bukhārī's *Ṣaḥīḥ* is placed in the bosom while the oath is being taken (cf. Goldziher, *Die Ẓâhiriten*, p. 115; Lane, *Manners and Customs* 5, i. 168, 470). Great oaths are called *Aimān balīgha* (Sūra lxviii. 39; cf. *Djahd aimānihim*, Sūra v. 58; vi. 109; xvi. 40).

The oath formulae give the substance of the oath. Apart from special kinds of oaths such as the curse and the vow, the usual formula is for that by which one swears to be introduced by a particle. The most common particles in this connection are *bi*, *ta* and *wa*, which are all used in solemn oaths (*wallāhi*, *wa-bi'llāhi wa-tallāhi*); the two last mentioned are not so freely used as *bi*. The particle *bi* is the common preposition "in combination with"; *ta* is probably the termination as in *amānata* or *ḥayāta*; *wa* is an intensive particle like *la*, which is used particularly in the formula *laʿamrī*, *laʿamruka* "by my (thy) life", etc.

Other demonstrative particles occur in oaths such as *a*, *hā*, or sometimes the simple accusative is used; abbreviations of *aimunu* like *aimu*, *imu*, *um*, *mu* etc. are also sometimes used as particles in oaths. There are several linguistic peculiarities associated with oath formulae; for example, a negative can be omitted after the oath; vice versa, we find occasionally in the Ḳurʾān a negative *lā* before the oath, which is apparently intended to give it particular emphasis. A further intensification of the oath is expressed by prefixing *la* to the following verb (on the grammatical point cf. *al-Mufaṣṣal*, ed. Broch, p. 163 *sqq.*; Ibn Yaʿīsh, ed. Jahn, p. 289 *sqq.*).

Just as an oath is taken at a holy place or at a sacrifice, so we find oaths taken by the place or by the sacrifice (or by its lord). The Kaʿba and all that belongs to it as well as the pilgrimage are used in oaths in continually changing phrases. The old Arabs swore specially by their gods and fathers. The *kāhin*'s often swore by natural phenomena (Ibn Hishām, 11, 4). It is in keeping with the character of the oath that in Islām swearing by Allāh is alone permitted, but that, on the other hand, swearing by fathers, saints and especially by the Prophet (by the tomb of the Prophet, *Aghānī*, vi. 91, 13) is found in everyday life. Swearing by one's father was particularly forbidden by the Prophet (al-Bukhārī, iv. 263) but it is sometimes used by ʿUmar and Abū Bakr (al-Bukhārī, ii. 444, 3) and even by the Prophet himself (Muslim, commentary of al-Nawawī, iv. 99). It is a good Muslim oath to swear "by the Lord of my father" (al-Bukhārī, ii. 203, 13) or "by the Lord of the Kaʿba, of the sacrificial animals" etc.). The Prophet also swears by his honour (Zaid b. ʿAlī, ed. Griffini, p. 104, 4). The formula may call God to witness, as, for example, "God knows that I am not lying", "God is witness that I am saying this", etc. God is often referred to by some descriptive phrase; for example, "by Him Who sent Muḥammad with truth", while a Jew says "Mūsā" for "Muḥammad". The oath can also be adapted to particular situations; many have their favourite oaths; the Prophet, for example: "by Him in Whose hand my soul is", etc. The oath is intensified by repeating the formula three or more times.

One is freed from an oath to fulfil a vow, when one has performed it (*abarra* or *ḥallala yamīnan*). "Discharge from the oath" (*taḥillat al-ḳasam*) may mean a small quantity or a short period of time, literally: sufficient for release from the vow (cf. al-Bukhārī, i. 316, 11; iv. 265, 17, with Sūra xix. 72; Umaiya b. Abi 'l-Ṣalt, ed. Schulthess, xxiii. 14). The man, to whom someone has vowed to do something, may, however, release the latter from his oath. The latter is allowed to disregard his oath if higher considerations demand it. There is evidence from the Muslim as well as the pre-Muslim period that such a solemn promise was accompanied by the taking off or rending of certain articles of clothing (al-Wāḳidī, transl. by Wellhausen, p. 197; al-Ṭabarī, iii. 862, 14 *sq.*). Release from a vow is obtained among the modern Beduins by a sacrifice. One may bind others with an oath if one conjures them. The formula is often of this kind: "I call (*nashadtu*) God to thee" or "I mention (*dhakkartu*) God to thee". But it is an oath of the speaker and it depends upon the relation between the latter and the person adjured whether the latter will fulfil the vow; in such forms of oath appeal is often made to mutual friendship or relationship (e.g. *Lisān*, vi. 428, 7 *sqq.*; *Ḥamāsa*, p. 254 middle). One can also appeal to God. "A servant of God is one whose oath God redeems when he appeals to him" (al-Bukhārī, ii. 168, 19; 204, 4). God is more pressingly conjured, if the appeal is made through one of His favourites, like the Prophet (*tawassul bi'l-Nabī*). Maʿrūf al-Karkhī is said to have advised a disciple to call upon God through him (al-Ḳushairī, *Risāla*, Cairo 1330, p. 9, 21).

Between the popular use of the oath among the ancient Arabs and in Islām there is no essential difference, as is clear from what we have already said. But there are special rules regarding the oath in Islām. In the Ḳurʾān, especially in the older Sūra's, the oaths taken by the kāhins by natural phenomena are usual (Sūra lvi. 74; lxxxi. 15—18; lxxxvi. 1; lxxxix. 1—3; xci. 1—7 etc.); we also have instances of swearing by the Ḳurʾān (xxxvi. 1; xxxviii. 21; xliv. 1; l. 1), by the angels (xxxvii. 1), by the Last Day (lxxvii. 1) etc. Iblis swears by

God's majesty (xxxviii. 23) and we have evidence (Zaid b. ʿAlī, ed. Griffini, p. 286, 7 *sq.*) that God swears by His majesty and grandeur (cf. for the oaths in the Ḳurʾān Ibn al-Ḳaiyim, *Kitāb Aḳsām al-Ḳurʾān*, Mekka 1321). Two passages in the Ḳurʾān are of special importance for the use of the oath. In Sūra v. 91 and ii. 224 *sq.* it is said that inconsidered expressions (*laghw*) in oaths can be (broken and) expiated. The context in both passages makes it probable that the references are to vows of abstention, sometimes from food, sometimes from women. Vows of the last mentioned kind, called *īlāʾ*, are limited to four months (ii. 226), in connection with ii. 224 *sq.*, after which time they must be expiated or the man must divorce the wife. A particular vow of this kind (*ẓihār*) in which the husband says "Thou art henceforth as the back of my mother to me (*ka-ẓahri ummī*)" is especially condemned in Sūra xxxiii. 4; lviii. 2, 4 *sq.* (see Juynboll, *Handbuch des islāmischen Gesetzes*, Leiden and Leipzig 1910, p. 224 *sqq.*; Sachau, *Muh. Recht*, 1897, p. 13, 68 *sqq.*).

The practice of atonement for such oaths after repenting of having taken them seems to be taken from the Jews (cf. *Mishna*, *Nedarim*, and *Lev.*, v. 4 *sq.*). In Sūra lxvi. 2 we read "God hath prescribed you the dissolution of your oaths" and this prescription is applied to a case in which the Prophet had sworn to his wife Ḥafṣa not to touch the slave-girl Māriya, which he later regretted (cf. al-Ṭabarī, *Tafsīr*, xxviii. 90 *sqq.*).

Among ḥadīths first place must be given to a saying of the Prophet: "I never take a vow without being prepared to expiate it if I see that another is better and adopting the better". In this and similar sayings, which are collected by al-Bukhārī, Muslim and other traditionists (see *Kitāb al-Aimān wa 'l-Nudhūr*), the expiation of vows is recommended in cases other than vows of abstention. On the other hand it is insisted that one should keep one's oath (Sūra xvi. 93, 96; cf. iii. 71; lviii. 15, 17, 19 etc.) and carrying out what one has sworn to do (*ibrār al-muḳsim*) is mentioned by al-Bukhārī, ii. 99, 5 among the seven principal requirements. It is only in Paradise that there are no such pledges, for there vows are fulfilled and oaths disposed of (Umaiya b. Abi 'l-Ṣalt, ed. Schulthess, xli. 23). But an oath must always give place to a higher consideration. It is therefore recommended not to take an oath without adding the *istithnāʾ* (the formula "if God so will") (al-Bukhārī, iv. 280; Muslim, comment. of al-Nawawī, iv. 106; Zaid b. ʿAlī, ed. Griffini, p. 463).

These statements in the Ḳurʾān and in the *Sunna* form the foundation of the Fiḳh system on the subject. According to this, the person taking the oath must be *mukallaf*, he must be acting deliberately as a free agent and intend the oath. He must not take an oath to commit a sin; views are divided on the question whether such an oath is valid at all. One can only swear by God, either by His existence or by one of His names or attributes. The oath by the Prophet is recognised by some Ḥanbalīs but in general is not considered a binding oath. The *ḳasāma* oath already mentioned is not recognised by the Fiḳh. The breaking of a vow (*ḥinth*) is considered a duty in certain cases, when one has sworn to commit a sin. The *īlāʾ* already referred to must be broken within four months if the man does not divorce his wife; after the *ẓihār* the wife must at once be divorced or the vow must be expiated.

Expiation (*kaffāra*) consists, according to Sūra v. 91, in setting free a slave, feeding ten poor men or clothing the same number; for those who cannot afford this, three days' fasting is equivalent. The things to be done are described in detail in the Fiḳh books. In the *īlāʾ* the expiation is the same as in other oaths while in the *ẓihār* it consists in releasing a slave who is a believer or fasting for two months or feeding 60 poor people (Sūra lviii. 4—5). The Muslim law recognises the oath of affirmation as well as the vow to perform. The former only occurs in lawsuits. A special case is formed by the *ḳasāma* already mentioned which was taken over from the ancient Arabs. It is limited in Islām to trial for murder and consists of 50 oaths which can be sworn by one or more individuals. The oath is imposed on the accuser but only in connection with certain indications (*lawth*) which must be regularly ascertained. If the accuser refuses to take the oath, the 50 oaths are applied to the accused; if he refuses they apply again to the accuser. In other cases the principle in Islām is that the onus of proof is on the accuser and the accused has to take the oath. Witnesses as a rule do not take an oath; witnesses to the will of a testator who has died in a foreign country are an exception (Sūra v. 105). If the plaintiff has only one of the two necessary witnesses, the oath of one of the parties may take the place of the second witness (al-Bukhārī, ii. 158 *sq.*). When the plaintiff has not valid proofs, the oath is put to the defendant; if he declines to take it, it is put to the plaintiff (*yamīn al-radd*). Perjury on account of some crime is called *yamīn al-ghamūs* by Muslim scholars, an expression which originally meant a peculiarly binding oath. Such oaths can be expiated in the above fashion, according to the Shāfiʿī school, if they are false, according to other views they cannot. The latter hold that expiation only applies to vows.

The formalism of the legal system opens the way for all kinds of artifices by which an oath can be broken, yet formally kept. There thus arose a whole literature regarding such subterfuges; the best known work is al-Khaṣṣāf's *Kitāb al-Ḥiyal wa 'l-makhārij* (ed. by Joseph Schacht [autogr.], Hannover 1923; printed Cairo 1314).

AL-ḲAṢAṢ "the story", title of Sūra xxviii. of the Ḳurʾān, taken from vs. 25. See further ḲIṢṢA.

KASB. The root occurs a large number of times in the Ḳurʾān with the meanings, "seek", "attain", "earn", "work" (good and evil); see C. C. Torrey, *The Commercial Theological Terms in the Koran* (Leiden 1892), p. 27 *sqq.* and Nöldeke's note there. Stems i. and viii. are used synonymously although al-Baiḍāwī on Ḳurʾān ii. 286 (Fleischer's ed., i. 143, 11), following al-

Zamakhsharī on the same passage, tries to show that there is more personal, reflexive force (*Fiʿmāl*) in viii. Hence *kasb* and *iktisāb* mean much the same. There are two technical usages. I. It is equivalent to the *iktisāb* of the Ashʿarites. "The action of a creature is created, originated, produced by Allāh but it is 'acquired' (*maksūb*) by the creature, by which is meant its being brought into connection with his power and will without there resulting any effect from him in it or any introduction to its existence, only that he is a locus (*maḥall*) for it" (al-Djurdjānī on *al-Mawāḳif* of al-Īdjī, Bulāḳ 1266, p. 515). Al-Ghazālī, perhaps desiring to emphasize the personal acceptance, apparently preferred *iktisāb*; see his statement in the *Iḥyāʾ* (ed. with comm. of al-Murtaḍā al-Zabīdī, ii. 165 *sqq.*) and the elaborate commentaries thereon. Al-Rāzī on Ḳurʾān ii. 286 (ed. Cairo 1308, ii. 388) states the different views as to the two terms. Al-Sanūsī in his *Muḳaddima* (ed. Luciani, p. 68 *sqq.*, also note p. 237) uses *iktisāb* only twice and evidently in the same sense as *kasb*; his statement is an extension of that of al-Djurdjānī. This is the most subtle question in all Muslim *Kalām* (*adaḳḳ min kasb al-Ashʿarī*) but it may be guessed that al-Ashʿarī wished only to explain our consciousness of freedom to choose and that his explanation was that this consciousness is a separate creation by Allāh in the mind; man for him was an automaton with consciousness as part of the machinery. The later mutakallims, especially under the influence of the more ethical Māturīdite system, turned it otherwise; cf. e. g. al-Taftāzānī in his commentary on the *ʿAḳāʾid* of al-Nasafī (a Māturīdite), Cairo 1321, p. 98 *sqq.* II. *Kasbī* and *iktisābī* are applied to that knowledge (*ʿilm*) which belongs to created things and is attained by the voluntary (*ikhtiyārī*) application of secondary causes (*asbāb*), (*a*) like reason and consideration of premises in deduction and (*b*) like listening and turning the eye in sense perception. They are thus wider than *istidlālī* which applies only to reasoning. *Ḍarūrī*, "necessary", is sometimes opposed to *iktisābī* and sometimes to *istidlālī*. Others arrange thus: knowledge in a created being is of two kinds, (*a*) *ḍarūrī* and (*b*) *iktisābī*; in the acquisition of (*b*) the *asbāb* are of three kinds, the healthy senses, reliable narrative, rational consideration (*naẓar*); *naẓar* is of two kinds, immediate intuition (*badīha*) and *istidlāl*, deduction (al-Taftāzānī on the *ʿAḳāʾid* of al-Nasafī, p. 39 *sq.*; also al-Djurdjānī on *al-Mawāḳif*, p. 16, 21).

KASF. [See KHUSŪF.]

KASH, the modern Shahr-i Sabz ("green town", on account of the fertility of its surroundings) a town in Bukhārā on what was once the great trade route between Samarḳand and Balkh. According to Chinese authorities, Kash (Chinese transcription K'iu-sha or Kie-shuang-na, also K'ie-sha, as a town Ki'-she) was founded at the beginning of the seventh century A. D.; cf. J. Marquart, *Chronologie der alttürkischen Inschriften*, Leipzig 1898, p. 57; *Ērānšahr etc.*, Berlin 1901, p. 304; E. Chavannes, *Documents sur les Tou-kiue (Turcs) occidentaux*, St. Petersburg 1903, p. 146. Yāḳūt's statement (*Muʿdjam*, ed. Wüstenfeld, iv. 274) on the authority of Ibn Mākūlā, who died in 475 (1080/1), that in Mā warāʾ al-Nahr the name was everywhere pronounced Kiss is very doubtful; for the later period the pronunciation *Kash* is proved by the frequently recurring expression *Kash-i Dilkash*. The accounts of the Arab conquest are discussed by Marquart in particular (*Ērānšahr*, see Index). The *Kash* of the Sāmānid period is described very fully by the Arab geographers (*Bibl. Geogr. Arab.*, ed. de Goeje, i., al-Iṣṭakhrī, p. 324; ii., Ibn Ḥawḳal, p. 375 *sq.*, iii., al-Muḳaddasī, p. 282). The town in those days was a third of a *farsakh* (about a mile) in length and breadth; the old city (*madīna*, Persian *shahristān*) as well as the citadel (*ḳuhandiz*) were already deserted, only the outer town (*rabaḍ*) was inhabited; in the vicinity of the earlier Kash a new town was arising. This suggests that the modern town has a site different from that of the Kash which existed before the Muslim conquest. Nothing is known of other transferences of the site. Kash is never mentioned in the history of the Mongol conquest, so that it must have submitted to the Mongols (617 = 1220) without resistance. The name Shahr-i Sabz first appears — on coins also — about the middle of the eighth (fourteenth) century. Many buildings were erected in Kash by Tīmūr, who belonged to the district of Kash, and his contemporaries; thereon cf. W. Barthold in *Zapiski vost. otd. arkh. obshč.*, xxiii. 1 *sq.* Especially famous is the palace Aḳ Saray built at the end of 782 (beginning of 1380) by builders from Khwārizm; cf. Sharaf al-Dīn Yazdī, *Ẓafar Nāma*, Calcutta 1887—8, i. 301 *sq.*, and the notices by Niẓām al-Dīn Shāmī and ʿAbd al-Razzāḳ Samarḳandī in W. Barthold, *Ulugbek i ego vremya*, Petrograd 1918, p. 25; very little survives of this palace; on the inscriptions cf. N. Simyakowskiy in *Protokoli Turk. Kruzhka Lyub. Arkh.*, v. 114 *sq.* As late as the tenth (sixteenth) century Kash or Shahr-i Sabz is described by Ḥāfiẓ-i Tanish (*ʿAbd Allāh Nāme*, MS. of the Asiat. Museum, 574 age, f. 85ᵇ) as an important town usually governed by a prince of the ruling house, while the administration of Nasaf or Karshī [q. v.] could be left to a military official (*Darugha*). At the present day the situation is reversed and Shahr-i Sabz is an unimportant town in comparison with Karshī, the result of the political changes in the twelfth (eighteenth) century. The district of Shahr-i Sabz is surrounded by hills on north, south and east, so that it can hardly be expected that this region will be soon linked up with the railway system, while Karshī is already connected by railway with Bukhārā and Termedh: the town of Shahr-i Sabz has therefore little prospect of renewing its prosperity.

(W. Barthold.)

KĀSHĀN (in Arab authors often Ḳāshān), a town in ʿIrāḳ ʿAdjamī (al-Djibāl, Media) three days' journey from Iṣfahān and twelve *farsakh*'s from Ḳumm. It is an ancient town which is said to have been rebuilt by Zubaida, wife of Hārūn al-Rashīd. The heat there is excessive in summer, but the winter is very mild. Water, which is scarce, is brought by an aqueduct from the spring at the castle of Fīn outside the town, to which

the inhabitants go on pilgrimage once a year. The melons and figs of this locality are esteemed. Large numbers of big, black and very dangerous scorpions are found there. The natives are all Shīʿis and were already noted for their devotion to the twelve Imāms at a time when this part of the world was still Sunnī. In expectation of the return of the hidden Imām, they used to go out every morning with great ceremony to be ready to meet him; after a long wait they returned home disappointed but not discouraged. Almost the same thing was done at Ḥilla (Cl. Huart, *Histoire des Arabes*, ii. 324—5).

The town was destroyed by an earthquake in the reign of the Wakīl Karīm Khān Zand, who had it rebuilt. Situated in the centre of a fertile plain, it was surrounded by walls flanked with towers, with a deep ditch running all round; it had six gates. Although not very important (15.000 inhabitants of whom 300 were Jews at the beginning of the nineteenth century), it is one of the prettiest towns in Persia; its streets are clean and paved. According to A. Williams Jackson, *Persia Past and Present*, New-York 1906, p. 410, it has now about 20.000 inhabitants. Its manufactures are cauldrons, silks embroidered with gold and silver flowers, plain stuffs with strips of colour and a kind of velours. Gold, silver and steel are worked there. It has become especially famous for the plaques of faience called *Kāshī* [q. v.], of which there was no longer any trace as early as 1808.

KĀSHĀNĪ. [See ʿAbd al-Razzāḳ].

KĀSHĀNĪ, Ḥādjdjī Mīrzā Djānī, the Bābī historian, was a merchant of Kāshān who, with two of his three brothers, Ḥādjdjī Mīrzā Ismāʿīl Dhabīḥ and Ḥādjdjī Mīrzā Aḥmad, was among the earliest disciples of Mīrzā ʿAlī Muḥammad, the Bāb. When the Bāb, in 1847, was being conducted from Iṣfahān to his prison at Mākū the brothers bribed his escort to allow him to be their guest for two days and two nights at Kāshān. In the following year Kāshānī, with Bahāʾ Allāh, Ṣubḥ-i Azal and other prominent disciples, attempted to join the Bābī insurgents of Shaikh Ṭabarsī near Bārfurūsh in Māzandarān but was captured by the royal troops and imprisoned for some time at Āmul, until ransomed by two merchants of Kāshān. "We find him always impelled, as it would appear, by religious zeal, now at Bārfurūsh, now at Mashhad, now at Ṭihrān." The Bāb was put to death on July 9, 1850, and Kāshānī occupied the next two years in writing his history of the movement, for which task he was qualified by personal acquaintance not only with the Bāb, but with Ṣubḥ-i Azal, Bahāʾ Allāh and almost all the early apostles of the Bābī religion and by detailed and accurate information of every event connected with the movement during the first eight years of its existence. His history (which, for some mystical reason not readily comprehensible he styled *Nuḳṭat al-Kāf* "the Point of Kāf"), is accurate, but is disfigured by fulsome and almost idolatrous adulation of his hero and by coarse abuse of his persecutors. When Nāṣir al-Dīn Shāh resolved to strike a blow at the adherents of the new religion, Kāshānī was forcibly removed from the shrine of Shāh ʿAbd al-ʿAẓīm, about six miles south of Ṭihrān, where he had taken sanctuary, and thrown into prison, where he shared the cell of Bahāʾ Allāh. On Sept. 15, 1852, he was put to death at Ṭihrān in company with twenty-seven of his co-religionists. As an act of policy, in order to divert vengeance from himself and his minister, the Shāh handed the heretics over to various communities for execution and Kāshānī was delivered to Āḳā Mahdī, Malik al-Tudjdjār ("chief of the merchants"). According to one account he suffered death by the bowstring, and according to another the merchants and shopkeepers of the city inflicted wounds on him until he perished.

Of his brothers Ismāʿīl died at Ṭihrān and Aḥmad, who, after the death of the Bāb, recognised Ṣubḥ-i Azal as his successor, was slain at Baghdād by some Bahāʾīs, followers of Bahāʾ Allāh.

KASHF, "uncover", has two technical uses. I. In prosody it is the elision of the seventh vowelled letter in the foot *mafʿūlātu*, changing it to *mafʿūlā* and further to *mafʿūlun* — a combination of *waḳf* and *kaff*. This is often called *kasf*, "cut", which is more probable; but that root has unlucky associations (Freytag, *Darstellung der arabischen Verskunst*, p. 87; De Sacy, *Grammaire arabe*², ii. — *Traité de la Prosodie*, Tab. III.; Garcin de Tassy, *Rhétorique et Prosodie*, p. 241; al-Djurdjānī, *al-Taʿrīfāt*, under *kasf*). — II. In the emotional religious life (*taṣawwuf*) it is the broadest term for the unveiling of the mystic. When this is analyzed more carefully it is commonly divided into three: (i.) *muḥāḍara* in which reason (*ʿaḳl*) is the means by proof (*burhān*); (ii.) *mukāshafa* in which taught knowledge (*ʿilm*) is the means by explanation (*bayān*); (iii.) *mushāhada* by means of immediate, personal experience (*maʿrifa*). By (i.) *ʿilm al-yaḳīn* is reached by the *arbāb al-ʿuḳūl*; this is still in the realm of reason and is not really *kashf*. By (ii.) *ʿain al-yaḳīn* is reached by the *aṣḥāb al-ʿulūm* and by (iii.) *ḥaḳḳ al-yaḳīn* is reached by the *aṣḥāb al-maʿārif*; the last is the immediate Vision of God and is sometimes called *muʿāyana* (al-Ḳushairī, *al-Risāla*, ed. with commentaries of Zakarīyā al-Anṣārī and al-ʿArūsī, Būlāḳ 1290, ii. p. 79 *sqq.*; on this cf. R. Hartmann, *al-Kuschairi's Darstellung des Ṣūfītums* (*Türk. Bibl.*,

xviii.), p. 72 *sqq.*; Hudjwīrī, *Kashf al-Maḥdjūb*, transl. Nicholson, p. 373 *sqq.* and by index.

Bibliography: Is given above; add for both uses *Dict. of Techn. Terms*, ii. 1254.

(D. B. Macdonald)

KĀSHGHAR, a town in Chinese Turkestān, called Su-le in the oldest Chinese sources; the same name is still used in Chinese official documents. The name Kāshghar first appears in Chinese transcription (K'iu-cha) in the *T'ang-shu*; cf. E. Chavannes, *Documents sur les Tou-Kiue (Turcs) occidentaux*, St. Petersburg 1903, p. 121 *sq.* On the pre-Muḥammadan Kāshghar and the ruins of Buddhist buildings in the vicinity see A. Stein, *Ancient Khotan*, Oxford 1907, i. 52 *sq.*; do., *Serindia*, Oxford 1921, p. 86 *sq.* Arab armies did not reach Kāshghar; the story of Ḳutaiba's campaign in 96 (715) is, as H. A. R. Gibb (*Bulletin of the School of Oriental Studies*, ii. 467 *sq.*) has shown, a mere legend. On the flight of a prince of Farghāna to Kāshghar in the time of the Caliph al-Manṣūr (755-775) see the article FARGHĀNA. In the Sāmānid period a *Dihḳān* of Kāshghar with the name or title Toghān Tegin is mentioned (Ibn al-Athīr, ed. Tornberg, viii. 37), with whom the rebel prince Ilyās b. Isḥāḳ took refuge; whether this *Dihḳān* had already adopted Islām is not mentioned. At a later date Satuḳ Boghrā Khān is mentioned as the first Muslim Khān of Kāshghar; in the oldest reference to him that we have (Djamāl Ḳarshī in Barthold, *Turkestan v epokhu mongolskago nashestviya*, i., St. Petersburg 1898, p. 130 *sq.*) the date of his death is given as 344 (955). This story already contains features which are certainly legendary; in the story of the building of the first mosque we have the well-known folklore motif of the cutting of an ox-skin into strips. The later legend, reproduced by F. Grenard (*Journ. As.*, Ser. 9, vol. xv. 1 *sq.*), has not this feature but contains many other legendary traits and absolutely false dates. The year 344 A. H. is perhaps too early as probably the story of the adoption of Islām by a numerous Turkish people (200,000 tents) in 349 (960) must be referred to the Turks of Kāshghar; this story is found not only in Ibn al-Athīr (viii. 396) but also in Ibn Miskawaihi (*The Eclipse of the Abbasid Caliphate*, ed. Margoliouth and Amedroz, Oxford 1921, text ii. 181, translation v. 196); the original source is probably Thābit b. Sinān al-Ṣābi' (cf. Ibn al-Athīr, viii. 476 and 491; *The Eclipse* etc., *Index*). The tomb of Satuḳ Boghrā Khān is in Artūdj (now pronounced Artush) north of Kāshghar, where it is still shown.

Under the rule of the Ilek-Khāns [q. v.] Kāshghar was politically the most important town in what is now Chinese Turkestān; perhaps it was also the most important from the point of view of culture. In the fifth (eleventh) century there was already in existence a work in Arabic on the history of the town, composed by Abu 'l-Futūḥ 'Abd al-Ghāfir (or 'Abd al-Ghaffār) b. Ḥusain al-Alma'ī al-Kāshghari (sic!); the author's father, who survived his son (according to al-Sam'ānī by about ten years), died in 486 (1093). On father and son and the works of the latter see al-Sam'ānī, *Kitāb al-Ansāb*, ed. Margoliouth, Leiden-London 1912, f. 470a and 472a; Djamāl Ḳarshī in Barthold, *Turkestan* etc., i. 123 *sq.* The rulers were buried in a special mausoleum (Arabic *al-djunbadha al-khāḳāniya*) on the bank of the Tümen; the first prince buried there died in Muḥarram, 424 (Dec. 7, 1032—Jan. 5, 1033) and the last in Radjab, 601 (Feb. 22—March 23, 1205). During Mongol rule a madrasa was built in Kāshghar by Mas'ūd Beg (cf. the art. BUKHĀRĀ); in its library was the copy of the *Ṣiḥāḥ* of al-Djawharī used by Djamāl Ḳarshī for his translation (E. Sachau and Ethé, *Cat. of the Persian . . . Manuscripts of the Bodleian Library*, Oxford 1889, col. 983). Kāshghar was later under the rule of the Dughlāt Amīrs [see the article *Dughlāt*]; the last of them, Abū Bakr, reigned till 920 (1514), according to the statement of his relative Ḥaidar Mīrzā [q. v.] forty-eight years (*Ta'rīkh-i Rashīdī*, English translation, London 1895, p. 253 and 326); but this is contradicted by the author himself, who says that Kāshghar was not conquered by Abū Bakr till 885 (1480/1). Abū Bakr is the founder of the modern town. He destroyed the old fortress and in the last years of his reign rebuilt it on a new site, on the other side of the Tümen on the tongue of land between this river and the Ḳizil Su (*ibid.*, p. 286 *sq.* and 295).

Under the rule of the "Mongol" Khāns (cf. the *Bibliography* to the art. ČAGHATĀI-KHĀN) and later under that of the Kalmucks and Chinese the capital of the district was no longer Kāshghar but Yārkand; it is only quite recently, since the reconquest of the country by the Chinese in 1877, that Kāshghar has again attained considerable importance as the residence of the Tao-T'ai, who is over the western and southern part of Chinese Turkestān as far as the oasis of Čerčen, and the residence of the Russian and English consuls. On Kāshghar in 1873 see H. W. Bellew in Sir T. D. Forsyth, *Mission to Yarkand in 1873*, London 1875. On modern conditions see especially Kornilow, *Kashgariya*, Tashkent 1903 (review by W. Barthold in *Zapiski vost. otd. arkh. obshč.*, xv. 131 *sq.*) with plan of Kāshghar on p. 268, and M. Hartmann, *Chinesisch-Turkestan*, Halle a/S. 1908, especially p. 45 *sq.*, 89 *sq.*, with plan of the town from Kornilow. The most important building in Kāshghar and vicinity is Ḥaḍrat Apāḳ, the tomb of the famous saint of the eleventh (seventeenth century) Kāshghar is now also of greater importance than Yārkand for its intellectual life; Yārkand, "which, down to the conquest of Kaschgarîa by the Chinese, was the political capital and also the principal centre of learning and sanctity, has now fallen behind Kâschgar. Its day is over" (M. Hartmann, *op. cit.*, p. 49). The number of its inhabitants is said to be about 50,000.

(W. Barthold)

KĀSHĪ (in Yāḳūt: KĀSHĀNĪ, KĀSHĪ; in Ibn Baṭṭūṭa: KAŠHĀNĪ), the name derived from that of the town of Kāshān [q. v.] in Persia, given to square, sometimes hexagonal, plaques of faience used in the exterior decoration of buildings or of interior walls.

It is one of the most ancient arts of nearer Asia (already known to the Assyrians and then to the Achaemenids) which survived in Persia in the middle ages, and more especially, it appears, in the town of Kāshān. The monuments of modern Persia from the time of the Ṣafawids to our day (those that are older are in ruins) are covered with these plaques of faience decorated with conventional flowers (*kāshī-kārī*), in which the predominant colours are indigo blue, turquoise blue, green, less frequently red and yellow. Those

with figures in relief are the rarest and the most esteemed.

When this industry was brought to the town of Damascus by Persian artisans — perhaps Christians (some plaques bear inscriptions in Syriac) — the Syrians called these plaques *ḳīshānī* (from the Arabic orthography Ḳāshān). The art disappeared perhaps over a century ago; the ruins of the factory which made them are still shown outside the *Bāb Sharḳī*. These faïences were imitated in Turkey at Iznik and Kutāhiya. Recently an attempt has been made to revive this last factory, but the modern work is far from equalling the beauty of the ancient pieces; it is the same in Persia where the beautiful models of past ages are clumsily imitated at the present day.

(Cl. Huart)

al-**KĀSHĪ**, Djamshīd b. Masʿūd b. Maḥmūd, Ghiyāth al-Dīn, a Persian, was the first superintendent of Ulugh-Beg's observatory in Samarḳand and a collaborator with this prince in the preparation of his astronomical tables. Besides his astronomical and mathematical researches he also studied medicine; he must have died about the year 840 (= 1436/7). Of his works there have survived: (1) *Zīdj-i Khāḳānī* (the Khāḳānī tables), in Persian, in a manuscript in Constantinople (Aya Ṣofya), a supplement to the Ilkhānī tables (of Naṣīr al-Dīn al-Ṭūsī); (2) *Miftāḥ al-Ḥisāb* (key to arithmetic), in Berlin, Leiden, British Museum, India Office, etc.; the preface to it was translated by F. Woepcke (see *Bibliography*); (3) *al-Risāla al-Kamālīya*, also called *Sullam al-Samāʾ* (the ladder of heaven), on the magnitudes and distances of the heavenly bodies, in Oxford, Leiden, India Office; (4) *Risāla fī Istikhrādj Djaib daradja wāḥida*, etc. (an essay on the calculation of the sine of a degree), in Cairo; in this al-Kāshī solves an equation of the third degree by an interesting process of approximation (cf. below Hankel's work).

KĀSHIF, Muḥammad Sharīf b. Shams al-Dīn, with the *takhalluṣ* Kāshif-i Kumaiī, a Persian man of letters of the xith (xviith) century. What is known of his life comes mainly from the *Khātima* of his *Khazān u Bahār*. The author's father, Shams al-Dīn Muḥammad, also known as Shamsā-i Shīrāzī, was living at Karbalāʾ when his son Muḥammad was born and left it for Iṣfahān in 1006 (1597/98) to escape persecution from the Sunnīs. Muḥammad, the son, was then three years old so that he was born in 1003 (1594/95). In 1008 (1599—1600) Shams al-Dīn went to Mashhad and returned seven months later to Iṣfahān. These dates are given by the Brit. Mus. MS., according to Rieu's *Catalogue*; from Rosen's description of the St. Petersburg MS. it seems to make the author five years old in 1006 and to put the journey to Mashhad in 1010 (1601/2). After a stay of 23 years in Iṣfahān the family moved to Ray where the father died in 1035 (1625/26). Muḥammad Sharīf himself was Ḳāḍī of Ray for 15 years.

In the *Tadhkira-i Naṣrābādī* (synopsis in Sprenger, *Catal. of the ...... manuscripts of the Libraries of the King of Oudh*, i. 88 *sq.*) there is a notice of Kāshif and his two brothers, Ismāʿīl Munshī and Muḳīmā. The date of our author's death is unknown but must be after 1063 (1652/53). This date is given by the chronogram at the end of the *Khazān u Bahār* in the London MS. as the date of completion of the work; he mentions his other works in the *Khātima* as already written so that the *Khazān* is the last.

Works. Kāshif, who, as he himself tells us, had a literary training and devoted a considerable period to study, wrote both prose and poetry. He composed three epics, two of which (the *Lailā Madjnūn* and the *Haft Paikar*), like very many epic poems of the later period, deal with subjects very popular since Niẓāmī's time. The third was called *ʿAbbāsnāma*, probably a panegyric on the Ṣafawid ʿAbbās II (?). Then there are his shorter poems, ḳaṣīda's, rubāʿī's etc. His prose works are: *Sirādj al-Munīr*, a work inspired by Saʿdī's *Gulistān*, composed in an ornate style with verses interspersed. The text is divided into 20 sections (*lamʿa*) and deals with the different virtues and moral qualities which are illustrated by anecdotes. The London MS. gives 1030 (1620/21) as the date of completion of this work, but it is probable that this date refers to the time of copying the MS. and the work itself is a few years older. *Khazān u Bahār*, his last book, is a collection, also in ornate prose, of tales which his young brother Munshī urged him to compile. Most of the stories are taken from the earlier *al-Faradj baʿd al-Shidda* of Ḥusain al-Dihistānī, but he details, for example, also an incident that happened to his father Shams al-Dīn. The work consists of a preface (*muḳaddama*), fourteen sections (*faṣl*) and a conclusion (*khātima*) (lithogr. Tabrīz 1294). Two other prose works from his pen are recorded, namely *Durr-i Maknūn* and *Ḥawādith-i Fitan*.

KĀSHIFĪ, Ḥusain Wāʿiẓ, a prolific writer, who flourished in Herāt (during the reign of Sulṭān Ḥusain Mīrzā [q. v.]) and died in 910 (= 1505). Among the best known of his writings are (i.) a work on ethics, entitled *Akhlāḳ-i Muḥsinī*, dedicated to Abu 'l-Muḥsin, a son of Sulṭān Ḥusain Mīrzā, and completed in 900 (= 1495); it was printed for the first time in Calcutta, 1809, and frequently since; (ii.) a modernised version of Naṣr Allāh b. Muḥammad b. al-Ḥamīd's [q. v.] earlier Persian translation of *Kalīlah wa-Dimnah* [q. v.]; he undertook this task at the suggestion of Niẓām al-Dīn Amīr Shaikh Aḥmad al-Suhailī (ob. 907 or 908 = 1501—1503) and entitled it *Anwār-i Suhailī*; it is written in a very artificial style, overladen with rhetorical ornament, and has on this account been much admired in the East;

MSS. are common, and it has been printed several times, for the first time in Calcutta, 1804. His other works comprise *Djawāhir al-tafsīr li-tuḥfat al-amīr*, a Persian commentary on the Ḳur'ān, compiled at the request of Mīr 'Alī Shīr in 899, but he only completed one out of the four volumes he had planned, and broke off this work to compile for his patron a shorter commentary, entitled *Mawāhib-i-'alīya*, but usually styled *Tafsīr-i-Ḥusainī*; — *Rawḍat al-Shuhadā*, a history of the martyrdom of 'Alī and his family (abridgments exist under the titles, *Dah Madjlis* and *Muntakhab-i-Rawḍat al-Shuhadā*); — *Badā'i' al-Afkār fī Ṣanā'i' al-Ash'ār*, a treatise on figures of speech and poetic artifices, as well as faults in poetic composition; — *Makhzan al-inshā'* (compiled in 907 and dedicated to Ḥusain Mīrzā) and (later) *Ṣaḥīfa-i-Shāhī*, two works containing models of epistolary composition; — *Ḳiṣaṣ wa-Athār-i-Ḥātim Ṭā'ī* (or, *Risāla-i-Ḥātimīya*), completed in 891, giving the story of Ḥātim Ṭā'ī [*q. v.*]; — *Tuḥfat al-ṣalawāt*; — *Risāla al-'alīya fi 'l-aḥādīth al-nabawīya*; — selections from Djalāl al-Dīn Rūmī's *Mathnawī*, entitled *Lubb-i-ma'nawī*, from which shorter extracts were made, entitled *Lubb-i-Lubāb*. Several of the above works have been translated into Turkish, and the first two into English.

KASHĪSH-DAGH (in Turkish "mountain of the priests"), a name given by the Ottomans to Olympus in Mysia, at the foot of which is built on the north the town of Brussa [q. v.]. Its slopes are covered with forests now much diminished; its summit is covered with snow which only melts in summer (height 6,200 feet). Its massif is formed of granite, marble and felspar. At the time of the Ottoman conquest, Olympus was covered with convents and hermits' cells whence its Turkish name. The Christian monks were replaced by dervishes. The poet Lāmi'ī has described the two monasteries Geikli Baba and Doghlu Baba. At the foot of the mountain in a quarter of the town of Brussa is the tomb of Shaikh Shams al-Dīn Muḥammad b. 'Alī of Bukhārā, better known by the name Sulṭān Amīr Walī; a mosque is built over the tomb.

ḲASHḲĀI, a Turkish people in Persia. The name is said to be the Turkish *ḳashḳa* "horse with a white spot on its forehead" (W. Radloff, *Versuch eines Wörterbuches der türk. Dialecte*, ii. 395). The Ḳashḳāi are said to be descended from the Turkish Khaladj (cf. also *B.G.A.*, i. 158: Khaldj) mentioned by al-Iṣṭakhrī (*B.G.A.*, vol. i.) and later writers in the country between India and Sīstān. The Khaladj are said to have migrated first to the Persian 'Irāḳ where a district near Sāwa is still called Khaladjistān; there is still said to be a Turkish speaking people there (private information from V. Minorskiy). The Ḳashḳāi are said to have come from the 'Irāḳ to Fārs where they lead a nomadic life at the present day. Their winter quarters are in the southern part of this province, especially around Fīrūzābād, where the chief of their tribe (Īlkhānī) is regarded *ex officio* as governor; the stronghold of Parwīza was built there by the Īlkhānī Ṣawlat al-Dawla (from 1324/5 = 1906/7). In summer they wander as far as Kumisha and Gandemān in the southern part of the province of Iṣfahān. According to Curzon (*Persia and the Persian Question*, London 1892, ii. 112 *sqq.*), the Ḳashḳāi were a numerous people down to about 1870 (60,000 families; in case of war about 120,000 horsemen) but they suffered greatly from the famine of 1871 and 1872; at the time of Curzon's journey (1889) the number of families was said to be 25,000, while he put it at really some 10—12,000. The number 12,000 is also given by Tumanskiy (1894) for the tents of the Ḳashḳāi proper, but he says the number of all the nomads for whom the Īlkhānī of the Ḳashḳāi paid the taxes was double (24,000). Larger figures are given by later travellers: 35,000 (1906) and 55,000 (1914). In 1914 the Ḳashḳāi formed a well armed division of an army of about 20,000 men and took part in the world-war on Germany's side against England. All the Ḳashḳāi are fanatical Shī'is. The men are engaged in horse-breeding (the breed is related to the Arab); the women weave carpets. A few Ḳashḳāi have gone over to a settled life in the south at Dārāb and in the north at Kumisha. According to Curzon, the Ḳashḳāi, in spite of their Turkish descent, were considered to belong to the Lūr family; in their customs also they differ little from the Bakhtiyārī and Kūhgelū (the Turkish tribe of the Aghačeri also belongs to this Lūr tribe); but the language of the Ḳashḳāi, as the songs written down in 1914 by A. Romaskevič show, is a Southern Turki dialect closely related to the Turkoman and Ādharbaidjānī.

(W. BARTHOLD)

KASHKŪL (P.), an oval bowl of metal, wood or coconut (calabash), worn suspended by a chain from the shoulder, in which the dervishes put the alms they receive and the food which is given them. The etymology of this word is obscure; a popular one is given by the Persians: *kash* "draw" (imperative) and *kūl* "shoulder", "what one draws over the shoulder"; but as we find a form *kachkūl* attested in the older poets (Anwarī, Saif Isfarangī), this explanation can hardly be accepted. The dictionaries give as the first sense "beggar" and then "beggar's bowl". We are not able to say whether they are right.

In literature the word means an album, a collection of different pieces from different sources, and is applied particularly to the *Kitāb al-Kashkūl*

of Bahā' al-Dīn al-'Āmilī [cf. above s. v. AL-'ĀMILĪ].

KASHMĪR (1). The name Kashmīr (in Arabic works also Kashmīr) has from early times been employed to denote the valley situated in North-west Himalaya between 33° 50' and 34° 40' N. Lat. and 74° and 75° 30' E. Long. This valley has a length from N. W. to S. E. of about 84 miles and a breath from N. E. to S. W. of 20 to 25 m. The area is about 1900 sq. miles. It is separated from the outer hills of Djammū, Rādjāwarī and Pūnč by the lofty Pīr Pandjāl Range of which several peaks are more than 15,000 feet in height. On the North-west side ranges which come nearest to the valley rise to greater heights, the principal peaks being Gwash-brārī (17.800 ft.), Amarnāth (17.321 ft.) and Haramukh (16.903 ft.). Beyond these is an extensive mountainous district through which the passes connecting the valley with Ladākh, the Upper Indus valley, and Central Asia are few and difficult. The Zōdji Pass (11.300 ft.) is the principal means of communication with Ladākh, and the Burzil Pass (13,500 ft.) with Astōr and Skardū. With the plains of India the most direct pass is via Bhimbar over the Pīr Pandjāl (11.400 ft.), but the easiest and only route open throughout the year is that by Bāramulla where the R. Djehlam or Bēhat leaves the valley. This may be approached now most easily by the good road from Rāwal Pindī via Marrī, which follows the gorge of the Djehlam, but the Abbottābād route which joins the other at Muẓaffarābād (the confluence of the Kishangangā with the Djehlam) has more natural facilities and was most used in early days. The geography and geology of this isolated valley are fully described by Drew, Lydekker and Oestreich, and the historical geography has been elucidated by Cunningham and Stein.

The valley is shown to be a lacustrine basin formed by the Djehlam R. and its tributaries, of which the Sind and Lidar are the principal. The drying up of the lake which filled the valley is due to the removal of the rocky barrier which must have closed the exit at Bāramulla, and no doubt the general progressive dessiccation of this part of Asia contributed to the result. The Wular Lake is the principal remaining sheet of water, and the smaller Mānasbal Lake and the Srinagar Dal also deserve mention.

The surface of the valley lies between 5000 and 6000 ft. above sea level, it is nearly level and of great fertility, and seems to have attained prosperity at an early period, although its remoteness and inaccessibility protected it from many of the storms of invasion which have swept over Northern India. The people of Kashmīr, although of fine physique, have generally been stigmatized by travellers and rulers alike, from Yuan Čwang to Abu 'l-Faḍl [q. v.] and Gulāb Singh, as an unwarlike, cowardly and cunning race, but, as Lawrence has pointed out, these defects have been exaggerated by persistent oppression. It is evident that a race which maintained its independence for so many centuries could not, even though assisted by the great natural difficulties of approaching the country, have been altogether destitute of a manly character.

Although historical information does not go back to a very early period, yet for the last two thousand years Kashmīr is exceptionally well supplied with sources of historical information. The principal of these is Kalhaṇa's *Rādjataranginī*, a metrical chronicle composed in the xiith century, which is almost unique in India, and which as edited, translated, and annotated by Stein is the main source of our knowledge. Other authorities are the Chinese pilgrim, Yuan Čwang, who visited Kashmīr in the viith century, the chronicle of al-Bīrūnī [q. v.] in the xith century, the *Ā'īn-i Akbarī* of Abu 'l-Faḍl, the diary of the Emperor Djahāngīr, and the accounts of many modern travellers, beginning with the French physician Bernier, who accompanied the Emperor Awrangzīb [q. v.] on his visit to the valley. There is also a very complete series of coins illustrating the history of Kashmīr from the 6th century till the present day through the period of the Ephthalites, the Hindu kings, the Musalmān sulṭāns, the Mughal Emperors, the Durrānīs of Afghānistān, the Sikhs and the present rule of the Hindū Dogras of Djammū, under British suzerainty.

The most noticeable point in the history is the immunity of the valley from the great historic conquerors. Alexander did not touch it, and it repelled the attack of Maḥmūd of Ghaznī. Čingiz Khān [q. v.] and Tīmūr passed it by as did Bābur [v. BĀBER]. It fell easily into the possession of Akbar after he had consolidated his power over the whole of Northern India, and it was unmolested by Nādir Shāh even when the Mughal power had crumbled away under his attacks. Yet the disorganised country succumbed at once to the attacks of the mountainbred Afghāns of Aḥmad Shāh Durrānī, and the later Durrānīs, divided among themselves, were easily defeated by the Sikhs. In these cases the people of the valley, regarded simply as subjects for extortion, had no ground for preferring one set of conquerors to another, and they took no part in these later struggles.

No information about Kashmīr can be derived from classical sources before the time of Ptolemy, as the Greek historians of Alexander do not even mention it. Ptolemy (in the middle of the 2nd cent. A. D.) describes it as a very powerful state extending far beyond the limits of the valley, and it is evident that it formed part of the great kingdom of the Kushāns which spread over Northern India at that time. He calls it Kaspeiria, and states that it lies below the sources of the Bidaspes, the Sandabal and the Adris, i. e. the Vitastā (Vēhat, Bēhat or Djehlam), the Čandrabhāga (Čināb) and the Airāwatī (Rāvī), a very accurate description.

Before this time however, although there is no contemporary information, there is good ground for believing that Kashmīr formed part of the dominions of Aśōka about 250 B. C. The defeat of Seleukos by Čandragupta had enabled the Maurya monarchs to extend their power northward, and the spread of Buddhism made it easy for Aśōka to extend his influence into Kashmīr when he adopted that creed. No inscription of his edicts has been found in the valley, but that at Mānsehra was situated close to the most obvious route

to Bārāmūla through the Pakhlī plain forming part of Urasā (Hazara), and Yuan Čwang tells us that he erected four stūpas in the valley.

This is confirmed by the *Rādjataranginī* (i. 104), which shows the tradition still existing in Kalhaṇa's time. It represents Aśōka as a king who built numerous stūpas, and founded the city of Srīnagarī, the name of which is preserved in the modern capital Srīnagar, although its actual site is marked by the temple of Pāndrēṭhan (i. e. Purānādhishṭhāna "ancient capital"), three miles away. The chronicle again embodies an actual tradition when it comes to the kings Kanishka, Djushka, and Hushka, who correspond very closely to the Kushāns Kanishka, Vāsishka, and Huwishka, known from coins and inscriptions. We know from the Chinese and other Buddhist records that Kanishka called together the second great Buddhist counsel in Kashmir, and it seems probable that this took place, if the Buddhist tradition is correct, 400 years after Buddha's death, viz. the last half of the 1st century B. C. Even if the theory identifying Kanishka's date with the Śaka era should prove correct, this council cannot be dated later than the first cent. After the decay of the great Kushān kingdom it is probable that Kashmir remained under the rule of minor chiefs of that race who were overthrown by the Ephthalites or White Huns in the early part of the vith century.

All through this early period the name Kashmir or some similar form seems to have been in use. Stein shows that Ptolemy's Kaspeiria corresponds with a Prākṛit form Kasvīra, which is preserved in the modern Kashmīrī form Kashīr, while the older Sanskṛit form Kaśmīra has survived almost unaltered in India and Persia as the appellation of the country. The derivation from a supposed Kaśyapa-pura advocated by Wilson and Lassen is not now generally accepted, and the Kaspatyros of Herodotos certainly does not refer to Kashmir but to some place bordering on the Indus. He places it in the province of Paktyikē which must have been the later Pakhlī, the hilly district lying between the Indus and the Djehlam which gave its name to a *sarkār* of the Mughal empire under Akbar). Hekataios also mentions Kaspapyros as a city of the Gandarians. In the viith cent. the Chinese pilgrims adopted the name Ki-pin for Kashmir, but Yuan Čwang also uses the form Ka-si-mi-lo.

The Ephthalite occupation of Kashmir does not seem to have formed part of the direct invasion of India, which came from the west. Their king Mihira-gula seems to have been established at Śākala (Siyāl-kōt) in 520 A. D., when the Chinese pilgrim Sung-yun found him making war on Kashmir. How far he succeeded is not clear, but after his defeat in Central India in 528 A. D. he appears to have retired into Kashmir, and seems to have gradually obtained possession of the country, whence he attacked his brother who had usurped his throne in Gandhāra. Yaśōdharman, his Indian conqueror, appears to have followed him into Kashmir and struck coins there, but probably Mihira-gula remained in possession, as coins in the Kashmir style are found in the names of his successors, Khingila and Tōramāna. Yuan Čwang, who visited Kashmir early in the next century, states that Mihira-gula was a tyrant and oppressor of Buddhism. He was favourably received by the king then reigning, whose name he does not give, probably Durlabha the founder of the Kārkōṭaka dynasty and found 100 Buddhist monasteries still existing. Shortly afterwards king Harsha of Kanawdj [q. v.] extorted from Kashmir the tooth-relic of Buddha, but did not invade the country. Relations with China were frequent during the viiith century. An embassy from China arrived in 713 A. D. After 720 A. D. the kings of Kashmir were recognized by the Chinese emperors. The last recorded embassy from China was in 759 A. D. The Kārkōṭaka dynasty was then in possession, and the embassy in 713 A. D. seems to have been due to an application by the king Candrāpīḍa for assistance against the Arabs, who now appear for the first time. Muḥammad b. Ḳāsim after the conquest of Sindh had advanced to the foot of the Himalaya, but no further advance was made. The regular coinage of Kashmir reproducing that of the later Kushāns (with gradual degradation of designs) begins with the Kārkōṭakas and continues till the supersession of the Hindū by the Musalmān kings in the xiv.th century. The earlier kings of this race had possessions extending far beyond the limits of Kashmir including Pakhlī, Pūnč, Rādjapurī, Taxila and the Salt Range.

The extension of the Kashmir style of architecture, which is found almost unaltered in the ancient temples of the Salt Range, may probably be referred to this period. Hindūism and Buddhism flourished side by side in Kashmir, as we learn from Yuan Čwang, and even as late as the xii.th century when Kalhaṇa wrote; and the style of architecture used for the Hindū temples was probably identical with that of the Buddhist *vihāra*'s. Foucher (*L'Art Greco-Bouddhique*, p. 136—145) has proved its derivation from the Gandhāra architecture of the i.st and ii.nd centuries. The double pyramidal roof, its distinguishing feature, has been perpetuated in Muḥammadan mosques up to the present day. The mosque of Shāh Hamadān in Srīnagar shows this feature.

It is also in his account of this period that references to the Shāhis of Gandhāra begin to appear in Kalhaṇa's chronicle, and (as was the case with China) the growth of Islām appears to be the cause of the alliance between Gandhāra and Kashmir. In addition to the progress made in Sindh attacks were being made on the Gandhāra border towards Kābul. Al-Ṭabarī tells us that as early as A. H. 23 ʿĀṣim b. ʿAmr reached Ḳandahār (Gandhāra) and the Indian frontier, and under al-Manṣūr, 136—158 (754—775), according to al-Balādhurī, Hishām b. ʿAmr al-Taghlibī, governor of Sind "conquered Kashmir and Multān .... then he came in boats to al-Ḳandahār and conquered it", and al-Yaʿḳūbī confirms this. The territories of Kashmir which were conquered were no doubt outlying portions of the dominions between the Indus and Djehlam, and not the valley. It was no more than a raid without permanent effect on Kashmir, where the Hindū kings continued to rule undisturbed for some centuries. The most remarkable of these kings was Avantivarman (A. D. 855—883), founder of Avantipur, where the ruins of his temples still exist. He also carried out extensive works to regulate the floods of the Djehlam. The alliance with the Shāhis is again met with in his son's time, and becomes closer as time goes on. Gopāla-varman (902—904) helped Tōramāṇa or Kamaluka, the Kamalū of al-Bīrūnī, to recover his capital from a rebel,

and Kshēma-gupta (950—958) married Diddā, grand-daughter on her mother's side of Bhīma, successor of Kamalūka. Diddā exercised great influence in successive reigns, and ultimately became queen herself. She was a member of the ruling family of Lohara in Pūnč, and through her influence the dynasty became rulers of Kashmir. In 404 (1013) Maḥmūd of Ghazna destroyed the Shāhī kingdom. The last king, Triločan-pāl, assisted by a Kashmir force, was defeated and put to flight, but Maḥmūd's attempt to penetrate into Kashmir itself was brought to a stop at the hill-fort of Lōhara, the Lawhūr of al-Bīrūnī which he describes as the strongest place he had ever seen. Even after the destruction of the Shāhī kingdom princes of that family continued to exercise influence in Kashmir. The Lōhara dynasty reigned throughout the Ghaznawī period. The half mad king Harsha (1089—1101), according to Kalhaṇa, was under Musalmān influence, employed Turkish soldiers and destroyed Hindū and Buddhist images. The employment of 'Turushka' or Turkish troops is attributed partly to the incapacity of the Kashmiris. It is evident that the country was distracted at this period by frequent plots and rebellions caused by misgovernment, and it is probable that foreign troops were employed quite as much on this account as for the reason alleged. Kalhaṇa's chronicle comes to an end in 1149, and it is evident from the continuation by Djonarādja that the condition of affairs became worse, and also that a gradual conversion of the people to Islām was in progress. An invasion from the north by Tātārs under Dhu 'l-Ḳadr Khān (Zulču) took place in 706 (1305), and it is stated that after plundering Kashmir, this army perished in the snows while returning northwards. This perhaps made the way easier for the next Musalmān adventurer, Shāh Mīr Swātī (probably an Afghān), who seized the crown and brought in Muḥammadan rule under the title of Shams al-A'ẓam in 735 (1334). The change seems to have been accepted by the bulk of the nation, and the Hindūs, mainly Brahmans, who retained their religion were treated with toleration, still continuing to hold official posts. In the reign of Sikandar Shāh, 788—813 (1386—1410), a change took place, and this fanatical ruler commenced a violent persecution and reduced the ancient temples to the ruined state in which they still remain. His nickname Butshikan (iconoclast) commemorates these deeds. Zain al-'Ābidīn, who reigned 820—872 (1417—1467) reverted to the policy of toleration, and was an excellent ruler in every respect. His reign is looked back upon by Kashmīrīs of every class as a golden age in which justice prevailed. He constructed roads, canals, and bridges and in every way promoted the prosperity of the country. Under his successors misrule again prevailed. The Shī'ah Čaks who, according to Lawrence, probably came from Dardistān, obtained great power, and ultimately displaced the later kings of the legitimate line. Ghāzī Khān Čak was king in all but name, and Ḥusain Shāh, Muḥammad 'Alī, and Yūsuf, as shown by their coins, took the title of Bādshāh in rivalry of the Mughal emperors, and not that of Sulṭān used by the former kings.

After Bābar's conquest of northern India the emperors turned their eyes on Kashmir, which offered great attractions to a race accustomed to a cool climate, running streams, and gardens. Bābar himself sent a small expedition into the country which met with no success. In 947 (1540), the year in which Humāyūn was driven from power by Shēr Shāh's rising, his cousin, Ḥaidar Shāh Dughlāt, a member of the family ruling at Kāshghar [see DUGHLĀT], a man of great ability and famous as a historian [see ḤAIDAR MĪRZĀ] persuaded Humāyūn to attempt the conquest of Kashmir, and thus to obtain a safe refuge from his opponents. Humāyūn, however, found himself unable to carry out the project, but Ḥaidar Mīrzā went on with the expedition, and receiving much local support established himself as ruler in Humāyūn's name. He maintained himself till 958 (1551) when he was killed in an outbreak. This was probably organized by the Sūrī kings as a coin of Islām Shāh struck in Kashmir in 957 is known. The Čaks continued to rule until Akbar invaded the valley. In spite of the determined opposition of Ya'ḳūb Khān, son of Yūsuf Shāh, all resistance was overcome in 995 (1586) when Kashmir became part of the Mughal empire. It became one of the favourite resorts of the Emperors.

Akbar's first personal visit was in 997 (1589) by the Pīr Pandjāl Pass, the next in 1000-1001 (1592) when he was accompanied by Niẓām al-Dīn, author of the *Ṭabaḳāt-i Akbarī*. On his third visit he had a land-settlement carried out by his financier, Todar Mal, and fortified the hill at Srinagar on which now stands the fort of Hari Parbat. A full description of Kashmir under Akbar is given by Abū 'l-Faḍl in the *Ā'īn-i Akbarī*. Djahāngīr as a prince accompanied his father to Kashmir, and indulged his fondness for the country to the full after he became emperor. He erected numerous summer palaces and laid out gardens, of which the Nishāṭ Bāgh on the shores of the Dal, Achibal where the springs of one branch of the Djehlam gush from the rocks, and Vērnāg are the best known. To please his consort, Nūr Djahān, he is said to have introduced the *chinār* or plane-tree from Persia, her native country, and the fine groves and avenues of this tree are still one of the beauties of Kashmir.

His successor Shāh Djahān also laid out many gardens, and under his reign 'Alī Mardān Khān built serais along the Pīr Pandjāl road. His son, Dārā Shikōh (q. v.), built the Parī-Maḥall or Fairy Palace of which the ruins still stand on the mountain side above the Dal. Here as elsewhere the intolerant policy of Awrangzēb brought in trouble. He only visited the valley once, and some mosques erected by him still exist. The outward splendour of the empire was still undiminished, and the condition of Kashmir is vividly described by Bernier who accompanied the emperor on his visit.

Under the later emperors the administration became very bad. Nādir Shāh's invasion, although he did not touch the valley, brought in anarchy. Its *ṣūbadār*'s became practically independent. About 1752 Aḥmad Shāh Durrānī [q. v.] took possession and in 1756 he appointed Buland Khān Sadōzai to be *ṣūbadār* of Kashmir. Coinage however continued in the name of the emperor 'Ālamgīr II till 1174 (1760) and Aḥmad Shāh's first Kashmir coinage is dated 1176. (The coin of 1162 mentioned by Rodgers is shown by Whitehead to belong to the Mughal Emperor Aḥmad Shāh and not to Aḥmad Shāh Durrānī).

The condition of Kas̲h̲mīr under the Durrānīs was thoroughly bad. They were barbarous and uncivilized rulers, and their governors looked on Kas̲h̲mīr simply as a field for plunder and extortion. The internal wars between claimants to the throne, especially between Maḥmūd S̲h̲āh and S̲h̲udjā' al-Mulk, are faithfully reflected in the coinage. From the time 1227 (1814) when Fatḥ Khān Bārakzai obtained possession of Kas̲h̲mīr by the help of Randjīt Singh, the Sikh ruler of the Pandjāb, the nominal rulers were Maḥmūd S̲h̲āh and afterwards Aiyūb S̲h̲āh, but the real power was in the hands of the Bārakzai chiefs, especially Muḥammad A'ẓam S̲h̲āh, by whom the coins in the name of Muḥammad (1227—32) were probably struck. In 1223—1225 the anarchy prevailing is shown by the issue of coins in the name of the popular local saint, Nūr al-Dīn, instead of any nominal king. This state of affairs was brought to a close by the invasion of Randjīt Singh in 1234 (1819), who annexed Kas̲h̲mīr to the Sikh kingdom. The Sikh rule also was harsh and oppressive but firmer and better than that of the Durrānīs. Hari Singh was a governor noted for his severity, and Miyān Singh was the most just and efficient. Moorcroft, the traveller, visited Kas̲h̲mīr during this period and gives an unfavourable account of the condition of the people under Sikh rule.

Under Randjīt Singh a Dogra family of Djammū consisting of three brothers, Dhyān Singh, Gulāb Singh, and Suchet Singh, had risen into notice. They were not Sikhs but orthodox Hindūs. The Dogras are a Rādjpūt race of the outer hills, but not of the Kas̲h̲mīr Valley. Dhyān Singh became one of the chief officials of the Sikh state, while Gulāb Singh was invested with the Djammū Rādj, which had been confiscated by Randjīt Singh about 1820. In Randjīt Singh's name he annexed one hill-state after another, increasing thereby his own power, and his influence in Kas̲h̲mīr itself. In this way he added Kis̲h̲twār and Ladākh to the Sikh dominions. After Randjīt Singh's death in 1839 and the dissensions which followed it, Dhyān Singh's position was for a time a very powerful one, and through his help Gulāb Singh was able to consolidate his power in the mountain country. After the murder of Dhyān Singh with Mahārādjā S̲h̲ēr Singh, by the Sindhānwālia's (1844), Gulāb Singh after a time withdrew to his mountain possessions, but previous to this he had been sent into Kas̲h̲mīr to put down a mutiny in which Miyān Singh, the governor, had been killed (1842). This he did successfully, but the country had again fallen into anarchy, and the rebellious Bomba tribe defied the Sikh army. In 1845, when the Khālsa army plunged into war with the British government, Gulāb Singh took no part in it, and after the war he acted as representative of the young Mahārādjā Dalīp Singh in the negotiations which followed. Ultimately, on the advice of Major H. Lawrence (Sir Henry Lawrence), Kas̲h̲mīr and the adjoining territories between the Indus and the Rāvī were separated from the Pandjāb and formed into a separate state of which Gulāb Singh became Mahārādjā on payment of a subsidy and recognition of British suzerainty. The treaty in which these terms were embodied was signed in 1846. From this date begins the modern state of Djammū and Kas̲h̲mīr.

Gulāb Singh did not obtain peaceful possession of his new dominions. The governor Imām al-Dīn allied himself with the turbulent Bombas. Gulāb Singh's troops were defeated, and he was able to assert his authority only after a British force had entered Djammū. The Bombas continued to resist for several years. Ultimately all the rebellious tribes submitted. These movements had not had any hold on the agricultural population whose only desire is to live quietly and escape excessive demands from officials. Gulāb Singh's rule was on the whole firm and just, and the condition of the country gradually improved. He died in 1857 and was succeeded by his third son Ranbīr Singh, a good and well meaning ruler, but lacking the strong character of Gulāb Singh. The famine of 1877—79 caused great misery in the country and the earthquake of 1885 enormous losses. Ranbīr Singh was succeeded in 1885 by his eldest son, the present Mahārādjā Partāb Singh, who is a pious and conservative ruler. In 1893 the famine and earthquake were followed by one of the most disastrous floods in record. In spite of these catastrophes the preservation of peace and an orderly administration has caused an enormous increase in prosperity. One of the principal contributory causes has been the establishment of a regular system of land revenue administration under the settlement made by Mr. Wingate and Mr. W. Lawrence in 1887—92, after the model of the settlements in British India. These have been since improved and developed by Mr. W. S. Talbot, settlement commissioner. The development of communications by the construction of a good road through the Djhlam Valley to Bāramulla and more recently the cart road from Bāramulla to the capital has been a great benefit to the country.

Kas̲h̲mīr is divided for administrative purposes into the districts of South Kas̲h̲mīr, North Kas̲h̲mīr and Muẓaffarābād. The first two comprise the valley with the smaller river valleys and mountain slopes immediately adjoining it. The third consists of the narrow valley of the Djhlam below Bāramulla and that of the Kis̲h̲n-gangā which joins it at Muẓaffarābād. This tract has from time immemorial been treated as part of Kas̲h̲mīr. North Kas̲h̲mīr was formerly known by the name of Kāmrādj, and South Kas̲h̲mīr as Marādj. The Kas̲h̲mīrī language extends down the Djhlam some distance below Bāramulla, but not to Muẓaffarābād or the Kis̲h̲n-gangā valley where the dialect spoken is a form of Lahndā or Western Pandjābī.

The population was 1,295,201 in 1911. It consists of about 94 per cent of Musalmāns and 6 per cent of Hindūs, including a small number of Sikhs. The Hindūs are mainly Brahmans, commonly called Paṇḍits, whatever their occupation may be. The aboriginal agricultural population has become Musalmān, there has been little or no admixture of foreign races, and the original castes survive among them, but intermarriage between them is permitted, and family names (*krām*), often nicknames in their origin, have to a considerable extent superseded caste-names.

There is a great deal of artistic talent, and a natural gift for craftsmanship among the Kas̲h̲mīrīs. The old established industry of shawl-weaving for which Kas̲h̲mīr was once famous, has died down to very small dimensions, plain *pas̲h̲mīna* woven from the *pas̲h̲m* or wool of the Tibetan goat has to some extent taken the place of

the shawls of the same material. Other industries have however sprung up, carpets, embroidered felts and tablecloths are made in considerable quantities, while the products of the wood carving, lacquered and painted wood and papier-maché, silverwork, and copperwork all find a good market in Europe and among tourists.

A considerable class, the Hāndjīs or boatmen, live entirely on boats on the rivers and lakes, and form a very distinct element in the population.

Kashmīr has always had an attraction for visitors, and the improvement of communications has increased the number of visitors. It has become one of the principal summer resorts for European residents in India as well as for tourists from all parts of the world, who travel about the country in camps or house boats on the rivers or settle in the upland valley of Gulmarg, 8000 ft. above sea-level. Game large and small in the mountain valleys formerly attracted many sportsmen, but it is no longer abundant, and seekers after trophies now seldom visit Kashmīr.

The language of Kashmīr known as Kashmīrī or Kāshur is a Prakritic tongue differing much from the dialects of the Pandjāb, and showing so much affinity in some respects with the Shīnā language of Dardistān that it is classed by Grierson with the Pishāča group of languages.

The principal travels in Kashmīr which may be consulted in addition to the earlier authorities prior to the 17th century which have been mentioned above are those of Francisco Xavier (who accompanied Akbar to Kashmīr), François Bernier (who accompanied Awrangzīb in 1664), George Forster in 1783 (during the reign of Tīmūr Shāh, Durrānī), William Moorcroft and George Trebeck (through Ladākh and thence into Kashmīr in Randjīt Singh's time 1819—25), Victor Jacquemont (1831), Von Hügel (1835), and Vigne (1835). For more modern time the best general descriptions are those of Drew and Lawrence and for ancient history the works of Stein.

(2). A name frequently given to Srīnagar, the capital of the country of Kashmīr. It was the name applied to the mint-town under the Muḥammadan Sulṭāns, the Mughal emperors, the Durrānī Shāh's; and even so late as 1835 von Hügel speaks of the City of Kashmīr. The ancient name of Srīnagar which, according to Kalhaṇa, was given by Aśoka, has been revived by the Hindū rulers in modern times and is now in general use.

(3). The extensive dominions of the Mahārādjās of Djammū and Kashmīr are now frequently included under the name Kashmīr in atlases and official publications such as the *Census of India*. These include vast tracts not only in the outer hills, south-west of the Pīr Pandjāl Mts., including Djammū and Rādjawarī, but in the inner Himalayas comprising the conquests made in the name of Randjīt Singh and those made by the Mahārādjās of Kashmīr in more recent times. This region extends 32° to 37° 30' N. Lat. and from 73° to 80° E. Long. and has an area of 84,432 sq. miles and a population of 3,158,126 in 1911. Of this population however 2,895,061 is comprised within the narrow limits of Kashmīr and Djammū, while the outer enormous area, the greater part of which consists of mountains, contains only 265,060. The countries of Ladākh, Skardū (Baltistān [q. v.], Čilās, Gilgit [q. v.], Hunza-Nagar [q. v.], and Yāsīn are comprised in this region and will be found described under their own names, the connection with Kashmīr being purely modern.

(M. LONGWORTH DAMES)

ĶAṢĪDA, not infrequently also *Ḳaṣīd*, is the name given to a form of Arabic (also Persian, Turkish etc.) poem of some length. The name is derived from the Arabic root *ḳaṣada* with the meaning "to aim", because in the earlier times it contained the praise of the poet's tribe and attacks upon its adversaries; later the praise of a person or family by a poet who expects and openly asks for presents for his eulogies. From the earliest times the elegy (*marthiya*) does not appear to be included under the same designation, but poems of insult (*hidjā'*) are frequently by older poets called a ḳaṣīda, though the latter probably had frequently not the characteristics which come into the scheme of a proper ḳaṣīda. We can form the best opinion by taking as the basis for investigation the poems of the authors who lived in the first century of the Hidjra, instead of beginning with the poems preserved from the time of Paganism, though the latter formed the model of the former. A perfect ḳaṣīda should contain three essential parts. First the *nasīb* or erotic introduction in which the poet describes his visit to the erstwhile abode of his lady and his yearnings at finding the place forsaken. Secondly follows a description of his ride to the person whom he intends to praise. This gives him ample scope for describing the terrors of the desert and the comparison of his camel with various animals of the desert. At last comes the chief portion of the poem containing praise, or abuse of the person or tribe aimed at. Some poets, when so inclined, finish up with some moral reflection.

An Arabic (or Persian etc.) ḳaṣīda is a very artificial composition; the same rhyme has to run through the whole of the verses, however long the poem may be. In addition the composition is bound by a metre which the poet has to to guard most scrupulously through the whole course of the poem. The result is that we cannot expect very much beautiful poetry; the description of the desert and its animals and terrors may have a certain charm at first, but when the same descriptions recur in endless poems expressed in the same manner, only with different words, the monotony becomes nauseous. The difficulty was keenly realised by the poets themselves and accounts for the fragmentary character of most poems, which required much time in their composition. The poet Dhu 'l-Rumma stated that for a long time he could get no further than the first verse of his now celebrated poem (Nº. 1 of his *Dīwān*) and that it was only when he visited Iṣfahān that the remaining verses (128 in the edition) came to him with ease (*Asās al-Balāgha*, s. v. *ḥṣl*). The poet Djarīr, though stirred to his soul by the attacks of Djandal, the son of al-Rā'ī, composed at first only about 80 lines of his reply, though rhyme and metre are the easiest possible in the Arabic language, and completed the remainder at a later time (*Naḳā'iḍ*, ed. Bevan, p. 430). We can likewise be sure that al-Ṭirimmāḥ composed only a portion of his renowned poem against the tribe Tamīm and al-Farazdaḳ and that the additional verses sometimes included in the poem are by the poet himself and not interpolations by others. When a poet had composed a ḳaṣīda he would recite it whenever an occasion offered and it is quite natural that he should add or cancel verses himself, especially if a reply to his poem opened fresh avenues of attack. Many poets certainly never rose to composition of a poem containing all the essential portions of a ḳaṣīda, and it is foolishness to assume in each case that part of a poem has been lost if only a certain part is recorded. Such a poem was sent into the world before the poet had time to complete it and it is equally certain that lampoons in particular did not lend themselves easily to the complete scheme. Very early poets also composed poems which, though called ḳaṣīda, did not contain the essential portion, the praise or insult. As such we must take e. g. the poems of 'Umar b. Abī Rabī'a and some poems of al-Ṭirimmāḥ. Some of the latter's compositions were made to display the art of description and were never intended to be ḳaṣā'id in the proper sense of the word. The Arabic ḳaṣīda was naturally imitated by poets who wrote in other languages and the Persian poets Anwarī and Khāḳānī are celebrated as masters of this style. The form of the ḳaṣīda has survived to modern times and I have specimens by poets still living where we find the absurdity of a description of a desert-ride by persons who live in Cairo and travel by railway and steamer.

The ḳaṣīda by its references to persons and events is also a source of historical information. This, however, must be handled with the utmost care, as false statements, by design or through ignorance, are frequent and the mention of a battle-day does not necessarily imply that the poet was present. As an example I mention only that the Asadī poets 'Abīd and Bishr b. Abī Khāzim, probably a century distant from one another, both boast that their tribe was victorious at al-Nisār and al-Djifār.

AL-ĶĀSIM B. 'ĪSĀ AL-'IDJLĪ, usually called Abū Dulaf, a Muslim general. When in 195 (811) the Caliph al-Amīn sent an army under 'Alī b. 'Īsā b. Māhān against al-Ma'mūn's general Ṭāhir b. al-Ḥusain, Abū Dulaf went with him. When Ibn Māhān had fallen, Abū Dulaf came back to the neighbourhood of Hamadhān and, although he declined to pay homage to al-Ma'mūn, Ṭāhir left him in peace in al-Karadj. In 214 (829/830), when al-Ma'mūn came to Raiy, he sent for him. His friends advised him not to go, but he went and the Caliph received him with the greatest goodwill. In al-Mu'taṣim's reign, Abū Dulaf was arrested by al-Afshīn [q. v.] who was jealous of his bravery and eloquence. Al-Afshīn accused him of murder

and treason and on the evidence of false witnesses he was condemned to death but reprieved at the last minute by the intervention of the chief ḳāḍī Aḥmad b. Abī Du'ād (q. v.). As soon as the latter heard of the danger threatening Abū Dulaf he hurried to al-Afshīn and said the Caliph had ordered him to spare Abū Dulaf. When the latter had been released, Aḥmad went to the Caliph and told him that he made up the story to save the life of the innocent accused, whereupon al-Mu'taṣim forgave him and pardoned Abū Dulaf. The latter died in 225 (839/840) or 226 (840/841) in Baghdād. He left several works. He was also famed as an exceedingly ardent devotee of the Caliph 'Alī. On his descendants see the article DULAFIDS.

AL-ḲAṢĪM, a district in Central Arabia, on the high plateau of the Arabian desert. It owes its fertility to the Wādī Rumma', which runs to the north-east and whose course is barred by a series of parallel sand-dunes and hills from 1600—2000 feet high, which run from north-west to south-east. The water, richly provided by the spring and summer rains, sinks into the valleys and even in dry periods is preserved for years at a little depth under the red or yellow sandy soil and this supplies the essential requisite for a rich vegetation. The plateau is therefore covered in spring and summer with a rich crop of grass and affords excellent pasture for the great herds of camels and cattle and the numerous smaller animals. The sand-hills are covered with tamarisks (*athl*, *tamarix nilotica Ehrbg.*) and varieties of acacia indigenous to Arabia (*ḳaraẓ*, *acacia Arabica W.*, *ṭalḥ*, *acacia Seyal W.*). Millet, maize, wheat, vetches, etc. grow in the fields. Fruit-trees of all kinds yield plentiful crops. So early a writer as Yāḳūt makes special mention of the figs, peaches, grapes and pomegranates. The most important and most cultivated fruit-tree is, as elsewhere, the date-palm, which is represented in al-Ḳaṣīm by a particularly fine variety.

Among plants of economic importance may be mentioned the cotton-tree, which supplies local requirements. In the western part of al-Ḳaṣīm rock-salt is found. This mineral, so important for the cattle-breeders, is sold in the towns, especially in Boreida and 'Aneiza.

Al-Ḳaṣīm plays an important part in the caravan traffic of Arabia on account of its wealth in camels and its enterprising population. Of the population, estimated by Palgrave at 25—30,000 souls, at least a third devote themselves to caravan traffic either hiring out animals or acting as attendants or as small merchants. The caravan business takes them through the Wādī Dawāsir and Wādī Nadjrān to the Yemen, from which the best coffee is exported, to Kuwait, al-Baṣra, Baghdād and Djebel Shammar, to Makka and Syria via Khaibar. It is in the nature of things that many natives of al-Ḳaṣīm settle in the frontier districts or in one of the towns just mentioned and many have attained prosperity and wealth. Al-Ḳaṣīm also plays an important part in the trade in race-horses. Al-Djarad, also called Djarad al-Ḳaṣīm, in olden times the chief town of al-Ḳaṣīm, a day's march from 'Aneiza on the road to al-Baṣra, has been identified by A. Sprenger with the Φάλα of Ptolemy. The ancient settlements of this area which al-Hamdānī includes in al-Yamāma are all in ruins; the modern larger towns date from the late middle ages.

The district which lies in the centre of Arabia has had a lively history. One of the battle-"days" of the Arabs is called after it. Zuhair, Akhṭal, 'Aws b. Hadjar and other poets know and mention al-Ḳaṣīm. The young faith of Islām found al-Ḳaṣīm at first on the side of the anti-prophet Musailima, but in the decisive encounter between the Muslims and the followers of the Prophet of al-Yamāma we find al-Ḳaṣīm on the side of Khālid, the "Sword of Allāh"; in the struggle for the Caliphate, Nadjd and al-Ḳaṣīm were on the side of 'Alī but the victory of the Umaiyads brought the whole of Central Arabia under their sway and there was no change with the 'Abbāsids. It was not until the revolutionary movement led by the Karmatians that Nadjd was lost to the 'Abbāsids. In the eleventh century, Dārim, a native of al-Rass in al-Ḳaṣīm, was able to conquer a large part of Nadjd and Yemen and unite it with al-Ḳaṣīm. His kingdom was inherited by his sons and successors but the increasing power of the chiefs of al-Yamāma and 'Āriḍ conquered Dārim's kingdom bit by bit, till finally it was again reduced to al-Ḳaṣīm. Al-Ḳaṣīm was from the first somewhat hostile to the Wahhābī movement; but 'Abd al-'Azīz b. Sa'ūd of al-Dar'iya succeeded in gaining possession of Boreida, al-Rass and Tenaiie. The other villages then rose and in 1772 slew all the Wahhābīs they could capture. In 1780 a new rising broke out against Ibn Sa'ūd, which he was only able to put down after much fighting with varied fortunes. Ibn Sa'ūd's kingdom soon found itself faced with an extremely dangerous opponent: Meḥmed 'Alī of Egypt had been commissioned by the Sublime Porte to take measures against the Wahhābīs and sent his son Ṭūsūn to Arabia, where in a rapid succession of victories he conquered the whole of the west coast (1811—1815).

After the death of Ibn Sa'ūd (1814) the Egyptians extended their intrigues against Ibn Sa'ūd's kingdom to the interior of Arabia, and in 1815 Ṭūsūn marched into Central Arabia and captured the fortress of al-Rass in al-Ḳaṣīm after gaining over the greater part of the country by bribery. The peace concluded between Ṭūsūn and 'Abd Allāh b. Sa'ūd was, however, not confirmed by Meḥmed 'Alī, who ordered Ibrāhīm to conquer Arabia; in 1817 he took al-Rass, Boreida and 'Aneiza and thus became master of al-Ḳaṣīm. 'Abd Allāh b. Sa'ūd had to retire to Dar'iya, was taken prisoner and in 1818 beheaded in Constantinople. Al-Ḳaṣīm was now under Egyptian suzerainty and formed a strong base for Meḥmed 'Alī. But by 1822 the Arabs of Central Arabia had begun their war of liberation from the Egyptian occupation which ended in 1841 in the Egyptian-Turkish troops being driven out. Al-Ḳaṣīm was now for a time under the protection of the Grand Sharīf of Makka; in 1855 Zāmil Āl Salīm, who resided at 'Aneiza, was recognised by Ibn Sa'ūd as independent ruler of al-Ḳaṣīm, but in 1861 the district was again paying tribute to Ibn Sa'ūd. After six years al-Ḳaṣīm was again able to attain its independence and in 1879 Ibn Sa'ūd surrendered his claim to suzerainty over al-Ḳaṣīm in favour of Ibn Rashīd.

lord of Ḥā'il. A rising against Muḥammad b. Rashīd in 1891 ended in disaster and Zāmal Āl Salīm lost his life in battle. The Turks then took advantage of the fierce feud between Ibn Sa'ūd and Ibn Rashīd to gain a firm footing in al-Ḳaṣīm again, all the more easily as the people of al-Ḳaṣīm were weary of the long struggle and anxious for peace, and even Ibn Rashīd would rather have the Turks in al-Ḳaṣīm than the governors of his enemy Ibn Sa'ūd. Aḥmad Faiẓī Pasha therefore invaded Central Arabia in 1905 and occupied al-Ḳaṣīm also. Soon the position of the Turks became untenable, especially as Ibn Rashīd now sided against them; the Turkish troops had to evacuate al-Ḳaṣīm and Aḥmad Faiẓī Pasha's successor, Sāmī Pasha, was no more able to restore Turkish authority. In 1906 al-Ḳaṣīm belonged to Ibn Sa'ūd; in 1911/12 there were again attacks on Ibn Sa'ūd, especially by the Grand Sharīf of Mekka, but since 1913 al-Ḳaṣīm has formed a province in the wide kingdom of Ibn Sa'ūd.

ḲĀSIM AGHA, called ḲOḎJA (the old), an Ottoman court architect. He was appointed court architect in 1032 (began Nov. 5, 1622) in succession to the distinguished architect Meḥmed Agha, who built the Aḥmad mosque in Stambul (on him cf. the *Risāle-i mi'māriyye* [in MS.] of Dja'far Agha), relieved of his duties in 1053 (began March 22, 1643; cf. J. von Hammer, *G. O. R.*, v. 335) and his office given to Muṣṭafā Agha, known as *Merammetdji*, lit. "mender", but after a few months only he was restored to the office as the result of a low estimate (cf. Na'īmā, *Ta'rīkh*, ii. 46; J. von Hammer, *op. cit.*, v. 338 *sq.*). His manly intervention on behalf of Köprülü Meḥmed Pasha, afterwards Grand Vizier, cost him his office and dignities very soon after the Sulṭāna-mother Māh-Peiker (Kösem Wālide, q. v.) had appointed him to manage her affairs (*kethüda*) in October, 1651, on account of his honesty. He was imprisoned in the Seven Towers and soon afterwards banished to Cyprus (Na'īmā, *op. cit.*, ii. 333 *sq.*). He was later released and after being unsuccessful several times finally succeeded in the summer of 1655 (Na'īmā, *op. cit.*, ii. 531) in getting for Meḥmed Pasha the Grand Vizierate. He died, apparently at a great age, in 1070 (began Nov. 18, 1660). None of his buildings seem to have been of great importance. His work did not apparently extend to public buildings. It is only known that he was engaged in 1651 in building the Yeñi Wālide Djāmi' but hardly as the chief architect. The part which he played as a politician in Ottoman history is more important and the historian of the empire, Na'īmā, in particular, deals very fully with it.

Babinger, *Quellen zur Osmanischen Künstlergeschichte* in the *Jahrbuch der Asiatischen Kunst*, Leipzig 1924, p. 37. (F. BABINGER)

ḲĀSIM-I ANWĀR, MU'ĪN AL-DĪN 'ALĪ, called ḲĀSIM-I ANWĀR, a Persian mystic and man of letters, born in 757 (1356) in Sarāb near Tabrīz. For Sarāb (in Yāḳūt Sarāw) Dawlatshāh, *Tadhkira*, p. 340, gives Surkhāb; this name is not found in Yāḳūt, but Dawlatshāh has three times the phrase *Surkhāb-i Tabrīz*; the name is once found in a play on words (in a *rubā'ī* of Kamāl-i Khodjandī) in Dawlatshāh, *op. cit.*, p. 326). According to the Persian lexicographers, Surkhāb is a hill near Tabrīz (Vullers, *Lexicon Pers.-Lat.*, s. v., N°. 7). Ḳāsim's family came from Adharbaidjān. His religious teachers were Ṣadr al-Dīn-i Ardabīlī (an ancestor of the Ṣafawids) and Ṣadr al-Dīn 'Alī-i Yamānī, who was a pupil of Awḥad al-Dīn-i Kirmānī. As Djāmī (*Nafaḥāt al-Uns*, p. 690) tells us, mention was made of Yamānī but not of Ardabīlī in a work on Ḳāsim's *irādat*, which came from the circle of his intimates. This circumstance might suggest that Ḳāsim did not think so highly of Ardabīlī's instruction. The facts given in Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 473, contradict this, however. Among Ḳāsim's own *murīd*'s there must have been several free-thinkers, as Djāmī, *op. cit.*, p. 690, mentions that the teacher himself was, however, free from this imputation. The truth is that he — although it cannot absolutely be proved that he was a Ḥurūfī — strongly sympathised with this sect (Browne, *op. cit.*, p. 479). He travelled a great deal; he first of all lived in Gīlān: Gīlānī expressions are several times found in his poetry. From Gīlān he migrated to Khurāsān where he lived first in Nīshāpūr and later in Herāt. He was expelled from the latter town when the king, Shāh-Rukh, was murdered by a Ḥurūfī in 830 (1426/27). It was assumed that Ḳāsim was connected with the murderer, had harboured him and knew of the attempt beforehand. A singular story is given by Dawlatshāh, *op. cit.*, p. 346 *sq.*, according to which he had already been expelled from Herāt once previously: some individuals had complained to the king that the *murshid* was gathering many young pupils around him, which aroused misgivings among them on moral grounds. Shāh-Rukh, according to the story, then intervened and banished Ḳāsim. The latter then travelled to Balkh and Samarḳand but returned later to Herāt. This story is not very probable but it is evidence at any rate of the great popularity of the teacher in Herāt. Whether the libellous reason given for his expulsion is true cannot be proved either, but it must be confessed that at that time also there were great rascals among the Ṣūfīs. It seems to be certain that Ḳāsim found a protector after the banishment in 830 in Ulugh Beg in Samarḳand. As we also find Samarḳand mentioned in the story in Dawlatshāh, it may be suggested that the story in Dawlatshāh is an invention duplicating the story of his actual banishment.

Ḳāsim later returned to Khurāsān again and settled in Khardjird in the district of Djām. There through the support of well-to-do friends he was able to lead a life of freedom from care down to his death in 837 (1433/34). Dawlatshāh, *op. cit.*, p. 348, makes him die in 835, differing from the other authorities. In addition to what Rieu says (*Catalogue*, p. 636) on the date of Ḳāsim's death see also Rosen, *Les Manuscrits persans de l'Institut*, p. 121, where a chronogram on his death is quoted from a St. Petersburg MS.

Ḳāsim was buried in Khardjird; Dawlatshāh says that in his time 'Alī Shīr began to embellish the site of the tomb with buildings. The same authority tells us that Ḳāsim in his youth practised asceticism to such an extent that he injured his health. But in later years he altered his views — for example he said to someone who could not help expressing surprise at his prosperous appearance that he was no longer *'āshiḳ* but *ma'shūḳ*; he had once been a beggar but now he was a king.

Works. The author, who, according to Dawlatshāh, *op. cit.*, p. 303, was a great admirer of the poetry of Ḥāfiẓ, left a *Dīwān* behind him containing ghazal's, ḳiṭ'a's, rubā'ī's, elegies on mystics and mathnawīs. Some pieces are composed in Gīlānī and Turkish. His other works, *Anīs al-'Ārifīn* and *Anīs al-'Āshiḳīn* (also called *Risālat al-Amīna*) are treatises on mysticism in prose and verse. Finally we may mention his extracts from Sa'dī's *Bustān* entitled *Khulāṣa-i Bustān*.

These writings are unpublished; judging from the not very extensive specimens in Browne and the few pieces in Dawlatshāh (Bland's *Century* where ten of Ḳāsim's ghazal's are published I have not seen) we can agree with Browne when he says "the poetry of Qásimu 'l-Anwár, so far as a foreigner may venture to judge it, is only of average merit". One cannot deny his ability to write pleasing Persian verse but we look in vain for anything out of the way which would give him a claim to a place among the great names of Persian literature. A just verdict on his literary activity, however, will only be possible when his works have been published.

ḲĀSIM PASHA, usually called Güzeldje Ḳāsim Pasha, an Ottoman statesman. The son of Christian parents (*Ils* [i.e. Ayās Pasha and Ḳāsim Pasha] *sont tous venus de chrestiens*, in C. D. Schepper, *Tagebuch*, in *Missions diplomatiques de Corn. Dpl. de Schepper, dit Scepperus, de 1523 à 1555*, par le Brn. de St.-Génois et G. A. Yssel de Schepper, in vol. xxx. of the *Mémoires de l'Académie de Belgique*, Brussels 1861, p. 169 infra), he was born in the reign of Bāyazīd II and brought up in the Imperial Serāi (Ewliyā, i. 169). He attained the rank of a *rikāb aghasi* ("stirrup-agha"), accompanied Selīm I on his campaign to Egypt, was appointed governor of Ḥamā on its capture in August, 1516 (sandjaḳbeyi) (cf. L. Forrer, *Die osm. Chronik des Rustem Pascha*, Leipzig 1923, p. 55; not in Halil Edhem, *Tagebuch der ägypt. Expedition des Sultans Selim I, aus Feriduns Sammlung der Staatsschriften*, Weimar 1916, p. 15), and soon afterwards governor of Adana. A few years afterwards, he became Beylerbeyi of Anatolia and Rumelia, probably as early as the first year of Sulṭān Sulaimān. Appointed second vizier in 927 (began December 12, 1520) Ḳāsim Pasha held a command in the expedition against Rhodes (*Chronik des Rustem Pascha*, p. 62 at the top). When on Radjab 12, 929 (May 27, 1523) the Egyptian governor Muṣṭafā Pasha was dismissed, Ḳāsim succeeded him but lost the office with 34 days (on Sha'bān 16, 929 = June 30, 1523) (cf. J. von Hammer, *G. O. R.*, iii. 35). A few months later, when in Rabī' II (February, 1525) the traitor (*khā'in*) Aḥmed Pasha, his successor, was slain in a rising, he went to Cairo as governor for a second time but was again dismissed by March, 1525. Down to 935 (beginning September 15, 1528), when he once more became second vizier, he seems to have held a governorship ("Budin", i.e. Ofen [?], according to some sources, but which could only have been a temporary appointment). In May, 1533, the Fleming C. D. Schepper, envoy of the Hungarian royal widow Maria, saw him in Stambul as vizier along with the Grand Vizier Ibrāhīm Pasha [q.v.] and Ayās Pasha (d. July 13, 1539): *Cassim Bassa a la face plus grande et rouge et n'est si grand que le dict Ayas* (*op. cit.*, p. 169). In 1537 he was governing the Morea and sandjaḳbey) at Modon: in the summer of this year he attacked unsuccessfully the two last bulwarks of Venetian rule in the Morea, Napoli di Romania and Malvasia (cf. Zinkeisen, *G. O. R.*, ii. 771, 783). He may have then fallen into disgrace and lived in exile. The date of his death is uncertain. In 959 (began December 29, 1551), however, he seems to have lived in the Morea in non-activity; cf. 'Aṭā'ī, *Dhail* on the *Shaḳā'iḳ al-Nu'māniyya*, p. 23. In 944 (began June 10, 1537) he had a madrasa built for the poet Surūrī [q.v.] in the garden of the *türbe* of Maḥmūd Yazidji Oghlu [q.v.] which is now burnt down (cf. 'Aṭā'ī, *op. cit.*, p. 27): he cannot have, therefore, died in 939 (1532). It is certain, however, that he was buried in Gallipoli.

Ḳāsim Pasha earned lasting fame from a series of pious foundations and by building a mosque, a madrasa and a bath in Stambul. To this day one of the most important quarters in Constantinople, the Byzantine "Suburb of the Spring" (*kransdes* or *pegai*) is called after him *Ḳāsim Pasha maḥallesi* (cf. J. v. Hammer, *Constantinopolis und der Bosporus*, Pest 1822, p. 55 *sqq.*; Ewliyā, *Siyāḥet-nāme*, i. 169, 416 *sqq.*; *The Travels of Evliya*, transl. by J. v. Hammer, London 1834, i.; Ḥāfiẓ Ḥusain, *Ḥadīḳat al-Djawāmi'*, ii. 2 *sqq.*; J. v. Hammer, *Geschichte des osmanischen Reiches*, ix. 106 *sqq.*). His daughter Nefise Khatun also endowed a school and is buried in it; cf. *Ḥadīḳat al-Djawāmi'*, ii. 4, 2.

Postel, *La tierce Partie des orientales Histoires*, Poitiers 1560, p. 61 *sq.* (*Cassum Bassa au temps qu'il estoit Bassa avoit 20 mille ducats, il en peut avoir autant, est Sangiacly de Morée. Maintenant en son lieu est Moustapha Bassa*). (FRANZ BABINGER)

KASIMOV, in Russian originally GORODEC or GORODOK MEŠČERSKIY, in Tatar KHĀN KARMAN, formerly the capital of the Tatar princes subordinate to the Czar of Moscow and now a district capital in the gouvernement of Ryazan. It took its name from Ḳāsim, son of the founder of the kingdom of Ḳazān, Ulū Muḥammad. In the war between the brothers that followed the assassination of Ulū Muḥammad (1446), Ḳāsim was induced to enter the service of the Russian Grand Duke. The town, which bears his name, was granted him about 1452 (not later than 1456); there he built a mosque (of which only the minaret still exists) and a palace of stone (no longer standing; it was seen as late as 1768 by Pallas). After his death about 1469, his son Dāniyāl reigned till about 1486. Kasimov was next under the rule of prince Nūr Dawlat of the Girāy dynasty and his sons Satilghan and Djanay. About 1512 Shaikh Awliyār (grandson of Khān Küčük Muḥammad), descended from another branch of the descendants of Djūčī, is mentioned as prince of Kasimov. In 1516 his minor son Shāh 'Alī (he is so called in his epitaph, but is usually known as Shaikh 'Alī, Russian Shigaley Shigawliyarović) was reigning (nominally). After a life of vicissitudes (he was repeatedly appointed Khān of Ḳazān by the Czar and then deprived of all his dignities and condemned to the severest imprisonment, then pardoned and again restored to his principality), Shāh 'Alī died childless, aged sixty-one, on Monday, Shawwāl 10, 974 (April 21, 1567). The *tekye* built by him in Ramaḍān, 962 (July–August, 1555), in which are his tomb and the tombs of several of his relatives, has been several times described, first by Pallas in the year 1768, most recently by Welyaminov Zernov in 1863. During his rule in Ḳazān, his brother Djān 'Alī represented him in Kasimov and later ruled for a short time (1532—35) in Ḳazān also until he was murdered during a rising there.

The "Czar" Shāh 'Alī was succeeded in Kasimov by his distant relative Sāyin Bulāt, great-grandson of the Khān of the Golden Horde Aḥmad. In 1573 he adopted Christianity, received the name of Simeon, moved to Moscow and was there given by Ivan the Terrible the title of "Czar of all the Russians". He died in 1616 as the monk Stephen. It was not till 1585 that a successor to him was appointed in Kasimov, Muṣṭafā 'Alī, whose father, 'Abd Allāh b. Aḳ-Kubak, also a great-grandson of Khān Aḥmad, died in 1570 and was buried in Kasimov. About 1600 we find mentioned as prince of Kasimov Uraz Muḥammad of the family of Khāns of the Kirgiz Kazak, who afterwards took part in the fighting during the civil war in Russia and was killed in 1610. The last rulers of Kasimov were Arslān (grandson of the last Siberian Khān Kučum) and his son Saiyid Burhān, descended from the house of Siberian rulers; the latter, first mentioned as ruler in 1627, was baptised between 1653 and 1655 (he received the name Wasiliy) and yet remained prince of Kasimov till his death soon after 1678. To this period belongs the forcible conversion of a part of the Tatars by Misayil, Archbishop of Ryazan (1651—56); in one of these attempts at conversion the Archbishop was killed by the enraged populace. The verse from the Ḳur'ān (iii. 52), constantly quoted in epitaphs in Kasimov, seems to have been placed there in antagonism to the zeal of the Christian missionaries.

Even under Wasiliy the administration of Kasimov was in the hands of a Russian woyewoda; the Tatar prince exercised only nominal rule. The mother of Wasiliy, Fāṭima Sulṭān, was recognised as ruler in the years following Wasiliy's death on these terms; she is last mentioned in 1681. After this there was no "Czar" or "Czarevitch" (sometimes one, sometimes the other title is used) of Kasimov any longer. In the modern district capital of Kasimov the Tatars only form a comparatively small part of the population, according to the census of 1897, 13,545 souls (according to Reclus, as many as 14,100 in 1870), including 1,539 Tatars, in 1909, 17,075, including 2,000 Tatars. The Bulghar industries (tanning and shoemaking; cf. above, i. 789a), introduced to the Russians through Tatar intermediary, are especially followed in Kasimov.

Bibliography: The most thorough and still indispensable, although several new documents have since been made available, is Welyaminov Zernov's great work "*Izsledovanie o Kasimovskikh Tsaryakh i tsarevičakh*" (4 vols., *Trudi Vost. Otd. Imp. R. Arch. Obshč.*, ix.—xii.), on which is based almost all that has been written about the princes of Kasimov elsewhere, especially Howorth, *History of the Mongols*, ii. 429 *sqq.* Cf. more recently N. Likeyew, *Simeon Bekbulatović*, Tver 1891, review by D. K(obeko) in the *Zap. Vost. Otd.*, viii. 335 *sq.*; N. Shishkin, *Istoriya goroda Kasimowa*, 1880; review by V. R(osen), *ibid.*, v. 122 *sq.* (W. BARTHOLD)

ḲĀSIYŪN, a bare and rocky massif — the summit is over 4,000 feet high — commanding in the north-east the Ghūṭa [q. v.] and dominating Ṣāliḥiya, the suburb of Damascus. It lies between the valley of the Baradā [q. v.] and that of the Halbūn. The Nahr Yazīd which flows out of the Baradā runs along the foot of Ḳāsiyūn. "There they venerate the birthplace of Abraham on the slope adjoining the village of Barza. This mountain has been famous since remote antiquity as a place of ascension and retreat of prophets" (Ibn Djubair). Adam is said to have stayed there. Cain killed Abel there, whose body was buried on this "sacred and most venerated mountain" (Yāḳūt), which is covered with sanctuaries. The encyclopaedists and the historians of Damascus associate with it several thousands of martyrs and prophets buried between the Bāb al-Farādīs and the slopes of Ḳāsiyūn.

(H. LAMMENS)

KASKAR, the name of a town in the 'Irāḳ. When al-Ḥadjdjādj [q. v.], the governor of the 'Irāḳ appointed by the Caliph 'Abd al-Malik, had put down the rebellion there, he began in 83—86 (702—705) to build a new town which was called Wāsiṭ ("centre") because it was midway between the two older Arab capitals of this province, Kūfa in the north and Baṣra in the south. For the site of the town he chose the vicinity of the town of Kaskar on the Tigris, which had played a not unimportant part in the Sāsānian period. The new Muslim town was built on the east bank of the Tigris, while Kaskar lay opposite it on the west side; a bridge of boats linked the two halves of the city. Neither Wāsiṭ nor Kaskar

exist at the present day and until quite recently their exact situation was uncertain. In looking for the site we must not think of the modern course of the Tigris in Central and Southern Babylonia: in the days of the Caliphs this river ran much farther to the west; its course in those days probably corresponded for a good part to that of the Shaṭṭ al-Ḥaiy (cf. i. 677ᵃ, 970ᵃ). Kaskar-Wāsiṭ certainly lay somewhere in the neighbourhood of the modern Kūt al-Ḥaiy (cf. i. 677ᵃ, 970ᵃ). According to the results of an archaeological journey by Count Aymar de Liedekerke-Beaufort (see *Babyloniaca*, vii., Paris 1922, p. 115) the now insignificant ruins of Wāsiṭ lie almost 25 miles west of Ḥaiy on the dry Tigris bed of Shaṭṭ al-Khorder. On the other hand the map of Mesopotamia (Sheet Baghdād, 5 d) published by the General Staff in Berlin in 1917, puts Wāsiṭ about 15 miles N. E., as the crow flies, of Kūt al-Ḥaiy. On the modern ruins of Wāsiṭ see also the notes by Massignon based on information given by a native of the district in his *al-Hallaj, Martyr mystique de l'Islam*, Paris 1922, p. 23. For further information on Wāsiṭ, see the article.

As to Kaskar, it probably dates back into the Assyrian period. It may be recalled that we seem to have a Babylonian town Ka-as-ka-ri mentioned in a fragment of an inscription probably of the time of Assur-banipal, in the British Museum ([18] 82. 5—23: 128; see Bezold, *Catalogue*, p. 1824); cf. Streck, *Assurbanipal*, Leipzig 1916, p. lxxxviii. and 790. The place is perhaps also mentioned in the Babylonian Talmud (*Yōmā*, fol. 10ᵃ, where Bashkar has probably to be corrected into Kashkar)]; see Marquart, *Ērānšahr*, *Abh. G. W. Gött.*, New Series, iii., Nº 2, Berlin 1901, p. 164. In any case Kaskar called Kashkar in Syriac and Christian Arabic sources, is one of the oldest Christian towns in Babylonia. It frequently appears in the ecclesiastical history of this region. The episcopal diocese of this name was considered second in importance within the Nestorian church. Its occupant was the right arm of the patriarch of Seleucia — Ktesiphon (see MADĀ'IN) and his representative when the office was vacant.

Among the signatories to the acts of the Syriac councils we find bishops of Kashkar from the period 410—790 (Guidi in *Z. D. M. G.*, xliii. 411 and Chabot in the *N. E.*, xxxvii., Paris 1902, p. 675). According to the Syriac "chronicle of Arbela" there was a bishop in Kashkar as early as the first half of the third century A. D. The Christian Arabic "Chronicle of Seert" also mentions an occupant of the episcopal see there of the period before 410 A. D. On the bishopric of Kashkar and a list of its occupants see J. Labourt, *Le Christianisme dans l'empire Perse sous la Dynastie Sassanide*, Paris 1904, passim (v. the index s. v.); Sachau, *Die Chronik von Arbela* (= *Abh. Pr. Ak. Wiss.*, 1915, Nº. 6), p. 21; Sachau, *Zur Ausbreitung des Christentums in Asien* (= *Abh. Pr. Ak. Wiss.*, 1919, Nº. 1), p. 30—31.

The town of Kashkar, like the bishopric which bore its name, was the home of many founders of monasteries, as may be seen from the work compiled in the eighth century by Ishō'denaḥ, entitled *Ktābā de Nakhpūthā* (ed. Chabot in *Mélang. d'archéol. et d'histoire de l'École Française de Rome*, xvi., Paris 1896), p. 225 *sq.*; the Great Abraham (d. 588) was especially famous, s. Ishō'denaḥ Nº. 14; Labourt, *op. cit.*, p. 315;

A. Baumstark, *Gesch. der syrisch. Litteratur*, Bonn 1922, p. 130. One of the most influential personalities at the court of the Sāsānian King Khusraw II Parwīz (590—628) was Ābā of Kashkar; on him see Baumstark, *op. cit.*, p. 123. On other Syriac writers who belonged to Kashkar ('Abdīshō', Gīwargīs, Elīyā) see Baumstark, *op. cit.*, p. 30, 128, 420. For the Syriac sources on Kashkar see also the indices in Wright, *Catalogue of the Syriac Manuscripts in the British Museum* (London 1870) and Wright, *Catal. of the Syriac manuscr. in Cambridge* (Cambridge 1901), p. 1284, also in Sachau, *Katalog der syrisch. Handschr. in Berlin* (Berlin 1899), p. 923.

In the Arsakid period there seems to have been a little kingdom of Kaskar, which was destroyed by the first Sāsānian Ardashīr I; cf. Nöldeke, *Gesch. d. Arab. und Perser zur Zeit der Sasaniden*, (Leiden 1879) p. 13 note 5. In the Sāsānian division of the 'Irāḳ, Kaskar is mentioned as one of the 72 administrative districts; see Streck, *op. cit.*, (see *Bibl.*) p. 15, 18. It probably — as later under the Muslims — comprised roughly the district east of the Tigris, from the modern Kūt al-Amāra in the north to the region of the mouth of the Tigris. Sometimes it is mentioned as equivalent to the district of Maisān [q. v.]. On this cf. Schaeder in *Islam*, xiv. (1924) p. 17 *sq.* The bishopric of Kashkar must have coincided pretty much with the Sāsānian district of the same name; cf. the map in Sachau, *Die Chronik von Arbela*, p. 16.

Kaskar is also given as the name of the capital of Dailam, which was usually called Dūlāb; cf. G. Le Strange, *The Lands of the East. Cal.*, p. 174; de Morgan, *Miss. scientif. en Perse*, i. (Paris 1894), p. 276.

Bibliography: *B. G. A.*, passim; al-Balādhurī (ed. de Goeje), p. 582; Yāḳūt, *Mu'djam* (ed. Wüstenfeld), iv. 274; al-Ḳazwīnī, *Āthār al-Bilād* (ed. Wüstenfeld), ii. 299; Ḥamd Allāh Mustawfī, *Nuzhat al-Ḳulūb* (Gibb Mem. Ser., xxiii./i. p. 162, 6; G. Le Strange, *The Lands of the Eastern Caliphate* (Cambridge 1905), p. 39, 43, 80 and do. in *J. R. A. S.*, 1895, p. 44 *sqq.*; Streck, *Babylonien nach den arab. Geograph.*, ii. (Leiden 1902), p. 318 *sqq.*, 321 *sq.*; Ritter, *Erdkunde*, x. 191.

(M. STRECK)

KASR. [See KAWA].

KASR, fraction, a mathematical term which is used in Arab mathematics for the relation of two indefinite numbers as well as for that of distances, surfaces etc. In geometry, however, the term *al-kasr* is very rarely used; usually one says *nisbat a ilā b ka-nisbat c ilā d* $\left(\frac{a}{b}=\frac{c}{d}\right)$.

While in the Arab astronomers the sine of the angle is referred to the radii of the circle which contain 12 or 60 parts, al-Bīrūnī gives the radius the value 1 and the values of the sine thus appear as actual fractions in his work. In his *Ḳānūn Mas'ūdī* we read: "…… *wa-yusammūna maḳāṭi' al-kusūr allatī mukhraj[u]hā min al-ithnaini ilā al-'ashara wa-yusammūna tilka 'l-awtār ru'ūsahā ka-mā yusammūna hādhihi 'l-kusūr ru'ūsan*" (and the fractions follow in regular series which start with the [numbers] 2 to 10 and therefore they [the mathematicians] call these chords "heads thereof" just as they call these fractions "heads" (see Berl. Arab. MS., Oct. 275, p. 63ᵇ).

Kasr is more frequent in Algebra. The so called "expressible" fractions are the fractions with

the denominators 3 to 10, i.e. *thulth* ($\frac{1}{3}$), *rubʿ* ($\frac{1}{4}$), *khums* ($\frac{1}{5}$), *suds* ($\frac{1}{6}$) etc. In other cases, e.g. instead of $\frac{5}{11}$, one writes "five out of eleven parts". If the denominators can be broken up into factors, the following formula is used: $\frac{1}{48}$ = one sixth of one eighth. The fraction $\frac{1}{2}$ is expressed by *niṣf* (half).

Bibliography: J. Ruska, *Zur ältesten arabischen Algebra*, Heidelberg 1917, p. 20 and 34.

(C. Schoy)

ḲAṢR, a palace, castle, mansion or pavilion, in which sense it is synonymous with the Turkish *köshk*. The word occurs in the Ḳurʾān three times, once in the singular and twice in the plural (*ḳuṣūr*), and is applied twice to castles on earth and once to the abodes of the faithful in Paradise. It is the common word for the palace of a king in his capital or of a governor in the chief city of a province, e.g. *Ḳaṣr-i Ḳādjār*, the Palace of the Ḳādjārs, near Ṭihrān. The word, with the article, has been naturalized in Spanish as *alcazar* and is applied to old Moorish castles, such as the alcazar of Segovia and the alcazar of Sevilla.

Bibliography: E. W. Lane, *An Arabic-English Lexicon*, s.v.; Stanley Lane-Poole, *The Moors in Spain*, London 1887.

(T. W. Haig)

ḲAṢR FIRʿAWN is the name given by the Moors to the ruins of the Roman city of Volubilis, which lie in a little valley of the Djabal Zarhūn about 20 miles N. of the present Meknès. Volubilis, at the entrance to the fertile plain of the Wādī Rdom in a district where the olive-tree flourishes, was the principal Roman centre of the interior, although it lay almost on the southern edge of the zone effectively occupied by the Romans. It was still a flourishing town in the fourth century A.D. In the fifth the Vandals, without establishing themselves there, put an end to Roman power in Morocco. The Byzantines, when they reconquered the country in the seventh century, had no effective authority outside of the north coast. There is reason to believe, however, that Volubilis left to itself was not depopulated but there grew up there, as in other parts of North Africa, a kind of state, comprising the remnants of the urban population, romanised Berbers for the most part, and the surrounding tribes under the authority of a native chief. Little by little, in the course of these two centuries this region became the centre of the great Berber confederation of the Branes, the dominant tribe of which at that time was the Awrāba (Warba) and the chief, at the time of the Muslim conquest, Kosaila (whose capital some authors have tried to locate in the Awrās, which is untenable). When the Berbers, who under the leadership of this chief, had overcome ʿOḳba b. Nāfiʿ and succeeded in driving the Arabs out of the whole of Africa Minor (63 = 683), had to abandon Ḳairawān again five years later, the Warba contingents having lost their chief and having been severely punished, returned to Walīlī (Ulīlī = Volubilis (68 = 688). These events much diminished the power of the Warba. Henceforth they lived quietly, taking no part in the great Khāridjī risings which began in 122/740, but recuperating their strength, until the day when, after the battle of Fakhkh, Idrīs b. ʿAbd Allāh b. al-Ḥasan b. ʿAlī (cf. the art. idrīs i, above, ii. 450) settled in Ulīlī, where he was received by Isḥāḳ b. Muḥammad, chief of the Warba (172 = 788/9). He was soon recognised as sovereign by the Warba and ultimately by all the surrounding tribes either voluntarily or under compulsion. Ulīlī became the capital of a state stretching from the Atlantic to the region of Tlemcen, the first Muslim empire in Morocco and the centre of intense missionary activity among the heretical tribes and those which had remained Jews, Christians or pagans. It was there that Idrīs died in 177 (793), poisoned, it is said, at the instigation of Hārūn al-Rashīd. His son Idrīs II [q.v.] continued his policy of conquest and conversion, but in 192 (808) abandoned Ulīlī for Fās which he had just founded, no doubt in order to escape from the tutelage of the Warba, whose chief Isḥāḳ b. Muḥammad he had killed. When he himself died in 213 (828) he was buried beside his father in Ulīlī, according to most of the early authorities. But in 841 (1437) his tomb or at least a tomb reputed to be his was discovered, conveniently for political reasons, in the Djāmiʿ al-Shurafāʾ in Fās; and this tomb has become the most popular sanctuary in the town founded by him.

After the building of Fās, Ulīlī lost all political importance. The Zarhūn remained a much visited place of pilgrimage. Around the sanctuary of Idrīs rebuilt two centuries ago by Sulṭān Mūlāy Ismāʿīl, two miles from the ruins of Volubilis in a very picturesque situation on two mounds commanded by higher hills, stands the town of Mūlāy Idrīs of the Zarhūn with about 9,000 inhabitants, the majority Idrisid sharīf's.

The Idrisid town of Ulīlī, of which no remains seem to survive, probably lay on the site of the present town, a remarkable natural fortress. Excavations systematically conducted since 1915 in the Roman town have already yielded interesting results, bringing to light inscriptions very important for the history of the settlements of the Romans in this region and works of art of the first rank.

Bibliography: Tissot, *Recherches sur la géographie comparée de la Maurétanie tingitane*, Paris 1878; the Muslim historians of the Idrisids and the geographers down to the xiith century (see the bibliography to the art. idrīs, idrīsids), especially al-Bakrī, *Kitāb al-masālik*, Index; Fournel, *Les Berbères*, Paris 1885, vol. i.

(Henri Basset)

AL-**ḲAṢR** AL-**KABĪR** (ḳṣar al-kebīr), a town in Northern Morocco, about 50 miles south of Tangier on the right bank of the Wādī Lukkos, which at one time ran through it, but the course of the stream was diverted to prevent inundations. Lying in a vast plain commanded on the east by heights it is divided into two parts, al-Sharīʿa in the north and Bāb al-Wād on the south, between which lies the *sūḳ* or market-place. The only buildings of any importance are the great mosque which is pre-Almohad, the mosque of Sīdī al-Azmīrī and the Djāmiʿ al-Saida, finished in 1689. Within and around the town are many *ḳubba*'s dedicated to local saints. The most venerated marabouts are Abu 'l-Ḥasan al-Kuraiṣhī (Ḳuraṣhī), a native of Spain who came towards the end of his life to teach in al-Ḳaṣr where he died in 568 or 573 (1172—73 or 1177—78), Sīdī Ben Aḥmed, Sīdī ʿAlī b. Khlef b. Ghālib, usually called Mūlāy ʿAlī Bū Ghālem and regarded as the patron saint of the town, and lastly Sīdī Bel-ʿAbbās, who is really a Jewish rabbi, [illegible] Vālā Yahalaș.

The population numbers about 9,000 belonging for the most part to the Khlot, Ṭlīḳ and Djalala. It also includes Rīfans, a few families originally from Tetwan and Fās as well as Algerians who left Tlemcen and Oran as a result of the French occupation. The Jews number 2,000. Many of them have settled in the town quite recently in such numbers that the *Mellāḥ* was too small for them and they had to live among the other inhabitants. They speak Arabic and Spanish but Muslims use only the former language. Industry at one time flourishing is now limited to the manufacture of cloths for local needs. Agriculture, on the other hand, is prosperous in the country around as a result of the system of combination between townsmen and tribesmen. Al-Ḳaṣr is thus a busy market for corn, barley, beans and flax.

History. The site of al-Ḳaṣr perhaps corresponds to that of a Roman town (Oppidum novum?) which had already disappeared by the time of the first Muslim invasions. In the second century A.H. a fortress was built in these regions by the Danhādja, a branch of the Ketāma. According to al-Ziyānī, it was built in 102 (720—721) by the Amīr ʿAbd al-Karīm al-Ketāmī whence the name Ḳaṣr ʿAbd al-Karīm (al-Idrīsī, *Description de l'Afrique*, ed. Dozy and de Goeje, text p. 78; transl. p. 89; *Kitāb al-Istibṣār*, ed. von Kremer, Vienna 1852, p. 78; transl. Fagnan, Constantine 1900, p. 140; as well as Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 401; transl. ii. 123) or Ḳaṣr Ketāma which the town kept for several centuries. Al-Bakrī, however, makes a distinction between Sūḳ Ketāma "a large and magnificent town situated on the river Lukkos with a *djāmiʿ* and a very busy market" and Ḳaṣr Danhādja "a castle built on a hill and commanding a large river". Ibn Khaldūn, on the other hand (*op. cit.*, text i. 188, transl. ii. 291), connects Ḳaṣr Ketāma with the Danhādja (cf. also *Kitāb al-Istibṣār*). Sūḳ Ketāma was the capital of the state governed by Idrīs b. al-Ḳāsim b. Ibrāhīm. Al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii. 219, 7) mentions Sūḳ al-Ketāmī among the towns dependent on Fās. Although eclipsed by the rapid development of Fās, al-Ḳaṣr seems to have retained a certain amount of commercial importance. Al-Idrīsī (*loc. cit.*) mentions its very busy bazaars. But it was only under the Almohads that the town rose out of the semi-obscurity in which it was vegetating. Yaʿḳūb al-Manṣūr surrounded it with a fortified wall and made a hunting-ground and a hospital called Ḥārat al-Mudjārin. This is perhaps why he was regarded by Leo Africanus and Marmol as the actual founder of al-Ḳaṣr. Under the Marīnid dynasty, the town was given a madrasa by Abū ʿInān which attracted many students and was still frequented in the 12th (xviith) century. Al-Ḳaṣr recognised the authority of the Marīnids from 620 (1223—1224). In 687 (1288—1289) the latter appointed as its governor the Raʾīs Abu 'l-Ḥasan b. Ashḳīlūla, whose descendants for long remained lords of the town. The memory of this local dynasty, whose members, in alliance with the Banū 'l-Aḥmar of Granada, distinguished themselves in the holy war, is still alive to-day.

The period following the disappearance of the Banū Ashḳīlūla was one of calamities. The Portuguese, established on the coast, threatened the town. The inhabitants did not dare to cultivate the soil more than six miles from the walls. In 1503 the governor of Acila, Don Juan de Meneces, attempted to take it but without success. In the century following, al-Ḳaṣr became the most advanced post of the "volunteers of faith" (Mudjāhidīn) who harassed the Christians settled on the coast. During the period of anarchy that preceded the establishment of the Filālī dynasty, the town became the residence of the Ḳāʾid Ghīlān, who had gained possession of all Gharb. Driven from his capital by Mūlāy al-Rashīd in 1078 (1668) Ghīlān was able to return to it on the death of this prince. He held out there till 1084 (1673) when he was defeated and killed by Mūlāy Ismāʿīl. Al-Ḳaṣr fell again, this time finally, into the hands of the Sharīf, who dismantled its walls.

AL-ḲAṢR AL-ṢAGHĪR, a town in Morocco, now in ruins. It lay on the south bank of the Straits of Gibraltar, 14 miles W. of Ceuta, 23 miles E. of Tangier, at the head of a bay sheltered by a spur of the Djebel Ghomāsī at the mouth of a navigable river.

In ancient times this site was perhaps occupied by a Phoenician factory and then by a Roman town (Lissa or Exilissa of Ptolemy). A fortress was erected there quite early in the period of Muslim occupation, in 90 (708/9), according to al-Ziyānī, *Archives Marocaines*, vi. 494, on the territory of the Maṣmūda whence the name of Ḳaṣr Maṣmūda (cf. Ibn Khaldūn, *Hist. des Berbères*, ed. de Slane, i. 280, 13, transl. ii. 134) which is given it by the author of the *Kitāb al-Istibṣār* and by al-Idrīsī. Al-Bakrī calls it al-Ḳaṣr al-Awwal to distinguish it from al-Ḳaṣr al-Kabīr [q. v.]. According to him, it was inhabited by the Banū Ṭarīf and surrounded by great plantations. Under the Almohads it took the place of Marsā Mūsā as the port of embarkation for Spain. Many authors call it therefore Ḳaṣr al-Madjāz (*Geogr. d'Aboulféda*, transl. Reinaud, ii/i. 185; Ibn Khaldūn, *loc. cit.*), or Ḳaṣr al-Djawāz "Castle of the crossing" (Ibn Abī Zarʿ, *Rawḍ al-Ḳirṭās*, ed. Tornberg, p. 138, 143, 146). The Almohads erected important buildings in it and established naval dockyards there. But the prosperity of the town declined in proportion as the rulers of the Maghrib lost their hold on Spain. Deprived of the income which the transport of the armies had assured them, the inhabitants turned to piracy. Al-Ḳaṣr therefore became one of the first towns that the Portuguese sought to capture. In 1458 King Alfonso V attacked it with a fleet of 30 ships and an army of 17,000 men; after repelling

two assaults, the Muslims, overwhelmed by the Christian artillery, capitulated. They were, however, granted permission to retreat with their arms and baggage. Alfonso V entered the town on Oct. 19, 1458. The great mosque was turned into a church, the fortifications were strengthened and a garrison installed under the command of Don E. de Meneces. Two attempts made by the Sulṭān of Fās in 1458 and 1459 to recapture the town did not succeed. In 1463 the tribes of Andjera recognised the suzerainty of Portugal and in 1471 Sulṭān Mūlāy Saʿīd signed a treaty by which he ceded al-Ḳaṣr to the king of Portugal.

Al-Ḳaṣr remained in Christian hands till 1540 but during this period it was continually being attacked by the Moors. John III therefore decided to evacuate it after previously dismantling it. Some years later (1550) a French prince, Antoine de Bourbon, king of Navarre, obtained al-Ḳaṣr in exchange for the men-at-arms that he was to supply to the Sharīf of Fās but the intrigues of the king of Spain, Philip II, prevented the treaty from being carried out. Since that date no attempt has been made to rebuild the town. The inhabitants abandoned it and the harbour became silted up and no longer used except by smugglers. The site is marked by the ruins, still imposing, of the Portuguese fortress, by ditches, the remains of the wall and the ruins of the gate through which the citadel communicated with the town proper.

(G. YVER)

ḲAṢR-I SHĪRĪN, a town in the south-western part of the district of Ardilān or Persian Kurdistan (cf. ARDILĀN) in 34° 30′ N. Lat. and 45° 30′ E. Long. (Greenwich) on the right bank of the Ḥulwān-rūd or, as the Kurds call it, the Alwān or Alwand. This river alters its course, hitherto east to west, at Ḳaṣr-i Shīrīn to a southerly one and enters the Diyāla [q. v.] at Zengābādh. To the west and south-west of Ḳaṣr-i Shīrīn lies the great range of Agh-Dagh, to the S. E. also on the left bank of the river run imposing mountain chains. Ḳaṣr-i Shīrīn was an important caravan station from the earliest times. The most important route through it is the very old road from Baghdād to the Īrānian highlands — the *Ṭarīḳ Khurāsān* of the Arabs of the middle ages (cf. above, i. 928a). Ḳaṣr-i Shīrīn lies about halfway between the two stations of Khāniḳīn [q. v.] in the south-west and Sar-i-pul (in mediaeval times Ḥulwān, S. of Sar-i-pul; see SARPUL-I ZOHĀB) in the east. Less important roads also branch off here to north, north-west and south-east.

The modern Ḳaṣr-i Shīrīn (1600 feet above sea-level) is an insignificant town surrounded by a wall of earth and stone. Outside the walls on the east is a commodious caravanserai; to the west is a fort of modern style which, according to Aubin (*op. cit.*; see the *Bibl.*), Djowān Mīr built at the beginning of the xixth century and plundered passing pilgrims to Kerbelā and merchants from it until he was captured and killed. The population of the town, which de Morgan estimated at 3,000—6,000, is Kurdish. Shāh ʿAbbās I (1587—1628) transplanted to the region of Ḳaṣr-i Shīrīn to guard the Turco-Persian frontier 900 families of the Kurdish tribe of Sandjābī (on which see Rawlinson in the *J. R. G. S.*, ix. 33; for a Lur branch of this tribe cf. Rabino, *Les Tribus du Louristan*, Paris 1916, p. 17). A Kurd chief acts as Persian governor of Ḳaṣr-i Shīrīn. Since the beginning of the xxth century there has been a small customs house here. Opposite the town on the left bank of the river lies the Bāgh-i Shāh = "King's Gardens", a park laid out with date palms, orange and pomegranate trees by Naṣr al-Dīn Shāh on the occasion of his pilgrimage to Kerbelā.

The most remarkable feature at Ḳaṣr-i Shīrīn, which makes it one of the most interesting places in Persia to the historian or archaeologist, is the extensive system of ruins dating from the Sāsānian period in its vicinity. The name Ḳaṣr-i Shīrīn, "Shīrīn's Palace", dates from the later period of the Sāsānian empire. Shīrīn, a Christian, was the favourite wife of Khusraw II Parwēz (560—628) who called the great palace built by him as a summer residence after her. Ḳaṣr-i Shīrīn and the neighbourhood was the scene of the unhappy love-story of Shīrīn and the royal architect Farhād, which plays a great part in the romantic poetry of Persia; cf. above, ii. 67, and Justi, *Iranisches Namenbuch*, Marburg 1895, p. 102b. A rock tomb south of Ḳaṣr-i Shīrīn, for example, is popularly known as Uṭāḳ-i Farhād = "Farhād's chamber"; see Sarre and Herzfeld, *Iranische Felsreliefs*, p. 10. The famous lute-player, Bārbad (on him see Vullers, *Lexic. Persico-Lat.*, i. 168, and Justi, *op. cit.*, p. 63) also spent some time at the imperial court at Ḳaṣr-i Shīrīn; he also plays an important part in the cycle of legends which centre round Khusraw Parwēz. Among the 30 melodies or songs which he composed for the king (see the list of them in Vullers, *op. cit.*, ii. 369) there is one (No. 4 in Vullers) entitled *Bāgh-i Shīrīn* = "Shīrīn's Garden"; another (No. 30 and cf. also Vullers, ii. 1299b) is entitled *Nakhchīrgānī* = "Hunting Song", probably the *Bāgh Nakhchīrgān* in Yāḳūt, iv. 113, 14. Both songs obviously refer to Ḳaṣr-i Shīrīn, the summer-residence and hunting-palace of the Sasanian ruler.

The period of Ḳaṣr-i Shīrīn's glory was only a brief one. Ten years after the death of Khusraw II the Sāsānian empire collapsed before the onrush of the Arabs and in the Muslim period the palaces of Ḳaṣr-i Shīrīn seem to have been no longer inhabited. They fell quickly into ruins, mainly as the result of the poor quality of the building-material used. Al-Yaʿḳūbī (*B. G. A.*, vii. 270) as early as 278 (891) talks of the ruins. Ibn al-Athīr (ed. Tornberg, viii. 388) mentions

that as a result of an earthquake in 345 (956) the walls of Ḳaṣr-i Shīrīn cracked. The Arab and Persian authors, like Ibn Rosteh, Yāḳūt, al-Ḳazwīnī and Ḥamd Allāh Mustawfī, emphasize the great scale of Ḳaṣr-i Shīrīn with its halls, hermitages, treasure houses etc. and the splendid gardens containing very rare animals roaming at large in them, but give no detailed descriptions. Yāḳūt and al-Ḳazwīnī give especially the story of the origin of the palace, which the former (*Muʿdjam*, iv. 115) actually regarded as one of the wonders of the world.

We owe the most accurate description of the modern ruins to the French expedition of J. de Morgan. The main ruins lie on a broad plateau N. E. of the modern town. Near the latter is the quadrangular citadel of Khusraw flanked by 6 round towers (called Ḳalʿe or Ḳaṣr-i Khusraw, also Ḳalʿa-i Khusrawī) surrounded by a ditch. Built as barracks for the ruler's troops, we have preserved in it one of the rare perfect examples of the military architecture of the Sāsānians. North of the Ḳalʿe are further mounds of ruins the object of which we do not know. About 500 yards to the N. E. we reach the wall of a gigantic park in shape a not quite regular oblong, enclosing the summer-residence proper of the king, measuring, according to de Morgan, 300 acres. The wall round it which also served as an aqueduct, the highest part of which reaches 20 feet, is about 6,000 paces in extent. Another aqueduct-wall divides the park into two parts. The requisite water for the irrigation of the gardens was brought from the Ḥulwān-Rūd and, as already observed, led farther along the top of the miles' long surrounding wall; the aqueduct can still be traced in the Ḥulwān-Rūd valley until it is lost in the maze of ruins of Ḥawsh Kurī. In the centre of the whole scheme is the main palace, now called ʿAmārat-i Khusraw (= house of Khusraw) or Ḥādjdjī Ḳalʿe-sy (= pilgrim palace). It is a vast building lying east to west (1080 feet long, 625 feet broad) with vaulted rooms and a long terrace in front which is still most imposing with its huge dimensions and colonnades. Before the palace still exists a 600 yards long stretch of the aqueduct flanked by two kiosks. West of the ʿAmārat-i Khusraw stands a smaller similar vaulted building with 4 doors and a square principal chamber. It is now called *Čahār Ḳapu* or (pure Persian) *Čār Darwāza* = "Four Doors", or *Ḳalʿa-i Čahār Ḳapu* = "Palace of the 4 Gates". The object of this building (perhaps for audiences?) is obscure.

About 3 miles E. of Ḳaṣr-i Shīrīn is another late Sāsānian ruined palace, called *Ḥawsh Kurī* = "House of the Horses" (so the name is explained: *kur* = probably Pers. *kurrah*, *kurāh* = colt; Rich gives the name *Ḥawsh Kerek*), because it is popularly believed to contain the stables of the horses belonging to the palace of Ḳaṣr-i Shīrīn. These ruins which consist of a palace 600 feet long with annexes and another mound of ruins are the latest of all the palaces of Parwēz so far known.

Ḳaṣr-i Shīrīn is, of course, a town of much greater antiquity than the time of this Sāsānian king. A site so favoured by nature must always have invited settlement. So far it has not been ascertained what ancient city — which must have practically occupied the site of the present town — stood here. It was still thought — *e.g.* by Malcolm, Kinneir, Ker Porter — that Dastadjird was here, but this is certainly to be located in the ruins of Eski Baghdād (cf. above, i. 926). This erroneous identification was previously attacked by Buckingham, Rich (see *Bibl.*) and Ritter, ix. 484, 509. The ancient Artemita, a town of Appoloniatis, has also been suggested — *e.g.* by Kinneir (see *Bibl.*) —; but this is much better located in the region of the later Dastadjird [q. v.]; and Herzfeld in Sarre-Herzfeld, *Archaeol. Reise im Euphrat- u. Tigrisgebiet*, ii., Berlin 1919, p. 78. Herzfeld, *op. cit.*, ii. 329, suggests with all reserve an identification of Ḳaṣr-i Shīrīn with the station Danas of the *Tabula Peutingeriana*; but see against this view my article DANAS in Pauly-Wissowa, *Realencykl. der klass. Altertumswiss.*, Suppl., i. 337. Ḳaṣr-i Shīrīn has not the slightest connection with Kinkiwar or Ḳaṣr al-Luṣūṣ, although there was a great palace built by Khusraw Parwēz there also (cf. on this G. Le Strange, *op. cit.*, p. 188; Schwarz, *Iran im Mittelalter*, p. 494 *sq.*): the latter place lay much farther east between Kirmānshāh and Hamadhān. This corrects Caetani, *Annali dell' Islām*, v. 17, vi. 144 (where Ḳaṣr-i Shīrīn and Kinkiwar are regarded as one and the same).

There is a village 12 miles north of Ḳaṣr-i Shīrīn called Kend-i Shīrīn. A short hour's journey above it are some oil-wells, not, however, very rich, which form part of the Anglo-Persian Oil Company's concession. On them see de Morgan, *op. cit.*, ii. 81 *sq.*, and Schweer, *Das türkisch-persische Erdölvorkommen*, Hamburg 1919, p. 21, 40, 110, 112, 143—144.

Down to the Great War the Turco-Persian frontier, which was not minutely defined, ran about two hours' journey S. W. of Ḳaṣr-i Shīrīn. On the Persian side the frontier was guarded by the fort of Ḳalʿe-i Sebz where a detachment of Sandjābī cavalry was stationed (cf. Aubin, *op. cit.*). On the place see also Rich, *op. cit.*, ii. 263 (where it is wrongly called Kalai Sebz; Buckingham calls it Khallet el-Subzy). An hour's journey beyond it is the Turkish frontier-station Ḳalʿe Keldiyya.

KASRA, lit. "break"; name of the sign of the vowel i; the vowel itself is called *kasr*.

AL-ḲASṬALLĀNĪ, ABU 'L-'ABBĀS AḤMAD B. MUḤAMMAD B. ABĪ BAKR AL-KHAṬĪB SHIHĀB AL-DĪN AL-SHĀFI'Ī, an authority on tradition and theologian, born on Dhu 'l-Ḳa'da 12, 851 (January 20, 1448) in Cairo where he spent his life as a preacher — apart from two stays of some duration in Mekka — and died on Friday, Muḥarram 7, 923 (January 31, 1517). He owes his literary fame mainly to his exhaustive commentary on the *Ṣaḥīḥ* of al-Bukhārī entitled *Irshād al-Sārī fī Sharḥ al-Bukhārī*, which exists in numerous MSS. and printed copies; of these latter the earliest may be that of Būlāḳ of 1267 and next the Lucknow edition of 1869 (others in Brockelmann, *Geschichte der arabischen Litteratur*, i. 159). The Cairo edition in 1325/6 gives the glosses of Yaḥyā al-Anṣārī and the Cairo edition of 1279 those of Ḥasan al-'Idwī (d. 1303 = 1887). In the field of Ḥadīth he wrote a *Muḳaddima* which was printed at Cairo (n. d.) with the commentary of 'Abd al-Hādī al-Abyārī (d. 1305 = 1883). Great popularity is enjoyed in the Muslim world by his history of the Prophet entitled *al-Mawāhib al-ladunīya fi 'l-Minaḥ al-Muḥammadīya*, which he completed on Sha'bān 15, 899 (May 22, 1494) and which caused him to be accused of plagiarism by al-Suyūṭī. It exists in numerous MSS. and has also been printed several times, e.g. Cairo 1281, several times commented on, e.g. by al-Zurḳānī (d. 1122 = 1710), printed in 8 vols. Būlāḳ 1278, 1291, and translated by 'Abd al-Bāḳī into Turkish, printed Stambul 1261. Not long ago al-Nabhānī, the President of the Court of Justice in Bairūt, prepared a synopsis of it entitled *Al-Anwār al-Muḥammadīya min al-Mawāhib al-Ladunīya*, Bairūt 1310—1312. Finally in the same field he prepared a commentary on the *Kitāb al-Shamā'il* of al-Tirmidhī (*Geschichte der arab. Litt.*, i. 162). Besides studying the science of tradition he worked also at the readings of the Ḳur'ān. His principal work on the subject is entitled *Laṭā'if al-Ishārāt li-Funūn al-Ḳirā'āt*. He also wrote a biography of the teacher of Ḳur'ān reading, Abu 'l-Ḳāsim al-Shāṭibī (*G. A. L.*, i. 409), and a commentary on the *Muḳaddima* of al-Djazarī on *Tadjwīd* (*op. cit.*, ii. 202). Finally he also wrote on mysticism and personal piety; among his works in this sphere are his *Maḳāmāt al-'Ārifīn*, *Masālik al-Ḥunafā' ilā Mashārī' al-Ṣalāt 'alā 'l-Nabī al-muṣṭafā*, and his commentary on the *Burda* of al-Būṣīrī (*G. A. L.*, i. 265).

Bibliography: 'Alī Bāshā Mubārak, *al-Khiṭaṭ al-tawfīḳīya*, Būlāḳ 1306, vi. 11; Wüstenfeld, *Die Geschichtschreiber der Araber*, Nº. 500; Brockelmann, *Geschichte der arabischen Litteratur*, ii. 73. (C. BROCKELMANN)

ḲASṬALLĀNĪ (KESTELI), MUṢLIḤ AL-DĪN MUṢṬAFĀ, Ottoman theologian and Ḥanafī jurist. Mewlānā Muṣliḥ al-Dīn was a native of Kestel (from Latin *Castellum*), a village not far from Brussa, where in after life he built a mosque. From his native place he took the name of Kesteli or, more impressive, Ḳasṭallānī. In his youth he attended in Brussa the lectures of the celebrated theologian Khiḍr Beg and on the conclusion of his theological and legal studies was appointed teacher in various medreses, for example in Maḍurna, Demotica (medrese of Urudj Pasha), and finally "guardian". Next he was for some time ḳāḍī of Brussa, Adrianople and in 886 (began March 2, 1481) of Stambul, but in the same year was appointed military judge of Rumelia with the rank of a fourth vizier. He was the first to hold this office separately: it had previously been combined with that of military judge of Anatolia (cf. the art. ḲĀḌĪ-'ASKER). At the same time Ḥādjdjī Ḥasanzāde Meḥmed Efendi was appointed the first independent military judge of Anatolia (cf. J. von Hammer, *G. O. R.*, ii. 246). In 891 (1486) he was deprived of his office. He died in 901 (1495—1496) in Stambul where he was buried in the cemetery of Eyyūb. — The Ḥanafī Ḳasṭallānī composed a number of legal works in Arabic including highly esteemed marginal glosses on the commentary of al-Taftāzānī on the *'Aḳā'id* of al-Nasafī (cf. Ḥādjdjī Khalīfa, *Kashf al-Ẓunūn*, iv. 226, as well as Brockelmann, *G. A. L.*, i. 427, which, however, belongs to ii. 196; MSS. in Berlin, Nº. 1973, and Leiden, Nº. 1998) as well as an essay on seven doubtful matters (*Ashyā'*) in al-Djurdjānī's commentary on al-Īdjī's *Kitāb al-Mawāḳif fī 'Ilm al-Kalām* (Ḥādjdjī Khalīfa, vi. 240), also a work *Taufīḳ al-Ma'ālim* (Ḥādjdjī Khalīfa, ii. 442), an essay on the orientation of the Ḳibla (*Risāla fī Djihat al-Ḳibla*; cf. Ḥādjdjī Khalīfa, iii. 387) and lastly a work called *Yaḳẓān Dhawī 'l-I'tibār* (cf. Ḥādjdjī Khalīfa, vi. 512).

Bibliography: Tashköprüzāde, *Shaḳā'iḳ al-Nu'mānīya*, Turkish ed. by Medjdī, p. 161 sq., Stambul 1269; *Sidjill-i 'Othmānī*, iv. 491 sq.; 'Āshiḳpashazāde, *Tārīkh*, p. 224, Stambul 1332. (FRANZ BABINGER)

ḲASṬAMŪNI (in the Arab geographers — Abu 'l-Fidā', al-Dimashḳī, Ibn Baṭṭūṭa —, Ibn Bībī and on the coins Ḳasṭamūnīya with variants; al-Idrīsī, ed. Jaubert, ii. 312: Ḳasṭamūnī; ibid., p. 393: Tāmūnī; the Κασταμών of the Byzantines, in Chalcocondylas, corresponding to the oriental form, Κασταμόνα, Κασταμονή; corrupted in various ways by Western writers: Albertus Aquensis: *civitas Constamnes*; Clavijo: *Cestamea*; Benedetto Dei: *Chattarmine*, *Castimunu*; Menavino: *Castemol*; with modern Greeks and Europeans: *Kastamboli*; cf. Leunclavius, *Hist. Musulm.*, col. 313, 40), a town in N. W. Asia Minor, capital of the wilāyet of the same name, which corresponds to the ancient Paphlagonia. The town is not mentioned in classical literature although the rock tombs there show that the place was settled in historical times. In the middle ages Ḳasṭamūnī was famous as the family stronghold of the Comnenoi, who waged a desperate warfare with the Dānishmand-oghlu and the Saldjūḳs for its possession until it was finally lost to the Byzantines about the middle of the xiith century A. D. The town then passed, along with the other possessions of the Dānishmand-oghlu, under the sway of the Saldjūḳs of Ḳonya and formed a beylerbeylik, which was hereditary in the family of Ḥusām al-Dīn Čobān. On the break-up of the Saldjūḳ

empire, the Turkoman Isfandiyār-oghlu of Adani seized the region of Ķastamūnī and made the town their capital. It was taken from them by Bāyazīd I in 795 = 1392/3 but restored to them by Tīmūr after the battle of Angora (804 = 1401/2) and remained in their possession till they were ousted by Meḥemmed II (864 = 1459/60). Henceforth Ķastamūnī formed a sandjak of the eyālet of Anadolu, in more recent times a wilāyet, which besides the so-called merkez sandjaķ included the sandjak's of Bolī, Kianghrī and Sināb (Sinope). The Ķastamūnī of the early Isfandiyār-oghlu is described by Ibn Baṭṭūṭa (ed. Paris, ii. 341 sqq.); Chalcocondyles (xvth century) calls it a "flourishing and strongly fortified town" (p. 260, Bonn edition); the description in Ḥādjdjī Khalīfa's *Djihān-numā* (p. 648 of the first edition) dates from the beginning of the xviith century. Ķastamūnī was first visited by European travellers in the beginning of the xixth century, first of all by Kinneir in 1814.

The erstwhile family stronghold of the Comneni with its Byzantine and Saldjūķ fortifications was abandoned and left to fall into ruins after the Turks had maintained a garrison and artillery in it down to a century ago. There are no antiquities in existence that date from the classical period but numerous buildings survive from the times of the Saldjūķs and Isfandiyār-oghlu. The town contains no less than 62 large or small mosques (*djāmi'* and *mesdjid*), 16 medreses, 12 dervish monasteries, 4 libraries and 30 tombs of saints. The oldest dated building is the tekiye of the Rifā'ī (called Yilanli Tekiye) of the year 671 = 1272/73; from the same period dates a mosque built in 672. The following are also worthy of special mention: — the Djāmi''s of Ghāzī Atābeg with medrese, of Ḥādjdjī Naṣr (of the year 754 = 1353/54), that of Khwādja Ṣalāḥ al-Dīn (of the year 806 = 1403/1404), and of the last Isfandiyār-oghlu, Ismā'īl Beg, dated 855 = 1451/52, but these monuments have not yet been scientifically examined. They bear witness to the way in which the former lords of the land fostered Muslim culture; Ismā'īl Beg himself, after his dispossession, composed a much esteemed theological work, the *Ḥulwiyyāt-i Sulṭānī* (cf. Rieu, *Cat. Turk. MSS.*, p. 12 sqq.). Laṭīfī [q. v.], the biographer of poets, belonged to Ķastamūnī. Ḥādjdjī Khalīfa calls Ķastamūnī the "lofty citadel" (*ḳal'a*) of the Turkomans and the dialect of Turkish spoken there still survives. The population of the town was estimated at about 30,000 including 1500 Turkish speaking Greeks and 500 Armenians but the latter may have emigrated since the war.

(J. H. Mordtmann)

ĶASTĪLIYA, the name given by Arab writers to the district of Tunisia adjoining the Shaṭṭ's and to Tawzer, the most important area in Tunisia. Its boundaries are rather difficult to determine. The descriptions by Ibn Ḥawḳal and al-Idrīsī refer only to the town of Ķasṭīliya. Al-Bakrī, on the other hand, distinctly distinguishes between the town and the district. "The land of Ķasṭīliya", he says, "contains several towns, such as Tawzer, al-Ḥamma and Nefṭa. Tawzer, which is its metropolis, is a large town". In another passage he refers to Tawzer as marking the eastern limit of the land of Ķasṭīliya. 'Abd al-Wāḥid al-Marrākushī opposes the land of Ķasṭīliya, "formed by Tawzer and the cantons attached to it" to the "Zāb, which includes Biskra and its dependencies". Ibn Khaldūn (*Histoire des Berbères*, ed. de Slane, i. 646; transl., iii. 156) includes among the dependencies of Tawzer the "cantons" of Ķasṭīliya, to the south of the Shaṭṭ al-Djarīd and Nefzāwa. The same indications are given by al-Zarkashī. Ibn Khaldūn (*op. cit.*, i. 122; transl., i. 192), on the other hand, seems to identify the Bilād al-Djarīd with the land of Ķasṭīliya. After enumerating among the towns of the Bilād al-Djarīd, Nefṭa, Tawzer, Gafsa (Ḳafṣa) and the places in Nefzāwa, he adds: "All this country is called the land of Ķasṭīliya." The Shaikh al-Tidjānī, in his turn, applies to Tawzer the description "capital of al-Djarīd". From the fifteenth century onwards, we no longer find the terms Ķasṭīliya and land of Ķasṭīliya as the name of a district or of a town, but only those of Tawzer and Djarīd, still in use at the present day. The enumeration of the towns of Africa given by al-Ḳairawānī (*Kitāb al-Mu'nis*, transl. Pellissier and Rémusat, p. 28) in which Ķasṭīliya is mentioned is probably taken from an earlier writer. In brief, the land of Ķasṭīliya seems to correspond very well with the present Djarīd, i. e. to the group of oases (Nefṭa, Tawzer, al-Udyān and al-Ḥamma) occupying the isthmus which separates the Shaṭṭ al-Djarīd from the Shaṭṭ al-Gharsa and perhaps to al-Nefzāwa.

The Arab authors are unanimous in praising the wealth of the land of Ķasṭīliya. The cultivation of dates and other fruit-trees, watered with great care, was very flourishing there. Flax, indigo and *ḥinnā'* were also grown. The fields of sugar-cane, noticed by Ibn Ḥawḳal, were beginning to disappear by the time of al-Bakrī and soon afterwards vanished. Commerce was active and prosperity general. In the time of al-Bakrī the taxes of this area amounted to 200,000 dīnārs a year.

The population was composed for the most part of Berbers, many of whom professed Khāridjī doctrines or, as at Nefṭa, Shī'a doctrines. Al-Muḳaddasī (*Bibl. Geogr. Arab.*, iii. 243, 11 sqq.) and al-Bakrī mention that cynophagy was practised among them. According to al-Tidjānī, there lived alongside of the Berbers the descendants of the Rūm, who occupied this region at the Muslim conquest. When this Shaikh visited Tawzer the remains of Christian churches were still to be seen. Ibn Khaldūn (*op. cit.*, i. 646—647; transl., iii. 156) says that there were in al-Nefzāwa and the land of Ķasṭīliya people of Frankish origin, whose ancestors had come from Sardinia and settled in the country as tributaries of the Muslims to whom they paid poll-tax.

ḲĀT, ḲĀT (A.), ČAT, (Amharic, Galla), ČATO (Kaffa), is the name of a smooth-stemmed shrub, of the family of Celastraceae (represented in Central Europe by the spindle-tree: *Catha edulis, Forskål* [or *methyscophyllum glaucum, Ecklon et Zeyher*]), reaching a height of 12 feet, which is found in East Africa from Cape Colony to north of Lake Tānā (Ṣānā) and in the Yemen. The leaves are called *kafta* in Arabic. These and the skins of the young shoots contain an alkaloid, *katin*, which accounts for the stimulating or intoxicating effect of these parts of the plant (or a decoction made from them) and the widely spread use of *ḳāt* in the Muslim lands of Abyssinia and South-West Arabia.

In Abyssinia, as well as in S.-W. Arabia, the leaves and young shoots of the *ḳāt* are chewed; more rarely a decoction is used, which is either taken as "tea" or added to the Abyssinian honey-wine (Amharic *madjar*). The most esteemed are the tender shoots and young leaves which have a pleasant, sweetly aromatic flavour and are merely stimulating and anti-soporific and slightly intoxicating only in large doses, while the older tough leaves are unpleasantly astringent and have a much stronger effect. All accounts agree that the use of *ḳāt*, as ordinarily taken, which has become regular in all classes of society in the Yemen, undermines the physical and moral health of the people and also does the greatest damage from the economic point of view.

As a result of the enormous consumption of *ḳāt* leaves (about 30,000 tons are exported annually from Abyssinia and the adjoining countries) the cultivation of the shrub, which is propagated from cuttings, is very important. In the Yemen, Djabal Ṣabir, Djabal Raima and 'Udēn are mentioned as the centres of its cultivation. The *ḳāt* twigs, which are not plucked till the plant is in its fourth year, are tied in bundles for transport (Arabic *ḥalwat*, pl. *ḥalāwit*) and, in order to keep them fresh as long as possible, are bound up in moist, leafy branches and banana leaves.

Ḳāt is first mentioned in "The Military Exploits of the Ethiopian King 'Amda Ṣeyōn against the Muslims" of the year 1332/33, which puts the following words into the mouth of 'Amda Ṣeyōn's opponent, King Ṣabr al-Dīn: "I will make ..... his royal palace Mar'ādē (Arabic Mar'ada) my residence and plant *ḳāt* there." Al-Maḳrīzī († 846 = 1442) mentions the *djāt* as a plant found in Awfāt (Ethiopic Ifāt, in Eastern Shoa [Shawa]), the leaves of which are eaten. The Shaikh 'Abd al-Ḳādir al-Djazīrī, who wrote in 996 (1587), says that 'Alī b. 'Umar al-Shādhilī (al-Mukhā'ī, † 827 = 1424), as is still said in West and South Arabia, introduced coffee into the Yemen, which took the place of *kafta*, i. e. the *ḳāt* leaves, previously in use. Ibn Hadjar al-Haitamī († 974 = 1567) wrote at the instigation of people from San'ā' and Zabīd a treatise in which he, without taking up a definite attitude to the contradictory opinions of reputable scholars regarding the effects of the *ḳāt*, includes the enjoyment among the *shubuhāt*, from which one should refrain. Among European travellers Niebuhr and his botanist collaborator Forskål give the earliest accounts of our plant and its use.

ḲAT' (A.), a cut. The Arabic verb *ḳaṭa'a* has, as the dictionaries show, undergone a remarkably varied development of meaning both in its original and metaphorical senses. Here we only deal with cases which are of importance for the history of religion, etc.

The infinitive form *ḳaṭ'* is not found in the Ḳur'ān but the verb occurs in the literal meaning (Sūra v. 42: "cut off the hands of a thief, male or female" — the well-known law adopted in the Fiḳh, sometimes briefly known as *Ḳaṭ' al-Liṣṣ* —) and in a more metaphorical sense (Sūra ii. 25 and xiii. 25: "cut asunder what God hath ordered to be bound together").

The old reciters of the Ḳur'ān (*ḳurrā'*) gave the name *ḳaṭ'* or *waḳf* to a pause in reciting whether required by the sense or for another reason. Later reciters distinguished between the brief pause necessary to take breath and other pauses required by the sense: *ḳaṭ'* was only applied to the first (according to others only to the last).

The grammarians give the name *alif al-ḳaṭ'* to the strong hamza which cannot be elided in contrast to the *hamzat al-waṣl* (cf. the article ALIF). *Ḳaṭ'* is also the deliberate division of a syntactical combination in a sentence for special reasons, e. g. for *al-ḥamdu li'llāhi 'l-ḥamīdi*: *al-ḥamdu li'llāhi 'l-ḥamīdu* (= *wa-huwa 'l-ḥamīdu*) or *'l-ḥamīda* (= *a'nī 'l-ḥamīda*).

In prosody *ḳaṭʿ* means the elision of the end of certain feet, e.g. the abbreviation of *fāʿilun* to *fāʿil* = *faʿlun* or of *mustafʿilun* to *mustafʿil* = *mafʿūlun*. This shortened form is then called *maḳṭūʿ*.

The conic section *ḳaṭʿ al-makhrūṭ* is of importance in mathematics and the varieties are *ḳaṭʿ zāʾid*, the hyperbola, *ḳaṭʿ nāḳiṣ*, the ellipse, *ḳaṭʿ mukāfī*, the parabola and *ḳaṭʿ mukāfī mudjassam*, the paraboloid.

In astrology *ḳaṭʿ* = alcochoden = *ἀναίρεσις* or concisio, *κίνδυνος*, the great danger.

Ḳaṭʿ al-waraḳ, meaning a format of paper, has acquired some importance in the history of administration. According to the Arab accounts, *ḳirṭās* (papyrus-paper was probably not used before the third or fourth century: cf. above, i. 385ᵃ) was used from Muʿāwiya's time for documents in the chancellery of the Caliph and at quite an early date we find five different formats used: (*ḳaṭʿ*) *thulthain* (*al-ṭūmār*, "sheet", called *farkha* at a late date in Mamlūk Egypt), *niṣf*, *thuluth*, *rubʿ* and *sudus*. The chancellery of the Caliphs in Baghdād had its own formats different from those used in Syria and even after Cairo had become the capital of the Caliphs and the chancellery there had adopted the Baghdād formats, forms peculiar to Syria continued to be distinguished. For the Mamlūk period we are most minutely informed by al-Ḳalḳashandī regarding the formats usual in the chancellery of the Mamlūk court in Cairo and those used in the province of Syria. He distinguishes, giving exact particulars regarding the size and particular uses, of nine formats in use in Cairo: *ḳaṭʿ al-baghdādī al-kāmil*, *ḳaṭʿ al-baghdādī al-nāḳiṣ*, *ḳaṭʿ al-thulthain min al-waraḳ al-miṣrī*, *ḳaṭʿ al-niṣf*, *ḳaṭʿ al-thuluth*, *al-ḳaṭʿ al-maʿrūf bi 'l-manṣūrī* (*rubʿ*), *al-ḳaṭʿ al-ṣaghīr* or *ḳaṭʿ al-ʿāda* (*sudus*), *ḳaṭʿ al-shāmī al-kāmil*, *al-ḳaṭʿ al-ṣaghīr* (*min waraḳ al-ṭair*); also four Syrian formats: *ḳaṭʿ al-shāmī al-kāmil*, *ḳaṭʿ niṣf al-ḥamawī*, *ḳaṭʿ al-ʿāda min al-shāmī*, *ḳaṭʿ waraḳ al-ṭair*. The smallest formats were used for the pigeon post. Al-Ḳalḳashandī only gives quite general observations for other countries.

In the history of religion the expression *ḳaṭaʿa yamīnan* meaning "to take an oath", which Pedersen (*Der Eid bei den Semiten*, p. 46; cf. also p. 12, note 3) compares with the Hebrew *kārat berīt*, is interesting. It is perhaps through the influence of this expression that *ḳ-ṭ-ʿ* comes to mean "to settle, to decide", as do verbs meaning "to cut" in other Semitic languages. In logic we find it meaning "to assert something with confidence, to refute someone completely", etc., as e.g. *ʿalima ḳaṭʿan* or *ʿala 'l-ḳaṭʿi* "to be absolutely sure of something", *dalīl ḳaṭʿī* "a decisive proof".

A small Shīʿī sect is called *Ḳaṭʿīya* because it "cuts short" the list of Imāms at the death of Mūsā 'l-Kāẓim.

ḲAʿṬABA, a town in South Arabia. This town, the capital of the district of the same name in Yemen, lies in the Wādī 'l-Djahabān, in the plain between the Djabal Djiḥāf and the Djabal Mirais, in a very fertile area which produces all kinds of cereals, including a particularly noted wheat, and also coffee, ḳāt, tobacco, fruit, including peaches, apricots and winegrapes. The town, the population of which may be estimated at about 1,500, consists of about 100 not particularly well built houses and huts, two mosques, a bath and a bazaar. The Jewish quarter is not important. Its inhabitants are mainly engaged in the manufacture of cloth from the cotton brought from ʿAdan.

(ADOLF GROHMANN)

ḲATABĀN, the name of a country or kingdom and people in S. W. Arabia of whose existence we have evidence from about 500 B.C. to 200 A.D. in the ancient South Arabian inscriptions and in Greek and Roman literature. The oldest records, which at the same time give us the first accurate information regarding Katabānian economic conditions, constitution and laws, have only become known in quite recent years from the hitherto published Katabānian inscriptions in the wealth of material left by E. Glaser. Along with those not exactly numerous epigraphical documents which only give us a few further isolated details of the history of the country and a geographical name or two, the scanty references in Greek and Roman literature, the only source for our knowledge before the South Arabian inscriptions were known, still retain their value for the matter they contain. On a basis of the inscriptional evidence alone one could not obtain an idea of the geographical boundaries of the land, certainly not of the configuration of the ancient kingdoms of South Arabia.

The first known mention of Katabān by the Greeks is found in Theophrastus (about 300 B.C.), *Hist. Plant.*, ix. 4, 2 — the earliest Greek source for South Arabian history —. This passage, however, as the Greek botanist, who was able to use the reports of the various journeys of exploration sent to the Arabian coast by Alexander, was only concerned with districts of Arabia that yielded aromatic plants, tells us nothing more than that Kitibaina (Katabān) and the lands of Saba, Hadramyta (Hadramūt) and a certain Mamali are the South Arabian localities for frankincense, myrrh, cassia and cinnamon. The manuscripts of Theophrastus also give the form Kattabana alongside of Kitibaina. D. H. Müller's suggestion in Pauly-Wissowa's *Realencyklopädie d. klass. Altert.*

s. v. Catabanes and Chatramis, to read Κιτίβαινα in Theophrastus need not be accepted. Glaser wrongly supposed (*Skizze der Geschichte und Geographie Arabiens*, Berlin 1890, ii. 6, 8) that Κιτίβαινα (or, as he incorrectly writes, "Kitibaina") lay on the Persian Gulf.

Later and fuller is the reference to Ḳatabān in the synopsis in Strabo, xvi. 768, of Eratosthenes (end of the third century B. C.), who, in addition to the sources available to Theophrastus, had at his disposal itineraries of seafarers and travellers by caravan in Egypt and Petra. According to this, the Καταβανεῖς, who are given after the Minaeans and Sabaeans in order from north to south of the four principal Arabian peoples and before the Chatramotites (inhabitants of Ḥaḍramōt), whose lands stretched furthest east, dwelled down to the straits and entrance to the Arabian Gulf (πρὸς τὰ στενὰ καὶ τὴν διάβασιν τοῦ Ἀραβίου κόλπου); their capital was Τάμνα. From Strabo's information it may be assumed that the Katabānians in the time of Eratosthenes lived in the part of the west coast south of Saba' and in the western parts of the south coast of Arabia, being the western neighbours of the Sabaeans. From Strabo's account of their lands which refers to the straits of Bāb al-Mandab, it is clear that the boundary for the kingdom in Glaser (*op. cit.*, p. 19), who sought to locate the Ḳatabānians "mainly east of the Djabal Ṣabir" with the Gebanites west of them and the Ḥimyars south of the Ḳatabānians and Gebanites, was not correct. This could have been deduced from the fact that in the time of Eratosthenes the Ḥimyars did not form an independent kingdom (cf. the art. SABA') but belonged to Ḳatabān, which Glaser, who later modified his views considerably, had to confess in his book *Die Abessinier in Arabien und Afrika*, Munich 1895, p. 112. The Γαβαῖοι of Strabo (xvi. 768), the Gebanitae of Pliny (vi. 153), were presumably at this date still a part of the kingdom of Ḳatabān (see the article ΓΑΒΑΙΟΙ in Pauly-Wissowa's *Realencykl.*) and only became independent about Pliny's time and at that time were, it is true, the neighbours of the Ḳatabānians but not on the west, as Glaser supposed, but on the south-east between Ḳatabān and Saba'. The statements in Pliny, *Nat. Hist.*, v. 65, are also in agreement with Eratosthenes, according to which the Katabānians lived in the S. W. of Arabia Felix. From the idea we get of the geography of their lands from Eratosthenes, which is nowhere contradicted, we see the impossibility of the mixture of right and wrong in the location of the four principal kingdoms in Glaser, *Punt und die südarabischen Reiche*, *M.V.A.G.*, 1899, iv/ii., 21, according to which Ḳatabān in the old period was the land south and S. W. of Saba', bounded by N. W. Ḥaḍramōt and later stretching to the straits of Bāb al-Mandab so that it originally included the land of the Ḥimyars and would appear as early as Theophrastus as the immediate neighbour of Ḥaḍramōt on the west. Glaser at the same time also assumed in the passage in Theophrastus the alteration Σαυή in the text (said to be = Shehrīt, Sheḥr, "frankincense coast") for Σαβά, which, however, is wrong (cf. the art. SABA'), and further altered his early views on the frontiers of Ḳatabān (cf. below). That Eratosthenes mentions the Katabānians between Saba' and Ḥaḍramōt and that the Katabānian inscriptions found by Glaser, according to his own words (*Abessinier*, p. 111), "all came from the region between Mārib and Shabwat" (M. Hartmann's [*Die Arabische Frage* in *Der islamische Orient*, vol. ii., Leipzig 1909, p. 169, 1] observation on this statement, that the description of the find-spot of Glaser's inscription Nº. 1693, "which is of Ru'aini provenance", is not in keeping with it, can now be more easily estimated at its true value; cf. the topographical data in N. Rhodokanakis, *Katabanische Texte zur Bodenwirtschaft*, Series 2 [*S. B. Ak. Wien*, 1922, cxcviii/ii., p. 57 *sqq.*]) is, as the expression quoted πρὸς τὰ στενὰ .... κάτω in Strabo shows, not sufficient evidence for the conclusion that the land of the Katabānians was limited to the territory between Saba' and Ḥaḍramōt and does not prevent — neither does another circumstance — the assumption that the kingdom of Ḳatabān surrounded in north and east by Saba', the gradually increasing bulk of which came to include the S. W. corner of Arabia, in the time of Eratosthenes stretched to the N. E. as far as between the Wādī Ḥarīb (S. E. of Mārib) and the Wādī Baiḥān al-Ḳaṣāb. The expression in Strabo καθήκοντες πρὸς τὰ στενὰ etc. ("stretch up to the straits") is quite reconcilable with the assumption that Ḳatabān was not only the land directly on the coast but also stretched into the interior, towards the upper Yāfi'a. — A. Sprenger's view (*Die alte Geographie Arabiens*, Bern 1875, p. 64, 254 *sq.*, 264, 273 *sq.* etc.) that the Ḳatabānians were the Arabian tribe of Ḳuḍā'a was absurd. Obsessed with this view, he recognised the definition of the land of Ḳatabān in Eratosthenes as only correct "in a limited sense". When J. Halévy and J. H. Mordtmann established the identity of the land named Ḳatabān in the South Arabian inscriptions with the similar name of a land and people mentioned by the Greeks and Romans, any linguistic connection of Ḳatabān with Ḳuḍā'a and the localisation of the original nucleus of the Ḳatabān kingdom far to the east (near the Kawr range) were ruled out (see also D. H. Müller, *Die Burgen und Schlösser Südarabiens*, vol. ii. [*S. B. Ak. Wien*, 1881, xcvii/iii.], p. 1028 *sq.*). Nevertheless Sprenger again at a later date in his *Bemerkungen zu Mordtmanns Anzeige von Glasers Skizze* in the *Z.D.M.G.*, xliv. 505, 1, maintained a connection between the names Ḳatabān and Ḳuḍā'a. Relying on the similarity in sound of the Ḳatabān of the inscriptions to the name of the plain of Ḳatāb in the vicinity of Ẓafār (near Yarīm), the later capital of the Ḥimyars, D. H. Müller endeavoured to locate the Ḳatabānians there, assuming that "they exercised their power in the place where traces of their existence have survived in the name of the place and where those who followed them in power had their capital" (*op. cit.*, p. 1029); cf. for this view so early a writer as Ch. Forster, *Historical Geography of Arabia*, London 1844, vol. i., p. lxxx. and 84; K. Müller in the index to his edition of Strabo, p. 769, and Sprenger, *Bemerkungen*, *loc. cit.*

In support of the form of the name Καταβανεῖς against Κατταβανεῖς of most MSS. of the passage in Strabo is the form Καταβανία of the name of the land, a few lines below in the majority of manuscripts in the passage from Theophrastus quoted above, the form quoted below from Pliny, the *varia lectio* in Ptolemy with single *t*, finally also the Arabic original form. The form Καταβανεῖς has influenced the error Κατάβανοι in the MSS.,

an error in copying the equally erroneous Καβά-ναν (and Καβάτανον) of the other MSS. in the note immediately following in Strabo on the capital of the Chatramotitae, the name of which was first restored by Groskurd as Σάββαθα (= Shabwat of the inscriptions) (following him Kramer, Meineke, K. Müller, etc.) On the etymology of the name nothing definite can be asserted. Forster's [(*op. cit.*, vol. i., p. lxxvi., 35, 83 *sq.*, 87, 89, 91 *sq.*, 105, 115; vol. ii. 154) also quoted by K. Müller (*op. cit.*)] connection of the name with the Banī Kaḥṭān and his derivation (i. 83) from *kataba* in the sense of *scribae* or *notarii*, according to Bochart, is simply one of the curiosities with which his book is filled. Even C. Landberg's (*Arabica*, Leiden 1898, v. 62) derivation from *katab* (pack-saddle) in reference to the wealth of the region of Baiḥān al-Kaṣāb in camels, is not exactly probable.

Eratosthenes calls the capital of Katabān Tamna. That the Katabānians had a monarchical constitution like the Minaeans, Sabaeans and Chatramotitae is known from the South Arabian inscriptions. Sprenger, who (*Geographie*, p. 160) identified Τάμνα with Θούμνα in Ptolemy, vi. 7, 37, and (p. 268, 300) consequently sought it between the Sabaean capital Mariaba and Sabatha, the capital of Hadramūt, had, as a result of his preconceived notions regarding the Katabānians, as he himself said (p. 268) "some difficulty in finding the bulk of the kingdom". Of the earlier writers Glaser came nearest to settling the question of the situation of the capital. While, according to his opinion expressed in the *Skizze*, ii. 18 *sq.* (in correction of *Skizze*, i. 48), Tamna was identical "either with Dumnat Ḥaḍā or more probably with Dumnat Khadir.... not very far E. S. E. of (the highest part of) the Djabal Ṣabir on the road from the Turkish frontier-customs-station of Surra (Kaida) to Ta'izz", he later (*Abessinier*, p. 112, 115) said that Tamna' (Timna') of the Katabānian inscriptions was Tamna' in the Wādī Baiḥān al-Kaṣāb and this was not only the Τάμνα of Eratosthenes but the Thomna and Thomala of Pliny and also the Θούμνα of Ptolemy, thus abandoning his idea that the massif of the Djabal Ṣabir was the frontier of the Katabānian kingdom. Of these attempts at identification Landberg (*Arabica*, v. 81 *sq.* [on the land of Ḥarib], especially p. 100) said that Glaser, after looking for Tamna here and there almost found it when in his paper *Zwei Inschriften über den Dammbruch von Mārib* (*M. V. A. G.*, 1897, ii/vi. 58) he wrote à propos of the name Temna' mentioned in the Sirwāḥ inscription (Glaser 1000) "Temna', the former capital Tamna or Thumna of the Katabānians, is in the Wādī Baiḥān". This identification of Glaser's, who (*Abessinier*, p. 112) expressly stated his conviction of the correctness of his location of the Tamna' of the inscriptions, was corrected by Landberg (p. 107 *sq.*) when he fixed the position of the present Timna', the site of the ancient capital of the Katabānians, in the land of Ḥarib in a plain by the Wādī Ablaḥ, a tributary on the left of the Wādī 'Ain, which is bounded in the S. S. E. by the hills of Rokhama, in the S. E. by the Kawīn Al Djenāḥ, in the midst of which rises the hill of Haid Wadjī; the Wādī Wadjī waters the part of the plain called Ṭīn Timna'. Following this, Hommel (*Grundriss der Geographie und Geschichte des alten Orients*, Munich 1904, p. 137 [656]) identified Τάμνα and the town of the inscriptions as Timna', "in a tributary Wādī of Baiḥān al-Asfal S. E. of Mārib". M. Hartmann (*op. cit.*, p. 168) was wrong in objecting to the location S. E. of Mārib "in spite of the view expressed by Hommel with absolute conviction", he sought Tamna' east of Yarīm, on a hypothesis which is quite without foundation. Rhodokanakis (*Die Inschriften an der Mauer von Koḥlān-Timna'* in the *S. B. Ak. Wien*, 1924, cc/ii. 8), identifies Timna', the capital of Katabān, with Koḥlān, by combining mentions in the inscriptions with a study of photographs taken by G. W. Bury, who in 1900 visited Koḥlān (Kaḥlān) on the left bank of the Wādī Baiḥān and took impressions and photographs of inscriptions there for the South Arabian expedition of the Vienna Academy and also gave an account of the ruins. Sprenger, relying simply on the Ptolemaic location for Thomna (between Mariama and Sabatha) had come very near to the identification proposed by Landberg. It may safely be concluded that not only the royal residence but also the original home of the Katabānians lay not far from the frontier of Saba' and the gradual expansion of the tribe of Katabān — now also known from inscriptions — into the kingdom took place towards the S. W. The equation of Τάμνα with Thomna, which Pliny (vi. 153; vii. 63) calls a town of the Gebanitae, proposed by D. H. Müller (*op. cit.*, p. 1028), Mordtmann (review of Glaser, *Skizze*, vol. i., in the *Z.D.M.G.*, xliv. 184), Glaser (*loc. cit.* and *Punt*, p. 57) and Landberg (*op. cit.*, p. 109 *sq.*), has a certain probability in spite of the phonetic difference in the initial dentals of the two names, which we also have between Θούμνα and Τάμνα, which had already been equated by K. Müller (*op. cit.*). But it should be remembered that Ptolemy may have referred two names of similar sound to one place. In favour of the identification of Θούμνα and Thomna we can quote — in addition to the form of the name — Pliny's remark (xii. 63) on the frankincense route. Of the town-names of similar sound in Pliny, it may here be remarked that neither can Thomna, the capital of the Gebanitae, be identical, as Glaser suggests, with Thomala, which Pliny (vi. 154) expressly calls a town of the Sabaeans, nor can Thomala be altered to Thomna, as Mordtmann (review, p. 186) proposed. The latter (*ibid.*) and Hommel (*Die altisraelitische Überlieferung*, Munich 1897, p. 274) assumed that the name of the Katabānian capital and that of the Edomite tribe of Timna' (*Gen.*, xxxvi. 40) were connected.

Strabo's further remark that Καταβανία (var. Κατταβανία, the same form as in Stephanus Byzantinus, s. v.) produced frankincense, has recently been wrongly taken to mean that, according to his authority, frankincense was not found in other parts of South Arabia (cf. the art. ẒAFĀR, below, iv. 6a). Glaser's suggestion (*Skizze*, ii. 26) that there is "obviously some confusion" in Strabo may be met by the statement in Pliny (xii. 69), which is based on authentic information, as well as the corroborative statements of modern travellers, like C. Niebuhr, *Beschreibung von Arabien*, Copenhagen 1772, p. 283, and Th. Bent, *Southern Arabia*, London 1900, p. 77, 91, 254. Glaser himself acknowledges the possibility "that even by the time of Eratosthenes individual Katabānians owned lands in the frankincense areas" (similarly in *Abessinier*, p. 111 *sq.*; previously Sprenger, *Geographie*, p. 264; cf. K. Müller, *op. cit.*); in *Punt*, p. 46 (cf. 50 *sq.*, 57) Glaser speaks of Katabānian suzerainty over the frankincense

country. His deductions (*Abessinier*, p. 112 *sq.*) that Ḳatabān perhaps also had possessions in the African frankincense area and that the whole of Azania belonged to it may be emphatically rejected.

Pliny twice mentions the Ḳatabānians; v. 65: Catabanes (this is the better reading, not Catabanes) Arabes and, in another form, vi. 153: Catapani, a divergence which is probably explained by the use of different sources. According to the first passage (also Solin, ed. Mommsen, Berlin 1895, § 797), they are to be regarded as the possessors of the south-west of Arabia Felix. Glaser (*Skizze*, ii. 291) wrongly says that by Pliny's time there was no longer a Ḳatabānian tribe. He is possibly correct in saying that they and the Ḥaḍramōtites had inherited the southern Minaean territory and could only hold out by continually fighting the Sabaeans. Whether there still was a kingdom of Ḳatabān, as known to Eratosthenes, in Juba's time is doubtful. Glaser (*Abessinier*, p. 114) denied that the Ḳatabānian kingdom was still in existence at the time of Gallus and thought (*Punt*, p. 56) that it no longer existed by 81 A. D. and that the Ḳatabānians "disappear completely from the scene as an independent people" in the first half of the first century B. C. (*ibid.*, p. 48; cf. *Abessinier*, p. 77; for the time of Gallus see D. H. Müller, *Burgen*, ii. 1030). This view must be considerably modified, if only on account of the mention of the Ḳatabānians in Pliny and Ptolemy (see Glaser's own limitation, *Punt*, p. 48, 1). Against Hommel, who (*Grundriss*, p. 139, 142) placed the end of the kingdom of Ḳatabān in the second century B. C. (on this chronology see Glaser, *Abessinier*, p. 115), Hartmann (*op. cit.*, p. 164, cf. 168) said that Ḳatabān does not disappear before 80 B. C. That the references in Ptolemy from the time of Juba refer only to the people of the Ḳatabānians and no longer to the now weakened kingdom, cannot be asserted with certainty. But it may have been included in the Ḥimyar kingdom at the beginning of our era (on the supposed beginning of the Ḥimyar epoch see the art. SABA', below, iv. 8).

This question is bound up with that of the connection between Ḳatabān and the Geb(b)anitae of Pliny (vi. 153, xii. 63, 68 *sq.*, 87 *sq.*, 93), the Gabān of the inscriptions, into the details of which, as they would require a special article, we cannot go here. Sprenger's view (*Geographie*, p. 256, 268, 282) that the Ḳatabānians lived in S. W. Arabia before the Gebanitae and were driven out by them in Juba's time was supported by D. H. Müller (*Burgen*, ii. 1028 *sq.*) (also Glaser, *Punt*, p. 36, 48, 50). In my articles *Gabaioi*, and *Gebbanitae* in Pauly-Wissowa, *Realencykl.*, it has been suggested that the Gebanitae, called Γεβανῖται by Eratosthenes (Strabo, xvi. 768) and therefore known to him alongside of the Ḳatabānians, were settled in Ḳatabān or close to its frontier (for other errors of Sprenger see *ibidem*). Glaser, *Punt*, p. 35, 60, regarded the Gebanitae as a subdivision of the Ḳatabānian people. But it is not quite clear even for the time of Juba whether the Gebanitae are not still to be regarded as neighbours of the Ḳatabānians. D. H. Müller's other considerations are discussed in another connection (see the *Bibliography*). The Gebanitae, like the Ḳatabānians, also became a part of the Ḥimyar kingdom, probably not before Pliny's time. Hartmann's proposal (*op. cit.*, p. 410; cf. 22) to alter *Gebanitae* in Pliny, xii. 63, to *Catabanitae* cannot be accepted. This unobjectionable reading is amply supported against emendation by vi. 153; and besides Pliny never uses the form of the name which Hartmann's conjecture would introduce.

That the *Periplus Maris Erythraei* (cf. the art. SABA', iv. 9), presumably composed between 40 and 45 A. D., does not mention the Ḳatabānians — a fact on which Glaser (*Abessinier*, p. 113) laid stress in support of his view that their kingdom came to an end at an early date — like the non-mention of the Minaeans, means nothing, especially as the much later Ptolemy — and Pliny also — mentions the Ḳatabānians along with the Sabaeans, Minaeans and Chatramotites (vi. 7, 24, Κοτταβανοί [var. Κοταβανοί, vulg. Κοτταβανοί]), i.e. all the four main peoples of South Arabia known to Eratosthenes. This is at any rate an argument against those who hold that the Ḳatabānian people had entirely disappeared from history by the time of Gallus and was therefore a view at first challenged by Glaser. That the Ptolemaic map placed them between the frankincense region and the modern 'Omān is explained to mean they had also lands in the former. The Κιδαβανῖται mentioned in the same passage by Ptolemy were originally considered by Glaser — who wrote their name erroneously "Kittibaner" — (*Skizze*, ii. 4, 6, 8, 268 *sq.*) to be the inhabitants of the Κιτίβαινα of Theophrastus, said to be situated on the Persian Gulf, and regarded them as well as the Κοταβανοί as different from the Ḳatabānians. This was only intended to serve as a basis for his assertion that even by Pliny's time there was no longer a Ḳatabānian tribe (see above). Later (*Abessinier*, p. 111) he abandoned his view that the Ḳatabānians are not mentioned in Ptolemy and (p. 115) conceded the possibility at least that they are the Κιδαβανῖται so that he now took up an intermediate position. On the question of the relation of the two peoples with similar names to one another no definite answer can be given. According to Mordtmann (review, p. 187), they were identical, and it is in fact not improbable that Ptolemy refers to the Ḳatabānians under two different forms of the name, just as in one passage (vi. 7. 10) he calls the people of Ḥaḍramōt Ἀτραμῖται (var. Ἀδραμῖται) and in another (vi. 7, 25, 26), Χατραμωτῖται. The capital of the Ḳatabānians can be recognised in his Θόμνα (Thomna in Pliny). Mordtmann was wrong in his view that Ptolemy erroneously — as a result of different estimates of the distance — had given Thumna twice (31 and 37) in his map.

The mentions of Ḳatabān in the later literature of the Greeks are of no value, such as Dionysius Periegetes, ed. K. Müller, verse 959, who — perhaps from the geographical didactic poem of Alexander Lychnus of Ephesus — in the phrase ἀγχίγυοι Κλεταβηνοί rightly describes the Ḳatabānians as neighbours of the Sabaeans mentioned just before. This mutated form is a misreading of ΚΑΤΑΒΗΝΟΙ of the original source; it appears also in the Latin paraphrasers of Dion. Periegetes and as Cletabis in the Geographer of Ravenna, ed. Pinder-Parthey, Berlin 1860, ii. 7.

The references to Ḳatabān in South Arabian inscriptions were down to the last decade of the xixth century very limited, e. g. the Minaean inscription Halévy 504 (= Glaser 1087) in which a Ḳatabānian king is mentioned as a contemporary of Minaean kings, and Fresnel 56 (= Glaser 481)

in which there is mention of a peace between Saba' and Katabān. A deeper knowledge of the past of Katabān was first obtained from the rich finds of inscriptions made by Glaser, who, in his fourth journey to South Arabia (1892—1894) before which no Katabānian inscription had been known, brought back squeezes of about 100 Katabānian inscriptions, one particularly remarkable result of his journey of exploration. Hommel's conjectural dating of these inscriptions "from about 1000 B.C. to the end of the Katabānian kingdom (2nd century B.C.)" (*Grundriss*, p. 139) is too early in both its limits. The beginning is not earlier than that of the Minaean kingdom (see the art. SABA'); on the latter see above. Hommel (*ibid.*) was only able to say further that there were about 18 Katabānian kings' names in these as yet unpublished texts, out of which Glaser had, however, already gathered much valuable information, and that, apart from a few passages in inscriptions which Glaser himself published (e.g. *Punt*, p. 58 [beginning of Glaser 1392]; *Zwei Inschriften über den Dammbruch*, p. 105 [contents of Glaser 1693]) or Hommel utilised for his researches in the history of religions (from Glaser 1599, 1600 and 1604), some of his inscriptions were again squeezed by Arabs, one for the Greek Kallisperis (published by Hommel, *Z.D.M.G.*, 1899, liii. 98 *sqq.*, the first Katabānian inscription made generally accessible), three others for 'Aden, whence they were sent to Paris (publ. by H. Derenbourg, *Nouveaux textes yéménites inédits*, *R.A.*, 1902, v/iv. 117 *sqq.* [N°. ii., iii., iv.; new edition with emendations in the *Répertoire d'Épigr. sém.*, 1903, i., N°. 310 *sqq.*]). Ditlef Nielsen in the *M.V.A.G.*, 1906, xi/iv., published in his *Neue katabanische Inschriften*, a German version of his *Studier over oldarabiske Indskrifter*, Copenhagen 1906, 5 Katabānian texts (Glaser 1600, 1402, 1119, 1581 and one fragment) (which he had received from Glaser) with notes (critically reviewed by O. Weber, *Studien zur südarabischen Altertumskunde*, in *M.V.A.G.*, 1907, xii/ii. 1—22); at the same time Glaser in his *Altjemenische Nachrichten*, Munich 1906, p. 60 *sqq.* and 162 *sqq.*, published the first of these inscriptions and Glaser 1606, of which Nielsen N°. 5 was a fragment. The article following the above mentioned one by Weber was his *Neue südarabische Inschriften* (p. 23 *sqq.*) (Landberg 1—5) (N°. 1 already published by H. Derenbourg in *Nouveaux textes du Yémen* [despatched in 1903] under N°. 3; Landberg 3 is identical with the first third of Glaser 1230 [in Glaser, *Altjem. Nachr.*, p. 147 *sq.*]).

On the basis of the earliest publications from Glaser's papers, research was at once begun on individual problems of Katabānian antiquity. Hommel, for example (*Grundriss*, p. 85 *sq.*, 140 *sq.*), first proposed hypotheses regarding the religious system of the Katabānians. Hartmann gave his views on the constitution, from the important inscription Glaser 1606, and on historical questions (from Glaser 1359/60, 1693 etc.; *op. cit.*, p. 430 *sqq.*; cf. also 184 *sqq.*). It is a noteworthy fact that the kingdom of Katabān appears also in the inscriptions as existing contemporaneously with those of Ma'īn, Saba' and Ḥaḍramūt, just as we find it in Eratosthenes. As regards language, Katabānian is nearer Minaean than Sabaean; Hommel said the Katabānian dialect was practically Minaean. The traces of Sabaean in it are due to contact with the neighbouring people. Weber had already pointed out (*Studien*, p. 2, 63 *sq.*) in the epigraphy certain peculiarities from the few reproductions available to him. It is unnecessary to go further into the details of this earlier literature, especially in view of the comprehensive edition of Glaser's Katabānian inscriptions which is being undertaken by Rhodokanakis (see the art. SABA', iv. 12). The latter had already published in his *Der Grundsatz der Öffentlichkeit in den südarabischen Urkunden* (*S.B. Ak. Wien*, 1915, CLXXVII/ii 33 *sq.*) the Katabānian inscription Glaser 1606, already discussed by Glaser (see above) and Hartmann, (*op. cit.*, p. 431), with very thorough notes; he then published some hitherto unknown inscriptions in *Katabānische Texte zur Bodenwirtschaft* in the *S.B. Ak. Wien*, 1909, CXCIV/ii., namely Glaser 1601, 1602, 1395 = 1604 = N°. 84 of the inscriptions collected by the South Arabian expedition (S.A.E.), Glaser 1412 = 1612 = S.A.E. 81, Glaser 1413 = 1613 = S. A. E. 82; in the already mentioned second series of *Katab. Texte* the three inscriptions Glaser 1396 = 1610 = S. A. E. 83, S. A. E. 48, of which the Kallisperis inscription (see above) forms one part, and Glaser 1693; lastly in the already mentioned treatise *Die Inschriften an der Mauer von Kohlān Timna* the inscription S.A.E. 77 = Glaser 1404 = 1614, S.A.E. 80, 80A = Glaser 1397 *sqq.* and, in elucidation of the title of Mukarrib among the Katabānians, S.A.E. 94 = Glaser 1405, S.A.E. 85 + S.A.E. 60, Glaser 1410, and in the appendix S. A. E. 86; a new edition of S.A.E. 78 *sq.* = Glaser 1605 *sq.* has appeared in *W.Z.K.M.*, xxxi. 22 *sqq.* These publications mark an extraordinary advance not only for the accurate reproduction of the texts of the inscriptions and the very full commentary but also for the systematic investigation here attempted for the first time of problems of law, constitution and economy (see the art. SABA', iv. 12), as well as, for example à propos of the discussion of inscriptions Glaser 1601 and 1693, of details of the earlier history of Katabān; for example, in *Katab. Texte*, i. 26 *sq.*, 34 *sq.* (supplement in *Katab. Texte*, ii. 98 *sq.*) a chronological order is proposed for some groups of Katabānian kings (cf. A. Grohmann, *Katabānische Herrscherreihen* (cf. A. Grohmann, *Katabānische Herrscherreihen* in the *Anz. Wien*, x., 1910, p. 42 *sqq.*; older attempts in Nielsen, *op. cit.*, p. 42; Weber, *Studien*, *op. cit.*, p. 9 *sq.*; Hartmann, *op. cit.*, p. 165 *sqq.*, 601). Our knowledge of the history of ancient South Arabia is for the first time enlarged on many points by a combination of these newly published inscriptions with those already known. We see that certain smaller countries were dependent on Katabān, with which they for some time formed a great power. In Glaser 1396 there is mention of the dependence of the Ma'īn tribe on the leading tribe Katabān. The inscription Halévy 504 (quoted above) shows that Ma'īn was dependent on Katabān. On the other hand, from the Minaean inscription Glaser 485 Ma'īn appears as the vassal of Saba'. Katabān was for some time one of the enemies of Saba'. But in the period after the Sabaean inscription Glaser 418/419, in which Katabān is mentioned along with Ma'īn among the enemies conquered by Saba', it was weakened by Saba'. At the time of the Ṣirwāḥ inscription, Glaser 1000, which mentions a campaign of Saba' in which Katabān was on its side, it had lost political control over considerable territory (cf. Glaser 1600 and

1620). A war lasting many years between Ḳatabān and Saba' (Glaser 481 = Fresnel 56 [see above], Glaser 1693) in the course of which (according to Rhodokanakis' supposition) there was a rupture of the alliance between the two powers ended in a peace. References to Ḳatabān being included in the kingdom of the Ḥimyars may also be gleaned from inscriptions. None of the inscriptions concerned can be definitely dated in a known era, but it is possible to bring some of them into a chronological series relative to one another.

The publication of new material alone will show whether the unsettled problems will be cleared up or remain unsettled.

Bibliography: the books and articles of Glaser, Rhodokanakis, Hommel, Derenbourg, Hartmann, Landberg, Weber, D. H. Müller, J. H. Mordtmann, Sprenger etc. are already cited in the text; reference need only be made here to my article *Saba* (*Realencyklopädie* s. v., esp. coll. 1425 *sqq.*, 1448 *sqq.*, 1457 *sqq.*, 1492 *sq.*).

(J. TKATSCH)

ḲATĀDA B. IDRĪS, ancestor of the Sharīfs of Mekka from the beginning of the 13th century A. D. onwards. In 1201, 1202 or 1203 A. D. he overpowered the then ruling family of the Hawāshim and established his authority in the Holy City. The last Sharīfs of the Banū Hāshim had lived in continual family strife and quarrels. Meanwhile Ḳatāda (for his pedigree cf. Snouck Hurgronje, *Mekka*, i., Stammtafel I between p. 24 and 25 and Stammtafel II between p. 74 and 75) had enlarged his estates from Yanbu' southward in the direction of Mekka, thus preparing his attack on this city. When the Mekkans were out of the town in order to assume the *iḥrām* [q. v.] for the *'umra* on the 27th of Radjab, the commemoration day of Muḥammad's Ascension, he made use of this occasion to establish his power in the town. According to another story, however, his son Ḥanzala captured the town and prepared his father's entry.

Ḳatāda, in contradistinction to the Banū Hāshim, his predecessors in the Ḥidjāz, was a man of political genius, who pursued the idea of founding the independent principality of the Holy Land of Islām. He repaired the walls of the town which had fallen to ruins, captured Ṭā'if and brought the Thaḳīf-tribes under his dominion. He continued the war with the Sharīfs of Medina, built a fortress at Yanbu' and organised his army with peculiar care.

His attitude towards the Aiyūbids, the caliph and the Zaidites of Yaman is to be viewed in the light of his central political idea. He did not suffer manifest signs of any foreign power in his territory, so that relations often became strained and sometimes even ended in open hostility. Nevertheless the caliph once invited him to visit Baghdād. It is said that Ḳatāda started on his journey to the capital, but returned to his own country when he was met by an embassy of the caliph which had in its train fettered lions. Be this legend or fact, this much is certain, that Ḳatāda embodied his idea of the "splendid isolation of Ḥidjāz" in verses which are a typical illustration of his negative attitude towards foreign powers. Probably his encouragement of the Zaidite occupation of Yaman is to be viewed in the same light.

In his last days he undertook an expedition against Medina. Illness, however, induced him to return to Mekka, where he was killed in 1221 by his son Ḥasan, who suspected him of favouring one of his relatives as a candidate for the throne. His descendants were ruling Sharīfs at Mekka, until in 1916 Ḥusain converted the sharīfate into a kingdom.

KATAK (CUTTACK), a district in Orissa [q. v.].

KATANGA, a province in the Belgian Congo.

Geography and History. Katanga is the most southern, richest and least populated of the four provinces of the Belgian Congo. It lies between 5° and 13° 30' S. Lat. and 21° 30' and 30° 30' E. Long. It is bounded on the north by the eastern province and the province of Congo Kasaï, on the east by Lake Tanganika which separates it from the former German East Africa (now under British mandate) and by Northern Rhodesia; in the south by Northern Rhodesia and Portuguese Angola; in the west by Angola and the province of Congo Kasaï. The area is 200,000 square miles, about a quarter of that of the Belgian Congo. Its native population is about a million and a half of Southern Bantus (Balubas, Lundas, Basonge, Bango-Bango, Warua, Watumbwe, Babui, Baholoholo, Kanioka and Batschok), while its white population is about 4,500, of whom the great majority are Belgians, about fifty Dutch, a few English, Americans, French, Italians, Portuguese, Greeks and Scandinavians. In 1922 there were forty-nine Hindus, eight Turks and fifteen Arabs and Zanzibaris. These figures have since been considerably increased.

The province of Katanga is divided into four districts — Upper Luapula, Lomami, Lulua and Tanganika Moero. A number of towns — Elisabethville, Likasi, Albertville, Kongolo, Kabinda, Sandoa and Kambove — have arisen in it as a result of the economic conditions of which we will give a general account below.

We may add that Katanga enjoys a fairly temperate climate, especially south of the tenth parallel, in which the altitude varies from 3,500 to 5,500 feet and that it is well watered by rivers and streams, such as the majestic Lualaba (upper reaches of the Congo river) which runs through it from south to north and is fed by many tributaries of which the most important are the Lubudi, Lufira, Luapula, Luvua, Luvoi and Lukuga, which flow from Lake Tanganika. If the soil of Katanga, which is covered with a forest of more or less dense brushwood, is far from having the great fertility of the immense central depression which constitutes the most extensive part of the Belgian

Congo, and if it does not offer to the fascinated eye of the traveller the imposing beauty of gigantic forests, its soil, on the other hand, possesses wealth immeasurable. It is to the exploitation of this that the economic policy of the Belgian colonisers has been primarily directed.

Deposits of tin are abundantly distributed between Lualaba and Lake Tanganika; two important coal-mines are worked at Albertville and Lucna; aurifeross dykes, pipes of kimberlite and alluvial diamond-bearing deposits have been discovered in various places. Since 1922 the Mining Union has been working an extremely rich deposit of uranium which was found at Shinkolobwe. In 1923, 450 tons were exported which enabled Belgium to produce several grammes of bromure of radium.

But the principal source of the wealth of Katanga is certainly the copper found in profusion in immense deposits worked by the natives before the Belgians came, which the earlier travellers simply could not help discovering. The richness of the ore, the density of which is 14 %, and the intelligent organisation of the industry have enabled 80,000 tons of raw copper to be exported in 1924. This production, like economic development in general, will certainly make new strides ahead when "white coal", the reservoir of hydraulic energy of enormous power abundantly distributed through the province, has been controlled and put at the disposal of industry.

The first **methodical exploration** of Katanga dates from 1890. Famous explorers — Burton, Speke, David Livingstone, H. M. Stanley in the Cameroun, Böhn and Reichard and certain Belgian expeditions of the Association Internationale Africaine, representatives of which — Popelin, Ramaekers, Storms and Becker — founded the stations of M'Toa, Karema and M'Pala on Lake Tanganika — had, of course, visited it previously. But it was only at the end of the nineteenth century, just when Cecil Rhodes was pushing his railway and British influence northwards, that the Congo Free State began to take notice of the urgent necessity of recognising and organising the most southern part of its vast territory. King Leopold II, sovereign of the new state, whose colonial plans did not meet with very great approval in Belgium, to realise this scheme had to have recourse to a private society, the Compagnie du Congo pour le Commerce et l'Industrie, with which he founded the Compagnie du Katanga.

This society was essentially a body for exploration and occupation, whose duties and rights were defined by the convention of March, 1891, which imposed on it the following obligations:

The placing of a certain number of craft on the Upper Congo — the building of stations — giving assistance in the suppression of the slave-trade and the trade in spirits and prohibited arms — the organization of a sufficient police service — the eventual exercise by its agents of the functions of the different branches of government service.

In return it received:

1) Full possession of a third of the lands belonging to the domain of the State, in the part of the valley of the Upper Congo lying to the south of the fifth parallel.

2) The right of exploitation of the soil of the ceded lands for a space of ninety-nine years.

But the division of the lands between State and Company raised serious difficulties and the necessity soon appeared of putting the properties of the contracting parties under joint ownership. There was therefore created in 1900 the special Committee of Katanga to which the State and the Company entrusted the management of their affairs. The resulting agreement provided that "all the advantages or benefits to be gained from the exploitation and all expense, charges and losses would be divided by the Committee in proportion of two-thirds for the State and one-third for the Company; the Committee would further have the most extended powers of administration and alienation without exception or reserve".

A decree of 1910 deprived the special Committee of the delegation of the functions of the executive powers, but made no essential modification in its functions as regards the administration of the patrimonial rights of the State and of the Katanga company.

This is the regime that is still in control; our reason for giving at length the circumstances that brought it into being is that it is at bottom extremely original and that — contrary to what is often thought — the position of the Katanga Committee is totally different from that of great companies like the Chartered Company of Rhodesia, or the British East Africa Company, and of other distant possessions. Nowadays Katanga has made great progress, thanks to the policy of the Belgian government and the activity of private initiative. The railway, which runs from Bukama to Sakania and connects the mining region with Lualaba and with the railways of Rhodesia, has been equipped in a very up-to-date fashion and soon a new line will link it up by the Kasai river with the port of Matadi and the Atlantic Ocean.

Muhammadan penetration, the slave trade and the anti-slavery campaign.

History tells us that even before the Hidjra Arab barques were traversing the ocean between the Red Sea and the Persian Gulf. But it was only when the great Muslim movement had made its immense advance into North Africa and caused the migration on a huge scale of the disciples of the Prophet, that we find the Arabs devoting themselves to the methodical conquest of the lands round the Indian Ocean and building up important sultanates there, of which those of Sofala and Zanzibar have from time to time had bursts of splendour and passed through periods of power and brilliance.

But this power soon began to degenerate and assume a new character. It passed into the hands of traders and exploiters for whom, as Privelle said, "the normal state of society was the choice by them of the most convenient and most remunerative method of exploitation".

It is then that we find chiefs penetrating into the very heart of East Africa where the weak and poorly armed natives offered them no resistance and where they found vast riches, from ivory to human cattle, for whom the American planters and the Asiatic Muslims offered handsome prices.

Setting out from Zanzibar and the coast of Mozambique, the movement reached Lake Tanganika at the beginning of the nineteenth century. It reached Katanga by the bay of M'Toa and spread through the whole of the eastern province by the road from M'Toa to Kabambare and

Kasongo. A regular Arab power extending from the banks of Tanganika to Stanleyville was established by the chief Tippo-Tip and his nephew Rashid.

We know (Stanley and Livingstone have given terrible pictures of it in their works) the horrors which accompanied this invasion and the rapid disintegration of native communities which was produced by the constant wars, flights, endless migrations and continual rupture of the most sacred links of family life. Europe was moved. Cardinal de Lavigerie preached a holy war and on the initiative of Leopold II the civilized nations met in an anti-slavery conference in 1889. War was declared on the chiefs Rashid, Sefu and Kumalisa. While Dhanis was fighting them in the south of the Congo, Commandant Jacques and his lieutenants fought fierce battles with them on the banks of Lake Tanganika, at Katabi, Albertville and M'Tala, which were to liberate for ever the native population from the scourge which had fallen upon them. What influence did this activity of the Muslim world leave upon the Bantu peoples of Katanga?

From the shores of Lake Tanganika to Stanley Falls, we find at the present day negroes who profess Islām. They are called arabicised "wangwana". There is no reason to doubt that the Arabs used to make and still make serious efforts at conversion to Islām; nor is there any reason to doubt that a religion which, like Islām, preaches hatred of the *kāfir* and recommends polygamy is specially suited to attract the natives of Africa.

We must say, however, that if we consider this influence serious in the eastern province, where we have important groups of arabicised natives at Kasongo, Nyangwe, Kirundu and Stanleyville, and if it is revealed as fairly considerable in the residencies of Ruanda and of Urundi (former German districts, now under Belgian mandate) it is perhaps not quite the same in Katanga. For if there are still a few arabicised negroes on the shores of Lake Tanganika and along the old Arab roads, they are really very few in number and their religious education is of the most rudimentary nature. They like to wear a white dress to show their superiority over the other negroes and sometimes perform their *ṣalāt* turned towards Mekka and fast in Ramaḍān, but for the rest they are ignorant and still believe, like their pagan kinsmen, in spirits, witchcraft, superstitions and in the power of malevolent magic.

Is an influence of this kind worthy of the attention of colonising nations? We think so, for one thing is certain, that the arabicisation of the negro very quickly gives him a contempt for the *kāfir* and for European authority and the Muslims do not hesitate to encourage these sentiments.

Alongside of the arabicised negroes there remain in Katanga a certain number of Arabs who have been joined by Muslim Indians. They devote themselves to trading with untiring industry and some of them possess substantial shops, doing a big business and have prospered exceedingly. Indeed, we are at the commencement of a powerful economic offensive, the strength and meaning of which we must try to estimate.

Economic penetration from the East. Dār al-Salām [q. v.] and Zanzibar lying at the crossing of the routes from Europe, Africa and Asia, have become by force of circumstance depots for Asiatic merchandise of all kinds which eastern commerce intends for East Africa, into which they penetrate as a result of the activity and business skill of the immigrant Arabs and Hindus. To give an idea of the importance of this trade, it will be sufficient to consider that in 1922 Bombay and Zanzibar sold in Tanganika Territory (under British mandate) goods worth £ 674,000, the total imports being at most £ 1,386,300 and Great Britain herself participated to the extent of £ 292,000. The goods which reach Katanga by this route are mainly cloths, articles of clothing, blankets and a certain amount of foodstuffs, soap and miscellaneous articles.

As regards textiles, the Hindu and Arab merchants import the most varied kinds, but especially the white cottons called "Americani" and "chader", which sell very well in the markets of Katanga. Not only do the importers attach a great importance to the quality and variety of their goods, but they pay special attention to the measurements of their cloths and pay careful attention to the caprices and changing tastes of a clientèle so fickle as the native population. As a result they were able to import in 1922 at the port of Albertville alone, 18,000 kilograms of chader, 27,000 kilograms of Americani and 8,000 kilograms of cotton printed and dyed, as well as a considerable quantity of blankets and other goods.

Their activity is not confined to imports alone. They also export and it will give an idea of the magnitude of this branch of their trade if we say that a single Arab house in Albertville in 1923 exported almost millions of francs worth of ivory. Several of these firms extend their activity from Zanzibar or Dār al-Salām to Albertville and from Albertville to the Stanley Falls. They have branches in the more important stations and have agents in their service and petty traders who are of great value to them, sober and active, living almost like natives, carrying on business at insignificant expense and thoroughly acquainted with the soul of the negro with its vices and weaknesses, which they can flatter when necessary even — and particularly — to the detriment of the prestige of the European; they carry into the remotest corners eastern influence with their wares.

In Katanga we can see an attempt at economic penetration which will have great developments and the figures which we have given ought in our opinion only to be regarded as stages in an increasing progression which, if European commerce does not take care, will assume considerable importance.

Is this economic influence susceptible of having a serious repercussion in other spheres? I should be premature to try to answer this question definitely. But we know that the demands raised by Orientals in the Kenya Colony in 1923 created profound uneasiness there and that the commercial strike begun at the beginning of the same year by Hindu and Arab merchants in Tanganika Territory seriously disturbed the economic and political atmosphere of this colony. And then — and this is a thing which no colonising nation can afford to neglect — we are at the present watching the evolution of a phenomenon which an American author has styled "the rising tide of colour" and which may perhaps be a subject for grave anxiety for humanity to-morrow.

(E. VAN DER STRAETEN)

AL-ḲAṬAR, a peninsula on the east coast of Arabia on the Persian Gulf. It has an area of about 2,000 square miles and 2,600 inhabitants. The cape at the end of the peninsula, which runs northwards, is called Rās Rikken and forms a fairly steep tongue of land surrounded by rocks; it is an obstacle not without danger to navigation. The summit is crowned by an old fortress which belongs to a village situated in an adjoining ravine. The coast of the peninsula is steep everywhere, but not high, and is dotted with fishing villages. Its appearance is rather depressing. The soil is poor, nothing but gravel and marl with sand. A few springs provide water for the wells, which have been dug with difficulty in the heavy soil. The climate is remarkably dry and the air unhealthy as a result of the stagnant sea-water along the coast. The few gardens are small and yield but little. There are no extensive cornfields or date palm groves; only here and there do we find a few palms and bare crops. For miles low, bare hills parched by the sun rise from the muddy strand covered with driftsand and seaweed. Inland beyond these eminences stretch barren dunes which are scantily covered with vegetation; behind them lie groups of low miserable huts made of earth and palm leaves. These villages are surrounded by walls to protect them from the raids of robber Beduins of the tribes of Menāṣir and Āl Murra; the dunes have towers on them and here and there is a building of some size that has been fortified.

In contrast to this poverty is the almost inexhaustible wealth yielded by the bay on the Persian Gulf surrounded by al-Ḳaṭar, in which lie the islands of al-Baḥrain celebrated for its pearl-beds. Food and sustenance is amply supplied by the sea, on which the inhabitants of the bay spend half the year seeking for pearls, while the other half is devoted to fishing and trading. Zabāra is the largest place on the peninsula and al-Bidaʿ is regarded as the capital. The latter, like all the places on the peninsula, is chiefly inhabited by fishermen, but in the long narrow, dirty market place there are also a few merchants and artisans from al-Baḥrain.

The houses of the town are huddled together in narrow, dirty, irregular streets; two mosques and the ancient castle are the only buildings of any importance in al-Bidaʿ, which may have about 6,000 inhabitants. Dawḥa, which lies north of al-Bidaʿ, is but half as large; it lies in a deep little bay which affords a rather picturesque view through the cliffs 60—80 feet high in the background. The houses of Dawḥa are still more unprepossessing and poorer than in al-Bidaʿ and the market place even smaller and filthier. Two forts command the town — one on a rock beside it and the other in the town itself. Al-Wakra is more pleasing and stands higher. It also shelters a number of merchants and artisans from al-Baḥrain. The town has, on the whole, a prosperous appearance.

The peninsula was of some importance even in ancient times on account of its important situation commanding the Gulf of al-Baḥrain. A. Sprenger has sought to identify the Cataraei of Pliny (*Natural History*, vi. 28, § 147) with the inhabitants of al-Ḳaṭar. The peninsula used to belong to the Sulṭānate of ʿOmān. From 1872 till 1914 it was under the suzerainty of the Turks, who had a garrison in al-Bidaʿ down to October, 1914, and belonged to the province of al-Aḥsāʾ, forming the ḳaḍāʾ of the same name in the sandjaḳ of Nadjd. Since 1913 ʿAbd Allāh al-Thānī has been lord of the peninsula. But parts of it became independent earlier. For example, in 1882 Dawḥa made a treaty with England accepting her protectorate; in 1891 and in 1914 other places followed this example. Al-Ḳaṭar is now under the control of the ruler of Central Arabia, Ibn Saʿūd, who has thus regained the position once held by the Wahhābī kingdom in the peninsula, which the Turks had for a time usurped.

(ADOLF GROHMANN)

ḲAṬARĪ b. al-**FUDJĀʾA**, the last chief of the Azraḳī Khāridjīs (cf. above, i. 542). He belonged to a clan of the Tamīm (the tribe which furnished one of the most noteworthy contingents to these rebels), the Banū Kābiya b. Ḥurḳūṣ b. Māzin (Wüstenfeld, *Geneal. Tabellen*, L 14). The name of his father, al-Fudjāʾa, is said to have been a surname and his real name was Djaʿwana. Like other Arab chiefs, al-Ḳaṭarī had a double *kunya* (cf. Goldziher, *Muh. Studien*, i. 267): Abū Muḥammad in peace and Abū Naʿāma in war (Djāḥiẓ, *Bayān*², i. 131, ii. 126). Of his youth we only know that he took part under the command of ʿAbd al-Raḥmān b. Samura, along with several other chiefs among whom was al-Muhallab b. Abī Ṣufra al-Azdī, destined later to become his bitter enemy, at the submission of Sidjistān in 42 A. H. (al-Balādhurī, *Futūḥ*, ed. de Goeje, p. 396; Khalīfa b. Khaiyāṭ in Ibn ʿAbd al-Barr, *al-Istīʿāb*, Haiderābād 1318, p. 405; Ibn Ḥadjar, *Iṣāba*, Cairo 1323, ii. 161). He must have reached a fairly mature age when, 27 years later, he was acclaimed "Caliph" of the Azraḳīs when the latter, defeated by al-Muhallab and his lieutenants, were passing through a very serious crisis. Ḳaṭarī, endowed with tremendous energy and indifferent to danger, was able to arouse the enthusiasm of his partisans, and after leading back the remnants of the army into the mountains of Kirmān, reorganised them; he then went down again into the ʿIrāḳ, occupied Ahwāz and threatened Baṣra. Kept for a long time in check by Muhallab, he nevertheless succeeded in maintaining his position on the left bank of the Dudjail even after the ʿIrāḳ, as a result of the defeat of Muṣʿab b. al-Zubair at Maskin (72 A. H.), had fallen into the hands of ʿAbd al-Malik. Finally al-Ḥadjdjādj b.

Yūsuf, appointed governor of the 'Irāḳ, decided to reappoint Muhallab to the command against the Azraḳis, in which he had been replaced without success by other chiefs. Muhallab soon drove the rebels across the Dudjail and assuming the offensive, pursued them into the very centre of their power, Kirmān. Ḳaṭarī nevertheless was able to hold out for a long time in his lines (it is to this period that a silver coin with a legend in Pahlavi and Arabic of the year 75 struck in the name of Ḳaṭarī as *Amīr al-Mu'minīn*, refers [*Z. D. M. G.*, 1858, xii. 32, N°. 303]). The dissensions that broke out within the Azraḳī army between Arabs and Mawālī resulted in a split: Ḳaṭarī had to leave the town of Djīraft which was the Azraḳī head-quarters and take refuge along with the Arabs in Ṭabaristān, while the Mawālī continued to hold Djīraft under the command of their chief, 'Abd Rabb or 'Abd Rabbihi (there are two individuals of this name among the Mawālī distinguished by the epithets *al-Kabīr* and *al-Ṣaghīr* and the sources give the rank of commander sometimes to one and sometimes to the other or even distinguish two groups of the Mawālī which separated successively from al-Ḳaṭarī and were led by 'Abd Rabbihi the Great and the Less respectively). This division proved fatal, for Muhallab had no difficulty in routing the Mawālī and killing their chief; al-Ḥadjdjādj sent the Kalbī warrior Sufyān b. al-Abrad against Ḳaṭarī: or rather the latter (according to a tradition recorded by al-Ya'ḳūbī) as governor of Raiy received the appeal which the *iṣpahbadh* (local chief; cf. A. Siddiqi, *Studien über die Pers. Fremdwörter im klass. Arabischen*, p. 78⁴) addressed to him on behalf of the people of Ṭabaristān who were exasperated by the rigid application of the *djizya* tax by Ḳaṭarī. The Azraḳis surprised by Sufyān's troops in a defile in the mountains suffered a decisive defeat. Ḳaṭarī who fell under his horse and was abandoned by his followers was discovered and killed by a native. His head was cut off and borne in triumph to Kūfa and then to Damascus to be presented to the Caliph. The remnants of the Azraḳis under 'Abīda b. Hilāl al-Yashkurī fled to Sudhawwar, a stronghold near Ḳūmis (Yāḳūt, iii. 62) where they sustained a long siege from Sufyān; having exhausted their supplies, they made a desperate sortie and were wiped out. The chronology of these events is far from certain: the sources which say that Ḳaṭarī was in command for 13 or even 20 years are of no value. According to Wellhausen (cf. *Bibl.*), the election of Ḳaṭarī as Caliph probably took place at the end of 69 A.H. and his death in 78 or 79.

Ḳaṭarī b. al-Fudjā'a represents in striking fashion the type of Khāridjī intransigeant and also that of Arab *Saiyid*, half cavalier and half brigand. Like the other Azraḳis, as a result of his fanatical zeal, he preached and practised *isti'rāḍ* (massacre of anyone who did not accept the Khāridjī creed) and declared the *ḳa'ad* (singular *ḳā'id*) infidels, that is to say those who, while professing the Khāridjī doctrine, refrained from taking part in the war against their adversaries. On the other hand, he was proud of his Arab blood and of his Bedouin character; like several other illustrious Khāridjīs, he had a real talent as orator and poet. One of his speeches is recorded by Djāḥiẓ, *Bayān*, i. 196, 197; *'Iḳd*, ii. 195—196 (cf. also *Fihrist*, p. 125, 15); the fragments of his poetry that have survived to us, of which the most celebrated is the fragment *Ḥamāsa*, p. 44 (frequently quoted, with numerous variations), are remarkable for the elevated style and a heroic contempt for death and place their author in the first rank of Khāridjī poets.

(Levi Della Vida)

KĀTH, the ancient capital of Khwārizm, the modern Khiva; according to Yāḳūt, *Mu'djam*, ed. Wüstenfeld, iv. 222, the name meant a wall (*ḥā'iṭ*) in the desert in the language of the Khwārizmis, even if there were no buildings within this. The fullest accounts of the old town and citadel of Fīl or Fīr, which was gradually washed away by the Āmū-Daryā (the last traces of it are said to have disappeared in 384 = 994), are given in al-Bīrūnī's [q.v.] *Kitāb al-Āthār al-Bāḳiya*, p. 35, on which E. Sachau based his *Zur Geschichte und Chronologie von Khwārizm* (*Sitzungsber. der phil.-hist. Cl. d. K.K. Akad. der Wiss.*, lxxiii., Vienna 1873, esp. p. 489 *sq.*). On the description of the town by the geographers of the ivth (xth) century cf. G. Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 446 *sq.*; W. Barthold, *Turkestan v epokhu mongolskago nashestviya* ii., St. Petersburg 1900, p. 143 *sq.*; the fullest information is given by al-Muḳaddasī², ed. de Goeje, 1906, p. 287 *sq.* The town lost its political importance when the dynasty of the first Khwārizmshāh was destroyed by the prince of Gurgāndj, Abu 'l-'Abbās Ma'mūn b. Muḥammad, in 385 (995); cf. W. Barthold, *Turkestan*, etc., ii. 275 *sq.* Kāth is mentioned by Ibn Baṭṭūṭa (called al-Kāt by him; cf. ed. Defrémery and Sanguinetti, iii. 20) as the only inhabited place between Khwārizm and Urgenč (the ancient Gurgāndj). In the viiith (xivth) century Kāth along with Khiwa before the rise of the native dynasty in Khwārizm, belonged to the kingdom of the Čaghatāi (*Ẓafar-Nāma*, Calcutta 1887, i. 232); this is shown for example also on the Chinese map of 1331 (in Bretschneider, *Mediaeval Researches from Eastern Asiatic Sources*, 1888, ii. 63). On the storming of Kāth by Tīmūr in 1372 cf. *Ẓafar-Nāma*, i. 237 *sq.*; for the assertion of P. Lerch, *Khiwa oder Khwārizm*, St. Petersburg 1873, p. 21) that the army crossed the Āmū-Daryā between Se-Pāya and Kāth, which would mean that Kāth even then was on the left bank of the river, there is no authority in the text. In the xith (xviith) century Kāth was on the bank of a dry canal; Anūsha, Khān of Khiwa (1663—1687), therefore built a new Kāth west of the main stream on the bank of the Yarmish canal which he

himself had dug (W. Barthold, *K istorii orosheniya Turkestana*, St. Petersburg 1914, p. 95, from the MS. of the Asiatic Museum 590 ob., History of Khiva, fol. 33ᵇ). The ruins of the old Kāth east of the Āmū-Daryā are now called after the alleged tomb of a saint of the earliest period of Islām, Shaikh ʿAbbās Walī; they were visited in 1873 and described by A. Kuhn (*Materiali dlya statistiki Turk. Kraya*, iv. 252). Besides the tomb of the saint, the only building adorned with glazed bricks, there are mentioned here a half destroyed minaret and the remains of the city wall, all of baked bricks. The modern village (200 houses, 15 shops, 2 mosques with schools) occupies only a small part of the ancient site and the modern fort only a quarter of the old citadel. According to V. Masalskiy (*Turkestanskiy Kray*, St. Petersburg 1913, p. 749), the ruins are 31 versts from Petroalexandrovsk (called Turtkul since the revolution) and 7 versts from the present right bank of the Āmū-Daryā. (W. BARTHOLD)

KATHAI, KHITAI [See CHINA].

KAṬĪʿA [See ḲIṬʿA].

KĀTIB, writer or scribe, is probably derived from the word *kitāb* (book) and from both was later formed the verb *kataba* (he wrote). The word was perhaps imported with the art from the Northern Aramaic neighbours of the Arabs. We not only find the word in the earliest poetry preserved, applied to those who wrote the Arabic script but also ancient poets speak of Ḥimyarī kātibs. In the time before Islām the art of writing, though apparently practised in all parts of Arabia, was the accomplishment of the few, and Ibn Saʿd in his *Ṭabaḳāt* makes a point of mentioning each time when he states that a certain Ṣaḥābī could write, that the art of writing was little known at that time. Among the Companions at Medina some ten are stated to have been kātibs, and Kaʿb b. Mālik in a tradition preserved by Aḥmad Ibn Ḥanbal (iii. 458) mentions that he is a kātib as a particular accomplishment. It is further recorded that several prominent men in Mekka also were kātibs and we may assume that the kātibs of the court of al-Ḥīra (like ʿAdī b. Zaid) were employed in drawing up the safe-conducts (mentioned by Ṭufail al-Ghanawī) or *ḥilf*-contracts referred to in the *Naḳāʾiḍ* and in the *Muʿallaḳa* of al-Ḥārith b. Ḥilliza and written in Arabic. Of far greater importance from an Islāmic point of view were the men who wrote down the revelations of the Prophet; they are named *Kātib al-Waḥy*. Such men were Ubaiy b. Kaʿb, Ibn Masʿūd and Zaid b. Thābit. These same men were also employed for writing the various letters sent by the Prophet to prominent men in Arabia inviting them to embrace Islām. The office of kātib was one of great honour and the rank, which was later occupied by the wazīr, was filled during the whole time of the first four Caliphs and the Umaiyads by men who had the simple title of kātib, and it was only under Abu ʾl-ʿAbbās that the title of wazīr was first employed. By this time, on the model of the Persian chancellery, a complicated system of government offices had developed. The chief secretary had the title of *Kātib al-Sirr* "Private secretary", others were employed to make the first drafts of official documents; these were called *Kātib al-Inshāʾ*. The control of the army with the payment of the troops was regulated by the *Kātib al-Djaish*, which we might equate with the "Secretary for War". Other secretaries were employed for the supervision of the landed property of the ruler. The whole system of kātibs was the *Dīwān* [q.v.]. This class of men became all-powerful and it was from them that the highest officers of state were recruited. They appear to have kept themselves apart from the other men of education, for only rarely find we any of them mentioned among the innumerable traditionists and theologians, though many are found among the men who made a mark as poets or authors in other branches of learning. As they were required to have a general knowledge of all manner of subjects, authors early began to compose books for the benefit of this class and as this office maintained its importance the works for their benefit have come down to us in many copies. The chief works on the education of the kātib are the *Adab al-Kātib* of Ibn Ḳutaiba [q.v.], the *Kitāb al-Kuttāb* of Ibn Durustawaihi, the *Adab al-Kātib* of al-Ṣūlī and especially the voluminous work of al-Ḳalḳashandī. While the first three works give us an insight into the requirements of a competent kātib in the earlier centuries, the *Ṣubḥ al-Aʿshā* of al-Ḳalḳashandī contains practically all that it is necessary to know on the subject. We can trace step by step how the kātib influenced the whole of Arabic prose literature; from the simple and clear letters of the earlier periods we come gradually to the bombastic composition of later times in which it is frequently difficult to discover the purpose of a document in the volume of sounding words. The disease was due to the zeal of the kātib to outdo his colleagues or predecessors in the imagined elegance of his diction. We may owe many useful works to their authors' desire to supply the kātib with the material for his compositions, but the whole striving for grandiose language has been the cause for making so much Oriental literature so indigestible to our taste. This is perhaps aggravated by Persian, Turkish and Indian kātibs. They were proud too when they could solve the meaning of the tangle of words and we get a glimpse at that mentality when a renowned kātib like the Ṣāḥib Ismāʿīl b. ʿAbbād objected to a letter being sent to him, because the words were properly pointed and vocalised, as he considered it an insult to his intellect. Though the kātibs rose to high positions, they appear as a class to have been of a cowardly disposition, and could only intrigue; and I believe no one ever rose to become a ruler, which so many bold spirits succeeded in doing during the last twelve centuries.

Bibliography: Ibn Ḳutaiba, *Adab al-Kātib*, ed. Grunert and several Oriental editions, especially the Commentary of al-Baṭalyawsī entitled *al-Iḳtiḍāb*; Ibn Durustawaihi, *Kitāb al-Kuttāb*, ed. Cheikho; al-Ṣūlī, *Adab al-Kātib*, ed. Bairūt; al-Ḳalḳashandī, *Ṣubḥ al-Aʿshā*, ed. Cairo in 14 volumes and the abridgment of the latter entitled *al-Ḍawʾ*. (F. KRENKOW)

KĀTIB ČELEBI. [See ḤĀDJDJĪ KHALĪFA].

KĀTIB-I RŪMĪ. [See ʿALĪ B. ḤUSAIN].

KĀTIBĪ, SHAMS AL-DĪN MUḤAMMAD B. ʿABD ALLĀH, a Persian poet, born at Turshīz or in Ṭāḳ, a village of Turshīz in Khurāsān, studied at Nīshāpūr, went to Herāt to the court of the Tīmūrids, where he did not receive the welcome he expected, and lived for a long time in Shirwān where the prince Mīrzā Shaikh Ibrāhīm (d. 820 = 1417) had taken him under his patronage. He then lived in Ādharbaidjān, where he was not appreciated by Iskandar b. Ḳara Yūsuf, and in Iṣfahān, where

he immersed himself in the study of mysticism, and died of the plague at Astarābād between 838 and 839 (1434—1436). It was in the last-named town that he undertook to compose a *khamsa* "a group of five poems" in imitation of Niẓāmī and Amīr Khusraw but he only finished the *Gulshan-i Abrār* "Rosebush of Pious Men" and his *Lailā u-Madjnūn* of which the only known manuscript is in St. Petersburg. In the field of ethical and didactic poetry he wrote a book entitled *Dih Bāb* "The ten Chapters" or *Tadjnīsāt* "Puns"; he also left a *Dīwān* of which ten ghazels were published and translated by Bland in his *Century*, p. 18—21, the *Sī-Nāma* "Thirty Letters", devoted to mystic love, and among the *Mathnawī* of allegorical and epic matter the *Madjma' al-Baḥrain* "Confluence of the two Seas", which has a double rhyme, and can be read in two different metres and represents the mystic love of two personages named Nāṣir and Manṣūr, and the *Dilrubāī* "Ravishing of Hearts", an allegorical history of Kobād, king of the Yemen, and of his minister, fertile in ruses. His poetical surname of Kātibī probably comes from the fact that he was a calligrapher, having received lessons in Nīshāpūr from Mawlānā Sīmī, who later quarrelled with him. He spent the whole of his life in poverty as a result of the foolish prodigality which made him spend in a few days the sums he received from the munificence of his patrons.

(Cl. Huart)

AL-ḲAṬĪF, a seaport on the coast of the Persian Gulf in the bay of the same name. The latter, which faces due east, is about four miles broad at the entrance, and enclosed on the north by a narrow promontory, shaped like a mussel-shell, on which lies the fortress of Dārīn. Its point is called Rās Tannūra. The south side of the bay is confined by a jutting horn of land, called Ẓahrān, from a hill on it shaped like a sugar-loaf, which forms an excellent landmark for ships entering the bay. On this side of the bay lie the fortifications of Dammān. Towards the mouth of the bay lies the island of Tārūt, four hours' journey in length from north to south, well provided with water and thickly planted with palm groves. This island lies exactly opposite al-Ḳaṭīf. The best and safest passage to the harbour of al-Ḳaṭīf is through the deep channel on the north between the island of Tārūt and Rās Tannūra; the channel south of the island is shallow and difficult to navigate. The waters of the Gulf are shallow almost everywhere in the bay, and only show a level surface of water at high tide; when the ebb sets in sandbanks appear, and little islands, shallows and lumbers of sea-plants, among which wind narrow channels filled with mud. The coast is very flat; except at a few places it is almost level with the sea.

It is significant of the change in the coast-line that Abu 'l-Fidā' (d. 1331) tells us that in his time Tārūt was still part of the continent and was only surrounded by the sea and became an island at high tide. As soon as the sea went back a part of the land between Tārūt and al-Ḳaṭīf appeared, so that people could pass along it to the mainland. According to him, Tārūt was half a day's journey from al-Ḳaṭīf and rich in vineyards with excellent grapes. Al-Mas'ūdī (d. 956) puts the distance between Tārūt and al-Ḳaṭīf at a mile. As Tārūt is now an island, the sea has swallowed up part of the coast here. On the land side al-Ḳaṭīf is surrounded by a broad girdle of gardens and orchards. The flourishing crops in the gardens far surpass those of the best watered places in the interior, e.g. at Hufhūf. The date-palm does exceedingly well here in a soil richly irrigated, partly by salt water, which the flood-tide carries far into the interior, and partly from the fresh water springs of the adjacent hills. Cereals, wheat, barley, rice, and all kinds of vegetables, figs, apricots, mangoes, pomegranates, grapes, citrons and lemons also flourish here. Through an uninterrupted succession of palm-groves, which it takes several hours to traverse in either direction, wind snake-like lines, the arches and canals of an old irrigation system, which date from the Ḳarmaṭian period, and formerly supplied al-Ḳaṭīf with better water than could be had in the immediate neighbourhood of the town. The whole length of the system, now in ruins, must have been about five miles. Al-Ḳaṭīf has walls and towers. The western gate has a high stone arch of delicate work and is flanked by towers and walls which are now in ruins. Just outside the gate are two cemeteries. The town, which is about a quarter of a mile long, is damp and filthy, and with its suburbs has about 6,000 inhabitants; the whole district, according to Sadlier, had nine walled and seven open villages, the population of which including al-Ḳaṭīf he put at 25,000. The continual fighting, of which the town has been the scene, has much affected its appearance. It now has a dismal, broken-down look. The market-place, on which the products of the country are to be amply had, is large. At the inner bend of the small bay already mentioned, stands the powerful citadel said to have been built by the Ḳarmaṭian Abū Sa'īd al-Djannābī, later used by the Portuguese, the high massive walls of brick and stone of which come down almost to the water's edge, so that only a narrow path along the shore is left, on to which opens the main gate defended by an outwork. Close to the shore there is now also the customs-house. The outer court of the citadel forms a quadrangle and is surrounded by high walls with towers at the corners, and protected on the land-side by a ditch. At the south-west corner stands the old palace of the Ḳarmaṭians, of which part has fallen in and been taken away and part has been very clumsily restored. The entrance is through a great archway in the Moorish style, supported by slender pillars, three arches deep and five long with fine cross-vaulting with arabesques in stucco, which have now for the most part fallen down. This archway leads into a long gallery, formerly covered, of which the side walls and pillars and a few arches remain. One next enters the inner court, which is surrounded by a series of chambers still fairly well preserved. A lofty room, long and

tread, served as reception room, with fine pillars in the centre and windows in the Persian style, divided into sections by little pillars. At the back of the room a raised throne still stands. Behind it follows a regular labyrinth of rooms, galleries, corridors and chambers, in three successive stories. The rich architecture of the windows, which are filled with pretty lattice work in stone in varying patterns, shows much taste. Behind the reception room is a court with large round pillars and remains of decoration.

The climate of al-Ḳaṭīf is very unhealthy; fever and other diseases have given the coast a bad reputation. The harbour, which was once accessible to heavily laden ships, is now for the most part silted up, and accessible only to small vessels at high tide. The sand-banks which run out on either side make entrance difficult, nay even dangerous. To the west and south the bay is well sheltered by the promontories and the islands of Tārūt and Sawaiḳ. It is also favourably situated for trade with the islands of al-Baḥrain, Būshehr and other places. Al-Ḳaṭīf might again attain some importance as a harbour, if it were dredged and kept in order and given better communications with the interior. The inhabitants of al-Ḳaṭīf are mainly engaged in pearl-fishing and in trading. Their type shows the strong Persian stamp, which dates from the pre-Muḥammadan period.

History. A. Sprenger has identified the bay with the *Sinus Capeus* of Pliny, *Nat. Hist.*, vi. 28, § 147. Before the days of Islām, al-Ḳaṭīf, like the whole of al-Baḥrain, was under Persian suzerainty. Shāpūr II about 320 A.D. conquered the whole Arabian coast beginning at al-Ḳaṭīf. In the early days of Islām there were still many Persians (Magians), Jews and Christians in al-Ḳaṭīf, as well as in the other towns of al-Baḥrain. In al-Ḳaṭīf, however, the 'Abd al-Ḳais were predominant in those days. The whole country of al-Baḥrain including al-Ḳaṭīf then submitted to the Prophet in al-Medina and came under the administration of al-'Alā' b. al-Ḥaḍramī. But when the general rising broke out against the Muslims after Muḥammad's death, al-Baḥrain was one of the first districts to proclaim its independence from the lord of al-Medina. In 11 A.H. the rebels under al-Ḥuṭam b. Ḍubai'a occupied al-Ḳaṭīf, but the rebellion soon collapsed. In 67 A.H. there was an encounter at al-Ḳaṭīf between the 'Abd al-Ḳais and Nadjda b. 'Āmir al-Ḥanafī, in which the former were decisively beaten. Nadjda took prisoner the people of al-Ḳaṭīf, who had risen against him, and took up his headquarters there. Much more momentous for the town than this transitory feud was the invasion by the Ḳarmaṭian Abū Sa'īd al-Ḥasan b. Bahrām al-Djannābī in 286 A.H. Many inhabitants perished. Abū Sa'īd had pitched his camp in the town and then undertook a bold campaign against al-Baṣra. The governor of al-Baḥrain, Ibn Bānū, gave battle to the Ḳarmaṭians at al-Ḳaṭīf in 290 A.H.; the latter were defeated and suffered heavy losses, including Abū Sa'īd's successor designate. The town was taken by Ibn Bānū and Abū Sa'īd had to abandon his campaign against al-Baṣra and hurriedly return. Al-Ḳaṭīf fell again into the hands of the Ḳarmaṭians, who were now masters of almost all al-Baḥrain with Hadjar, al-Aḥsā', al-Ḳaṭīf and al-Ṭā'if. When at the period of decline of Ḳarmaṭian power in 378 A.H., al-Aṣfar with a section of the Banu 'l-Muntafiḳ made war on the Ḳarmaṭians, he plundered al-Ḳaṭīf and carried off great booty in slaves, goods and cattle to al-Baṣra. Al-Idrīsī and Benjamin of Tudela, who visited the east between 1169 and 1172, describe al-Ḳaṭīf as a fine, large town. The latter's estimate that there were 5,000 Jews in al-Ḳaṭīf must be considered an exaggeration. Ibn Baṭṭūṭa also calls it a fine, large town. Alfonso d'Albuquerque who captured Hormuz in 1507 mentions Catifa as the harbour of Lahaçah (al-Aḥsā') and says that the best horses are exported from here. He obtained a large quantity of provisions and supplies in al-Ḳaṭīf and there were many merchants there. In 1521 the lord of al-Aḥsā' (Lasah) refused to pay the Portuguese tribute for the lands of Catifa and Baharem (al-Baḥrain). Antonio Corrêa thereupon conquered al-Baḥrain at the end of July, 1521, and al-Ḳaṭīf also fell into the hands of the Portuguese. In 1550 the citadel was taken by the Turks, whereupon Dom Antão de Noronha conducted a bold campaign against the Turks of al-Baṣra and al-Ḳaṭīf. Not till 1622 were the Portuguese driven out of al-Baḥrain by Shāh 'Abbās I of Persia, and the Dutch were now able as a result to establish their factories in the Persian Gulf. At the end of the xviiith century the Wahhābīs succeeded in entering upon the heritage of the Ḳarmaṭians. Sa'ūd b. 'Abd al-'Azīz in 1792 defeated the ruler of al-Ḥasa (al-Aḥsā') and thus obtained al-Ḳaṭīf, but the Turkish governor, Sulaimān Pasha, obtained the assistance of the head chief of the Muntafiḳ, Thwēnī b. 'Abd Allāh Āl Sa'dūn; the latter advanced against al-Ḥasa in 1796 with an army of Turkish soldiers and volunteers and transformed al-Ḳaṭīf into a fortress. But the campaign took an unexpected favourable turn for Sa'ūd when Thwēnī was murdered in 1708. After the overthrow of the Wahhābīs in Central Arabia by Ibrāhīm, al-Ḳaṭīf also was again occupied by the Turks in 1810, but had to be abandoned again in 1823. In 1838 the Turks once more invaded the coast of the Persian Gulf; the governor of Djidda, Khurshīd Pasha, occupied al-Hufhūf and was threatening al-Ḳaṭīf, when a protest from England postponed the Turkish conquest of al-Baḥrain. The increased power of the Wahhābīs enabled Faiṣal as early as 1844 to conquer the whole district of al-Ḥasa including al-Ḳaṭīf, which now remained in the hands of the Wahhābīs. It was only when hostilities broke out in 1871 between 'Abd Allāh b. Faiṣal and Sa'ūd b. Faiṣal that Midḥat Pasha, governor of Baghdād, obtained an opportunity to assert the old claims of Turkey. He occupied al-Ḳaṭīf, which now became a ḳaḍā of the sandjaḳ of Nadjd and received a garrison. Turkey occupied this territory down to May, 1913, when 'Abd al-'Azīz b. Sa'ūd at the head of his warriors occupied al-Ḥasa and drove the Turkish garrison out of al-Ḳaṭīf also.

(ADOLF GROHMANN)

KATĪN, Katīn (T.), [see KHATUN]

ĶATL (A.), killing, putting to death, used in the two principal meanings of the word — the crime of murder and the punishment of execution.

I. Ķatl as a crime.

1) In the Ķurʾān unlawful slaying is forbidden in a series of verses, which date from the second Mekkan period to nearly the end of the Medina period. The passages may be arranged chronologically as follows (cf. Th. Nöldeke-Fr. Schwally, *Geschichte des Qorāns*, vol. i., and H. Grimme, *Mohammed*, vol. ii.; when the exact order in the particular periods cannot be ascertained, the passages are here arranged in the order of the Sūras and verses): — xvii. 33, 35 (second Mekkan period; according to O. Procksch, *Über die Blutrache*, p. 74, note 4, later than vi. 152): "Kill not your children for fear of being brought to want; We will provide for them and for you; verily the killing them is a great sin.... Neither slay the soul which God hath forbidden you to slay unless for a just cause; but whosoever shall be slain unjustly, We have given his next of kin (*walī*) power (to demand satisfaction) but let him not exceed the bounds of moderation in the killing; indeed he is protected"; xxv. 68 *sqq.* (second Mekkan period): — (and the servants of the Merciful are those) "who slay not the soul, which God hath forbidden to be slain unless for a just cause.... for he who does this commits sins (or: will bring retribution upon himself); his punishment will be doubled on the day of the Resurrection and he shall remain in it covered with ignominy for ever; except him who repents and believes and performs good works; for them God will change their evil deeds into good".... (here killing and unbelief are considered together so that the question, what happens to a believer who kills unlawfully, is left quite out of the question); vi. 152 (third Mekkan period; similar to xvii. 33, 35); iv. 94 *sq.* (about the years 3—5; according to Procksch, *op. cit.*, p. 80, to be dated between the treaty of al-Ḥudaibiya and the capture of Mekka): "it is not lawful for a believer to kill a believer unless by mistake (by *khaṭaʾ*); but if anyone kill a believer by mistake he shall set free a slave who is a believer and pay a *diya* to the next of kin of the dead man, unless they waive it....; but if the person slain belong to a people hostile to you, but a believer, a slave who is a believer shall be released; but if he belong to a people with whom ye have a treaty, a *diya* must be paid to his relatives and a slave who is a believer set free; if anyone cannot afford to do this, he must fast for two successive months so that Allāh may look upon him again....; but if anyone kill a believer deliberately (with *ʿamd*) his reward is hell in which he shall remain for ever and Allāh wrathful against him and curse him and shall prepare a great punishment for him" (the true interpretation is undoubtedly this, that every Muslim who kills another Muslim with *ʿamd* is condemned to eternal hell-fire and that Allāh will not accept his repentance, a view which is ascribed to Ibn ʿAbbās, Ibn Masʿūd, Zaid b. Thābit and al-Ḍaḥḥāk; the view held by ʿIkrima and others that the verse refers to the particular case of a *murtadd* who has killed a believer is not to be accepted; this is already a transition to the view that has finally prevailed, which tones down the literal wording of the passage, either by adding with Mudjāhid "unless he repents" or by holding, as has become usual, that Allāh will not leave a Muslim eternally in hell, and can even remit entirely the threatened punishment of hell-fire; but this is only the result of speculation and combination with other passages in the Ķurʾān [e.g. xl. 108—110; xxxix. 54] and is therefore to be rejected; iv. 33 *sq.* (from about the same time; similar to iv. 95); lx. 12 (probably dates from soon after the treaty of al-Ḥudaibiya: similar to xvii. 33).

There are further two passages, in which it is asserted that Allāh forbade the Jews to kill: ii. 78 *sqq.* (from about the first half of the year 2 A.H.) and v. 35 (probably of the year 6 or 7; according to Grimme, to be dated before the battle of Badr).

There are also a number of verses in which killing is not exactly forbidden but is more or less strongly deprecated and represented as a mark of the unbeliever, just as committing no murder is a sign of the believer, e.g. lxxxi. 8 *sq.* (first Mekkan period); li. 28 (probably third Mekkan period; according to Grimme, Medinese, before the battle of Badr); vi. 138, 141; xvi. 61; xl. 26 (same time); viii. 30 (after the battle of Badr); v. 33 (shortly before the capture of Khaibar). In numerous passages in this connection the unbelievers are reproached with the slaying of prophets, e.g. ii. 58, 81, 85 (from the first half of the year 2); iv. 154 (after the outbreak of open war with the Jews of Medina); iii. 177, 180 (probably soon after the battle of Uḥud); xx. 108 (shortly before the war with the Banu 'l-Naḍīr); v. 74 (later Medina period).

2) Supplements to the Ķurʾān passages from the *Sīra*, accounts of the life of Muḥammad.

In the so-called ordinance of the community, which dates from the first Medina period, it is laid down that no believer may kill a believer on account of an unbeliever. In another passage it is said: "If anyone kill a believer and is convicted, then vengeance for bloodshed must be done, unless the *walī* of the man slain waive it". In all probability Muḥammad had in mind in the murderer a non-Muslim member of the community (Procksch, *op. cit.*, p. 71): this agrees with the development given above. In the *baiʿa*, the initiation into the community, the initiate had to pledge himself, among other things, not to commit an unlawful act of slaying (cf. Ḳurʾān, lx. 12). Once Muḥammad cursed a murderer (cf. the art. ḲIṢĀṢ). In the so-called first temple-speech (of the year 630), the genuineness of which is not absolutely certain, however, on every point and seems doubtful on this particular point, there appears the by no means exactly defined conception of *ḳatl s̲h̲ibh ʿamd* (see below, sub 5c); Muḥammad is also said to have declared there that all blood-guilt attached to a Muslim dating from the period of paganism was to be cast off, which extends the corresponding passage of the ordinance of the community. Finally it is to be mentioned that the *Sīra* knows of several cases of deliberate and of unpremeditated slaying; so far as they are liable to be punished, they are dealt with in the article ḲIṢĀṢ.

3) Comparison of the views of authoritative circles in the Muslim community in the older period as preserved in Ḥadīth (tradition). It is obvious that in the Ḥadīth also the slaying of a Muslim is strictly forbidden; by the adoption of Islām (and of monotheism at all) life and property are protected. The life and property of a Muslim are as inviolable (*ḥarām*) as the day of sacrifice in Dhu 'l-Ḥidjdja in the sacred territory of Mekka (al-Bukhārī, *Diyāt*, bāb 8, etc.). All blood-guilt, which has weighed a man down from an earlier period, is thus wiped out by the adoption of Islām, even if the crime was committed just before conversion to Islām. Only if a Muslim kills another, or, to be more exact, if he commits a crime worthy of death, can he be slain. Everyone is perfectly agreed that killing with *ʿamd* is one of the deadliest sins (*kabāʾir*); it is usually considered the gravest sin, along with the *s̲h̲irk* (polytheism; e.g. al-Bukhārī, *Diyāt*, bāb 1, 2), whether it is asserted of killing with *ʿamd* in general or of the killing of new-born girls usual among the heathens. Therefore many Ḥadīth's express disgust at killing: e.g. "the slaying of a Muslim is to Allāh like the cessation of the world", or "the cessation of the world is even less to Allāh than this"; "if someone is killed in the east and another in the west approves of it, he is guilty of the person's blood"; "man is a work of Allāh; cursed be he who destroys Allāh's work". The first murder which introduced killing into the world is the subject of special condemnation: Cain is accessory to every later murder. Murder is punished in the next world as well as on earth; on the Day of Judgment cases of the shedding of innocent blood will be judged first. As to the punishment itself, a whole stratum of ḥadīths reflects the already mentioned view of Ibn ʿAbbās and others regarding the eternalness of punishment in hell for slaying with *ʿamd*; e.g. "whosoever sheds blood in an unlawful way, for him there exists no way of escape"; "whosoever contributes though only by a word to the slaying of a Muslim must despair of the mercy of Allāh". In several passages the deliberate murder of a Muslim is considered equivalent to unbelief (ḥadīths in which a warning is simply uttered against murder being a sign of the unbeliever are, of course, not dealt with here). It is even said: "If two Muslims attack one another with swords and one kills the other, both go to hell (unless it was a case of legitimate self-defence), the slayer for his deed and the slain because he wished to kill the other" (cf. e.g. al-Bukhārī, *Diyāt*, bāb 2); and: "if all the inhabitants of heaven and earth together had killed someone they would all go to hell". In these two passages it is not exactly demonstrable that eternal punishment in hell is meant, but it is very probable. In several of the traditions mentioned, Ibn ʿAbbās appears as the authority. Such ḥadīths were naturally rendered harmless by "interpretation" by the representatives of the other view, if they were not entirely suppressed, which did happen to not a few. Thus the description of deliberate murder as unbelief is sometimes interpreted to mean that it is a very grievous sin and sometimes taken as a reference to the refusal of the protection of Islāmic law, which occurs in both cases, to the life of the slayer or of the unbeliever. This was not found sufficient, however, but traditions were put into currency to prove the contrary, namely that Allāh would accept the repentance of a murderer, even if he had committed several murders; one of these traditions is provided with a grotesque story, the object of which is quite apparent, as corroboration. In one tradition the *kaffāra*, especially the liberation of a slave, is represented as a means to save the murderer from the merited punishment of hell, obviously by someone who demanded it even in case of *ḳatl* with *ʿamd* (see below sub 6a). It is even asserted in public controversy against the views of the other side that after the Day of Judgment no Muslim will go to hell and that, on the contrary, all sins will be forgiven them. — The killing of a *muʿāhad*, a non-Muslim under the protection of the Islāmic state, is threatened with punishment in the next world (e.g. al-Bukhārī, *Diyāt*, bāb 30; al-Dārimī, *Siyar*, bāb 60; the Ḳurʾān is silent on the question); but, as might be expected, the view is very rarely expressed that this punishment is eternal. — The prohibition of suicide, which we do not find laid down in the Ḳurʾān, is given in the Ḥadīth and the suicide is threatened with eternal punishment in the next world.

As an appendix to the above we may briefly mention the connection of several kinds of animals with *ḳatl*, which is also dealt with in tradition. Muḥammad had, as is related, recommended the slaughter of dogs but later withdrew the order, although the dog always remained subject to certain exceptional regulations (cf. the art. KALB); the *sunna* further orders the killing of the *wazagh*, a kind of lizard, but if possible it should be done with one blow: on the other hand the killing of ants and of cats is forbidden (among the authorities for this last tradition is Abū Huraira); on the killing of snakes cf. Guillaume, *The Traditions of Islam*, p. 116 *sq.*

As regards the value of the traditions just quoted, the genuineness of none of them can be proved: while the falsity of those, which seek to save the murderer of a Muslim from hell, is

apparent, it is also probable of those which hold the contrary view.

4) The controversy regarding the punishment of the murderer of a Muslim centres round a passage in the Ḳur'ān, which in itself could and must form a foundation for it, and is in part at least independent and original. This controversy and the conception of *Ḳatl* in general are, however, very closely connected with the disputes aroused by the Khāridjis, Ḳadarīs and Mu'tazilīs; for details see these articles; here it is sufficient to recall the following questions: — "Is the committing of deadly sins — and killing with *'amd* is certainly one of them — unbelief?" "Does man create his own actions, including sins, himself, or do they happen through *ḳadar*?" "Can man by his intervention interfere with Allāh's decision, for example by killing another shorten the period predestined for the latter's life?" We have more than one example of these questions being applied to *ḳatl*, and they have been cited in discussing *ḳatl* (cf. e.g. Goldziher, *Vorlesungen über den Islām*[1], p. 98 *sq.*; sec. ed., p. 92 *sq.*). But the Mu'tazilī view of the eternalness of hell-punishment for him who commits a deadly sin and does not repent, is specially important in this connection; al-Zamakhsharī gives an explanation of the verse of the Ḳur'ān in question from this point of view. Finally the concensus of orthodox opinion agreed that the deliberate killing of a Muslim is certainly a deadly sin, but the slayer, on the other hand, if he repents and voluntarily submits to the punishment prescribed, will not be further punished in the next world and, even if he does not repent, will in no case remain in hell eternally (agreement was reached on this point even before the rise of the *Fiḳh*-schools; therefore there is no *ikhtilāf* of the *madhāhib* on this question); this view has found its way into all text-books of *Fiḳh* and of doctrine.

5) A statement of the prevailing Ḥanafī views on killing. *Ḳatl* in the *Fiḳh* is the act of a man whereby the life of a fellow-man is brought to a close (the death need not immediately follow the act). It may be qualified by any of the five "legal categories": — duty or necessity (*wādjib*), e.g. the killing of the *murtadd*; recommended (*mandūb*), e.g. when the *ghāzī* kills his unbelieving kinsmen if they insult Allāh or his Prophet; permitted (*mubāḥ*), e.g. when the Imām kills the unbelieving prisoner of war, in the case when the reasons for killing him exactly balance those for granting his life; killing in self-defence is also allowed i.e. in defending oneself against an illegal attack on one's life, person or property, in defending oneself or some one who comes to help, if the attack cannot otherwise be averted (on further questions there is *ikhtilāf*, also on the question whether a man who surprises another in adultery with his wife or endeavouring to see into his harem, and kills or mutilates him, is acting legitimately or not; one tradition on the subject is interpreted in different ways); disapproved (*makrūh*), e.g. when the *ghāzī* kills his unbelieving kinsmen without their having insulted Allāh or his Prophet; illegal and therefore forbidden (*ḥarām*).

Illegal killing as the result of actions in themselves legal may take place in five ways:

a) as *'amd*, i.e. someone wilfully makes another the direct object of an action in general fatal so that the other dies as a result; according to one view, the intention of killing is necessary for the conception of *'amd*, which, however, is always presumed in the case of any act generally fatal in its result, which is illegally inflicted on another; so that, for example, any one, who strikes a blow at the hand of another with an instrument adapted in general for killing, but inadvertently hits his neck and kills him, *ceteris paribus* is unanimously regarded as equally guilty with the man who strikes another in the neck with the same instrument, wilfully intending to kill him and slays him: this killing is a sin (*ma'thum*) and in general is punished by *ḳiṣāṣ*, or else the slayer is bound to pay the heavier *diya* and to lose any possible legacy from the deceased to himself;

b) as *khaṭa'* (or *khaṭā'*), i.e. there is no intention of committing an act illegally on the other as is the case of *a*), while the action itself is premeditated: two kinds are distinguished, according as the *khaṭa'* (mistake or misadventure) which shows that the killing is not wilful, is in the intention of the doer (*fi 'l-ḳaṣd*) or in the carrying out of the action (*fi 'l-fi'l*). The former is the case when someone treats another as a wild beast or a *ḥarbī*, (an infidel not enjoying the protection of the Islāmic state, against whom the *djihād* is to be waged) the killing of whom is not illegal, and kills him; the latter when someone unluckily hits another, while shooting at a target or at a *ḥarbī*, so that he dies, or strikes at the hand of another person but inadvertently hits the neck of a third person and kills him; this killing is not sin but brings with it (without *ḳiṣāṣ*) the obligation upon the *'āḳila* of the killer to pay the smaller *diya* and to lose any claims to any inheritance from the deceased as in *a*); besides the obligation of the killer to perform the *kaffāra*;

c) as *shabah* (or *shibh*) *'amd* = similar to *'amd*, i.e. someone intentionally makes another the direct object of some action, not always but sometimes fatal, and death results. Actions which experience has shown not to be fatal at all are thus quite excluded, such as striking the hand with a reed pen; if anyone dies as a result of such an action as this, it is an unfortunate accident, which is not followed by any penal consequences. This killing is a sin and brings with it (without *ḳiṣāṣ*) the obligation upon the *'āḳila* of the slayer to pay the heavier *diya* and to lose any possible inheritance from the deceased as in *a*), and in addition the slayer is bound to perform the *kaffāra*. This category only exists in cases where death actually results; in cases of bodily injury, which, by the way, are similarly classified, the action is regarded as *'amd*;

d) as *djārī madjrā 'l-khaṭa'* (or *mudjrā madjrā 'l-khaṭa'* or *ḳā'im maḳām al-khaṭa'*) "equivalent to *khaṭa'*," i.e. the factor of deliberation is lacking in the action (and also the intention of directing the action illegally against another) in the circumstances of *b*) and *c*), for example: someone falls upon another in his sleep or falls from a roof upon him and kills him; the legal results are the same as in *b*);

e) as *ḳatl bi-sabab* "indirect killing", i.e. someone brings about the death of another without doing anything directly against him; e.g. he digs a well and someone falls into it and dies as the result; sometimes this category is treated as a subdivision

ʿd); but it is a matter of indifference, whether the act, which indirectly results in the death of another, is deliberate or not, intentional or unintentional; even if the action has been planned in some very cunning way such as setting a savage beast on another person with the intention of causing his death, it does not alter the situation. The legal consequences are in any case limited to the obligation upon the *ʿāḳila* of the doer to pay the lighter *diya*; larger works on *Fiḳh* usually discuss very fully the question what acts are to be considered direct causes of death and which are *ḳatl bi-sabab* and in which there can be no question of a causing of death so that no legal consequences result.

Two cases are especially dealt with in the *Fiḳh* books: a) The causing of a premature birth or abortion and β) killing through giving false evidence.

α) If in causing an abortion or premature birth, the embryo — which must be sufficiently developed to be of human form — is brought into the world dead or dies after the birth or the mother dies, it is not a case for the application of *ḳiṣāṣ*; there is in any case no *ḳatl ʿamd* in the mother whose killing is dealt with under the above rules and the embryo before completion of birth is legally not in full possession of its powers but is usually regarded as a limb of the mother. [Hence we have the following law: if the head of a child appears out of the mother's womb at birth and the child cries (and is therefore certainly alive) and then someone cuts off its head, it is not a case for *ḳiṣāṣ* and only the punishment prescribed for producing an abortion is to be inflicted]. Different amounts are to be paid for the embryo according to the different cases and if it comes alive into the world and then dies the person who causes its death is liable to *kaffāra*; he also loses any inheritance that might have come to him.

β) If anyone is killed on evidence which shows that a crime deserving death has been committed and then the witnesses recall their evidence or in other ways it is proved that their testimony was false, *ḳiṣāṣ* cannot be executed on the witness; the *diya* must be paid, the heavier if the false evidence was deliberately given, the lighter if otherwise.

6) We may add the following — taking only the most important points — to the above exposition of the Ḥanafī system, with reference to *ikhtilāf* (difference of opinion among the schools).

a) On *ʿamd*: the difference of opinion within the Ḥanafī school already mentioned, regarding the part of the intention to kill in *ʿamd* is also found outside the Ḥanafī school; among the Shāfiʿīs the view which does not demand the existence of the intention to kill has become predominant, and the evidence for the other views is sometimes interpreted as meaning a presumption of intention. Abū Yūsuf and al-Shaibānī, in agreement with Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal, assume *ʿamd* if the action is as a rule fatal; Abū Ḥanīfa, on the other hand, limits it to the use of a weapon or of a thing which can be used like a weapon to cut off limbs; among such he includes fire; deliberate killing, for example with a large unsharpened stone, or a big stick, which in the ordinary way would kill, or by drowning in water, which would be generally regarded as of sufficient depth to do so, is therefore considered by the former as *ʿamd*, but by Abū Ḥanīfa as *shabah ʿamd*, relying on a passage in the so-called first temple speech of Muḥammad, which the champions of the other view naturally interpret otherwise, and this view was later considered the better by the Ḥanafīs. The qualification of the various actions generally differs sometimes considerably and the Ḥanafīs often make use of *istiḥsān*, exercise of discretion. In the Mālikī and Ḥanafī view no *kaffāra* is to be performed for *ʿamd*; al-Shāfiʿī, on the other hand, demands it if the *ḳiṣāṣ* is not executed and both views are given on the authority of Aḥmad Ibn Ḥanbal.

b) On *Khaṭaʾ*: that *khaṭaʾ* is not a sin is more exactly explained to mean that it is neither permitted nor forbidden but that this killing is rather *fiʿl al-ghāfil*, "action of a thoughtless person", and is to be judged in the same way as the act of a mentally defective person or of an animal. Except in the Ḥanafī madhhab, categories *d*) and *e*) (sub 5) are not distinguished from *khaṭaʾ*, which also was the earliest Ḥanafī view (*Z.D.M.G.*, lviii. 338) and *ḳatl bi-sabab* has generally the same legal consequences as *khaṭaʾ*; we thus have three kinds of *ḳatl*: *ʿamd*, *shabah ʿamd* and *khaṭaʾ*, of which *shabah ʿamd* is considered to be composed of *ʿamd* and *khaṭaʾ*.

c) On *shabah ʿamd*: this category is also called *ʿamd khaṭaʾ*, *khaṭaʾ ʿamd* or *khaṭaʾ shabah ʿamd*; in contrast to it, *ʿamd* is also called *ʿamd maḥḍ* and *khaṭaʾ* also *khaṭaʾ maḥḍ* (pure *ʿamd* or *khaṭaʾ*); the application of *ḳiṣāṣ* is said to be permissible by al-Shāfiʿī if the killer, for example, repeats the blow with an instrument not normally adapted for killing so frequently that the person attacked dies; the act is then considered *ʿamd*; one of the two opinions handed down on the authority of Abū Yūsuf and al-Shaibānī is to the same effect while the view that became predominant in the school was to the contrary. Mālik allows *ḳiṣāṣ* in *shabah ʿamd* in general.

d) On *ḳatl bi-sabab*: Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal demand *kaffāra* in addition, if the placing of the cause of the death was illegal.

e) Different views also prevail as to the amount to be paid for the killing of an embryo.

f) On causing death through false witness: if the false evidence was deliberately given, according to al-Shāfiʿī and the better known opinion of Mālik, *ḳiṣāṣ* can be executed on the witnesses.

7) Notes on the question of permission, request, compulsion and assistance in illegal killing. a) If someone kills another by his request or with his permission there is neither *ḳiṣāṣ* nor obligation to pay *diya*.

b) No definite punishment is laid down for the case of a request to kill someone; such a request does not mean the exemption of the slayer; only if the person requested is a minor or a slave claims may be made from the *ʿāḳila* of the minor, or from the proprietor of the slave.

c) A forces B to kill C; then, according to Abū Ḥanīfa, the *ḳiṣāṣ* is executed on A, according to Mālik and Aḥmad Ibn Ḥanbal on B; as to al-Shāfiʿī's view, there is no doubt that A is liable to *ḳiṣāṣ*; as regards B both possible views are transmitted, of which the one that ultimately became predominant in the school makes him also liable to *ḳiṣāṣ*. Mālik further makes A also liable to *ḳiṣāṣ* if the compulsion comes from a person having authority, or from a master to a slave.

d) A holds B and C kills him while he is held; in this case Abū Ḥanīfa and al-Shāfiʿī make C liable to *ḳiṣāṣ* and A to *taʿzīr*, which is more definitely defined as imprisonment. According to Mālik, both are to be regarded as culprits and therefore liable to *ḳiṣāṣ* if the holding was necessary to facilitate the slaying and B was not able to escape after being held. Aḥmad Ibn Ḥanbal's opinion is given in two versions; according to the one, *ḳiṣāṣ* is executed on C and A is punished with imprisonment for life, according to the second opinion, A and C are both liable to *ḳiṣāṣ*.

II. Ḳatl as punishment.

The punishment of death may be described quite generally as *ḳatl*; in the following account cases in which it is applied are given seriatim; in contrast to *radjm* and *ṣalb* (cf. below) *ḳatl* is also used in the narrower sense of execution with the sword.

1) In the cases of illegal killing described in detail above, the nearest relative of the dead man, who in this capacity is called *walī al-dam*, is entitled to kill the culprit in retribution if certain definite conditions are fulfilled. This punishment is called *ḳiṣāṣ* or *ḳawad*, names which also cover retribution exacted for wounds which are not fatal; for further information see the article ḲIṢĀṢ.

2) There are special regulations regarding sorcerers (*sāḥir*), about whom there are also various traditions. Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal recognise sorcery (*siḥr*) as an actual force. Abū Ḥanīfa disputes this, but there is a consensus of opinion that it is forbidden to study it; it is even described as unbelief (*kufr*) almost as a general rule. Mālik and Aḥmad Ibn Ḥanbal say that the sorcerer is to be killed with the sword simply for studying, teaching and practising magic; al-Shāfiʿī limits this punishment to the case in which someone has been killed by sorcery (i.e. he makes it a case for *ḳiṣāṣ*, which in practice is only justified by the confession (*iḳrār*) of the guilty person; while the punishment in Abū Ḥanīfa, Mālik and Aḥmad b. Ḥanbal is regarded as *ḥadd*); two different, more lenient views are credited to Abū Ḥanīfa. Opinions differ on particular questions, such as whether the conversion of the sorcerer effects a remission of the punishment, whether a woman is to be punished equally with a man, how sorcerers of the *Ahl al-Kitāb* are to be treated, how far soothsaying is to be considered sorcery.

3) The punishment of death by stoning (*radjm*) — in certain circumstances also by the sword (*ḳatl*) — occurs as *ḥadd* in certain cases of immorality; on this see the article ZINĀ.

4) Highway robbery (*ḳaṭʿ al-ṭarīḳ*) may also in certain circumstances be punished with death. The authority for this is Ḳurʾān, v. 37 *sq.* (from about the year 6 or 7, before the capture of Khaibar; Grimme puts the verse before the battle of Badr): "The punishment of those who fight against Allāh and His prophet and create ruin upon the earth is that they shall be slain or crucified or have their hands and feet cut off on the opposite sides or be banished from the country. This is their humiliation in this world and in the next world they shall be severely punished — unless they repent before ye have them in your power . . . ." It can be asserted with certainty that this refers to the unbelievers, very probably to the Jews; ruthless war is ordered to be waged on them and their repentance is the adoption of Islām. There are still traces of this interpretation in the commentaries. But in general this passage is connected with Muḥammad's attitude to certain *murtadd*'s which will be dealt with in section 5); this cannot be correct, if only because the procedure there practised does not entirely conform to those rules, so that they were forced to restore harmony in a different fashion. These *murtadd*'s were considered as highway robbers, from the point of view of the later definition rightly and only in this way could a law for the punishment of highway robbers be found in the Ḳurʾān.

The more important laws of the Sharīʿa are the following. Only such persons as are adults in full possession of their faculties and who are able to be dangerous to travellers are to be considered highway robbers. According to Abū Ḥanīfa, highway robbery can only take place in the open country, according to Mālik, al-Shāfiʿī and Aḥmad Ibn Ḥanbal in the town also. Mālik gives the Imām — and this is certainly the correct interpretation of the passage in the Ḳurʾān, which is also found in the commentaries — absolute freedom in the choice of punishment, even in the contingency of a cumulative application, whatever form the robbery may have taken; but if the person concerned has killed someone (in this connection killing implies a murder to which *ḳiṣāṣ* might be applied), he must at least be executed with the sword. The three other Imāms grade the punishment to fit the different forms of robbery on the highway; according to Abū Ḥanīfa, the criminal is put to death if he has caused the death of his victim; if he has also robbed him (and in such a way, it must always be understood, that the *ḥadd* for theft can be carried out; cf. the art. SARIḲ), he may be further punished by cutting off his hands and feet on alternate sides and with crucifixion (*ṣalb*) which in that case takes the place of killing with the sword; if he has only committed a robbery, we have only the cutting off of hands and feet on alternate sides; according to al-Shāfiʿī and Aḥmad b. Ḥanbal, he is killed, if he has killed his victim; if he has also committed a robbery, he is crucified after being put to death; if he has only committed a murder, he is punished by cutting off his hands and feet on alternate sides; if he has only made the neighbourhood unsafe, then, according to Abū Ḥanīfa, al-Shāfiʿī and Aḥmad b. Ḥanbal, he is put in prison; whether this must be done in another place is a debated point. In Abū Ḥanīfa and Mālik (also in some Shāfiʿī's but their view is rejected by the school) crucifixion consists in the criminal being tied alive to a cross or a tree and his body ripped up with a spear so that he dies, and this is certainly the more original form; according to al-Shāfiʿī and Aḥmad b. Ḥanbal, he is first killed with a sword and then his corpse is ignominiously exposed on a tree or cross. All these punishments are *ḥadd* and a right of Allāh; therefore any renunciation by the *walī al-dam* of the *ḳiṣāṣ* is of no avail even though it is he who has the right to carry out the *ḳatl*. If the criminal repents before he falls into the hands of the authorities (what exactly is meant by repentance is disputed) these *ḥadd* punishments are dropped; but claims by individuals to *ḳiṣāṣ* etc. can still be enforced against him.

5) The *murtadd*, that is the renegade from Islām, is liable to the death-penalty if his apostasy is proved. If we leave out the passages dealing with the *munāfiḳ*'s [q. v.] who are separately dealt with — their execution is, however, described under

certain conditions in Ḳurʾān, iv. 91 — there is no such law in the Ḳurʾān referring specially to the *murtadd*, although xvi. 108 (third Mekkan period), ii. 214 (of the year 2), iii. 80—84 (Medina; placed by Grimme shortly before or after the battle of Uḥud), 102 (soon after the battle of Uḥud), iv. 136 (of the same period) threaten the eternal punishment of hell for all those who apostasise from Islām and do not repent, as well as for all unbelievers, and in iii. 95 *sq.*, 142, and ix. 67, a warning against apostacy is uttered. Among the traditions we find in various forms the story that Muḥammad, contrary to the rules of the Sharīʿa, cruelly mutilated and killed some *murtadd*'s, who had killed one or more of his herdsmen and driven away the camels, but the tradition is probably correct just for this reason. This contradiction was felt and an endeavour was made in the ḥadīth's to justify the cruelty of the punishment, and even the text was altered. Of ʿAlī also a cruel act, of another kind, however, is recorded in a similar case, but Ibn ʿAbbās is said to have protested against it. Two *murtadd*'s, each of whom had killed a Muslim, were executed by Muḥammad's orders after the capture of Mekka; a third man, against whom there was nothing but his apostacy, was also placed on the list of the proscribed; his foster-brother ʿUthmān, however, obtained security (*amān*) for him although Muḥammad would gladly have seen someone kill him before immunity was granted; he later became a Muslim again. There is also a saying of Muḥammad's: "Slay anyone, who changes his religion" or "He who secedes from you shall die", and others similar, e. g. that the blood of a Muslim could only be shed for apostasy, *zinā* and *ḳatl ʿamd*; there is also a story that Muʿādh b. Djabal killed a *murtadd* because Allāh and His Prophet had so ordained; Muḥammad is also said to have ordered that conversion should first of all be attempted and a period of three days allowed for this; but all this can hardly be genuine. There are also the traditions regarding the *Ahl al-Ridda* (cf. the art. RIDDA) who refused the *zakāt* and were treated as apostates by Abū Bakr. The tradition "He who is a good Muslim will not be punished for his sins from the pagan period but he who is a bad Muslim will have them counted against him" does not refer to the *murtadd*, as it is usually said to do.

The punishment of death laid down by the *sharīʿa* for the *murtadd* is sometimes described as *ḥadd*, sometimes not; in the latter view he is simply killed as an unbeliever (*kāfir*) and the punishment need not be carried out in every individual case. Only an adult in full possession of his faculties and not acting under compulsion can become an apostate from Islām; opinions are divided regarding a man who apostacises while intoxicated or a minor (on the verge of his majority) capable of discernment (*murāhiḳ*, *mumaiyiz*). There is also difference of opinion regarding the attempt at conversion and the granting of a period, usually fixed at three days, for reflection. If the *murtadd* does not repent, he is to be beheaded with the sword; torture and cruel methods of execution are forbidden. According to al-Shāfiʿī, his punishment is left to his owner, if he is a slave. Abū Ḥanīfa and his school limit the punishment of death to male apostates and the consensus of opinion excludes the minor; a woman (and also a minor) is imprisoned and beaten every three days till she repents; according to Abū Ḥanīfa (contrary to Abū Yūsuf and al-Shaibānī) she may also be made a slave and this is recognised as right by the school. Anyone who puts to death a *murtadd* of whatever kind without powers granted by the authority, is generally liable not to *ḳiṣāṣ*, but only to *taʿzīr*. The same rules generally hold for repeated apostacy.

Similar to the punishment of the *murtadd* is that of the *zindīḳ*, i. e. anyone who, professing to be a Muslim, is really an unbeliever or any who belongs to no religion (cf. Massignon, *Al-Hallaj*, i. 186 *sqq.*). The conversion of a non-Muslim to another non-Muslim religion is similarly dealt with, although such an one is not called *murtadd*. He can only escape punishment by adopting Islām; on the whole of this cf. Goldziher, *Muhammedanische Studien*, ii. 215 *sq.*

How exactly one becomes an unbeliever and therefore a *murtadd* is disputed in particulars, especially the question how far this is the case with irreverent utterances regarding Allāh or one of His prophets; there are various special enactments regarding the latter, which threaten the death penalty to non-Muslims and in part allow a Muslim no remission of punishment if he recalls the words.

For further information see the article MURTADD.

(6) There is no law in the Ḳurʾān for dealing with a man who omits the *ṣalāt* (ritual prayer) (*tārik al-ṣalāt*), where its performance is, on the other hand, often strictly enjoined, and not a single unequivocal ḥadīth on the subject can be found — quite apart from any question of genuineness. The *Sharīʿa* lays down the law as follows: — Anyone who does not perform the *ṣalāt*, as in duty bound, without denying its obligatoriness (anyone who does this is *murtadd*) and has no — even invalid — excuse for this, according to Mālik, al-Shāfiʿī and the more popular of the two views credited to Aḥmad b. Ḥanbal, if he does not atone, i. e. makes good his omission and says he will never commit the fault again, is to be executed with the sword. This punishment is also sometimes described as *ḥadd*. According to Abū Ḥanīfa, the culprit is imprisoned till he again performs the *ṣalāt*. In all these views he is considered a Muslim, while the other view attributed to Aḥmad b. Ḥanbal deals with him entirely as an unbeliever, i. e. a *murtadd*, but these regulations are modelled on those for apostacy (cf. the remarks on the *Ahl al-Ridda* above).

There are two more cases in which the suppression (*ḳitāl*) of the enemies of orthodox Islām is prescribed; killing, of course, plays the main part and therefore we must discuss this aspect of the process here.

(7) Firstly, the fighting of the *bughāt* is prescribed. It is said in Ḳurʾān, xlix. 9 (late Medina period): "If two parties of the believers contend with one another, make peace between them, but if one oppresses the other (*baghat* — from which *bughāt* is the plural of the participle), fight against the party which oppresses until they again obey Allāh's command; and if they do this, make peace between them with equity and act with justice" (this refers to a quarrel among the *anṣār*). Oppression is often forbidden and disapproved of elsewhere. But Muḥammad at any rate did not know the later conception of *bughāt*, although

its development begins at a point closely connected with this. Some traditions on the *bughāt* are in agreement with the legal enactments.

The *Sharīʿa* understands by *bughāt* sectarianising Muslims who reject the authority of the Imām, are able-bodied, so that they might offer resistance, and justify their attitude, although erroneously, with their dogmatic conviction (they are to be distinguished from highway robbers, for example — individual *bughāt*, who are guilty of breaches of the law are punished like them —, on the one hand, and unbelievers on the other). If they do not attack the orthodox community, they need not be attacked; otherwise their suppression is a duty of the Imām (the head of the Islāmic community) and a *farḍ al-kifāya* for the Muslims (cf. the art. FARḌ). This punishment is also sometimes called *ḳatl*. In general the rule is that only participants in the actual battle can be killed during the fighting. Fugitives, wounded, those who surrender and prisoners, as well as women and children, cannot be put to death. According to Abū Ḥanīfa, the Imām may kill a prisoner if he knows that he would again join the *bughāt* if spared; according to him, a captured slave who has been fighting by the side of his master can also be killed.

(8) Regarding the *Djihād* see that article; there are also traditions regarding the following regulations. If the unbelievers with whom war is being waged are not among those from whom the *djizya* can be taken — who exactly those are is a matter in dispute — the men are killed, if they do not adopt Islām and the women and children enslaved. If, on the other hand, they refuse Islām and will not pay the *djizya*, they are to be fought. All able-bodied men can be killed as long as they are not taken prisoners; men incapable of bearing arms, as well as women and children, cannot in general be so dealt with unless they take part in the fighting or assist in it in some way; they are to be taken prisoners and enslaved. The free, able-bodied prisoners may be (*a*) executed with the sword if they will not now adopt Islām; (*b*) made slaves; (*c*) exchanged for Muslim prisoners; (*d*) ransomed; (*e*) or set free without a ransom being paid (in all these cases by the Imām). Anyone who kills a prisoner without authority is only punished with *taʿzīr*.

Every unbeliever who does not pay the *djizya* or does not belong to a people which has a treaty with the Muslim community or is not a *mustaʾmin* (on these cf. the art. *aman*) is *ḥalāl al-dam* (to be killed with impunity) and may at any time be killed by any Muslim without his being liable to *ḳiṣāṣ* or to pay any *diya* or perform *kaffāra*. This enactment is only the natural consequence of the *djihād* law and Muḥammad himself not infrequently made use of it.

(9) The views of the Shīʿis on all the points dealt with above agree almost entirely with one or other of the Sunnī views. It would take up too much space to deal with them in a similar fashion.

(10) The infliction and execution of the death penalty was in practice very often in strong contradiction to the regulations laid down in the *Sharīʿa* (cf. the art. ʿADHĀB; Snouck Hurgronje, *Verspreide Geschriften*, ii. 200, etc.). The historians afford many examples for the actual practice and so do accounts of European travellers; on the conditions in the empire of the caliphs in the tenth century see Mez, *Die Renaissance des Islâms*, p. 347 *sqq.*, also Massignon, *Al-Hallaj*, i., especially p. 220 *sqq.*, 292 *sqq.*; on those in Egypt in the first half of the nineteenth century see Lane, *Manners and Customs of the Modern Egyptians*, end of the chapter on *Religion and Law*; on those in Persia in the same period see Polak, *Persien*, i. 328 *sq.*; on those in the Ottoman empire of the eighteenth century see Mouradgea d'Ohsson, *Tableau Général de l'Empire Ottoman*, especially vol. vi. (1824), p. 244 *sqq.*; for Turkey the *Ḳānūnnāme's* are also useful (cf. *Mitteilungen zur osmanischen Geschichte*, i. 13 *sqq.*); among the published sources quoted there are of special importance: Digeon, ii. 245, 262; v. Hammer, *Staatsverfassung*, i. 125, 133, 143—150; *T. O. E. M.*, iii. (1328), Appendix i. 27 *sq.*, ii. 1—4, 7, 9; *M. T. M.*, i./iii. 341 *sq.*) and from the *Ḳānūnnāme* itself (edited there; p. 19—21, 32—34.

Bibliography: The *Fiḳh*-books, the works given in the article ʿADHĀB, especially Juynboll, *Handbuch des islâmischen Gesetzes*, p. 284—309, and the literature there given; the articles MURDER and EXECUTION in T. P. Hughes, *A Dictionary of Islam*. Besides the articles already referred to, the article ʿADHĀB and those dealing with the Arabic expressions not explained above should be consulted.

(J. SCHACHT)

ḲAṬRĀN B. MANṢŪR, a Persian poet. ʿAwfī calls him Ḳaṭrān al-ʿAḍudī al-Tabrīzī; according to Dawlatshāh, he was born in Tirmidh. Others say he was born in Djabal-i Dailam; Djabalī is also found as his *nisba*. Dawlatshāh says that he spent some time in Balkh and later lived in the ʿIrāḳ. The period of his literary activity lies about the middle of the eleventh century A. D. Nāṣir-i Khusraw mentions in the *Safarnāma* that he met Ḳaṭrān in Tabrīz in 438 (1046); a well-known poem by Ḳaṭrān commemorates the earthquake in Tabrīz in 434 (1042/43). According to a *tadhkira* quoted in Rieu, *Supplement*, p. 140, our poet died in 465 (1072). He was the panegyrist of the rulers of Dailam and of Ādharbaidjān; among his patrons are mentioned the Amīrs Faḍlūn, Wahsūdān, Abū Naṣr Mamlān b. Wahsūdān, who was appointed over a part of Ādharbaidjān by the Saldjūḳ Sulṭān in 450, and Muḥammad b. Kamādj (according to Dawlatshāh, governor of Balkh and Sandjar; if this is correct he long survived the poet) and further the Būyid ʿAḍud al-Dawla, as is indicated by the epithet ʿAḍudī given by ʿAwfī.

Works. Ḳaṭrān left a *Dīwān* (manuscripts of which are found in European collections) and a *mathnawī* called *Ḳaws-nāma*. The poems of Ḳaṭrān are sometimes wrongly attributed to Rūdagī in manuscripts; the confusion is caused by the similarity of names of their respective patrons (Naṣr b. Aḥmad the Sāmānid in the case of Rūdagī and Abū Naṣr Mamlān in the case of Ḳaṭrān). On this question cf. Rūdagī and Pseudo-Rūdagī by E. Denison Ross in *J. R. A. S.*, 1924, p. 609 *sqq.* Criticisms on the poetry of Ḳaṭrān are given by Nāṣir-i Khusraw and Waṭwāṭ. The former says, curiously enough, that Ḳaṭrān did not know Persian well but otherwise was a good poet; Waṭwāṭ (in Dawlatshāh) places him very high and allots him a special position with regard to the other poets. ʿAwfī's verdict on Ḳaṭrān means very little for us, as this author regularly introduces each of his biographies of poets (if we may so call his inflated empty prose) with a rhetorical eulogy of the person

in question. But he is at least to the point when he says that Ḳaṭrān was fond of rhetorical artifices and particularly of the kind called *tadjnīs* (cf. Ibn Ḳais al-Rāzī (*Mu'djam*, Gibb Mem. Ser., x. 309 *sqq.*). The only quotation from Ḳaṭrān given in Ibn Ḳais's manual of poetics (p. 312) is quoted to illustrate one of the varieties of *tadjnīs* (*tadjnīs-i nāḳiṣ*). On Ḳaṭrān's skill in managing the more difficult poetic forms cf. also Dawlatshāh, p. 67, 14 *sq.*

Although the *Dīwān* is not yet published one can form a fair opinion of the skill of the poet from what is in print. A few *ḳaṣīda*'s and fragments of *ḳaṣīda*'s are given in Schefer, *Chrestomathie Persane*, ii. 240 *sqq.*, others in Browne's edition of 'Awfī's *Lubāb al-Albāb* (ii. 214 *sqq.*). All that is given in Dawlatshāh (ed. Browne, p. 67 *sq.*) is also found in 'Awfī, only Dawlatshāh gives much less and has a few unimportant variants. The oft occurring substitution of Arabic terms for the rarer Persian words is also found in him; thus the less well known *shamar* (= pond; 'Awfī, ii. 215, 10) becomes in Dawlatshāh (p. 68, 1) *thamar* and the verse is, of course, nonsense (or it may be that we have simply a copyist's mistake). It may be assumed that Dawlatshāh, as far as the poems are concerned, simply copied 'Awfī.

In the poems printed in Schefer, rhetorical artifices are not more used than in the other panegyrists, for example Minūčihrī or Azraḳī; we find among other figures *Tashbīh wa-Tafsīr*, p. 245 paenult., p. 246, 1 *sq.*, *murāʿāt*, p. 246, 1. These poems have something in common with the old panegyrics; the three fragments of *ḳaṣīda*'s describing spring, autumn and winter, contain themes already known from Minūčihrī, such as the comparison of wine-grapes with persons, namely negroes and Rūmī's, while Minūčihrī compares them with little girls.

Ḳaṭrān gives more prominence to the epic element in his panegyrics than do his predecessors. The first poem in Schefer (ii. 240) is noteworthy in this respect; its *madḥ* commemorates a victory of the Amīrs Wahsūdān and Mamlān, and the often quoted song (p. 243) to Mamlān, the *tashbīb* of which contains the description of the earthquake which demolished the town of Tabrīz in 434 (1042), is equally noteworthy; this description is in this case the main thing. The fragments in 'Awfī are obviously chosen to illustrate the use of *tadjnīs* by the poet, which is discussed in the prose notice of Ḳaṭrān by this author. The *tadjnīs* found here is almost exclusively the *tadjnīs-i muzdawidj* (Ibn Ḳais, p. 313); the *tadjnīs-i nāḳiṣ* (cf. Ibn Ḳais, p. 312) is also found (p. 214, 14: *gilāb-gulāb*) and *takrīr* (cf. Ibn Ḳais, p. 315) in the second part of the distich ('Awfī, ii. 214, 16). The rhetorical effect achieved by means of homonyms (*tadjnīs-i tāmm*; cf. Ibn Ḳais, p. 309), of course, occurs, e. g. 'Awfī, ii. 216, 9—11, where the word *tīr* is repeated four times each time with a different meaning. In contents these fragments offer nothing new or noteworthy.

The prominence deliberately given to the narrative element in the court-lyric may be an innovation of Ḳaṭrān's own. That his lead was followed is shown by Dawlatshāh, who not only calls Anwarī a pupil of Ḳaṭrān's but also mentions others (Rashīdī, Rūḥī, etc.) and "most poets of Balkh and Transoxiana".

Phil.*, ii. 220, 255—256, 258; Browne, *A Literary History of Persia from the earliest times until Firdawsī* (1902), p. 86, 462; do., *A Literary History of Persia from Firdawsī to Sa'dī* (1906), p. 222, 271, 399; Rieu, *Supplement*, p. 72, 76, 82, 138, 232; Schefer, *Chrestomathie persane*, ii., French text, p. 240—242.

(V. F. BÜCHNER)

AL-**KATTĀNĪ**, MUḤAMMAD B. DJA'FAR B. IDRĪS, a member of the important family of the Kattāniyīn and Sharīf in origin, a contemporary Moroccan writer (he was still writing in 1314 A.H.). He is the author of a number of works including a book in honour of his ancestor Idrīs (*al-Azhār al-'Āṭira al-Anfās bi-dhikr ba'ḍ Maḥāsin Ḳuṭb al-Maghrib*, Fās 1314 A.H.). The most important is his *Salwat al-Anfās wa-Muḥādathat al-Akyās bi-man uḳbira min al-'Ulamā' wa-'l-Ṣulaḥā' bi-Fās* (3 vols., Fās 1316 = 1898—99). The first part of this book is devoted to showing the merit which is acquired by visiting *zāwiya*'s and tombs of saints. He then proceeds to give, quarter by quarter, the illustrious men who have lived in Fās or are buried there and this part of the book contains valuable information on the historical topography of the town. He consulted a considerable number of books a list of which he gives at the end of the third volume. We know no details of his life, not even the date of his birth.

Basset, *Recherches bibliographiques sur les sources de la Salwat al-Anfās*, Algiers 1905; Codera y Zaidin, *Considerable numero de libros antiguos y modernos existentes in Marruecos*, *Actes du XIVe Congrès international des Orientalistes* (Algiers), iii/ii., Paris 1908, p. 587—590.

(RENÉ BASSET)

ḲAWĀLA (also Cavalla), a seaport on the Aegean Sea, opposite the island of Thasos on the boundary between Macedonia and Thrace. In ancient times Neapolis lay here, the port of the town of Philippi, just as Ḳawāla is now the harbour for the district of Drama. The town is partly built on a promontory which is still surrounded by walls which date from the middle ages; there is a harbour on both sides. An aqueduct has also survived from the middle ages. Ḳawāla was captured by the Turks from the Byzantines in the reign of Murād I, who conquered Thrace. Murād had sent the sandjak-bey Deli Balban to besiege Seres; soon afterwards he sent Lala Shāhin to assist him; the latter then captured Ḳawāla, Drama and Seres. This event is usually placed in the year 775 (1373/74) (Sa'd al-Dīn, *Tādj al-Tawārīkh*, Constantinople 1279, i. 91, and von Hammer, *G.O.R.*, i. 181, whose statements are inaccurate in other respects); the anonymous chronicler, ed. Giese, p. 26, on the other hand, gives the date 787 (1385/86). He adds that nomads from Sarukhān were then settled here and in the Vardar plain. Not much more is heard of Ḳawāla in Turkish history; Sulaimān I fortified it before beginning his campaign against Rhodes. The population probably always remained predominantly Greek. Muḥammad 'Alī, the Egyptian Khedive, was probably born here; at any rate he lived here in his youth (born about 1769; Dj. Zaidān, *Mashāhīr al-Sharḳ*, Cairo 1910, i. 1). Muḥammad 'Alī later endowed the town with a school (Mühendis-khāne) and other foundations, for the upkeep of which he set aside the revenues of the island of Thasos.

In the xix[th] century Kawāla attained great importance as an exporting harbour and the main depot for the tobacco grown in the neighbourhood and in the whole hinterland (Drama, Seres and Xanthi). In the years before 1912 this brought the Turkish Tobacco Regie an annual profit of over 10 million francs; the tobacco is for the most part manufactured in Kawāla and every year 5,000—6,000 people from the surrounding country come into the town for five months for this work. This is probably why the figures given for the population differ so much (cf. e. g. Sāmī, *Ḳāmūs al-Aʿlām*, v. 3704). According to an accurate calculation, before the Balkan war there were 17,000 Greeks, 13,000 Turks, 1800 Jews and 800 Bulgarians in Kawāla (Nicolaides, *Griechenlands Anteil an den Balkankriegen*, Vienna and Leipzig 1914, p. 222). The town at that time was the capital of a ḳaḍā of the same name in the sandjaḳ of Drama in the wilāyet of Salonika.

The treaty of San Stefano (March 13, 1878) had already given Kawāla to Bulgaria. In the first Balkan war the town fell into the hands of the Bulgarians (Nov., 1912) but in the second Balkan war it was taken by the Greek fleet (July, 1913) and finally incorporated in Greece by the peace of Bucharest (Aug. 10, 1913) in spite of Bulgaria's protests (Nicolaides, *op. cit.*, p. 367 *sqq.*). Since then many Greeks have migrated thither from Xanthi and the number of Turks in the population must have been considerably reduced.

(J. H. Kramers)

KAWĀR, a group of oases situated in the Sahara (Bilma, the most southern oasis, is in 18° 41′ N. Lat. and 13° E. Long.), to the west of the massif of Tibesti on the caravan route from Tripoli to the country round Tchad via Fezzān [q.v.]. On this route Kawār is nearly halfway between Fezzān and Kānem, separated from the former by a ḥammāda and from the latter by a region of sand-dunes. It owes its formation to a continuous chain of cliffs running from north to south, which bounding it on the east shelters it from the dreaded winds from the north-east. It is a couloir of oases, about 50 miles long from north to south and never more than 2 to 3 miles broad. The water is at no depth and fairly abundant but usually brackish. In all the oases together there are about 100,000 palm-trees; the inhabitants, whose number does not exceed 3 or 4,000, are Tubu by race, considerably mixed with Kanūrī blood (the common language is Kanūrī); they are sedentary and peace-loving, unlike their kinsmen who live in Tibesti. They are scattered up and down in a dozen villages of which the chief are Anai, Ashnuma, Dirku and Bilma; these villages consist of wretched huts but beside each one on a cliff inaccessible except by ladders a place of refuge is prepared, a precaution which until quite recently was far from being unnecessary. The inhabitants live on the produce of their palm-trees, the poor crops which they raise and particularly by trading. The caravan route from Tripoli to Tchad via Fezzān, although hard, is the shortest of those that cross the Sahara; it was at one time very busy and Kawār was the place where it was joined by the roads from Zinder and Agadès; its inhabitants were destined to become caravan-men. But their principal revenue came from their salt-pans. Those of Bilma are especially famous. The salt which the waters bring to the surface of the soil is treated by evaporation and pressed into cakes of great purity. Some is sold to the Tuaregs who come to buy it on the spot along with dates; the remainder is exported to all quarters of the Sūdān from the Niger to Dārfūr. The salt-pans of Kawār are of the same importance for the country as those of Taodeni for the region of Timbuktu and the western Sahara.

The history of Kawār is very obscure. The caravan route on which it lies was already in use in ancient times although we have no formal evidence of this. In any case this group of oases was already in existence at the time of the conquest of North Africa, if we may rely on the stories of the Arab historians who attribute its conquest to the legendary hero of the conquest, ʿUḳba b. Nāfiʿ. He is said to have taken the castles of Kawār one after the other. Al-Idrīsī, in the twelfth century, several times mentions the importance of the trade through these regions. He mentions inexhaustible mines of alum; there must be some confusion with the salt-deposits. It seems that at this time Kawār was under independent local chiefs. Later when the kings of Kānem extended their authority over Fezzān, they certainly held Kawār; this is the situation described by Ibn Khaldūn following Ibn Saʿīd; for the rest, local traditions seem to preserve the memory of migrations from the south. It is certain that a strong power at one or other extremity of the caravan route would try to control the whole route.

In the xixth century, Kawār was visited by several European travellers: first in January, 1823, by the Denham, Clapperton and Oudney expedition and then by Vogel, Barth, Rohlfs and Nachtigal and lastly by Monteil. In the closing years of last century Kawār was in a somewhat wretched condition. It was under the nominal authority of a chief (*mai*) elected by the notables; in reality each village ruled itself. Kawār had been seriously affected by the general decline of trade in the Sahara; it was still more affected when the French occupation of the Tchad region put an end to the slave-trade, the principal source of business. The inhabitants paid tribute, apparently to the Tuaregs; they were nevertheless plundered and blackmailed by them and raided by the Tubu and Awlād Slīmān. The Kawār then became the centre of political aspirations. The Sanūsiya had had a zāwiya there for quite a long time; it was a necessary station for them when they were endeavouring to extend their influence in the countries of Central Africa and when the Sanūsī Shaikh dreamed of creating a regular principality bounded by the two sides of the Sahara. The Turks also tried to make their authority recognised in the Kawār as they tried to do at Djanet and in Tibesti. The occupation of the Kawār by French troops from the Tchad region in July, 1906, and the establishment of a permanent post there put an end to these efforts, at the same time giving the inhabitants of this group of oases effective protection from the exactions of their turbulent neighbours.

KĀWĪN (P.), marriage, dowry, see MAHR, NIKĀH.

KAWKAB, star, in Arabic astronomy the general term for a luminous heavenly body. The five planets known to the Arabs (Mercury to Saturn) were called *al-kawākib al-khamsa (al-mutaḥayyira)*. The general term for the sun, moon and the five planets is *al-kawākib al-djāriya* or *al-kawākib al-saiyāra* (i.e. the moving stars), in contrast to the fixed stars *(al-kawākib al-thābita)*. The name *kawkab shamālī* is applied to the star α of the Little Bear, which is nearest the north pole of the heavens. In al-Bīrūnī it is called *ṭarf al-dhanab wa-huwa djady al-ḳibla* (= tip of the tail, i.e. the little goat [for ascertaining] the ḳibla). This presupposes that from a knowledge of the north pole (direction of north) one can ascertain the diametrically opposite south, which is identical with the direction of the *ḳibla (samt al-ḳibla)*. This method of ascertaining the *ḳibla* is only correct in regions which lie approximately north of Mekka (cf. Reinaud's note in his introduction to *Géographie d'Aboulféda*, p. cxcv: „Or, la Mecque est au midi de la Syrie ainsi que d'une partie de la Mesopotamie et de l'Egypte (?), le mot Ḳiblah est devenu pour les musulmans de ces contrées, le synonyme de midi et il a été employé ailleurs avec la même acception"). Finally it may be mentioned that the stars α, β and η of Cepheus were, according to Ulugh Beg, also called *kawākib al-firḳ*, i.e. stars of the flock (of sheep).

A catalogue of fixed stars, of which the Arab astronomers had several, is called *Djadwal al-kawākib*.

(C. Schoy)

KAWKABĀN, the name of several places in South Arabia.

1) The name of a sanctum mentioned in the inscription Halévy N⁰. 686, copied from a building in 'Amrān by J. Halévy (*mikrāhān Kawkabān*). Cf. also F. Hommel, *Grundriss der Geographie und Geschichte des alten Orients*, ii., Leipzig 1925, p. 707.

2) The name of a castle near Ẓafār north of Nā'iṭ. It was called Kawkabān, the two stars, i.e. star-castle, because it was adorned with silver stripes outside, the roof was covered with white slabs of stone, the interior panelled with cypress wood and paved with mosaic, different gems, onyx and corundum, which shone like stars at night. This marvellous building was naturally ascribed to the Djinn. This castle is perhaps also mentioned in the inscription Glaser N⁰. 238, 3 (*Bait wa-Kawkabān*), which comes from Bait Ghufr in the vicinity. The castle is said to be still standing.

3) A little village on a great cliff on the right side of the Wādī Balāma, N. E. of Ḥadja and called Kawkabān-Ḥadja to distinguish it from other places of the same name.

4) Capital of the province of the same name, N.W. of Ṣan'ā'. The town of Kawkabān lies at a height of 8,750 feet above sea-level in 15° 31′ 42″ N.Lat. on the southern part of the ridge which begins about half a mile S. E. of the town of Kawkabān at the left towards Ṭawīla and runs S.E. to N.W. for several hours' journey. It is part of the great Maṣāna'a plateau and is called Djabal Ḍulā'. The south-eastern part of the range, the especially precipitous part, is separated from the main massif by an almost straight ravine, the Wādī Nabhān, which runs from Shibām past the one gate of the town of Kawkabān (Bāb al-Ḥadīd) to the Wādī Na'im west of the Djabal Kawkabān. Two roads run over this mountain, cut off only by the ravine of the Wādī Nabhān, the one through the town of Shibām, following the very deep ravine of Nabhān which is bridged over, an old winding narrow path of steps hewn out of the rock, and the second, an easier one, running in the Ḳā'a Ḍulā' and crossing a bridge over the Wādī Nabhān just before reaching the Bāb al-Ḥadīd. The town of Kawkabān stretches from the Bāb al-Ḥadīd to the S.E. and runs quite close to the eastern slope of the cliff all along that side. This part seems to be the oldest. Not very far from the gate on the great open square in the centre of the town (in the northern part) is a double wall for the most part now in ruins. Between the two walls a great number of skilfully walled pits have been cut out of the ground, which served as granaries for the old inhabitants. Similar granaries, but of more recent date, are to be found in the southern part and outside the town. The town itself consists of a large number of excellently built houses of red stone the architectural effect of which is often striking; the doors of the houses are often ornamented with fine iron work. The houses of the former Imāms now for the most part decayed or shot to pieces are particularly striking with their splendid façades. Besides the principal mosque with minaret, the only one in the town, there are seven small mosques. The water supply is provided from two large and finely built reservoirs; the one, called Muṣallā, lies in the south, exceedingly deep and enclosed on the west side by a wall 60 to 80 feet high. The second, to the east of it, begun but not quite finished by Saiyid 'Abd al-Karīm about 1840, is called Birka al-Ziyādi. There are also four smaller cisterns. This water-supply would suffice for a town three times the size of Kawkabān. The Jewish quarter lies E.S.E. outside the town but consists almost entirely of low mean houses with little windows and doors.

A stone bridge with huge arches led across the Wādī Nabhān to the Bāb al-Ḥadīd but it was blown up by the Arabs in 1872.

Kawkabān is an ancient city dating from the Ḥimyar period, as inscriptions found there show. Al-Hamdānī mentions a stronghold of Kawkabān on the summit of the Djabal Dhukhār which is certainly identical with the old town of the modern Kawkabān. In troubled times its strength made it a desirable place of refuge — in 1569 the Turks besieged the stronghold in vain — and for centuries Kawkabān has been important as a capital and residence of the Imāms of the principality of the same name. The latter comprised in addition to Kawkabān the towns of Shibām, Ḥadjja, Ṭawīla, the Khabt Mirwāḥ (between Kawkabān and Ḥarrāz), the lands of Mīswar, Sārī', Ḥafāṣ, Milḥān, Aḥdjir, 'Arīn, Banū Khaiyāṭ, al-Shahdhiya Lā'a, a part of the Banū Ḥubaish, the Banū Nāshir and of al-Aḥmar. The old dynasty of the country, which traced its descent from the Imām Hādī of Ṣa'da, was able to retain its imāmate even during Turkish rule and to maintain its independence from the imāms of Ṣan'ā' after the Turks were driven out in 1630. C. Niebuhr (*op. cit.*, p. 256; see the *Bibliography*) has given a genealogical survey of the princes of Kawkabān. When the Turks again invaded Yaman in 1872 and subjected the country, Kawkabān after a seven months' severe siege also passed to the Turks but only after capitulation. The last ruler of Kawkabān, Saiyid Aḥmad b. 'Abd al-Raḥmān, who had bravely defended the town against the Turks, afterwards lived in Ṣan'ā' on a pension given to him by the Sublime Porte. At Glaser's visit in 1883 his brother Saiyid Yaḥyā still lived in the old ancestral home in Kawkabān, which is remarkable for the splendid stucco-work of the interior and the rich ornamentation of its façade. The windows and doors had all sorts of varied shapes, colours and ornaments.

Kawkabān is now almost depopulated; although the houses, which in spite of much destruction are still imposing, afford accommodation for some 30,000 people, there are barely 100 now in the town; from the town one gets a splendid view over the fertile fields and valleys of the country around, especially the plain of Shibām, a part of the plain of Ṣan'ā' and the surrounding hills.

5) Kawkabān al-Sha'a is in Maḥwīt, west of the town of Kawkabān 4), but belongs to Ṭawīla, a small place of no special importance.

(ADOLF GROHMANN)

ḲAWM (A.), plural *aḳwām*, *aḳāwim*, *aḳāyim*, people. The word occurs also in Nabataean, Palmyrene and Ṣafāitic inscriptions in the name of the deity Shī' al-Ḳawm "support of the people", see Lidzbarski, *Ephemeris für semitische Epigraphik*, i., Index s. v. — According to some lexicographers the word applies in the first place to men; evidence for this opinion is afforded by passages from literature where Ḳ. is used in opposition to *nisā'* (women). The term does not primarily suggest the meaning of nation. A man's Ḳ. are his *shī'a* and his *'ashīra* (*Lisān*). In this limited sense the word occurs also in the well known tradition: "Who clings to a Ḳ. without the permission of his *mawālī* (*patrons*), is cursed by Allāh, the angels and the prophets" (Bukhārī, *Faḍā'il al-Madīna*, bāb 1). — Used without article it has the same meaning as English "people", French "gens" and German "Leute", e. g. sūra 5, 63: "People who do not understand"; cf. S. 10; 9, 6 (also with the article 12, 37). The plural has the same meaning. In a tradition it is said: "There will be people (*aḳwām*) in my community, who will proclaim licentiousness regarding women and wine" (Bukhārī, *Ashriba*, bāb 6).

In the Ḳur'ān the term is chiefly used in connection with the prophets, Muḥammad's predecessors: the people of Ibrāhīm, Lūṭ, Nūḥ (e. g. 7, 136; 11, 91; 22, 43; 26, 105, 160; 38, 11), i. e. their unbelieving contemporaries. In this sense it

is also used in connection with Muḥammad himself: "Thy people declare Him a lie, though He is the Truth" (sūra 6, 66). The same use of the term is to be found in Ḥadīth, e. g. Bukhārī, *Anbiyāʾ*, bāb 19, 31, 54 etc.

Ḳ. is, however, also used in a sense that comes nearer to the modern conception of "people", e. g. in the tradition referring to one of the festivals: "Every Ḳ. has its festival, and this is ours" (Bukhārī, *ʿĪdain*, bāb 3). Al-Kawm with the article has sometimes an emphatic meaning, e. g. Aḥmad b. Ḥanbal, *Musnad*, v. 72, where Ṭufail, one of ʿĀʾisha's brothers, relates a dream which he had. He dreamt that he passed by some Jews and said to them: "Verily, ye would be the people, were it not that ye pretend that ʿUzair (Ezra) is the son of Allāh". They answered: "And ye would be the people, were it not that ye say: *Mā shāʾ Allāh wa-mā shāʾ Muḥammad*", etc.

In Atchin (Atjèh) the term has acquired a peculiar form and use: *kawōm* has here the genealogical meaning of "all those who descend from one man in the male line", see Snouck Hurgronje, *The Achehnese*, Index s. v. *kawōm*.

For special meanings of the word see Dozy, *Supplément*, s. v. (A. J. Wensinck)

al-ḲAWS = the bow; in Arabic geometry the arc of the circle; in astronomy the constellation of Sagittarius, the ninth sign of the Zodiac (Greek τοξότης, Latin *Arcitenens* or *Sagittarius*). (H. Suter)

ḲAWS ḲUZAḤ (a.), the rainbow. The ancient Arabian deity Ḳuzaḥ [q.v.] who is described as shaiṭān (devil) was a thundergod who shot hail-arrows from his bow and then hung the latter on the clouds. He is found in the combination *Ḳaws Ḳuzaḥ*, rainbow. *Ḳuzaḥ* is also in popular belief the angel who looks after the clouds. Other names of the rainbow are: Allāh's bow, the bow of the prophet of God, bow of the heavens, bow of the clouds (*ghamām, muzn*), signs of heaven (*ʿalāʾim al-samāʾ*). It is also called *ḳaws ḳazaʿ* (*ḳazaʿ* are the separated parts of a cloud). Quite different in origin are the names *ḳusṭān* (dust), *ḳusṭānī*, *ḳusṭalānī* and *ḳusṭalāniyya*. Muslim scholars include the rainbow among the *āthār al-ʿulwiyya*, the upper phenomena. The rainbow is usually opposite the spectator, while the sun is at his back and there is a dark cloud or wall behind drops of water; the drops may be in a cloud or formed at springs, water-wheels, in turbulent rivers where spray is formed, in the steam of baths or in water which is ejected from the mouth in a spray (see *Beitr. V.*, *loc. cit.*). Frequent reference is made to a description by Ibn Sīnā (see E. Wiedemann and M. Horten, *loc. cit.*, among others) who was on the top of a very high hill at the foot of which lay a vast bank of mist. The sun was above the hill and Ibn Sīnā saw a rainbow on the mist below him.

Numerous descriptions of rainbows occur in literature e. g. in the *Ḥamāsa* (F. Tuch, *Z. D. M. G.*, iii. 200 *sqq.*), also by the Ḥamdānid Saif al-Dawla (333—356 = 944—967) and by the poet Waʾwāʾ († 390 = 999; see F. Dieterici, *Mutanabbi und Saif ad-Daula aus der Edelperle des Thaʿālibi dargestellt*, Leipzig 1847, p. 129 and 175).

The more or less strictly scientific studies of the rainbow are also numerous. Ḥādjdjī Khalīfa (*Kashf al-Ẓunūn*, iv., Nº. 9,640) quotes a special *ʿIlm Ḳaws Ḳuzaḥ* (science of the rainbow) he deals with all questions that can arise. According to him, "it investigates how the rainbow is formed, the reason why it is formed and why it is circular; further the reason for the difference in its colours, why it appears after rain at the end of a day and why it is often seen by day but only rarely at night by moonlight. It further investigates the astrological significance (*al-aḥkām*) of its appearance". Descriptions on similar lines are found, for example, in the works of al-Ḳazwīnī (*ʿAdjāʾib al-Makhlūḳāt*, ed. Wüstenfeld, p. 98; *Kosmographie*, transl. Ethé, p. 201), in the *Rasāʾil Ikhwān al-Ṣafāʾ*, Bombay 1305, ii. 52 *sqq.* (cf. F. Dieterici, *Die Naturanschauung der Araber*, Berlin 1861, p. 87); also by Shihāb al-Dīn Aḥmad b. Idrīs al-Ḳarāfī († 684 = 1285/1286) in his *Kitāb al-Istibṣār fīmā tudrikuhu 'l-Abṣār*; and in the *Risāla fī Ḳaws Ḳuzaḥ* of Ḥusām al-Dīn al-Taḥṣīlī (about 850 = 1446; see Berlin Catalogue by Ahlwardt, Nº. 5691); two anonymous works are published by Cheikho (*al-Machriq*, 1912, xv. 736—744). A considerable section in a meteorological work (Ahlwardt, Berlin Catalogue, Nº. 6054) and no doubt many other passages deal with our phenomenon. The most important and most comprehensive work, however, is from the pen of Ibn Sīnā in his *Shifāʾ* (see the *Beitr.*).

The descriptions of the rainbow are in general very accurate. Not only the simple rainbow but also the double and even triple are described. The first is said to be produced by the sun's rays themselves, the second by the rays shining through the rays from the first and the third by the rays from the first two; the bows therefore are successively weaker. It is emphasised that the rainbow is not always composed of the same colours, a phenomenon which has recently been fully investigated by M. Pernter. It is also mentioned that the rainbow is particularly beautiful when the sun is on the horizon.

The older treatment of the theory of the rainbow goes back to Aristotle, with whose meteorological works the Arabs were acquainted. Thābit b. Ḳurra is said to have translated a commentary by Athūrūdīṭus = Epaphroditus(?) on Aristotle's essay on the rainbow (Ibn al-Ḳifṭī, p. 59). Aristotle is followed by Ibn Sīnā, Ibn al-Haitham, al-Ḳarāfī etc., although in many details they make additions and corrections to his views. It is always assumed that the rainbow is produced by beams of light or visual rays which are regularly reflected on the raindrops, on very minute reflecting surfaces. Later Kamāl al-Dīn al-Fārisī [q. v.] gave a brilliant exposition of the correct explanation, as far as was possible in the general state of knowledge in his day, when the dispersion of light was unknown. Like us he says that the light is once or twice reflected in the interior of the globule of water and then radiates out from it; thus we have the main and secondary rainbow. He also endeavours to investigate the cause of the colours although, of course, not satisfactorily. By experiments he proves the correctness of his results, which are on a much higher level than those of Theodoricus of Freiberg (about 1300).

From *ḳuzaḥ* comes a word *taḳzīḥ* (the word is not *taḳzīgh*, as I said in the *Archiv für die Geschichte der Naturw. und Technik*, 1902, iii. 9). It means "showing the colours of the rainbow" or briefly "the colours of the rainbow". It is defined by Kamāl al-Dīn as "different graduated

colours in the region between blue, green, yellow, red, smoke-coloured white, that is, as regards normal perception".

The rainbow is also given an astrological significance according to the zodiacal sign in which it appears. In the ram it means plague and death (Ahlwardt, Berlin Catalogue, Nº. 5906, *al-Ḳawl ʿalā Ṭūl Ḳaws Ḳuzaḥ*). In another MS. (Nº. 5915, 2) it is said that in September a rainbow indicates great tyranny and oppression.

(E. WIEDEMANN)

ḲAWṢARA, a small volcanic island in the Mediterranean Sea between Sicily and Tunis (60 miles south of Cape Granitola and 45 miles east of Cape Bon [Ras Addar]; area 40 sq. miles), now called Pantellaria. The name Ḳawṣara (variously written in the MSS.) goes back to the classical Cossyra (cf. Pauly-Wissowa's *Realencyklopädie der klass. Altertumswiss.*, xi. 1503). The island, famous for its antiquities (cf. Orsi, *Pantellaria* in *Monumenti dei Lincei*, 1899, ix. 450—539), was already important in ancient times for intercourse between Sicily and the African coast and played an important part during the conquest and rule of the Arabs in Sicily, which was always attacked from Africa. The first conquest of Ḳawṣara by the Arabs as well as their expedition to Sicily under Muʿāwiya b. Khudaidj in the time of the Caliph Muʿāwiya (Ibn Khaldūn, *K. al-ʿIbar*, i. 211; Yāḳūt, *Muʿdjam*, iv. 200, according to the Aghlabid Ibn al-Ḳaṭṭāʿ; al-Balādhurī, ed. de Goeje, p. 235, does not mention the island) was only transitory; the Byzantines soon recaptured it (al-Bakrī, *K. al-Masālik*, *Bibl. Arabo-Sicula*, p. 13). According to Ibn Taghribirdī (ed. Juynboll, Leiden 1885, i. 136) ʿAlī's murderer, Ibn Muldjam, was banished to Ḳawṣara. ʿAbd al-Malik b. Ḳaṭan, the general of the Caliph ʿAbd al-Malik, recaptured the island from the Rūm (al-Tidjānī, *Riḥla*, *Bibl. Ar.-Sic.*, p. 375) but Muslim rule was only firmly established under the Aghlabid Ziyādat Allāh whose representative, Asad b. al-Furāt, captured Sicily (210—213 = 825—828) and Ḳawṣara (Ibn Khaldūn, *loc. cit.*). In 220 (835) an expedition against the island was once again necessary (Ibn al-Athīr, *Kāmil*, ed. Tornberg, vi. 239). In the two following centuries Ḳawṣara was partly converted to Islām. Its harbour was a naval base for the Arabs. Their ships were often wrecked in its vicinity. When the power of the Muslims began to decline, Ḳawṣara was again exposed to raids by Christian states (e.g. 481 = 1088 by the Pisans and Genoese; Ibn al-Athīr, *Kāmil*, x. 110). When Sicily had entirely passed out of Muslim hands, the island was taken in 516 (1122/23) by George of Antioch, Roger II of Sicily's admiral, on his first campaign against the Zīrid al-Ḥasan b. ʿAlī [q. v.] in Mahdiya; the island served him as a base for the capture of this town in 543 (1148) (Ibn al-Athīr, *Kāmil*, xi. 82).

The Arab geographers tell us very little about Ḳawṣara. The distance from Sicily and the African coast is usually given as a day's journey; the harbour is celebrated (al-Idrīsī). The production of figs, cotton and mastic is often mentioned (Abu 'l-Fidāʾ). The Muslim inhabitants remained there after the Norman conquest as *dhimmī*'s of the Franks (al-ʿUmarī, *Masālik al-Abṣār*; al-Andalusī). Down to the xviiith century the Arabic language was spoken on the island of Pantellaria; it has exercised a considerable influence on the local Italian dialect (above, i. 419; Gregorio and Seybold in *Studi glottologici italiani*, ii. [1901], 225—238). Amari has published a tomb inscription from Pantellaria (*Le epigrafi Arabiche di Sicilia*, Palermo 1879, p. 118 *sqq.*).

(J. H. KRAMERS)

KAWTHAR, a word used in Sūra cviii. 1 after which this Sūra is called *Sūrat al-Kawthar*. *Kawthar* is a *fawʿal* form from *kathara*, of which other examples occur in Arabic (e.g. *nawfal*; further examples in Brockelmann, *Grundriss der vergleichenden Grammatik*, i. 344). The word, which also occurs in the old poetry (e.g. the examples in Ibn Hishām, ed. Wüstenfeld, p. 261, and Nöldeke-Schwally, *Geschichte des Qorans*, i. 92), means "abundance" and a whole series of Muslim authorities therefore explain al-Kawthar in Sūra cviii. 1 as *al-khair al-kathīr* (see Ibn Hishām, *op. cit.*; al-Ṭabarī, *Tafsīr*, xxx. 180 *sq.*). But this quite correct explanation has not been able to prevail in the *Tafsīr*. It has been thrust into the background by traditions according to which the Prophet himself explained Kawthar to be a river in Paradise (see so early as Ibn Hishām, p. 261 below, and notably al-Ṭabarī, *Tafsīr*, xxx. 179) or Muḥammad says that it was a water-basin intended for him personally and shown to him on his ascension to Paradise (al-Ṭabarī, *Tafsīr*, xxx. 180), which latter view al-Ṭabarī considers the most authentic. Even the earliest Sūra's (lxxvii. 41; lxxxviii. 12 etc.) know of rivers that flow through Paradise, but it is not till the Medina period that they are more minutely described, notably in Sūra xlvii. 11: "there are rivers of water which does not smell foul; rivers of milk the taste whereof does not change;

and rivers of wine, a pleasure for those that drink, and rivers of clarified honey." These rivers correspond to the rivers of oil, milk, wine and honey, which had already been placed in Paradise by Jewish and Christian eschatology; the only difference is that Muḥammad replaced oil by water; in Arabia pure water was not to be taken for granted and besides it was necessary to mix with the wine of Paradise (see Horovitz, *Das koranische Paradies*, p. 9). When, after the Prophet's death, eschatological explanations of the "abundance" of Sūra cviii. 1 began to be made, al-Kawthar was identified as one of the rivers of Paradise and when we find in one of the versions quoted in al-Ṭabarī's *Tafsīr* that "its water is whiter than snow and sweeter than honey" or "and its water is wine", etc. we have obviously an echo of Sūra xlvii. 11. But they did not stop at simply transferring these Ḳurʾānic descriptions to the Kawthar but the imagination of later writers gave the river of Paradise a bed of pearls and rubies and golden banks and all sorts of similar embellishments. According to a later view (see *Aḥwāl al-Ḳiyāma*, ed. Wolff, p. 107), all the rivers of Paradise flow into the *Ḥawḍ al-Kawthar* which is also called *Nahr Muḥammad*, because, as we have seen above, it is the Prophet's own.

Bibliography: given in the article.

(J. HOROVITZ)

ḲAWUḲLU, "the man with the *ḳawuḳ*", a character in the Orta Oyunu.

The Turkish word *ḳawuḳ* means the inner cap-shaped part of a certain kind of headgear, a rather high cap around which the headdress proper, the *ṣarīḳ*, is wound; a cap like this could be of different shapes; it either culminated in a rounded top or in a flat surface; sometimes also it was wider at the top than on the bottom. It was usually made of wadded felt in perpendicular strips narrowing towards the top. These *ḳawuḳ*'s were worn by officers of different ranks in the Janissaries. They varied in form, colour and name according to rank. For further details see Maḥmūd Shawket, *Osmanlî Teshkîlât we-Ḳiyāfet-i ʿaskeriyesi*, Stambul 1325, i. 29 *sqq.* Other professions also had particular *ḳawuḳ*'s; thus there were *molla*, *kātib* and *pashalîḳ ḳawughu* or, from the shape, one talked of *tepeli ḳawuḳ*, while *dal ḳawuḳ* acquired the special meaning of parasite. The word *ḳāwuḳ* (plur. *ḳawāwiḳ*) has even penetrated into Arabic.

Ḳawuḳlu, "the man with the *ḳawuḳ*", has acquired a special significance as one of the two principal characters in the Turkish folkplay of Orta Oyun. It is not till last century that we are at all minutely acquainted with the Orta-play and the names Orta and Ḳawuḳlu do not seem to be any older. According to a tradition, the character of the Ḳawuḳlu was first introduced by a certain otherwise unknown Shakri, in place of a character called Nekre whose main feature is said to have been a fondness for opium. Ḳawuḳlu is the real comic figure in the Orta-play and plays a part like that of Ḳaragöz [q. v.] in the shadow-play. Pishekār, the other principal character in the Orta Oyun, is, on the other hand, the real director of the piece, a kind of stage manager, who always appears first on the stage and corresponds roughly to the Hadjiwad of the shadow-play.

The costume of the Ḳawuḳlu is sometimes described in the pieces themselves. Its chief feature is a high *ḳawuḳ* on his head. This is usually flattened above, red in colour and made of strips (*dilimli*) sewn together, almost like a top-hat without the lower brim. The *ḳawuḳ* is jokingly compared to a *tandîr*, the Turkish stove of similar shape. A shawl called *aghabani*, made of wool and silk, is wound round the *ḳawuḳ*. The kaftan (*djubbe*) of the Ḳawuḳlu and his trousers are also of red cloth while his under-garment (*entari*) is of striped woollen cloth or silk (*sham ḳutnisi* or *alti parmaḳ*). An ordinary shawl is used as girdle. The Ḳawuḳlu wears yellow Turkish saffron leather slippers (*ṣofik papush*) usually with heels, over the leather stockings called *mest*. He usually carries an umbrella made of different coloured parts. In modern times more and more of the old dress has been lost and even the *ḳawuḳ* has had to give place to a fez with a long tassel.

In the play the Ḳawuḳlu is usually a shopkeeper, artisan or a servant. Like Ḳaragöz he is responsible for the grotesque and comic element. He misunderstands the remarks of the other players, especially the Pishekār, in substance as well as language, carries out orders in a stupid fashion, confuses sentiments or twists them into the obscene. He is tactless and stupid, especially when he has to be on good behaviour among high class people, but in his turn demands exaggerated respect even from his friend, whom he treats badly, and is very capricious. If he describes his experiences, he exaggerates tremendously but unmercifully disparages any presents that have been given to him etc. If he is caught in a trick he usually succeeds in escaping by some of his thousand shifts. A further favourite source of humour is the imitation of foreign voices and dialects, *taḳlīd* (Ewliyā, i. 645 *sqq.*, gives the name to Orta-like plays of his time), sometimes with the addition of disguises. It seems that the players were originally foreigners and non-Muslims and in the older period the business was still considered unseemly and it is regretted when a Muslim earns his livelihood in this way.

All his pranks have to be improvised by the player, only a rough outline of the piece being given. The part of the Ḳawuḳlu makes the greatest demand upon the player and only a few really great actors have succeeded in playing the part to the general satisfaction. The most famous was a certain Hamdi at the end of last century and in most of the texts known to us from that period the Ḳawuḳlu is often addressed simply as Hamdi.

(WALTHER BJÖRKMAN)

ḲĀWURD B. DĀʾŪD ČAGHRIBEG, sometimes also called Ḳarā Arslānbeg, the founder of the line of Saldjūḳs of Kirmān. The first year of his reign is usually given as 433 (1041). Perhaps it was he and not Ibrāhīm Īnāl (cf. Ibn al-Athīr, ed. Tornberg, ix. 349) who led the Ghuzz, who came to Kirmān in 434, but he did not succeed in establishing himself there then, for the lord of this province, the Būyid Abū Kālīdjār [q. v.], was informed of the raid and sent troops who put the Ghuzz to

flight. It was not till some years later (440 = 1048) after the death of Abū Kālīdjār, that the capital of the country, Bardasīr, where Bahrām b. Lashkarsitān commanded for the Būyids, was taken and henceforth the land belonged to Ḳāwurd. By a stratagem he was able to subjugate the rude tribes of the Kufṣ and Kufadj, who dwelled in the Garmsīr (the hot region). He also waged war in Sīstān and in Fārs, in the latter country with the chief of the Shabānkāra Faḍlōya — on him cf. Ibn al-Balkhī, ed. Le Strange and Nicholson, p. 166 — and with the assistance of the Amīr of Hormuz even sent troops across the Gulf to the coast of Arabia who conquered 'Omān so that his successors ruled there till 537 (1142—43). He was an energetic ruler in every respect and maintained order in the land and acquired merit by making wells and building towers to serve as landmarks in the desert. One of these towers still stands between Gurg and Fahradj (cf. P. M. Sykes, *Ten Thousand Miles in Persia or Eight Years in Irān*, p. 418). But in the end his ambition proved his downfall. Even during the reign of his brother Alp Arslān, he could scarcely bring himself to acknowledge his suzerainty but when the latter came twice to Kirmān (456 = 1064 and 459 = 1067) he did not dare throw down the gauntlet but showed himself submissive. But as soon as he heard that his brother had fallen (1072) and that his son Malik-shāh had succeeded him he collected his forces and marched against him. The two armies met near Hamadhān. Ḳāwurd's troops were put to flight, he was taken prisoner and strangled. The best account of this battle, which was fought on Djumādā I 26, 466 = Jan. 27, 1074 (according to Ibn al-Athīr, x. 53, in Sha'bān = April), is contained in the *Zubdat al-Tawārīkh*, B. M. MS., fol. 33. The victor, however, left the sons of Ḳāwurd in possession of Kirmān.

Bibliography: In addition to the sources quoted in the article: *Recueil de textes rel. à l'histoire des Seldj.*, i. 2 *sqq.*; cf. in addition Houtsma in the *Z. D. M. G.*, xxxix. 367 *sqq.*

ḲAWWĀS, an Arabic word meaning originally archer, then arquebusier, finally, like the French *archer*, came to mean military police. The form *ḳawwāṣ* (with *ṣād*) is found in the *1001 Nights* (Dozy, *Suppl.*). The word is applied in the Levant specially to the military police, called in French *cavas* or sometimes *janissaires* (because before the abolition of the latter, they were chosen from their ranks), detached to act as guards to embassies and consulates. They go in front of the head of the embassy or consulate when he goes into the town, whether officially or not, and make way for him in the crowded streets and bazaars. In Turkish they are called *yasaḳ-čï*. In terms of articles 45 and 50 of the renewal in 1740 of the treaty between France and the Ottoman Empire, known as the capitulations, the ambassadors and consuls may employ such janissaries as they please without their being forced to use any who do not suit them (T. X. Bianchi, *Nouveau Guide de la Conversation*, Paris 1852, p. 273—274). The regulations of Ṣafar 23, 1280, fixed the number of natives that the consulates could employ, on account of their privileges, at 4 *yasaḳ-čï* for consulates general and consulates in the chief towns of provinces, 3 for ordinary consulates and 2 for vice-consulates or consulate agencies. Their appointment is notified to the governor-general of the province who keeps a register of the names of those employed (Aristarchi-bey, *Législation Ottomane*, Constantinople 1873—1888, iv. 15 *sqq.*).

ḲAYA. [See KHUZISTAN].

ḲĀYĪ, the name of one of the 24 tribes of the Ghuzz [q. v.] or Oghuz from which the Ottoman ruling house is descended. Cf. the pertinent text of the *Tawārīkh-i Āl-i Seldjūḳ* and the *Kitāb-i Dede Ḳorḳud* in the *Zap.*, xix. 077. Maḥmūd Kāshgharī (*Dīwān lughāt al-Turk*, i. 56) still has the old form Ḳayigh, which refutes the identification proposed by J. Marquart (*Abh. Ges. W. Göttingen, Neue Folge*, xiii /i. 39 *sqq.*) with the Ḳāi mentioned by al-Bīrūnī and al-'Awfī in the extreme east. The Ḳāi are regarded by Marquart as turkicised Mongols (*op. cit.*, p. 88) which also (he says, *op. cit.*, p. 191) explains "the rôle which the blood-stained and fratricidal race of Osman and Ottoman people have played in history". That the Ḳāi were Mongols is very probable. They are cited by Maḥmūd Kāshgharī (*op. cit.*, i. 30) with the Tātār and others among the peoples who speak a language of their own, although they also knew Turkish; but the Oghuz tribe of Ḳayigh or Ḳāyï had certainly nothing to do with the Ḳāi.

(W. BARTHOLD)

ḲĀZ (t.), goose, occurs also in geographical names such as Ḳāz Dagh, the Caucasus [see KABḲ].

ḲAZA. [See ḲAḌĀ'].

ḲAZAḲ (t.), robber, disturber of the peace, adventurer; on these and other meanings see W. Radloff, *Versuch eines Wörterbuches der türk. Dialecte*, ii. 364. The existence of the word in Turkish can be first shown in the ninth (xvth) century. During the civil turmoils under the Tīmūrids the pretenders, in contrast to the actual rulers, were called *ḳazaḳ*: those who would not accept the verdict of fortune but led the life of an adventurer at the head of their men; cf., for example, the mention of the *ḳazaḳ* years (*ḳazaḳlïḳ*) of Sulṭān Ḥusain, afterwards ruler of Khurāsān, in the *Bābur-Nāma*, ed. Beveridge, p. 173 b, infra. The name *ḳazaḳ* is also applied to whole bodies of people, who had separated from their princes and kinsmen; in the *Ta'rīkh-i Rashīdī* (transl. E. D. Ross, especially p. 82 and 272) the Özbeg, who had abandoned their Khān Abu 'l-Khair (cf. the article), are called Özbeg-Ḳazaḳ or simply Ḳazaḳ; the latter name has been retained by their descendants as an ethnic to the present day (cf. the art. KIRGHIZ). In Russia the word *ḳazaḳ* first appears about the same time as in Central Asia (in the second half of the xvth century) and is probably borrowed from Turkish although it appears in Russian in a larger number of meanings; thus individuals without kinsmen or possessions were called *ḳazaḳ* even although they did not lead a wandering or marauding life; the word, therefore, had not yet the exclusively military meaning which it had afterwards. The word Cossack, used in Western Europe, is the result of the Little Russian and Polish pronunciation. No certain etymological explanation of the word *ḳazaḳ* has yet been given. The last suggestion by N. Marr (*Žurnal Min. Nar. Prosv.*, 1915, June, p. 286), according to which the old Caucasian ethnic *Kasog* mentioned in the Russian annals under 6473 = 965 is preserved in Ḳazaḳ, is a hypothesis which can hardly be accepted by the historian. (W. BARTHOLD)

ḲAZĀN, also written Ḳazān, in the xvth and xvith centuries the capital of a Tatar principality, in the xixth century a Russian university town, now capital of the Tatar Soviet Republic. According to legend, the town was built by Batū. In 1391 Ḳazān was destroyed by Russian freebooters from Novgorod, and again in 1399 by the Prince Ywriy Dmitriyewič. About 1445 a powerful kingdom was founded here by Ulu-Muḥammad and his son Maḥmūdek (in Russian works Makhmutek) who had been banished from the Golden Horde; in the same year (1445), in which Ulu Muḥammad captured the Russian Grand Duke Wasiliy, Ḳazān, where a prince called ʿAlī Beg was ruling, was captured by Maḥmūdek. In 1446 Ulu Muḥammad was killed by Maḥmūdek; two other sons of Ulu Muḥammad, Ḳāsim and Yaʿḳūb, had to flee to Russia from their brother, where Ḳāsim founded a local dynasty in Kasimov [q. v.] which is called after him. Like many later pretenders who sought refuge in Russia, Ḳāsim took part on the Russian side in the wars against Ḳazān. Maḥmūdek died about 1464 and was succeeded by his sons, first Khalīl, then Ibrāhīm. In 1468 even Wiatka had to submit to Khān Ibrāhīm but in the following year the campaign took a more favourable turn for Russia; Ibrāhīm had to make peace and restore their freedom to all the Russian prisoners in Ḳazān. Ibrāhīm's successor was his son Ilhām; in 1487 his brother Muḥammad Amīn appeared before Ḳazān with a Russian army; after a siege of three weeks Ilhām had to surrender and was sent with his wife to Wologda; Muḥammad Amīn was installed as Khān in his place. In 1496 the Khān and with him the Russian party was driven out by an invasion of Siberian Tatars under Mamuk; after the victory of the Russians — at the request of the people of Ḳazān — it was not Muḥammad Amīn but his brother ʿAbd al-Laṭīf that was installed as Khān but by 1502 ʿAbd al-Laṭīf was brought back to Russia and the throne restored to Khān Muḥammad Amīn. In 1505 the Khān rebelled against Russian suzerainty and killed or robbed the Russian merchants who came to the annual fair in Ḳazān; the Tatars advanced as far as Nijni-Novgorod. In 1506 a Russian army was defeated; while a second campaign was being prepared the old relations were restored by a treaty of peace in 1507. Muḥammad Amīn died in 1518, ʿAbd al-Laṭīf had died the previous year; with them the dynasty founded by Ulu Muḥammad became extinct.

The following decades were a period of almost uninterrupted fighting between the pretenders supported by Russia, the brothers Shāh ʿAlī (so on his tomb in Kasimov, not Shaikh ʿAlī) and Djān ʿAlī, who had come from Astrakhan to Russia, and the national party supported by the Crimean Tatars and the Noghai. The latter won their biggest victories in 1521; Shāh ʿAlī was driven out by prince Ṣāḥib Girāi who came from the Crimea; the brothers Muḥammad Girāi from the Crimea and Ṣāḥib Girāi from Ḳazān advanced up to Moscow; the Grand Duke Wasiliy abandoned his capital; a peace was concluded in his name by the Tatar prince Peter, a convert to Christianity, by which the Russian government bound itself to pay tribute to the Khān of the Crimea. The Russian prisoners were sold as slaves by the Crimean Tatars in Kafa and by the people of Ḳazān in Astrakhan. In 1524 Ṣāḥib Girāi went to the Crimea and left his thirteen year old son Ṣafā Girāi in Ḳazān. The only original document that survives from the period of the principality of Ḳazān dates from the brief reign of Ṣāḥib Girāi: it is a decree dated Ṣafar 13, 929 (= Jan. 1, 1523), confirming a family as *Tarkhān*'s, that is nobles freed from all taxes. The taxes are detailed so that the document is of some importance for the domestic history of the principality.

After vain efforts to come to an agreement with Russia, Ṣafā Girāi was driven from the throne by the Russian party in 1530; at the wish of the people it was not Shāh ʿAlī but Djān ʿAlī that was elected Khān; he was killed in 1535 in a rising of the national party, Ṣafā Girāi recalled and supported by his father Ṣāḥib Girāi, then Khān of the Crimea. The Russian attempts to restore their suzerainty had therefore for a long time no success; it was only in the year 1546 that Ṣafā Girāi was driven out and Shāh ʿAlī put in his place; but Ṣafā Girāi returned immediately after the departure of the Russians and held the throne till his death in 1549. He was succeeded by his two year old son Ötemish, who was taken to Russia in the following year, christened by the name of Alexander and lived till 1566. The brief and cruel reign of Shāh ʿAlī ended with his banishment. Yādiyār Muḥammad, a prince born in Astrakhan, was summoned from the land of the Noghai to Ḳazān as Khān. The Grand Duke Iwan who had already conducted two unsuccessful campaigns (1548 and 1550) against Ḳazān now appeared before the town with a larger army; after hard fighting Ḳazān was stormed on Oct. 2, 1552, and all armed men put to death.

The conquered town retained its former appearance and its military importance under Russian rule for a long time. The town had ten gates and a citadel separated from the other quarters of the town by a ditch; the old wooden wall was replaced by one of stone in 1555. The town was then about 600 cubits (= a mile) in length and 500 cubits (1500 yards) in breadth. To injure the commercial importance of the city, the Russian government as early as 1524 had founded the annual fair at Nijni-Novgorod; at the same time merchants were forbidden to go to the fair at Ḳazān. Christianity was industriously preached. Ḳazān was the see of an archbishop from 1555 and later of a metropolitan. The immigration from Russia proper assumed considerable importance.

Little is left of the old town; a tower in the citadel still bears the name of the princess Süyünbigi, wife of Ṣafā Girāi (she was previously married to Djān ʿAlī and later to Shāh ʿAlī). Under the influence of national Tatar movement the memory of this princess is kept green: in 1914 a biography of her appeared and a periodical for women is published under her name; but it is not definitely known when and how the tower received this name, and what parts date from the Tatar period and what from the Russian. During the xviiith century Ḳazān had lost all military importance and was easily taken — with the exception of the citadel — by Pugačev in July, 1774; there were then 2,867 houses in it. Even at this date Ḳazān was of much greater importance than Nijni-Novgorod as a centre of government and of culture. The university founded in 1804 became famous especially for its Oriental faculty (strictly the Oriental section of the faculty

of history and philology). In 1855, as a result of the opening of the Oriental faculty in the University of St. Petersburg, instruction in Oriental languages in the university of Ḳazān was stopped and the library and other accessories for the most part brought to St. Petersburg.

Instruction in Muḥammadan languages was resumed in the university of Ḳazān in 1861. According to the census of 1897, Ḳazān had 131,508 inhabitants, in 1911 182,477, of whom 30,781 were Tatars.

(W. BARTHOLD)

ḲĀZBEGĪ, a Persian copper coin worth, according to Chardin, the tenth part of a *shāhī*. It is now obsolete. Chardin says, iv. 279 (Rouen, 1723), the name means "the King's money", but see the titles *Gasbeck* and *Casbeague* in *Hobson-Jobson* (revised ed.). Another form of the word seems to be Ḳazbīnī from Ḳazwīn where they were coined.

(H. BEVERIDGE)

KĀZERŪN, a town in Persia in the province of Fārs, between the sea and Shīrāz and 55 miles from the latter at a height of 3,000 feet. It is supplied with water from wells and pipes as the district has no river. Its industries used to be flourishing; it manufactured a kind of cotton called *shaṭawī* (Yāḳūt, iii. 288); it had a rich trade carried on by merchants for whom ʿAḍud al-Dawla the Būyid had built a bourse and who had luxurious dwellings and pleasure-houses in the town and vicinity. A kind of date called *djīlān* was gathered there. At the present day it is surrounded by tobacco-fields; there is a horse-market there frequented by the nomad tribes. The principal mosque was built on a hill commanding the bāzār. Among the tombs of saints venerated there, mention is made of that of Shaikh Abū Isḥāḳ Ibrāhīm b. Shahriyār Kāzarūnī, patron of the sailors in Indian and Chinese seas, their protector from storms and pirates, a capacity which brought his *zāwiya* abundance of *ex-voto's* (Ibn Baṭṭūṭa, ed. Paris, ii. 89). Twenty miles to the north are the ruins of Sābūr; Kāzerūn began to rise in importance from the time Sābūr fell into ruins. The district was called Shūl, a name that survives in the modern name Shūlistān. In the vicinity there is a very salt lake full of fish which in the fourth (tenth) century was called Buḥairat Mūr (or Mūrak).

Bibliography: Yāḳūt, ed. Wüstenfeld, iv. 225; Barbier de Meynard, *Dictionnaire de la Perse*, p. 472 and note 1; G. le Strange, *The Lands of the Eastern Caliphate*, p. 266; J. P. Morier, *Second Journey*, London 1818; E. S. Waring, *A tour to Sheeraz*, London 1807, p. 22.

(CL. HUART)

ḲĀḌĪ-ʿASKER (A. T.), military judge, one of the highest offices in the judicial system of the Ottoman empire; its holders took precedence immediately after the Shaikh al-Islām, the chief of the *ʿulamāʾ*; they are entitled Ṣadr [q. v., iv. 30]; they are equal in rank to the vizier and *mushīr*. They are entitled in written petitions to be addressed as *ʿinâyetli* "your benevolence". There are two Ḳāḍī-ʿAsker, one of Rūm-ili and the other of Anatolia. Before the reforms, the first was inspector-general of all the dedicated properties (*waḳf*) except those of the two holy cities, when they become vacant (*maḥlūl*) by the decease of their administrators (*mutawallī*); since the *tanẓīmāt* this duty has fallen upon the Minister of the Awḳāf.

The title Ḳāḍī-ʿAsker was created in 763 (1362) by Sulṭān Murād I in favour of the Ḳāḍī Ḳara Khalīl Djendere-li; this judge followed the Sulṭān in the army and exercised his functions in camp. After the capture of Constantinople, Meḥmed II in 885 (1480) duplicated the post on the advice of the Grand Vizier Ḳaramānī Meḥmed Pasha [q. v., ii. 745], jealous of the credit enjoyed by Mānīsa Čelebesi; Muṣliḥ al-Dīn Ḳasṭallānī and Ḥādjdjī Ḥasanzāde were the first holders of these new offices. The Shaikh al-Islām or Grand Muftī did not have precedence over them until the reign of Sulṭān Sulaimān al-Ḳānūnī. They had the right to appoint all the ḳāḍī's and *mudarris's* (professors of theology) except those of Constantinople, Brusa and Adrianople, the three successive capitals of the empire; these nominations were reserved for the Grand Vizier.

The Ḳāḍī-ʿAsker of Rūm-ili dealt with the cases of Muslims in questions belonging to the capital while those of non-Muslims were left to the Ḳāḍī-ʿAsker of Anatolia. The importance of the first of these posts put the second in the background. His competence extended to cases relating to estates, to debts of the state and interests of the treasury; down to the reign of Maḥmūd I his sphere of jurisdiction included the three Barbary regencies; his authority over the ḳāḍī's of the Crimea was recognised by the treaty of Ḳainardje (1775) and the convention of Ainali-Ḳawaḳ (March 21, 1779).

(CL. HUART)

ḲAZI KUMUKH. [See KUMUK].

KĀẒIMAIN, a town next Baghdād, one of the most celebrated of Shīʿa places of pilgrimage. It is a little over a thousand yards from the right bank of the Tigris, which there describes a loop. It is separated from the river by a girdle of gardens. Kāẓimain itself is prettily situated among palm-groves; there are also gardens almost without interruption in the direction of Baghdād. It is connected by a horse-tramway with the west side of Baghdād (Karkhiyaḳā; see the art. AL-KARKH) about three miles away, which was laid down by the governor Midḥat Pasha, who did a great deal for Baghdād (1869—72; cf. i. 568a). Quite recently Kāẓimain has also become a station on the Baghdād-Sāmarrā railway, which runs along the right bank of the Tigris. Down to the World

War Kāẓimain was the seat of a ḳā'im-maḳām and the capital of a ḳaḍā of the sandjaḳ of Baghdād with a population of 25,000 (of whom 5,000 are Shī'is); see Cuinet, *op. cit.* The number of inhabitants of the town itself Cuinet estimated at 6,000, Aubin (1907) at 7—8,000, of whom two-thirds were Persians. They are very fanatical; access to the sanctuaries is strictly forbidden to Christians. The Arab Beduin tribe of al-Madjama' encamps along the Tigris as far as Kāẓimain (see M. v. Oppenheim, *op. cit.*, ii. 71).

The name Kāẓimain, a so-called *dualis a potiori* (cf. Wright, *Grammar of the Arabic Language*[3], i. 190), means "the two Kāẓim's". The reference is to the two 'Alids buried here, Mūsā al-Kāẓim (d. 186 = 802) and Muḥammad al-Djawād (d. 219 = 834), the seventh and ninth Imāms of the Shī'a sect of the "Twelvers"; [cf. ITHNĀ 'ASHARIYA, ii. p. 563]. The place is often briefly called Kāẓim (also Ghadim in books of travel) or Kāẓimiye (Kāẓmiye); the name Imām Mūsā is also found. There is evidence of pilgrimage to these 'Alid tombs as early as the seventh (thirteenth) century (in Ibn Khallikān). At the present day Kāẓimain is one of the four greatest sanctuaries of the Shī'a. Its favourable position at the junction of the roads to the three other Shī'a places of pilgrimage, Sāmarrā in the north and Kerbelā and Nadjaf in the south, accounts for the fact that many thousands of pilgrims pass through it annually. Frequently 25—30,000 believers assemble here on one day. The throng is greatest during the first ten days of the month of Muḥarram, which are specially dedicated to the memory of Ḥusain and the 'Alids generally. One of the four Mudjtahids, the principal spiritual leaders of the Shī'a, lives in Kāẓimain.

The sanctuary of Kāẓimain is one of those exceedingly splendid and rich temples which the 'Irāḳ owes to the Shī'a and for which Persia and Shī'a India supplied the necessary millions. With its domes covered with gold, the drums and the spires of its minarets it is visible to the traveller a long way off. Its present form faïence covered, is due to the Ṣafawid Ismā'īl I (908—930 = 1502—1524), whose family claimed descent from the Imām Mūsā al-Kāẓim (cf. above, ii. 544[b]). The inscription published by Massignon, *op. cit.*, p. 99, of the year 926 (1519) refers to the complete transformation of the old building by the Shāh. The restoration not quite completed by Ismā'īl was finished by the Ottoman Sulṭān Sulaimān I, who visited Baghdād in 941 (1534). The covering of the domes with golden tiles was done — according to the inscription in 1211 (1796) — by command and at the expense of Shāh Agha Muḥammad Khān [q. v.], the founder of the Ḳādjār dynasty. On the occasion of his pilgrimage (1870) Shāh Naṣr al-Dīn had the gold plating on the principal dome and on the roofs of the minarets renewed; cf. Cuinet, *op. cit.* The double cupola flanked by four minarets shows that two saints are buried beneath it. Close to this mausoleum stands an isolated pavilion under which are shown the graves of Dja'far (formerly supposed to be that of Ismā'īl) and Ibrāhīm, sons of the Imām Mūsā. The cupola of this building is modern and a gift of the general of division Salīm Pasha; cf. Massignon, *op. cit.*, p. 100. It may be noted here that there is also at Ḥadītha on the Euphrates (between 'Āna and Hīt) a small sanctuary which is said to contain the tomb of Muḥammad, son of Mūsā al-Kāẓim; see Herzfeld in Sarre-Herzfeld, *op. cit.*, ii. 321. On the tomb of a certain Ḥamza b. Mūsā al-Kāẓim in Karyat al-Bāshiya (in the 'Irāḳ) cf. Massignon, *op. cit.*, p. 60. In the vicinity of Astarābādh [q. v.] there is also an Imām-zāde (tomb-chapel) where a descendant of the Imām Mūsā called Imām Kāẓim is said to be buried; cf. Melgunof in the *Z. D. M. G.*, xxi. 235, and in *Das südliche Ufer des kaspischen Meeres*, Leipzig 1868, p. 119—120.

Like the sepulchral mosques of other great places of pilgrimage that of Kāẓimain also is surrounded by a very broad court-yard (*ṣaḥn*) enclosed by a wall. This latter was rebuilt in 1298 (1880), with the permission of the Turkish government, by a wealthy Persian named Farhād Mīrzā and adorned with ceramic work and inscriptions containing whole sūras; cf. Massignon, *op. cit.*, p. 110. In the great court, in course of time, extensive buildings for the housing of numerous pilgrims have grown up, especially along the enclosing wall. In 1907 Aubin estimated the number of bazaars and caravanserais within the area of the sanctuary at forty-five. There are also a number of pretty coffee-houses.

Adjoining the wall of the court-yard is a Sunnī mosque with the tomb of the famous Ḥanafī lawyer Abū Yūsuf (q. v., d. 182 = 798); cf. Massignon, *op. cit.*, p. 57, 100. It is a mistake, as Le Strange (*Baghdad*, p. 161 *sq.*, 350 *sq.*) does, to locate the grave of Zubaida, wife of Hārūn al-Rashīd, in or near this Kāẓimain; cf. against this Massignon, *op. cit.*, p. 110 *sq.*, and Herzfeld, *op. cit.*, ii. 111, and also the article AL-KARKH.

In the time of the Caliphs, extensive cemeteries lay on the west side of Baghdād above the Ḥarbiya quarter. The two 'Alid graves were in the cemetery of the Ḳuraish (*Maḳābir al-Ḳuraish*); the names Shūnīziya and cemetery of the Bāb al-Tibn are also found for it. When Yāḳūt wrote (623 = 1226), Maḳābir al-Ḳuraish was a fairly populous suburb surrounded by a wall. Ḥamd Allāh Mustawfī about a century later found that this place, formerly reckoned a suburb of Baghdād, was now an independent little town. Who first built the 'Alid sanctuary at Kāẓimain is unknown. We know that princes of Shī'a tendencies, like the Būyids, frequently bestowed gifts upon it. But in the course of time, especially during the frequent fighting in the capital between Shī'is and Sunnis, it was repeatedly burned and plundered, notably in the years 443 (1051) and 622 (1225). At the conquest of Baghdād by Hūlāgū in 656 (1258) it was again laid in ashes. It may be mentioned that in 1801 on the occasion of the Wahhābī invasion the treasures of the sanctuary were removed from Kerbelā to Kāẓimain; see Jacob in A. Nöldeke, *op. cit.*, p. 48, note 1.

Opposite Kāẓimain, on the left bank of the Tigris, connected with it by a bridge of boats, is the suburb of al-Mu'aẓẓam (see above, i. 568[b]—569[a]), a stronghold of the Sunnis and a kind of national sanctuary of the Turks. In this place of about two thousand inhabitants is the highly venerated sepulchral mosque of Abū Ḥanīfa, the founder of one of the four orthodox schools of Muḥammadan law (q. v., d. 150 = 767). On this tomb cf. M. von Oppenheim, *op. cit.*, ii. 241; Streck, *op. cit.*, i. 162; Le Strange, *Baghdad*,

p. 190—192; Langenegger, *op. cit.*, p. 61—62; Massignon, *op. cit.*, p. 78—79. It is from the epithet of Abū Ḥanīfa, al-Imām al-Aʿẓam or al-Muʿaẓẓam (= the highly venerated Imām) that this suburb of Baghdād takes its name.

KĀẒIMĪ, the name given by Tīpū Sulṭān of Mysore (1197—1213 = 1782—1799) to the $^1/_{16}$ rupee (1 anna) in silver; it commemorates Mūsā al-Kāẓim, the seventh Imām. (J. ALLAN)

KAZIMOF. [See KASIMOW].

ḲAZWĪN (formerly Kash-wīn), a town in Persia in the province of ʿIrāḳ ʿAdjamī 100 miles from Ṭehrān at the foot, on the south, of Mount Alburz [q. v.] at a height of 4,000 feet above sea-level; present population about 25,000.

The etymology of the name is uncertain. Al-Balādhurī (p. 321; cf. Ibn al-Faḳīh and Ḳudāma) says that *Kash-wīn* means "the boundary which one watches", i. e. "well guarded"; it may also be explained as "the one who watches the corner", but this seems to be a popular etymology. It has been connected with *Caspius* (Spiegel, *Erân. Alterthumskunde*, i. 74, note 1).

Founded by Shāpūr I (Ibn al-Faḳīh) and called Shād Shāpūr by him, it was besieged by al-Barāʾ b. ʿAzib in 24 (644) and surrendered to him. The people adopted Islām to escape the imposition of the *djizya* (poll-tax). This strong place, which in Persian times had served as a barrier against the inroads of the mountaineers of Dailam, was used by the Muslims as the starting point for their campaigns against the latter. Muḥammad b. al-Ḥadjdjādj b. Yūsuf built a mosque there called Masdjid al-Thawr "mosque of the bull". The Caliph Mūsā al-Hādī built a new town opposite the old one, called Madīna Mūsā. Mubārak al-Turkī, a freedman of al-Maʾmūn or al-Muʿtaṣim, built a fortress there called Mubārakiya in which he put a garrison. When Hārūn al-Rashīd passed through the town on his way to Hamadhān the inhabitants of Ḳazwīn asked and obtained a relief from their tithes, alleging that, living on the frontier, they had to fight for the faith. Hārūn built a mosque there and began to restore the ramparts which work was continued by the Amīr Abū ʿAlī al-Djaʿfarī in 411 and finished by Ṣadr al-Dīn al-Marāghī, minister of Sulṭān Arslān, in 572. Ruined by the Mongol invasion at the beginning of the viith (xiiith) century Ḳazwīn revived again under the Ṣafawīs. Tahmāsp I lived there for long and ʿAbbās I adorned it with fine buildings. In 1723 its inhabitants drove back the Afghāns. Ḳazwīn has retained a certain importance as the roads from Tabrīz and from Reshṭ to Ṭehrān meet there; the latter is fit for carriage traffic and is used by motors. Ḳazwīn is a depot for the silks of Gīlān and Shīrwān and manufactures carpets.

AL-**ḲAZWĪNĪ**, ABŪ ḤĀTIM MAḤMŪD B. AL-ḤASAN AL-ṬABARĪ, a Shāfiʿī jurist, teacher of al-Shīrāzī. He belonged to Āmul in Ṭabaristān where he began his studies. In Baghdād he studied under Abū Ḥāmid al-Isfarāʾīnī († 406), the law of inheritance under Ibn al-Labbān († 402) and the *Uṣūl* under Ibn al-Bāḳillānī († 403). He taught in Baghdād and Āmul in 440 (1048/49). Al-Shīrāzī describes him as his best teacher. Of his works the following are mentioned: 1) *Kitāb Tadjrīd al-Tadjrīd*, a synopsis of the legal work of the same name by al-Maḥāmilī († 415); 2) *Rawnaḳ*, a synopsis of the *Lubāb al-Fiḳh* of al-Maḥāmilī (Ḥādjdjī Khalīfa, *Kashf al-Ẓunūn*, N°. 5702); 3) the *Kitāb al-Ḥiyal fi ʾl-Fiḳh* (ed. Jos. Schacht, Hanover 1924), the only one that has survived and one of the oldest works of the scanty Shāfiʿī literature on legal quibbles (*ḥiyal*). The book, unlike the Ḥanafī works of the same name by al-Shaibānī, al-Khaṣṣāf etc., was very little used for the practical purpose of getting round the Sharīʿa, but was rather primarily intended to point out legal quibbles which were forbidden or disapproved of, in keeping with the stricter Shāfiʿī standpoint, which regards the *ḥiyal* used by the Ḥanafīs as contemptible.

(HEFFENING)

al-ḲAZWĪNĪ, ZAKARIYĀ B. MUḤAMMAD B. MAḤMŪD ABŪ YAḤYĀ. For his genealogy, praenomina, etc., regarding which tradition varies (e.g. as early as Ḥādjdjī Khalīfa, *Kashf al-Ẓunūn*, ed. Flügel, iv. 189), cf. S. de Sacy, *Chrestom. Arabe*[2], iii. 445 *sq.*, Reinaud, *Géographie d'Abulféda*, i., Paris 1848, p. cxlviii. *sq.*; Wüstenfeld in the *G. G. A.*, 1848, i. 347, and in his edition of al-Ḳazwīnī, vol. ii., p. iii.; Ahlwardt, *Verzeichn. d. arab. Hss. d. kgl. Biblioth. zu Berlin*, v. 453.

We learn very little about his life from the Arabic biographical works and the brief references in his two main works. Al-Ḳazwīnī was born about 600 (1203) at Ḳazwīn [q.v.]. He belonged to a pure Arab family which had, however, been long settled in the east. He left his native town at some date not exactly known, apparently not entirely of his own free will. In 630 (1233) he was living in Damascus where he made the acquaintance of the celebrated mystic Ibn al-'Arabī [q.v.]. In the reign of the last 'Abbāsid Caliph al-Musta'ṣim (640—656 = 1241—1258) al-Ḳazwīnī was living in the 'Irāḳ where he filled the office of ḳāḍī of Wāsiṭ and Ḥilla. He died in 682 (1283). On the biography of al-Ḳazwīnī cf. de Sacy, *op. cit.*, p. 448 *sq.*; Reinaud, *op. cit.*, i. p. cxliii. *sq.*, and Wüstenfeld, *G. G. A.*, 1848, i. 349 *sq.*

We possess two works by al-Ḳazwīnī of approximately the same size, a cosmography and a geography which are two quite independent books. They both have something of the character of compilations but nevertheless reveal a very varied training not only in the various branches of natural science but also in political and literary history. Al-Ḳazwīnī's essential merit lies in the fidelity with which he reproduces the results of his reading while his own observations and researches are not nearly so valuable. In spite of much that is fabulous that is contained in it, his Cosmography must be deemed a work of fundamental importance and is quite the most valuable book that the Arab middle ages have given us on this field. Of all the Arab geographers, al-Ḳazwīnī best deserves the name of the mediaeval Herodotus or of the Arab Pliny, whom, however, he does not surpass in method or critical powers. The great prestige enjoyed especially by the Cosmography in the East down to modern times is shown not only by the large number of manuscripts in existence, but also by the Persian and Turkish translations and the very numerous quotations in al-Damīrī's [q.v.] *Ḥayāt al-Ḥayawān*.

Al-Ḳazwīnī's style differs considerably from the classical language; it is swarming with solecisms. This style is perhaps to be explained from the fact that Arabic was not al-Ḳazwīnī's mother-tongue.

1. The Cosmography. It bears the title *'Adjā'ib al-Makhlūḳāt wa-Gharā'ib al-Mawdjūdāt*. *'Adjā'ib al-Makhlūḳāt* was the name of a cosmographical work in Persian used by al-Ḳazwīnī compiled a hundred years earlier by Aḥmad of Ṭūs. There are a number of other books with this title in Arabic literature; but the most famous of all and at the same time the only one whose title has the addition *wa-Gharā'ib al-Mawdjūdāt* is that of al-Ḳazwīnī; cf. Pertsch, *Verzeichn. d. türk. Hss. in Berlin*, 1889, p. 197, note 2.

The Cosmography consists of two parts the first of which deals with heavenly things and the second with terrestrial. After a very full introduction the heavenly bodies (sun, moon, stars etc.) are described; next the inhabitants of heaven (the angels) are dealt with; the first part concludes with a chapter on chronology. The second section discusses sublunar phenomena and the elements in general, especially the sphere of fire, air and water, natural history in the three kingdoms (minerals, vegetable and animal) and lastly man. The Cosmography also contains a great deal that is purely geographical as it describes the more important mountains, islands, seas, rivers and springs; in the Geography to some extent the same things are again dealt with, usually in the same words.

The manuscripts of the Cosmography differ very much from one another. There are longer and shorter versions and further abbreviated editions or more or less modified versions, sometimes published under another title. References to the manuscripts of the Cosmography are given by Pertsch, *Die arab. Hss. der Bibl. zu Gotha*, iii. 126—127; supplementary information in the *Cat. codd. Arab. Bibl. Lugdun. Batav.*, ii. 14. The oldest copy of the text is Cod. Monac. 464, which, according to Seybold, was written in 678 (1280) i. e. three years before the death of al-Ḳazwīnī (cf. *Isl.*, iv. 260). Almost identical with it is the Cod. Sarre prepared about 1420 (see Taeschner, *Die Psychologie des Ḳazwīnī*, 1912, p. 6; Saal in *Isl.*, iii. 152).

Wüstenfeld (see his edition of al-Ḳazwīnī, vol. i., p. iii. *sq.*) distinguishes three different editions of the Cosmography all of which he believes to have been prepared by al-Ḳazwīnī himself: the first of the year 661 (1263), the second of 674 (1276), much enlarged and considerably rewritten, and a third which is represented only by a single codex the latter part of which is incomplete (Gotha, Nº. 1508). The third edition on which Wüstenfeld based his edition of the text has two titles, an earlier, *Tuḥfat al-Kā'ināt*, and a later, *Mir'āt al-Kā'ināt*. In it, apart from other minor additions, we have two entirely new sections (on the different races of mankind and the various arts).

This idea of Wüstenfeld's is, however, untenable, as Ruska has shown in his important *Ḳazwīnī-Studien* in *Islam*, 1913, iv. 14—66, 236—262 (a summary of his researches was given in his article *Über den falschen und echten Ḳazwīnī* in the *Mitteil. zur Gesch. der Medizin und Naturwissensch.*, 1914, xiii. 183—188). As a result of his analysis of the structure of the text of the anthropological and mineralogical chapters (especially of the section on the rain-stone) of the Cosmography based on a number of Arabic MSS. and Persian translations of the text Ruska comes to the conclusion that we must distinguish not three but four recensions of the Cosmography. Of these I (= Wüstenfeld's II) is so far known only from two Gotha MSS.; II (Wüstenfeld's I) is represented in many — some very old — MSS. and in the text of the Cosmography given on the margin of the printed edition of al-Damīrī. To this second recension also belongs the already mentioned oldest MS. of al-Ḳazwīnī (Monac. 464) and the Codex Sarre. The Arabic original of Rec. III is lost; it is not certain what its relation was to the two preceding.

Its characteristic feature is the addition of chapters 7 and 8 on the races of men and on the arts. The Arabic original of Rec. III — of which the date and compiler are unknown — must also have been the original of the Persian translations as well as the basis for the version preserved in Rec. IV. The idea of a Persian version without an Arabic basis, i. e. of a retranslation of Rec. IV from the Persian, may be set aside as quite improbable. Rec. V, which is only represented in the already mentioned Cod. Gothanus 1508 defective at the end, represents a version of Rec. III. It is quite different from the text of the Persian translations in contrast to which it has marked interpolations; many chapters are amplified by considerable additions. It alone contains the extracts regarding the Turkish hordes of the tenth century from the journal of Miʿsar b. al-Muhalhil [q. v.] and Ibn Faḍlān's [q. v.] notes on the Slavs, Khazars, Russians, etc., as well as the excerpts on jewels from al-Khāzinī's book. This Rec. IV (= Wüstenfeld's III) cannot be from the pen of al-Ḳazwīnī himself. Gotha 1508, besides, as has already been mentioned, has a different title from the other three recensions and, indeed, expressly describes itself as a commentary (*sharḥ*) on al-Ḳazwīnī. Gotha 1508 is perhaps original; at any rate it was compiled by someone with a thorough knowledge of the old literature.

Wüstenfeld's edition of the text of the Cosmography therefore does not contain the genuine text of al-Ḳazwīnī but a much later recension of the xviiith century. Almost the whole of Wüstenfeld's volume (p. 73—368) follows the text of the recension o. Cod. Goth. 1508. But portions are omitted from this and replaced by portions from other manuscripts, which have also been used to fill up other gaps. Wüstenfeld's procedure has therefore given us an entirely arbitrary edition of the text. To obtain the true text of al-Ḳazwīnī's Cosmography it would be best to choose the older, shorter Rec. II (= Wüstenfeld's I) which also seems to have been the most widely disseminated. Among the numerous manuscripts of this recension the oldest Cod. Monac. 464 should be taken as a basis.

Extracts from the Cosmography also exist. One with the title *Kitāb al-Durar muntaḳāt min ʿAdjāʾib al-Buldān* is in the Paris Bibliothèque Nationale; cf. de Sacy, *op. cit.*, iii. 449 *sq.*, and de Slane, *Cat. des Mss. arabes de la Bibl. Nat.*, Nº. 2183. A similar abbreviation *ibid.*, Nº. 2419(3). The anonymous work *ʿAdjāʾib al-Makhlūḳāt al-Ṣughrā*, i.e. "the little Cosmography" (also in Paris, de Slane, Nº. 2181) has much in common with the Cosmography.

On account of its relatively succinct form yet containing all essential information generally popular at the close of the middle ages, al-Ḳazwīnī's Cosmography was translated into various foreign languages, notably Persian and Turkish. As to the Persian translations their relation to the Arabic original has already been briefly discussed. But two or more recensions or paraphrases have to be distinguished among the Persian versions, the relation of which to each other and to the Arabic original requires still to be more closely investigated. One of them is called *Tuḥfat al-Gharāʾib* (Vienna MS., Nº. 1438; see Flügel, ii. 506 *sq.*, and cf. thereon Pertsch, *Verz. der pers. Hss. . . . . zu Berlin*, p. 367). On the Persian translations cf. de Sacy, *op. cit.*, iii. 436; Wüstenfeld's edition of al-Ḳazwīnī, vol. i., p. xi., and Ruska in *Isl.*, Nº. 17, 260. There are also abbreviations e.g. London, British Mus. (Rieu, 1883, p. 463, Nº. 7). In Cambridge is a manuscript which also contains excerpts from the Geography of al-Ḳazwīnī; see Browne, *Catal. of the Persian Mss.*, 1896, p. 208 *sq.*, Nº. 126. Ḥamza Ādharī Asfarāʾinī Djalāl al-Dīn (d. 866 = 1461) composed a poetical synopsis of the second part of the Cosmography entitled *Gharāʾib al-Dunyā*. Of this the Bodleian in Oxford (Catalogue by Sachau-Ethé, col. 401—403) and the India Office in London (Ethé, *Cat.*, 79 and 191) have each 2 MSS. This synopsis forms the second part of a much more comprehensive poetical cosmology in four chapters which Ādharī published under the title *Mirʾāt*.

There are also various Turkish translations; on them cf. Taeschner in the *Z. D. M. G.*, lxxvii. 35. There is one by Aiyūb b. Khalīl finished in 977 (1570) in MS. in Vienna (Flügel, *Katal. der Hofbibl.*, ii. 508); it is entitled *Tadhkira al-ʿAdjāʾib wa-Tardjamat al-Gharāʾib*. Another translation was made by the famous theologian al-Surūrī (d. 969 = 1561); there are manuscripts of it in London, British Mus. (Rieu, p. 107—109: Add. 7894 and Add. 24,954). The anonymous Turkish translation in the Berlin Library Nº. 177 (see Pertsch's Catalogue, p. 197—198) is probably different; its author has dealt very freely and arbitrarily with the Arabic original, has omitted many articles and added others in their place. The original work has been much abbreviated throughout and the arrangement of the matter is different. Another Turkish translation made by Ismāʿīl Pasha and dating from the year 1109 (1697) is only known from Ḥādjdjī Khalīfa (ed. Flügel), vii. 154, Nº. 14,608. The Berlin and London translations (Brit. Mus., Rieu, *Catalogue*, p. 206—209) also differ from the Arabic original and from almost all the Persian translations in that they include a book of countries, a synopsis of the Geography, as in the Cambridge Persian Codex mentioned above. Aḥmad Bīdjān Yāzidji-Oghlu's work, *ʿAdjāʾib al-Makhlūḳāt*, is probably only a free version of al-Ḳazwīnī's Cosmography; cf. Pertsch, *Katal. der arab. Hss. zu Gotha*, iii. 127, and Pertsch, *Verzeichnis der türk. Hss. . . . . zu Berlin*, p. 199.

There is apparently a Čaghatāi version of the Cosmography in the St. Petersburg Library (Chanykow, Nº. 108); see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 127.

2. The Geography. The Geography exists in two editions with different titles; the older is called *ʿAdjāʾib al-Buldān* and the later *Āthār al-Bilād wa-Akhbār al-ʿIbād*. The first recension represented by MSS. in Berlin (see Ahlwardt's Catalogue, v. 370) and Paris (de Slane, p. 392) dates from the year 661 (1263). The second, much enlarged and on some points completely altered edition dates from the year 674 (1275). On the two recensions and their relationship to each other see Wüstenfeld in his edition of the Geography, p. viii. *sq.*; he based his edition on the second recension which exists in numerous manuscripts. On the MSS. see the references in Wüstenfeld, *op. cit.*, vol. ii., p. iv. *sq.*, and Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 152 *sq.*

In this work al-Ḳazwīnī gives a description of the earth following the Ptolemaic division into

seven climes or longitudinal zones (see the art. IKLĪM and cf. also Taeschner in the *Z.D.M.G.*, lxxvii. 51 *sq.*). Within the seven climes the separate countries, towns, mountains, islands, lakes, rivers etc. are arranged in alphabetical order. Their remarkable features are described and many historical events connected with them are given. Considerable space is taken up by the sections on the life and work of famous men born in the various places. The book is therefore, like Yāķūt's Geographical Dictionary, loaded with historical and biographical material. In arrangement it is a geographical lexicon, like Yāķūt; only, as a result of the division into seven sections, it is less easy to consult. Many articles such as those on various mountains, lakes, rivers etc., are also found in the Cosmography usually with identical text.

There are also Persian translations of the Geography; manuscripts of them exist, for example, in St. Petersburg (Chanykow, N⁰. 107; see Pertsch, *Katal. d. arab. Hss. zu Gotha*, iii. 153) and in Oxford (Sachau-Ethé, *Catalogue of Pers. MSS.*, col. 401, N⁰. 401). It has already been mentioned that a synopsis of the Geography of al-Kazwīnī exists in a Persian translation (MS. in Cambridge) and seems to have been inserted in several MSS. of a Turkish version of the Cosmography.

A synopsis of the Geography of al-Kazwīnī was made about 806 (1403) by al-Bākuwī ʿAbd al-Rashīd b. Ṣāliḥ b. Nūrī, entitled *Talkhīṣ al-Āthār wa-ʿAdjāʾib al-Malik al-Kahhār*. The inconvenient alphabetical arrangement of the names within the seven climes is retained; on al-Bākuwī and his book see Ḥādjdjī Khalīfa, ed. Flügel, ii. 399, N⁰. 3529; Reinaud, *Géographie d'Aboulféda*, i., p. clxi.—ii.; Wüstenfeld in Lüdde's *Zeitschr. für vergleich. Erdkunde*, i., 1841, p. 59, and in his edition of al-Kazwīnī, ii., p. viii.; Aumer, *Katal. der arab. Hss. . . . zu München*, p. 402; Brockelmann, *G. A. L.*, i. 481, ii. 213. A translation of this book based on a Paris MS. was given by de Guignes in the *N.E.*, ii. 386—545. On the relationship of al-Bākuwī's synopsis to al-Kazwīnī's original see especially Juynboll, *Lexic. Geograph. Marāṣid al-Iṭṭilāʿ*, vol. iv., p. lxxvii.—xcii. Al-Bākuwī usually adds the latitude and longitude to the places mentioned, which are lacking in al-Kazwīnī. He is also of use in correcting wrong readings in al-Kazwīnī and coming to a correct opinion on doubtful ones.

We may here say a little about the illustrations found in many MSS. of al-Kazwīnī's works, astronomical figures and tables, etc. Painted pictures are, it appears, only found in MSS. of the Cosmography. We may assume with certainty that the originals of al-Kazwīnī were full of such pictorial embellishments and of tables. Indeed, almost all the larger MSS. of the Cosmography are embellished in this way. Manuscripts which show gaps deliberately left for the insertion of pictures must also have been copied from illustrated originals; such are Gotha N⁰. 1508 (cf. Ruska in *Isl.*, iv. 261) and London, India Office (*Catal.* by Roth, p. 209 *sq.*, N⁰. 725). Rude pictures are contained e. g. in Gotha 1507, Munich 463 and Vienna 1436; better Gotha 1506 and Vienna 1437; numerous fine illustrations in Munich 464 and Cod. Sarre (see supra); cf. thereon the Catalogue of Aumer (Munich), p. 102 *sq.*; Flügel (Vienna), ii. 505 *sq.*, and Pertsch (Gotha), iii. 128 *sq.* The Persian versions of the Cosmography also are usually adorned with miniatures e. g. the two Berlin Codd. 345 and 346 (see Catal. by Pertsch, p. 367 *sq.*) and London, Brit. Mus., N⁰. 8 (Catal. by Rieu, col. 464), the latter with illustrations in the Indian style. Although these pictures with their illustrations of plants, animals, marvels of the sea etc. are very often quite fantastic in character and not infrequently pure invention, they ought not to be simply ignored in any future new edition of the Cosmography, as Wüstenfeld did, who has only reproduced the astronomical and other figures and tables in his editions of the Cosmography and Geography (cf. thereon Wüstenfeld, *Kosmographie*, p. iv. *sq.*). So far only a few facsimiles have been published by Möller in the old Gotha Catalogue, vol. i., from Gotha N⁰. 1507. The miniatures in al-Kazwīnī's Cosmography have, however, been used in the discussion of important problems, e. g. by Saxl in his investigations into the history of the representation of the planets (in *Islam*, iii. 151 *sq.*). There he discusses the seven pictures of planets of Codex Monac. 464, which he also reproduces (Pl. 4, fig. 1—4 and 5, 6—8). Sarre in *Münchner Jahrbuch der bildenden Kunst*, i. 18 *sq.*, discusses the somewhat different figures of the Cod. Sarre.

In criticising al-Kazwīnī's two works, it is also important to know what sources were used for them. A list of the authorities quoted in the Cosmography was compiled by Möller and there are two MS. copies of it in the Gotha Library; see Pertsch, *Katal. d. arab. Hss. . . . zu Gotha*, iii. 131, N⁰. 1509—1510). Wüstenfeld in the *G. G. A.*, 1848, i. 351—353, briefly discusses the sources known to have been used for the Geography (practically the same as for the Cosmography). According to him, about 50 authors are quoted in the Geography, including the more important geographers and historians. The following are specially cited for the geography of Spain: al-Gharnāṭī Muḥammad b. ʿAbd al-Raḥīm (d. 563=1168; on him see Wüstenfeld in Lüdde, *Zeitschr. f. vergleich. Erdk.*, i. 43) and al-ʿUdhrī Aḥmad b. ʿUmar (d. between 476 and 478 = 1083—1085; on him see Jacob, *op. cit.*, i. ³ 3 *sq.*). Abū Ḥāmid al-Andalusī, d. 565 (1169), the author of a Cosmography entitled *Tuḥfat al-Albāb* (on it see Jacob, *op. cit.*, iii. 69—94), is often quoted. The already mentioned Persian Cosmography of Aḥmad al-Ṭūsī (on it see Reinaud, *Géogr. d'Aboulféda*, vol. i., p. xlvi., and Pertsch, *Die pers. Hss. . . . zu Berlin*, p. 366) is also found among the sources. Further may be mentioned the works of Avicenna, the so called *Theology of Aristotle* wrongly ascribed to Aristotle (cf. the two works by Ruska; see *Bibl.*) and the *Kitāb al-Ḥayawān* of al-Djāḥiẓ. Ibn Faḍlān and Misʿar al-Muhalhil have already been mentioned. Many of al-Kazwīnī's sources e.g. the African travels of al-Iṣfahānī are now lost to us. Al-Kazwīnī also utilised oral information from foreigners e. g. al-Mulṭānī Abu 'l-Rabīʿ Sulaimān who had travelled in the interior of Africa. The remarkable information regarding various French and German towns which al-Kazwīnī owed to the Spaniard Ibrāhīm al-Ṭarṭūshī (d. 477 = 1085) was also probably communicated orally and not taken from a book; on this cf. Jacob, *op. cit.*, i. (third edition entitled *Ein arabischer Berichterstatter aus dem 10. Jahrh. über Fulda* etc., Berlin 1896) iv. 137 *sq.*

As to the printed editions of the two works of al-Ḳazwīnī, the first and only complete European edition is that of Wüstenfeld. The Geography (published as the second part of al-Ḳazwīnī) appeared in Göttingen in 1849 and the Cosmography (= Part i.) in 1848. The value of the latter has already been discussed above. In the east the Cosmography has been repeatedly printed on the margin of al-Damīrī's *Kitāb al-Ḥayāt al-Ḥayawān*, e.g. in Cairo 1305, 1309 and 1330. An edition of al-Ḳazwīnī printed in 1331 in Cairo (only the Cosmography) is mentioned in Harrassowitz, *Bericht über neue Erwerbung*, Nº. 2337. On earlier editions and translations of parts of the two works of al-Ḳazwīnī cf. the references in de Sacy, *op. cit.*, iii. 431, 435, 450; Wüstenfeld in Lüdde's *Zeitschr. f. vergleich. Erdk.*, i., 1842, p. 49, and in his edition of the Cosmography, i. p. vi.; Pertsch, *Katal. der arab. Hss. . . . zu Gotha*, iii., 1881, p. 426. Of earlier editions of parts of the Cosmography we may mention: de Sacy, *op. cit.*, iii. 385—516, with Arabic text, p. 168—207 (sections on minerals, plants, men, with translation and full notes); L. Ideler, *Untersuchungen über den Ursprung und die Bedeutung der Sternnamen*, Berlin 1809, p. 373—409 (the text of the description of the stars with annotations); Volck, *Calendarium Syriacum Arabice Latinumque edidit et notis instruxit*, Leipzig 1859 (dealing with the chapter on the Syriac months).

Of translations alone we may also note: Ethé's translations of the Cosmography, part i., Leipzig 1868; this only covers about the first half of the Cosmography (Wüstenfeld, i. 1—208); of especial value is the very full appendix of notes (with many textual emendations by Fleischer); J. Ruska, *Das Steinbuch aus der Kosmogr. des Ḳazwīnī*, Heidelberg (*Progr. der Oberrealschule*), 1896 (translation of Wüstenfeld, i. 208—245); cf. with this also J. Ruska, *Das Steinbuch des Aristoteles*, Heidelberg 1912, p. 81 *sq.*; J. Ansbacher, *Der Abschnitt über die Geister und wunderbaren Geschöpfe . . .*, transl. and annot., Erlangen (dissert.), 1905 (transl. of Wüstenfeld, i. 368—374, 448—451); Taeschner, *Die Psychologie Ḳazwīnī's*, Tübinger dissert., Kiel 1912 (transl. of Wüstenfeld, i. 301—322).

Valuable material for a commentary on al-Ḳazwīnī is further given by the works of G. Jacob and E. Wiedemann, who have translated and elucidated various shorter articles from the works of al-Ḳazwīnī. Special mention should be made of Jacob's *Studien in arabischen Geographen*, part 1—4, Berlin 1891—1892 (of which part 1 appeared in a third enlarged edition in 1896); E. Wiedemann has made many contributions on the subject to the *Mitteil. zur Gesch. der Medizin und Naturw.*, *S.B.P.M.S. Erl.*, and to other periodicals; cf., for example, the references by Ruska in *Isl.*, iv. 336 (Nº. 303), vii. 270 (Nº. 76) and 277 (Nº. 129).

In conclusion, attention should be drawn to the fact that in preparing a new edition of al-Ḳazwīnī's works Fleischer's own copy of Wüstenfeld's edition of the text, containing numerous emendations, which is preserved in the MSS. Dept. of the Berlin Library, should be utilised.

Bibliography: Besides works already quoted above: Ḥadjdjī Khalīfa, *Kashf al-Ẓunūn*, ed. Flügel, i. 154, Nº. 72; 188, Nº. 8072; iv., Nº. 8061; vii. 1259, Nº. 9340; Wüstenfeld in Lüdde's *Zeitschr. für vergl. Erdk.*, 1842, i. 49; Wüstenfeld in the *G. G. A.*, 1848, i. 345—353; Reinaud, *Géographie d'Aboulféda*, i., Paris 1848, p. cxlii.—ix.; Rieu, *Catal. Codd. . . . in Museo Britannico*, ii., London 1871, p. 463, and *Supplem.*, London 1894, p. 471; Brockelmann, *Geschichte der arabischen Litteratur*, i. 481—482.

(M. Streck)

AL-ḲAZWĪNĪ, Ḥamd Allāh b. Abī Bakr b. Aḥmad b. Naṣr al-Mustawfī al-Ḳazwīnī, a Persian geographer and historian. He belonged to an old family of Ḳazwīn of which he himself (*Tārīkh-i Guzīda*, ed. Browne, p. 839—842, 848) gives a full account. It was a Shīʿī family, which traced its descent from Ḥurr b. Yazīd al-Riyāḥī who fought at Karbalāʾ and had held the governorship of Ḳazwīn since the time of the Caliph al-Muʿtaṣim with only a brief interruption under the Sāmānids. In the time of Maḥmūd of Ghazna this office was taken from them. Ḥamd Allāh's great-grandfather was accountant (*mustawfī*) of the ʿIrāḳ, hence the family name. The author himself was appointed financial supervisor of the districts of Ḳazwīn, Abhar, Zandjān and Ṭārimain (*Tārīkh-i Guzīda*, p. 598; cf. *Nuzhat al-Ḳulūb*, ed. Le Strange, p. 27, Engl. transl., p. 33) by the vizier Rashīd al-Dīn. In 677 (1278/79) another Mustawfī, Fakhr al-Dīn Aḥmad, was once more governor of Ḳazwīn, but jointly with a certain Ḥusām al-Dīn al-Shīrāzī.

The year of al-Ḳazwīnī's death is not given. The date of his birth can be easily calculated from the following data. We know that he finished his *Ẓafarnāma* in 735 (1334/35), worked at it for 15 years and began the book when he was 40 years of age (Rieu, *Supplement*, p. 173). This work was interrupted by the composition of the *Tārīkh-i Guzīda* (Rieu, *op. cit.*, p. 173; *Tārīkh-i Guzīda*, p. 5); the time spent on this is probably included in the 15 years. He was therefore 55 years of age in 735 and was born in 680 (1281/82).

Works. His intercourse with the celebrated vizier and historian Rashīd al-Dīn Faḍl Allāh († 718 = 1318), to whose entourage he belonged (his brother Zain al-Dīn was *Nāʾib-i Dīwān-i Wizārat* under the same vizier: see Rieu, *Cat.*, i. 81), aroused in al-Ḳazwīnī a desire for historical studies (*Tārīkh-i Guzīda*, p. 4). About 720 therefore he began a great historical epic, the *Ẓafarnāma*, finished in 735, which was intended as a continuation of Firdawsī's *Shāhnāma*. Further details are given in the description of the unique MS. of the work in the Brit. Mus. in Rieu, *Supplement*, p. 172 *sqq.* The poem contains 75,000 *bait*'s and deals in three sections with the life of Muḥammad and the history of the Caliphate, the history of the Persian dynasties, and the history of the Mongols. The author gives no literary sources; according to Rieu, his statements regarding historical facts are very accurate and the Mongol part gives valuable information, which the author owes in part to his great-grandfather Amīn Naṣr al-Mustawfī. The last event which is mentioned is of the year 734 (1333/34). From the few specimens in Rieu it is not possible to pass judgment on the language and style. We are therefore grateful to Browne for giving in his *History of Persian Literature under Tartar Dominion*, p. 96 *sq.*, a passage in 24 distichs dealing with the devastation of Ḳazwīn by the Mongols. We can see the slavish copying of Firdawsī's style (a rhyme like *bushud* *shud-bargashta shud* is not without its parallel in Firdawsī's text as we

have it). Mention must also be made of the critical work which al-Ḳazwīnī (probably before he began work on the *Ẓafarnāma*) did on Firdawsī's *Shāhnāma*. The London MS. of the *Ẓafarnāma* has the text of Firdawsī edited by our author on the margin (Rieu, *op. cit.*, p. 172). Work on the *Ẓafarnāma* was interrupted by the compilation of a compendium of universal history, the *Tārīkh-i Guzīda* (finished 730 = 1330). This work comprises the history of the Muhammadan world from the creation to 729 (1329) and is written in a very simple, indeed arid style, except for the preface which contains a dedication to Ghiyāth al-Dīn, son of the vizier Rashīd al-Dīn. The preface is followed by an introduction (*fātiḥa*) dealing with the creation of the world and then come six sections (*bāb*) dealing 1) with the prophets, 2) the old Persian kings, 3) Muḥammad and the Caliphs, 4) the dynasties of the Muslim period in Persia and adjoining lands, 5) scholars and poets, and 6) history and topography of Ḳazwīn. A *khātima* follows containing genealogical data and genealogies, which latter, however, are wanting in most MSS., according to Browne. Some of these manuscripts, like Brit. Mus. Add. 22,693 and that published by Browne in facsimile, have between *bāb* 4 and 5 a synopsis of the history of the Muẓaffarid dynasty which is not by al-Ḳazwīnī (Rieu, *Catalogue*, i. 82; Browne, Gibb Mem. Ser., xiv/ii. 151 *sqq.*). The compendium must have enjoyed great popularity on account of its wealth of matter, for it has often been copied in the East and is therefore of frequent occurrence in European collections also. Browne, *J. R. A. S.*, 1900, p. 725, gives a list of the most important manuscripts; the one published in facsimile by him is not included; it was written in 875 (1455) and comes from a private Persian collection (Gibb Mem. Ser., xiv/i. p. xv.). The sources on which the book is based are given by the author (ed. Browne, p. 8). On this cf. Browne in the Gibb Mem. Ser., xiv/ii. 1 *sq.*, and *Hist. of Persian Literature under Tartar Dominion*, p. 87 *sqq.* They include the celebrated historians al-Ṭabarī, Ibn al-Athīr, Ḥamza al-Iṣfahānī etc., also Persian authors of a later period, like Djuwainī, Niẓām al-Mulk's *Siyāsat-nāma*, also the *Shāhnāma* and a *Tadhkirat al-Awliyā'*, which, according to Browne, is the well-known work of the same name by Farīd al-Dīn 'Aṭṭār. The main source seems to have been Rashīd al-Dīn's *Djāmi' al-Tawārīkh*, with the second part of which the *Guzīda* agrees in arrangement (ed. Browne, p. xiii. *sq.*). Another work now lost, the *Saldjūḳnāma* of Ẓahīrī of Nīshāpūr was used by al-Ḳazwīnī and by Rāwandī also in his *Rāḥat al-Ṣudūr*; on the relation of the *Rāḥat* to the *Guzīda* cf. Muḥammad Iḳbāl in his introduction to the edition of the first mentioned work (Gibb Mem. Ser., New Ser., ii. 30 *sq.*). The *Guzīda* itself is five times quoted in Dawlatshāh's *Tadhkirat al-Shu'arā'*, among other things for the well-known story of the Sāmānid vizier Naṣr and Rūdagī (Dawlatshāh, ed. Browne, p. 31, = *Guzīda*, ed. Browne, p. 382). Dawlatshāh once (p. 105) expressly quotes as his authority the *tadhkira* of poets preserved in the *Guzīda*. On the relation between Dawlatshāh's *Tadhkira* and the *Guzīda* see also Browne in the *J. R. A. S.*, 1899, p. 39 *sq.* Lastly it may be mentioned that the *Guzīda* itself is one of the sources of Mīrkhwānd's *Rawḍat al-Ṣafā'*.

Al-Ḳazwīnī's last work, the *Nuzhat al-Ḳulūb*, completed in 740 (Rieu, *Catalogue*, i. 419), is mainly geographical. It is divided into an introduction (*fātiḥa*), which deals with cosmography, and three sections (*maḳāla*), which deal with natural history, anthropology and geography. Then follows a concluding section (*khātima* or *kitāb al-ʿadjā'ib*) on wonderful things and curiosities in Īrān and other lands. As in the case of the *Tārīkh-i Guzīda* there is a large number of MSS. of this work (a survey of them is given in Le Strange's preface to his edition in the Gibb Mem. Series, xxiii/i., p. xiv. and xx.). On the sources of the *Nuzhat* cf. Rieu, *Catalogue*, i. 418; Browne, *Hist. of Pers. Lit. under Tartar Dominion*, p. 99. They include, as might be expected, the famous geographer Yāḳūt, the older Ḳazwīnī, Ibn Khurdādhbih and others not so well known. The statements regarding Fārs are taken from Ibn al-Balkhī's *Fārsnāma*. That he, as Le Strange supposes, made use of official documents, taxation lists, as is to be expected from his position as finance officer, is very probable.

Bibliography: On his life see *Tārīkh-i Guzīda*, ed. Browne, p. 3 *sqq.*; Rieu, *Catalogue*, i. 80 *sq.*; *Supplement*, p. 172—174; the prefaces by Browne and Le Strange to their editions of the *Guzīda* and the *Nuzhat*; Browne, *History of Persian Literature under Tartar Dominion*, p. 87 *sqq.*

Tārīkh-i Guzīda: edition by Browne, Gibb Mem. Ser., xiv/i (facsimile of a manuscript), xiv/ii. (very full synopsis of contents in English and Index by R. A. Nicholson). Separate parts had been previously published: the greater part of the description of Ḳazwīn by Barbier de Meynard in the *J. A.*, 1857 (Ser. 5, vol. x. 257 *sqq.*); the section on the poets of Persia by Browne, *J. R. A. S.*, 1900, p. 721 *sqq.*, and *J. R. A. S.*, 1901, p. 1 *sqq.*; the history of the Islāmic dynasties of Īrān and the adjoining lands in J. Gantin, *Târîkhè Guzîdè*, i. (1903; no more publ.), text and French transl. Two portions from a St. Petersburg MS. (Ḥasan-i Ṣabbāḥ and sayings of Buzurdjmihr) in Salemann-Žukowski, *Persische Grammatik*, p. 5 *sqq.*, 41 *sqq.*

Nuzhat-i Ḳulūb: editions: Bombay 1311 (1894; I have not seen this, an edition of the whole work); *The geographical part of the Nuzhat al-Qulūb* . . . . , ed. by G. Le Strange, Gibb Mem. Ser., xxiii/i. (text), ii. (Engl. transl.) 1915 and 1919. A part of the text had been previously published by Schefer, *Siassetnameh*, Supplément, 1897, p. 141—235 (not accessible to me).

(V. F. BÜCHNER)

AL-KEF (الكاف), a town in Tunisia, 110 miles S. W. of Tunis and about 20 from the Algerian frontier, situated in 36° 11' N. Lat. and 8° 30' E. Long. The population in 1911 was 6,322, including 1,200 Europeans and 800 Jews. Many of the latter are descended from the Jews who used to live among the Beduins, whose customs and dress they had adopted.

The word *kef* means "rock". It is given on account of the situation of the town on a spur of the Djabal Dyr at a height varying from 2,486 feet in the S.W. to 2,853 in the N.E. Before the establishment of the French protectorate, it was surrounded by a wall now in part destroyed. The area circumscribed by the wall contains many

buildings now in ruins and empty spaces; in compensation a European town is in process of formation on the plain near the station on the railway now connecting al-Kef with Tunis. At the foot of the wall rises an abundant spring, the ʿAin al-Kef, an object of veneration to the inhabitants and regarded by them as "marabout". Commanding the principal roads from Algeria to Tunisia, al-Kef was for long one of the busiest markets of the Regency; in economic importance the town ranked next to Tunis and Sfax. This is no longer the case since the building of the Tunis-Constantine railway to the towns in the valley of the Medjerda. Nevertheless the mineral resources of the adjoining country assure to al-Kef the elements of its future prosperity. The town was, and still is, a religious centre. The two most popular brotherhoods in the Regency, the Ḳādiriya and the Raḥmāniya, have each a much frequented *zāwiya* there.

Al-Kef is the ancient Sicca Veneria, a Punic town which became a Roman colony under Augustus. Very prosperous during the early centuries of the Christian era, it was in the Byzantine period one of the strongest places in Africa. There still survive many ruins, columns, capitals, fragments of statues, inscriptions, remains of temples, baths and Christian basilicas. The cult of Tanit, identified with Venus, whose name is found in that of the ancient town, may even have left some traces in local superstitions.

Sicca survived the Arab invasion of the seventh century A. D. The ancient name of the town continued in existence in the form Shikka Benāriya. This is the name used by al-Bakrī (ed. de Slane, p. 55; transl. p. 82) in the *Kitāb al-Istibṣār* and even in Ibn Khaldūn (*Hist. des Berbères*, ed. de Slane, i. 220, 256, ii. 20; transl. ii. 42, 98, iii. 209). We know very little of the history of the town till the seventeenth century. Ibn Khaldūn, however, tells us that it was governed at the beginning of the sixth (twelfth) century by a certain ʿIyāḍ b. Naṣr Allāh, who succeeded in protecting it against the incursions of the Hilālīs and whose son submitted to ʿAbd al-Muʾmin in 554 (1159—1160). In the following century the Sulaim settled in this region and incorporated the Howāra Berbers, who had been settled there since the beginning of the second century A. H. In the beginning of the sixteenth century A. D., al-Kef and the surrounding country were occupied by the Ulād Sīda, a section of the Banū Shennūf, who attached themselves to the Mahalhil, one of the two great families into which the Sulaimī Kaʿūb were divided.

Under Turkish domination, the region of al-Kef played an important part in the fighting between Algerians and Tunisians, especially in 1628, 1685, 1694, 1705, 1746 and 1756. The rulers of Tunis during this period tried to make al-Kef strong enough to bar the invader's road to the capital. Muḥammad Bey scattered the Banū Shennūf, put in their place a *makhzen* formed by the Ulād Yaʿḳūb, and stationed a *smala* of spahis near the town. The Bey ʿAlī built a *ḳaṣba* in 1675, so strong that the place was able to repulse an Algerian attack four years later. In 1739—1740 ʿAlī Pasha built a wall round the town and placed forts on the cliff which commanded the *ḳaṣba*. In spite of these precautions, al-Kef, which had been unsuccessfully attacked by the Algerians in 1746, was taken by the Dey's troops in 1756 after a siege of thirteen days. In the beginning of the nineteenth century a new *ḳaṣba* was built (1813) by Ḥammūda Pasha, who said that "if his body was at Tunis, his head was at al-Kef". The garrison was put under the command of an *agha* independent of the *ḳāʾid* or civil governor. The taking of Constantine in 1837 by the French, by ridding the Regency of the dangerous proximity of the Turks, lessened the military importance of al-Kef, the fortifications of which were now only used to protect the town against Beduin raids. During the Tunisian expedition, the French troops entered the town without striking a blow on April 25, 1881.

KELĀT. [See KALĀT].

KELEK (*t.*), a raft consisting of beams bound together with rope and placed upon inflated sheepskins. These rafts are chiefly used on the Tigris where this river is not navigable for ships. They are described as early as Herodotus (i. 194) and Xenophon (*Anabasis*, i. 5, 10; iii. 5, 9 *sqq.*). They are still used at the present day and are mentioned by nearly all travellers in Mesopotamia.

KEMĀKH (KAMAKH, KAMKH, Greek Κάμαχα), a fortress situated on the southern bank of the Euphrates (Kara Ṣū) in its course North-East to South-West, before it takes a sharp turn to the South. The river is here confined between high rocks to such a degree that there is no longer room for the highway that has hitherto accompanied its course. The town, which till late in the sixth century was one of the fortified places of Asia Minor, is situated on the mountain-slope and surrounded by gardens and orchards. In spring the many mulberry trees attract myriads of quails, a phenomenon which is looked upon as something miraculous. The river is still utilized by the natives for floating down-stream timber which is cut in the forests in the neighbourhood. The salt, cheese and linen manufactured at Kamakh had a high reputation.

Higher up the mountain is situated the fortress which, chiefly on account of its natural position, was considered to be impregnable. It is said to have borne the name of Ani and to have been one of the chief places of the Armenian kings as well as of the Arsacids who had here their temples, treasury, state-prison and who were also buried in

this place. The descriptions of Ani as a royal residence have some resemblance to those of the other place of the same name (see the art. ANI) situated on the Arpa Čai.

Kemākh was taken by 'Umair b. al-Ḥubāb al-Sulamī in the year 59 A. H. It has, however, from that time onwards often changed its master. In 133 (751/52) it was besieged by the Emperor Constantine. The 'Abbāsid caliph al-Manṣūr tried to strengthen his hold on it by a restoration of the citadel; it is said that he intended to use it chiefly as a bulwark against the invasions of the Khazars. In 177 (793/94) it was besieged by the Byzantines. Ḥamd Allāh Mustawfī (born 680 = 1281/1282) mentions it as a small town. The Ottoman Emperors Bāyazīd and Selīm took it after a siege, the former, at the hands of his general Timurtash, in 1396, the latter in 1515. Tīmūr beleaguered it for seven months, without being able to take it. According to J. Brant, who visited the town about 1830, its population consisted at that time of 400 Turkish and 30 Armenian families; it was the residence of one of the last Dereheys [q. v.] Kemākh is the chief place of the Ḳaḍā of the same name, Sandjaḳ Erzindjān, wilāyet Erzerūm. It is the residence of a ḳā'im maḳām. In the vicinity are numerous turba's. At the present day it is still an important centre of commerce and industry.

The population of the Ḳaḍā consist of 14.547 Muḥammadans, 3.503 Greek Armenians, 189 Protestant Armenians and 633 orth. Greeks (Cuinet).

KEMĀL AL-DĪN ISMĀ'ĪL, a Persian poet of Iṣfahān, son of Djamāl al-Dīn 'Abd al-Razzāḳ, was one of a group which devoted its eulogies to the family of the Ṣā'idīs (also called Āl-i Khudjandī) which kept political and judicial power in its control in Iṣfahān. Surnamed *Khallāḳ al-Ma'ānī* "creator of thoughts", he dedicated his odes mainly to the judge Rukn al-Dīn Ṣā'id b. Mas'ūd, but also to the Khwārizmshāhs ('Alā' al-Dīn Takash, Muḥammad, his son, Djalāl al-Dīn and Ghiyāth al-Dīn, his grand-sons) who ruled in 'Irāḳ-'Adjamī, as well as to the Atābeks of Fārs who ruled at Shīrāz (Sa'd b. Zangī and his son Abū Bakr). In the end he retired from the world and devoted himself to the mystic life under the guidance of Shaikh Shihāb al-Dīn 'Umar b. Muḥammad al-Suhrawardī. He was tortured and put to death on Djumādā I 2, 635 (Dec. 21, 1237), at the capture of Iṣfahān by the Mongol soldiers of the army of Ogotāi, son of Čingiz Khān, who hoped to find hidden treasure in his house. His *Dīwān* has been printed at Bombay (n. d.); there are partial translations by Louis H. Gray, put into English verse by Ethel Watts Mumford (*Hundred Love Songs*, New-York 1904) and by Theodosia Garrison (*Lippincott's Mag.*, lxv. 783), of the 15 quatrains published by Salemann-Shukovski, *Persische Grammatik*.

(CL. HUART)

KEMĀL KHODJANDĪ (KAMĀL AL-DĪN MAS'ŪD), a Persian lyric poet, born in Khudjand in Transoxania. He followed the mystic path, went on a pilgrimage to Mecca and on his return settled in Tibrīz the climate of which had pleased him. On the capture of this town by Toḳtamish-Khān, he was taken to the town of Sarāi at the request of this prince's wife. He remained there four years. Having returned to Tibrīz the Djalā'irid Sulṭān Ḥusain, son of Sulṭān Uwais, had a house built for him. He likewise received favours from Mīrān Shāh, son of Tīmūr and governor of Ādharbaidjān, who paid his debts. He died there in 792 (1390) according to Dawlat Shāh, or 803 (1400) according to Khondemīr. He was buried in the Farah-bakhsh quarter where his tomb became an object of pious visits. Ten of his ghazals have been published by Bland, *Century*, p. 9—12. There is, in the national library of Vienna, a very beautiful manuscript of his poems illuminated with miniatures (Flügel, *Die arab., pers. u. türk. Handschr. ... zu Wien*, i. Nº. 581).

Bibliography: Dawlat Shāh, *Tadhkirat al-Shu'arā'*, p. 325; Luṭf 'Alī Beg, *Ātash-kade*, in the section on Tūrān (not paginated); Riḍā Ḳulī Khān, *Madjma' al-Fuṣaḥā'*, ii. 29; J. von Hammer, *Schöne Redekünste Persiens*, p. 255; Khondemīr, *Ḥabīb al-Siyar*, iii. 3, p. 90; Sir Gore Ouseley, *Biographical Notices of Persian Poets*, p. 192—194; H. Ethé, in the *Grundriss d. iran. Philologie*, ii. 304.

(CL. HUART)

KEMĀL MEḤMED NĀMIḲ, one of the most important of Turkish poets, stylists and authors, the principal leader of the Turkish moderns, creator of the modern Turkish prose language and the most notable Turkish patriot of modern times. Kemāl, born on Dec. 21, 1840 (Shawwāl 26, 1256), in Rhodosto on the Sea of Marmara, belonged to an old aristocratic family which could be traced back through his father, the astronomer Muṣṭafā 'Āṣim Bey, his father Shams al-Dīn Bey, the first Chamberlain of Sulṭān Selīm III, and his father, the admiral Ḳapudan Aḥmad Rātib Pasha, to the Grand Vizier Topal 'Othmān Pasha, the conqueror of Nādir Shāh of Persia. His father belonged to Yeni Shehir in Anatolia and his mother to Kanica in Albania. The Albanian strain in him was of the highest importance and explains much in his

indomitable character and his strong passionate nature. In appearance he was quite like a European. He was liberal, open-hearted and attractive.

Kemāl had a rather irregular, unsystematic education at home; he had only nine months' regular schooling in Constantinople at the Bāyazīd-Rüshdiye and the Wālide-Mektebi. He was trained in Arabic, Persian and French by private tuition. In 1852 he was with his grandfather Shams al-Dīn Bey in Kars and later in Sofia where he began to write poems although only 14 years of age, quite in the style of Sünbül-Zāde, whose *Dīwān* had to serve him as a model for lack of other patterns. Returning to Constantinople in 1857/8 he entered the translation bureau of the Sublime Porte and soon became a member of the then flourishing group of poets of the old school: Nā'ili, Muslim Pasha-Zāde Memdūḥ Fā'iḳ, Hālet, Hersegli 'Ārif Ḥikmet, Ghālib and Kāzim, who imitated Nef'ī and Fehīm chiefly. Kemāl quickly won an honoured place among them. He put together a slim *Dīwān-i Mürettēb* of not very original poems. In his poems he took the pen-name of Nāmiḳ. It is remarkable that the last incomplete *ghazal* of the *dīwān* is the first of his patriotic poems.

He only entered upon the field he was to make his own through Shināsī Efendi, who had studied in Europe and was now in Constantinople endeavouring to attract men of intellect to western culture and ideas, mainly in his capacity as editor of the influential newspaper *Taṣwīr-i Efkār*. Kemāl became friendly with him and soon fell completely under his influence, which directed him from the imitation of classical models to the spirit of the west. Kemāl grasped with ardour the new ideas, the importance of which he at once realised. He made it his aim in life to bring about a literary, political and scientific renaissance in old fossilised Turkey and to secure her a place among the nations of the West. He began his troubled career by writing for Shināsī's paper. Henceforth he wrote under the name Kemāl, which soon gained the greatest popularity.

When Shināsī [q.v.] fled to Paris in 1864 he left the editorship of his paper entirely in the hands of the young Kemāl, who at first found it a very difficult task. For a year he published almost nothing but translations from the French. Then important political questions (the Polish rising and the American Civil War) helped him to raise the standard of the paper which had gone down very much. He now took the field with political articles of his own which aroused the greatest interest on all sides and made the *Taṣwīr-i Efkār* the most influential newspaper. It was in its pages that the expression "Young Turk" first appeared.

Kemāl became more and more embarrassing to the government. Although only 25 years of age, he had already been given the mütesarriflik of Ḳal'e-i Sulṭāniye (Gallipoli) for a short time and next they wished him to become ambassador to Persia in order to get him away from Constantinople. But he did not accept this post. It was only with difficulty that he escaped being sent to Erzerūm. Kemāl had joined the Young Turk committee founded by Ziyā among the elements in favour of reform, the main object of which was to raise Turkey from her backward state and obtain a constitution. When the members were threatened with arrest, Ziyā, Kemāl, Nūri, Rif'at and 'Ali Su'āwī fled from Turkey in 1866 to London where they settled down. At the time of this his first voluntary exile Kemāl was expecting the birth of his first child, who afterwards became the poet 'Ali Ekrem. In London Kemāl published the paper *Mukhbir* ("The Correspondent") on behalf of the party; it was later transferred to Paris and then replaced by the *Ḥürriyet* ("Liberty"). In Paris he studied law and economics and translated important French works into Turkish.

His stay in Europe was of overwhelming influence on his political and literary development. Henceforth he came back again and again to the subject of civilisation. When, after the death of the Grand Vizier 'Alī Pasha, it became possible for the Young Turks to return home, Kemāl undertook the editorship in Constantinople of the Young Turkish paper *'Ibret*. He succeeded by his articles, which are of permanent value, in making the paper one of the most important in Turkey. At the same time he contributed to a number of other papers and periodicals and thereby completely influenced and revolutionised public opinion.

When Kemāl became inconvenient to the government by his political activity, especially through his patriotic drama *Waṭan*, which aroused unbounded enthusiasm, he was banished to the fortress of Famagusta in Cyprus. At first he was in the closest solitary confinement, where he planned in his subterranean cell his drama *'Ākif Bey*, which he wrote out and printed as soon as the rigour of his imprisonment was slackened. He was detained in Famagusta for 38 months until the accession of Murād gave him his liberty and permission to return to Constantinople. But Murād only reigned 93 days. With the accession of 'Abd al-Ḥamīd a limit was soon put once more to Kemāl's activity. Kemāl took part in the preparation of the constitution and shared in the deliberations with Midḥat Pasha and Ziyā Pasha.

His liberal activities aroused the deepest mistrust in 'Abd al-Ḥamīd. He was arrested and spent $5^1/_2$ months in the common prison in Constantinople where he spent most of his time in historical study in preparation for a history of the Turkish army. In spite of his acquittal after a trial, 'Abd al-Ḥamīd sent him to detention in Mytilene (Chios). This enforced inactivity was a great trial to him after the disastrous conclusion of the war with Russia and he expressed his feeling in songs like the touching Muhādjir song *Allāh ilün öldür beni*.

After two years' detention during which he wrote the *Djelāl* and the *Djezmī*, he was appointed *Mütesarrif* of Chios. There the disease of the lungs, which was to cause his premature death, first broke out. When Chios became the capital of a wilāyet, he was moved to Rhodes, where the more favourable climate restored his health and revived his creative powers which had somewhat abated. With the assistance of a splendid library, for the enlargement of which at great personal expense he had agents in India, Persia, Egypt and Europe, he set about the preparation of a history of the Turkish empire.

From Rhodes he went to Chios, as *mütesarrif* again. He worked at his history with a feverish activity and, in spite of the fact that his health was much affected, displayed considerable literary activity in all other directions. The order forbidding the printing or continuation of

his history which came from Constantinople as the result of a treacherous denunciation of him was therefore a frightful blow and he died during the night after receiving the order, Dec. 2, 1888, in Mytilene.

His body was first of all interred in Mytilene in front of the mosque and then solemnly removed by his son ʿAlī Ekrem to Bulair, 8 miles north of Gallipoli and there buried with military honours in the *türbe* of Sülaimān Pas̲h̲a, a worthy honour for the great patriot. ʿAbd al-Ḥamīd built a splendid *türbe* for Kemāl. While Sülaimān Pas̲h̲a's *türbe* was already a place of pilgrimage, Kemāl's *türbe* became to a still greater extent the goal of many Ottomans, who saw in him the incarnation of their ideals. The first thing done after the revolution of 1908 by the "Committee of Union and Progress" was to go solemnly from Salonica to his tomb at Bulair as to the grave of the "founder of the building of liberty" and pay homage to his manes. The unexampled moderation with which the victorious party proceeded was also a tribute to the influence of Kemāl.

The supreme and unique position occupied by Kemāl in Ottoman literature can hardly be too highly appraised. His influence on his own and the following generation was tremendous. He was perfectly aware of the difficulty of his task but always believed in a successful result, which was quite in keeping with his sanguine temperament. His personality — he was a born agitator and thoroughly revolutionary in spite of his aristocratic birth — with his unusual energy and inflexible and undaunted strength of will exercised an overwhelming attraction on the masses. He was filled with a deep, almost fanatical religious, spirit, thoroughly Islāmic in its attitude and he believed in his people, his country and their future. Basing himself on the idea of the true Islāmic culture with a strong leaning to pan-Islāmic ideas which he endeavoured to realise by going back to primitive Islām and rejecting the Islām of the past which did not satisfy him, he evolved the idea of the Ottoman fatherland and was able to impose it on his "lethargic" people. It was Kemāl who first awakened his countrymen to the conception of *Waṭan* (fatherland), which was later replaced by the Turkish *Yurt*, and to the conception of *Millet* (nation) and *Ḥürriyet* (liberty) which the Young Turks took as their watchwords.

Kemāl remained faithful to his task which he regarded as a kind of apostolic office, in spite of the most difficult conditions. His talent as an author was certainly not small but this does not completely explain the almost magical influence which he has exerted down to our own day. The most recent Ottoman literary criticism is rather inclined not to estimate him so highly. But what no critic can deny him, what places him high above all others is his thirst for freedom, his patriotism, and the fearlessness with which he expresses his ideas and above all his masterly command of language. When he began writing, he found the language in a chaotic condition, at his early death he left it a wonderfully modelled instrument. The creation of the modern Turkish prose language is undeniably Kemāl's work.

In his political and literary essays Kemāl is vigorous and convincing when he wants to defend any view. No one has surpassed Kemāl in his essays. His longer works have a tendency to resemble a series of collected articles rather than a consecutive whole.

The admiration in which he was held found expression in his many imitators.

Works. Kemāl was not primarily a poet. Besides his *Dīwān* written in the old style, although already showing traces of new features (love of country and people) and adopting modern ideas (theatre, steamer), in the *g̲h̲azal* he composed a not very large number of powerful poems which passed from mouth to mouth like revelations. He was readily followed simply because he still paid part tribute to old ideas in his poems. Many poems are scattered through his works and many went unprinted from hand to hand. They all show his deep patriotism.

In his *Wawaila* ("groaning, wail", reprinted 1326 = 1908) Kemāl laments his fatherland which is wrapped in a winding sheet. His *Bāriḳa-i Ẓafar* ("Flash of Victory", 1872) written in an elaborate style is a panegyric on the conquest of Constantinople. His enthusiastic *Waṭan Manẓūmesi* did not appear till 1326 (1908).

Kemāl's main success as an author was won by his dramas of which he wrote six. He might be regarded as the creator of the Turkish drama. In the play by Abu 'l-Ẓiyā Tewfīḳ, his most devoted friend and follower, *Eg̲h̲el-i Ḳaḍā* ("The Threatened Fate", 1288 = 1871/72), the first national Turkish drama, he was a silent collaborator although his name was never mentioned. He then tried his skill independently and wrote:

1. *Waṭan yak̲h̲od Silistra* ("Fatherland or Silistria"), a play in 4 acts first printed in 1872 and often since (transl. into Russian by W. D. Smirnow in the *Westnik Ewropi*, 1876, ix. 151; German by L. Pekotsch, Vienna 1887). The play, which is important from the sociological and psychological points of view, depicts heroic scenes in the defence of Silistria in 1854. The piece aroused tremendous enthusiasm and was the main cause of his banishment to Famagusta.

2. *Zawallî Čodjuḳ* ("The Poor Child"), a drama in 3 acts (1873). It describes the consequences of the abuse of parental authority over the child and is an attack on the traditional manner of arranging marriages. Kemāl deals with the new idea of the freedom of women to feel and to love. The influence of "La Dame aux Camelias" is unmistakable.

3. *ʿĀkif Bey*, a drama in 3 acts (1874). In this the patriotism of the Turkish naval officer is emphasised and contrasted with the faithlessness and inconstancy of his wife who abuses the absence of her husband.

4. *Gül-nihāl*, a drama in 5 acts (1875), probably based on Hamlet, extolling the motive of vengeance, especially woman's vengeance and rebellion against despotism.

5. *Djelāl al-Dīn K̲h̲wārezm-s̲h̲āh*, a tragedy in 5 acts (1875), with a long literary introduction (*muḳaddime*) on the defects of Ottoman literature and the technique of the drama, first published by Rodosī Ṣāliḥ Djemāl, then printed in Cairo without the introduction in 1292 (1875); the *muḳaddime* alone is printed in *Medjmūʿa-i Abu 'l-Ẓiyā*, Nº. 41 (1885), and *Kitābk̲h̲āne-i Abu 'l-Ẓiyā*, Nº. 69. It is a romantic tragedy from Persian history in the style of Hugo's "Cromwell" and "Hernani". *Djelāl* is thought to mark the zenith of Turkish romanticism. It is a drama intended to be read

only, a passionate protest against the government system of the Ottoman Sulṭāns. On account of its obvious bias the piece was always suppressed by the censor.

6. *Ḳara Belā* "Black Misfortune", first published in the *Külliyāt* in 1908; written in Famagusta in 1875, describes the violation of an Indian Emperor's daughter by a negro who has smuggled himself into the harem as a eunuch and takes the place of her lover. The dishonoured lady commits suicide by poisoning herself on the eve of her marriage after killing the black monster.

Smirnow seems to be wrong in ascribing a drama *Anadolu Köyleri* to Kemāl, for which the Sulṭān is said to have granted him a special reward.

Kemāl's dramas suffer from a lack of naturalness, a want of lucidity in the inner motives, from sentimentality, too much patriotic pathos and from tirades. But he knows how to grip the attention of his audience and carry them with him. A certain psychological depth cannot be denied him. The Turkish theatre was then something quite new. The plays are great achievements for their time and circumstances, in spite of all their dramatic and technical defects, especially as Kemāl was mainly concerned with using the drama as a medium to carry his ideas to the masses and to arouse the feelings dormant in the people. For him the theatre is "an amusement useful to influence the people".

He followed similar lines in his two novels, which have the same defects. But in them we have the typical features of Turkish life and thought vividly and realistically portrayed. From the point of view of style they reveal great beauty. The influence of his novels was great; they became the model for a whole school whose most ardent representative was Wedjihi. The two novels are:

1. *Intibāh yakhod ʿAlī Beyiñ Sergüzeshti* "The Awakening or 'Alī Bey's experiences" (1874; the original title is said to have been *Soñ Peshimānlïḳ*). It is the description of the adventures of a rich spoiled mother's darling, who falls into the clutches of a harlot, deluded by her intrigues heartlessly sacrifices his innocent sweetheart and is completely ruined, until finally he kills his mistress, after the sweetheart whom he has abandoned has saved him at the cost of her own life, and ends in prison.

2. *Djezmi*, a historical novel (1297 = 1880, printed 1303 = 1887/1888), the romantic love story of ʿĀdil Girai of the Crimea and the sister of the Shāh of Persia during ʿĀdil Girai's captivity in Persia in the xvith century. The main facts are taken from history; *Djezmi* marks an important technical advance on *ʿAlī Bey* in the compactness of its style and its wealth of colour. Panislāmic ideas are very evident in it.

The most noteworthy of Kemāl's historical works are: 1) his biographies *Evrāḳ-i Perīshān* "Scattered Leaves" (1301) in 4 parts in which he gives accounts of the lives of four remarkable Muhammadan men, writing in a learned style in the European manner, in the farther development of his Islāmic tendencies; the four are: the Aiyūbid Ṣalāḥ al-Dīn, the Ottoman Sulṭān Maḥmūd II, Selīm I Yawuz and the Emīr Newrūz Bey. The collection is considered a classic among the Turks, both in language and learning although it is only a good compilation, mainly taken from European sources. In vividness of description and vigour of style they take almost the first place among his works; 2) *Dewr-i Istīlā* "The Period of the Invasion"; 3) *Kanīja*, the story of the capture of the fortress of Kanisza in Hungary, written in 1290 (1873) in Famagusta and printed anonymously the same year.

4) Kemāl was a passionate believer in the vitality of Islām. There is, however, in his views a certain lack of coherence between the Muslim ideas and the Rousseauian formulae which he has adopted. He endeavours to prove the equal worth of Islām with the ideals of modern civilisation, which are in the end ideals of Islām also; Islām was in no wise backward down to the xvith century, and had only to give way to the superiority of Europe with the rise of experimental science. In reply to Ernest Renan's attempt to prove the hostility of Islām to education, Kemāl wrote a defence *Renān Müdāfaʿa-nāmesi* published in the *Külliyāt*, which is based on much sounder foundations than the other Muḥammadan pamphlets combatting Renan's views.

5) *Medkhal*, the history of ancient Rome and the history of Islām which comes down to 438 (1046), were intended as an introduction and a foundation for his Ottoman history. The latter runs from the beginning of the empire to the death of Sulṭān Selīm I Yawuz in 926 (1520).

6) *Rüyā* "The Dream", the most vigorous and inspired of his writings, which every Turk must have read at the time of the reaction, dreams of the days when the chains will fall in the fatherland. It has been often reprinted, for example twice in Cairo (*Idjtihād*) in 1907 and 1909.

7) *Sergüzesht* (1326 = 1908) also describes a dream.

Kemāl was above all a publicist (see above). He raised the *ʿIbret* to be an ideal newspaper. His articles which appeared in it are still reprinted again and again and put into collections. The separate numbers of the newspaper are still carefully preserved.

As a critic he also displayed a comprehensive activity, an appreciation of which has been given by Gibb. He mercilessly shattered the old Parnassus and helped the new school to victory. There is much criticism in his essays and in his *Muḳaddeme*. When Ziyā Pasha, his old comrade in arms, made a rather unfortunate selection in an anthology of Turkish literature in his three volumes *Kharābāt*, Kemāl wrote two vigorous criticisms of the first two volumes, *Taḫrīb-i Kharābāt*, 1298 = 1881, and *Taʿḳīb-i Kharābāt*, reprinted in 1303, which Gibb considers among the best essays in Turkish.

Kemāl's letters are of great importance, as he corresponded with almost all the leading personalities in Turkey, political as well as literary. Unfortunately they are only in part published so far, for example the letters to Midḥat Efendi, ʿIrfān Pasha, a part of those to Abu 'l-Ziyā Tewfīḳ, ʿAbd al-Ḥaḳḳ Ḥāmid and others. He wrote naturally and vigorously and was the first to teach his people the epistolary style.

We must not omit his official papers. However conventional and crabbed Ottoman official style is, he nevertheless succeeded in giving it lucidity and clearness. The number of official documents which he composed in his different official positions is legion. They are essays on the

creation of the state and its reforms, the rights of the people, its intellectual and ideal requirements, on law, history, political economy, social philosophy, schemes, protocols, semi-official documents, etc.

Finally we may mention his numerous translations: *Behār-i Dānish* ("Springtime of Knowledge"), translated with a literary introduction from the work of the Indian Shaikh 'Ināyat Allāh. He also translated from the French of Victor Hugo, Lamartine, Montesquieu, J. J. Rousseau, Condorcet, Volney, etc.

A complete edition of his works was begun by his son 'Alī Ekrem. But his scheme was too ambitious and he broke down in the middle of it. The biography of Kemāl promised by 'Alī Ekrem has, so far as I know, not yet appeared. It is unfortunate that the essay on Kemāl's place in literary history by Dr. Riḍā Tewfīḳ has not yet been published.

The complete edition intended to fill 7 volumes which Kemāl's son, 'Alī Ekrem, undertook to edit in 1910/11 was, according to the prospectus, to be as follows: first series 1) *Renan Müdāfa'a Nāmesi*; 2) *Kara Belā*; 3) *Maḳālāt-i Siyāsiye we-Edebiye* and *Rüyā*; 4) *Waṭan*, *Gül-nihāl*, *'Ākif*, *Zawallī Čodjuḳ*; 5) *Esh'ār-i Kemāl*; 6) *Djelāl al-Dīn Khwārezm-Shāh* with the *Muḳaddeme*; 7) and 11) *Mektūbāt-i Khuṣūṣiye*, 2 volumes correspondence; 8) *Ewrāḳ-i Perīshān Medjmū'ası* (the biographies of Fātiḥ, Sulṭān Selīm, Ṣalāḥ al-Dīn Aiyūbī and of Emīr Newrūz; and *Dewr-i Istīlā*; 9) *Müntakhabāt-i Muḥarrerāt-i resmiye*; 10) *Djezmī* and *Intibāh*; 12) *Ta'ḳīb u-Taḥrīb-i Kharābāt* and the critical writings. Second series: *Medkhal* (introduction to history), *Tārīkh-i Islām* and *'Othmānlī Tārīkhi*; further his scattered papers, his numerous translations etc.; of the first series there were published 1, 2, 3 (6 parts); of the second series 4 volumes of the Ottoman history.

(TH. MENZEL.)

KEMĀL-PASHA-ZĀDE, the usual name of the Ottoman historian, lawyer and stylist SHAMS AL-DĪN AḤMAD B. SULAIMĀN B. KEMĀL PASHA, often also called Ibn Kemāl-pasha.

Kemāl-pasha-zāde belonged to a distinguished family of Adrianople where he was born as the son of the wealthy Suleimān Pasha. His grandfather was Kemāl-pasha who, like his father, had taken part in repeated campaigns against the infidels and attained great prestige (on him see *Sidjill-i 'Othmānī*, iv. 78). Kemāl-pasha-zāde served at first in Bāyazīd's army but was induced to take up a legal career by an experience which is minutely reported by Tashköprüzāde. He was one day in the Grand Vizier's Dīwān when Aḥmad, the son of Ewrenos [q. v.], entered and was received with great respect. Soon afterwards there appeared a man with shabby clothes and no headdress, to whom the vizier, to Kemāl-pasha-zāde's surprise, showed even greater respect and even gave him the seat before the son of Ewrenos. He was the celebrated jurist Luṭfī of Ṭoḳat (d. 904 = 1498). The ambitious youth, surprised at the preference shown to a *müderris* with 30 aspers over a nobleman of the empire, at once made up his mind to abandon the army and became Luṭfī's pupil. The latter lectured at the Dār al-Ḥadīth in Adrianople together with other celebrated professors, like Ḳasṭallānī [q. v.], Khaṭīb-zāde, Mu'arrif-zāde, on Muslim law subjects. After completing his studies, Kemāl-pasha-zāde was appointed teacher in the far famed medrese of 'Alī Beg in Adrianople but was soon afterwards summoned to Üsküb as *müderris*, finally to return to Adrianople to the Ḥalabiya medrese. After a great deal of hostility from the Chief Justice Ḥādjdjī Ḥasan-zāde, who was jealous of all rising talent and put every obstacle in his way, he was appointed by the Sulṭān, on the advice of the poet Mu'aiyad-zāde (*takhalluṣ* Ḥātimī, d. 922 = 1516), teacher in the Ṭāshlıḳ High School (= 'Alī Beg Medrese) at

Adrianople on a salary of 30,000 aspers. The influential patronage of Mu'aiyad-zāde procured him all sorts of liberties, so that he was able to spend some time in Sofia and some time in Dupnitsa (Bulgaria), to carry out with the greatest leisure the composition of the Ottoman history entrusted to him by the Sulṭān and at the same time to write the most varied works, sometimes on law, sometimes on history, sometimes on poetry and sometimes on rhetoric. Over 300 treatises etc. are said to have come from his pen in this period.

In the reign of Sulṭān Selim I, Kemāl-pasha-zāde in 1516 finally attained the rank of military judge of Anatolia and in this office accompanied the Pādishāh on his Egyptian campaign. On the march he was commissioned to translate into Turkish, among other things, two works of the Arab historian Abu 'l-Maḥāsin b. Taghribirdi [q. v.] on the lands of the Caliphs. Every morning he handed his master an instalment of the translation, which, according to Ḥādjdjī Khalīfa (Nº. 5,878 and 13,916), was called *al-Kawākib al-Bāhira min al-Nudjūm al-Zāhira* (on this cf. Brockelmann, *G.A.L.*, ii. 42), and took the opportunity to enlighten the Sulṭān regarding the feeling in the army through a soldier-song, made up by him, expressing the desire for a speedy return home. Although Selīm saw through the plan, he pardoned the poet and even gave him a present of 500 gold pieces as a mark of honour (cf. J. v. Hammer, *Gesch. des osm. Reiches*, ii. 519; H. F. v. Diez, *Denkwürdigkeiten aus Asien*, i. 283; also the *Defterdār* Abu 'l-Faḍl's supplement [*Dhail*, part 4] to *Hesht Behisht* of his father Idrīs Bitlīsī, MS. of the Vienna National Library H.O. 16 d., fol. 126). After the return home, Kemāl-pasha-zāde resumed his old position as teacher in the Dār al-Ḥadīth, then at the Bāyazīdīya in Adrianople and at the same time resumed his scholarly and poetical activities. On the lines of Sa'dī's *Bustān* and *Gulistān* he wrote in Persian the *Nigāristān* (i. e. "picture-gallery") (cf. Ḥādjdjī Khalīfa, *Kashf al-Ẓunūn*, vi. 381, and *Der Islam*, vii. 118; extracts in German are given by Count v. Harrach in the *Fundgr. des Orients*, i. 401 *sqq.*, ii. 107 *sqq.*, iii. 47 *sqq.*). Kemāl-pasha-zāde is the author of an Ottoman history which begins in the year 886 (accession of Bāyazīd II) and goes down to the first Hungarian campaign of Sulaimān the Great in 933. Manuscripts of the complete work seem to be exceedingly rare. The Sächsische Landesbibliothek in Dresden seems to have most parts of it (cf. J. H. Mordtmann's collation in *Der Islam*, xiii. 153 *sq.*), while in Vienna, for example, there are only fragments of the whole work which was perhaps written and issued in separate parts dealing with particular periods from time to time (part at least as early as the reign of Bāyazīd II) (cf. G. Flügel, *op. cit.*, ii. 220; on the work cf. H. Khalīfa, *Kashf al-Ẓunūn*, ii. 121, Nº. 2153). An edition would be very desirable and of considerable value in solving the problems of the old Ottoman chronicles. That Kemāl-pasha-zāde prepared a translation of the *Hesht Bihisht* of Idrīs, as is stated in the *'Ilmīye Sālnāmesi*, p. 347, is probably a mistake. Kemāl-pasha-zāde subjected the campaign of Mohacs to a very full review, which was published for the first time with a French translation by Pavet de Courteille (*Hist. de la Campagne de Mohacz*, Paris 1859). There is a very good manuscript of it in the Dresden Public Library.

His poetical masterpiece is the story of Yūsuf and Zulaikha often dealt with before (e. g. by Ḥamdī, q. v.) and after him, but his treatment of the subject is peculiarly felicitous; his other poems, in which his sharp wit much admired in his lifetime and his intellectual nimbleness are revealed, are collected in a separate *Dīwān* which appeared in 1313 in Stambul (cf. Gibb, *Hist. of Ottoman Poetry*, ii. 347—363, where a full appreciation of his literary activity is given). He further wrote a number of philological works of which we may mention here a dictionary to elucidate difficult Persian phrases, called *Daḳā'iḳ al-Ḥaḳā'iḳ* (cf. G. Flügel, *op. cit.*, i. 130). Of legal works special mention must be made of his *Risāla fī Ṭabaḳāt al-Mudjtahidīn* which deals with the various classes of jurists (cf. G. Flügel, *Die Klassen der hanef. Rechtsgel.*, in the *Abh. der Kgl. Sächs. Gesellsch. der Wiss.*, 1861, viii. 279, 280, 281, 346; MSS. of it in Vienna; cf. G. Flügel, *Die arab., pers. u. türk. Handschr. . . . zu Wien*, ii. 612).

He left a vast number of commentaries on the *Hidāya*, *Tadjrīd*, *Miftāḥ*, *Tahāfut*, notes on the Ḳur'ān, marginal notes on the *Kashshāf* etc. which are represented in most eastern collections of Oriental MSS. (cf. e. g. G. Flügel, *op. cit.*, i. 130, 132, 133, 251, 291, 524, 710, 714, 722, 723; ii. 220, 221, 612; iii. 179, 215 *sqq.*; list of several treatises in Ahlwardt, *Berliner Kat.*, i. 12, Nº. 19; collection of 39 treatises in the *Fihrist al-Kutub al-'Arabīya al-maḥfūẓa bi'l-Kutubkhāne al-khedīwīya al-Miṣrīya*, vol. vii., Cairo 1309, p. 435—444; also *Defter-i Kutubkhāne-i Aya Ṣōfya*, Stambul 1304, Nº. 4794, 4797, 4820; *Defter-i Kutubkhāne-i Laleli Djāmi'*, Stambul 1300, Nº. 2433, 3645, 3647. A collection of 36 treatises entitled *Rasā'il* appeared in two parts at Stambul in 1316 (Iḳdām-press); cf. *Zeitschr. d. deutsch. morgenl. Ges.*, lxxi. 525.

He even wrote on the subject of *bāh*, as his *Kitāb Rudjū' al-Shaikh ilā Ṣibāh fi 'l-Kuwwa 'alā 'l-Bāh* shows (printed Cairo 1316 and 1335; Turkish version: lithogr., n. d., 90 pp. in 8°).

Kemāl-pasha-zāde died on Shawwāl 2, 941 (April 6, 1535), at Stambul and was interred outside the Adrianople Gate in the monastery of Maḥmūd Čelebi, where one of his pupils, Maḥmūd Bey, who died as Ḳāḍī of Cairo, erected a stone monument to his memory. Three chronogrammatic verses (*ta'rīkh*) in Arabic were inscribed on his coffin, his shroud and his tombstone, the numerical value of which was each 941 (cf. *Ḥadīḳat al-Djawāmi'*, i. 180, 181, and Ewliyā Čelebi, *Siyāḥat-nāme*, i. 345, esp. 359; cf., on the other hand, J. v. Hammer-Purgstall in the *Z.D.M.G.*, vi. 282, and *Sitzungsber. der Wiener Ak. der Wiss.*, 1851, vi. 326—328, according to which the date is 940, which is certainly an error).

Chabert, *Laṭīfī*, Zürich 1800, p. 70; J. v. Hammer, *Gesch. des osm. Reiches*, iii. 635; do., *Gesch. der osm. Dichtk.*, ii. 205 *sqq.*; Brusalī Meḥmed Ṭāhir, *'Othmānlı Mü'ellifleri*, i. 223; *'Ilmīye Sālnāmesi*, Stambul 1334, p. 346 *sq.*; Meḥmed 'Ārif Bey in the *Revue Historique Ottomane*, p. 1411 *sqq.*; C. Brockelmann, *Gesch. der arab. Lit.*, ii. 449—453 (where most of his works are given under their titles).

(FRANZ BABINGER)

KEMĀL REʾĪS, Turkish corsair and sea-captain during the reign of Bāyazīd II. In his youth he had been given as a present to the Sulṭān by the Ḳapudan Pasha Sinān, after which he was brought up as a page at the court. He began his career as a chief of *ʿazabs*, then took to the Mediterranean and captured in 892/1487 a Maltese Prince (*Sid̲j̲ill-i ʿOt̲h̲mānī*, iv., 78). In 896/1490, by order of Bāyazīd, he raided the Spanish coast in order to support the last Naṣrid of Granada Mulay Ḥasan, who, in his critical situation had invoked the Sulṭān's aid. This expedition is only recorded by Ḥād̲j̲d̲j̲ī K̲h̲alīfa in his *Taḳwīm al-Tawārīk̲h̲* but not in his Story of the Naval Wars (*Tuḥfat al-Kibār*) and it seems to be unknown to the other historians; in any case it cannot have been of much importance in view of the great difficulties of the Ottoman Empire occasioned at the time by the wars against Egypt and Austria. In 903 = 1497/1498 we find Kemāl Reʾīs marauding in the Eastern part of the Mediterranean with other corsairs; he took several Christian ships and brought his booty to the bey of Alexandria (ʿĀshiḳ Pasha Zāde, p. 250); at this time therefore he probably was not serving the Sulṭān. But in the war of the Turks against Venice (905/1499) he was one of the admirals of the fleet. The Turkish fleet had three newly equipped unusually large battleships (turkish: *kükē*) of which one was commanded by the Kapudan Pasha Dāʾūd, and the two others by Kemāl Reʾīs and Burāḳ Reʾīs (Münedd̲j̲im Bashī writes Budāḳ, so also Leunclavius: Budacus). In the naval battle of Sapienza (28 July 1499) the Venetians took the latter's ship for that of Kemāl Reʾīs on whom they particularly wanted to take revenge. Burāḳ Reʾīs was boarded by two big and some smaller Venetian ships; he defended himself with burning naphtha, until he, and his enemies, were blown up together: the island of Sapienza was called after him Burāḳ Reʾīs Adasī. After this battle the Turkish fleet took Lepanto (Ine-Bakhtī). In the next year, after the towns of Ḳoron and Modon had been taken by Turkish sea-power, Kemāl Reʾīs was sent with 40 ships to Navarino (Turkish Awārin) of which town he captured the citadel from the Venetian commander Contarini. He died, according to Sāmī (*Ḳāmūs al-Aʿlām*, v. 3886), in the beginning of the xth century, perishing by a ship-wreck (*Sid̲j̲ill-i ʿOt̲h̲mānī*).

(J. H. Kramers)

KEMĀNKESH (i. e. "Archer") ʿALĪ PASHA, an Ottoman Grand Vizier. He was born in the Anatolian district of Ḥamīd-eli [q. v.], came early to Stambul, where he was brought up in the imperial palace. In 1030 (1620/1621) he was appointed governor of Diyār-bakr and soon afterwards of Baghdād. Next year he was given the rank of third vizier of the dome (*ḳubbe wezīri*). In Dhu 'l-Ḳaʿda, 1032, he was given the imperial seal in place of the dismissed Grand Vizier Mere Ḥusain Pasha, mainly through the efforts of the S̲h̲aik̲h̲ al-Islām Yaḥyā Efendi, but also as a reward for his readiness in assisting in deposing the incapable and imbecile Sulṭān Muṣṭafā I. Kemānkesh ʿAlī Pasha, weak, timid and common in character, began by getting rid of his enemies and rivals by throwing the viziers Gurd̲j̲ī Meḥmed Pasha and K̲h̲alīl Pasha into prison and dismissing the Mufti Yaḥyā. His greed and avarice prompted him to the most contemptible embezzlements and frauds on the Treasury; he had coins minted with a slight proportion (barely one-fifth) of silver, put the pay of the Janissaries into his own pocket and in other ways let the state go to ruin. Within six months he had made a huge fortune by depreciating the currency and selling offices. Sir Thomas Roe who describes the Grand Vizier at his accession to office in a despatch of August 23, 1623, as "a man quietly honest, but of untryed and therefore suspected abilytye for so great a charge" (cf. *The Negotiations of Sir Th. Roe in his Embassy to the Ottoman Porte, from the year 1621 to 1628*, London 1740, p. 173) talks on April 5, 1624, of "his owne sordid covetousnesse, who in six moneths had heaped up infinite treasure, by portsale of all justice and offices, which hath weighed him to the ground" (*op. cit.*, p. 230) and a Venetian report of August, 1624, puts his wealth at a "somma di 700,000 scudi in contanti, molto opportuna" (cf. J. v. Hammer, *G. O. R.*, v. 21).

The terrible state to which the empire was reduced (rebellions in Asia Minor and Egypt, the threat from Persia, the fall of Baghdād on November 28, 1623, concealed from the Sulṭān, Stambul without food, the currency depreciated, the treasury exhausted, the Janissaries out of hand) aroused to the highest pitch the wrath of the youthful Murād IV against the Grand Vizier responsible. Kemānkesh ʿAlī Pasha was summoned to the palace on D̲j̲umādā II 14, 1033 (March 24, 1624), and summarily beheaded. His body was buried in the forecourt of the mosque of ... (cf. *Ḥadīḳat al-D̲j̲awāmiʿ*, i. 150; ʿĀtiḳ ʿAlī Pasha (cf. *Ḥadīḳat al-D̲j̲awāmiʿ*, i. 150; J. von Hammer, *G. O. R.*, ix. 75, N°. 312). His successor was Čerkes Meḥmed Pasha. Kemānkesh ʿAlī Pasha was married to a daughter of the celebrated Ḳāḍī-ʿasker and S̲h̲aik̲h̲ al-Islām, Bostānzāde Meḥmed Efendi.

(Franz Babinger)

ḲENĀ, a town in Upper Egypt, on the east bank of the Nile (23,357 inhabitants in 1917 against 17,485 in 1875, 15,402 in 1884 or 27,500 in 1897). It is the capital of the province (*mudīriya*) of the same name which is divided into seven districts (*markaz*), namely: 1. Dishnā, 2. Isnā, 3. Ḳenā, 4. Ḳuṣair, 5. Ḳūṣ, 6. Luḳsur, 7. Nadj' Ḥammādī. In 1897 the population of the province was 711,457 of whom 120,330 are in the province of Ḳenā. — The region produces cotton and cereals; in the town, cloth and sweet-stuffs are manufactured. But Ḳenā is especially noted for its porous pottery; the jars (*ḳulla*) which are made there are called

balīḳ from the name of a place a few miles to the south.

The Arabic name, written Iḳnā by some geographers and *ḳūnā* in the Copto-Arab *scalae*, comes from the Coptic ⲔⲀⲒⲚⲎ which give rise to a play on the Greek καινή πόλις "new town", a name which did not last long as it is never found in the Byzantine period. The identity of this town with the Neapolis of Herodotus has been seriously urged; it is rather the modern Mingha'a, the ancient Ptolemais. On the other hand it has been conjectured with much probability that at the end of the third century it received the name Maximianopolis.

In the first Arab period, the *kūra* of Ḳenā extended to the east of the Nile between that of Fāw on the north and Ḳifṭ in the south, in front of that of Dandara from which it was separated by the river. The first author to mention it, Ya'ḳūbī, gives a very unflattering description of the district: he says it is a little town rapidly going to ruin, deserted by its inhabitants who feared the raids of the Beduin robbers and brigands. Therefore when the new provincial divisions were made under Mustanṣir it was Ḳūṣ which gave its name to the district (*'amal*) and became its capital. Ḳenā remained unimportant for some time as Yāḳūt only gives it a brief note and Abu 'l-Fidā' does not mention it.

Its prosperity was not long in beginning owing to the tomb of the saint 'Abd al-Raḥīm which became an object of pilgrimage while pious Muslims settled in its vicinity. Some years previously Ibn Djubair had mentioned Ḳenā as a pretty little town with houses of a dazzling whiteness; he makes special mention of the virtue of the women who never appeared in the streets. After Ibn Baṭṭūṭa, Adfuwī gives us an account of the merits of 'Abd al-Raḥīm; he describes the houses of the town as spacious and very high and mentions two *madrasa*'s in Ḳenā and a number of hospices (*ribāṭ*). Ibn Duḳmāḳ only copies Adfuwī. In the Turkish period Ḳenā was the residence of a *Kāshif* but it is only in modern times that it has assumed the administrative position which it owes to its present steadily increasing prosperity.

The town situated at the point where the Nile comes nearest to the Red Sea had become the point of departure for caravans in the direction of Ḳuṣair. This route took the place of the one used in the middle ages between Ḳūṣ and 'Aidhāb which in turn succeeded the ancient Copto-Berenice road. The continual intercourse between Egypt and Arabia and India gave these roads great value; it is by this route that many of the Muslims of North Africa go to Mekka and even during the Crusades it was the only pilgrim road. In 1831—1833 Muḥammad 'Alī had the wells inspected on the Ḳenā-Ḳuṣair road; some were deepened so that they would provide water at all seasons (cf. *L'Égypte Moderne*, collection *L'Univers*, p. 164—166; Barron and Hume, *Top. and Geology of the East Desert of Egypt, Central Portion*, Cairo 1902).

The saint who is the object of Muslim veneration, 'Abd al-Raḥīm b. Aḥmad b. Ḥadjdjūn, twelfth descendant of Dja'far al-Ṣādiḳ, was born in the environs of Ceuta in Morocco. After a journey to Mekka where he spent seven years he settled in Ḳenā and died there on Ṣafar 9, 592 (Jan. 13, 1196). Honoured during his life for his reputation for sanctity and asceticism he has become one of the principal saints of Egypt along with Aḥmad Badawī, Ibrāhīm Dasūḳī and Abu 'l-Ḥadjdjādj Aḳṣurī. At one time a pious formula used to be handed down which if recited beside the tomb hastened the realisation of a desire or brought about cures. According to some travellers, the pilgrims who came to Ḳenā made circuits (*ṭawāf*) of the tomb of 'Abd al-Raḥīm similar to those made by the pilgrims at the Ka'ba (Adfuwī, *Ṭāli' Sa'īd*, N⁰. 231; Goldziher, *Muh. Studien*, ii. 315; *R.H.R.*, ii. 284; Gaudefroy-Demombynes, *Le pèlerinage à la Mekke*, p. 224). — There were descendants of 'Abd al-Raḥīm living in Egypt for two centuries; they were particularly jurists and professors (Adfuwī, N⁰ˢ 29, 117, 129, 308, 402, 405, 476, 553; al-Maḳrīzī, *Khiṭaṭ*, ii. 423).

(G. WIET)

KEN'ĀN PASHA, also called ṢARI K. PASHA, an Ottoman Grand Admiral. He was a Russian (? Circassian) by birth and came as a slave into the service of Baḳirdji Aḥmad Pasha, Ottoman governor of Egypt. On the latter's execution he was taken by Sulṭān Murād IV into the Serai and educated there. He was promoted to be Agha of the stirrup-holders (*Rikābdār aghasi*) (Chronicle of Wedjihī, fol. 91ᵇ of the Vienna MS.), became a favourite of Sulṭān Ibrāhīm after his accession (Febr., 1640) and married his daughter 'Ātike Sulṭāne. He was at the same time appointed third vizier but banished soon after Ibrāhīm's death (Aug. 18, 1648) to Crete. In Sept., 1652, he returned to Stambul and was appointed to the charge of the defences of the Dardanelles. On Sept. 9, 1653, he was given the governorship of Ofen, but deprived of it on Sept. 22, 1655, and on Febr. 9, 1656, appointed governor of Silistria. On May 3 of the same year he was appointed Grand Admiral (*Ḳapudān Pasha*, q.v.). On June 26, 1656, while in command of the Ottoman fleet sent out against the Venetians, he suffered a severe defeat in the Dardanelles, the greatest naval reverse inflicted on Turkey since the battle of Lepanto (cf. J. v. Hammer, *G.O.R.*, v. 649 *seq.*). The whole weight of the Sulṭān's wrath fell upon Ken'ān Pasha who was immediately thrown into prison. He was finally released on the intercession of his Russian countrywoman, the Sulṭāna-mother (Kösem Wālide; q.v.) but was dismissed from the office of Grand Admiral almost immediately, on July 18, 1656. Two years later, on June 23, 1658, he was appointed Ḳā'immaḳām [q.v.] but the very next month, on July 16, 1658, dismissed again and sent to Brusa as commander of the garrison (*Muḥāfiẓ*) (cf. J. von Hammer, *G.O.R.*, vi. 37; Na'īmā, *Ta'rīkh*, first ed., ii. 660). He set out from here by arrangement with the Anatolian rebel 'Abāza Ḥasan with whom

he closely allied himself, only to share his fate, treacherous assassination, on Febr. 17, 1659, in Aleppo (cf. Na'īmā, *Tārīkh*, ii. 685). His head was brought to the *Dīwān* in Stambul on March 9, 1659.

If this is the Ken'ān Pasha mentioned by Ewliyā Čelebi, *Siyāḥat-nāma*, iii. 366 (and he certainly never was governor of Oczakov any more than was Ḳodja Ken'ān Pasha [d. 1062 = 1651/52] who is also often confused with the Grand Admiral e.g. in the *Sidjill-i 'Othmānī*, iv. 83), he was also an author and composed a *Ṣalīḳ-nāma* in honour of Ṣarī Ṣalṭīḳ Baba [q. v.]. His own warlike exploits, especially his military operations in the years 1036—1038 (1626—1628), were celebrated in a rhymed *Pasha-nāma* by the poet and judge Ṭālī'ī Ibrāhīm Efendi (of Ḳalkandelen) of which there is a copy in the Brit. Mus. (Sloane MS. 3584); cf. Ch. Rieu, *Catalogue of the Turk. MSS.*, p. 191 *sq.*, with detailed summary of contents. The possibility that it celebrates the above mentioned Ḳodja Ken'ān Pasha who had a very similar career to his namesake and contemporary (both were, for example, governors of Ofen) has always to be remembered. The biographical data regarding Ṣarī Ken'ān Pasha are much confused, as the article on p. 65 *sq.* in Rāmiz Pasha-zāde Meḥmed, *Kharīṭa-i Ḳapudānān-i Deryā* (Stambul 1285) and Sāmī Bey Frashëri, *Ḳāmūs al-A'lām*, p. 3900, who follows it, show. According to this authority, Ken'ān Pasha was buried beside the school not far from Ḳirḳ Česhme.

KENEZ. [See KNEZ].

AL-**KERAK**, a fortress east of the Dead Sea in the ancient Moab. The name goes back to the Aramaic *karkhā*, "town", which the Targum gives for *ḳir* in the Moabite place-names Ḳir Mō'āb (Is., xv. 1) and Ḳir Ḥārās (Ḥarēset: Is., xvi. 7, 11; Jer., xlviii. 31, 36). It is found as Χαρακμωβα in Ptolemy (v. 16, 4) on the mosaic map of Mādaba, in Stephanus Byzantinus, etc. Its situation on a steeply sloping spur only connected by an (artificially deepened) saddleback with the main ridge makes al-Kerak an unusually strong fortress. It is remarkable that it is not mentioned in connection with the Muslim conquest of the East Jordan country or in the following centuries; only with the Crusading period, after it had been fortified by King Fulco's former cupbearer, Payen, does it begin to play a part, and that a prominent one. The Christians of that time, who were not well read in geography, sought the ancient Petra here and called it Petra deserti. As it commanded the pilgrim road from Damascus and all traffic between Syria and Egypt, it caused the Muslims much trouble and was therefore repeatedly but vainly besieged from 565 (1170) onwards by Nūr al-Dīn and Ṣalāḥ al-Dīn until finally it was so starved out that the garrison surrendered in 584 (1188) to Ṣalāḥ al-Dīn's brother al-Malik al-'Ādil, to whom it was allotted after Ṣalāḥ al-Dīn's death. In the years that followed it belonged to various Aiyūbids and even after the rule of most kings of this family was over, al-Mughīth 'Umar still held out in al-Kerak until Baibars captured it by treachery and put him to death (661 = 1263).

Behind the strong walls of the fortress the Mamlūk Sulṭān Nāṣir found shelter in 708 (1309) when he escaped from Cairo to found a real power. At this time al-Kerak was capital of one of the *mamlakāt* into which Syria and Palestine were divided; its territory lay chiefly to the south of it. How powerful the fortress, the majority of whose inhabitants were still Christian, then was, is seen from the descriptions by al-Dimashḳī, Yāḳūt, al-'Umarī and Khalīl al-Ẓāhirī. Under Turkish rule it lost its importance until quite modern times when the Ottoman government put a strong garrison into it and made al-Kerak capital of a separate administrative district. The walls date mainly from the middle ages, while the lower strata go back to an older period.

(FR. BUHL)

KERBELĀ'. [See MESHHED ḤUSAIN].

KERČ (KERTCH), a town and fortress on the Crimean peninsula; according to the census of 1897, it had 28,982 inhabitants. In ancient times it was the site of the Greek colony of Pantikapaion, later called Bosporus as the capital of the Bosporan kingdom, from the end of the seventh century the residence of the Khazar governor (with the title Tudun) of the eastern part of the Crimea (the western with the capital Khersonesus still belonged to the Byzantine empire). The name Kerč first appears in Muslim sources and is variously written; to the references to the texts (for the forms Karš and al-Karsh) in J. Marquart, *Osteuropäische und ostasiatische Streifzüge*, Leipzig 1903, p. 506, may be added Rukn al-Dīn Baibars in W. Tiesenhausen, *Sbornik Materialov, otnosyashčikhsya k istorii Zolotoi Ordi*, St. Petersburg 1884, p. 89, 5 (there Kardj). In Marquart, *op. cit.*, the derivation of the name from the Greek Κέρζες or Κερζος, "as a monastery near Kerč is called", proposed by Russian scholars (Wassilyewski, Bruun, Kunik, Harkavy), is also given. In old Russian sources the town is called Korčew; for example in the well known inscription of the year 6576 (1068) quoted by Karamzin, *Istoriya gosudarstva Rossiyskago*, ii., note 120).

After the final destruction of the Khazar empire by the combined forces of the Byzantines and Russians about 1016 the eastern part of the Crimea with Kerč belonged to the Russian principality of T'mutarakan, the capital of which of the same name lay on the peninsula of Taman opposite

Kerč. About a century later the possession of the steppe territory passed to the Ḳipčaḳ or Komans and that of the seaports to the Byzantines. As Yu. Kulakowski (*Prošloye Tawridi*[2], Kiev 1912, p. 93. on the authority of Miklosich and Müller, *Acta et dipl. gr. medii aevi*, iii. 25, suggests, the town of 'Ρωσία mentioned in the treaty of 1169 between the Emperor Manuel Komnenos and the republic of Genoa is to be identified with the Russian Korčew. From the xiiith century the Crimean peninsula belonged to the Tatar kingdom of the Golden Horde; in the year 698 (Oct., 1298—Sept., 1299) Kerč with some other towns of the Crimea was destroyed by Noghai to avenge his grandson who was killed in Kafa (Tiesenhausen, *op. cit.*). In the xvth century Kerč came into the hands of the Ottoman Turks. After the conquest of Azov, Peter the Great, during his stay in Vienna in 1698, asked that Kerč should be ceded to Russia by the Turks in the peace negotiations then about to begin. But this demand was not granted. After the peace of Carlowitz concluded in the same year, Kerč remained in the hands of the Turks (J. von Hammer, *Geschichte des Osmanischen Reiches*[2], iii. 909; S. Solowyew, *Istoriya Rossii, izd. towar. Obšč. polz.*, iii. 1171). On account of the danger threatening from the Russians, Sulṭān Muṣṭafā II in 1702 had a new fortress built not far from Kerč (now Yeni-Ḳale) (v. Hammer, *op. cit.*, iv. 47). In 1771 Kerč and Yeni-Ḳale were occupied by the Russians without resistance; Abaza Pasha, who was sent to defend Yeni-Ḳale, did not even dare to expose his troops and returned to Sinope (*op. cit.*, iv. 622; Solowyew, *op. cit.*, vi. 738). The cession of Kerč demanded by the Russians during the peace negotiations in Bukharest (1773) was steadily refused by the Turks (v. Hammer, *op. cit.*, iv. 638) but had, however, to be granted after the treaty of Küčük Kainardje (1774). Henceforth Kerč was a Russian fortress of the second class; during the Crimean war it was occupied by the Allies in May, 1855.

The town, which is world-renowned for its monuments of the Greek, Roman and early Christian periods, had no longer the same importance in the Muḥammadan period and has therefore no Muslim buildings of importance.

(W. Barthold)

KERESŪN (ancient Κέρασος, Cerasus), on the maps Kerassounde, a town and harbour in Asia Minor, on the Black Sea. It is the chief town of a ḳaḍā of the wilāyat and the sandjaḳ of Trebizond, 70 miles west of this last town. The population is 8,440 (3,588 Muslims; 3,906 Greek orthodox and 946 Armenians). It is built at the end of a rocky cape. The botanist Tournefort found still there the forest of cherry-trees which gave their name to the town, for it was from there that Lucullus imported them to Europe. This source of revenue is now replaced by the export of nuts (5,000,000 lbs. produced annually) and of beans (2 million okes = 2,825,000 lbs. annually). There are ruins of the ancient walls, of a citadel and of a city-gate. The remains of an amphitheatre may be seen some distance off. The ruins of a mole to the north of the town could be cleared away at small expense and the area made into a harbour which would facilitate the export of the produce of the provinces of the interior. The town contains 11 mosques, 1 tekke, 9 Greek churches, 2 Armenian churches; it has also barracks and an arsenal. — The Kerasos of Xenophon lay in the valley of the Keresūn-dere; the present town is built on the site of the one founded by Pharnaces I, grandfather of Mithradates VII, King of Pontus, who called it Pharnacia after himself.

The ḳaḍā of Keresūn includes 138 villages and 4 nāḥiya's; it has a temperate maritime climate; mountains of volcanic origin, covered with forests, cover about half the area of the district. The inhabitants are fishermen on the coast and miners in the interior (mines yielding argentiferous lead, iron, copper and antimony). The total population is 64,526 (51,704 Muslims and 11,884 Greek Orthodox).

(Cl. Huart)

KERKHA, a river in Khūzistān, whose sources lie to the east and south of Nihāwend in 'Irāḳ 'Adjamī. The Čashm-i Kāsim is regarded as the source proper and rises in the Kūh Čihil Nabilighun. The map shows a little stream called Sura Kunī here, which receives the Kar Sara from the east, then near Nihāwend the Āb-i Kulan from the east which rises in the Kūh-i Fertaun and next the Sirwān Rūd from Dawlatābād. In this district the river is known as the Gamasāb, more accurately Gamasiāb (corrupted to Garasiāb).

The direction of the river, at first N. W., gradually changes to the west. Before it reaches Bīsutūn it is joined by the Shādjū Rūd reinforced by the Kangarshāh. It then turns to the south and is joined by the Ḳara Ṣū, the river of Kirmānshāhān and later by the Āb-i Karind, which itself has a number of important tributaries. While the tributaries so far mentioned are all on the right side, on the left it has the Kashgan Rūd which has as tributaries the Madian Rud on the right and the Rūd Khorramābād with the Rūd Kulkū on the left. Next come, also on the right, the Lailum Rūd and the Āb-i Zāl. The direction of its course now changes from southern to westerly for a short stretch and then to south-west. On this latter stretch the river is called the Kerkha (Karkha), a name which it temporarily exchanges between Lailum Rūd and Āb-i Zāl for the name Āb-i Ṣaimere. This name preserves the name of the town Ṣaimara [q.v.] which lay west from the river and some distance from it. After the confluence with the Āb-i Zāl the river again turns southwards; as soon as the region of Pā-i pul is reached we have canals linking it with the Āb-i Diz and its tributaries, the Nahr Talal Khān and the Nahr Daghdari. The ruins of Sūs lie on one of the eastern watercourses which is later called R. Shawr. The Kerkha ends its course in the region south of Nahr Hāshim, where it receives the water of the Shaṭṭ al-Djamūr. At an earlier period the river ran north-west from here to Ḥawīza (Ḥuwaiza).

Among the roads which follow the course of the river from time to time, we may mention the great highway connecting Hamadhān and Mesopotamia in the region of Bīsutūn, and also the road from Ḥulwān to Ṣaimara.

The ancient geographers called this river the Choaspes. The name Kerkha is not found in the Arab geographers; according to Rawlinson, it first appears in a xivth century Persian text. It is, however, probably older. Ibn al-Athīr mentions a

Karkhānā under the year 553 (1158). If the reference is to this river the name must go back to the xiith century. Ibn al-Athīr, who usually avoids geographical details as much as possible, must have taken the name from an older contemporary source. Karkhānā must be Aramaic and mean "the [river] of Karkhā" i.e. Karkhā de Lēdān.

The river is certainly twice mentioned in the Arab geographers although not by name. According to Ibn al-Faḳīh, a particularly esteemed kind of black sealing-clay was obtained on its bank near Nihāwend. The "large river" near Bīsutūn mentioned by Ibn Rosteh must also be the Gamasiāb. The bridge between Ṣaimara and Ṭarhān, considered a marvel of architectural skill, may also correspond to the Pul-i Khusraw over the Kerkha. The Kerkha is usually called the "river of Sūs", e.g. as early as Ibn Khordādhbih. The geographers have no reliable information regarding its sources; Ibn Khordādhbih says it rises in Dīnawar and Ibn Wāḍiḥ at Hamadhān, which is true, at least for the tributaries of the Gamasiāb, if we take these names to refer to provinces. The river, according to the Arab geographers, flows into the Dudjail of Ahwāz. Mention is made of the fact that at high tide the river is about two *mīl* broad at Sūs. According to Ibn Wāḍiḥ, the river was called Hinduwān. Probably the "river of Baṣinnā" or "Didjla of Baṣinnā" which drove 7 water-mills and ran a bowshot from the town of Baṣinnā, mentioned by al-Muḳaddasī and Yāḳūt, is identical with the Kerkha.

(P. Schwarz)

ḲERḲINA (Kerkenna), a group of islands off the eastern coast of Tunisia on a level with Sfax in 34° 35'—34° 50' N. Lat. An arm of the sea about 25 miles broad and full of shallows which make navigation impossible for ships of large tonnage separates them from the coast. The islands are two in number — Sharḳī (Charki; the Cercina of the ancients) to the N. E. and Gharbī (Cercinitis) to the S. E. The first is 15 miles long and 4½ miles broad on an average. The coast is much indented and fringed on the north with small islands. The second, more massive in form, is 10 miles by 4½. The strait which separates them is only 1000 yards across so that in ancient times it was possible to join them by a bridge. Barley, wheat, lentils, the vine and large areas of *ḥalfa* (*lygeum spartum*) are grown on the islands. The population, which consists of Berbers mixed with foreign elements and has never been organised into a tribe, amounts to 8,000 people. The natives live in numerous villages especially on Charki or scattered in isolated dwellings. They follow agriculture and stock-breeding, make ropes, mats, basket-work, etc., but the main industry is fishing. The shallows adjoining the islands are very rich in fish and sponges are gathered in abundance.

Traces of ancient buildings have been found in Charki; the episcopal register of Byzacene mentions an *episcopus Circitanus*. In the middle ages the possession of the Kerkenna islands was on several occasions disputed between Christians and Muslims. The Normans of Sicily seized them in 540 (1145—1146) — according to al-Idrīsī in 548 (1153—1154) — but held them for only a short time. In 1289 they were ceded by the Pope to Roger Doria who built a castle there. The descendants of Doria ceded them to the King of Sicily who entrusted their government to Ramon Muntaner (1311 A.D.). They were finally abandoned by the Christians in 1335. The Sicilians, however, once more made a descent on them in 1424 and carried off 3,000 prisoners.

KERKŪK. [See Kirkūk].

KERKŪR, a heap of stones, especially a sacred heap of stones. The cult of heaps of stones is extremely ancient and distributed all over the world. It seems to come not from an act of litholatry in the strict sense but from a rite of transference or expulsion of evil; the individual, picking up a stone, causes the evil of whatever kind that afflicts him to pass into it — as the case may be, fatigue, physical or moral suffering, sin, the dangerous power that attaches itself to a man in certain sacred neighbourhoods, or all these things together — and gets rid of it by throwing it or depositing it with the stone on a place suitable for absorbing it; the accumulation of these expiatory pebbles forms the sacred piles of stones which rise all along the roads, at difficult passes and at the entrances to sanctuaries. Alongside of these, the throwing or placing of a pebble or the building of a little pyramid of stone often becomes one of the obligatory rites of the pilgrimage and the rite losing its primitive character has been sometimes taken for a true offering-rite (cf. R. Dussaud's view, *Le Matérialisation de la prière en Orient*, in the *Bull. et Mém. de la Soc. d'Anthr. de Paris*, 1906, p. 213—220). The kerkūr are often built at the place where a man has been killed and buried; this has been explained from the desire to bury more deeply a dead man whose spirit might be tempted to come out and avenge itself or, less plausibly, as a kind of homage to the dead; but this casting of stones can also be explained rather as a rite for the expulsion of evil (a dangerous place, the infection of death, proximity of disturbing magical forces). It appears therefore that we always find rites of purification in the origin of the kerkūr.

Pre-Islāmic Arabia knew the rite of casting stones and sacred heaps of stones. The rites of the ḥadjdj have preserved evidence of this. It may be asked if there is not a rite of this kind in the origin of the lapidations at Minā (for other explanations see the art. ḤADJDJ, ii. 201), and in any case, as G. Demombynes (*Le Pèlerinage à la Mekke*, Ch. I.) has recently shown, the mixed

stones or *rudjam* which stand at the *mawāķit* marking the *ḥaram* of Mekka are exactly comparable to the kerkūr which are found from Central Asia to North Africa along the roads at points where one begins to approach the great sanctuaries; there are also examples of this practice to be found equally in Christian countries.

Islām found the cult of piles of stones in all or almost all the lands that it conquered and although orthodoxy looked askance at it, it had to accommodate itself, as to so many other popular practices, which owed their origin to paganism in the remote past. The kerkūr are especially numerous in certain regions, Syria for example, but nowhere has their cult been so developed and is so vigorous as in North Africa, especially in the south of Morocco, where it has been especially studied by E. Doutté. There, one may say, there is not a pass, or ravine or cross-roads which has not its little pyramids of stones or its great kerkūr to which every passer-by adds his pebble, not a rustic sanctuary but has its sacred piles of stones.

Sometimes the kerkūr itself, as in other cases a spring, a tree or a rock, has given rise to a sanctuary which has become islamised in a marabout fashion. It is also very common to find under the aegis of a saint several of these cults combined, — strange sanctuaries which perpetuate the ancient rites of paganism, still vigorous after twelve centuries of Islām.

Bibliography: The bibliography of the subject is very extensive. What is essential from the general point of view is given in Frazer, *Golden Bough*, third ed., part vi., *The Scapegoat*, p. 8—30, where also are given a certain number of references to Muslim countries; from the Muslim standpoint in Doutté, *Merrakech*, Paris 1905, p. 58—108; do., *Magie et religion dans l'Afrique du Nord*, Algiers 1908, ch. x. Since the publication of this last work, E. Westermarck, *The Moorish Conception of Holiness (Baraka)*, Helsingfors 1916, p. 26 *sqq.* (on Morocco). (HENRI BASSET)

KERMIYĀN. [See GERMIYĀN].

ĶERRĪ, a village and district on the right bank of the Nile, fifty miles north of Kharṭūm. In the xvith century the governorship of the surrounding territory was conferred by the Fundj ruler, ʿUmāra Dunķas, on ʿAbd Allāh Djammāʿ (d. 1554—1562) of the Arab tribe of Rufāʿa. His descendants, the ʿAbdallāb, maintained their position as a semi-independent dynasty with the title of Māndjil or Māndjilak until the Egyptian conquest, but transferred their seat from Ķerrī to Halfāyat al-Mulūk after the rise of Shendi in the latter part of the xviiith century.

KERSH. [See KARSH].

KETĀMA (or KOTĀMA), one of the great Berber families; when Islām was introduced into North Africa, they occupied all the northern part of the modern department of Constantine, between the Awrās [q. v.] and the sea, that is the region containing the towns of Iķdjān, Sețif, Ilighāya, Ngaus (Niķāwus), Tiguist (Tikist), Mila, Constantine, Skikda (Philippeville), al-Ķoll (Collo), Djidjelli [q. v.], Bellezma, and the part of Kabylia in the department of Algiers, i. e. the region between Wed Sahel and the Seban. One legend flattering the national pride makes them descended from the Ḥimyarites brought there by Ifrīķos. Katām, the eponymous ancestor of their race, was said be the son of Bernes. He had two sons, Gharsen and Isūda, from whom are descended all the tribes of the Ketāma. They do not seem to have played a part in the civil and religious wars which desolated North Africa from the time of ʿUķba to the days of the Aghlabids; we do not find them among the Khāridjīs. When ʿUbaid Allāh gave himself out to be the Mahdī, his emissaries met some Ketāma pilgrims in Arabia and converted them to Ismāʿīlī doctrines. The principal convert was Mūsā, chief of the Sakyān, a branch of the Djemila whose name survives in the town of this name. The missionary (*dāʿī*) Abū ʿAbd Allāh al-Shīʿī [q. v.] settled in Iķdjān and succeeded in maintaining his position there in spite of the efforts of the Aghlabids. From there he was able to extend his conquests and to deliver the Mahdī who was a prisoner at Sidjilmāsa. The empire of the Fāṭimids was then founded with the help of the Ketāma. It was they who furnished its main strength and supplied the means of conquering Egypt. But these continual efforts exhausted them. Those who remained in the Maghrib after the exodus of al-Muʿizz were forced to submit to local rulers, as Ibn Khaldūn tells us. In our day the principal representatives of the Ketāma are the Zawāwa of the Djurdjura and the population around Djidjelli and in Little Kabylia. We do not know at what date Ismāʿīlī doctrines disappeared from among them but long afterwards their attachment to this teaching was regarded as a subject of obloquy and for this reason the powerful tribe of Sedwīkish of Ketāma origin renounced all connection with this family. At the present day all the Berbers of this region are Sunnīs.

Bibliography: Ibn Khaldūn, *Kitāb al-ʿIbar*, iv. 32 *sqq.*, vi. 148—152; *Hist. des Berbères*, transl. de Slane, i. 291—299, ii. Append., p. 510 *sqq.*; Fournel, *Les Berbers*, ii. 51 *sqq.*, and the authors quoted. (RENÉ BASSET)

KETKHUDĀ (P. *ked* "house", *khudā* "master, lord"), originally meant the master of the house or head of a family; the name came to be given in Persia in the villages to the headman or bailiff and in the towns to the "dixenier de quartier" (Chardin, *Voyages*, 1811, iv. 77) or "district tithe-man", a kind of police officer whose duty it was to inspect his district and who was responsible to the *kalāntar* [q. v.]. The administrative reforms recently introduced into Persia have aimed at making the *ketkhudā* the representative of public authority (*mayor*) in the *ķarya* (village), the smallest territorial division. Unfortunately these officials, whose duties were formerly confined to the levying of dues, are powerless in face of the great landed proprietors (*R. M. M.*, June 1914, xxvii. 194) whose stewards they are and who appoint them; there are, however, some villages where this agent is appointed by the governor or even elected by the inhabitants.

The word has passed into Ottoman Turkish where it has been corrupted to *kehaya*, *kāya* and means the "steward of a house". *Kiāhya-i*

is the chief or syndic of a workmen's guild. The *kiaya kadin* is the first lady of the palace, the housekeeper who has charge of the domestic arrangements and the servants. The *kapu kiaya* is the representative, the agent of the governors of provinces at the Ottoman Porte. The name *dewlet kiaya-si* used to be given to an official whose function corresponded to the minister for home affairs in modern constitutions; *kul kiaya-si* was the inspector of the Janissaries, lieutenant of the Agha and his chief of staff, who could only be dismissed with the consent of the whole odjaḳ; he himself had an agent with the Agha who had to transmit the chief's orders to the commanders of fortresses and was called *kiaya-yeri*, "the inspector's lieutenant".

KHĀ', the seventh letter of the Arabic alphabet, representing the harshest of the gutturals, with the numerical value 600. It belongs to the sounds peculiar to the Arabic alphabet (in which it is distinguished from *ḥā'* by a diacritical point), in so far as the Hebrew and Aramaic scripts do not distinguish it from *ḥā'*. In Aethiopian, on the other hand, *Kharm* in contra-distinction to *Ḥawt* is denoted by a sign of its own; it is, however, to be observed that in the MSS. the two signs are often interchanged and that in the modern languages of Abyssinia there is little or no difference in the pronunciation of the gutturals. In Minaean and Sabaean *khā'* is denoted by a sign which slightly deviates from *ḥā'*. In the Assyrian script the sound corresponding to *khā'* is usually distinguished from the softer gutturals.

Bibliography: Comparative grammars of Semitic languages (Wright, Zimmern, Brockelman, Cohen etc.); A. Schaade, *Sībawaihi's Lautlehre*, Leiden 1911, p. 19 and note 48.

KHABAR (A.), plural *akhbār*, *akhābīr*, report, news. The word is not used in any special context in the Ḳur'ān. In the Ḥadīth it occurs among other passages in the tradition which describes how the djinn by eavesdropping obtain information from heaven (*khabar min al-samā'*) and how they are pelted with fiery meteors to prevent them from doing so (al-Bukhārī, *Adhān*, bāb 105; Muslim, *Ṣalāt*, trad. 149); al-Tirmidhī, *Tafsīr*, Sūra lxxii., trad. 1).

In his collection al-Bukhārī has a chapter entitled *Akhbār al-Āḥād*, which, as the *tardjama* indicates, deals with the validity of traditions regarding *adhān*, *ṣalāt*, fasting, the law of inheritance, and judicial procedure, which are only given on the authority of one man.

Al-Ghazālī gives the name *akhbār* to the traditions that go back to Muḥammad. He distinguishes the sayings of the Companions by the term *āthār* (see his *Iḥyā'*, passim). On such and similar technical distinctions see Lane's *Lexicon* s.v., and *Dict. of Techn. Terms*, ed. Sprenger and Nassau Lees, s.v.

Akhbār is further often found in the titles of historical works; see Brockelmann, *Gesch. d. arab. Litt.*, Index II.

Ṣāḥib al-Khabar was the title of one of a sulṭān's officers in provincial capitals whose duty it was to report to his master all new happenings, the arrival of strangers etc. The postmaster was often given this office; see Dozy, *Suppl.*, s.v., and the literature there given. — As a technical term in grammar *khabar* is predicate.

(A. J. WENSINCK)

KHABN, a term in prosody, indicating the suppression of the second letter when quiescent of a foot beginning with a *sabab khafīf* (see the art. 'ARŪḌ). It affects: 1°. *fā'ilun* (> *fa'ilun*), 2°. *mustaf'ilun* and *mustaf'i lun* (*mutaf'ilun* = *mafā'ilun*), 3°. *maf'ūlātu* (*ma'ūlātu* = *fa'ūlātu*), 4°. *fā'ilātun* (*fa'ilātun*). It is found in the metres *madīd*, *basīṭ*, *radjaz*, *ramal*, *sarī'*, *munsariḥ*, *khafīf*, *muḳtaḍab*, *mudjtathth* and *mutadārak*.

Bibliography: cf. the article 'ARŪḌ.

(MOH. BEN CHENEB)

KHĀBŪR, the name of two rivers.

1. The larger Khābūr is one of the chief affluents of the Euphrates, which it joins at Ḳarḳīsiyā [q. v.]. In classical literature the name is written in various ways: Ἀβόρρας, Χαβώρας, Ἀβώρας, Ἄβουρας, Ἀββόρα, Βώρρας, Chaboras. Xenophon calls it Ἀράξης.

It takes its origin in the Northern Mesopotamian mountains (the Izala M. and Masius M. of the classical authors), flows through the plain of Mesopotamia, passes between Djabal 'Abd al-'Azīz and the Sindjār mountains, where it takes a southern direction which it changes in the last part of its course into a south-western one.

Its springs, as well as those of its numerous affluents, are chiefly connected with three important towns, Ra's al-'Ain (Resh'aina of the Syrians) in the Northwest, Mārdīn in the North and Naṣībīn in the Northeast. The springs at Ra's al-'Ain are said to be three hundred in number; they were shut off by iron grills, in order to prevent people from being drowned in them.

Downstream from Ra's al-'Ain the Khābūr is joined by the river of Mārdīn, which by the Arab geographers is called Ṣawr; on Sachau's map it bears the name of Nahr Zrgān. Just before passing between Djabal 'Abd al-'Azīz and the Sindjār mountains it is joined by the river of Naṣībīn, which in classical literature is called Mygdonius; the Arab geographers apparently mean this river when speaking of the Hirmās; on Sachau's map it is called Djaghdjagha. The course and the nomenclature of this and other affluents are still uncertain.

The Arab geographers mention several more or less important places situated on the Khābūr between Djabal 'Abd al-'Azīz (classical Gauzanitis) and Ḳarḳīsiyā, such as Shā'ā, Tunainīr (upper and lower T.), Ṭābān (also on Sachau's map), 'Arbān or 'Arabān (also on Sachau's map), Sukair, al-Shamsāniya (probably Sachau's Shemisan), Mākisīn ("the custom-house"), al-Ghudair ("the pool"), and Ṣuwar (Sachau's eṣ-Ṣawar). At Mākisīn there was a bridge of boats. "Much cotton was grown here and by it lay the small lake of deep blue water called al-Munkharik, said to be unfathomable" (Le Strange).

The whole region through which the Khābūr flows, chiefly in its lower course, was renowned for its fertility. Its trees are mentioned in Arabic poetry, its fruits were exported to the towns of the 'Irāḳ. But al-Idrīsī already speaks of the plundering raids of the Beduins which cast a shadow over these natural riches. Sachau calls the tribes residing in the plain near Sheddādīya Djabūr. When he travelled there (1899), the large fertile

valley was devoid of towns, villages and human beings in general.

II. The lesser Khābūr, one of the affluents of the Tigris which takes its rise on the mountains of Southern Armenia, south of Lake Wan and west of Lake Urmiya. It passes between the mountain ranges which are now called Djabal Haftal (North) and Zākhō Dagh (South). The latter mountains derive their name from the town of Zākhō (classical Azochis). The Khābūr joins the Tigris between Maghāra and Marra. The Arab geographers often call it Khābūr al-Ḥasaniya, after the town of this name. Here the river was spanned by a magnificent stone bridge which was looked upon as a miraculous piece of masonwork. Al-Ḥasaniya probably survives in the hamlet of Ḥasan Agha.

Wüstenfeld, ii. 384; Le Strange, *The Lands of the Eastern Caliphate*, Cambridge 1905, p. 93; Ritter, *Erdkunde*, xi. 168; Chesney, *The Expedition for the Survey of the Rivers Euphrates and Tigris*, London 1850, index.

KHADHLĀN (KHIDHLĀN, A.), nomen actionis from the root *kh-dh-l* "to leave in the lurch", a technical term in Muḥammadan theology, applied exclusively to Allāh when He withdraws His grace or help from man. The disputes regarding it first appear in connection with the quarrel over *ḳadar* [q. v.]. A starting point is found in Sūra iii. 154: "but if He abandon you to yourselves (*yakhdhulkum*), who will help you after Him? Let the faithful therefore trust in God". On this al-Rāzī observes: "The Companions deduce from this verse that belief is exclusively a result of Allāh's help (cf. John, vi. 65), while unbelief is a result of His *khadhlān*. This is obvious as the verse points out that the matter is entirely in God's hands".

A more detailed exposition is given by Ibn Ḥazm: "Right guidance and assistance consist in God's preparing (*taisīr*) the believer for the good for which He has created him; while *khadhlān* consists in His preparing the *fāsiḳ* for the evil for which He has created him. Linguistic usage, the Ḳur'ān, the force of logic, and the attitude of the fuḳahā and those in the past who handed down traditions and of the companions and successors as well as of those who came after them and of the whole body of Muslims with the exception of those whom God has led astray as regards their intelligence, namely such as belong to the followers of slanderers and nullifiers, like al-Naẓẓām, Thumāma, al-'Allāf and al-Djāḥiẓ, are all unanimous". Then follows this reasoning: Allāh has given man two forces, hostile and opposed to one another, *tamyīz* (power of discrimination) and *hawā* (passion, desire). When Allāh protects the soul, *tamyīz* prevails by His help and power. But when He leaves the soul to itself (*khadhala*), He strengthens the *hawā* with a strength which amounts to leading astray (*iḍlāl*).

Khadhlān is therefore, according to Ibn Ḥazm, the opposite of *hudā* and *tawfīḳ* and the conception approaches that of *iḍlāl*. The Mu'tazila (as already indicated by Ibn Ḥazm's words) see in it a contradiction to Allāh's justness: according to them, Allāh does not urge a man to evil. In their terminology *khadhlān* therefore means the refusal of divine grace (*man' al-luṭf*), while, according to the Ash'arīs, *khadhlān* is "the creation of the ability to disobey".

Bibliography: Fakhr al-Dīn al-Rāzī, *Mafātīḥ al-Ghaib*, ii. 296; Ibn Ḥazm, *Kitāb al-Faṣl fi 'l-Milal wa 'l-Ahwā' wa 'l-Niḥal*, Cairo 1317—1321, iii. 50 *sq.*; *Dictionary of the technical Terms*, ed. KHADĪDJA, Muḥammad's first wife, was a daughter of Khuwailid of the Ḳuraish family of 'Abd al-'Uzzā. The authorities are unanimous in saying that when she made Muḥammad's acquaintance and took him into her service she was a well-to-do merchant's widow who was carrying on business independently. She had been twice married previously and had children of both marriages. The one husband was a Makhzūmī, the other a Tamīmī, Abū Hāla, whose real name is variously given; but this Abū Hāla is also mentioned by others among the followers of Muḥammad, which — if both stories are true — would make Khadīdja a divorced woman. When she discovered the brilliant qualities of her young employee — the story of this is adorned with all sorts of legendary features — she proposed marriage to him according to the generally accepted story, her father was dead by this time, according to another, still alive and opposed to the marriage, so that she only obtained his consent after making him intoxicated — a favourite motif in fiction (cf. the art. DJAḤDHAMA). Most authorities make Muḥammad twenty-five at this time and Khadīdja forty, which, in view of the fact that Arab women age early and that she bore him at least five children (see the art. MUḤAMMAD), is not even probable, although in later times extraordinary capabilities in this direction were ascribed to the Ḳuraish women (cf. al-Djāḥiẓ, *Tria Opuscula*, ed. van Vloten, p. 78). Otherwise we do not need to doubt the essential accuracy of the tradition, for the alteration in Muḥammad's circumstances has witness borne to it in the Ḳur'ān (xciii. 6 *sq.*) and the fact that in spite of his later so marked sensuality he was content with one wife so long as Khadīdja lived is best explained by her superior social position which she perhaps used to insist on this condition. Her wealth must have been a great help to him during his struggle and her death (which is said to have taken place three years before the Hidjra) after she had probably suffered

considerable losses through the hostility of the great merchants, contributed to make his position still less endurable. But her personality seems to have been of even greater weight with her husband: in any case tradition draws a very attractive picture of the moral support which she afforded him during the excitement and agitation of the first revelation. That Waraḳa b. Nawfal [q. v.] was her cousin must have helped to make her sympathetic to Muḥammad's aims.

(FR. BUHL)

KHĀDIM (A.), servant; in Turkish often used with the secondary meaning of "eunuch". The word is applied to male and female, freemen or slaves alike; as to the latter see the art. ʿABD. The collective is *khadam* and the plural *khuddām*. *Khādim al-Ḥaramain al-sharīfain* (servant of the two sacred areas i. e. Mekka and Medina) was one of the titles of the Sulṭān of Turkey (see Barthold, *Isl.* vi. 1916, p. 379, *sqq.*).

There have always been free servants alongside of slaves in Islām. Anas b. Mālik [q. v.] entered Muḥammad's service as a youth (al-Bukhārī, *Djihād*, bāb 74 etc.) and he records it to his master's credit that the latter had never said a harsh word to him nor even ever asked him for an explanation of his doings (al-Bukhārī, *Waṣāyā*, bāb 25). Servants were used on journeys especially, and put up the tents, etc. These servants are called *farrāsh* (lit. spreaders of the carpets), a name which is, however, given to servants who look after the beds and the house generally (Lane, *The Thousand and One Nights*, London 1859, ii. 202, note 16).

In Egypt in Lane's time there was an organisation of servants. They were under special shaikhs to whom anyone who required a servant had to apply; these shaikhs were responsible for any dishonesty or breach of trust by their people (Lane, *Manners and Customs*, London 1899, p. 139). There were also free female servants who performed the lowest household duties (*op. cit.*, p. 147, 197) for a very small wage (p. 168). Some of the male servants used to shave their beards (p. 573).

In Turkish houses of the upper classes these people, who are usually addressed by their name followed by Agha, work as cooks, gardeners, janitors, etc., and they have to avoid the women's apartments in the house with which they communicate by the swivel-box (*dolab*). If they are married they do not live in their master's house.

The women servants in the konaks live in the women's apartments and have very little personal freedom. They sometimes belong to impoverished Turkish families or are the children of former servants and slaves. They are called *kalfa* (from *khalīfa*) or *kalāʾiḳ* (from *khalāʾiḳ*) and the men *ushak*, *deftiyer*, *khizmetkiar* (*khidmetkār*). The servant girls (*khidmetdji* = *khidmetdji*) are usually Greeks or Armenians.

Uniformed officials in the imperial and official services were divided into various corporations (chamberlains, janitors, musicians) and were included under the general name *kadama* = *khidama* (information supplied by Dr. Kramers). On such corporations see also v. Hammer, *Constantinople und der Bosporus*, Pest 1822, ii. 395 *sqq.*

In North Africa, especially in Algeria, conditions have become considerably influenced by European customs. In place of *khādim*, *ṣaḥab*, plur. *aṣḥāb*, is commonly used; this honourable designation is applied to the clients of prominent Moroccan families who are employed in various duties from the lowest to the most confidential missions. They usually receive no regular salary but live on the bounty of their master. They accompany him on the road, look after his mount, and order illumination for trips at night, etc. If their master is a great ḳāʾid or the head of a brotherhood he appoints one of his *aṣḥāb* to accompany travellers who are passing through the areas over which his authority extends. This is a sign that they are under his protection.

In the zāwiyas servants of this type form a guild to which is entrusted the care of pilgrims and of the buildings; cf. Depont and Coppolani, *Les confréries religieuses musulmanes*, Algiers 1897; Doutté, *l'Islam algérien en l'an 1900* (information supplied by Prof. H. Basset).

The Ḥadīth has handed down various sayings of Muḥammad which endeavour to secure good treatment for servants; in these it is not always possible to distinguish whether the reference is to freemen or slaves. The *khādim* is responsible for his master's possessions (al-Bukhārī, *Waṣāyā*, bāb 9); on the other hand alms which he bestows out of his master's property bring him a heavenly reward (al-Bukhārī, *Zakāt*, bāb 25). One should be ready to forgive one's servant (al-Tirmidhī, *Birr*, bāb 32); he should neither be beaten nor cursed (al-Tirmidhī, bāb 30, 31, 85); and the servant who has prepared a meal has a right to partake of it (al-Bukhārī, *Aṭʿima*, bāb 55; al-Tirmidhī, *Aṭʿima*, bāb 44, etc.)

(A. J. WENSINCK)

AL-**KHAḌIR** (AL-KHIḌR), the name of a popular figure, who plays a prominent part in legend and story. Al-Khaḍir is properly an epithet ("the green man"); this was in time forgotten and this explains the secondary form Khiḍr (about "the green"), which in many places has displaced the primary form.

Legends and stories regarding al-Khaḍir are primarily associated with the Ḳurʾānic story in Sūra xviii. 59—81, the outline of which is as follows. Mūsā goes on a journey with his servant (*fatā*), the goal of which is the *Madjmaʿ al-Baḥrain*. But when they reach this place, they find that as a result of the influence of Satan they have forgotten the fish which they were taking with them. The fish had found its way into the water and had swum away. While looking for the fish the two travellers meet a servant of God. Mūsā says that he will follow him if he will teach him the right path (*rushd*). They come to an arrangement but the servant of God tells Mūsā at the beginning that he will not understand his doings, that he must not ask for explanations and as a result will not be able to bear with him. They set out on the journey, however,

during which the servant of God does a number of apparently outrageous things, which causes Mūsā to lose patience so that he cannot refrain from asking for an explanation, whereupon the servant of God replies: "Did I not tell you that you would be lacking in patience with me?" He finally leaves Mūsā and on departing gives him the explanation of his actions, which had their good reasons.

This servant of God is called al-Khaḍir by the majority of the commentators. Others, however, identify him with Mūsā's servant (see below). Both interpretations have their roots in Oriental legends. The Ḳur'ānic story may be traced back to three main sources: the Gilgamesh epic, the Alexander romance and the Jewish legend of Elijah and Rabbi Joshua ben Levi. The two first are, of course, again closely related to one another; at the same time it should be noted that the fish episode is lacking in the epic and is only found in the romance (cf. R. Hartmann in the *Z. A.*, xxiv. 307 *sqq.*).

The main features which the three sources have in common with the story in the Ḳur'ān are the following:

The Gilgamesh epic. Overcome with melancholy at the death of his friend Engidu, the hero Gilgamesh sets out on a series of travels to look for his ancestor Utnapishtim (Khasisatra, Xisuthros) who lives at the mouth of the rivers and who has been given eternal life. Gilgamesh wants to ask him about the plant of life which will save man from the power of death.

The Alexander romance. The fish episode (with which we are here concerned) which shows Alexander on the search for the spring of life is found in greatest detail in Syriac literature, in the Lay of Alexander (cf. C. Hunnius, *Das syrische Alexanderlied*, in the *Z.D.M.G.*, lx. 169 *sqq.*, line 158 *sq.*). Alexander is accompanied by his cook Andreas (cf. the article ILYĀS). During the laborious journey through the land of darkness Andreas on one occasion was washing a salted fish in a spring; the contact with the water made the fish live again and it swims away. Andreas jumped in after it and thus gained immortality. When he told Alexander his adventure the latter at once realised that this was the well of life. All attempts to find it again failed: Alexander is denied the immortality which becomes the lot of the unfortunate cook, who does not know what to do with it.

The Jewish legend (printed in Jellinek, *Bet ha-Midrasch*, v. 133—135) tells how Rabbi Joshua ben Levi goes on a journey with Elijah under conditions laid down by Elijah, like those above of the servant of God in the Ḳur'ān. Like the latter, Elijah does a number of apparently outrageous things which affects Joshua as it did Mūsā. Zunz, *Gesammelte Vorträge*, x. 130 (not accessible to me) first pointed out the similarity of this story to the Ḳur'ānic legend. A comparison of the main features of these three sources with Sūra xviii. 59 *sqq.* suggests the following conclusions, questions and hypotheses.

The chief figure in the Ḳur'ānic story is called Mūsā. Some commentators doubt his identity with the great prophet (see below). There is not, however, the slightest hint of another Mūsā anywhere in the Ḳur'ān. On the other hand, we have no legends of Moses, which make him, like Gilgamesh and Alexander, go on the great journey. We might suggest the following explanation of the difficulty. The figure of Joshua ben Levi, with which Muḥammad first became acquainted through the Jews and which does not again appear in Muslim legend, was identified, as we shall see, with Joshua b. Nūn. This identification may have resulted in a confusion of his master Elijah with Joshua b. Nūn's master Moses. Mūsā thus represents Gilgamesh and Alexander in the first part of the Ḳur'ānic story and Elijah in the second.

The figure of the travelling-companion is not connected with the Gilgamesh epic where it is not found, but with the Alexander romance and the Jewish legend. It probably comes in the first place from the romance. This is suggested by the fact that the companion is called *fatā* (here practically "servant"), a term that points to Alexander's cook rather than to Rabbi Joshua; the fish episode, which also is only found in the Alexander romance, points in the same direction.

The Madjma' al-Baḥrain is given as the goal of the journey. The expression has no direct original either in the epic or the romance, although there are points of contact in both. Utnapishtim lives *ina pî narâti*, i. e. at the mouth of the rivers. It is not quite certain what this expression means, but it is probable that the place in the extreme west is meant where the sources of all running water are. This, however, still leaves the dual in the Ḳur'ānic expression unexplained. This is still the case, if we attempt to trace it to the Alexander romance where (i. e. in the Syriac Alexander legend; see Budge, *op. cit.*, p. 259) Alexander with his army crosses a strip of land between the eleven bright seas and the ocean. It is also possible that the expression goes back to none of these but to another story unknown to us, which perhaps never found its way into literature, in which there was mention of the meeting-place of two seas. According to western Semitic cosmology, this is the end of the world where the oceans of earth and heaven meet.

We can likewise only guess at the origin of the rock (verse 62). It also belongs to cosmology (see A. J. Wensinck, *The Ocean in the Literature of the Western Semites*, in the *Verh. Ak. Amst.*, xix., Nº. 2, p. 26 *sqq.*). It is found neither in the epic nor in the romance, again an indication that the Ḳur'ānic story borrowed from other sources also.

The servant of God at the Madjma' recalls Utnapishtim-Khasisatra. He is called (verse 64) one to whom God's mercy had been shown, to whom divine wisdom had been granted. This sounds almost like a translation of the name Khasisatra and the granting of divine favour is perhaps an echo of Utnapishtim's immortality.

The test of patience to which he subjects the newcomer comes from the Jewish legend only; the servant of God in this respect thus represents Elijah.

II

The commentators, Ḥadīth, and historians have collected a mass of statements around the Ḳur'ānic story, additions which, like the story itself, come for the most part from the three sources already mentioned.

The first question discussed is whether the principal character is Mūsā b. 'Imrān or

Mūsā b. Mīshā (= Manasseh) b. Yūsuf b. Ya'ḳūb, i. e. a descendant of the patriarch Jacob (al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 333; al-Zamakhsharī, *Kashshāf*, on verse 59). Commentators are almost unanimous in favour of the former alternative and base their opinion on the following legend which is transmitted in several forms. When Mūsā, the famous prophet, was one day preaching to the children of Israel he was asked if there was any man wiser than he. When he replied in the negative, Allāh revealed to him that his pious servant al-Khaḍir, was wiser than he. He thereupon decided to visit this wise man. The story comes from Jewish legend; it is found in a considerable number of Arabic sources (al-Bukhārī, *'Ilm*, bāb 16, 19, 44; *Anbiyā'*, bāb 27; *Tafsīr*, Sūra xviii., bāb 2—4; Muslim, *Faḍā'il*, trad. 170—174; al-Tirmidhī, *Tafsīr*, Sūra xviii., bāb 1; al-Ṭabarī, ed. de Goeje, i. 417; *Tafsīr*, xv., 165 *sq.*; Fakhr al-Dīn al-Rāzī, *op. cit.*, iv. 333).

The (salted) fish serves as a guide to the route; the place where it is lost or revived by contact with water is the spring of life where al-Khaḍir lives (al-Ṭabarī, i. 417). A further indication of the spring of life is that it is marked by the rock, for it rises at its foot (al-Ṭabarī, *Tafsīr*, xv. 167; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 4). The rock is also located before the river of oil or the river of the wolf (al-Baiḍāwī and al-Zamakhsharī on Sūra xviii. 61; al-Ṭabarī, *Tafsīr*, xv. 164). Some connection between a river of oil and the spring of life is in itself not impossible. According to many statements, oil is a feature of Paradise rivers. Then ذئب would be an error in writing زيت which could easily arise. Vollers considers the reverse probable; he thinks that "river of the wolf" is a translation of the name Lukos, which is not uncommon in classical literature as a river-name. If this hypothesis is correct, one might think of the Lukkos in Morocco or the Lycus on the Syrian coast, two regions with which the idea of extreme west is associated, as we shall see directly.

The Madjma' al-Baḥrain is explained in various ways. Some regard it as "the place where the Persian Ocean unites with the Roman Sea, to the east" (al-Baiḍāwī on Sūra xviii. 59; al-Ṭabarī, *Tafsīr*, xv. 163). This points to the Isthmus of Suez and is an echo of the idea that the coast of Syria was the extreme west (see A. J. Wensinck, *Bird and Tree as Cosmological Symbols in Western Asia*, in the *Verh. Ak. Amsterdam*, 1921, p. 17 *sqq.*). Others say that it is the junction of the Roman Sea with the Ocean (Tandja, Ifrīkiya; al-Ṭabarī, *Tafsīr*, xv. 163, and al-Zamakhsharī on the passage). This view reflects a later cosmological standpoint which regarded the Straits of Gibraltar as the extreme west. A far-fetched explanation is that the union of the two seas means the meeting of Mūsā and al-Khaḍir, the two seas of wisdom (e. g. al-Damīrī, *Ḥayāt al-Ḥayawān*, i. 318).

When Mūsā first sees Khaḍir he is wrapped up in his cloak, as the Ḳur'ān says, "because he was sleeping", says al-Ṭabarī (ed. de Goeje, i. 418). When he sees a bird drinking out of the sea he says to Mūsā: "Your wisdom is as insignificant compared with that of God as the amount the bird drinks is compared with the sea" (al-Ṭabarī, ed. de Goeje, i. 418; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 3; al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 333 *sq.*). Al-Khaḍir lives on an island (al-Ṭabarī, ed. de Goeje, i. 422), or on a green carpet (*ṭinfisa*) in the heart of the sea (*'alā kabid al-baḥr*; al-Bukhārī, *Tafsīr*, Sūra xviii., bāb 3).

The test of patience is embellished by the commentators with a wealth of detail. It would take up too much space to go into them here; cf. the commentaries on Sūra xviii. 59 *sqq.*, and the works on history and tradition mentioned in the *Bibliography*.

As may be expected from what we have said above, another branch of tradition lays particular emphasis on the connection between al-Khaḍir and Alexander's search for the spring of life. Friedländer, however, goes much too far when he says (*Die Chadhirlegende*, p. 108 *sq.*) "that originally Chadhir had nothing at all to do with the puzzling servant in verse 64 — who belongs to quite a different cycle of stories — but with the servant of Moses (Alexander) who has charge of the fish in verse 59 *sqq.*, in other words he is identical with Alexander's cook whom we know so well from Pseudokallisthenes and the Syriac homily". For Khaḍir is, as we have seen and will see further, connected with Utnapishtim as well as with Alexander's companion.

There is no translation of the Alexander romance in the Arabic literature known to us (cf. Weymann, see *Bibliography*). On the other hand, there are a number of, in part unedited, versions of the Alexander saga, which have been examined by Friedländer. It would take us too far to go into the differences between these versions with regard to our subject. These sources show their independence of the Ḳur'ān not only by the fact that they make Khaḍir the companion of Dhu 'l-Ḳarnain, but also by the complete absence of any reference to the *fatā* of the Ḳur'ān. Al-Khaḍir usually appears as the commander of Alexander's vanguard on his march to the spring of life. In al-Sūrī's version he is called the king's vizier and has become the principal character, throwing the king himself into the background; in 'Umāra he is Alexander's cousin, conceived and born in similar circumstances to him and at the same time. The usual account of the journey to the spring of life makes Alexander and al-Khaḍir go their ways separately; in some versions, the latter has the fish with him and discovers the miraculous well through the fish's becoming alive when it touches the water; in other stories, on the other hand, there is no mention of the fish and al-Khaḍir recognises the spring by other signs; in others again he dives into it without knowing its virtues (e. g. al-Ṭabarī, i. 414). In one version in Niẓāmī, al-Khaḍir does not go with Alexander but with Elijah to the spring, out of which both drink and both become immortal.

III

The descriptive character of the name al-Khaḍir is so obvious from its meaning that tradition could not but give the hero's real name, as well as his genealogy and date. We find him most frequently called Balyā b. Malkān. In al-Mas'ūdī (*Murūdj*, iii. 144) the latter is called a brother of Ḳaḥṭān and thus given a place in the South Arabian genealogy. This makes it probable that Malkān is identical with Malkam (I Chronicles, viii. 9), who is also included among the

South Arabian patriarchs. This genealogy is next traced back to Shem through Fālagh (Phaleg) and ʿĀbir (Eber) (e. g. al-Ṭabarī, ed. de Goeje, i. 415; al-Masʿūdī, *Murūdj*, i. 92; al-Nawawī, on Muslim's *Ṣaḥīḥ*, v. 135). Is this Balyā (بليا) perhaps not a corruption of Elia (ايليا), which is identical with a Syriac form of the name Elijah. On the other hand, Elijah is also given in the Muslim form Ilyās as al-Khaḍir's proper name and also Elisha, Jeremiah (cf. God's words in *Iṣāba*, p. 887), Khaḍrūn (al-Ṭabarī, ed. de Goeje, i. 415; al-Diyārbakrī, *Taʾrīkh al-Khamīs*, i. 106, and Friedländer's *Chadhirlegende*, p. 335, under Chadhir).

Ibn Ḥadjar also gives the following genealogies (*Iṣāba*, p. 883 *sq.*): (1) He is a son of Adam (weak *isnād*); with this is connected the story (*Iṣāba*, p. 887 *sq.*: Abū Ḥātim al-Sidjistānī, *Kitāb al-Muʿammarīn*, p. 1) that al-Khaḍir took care of Adam's body and finally buried it after the flood; (2) He is a son of Ḳābīl called Khaḍrūn; (3) He is al-Muʿammar (the Long-lived) b. Mālik b. ʿAbd Allāh b. Naṣr b. al-Azd; (4) He is Ibn ʿAmāʾīl b. al-Nūr b. al-ʿĪṣ b. Isḥāk; (5) He is the son of Pharaoh's daughter; (6) He is a Persian, as his father was a Persian, his mother a Greek or vice versa; it is also said that he was born in a cave, fed there on the milk of wild beasts and finally entered the service of a king (al-Damīrī, i. 318; Ibn Ḥadjar, p. 891 *sq.*); cf. also his meeting "on the market-place of the Banū Isrāʾīl" with the man who asks him for alms *li-wadjh Allāh* (*Iṣāba*, p. 894 *sq.*).

This does not, however, exhaust the traditions about his names and genealogy. We shall only quote here the following from Maracci, *Prodromi* to Sūra xviii. 57: Alchedrus, quem fabulantur Moslemi eundem fuisse, ac Phinees filium Eleazari, filii Aaron; cujus anima per metempsychosin emigravit primo in Eliam, deinde ex Elia in S. Gregorium, quem propterea Mahumetani omnes summo honore prosequuntur. — The latter identification is probably due to a confusion with St. George, with whom al-Khaḍir has certain points of resemblance; cf. thereon Clermont-Ganneau in the *Revue archéologique*, vol. xxxii. *sq.*, and Friedländer, *op. cit.*, p. 275. Clermont-Ganneau further pointed out the relationship between the consonants *kh-ḍ-r* and the North Semitic group *ḥ-ṣ-r*. The name has also been taken as a corruption of Khasîsatra (Guyard in the *R. H. R.*, i. 344 *sq.*) or connected with Ahasuerus, the wandering Jew (Lidzbarski in the *Z. A.*, vii. 116).

Very varying dates are given for al-Khaḍir's period. Sometimes he is called a contemporary of Abraham, who left Babel with him (al-Ṭabarī, ed. de Goeje, i. 415); sometimes he is put in the period of Afrīdūn; he is a contemporary of Alexander and lived down to the time of Mūsā (Ibn Ḥadjar, *Iṣāba*, p. 886); according to others, he was born in the period of Nāshiyā b. Amūṣ (i. e. Isaiah b. Amos) (al-Ṭabarī, *op. cit.*, p. 415 *sq.*). The divergence in these statements is partly connected with his immortality (see below).

More important are the explanations of the name given in the Oriental sources. He is said to have become green through diving into the spring of life and thus got his name (Ethiopic Alexander romance; cf. Friedländer, *op. cit.*, p. 235 *sq.*). As already mentioned, he lives on an island (al-Damīrī, *op. cit.*, p. 317); he is also said to worship God on the islands (al-Ṣūrī, see Friedländer, *op. cit.*, p. 183; al-Thaʿlabī, p. 197). This may point to al-Khaḍir's having originally been a marine being. The following circumstances point in the same direction: he is frequently called the patron of seafaring people (e.g. *Taʾrīkh al-Khamīs*, i. 107); he is said to be appealed to on the Syrian coast by sailors in stormy weather. In India he has become a regular river-god under the name Khwādja Khiḍr [q.v.], who is represented sitting on a fish. Clermont-Ganneau and Friedländer sought the origin of the figure mainly in this direction, the latter on the assumption that the Greek Glaukos legend reached the Muslims through a Syriac intermediary (*op. cit.*, p. 107 *sqq.*). But apart from the fact that we know nothing of any such intermediary, a connection between al-Khaḍir and Glaukos would only explain one aspect of the former; nor would it tell us anything about the origin of the figure, indeed one may doubt whether it is right to seek for the origin of a figure so complicated as al-Khaḍir, who has characteristics in common with Utnapishtim, with Alexander's cook and other figures.

There are other things to be considered. In a number of Arabic explanations of the name, al-Khaḍir is conceived not as belonging to the sea but to the vegetable kingdom. "He sat on a white skin and it became green" (e.g. al-Nawawī on Muslim's *Ṣaḥīḥ*, v. 135; cf. al-Ṭabarī, *Tafsīr*, xv. 168). "The skin", adds al-Nawawī, "is the earth." Al-Diyārbakrī (i. 106) is still more definite: "The skin is the earth when it puts forth shoots and becomes green after having been bare". According to ʿUmāra, al-Khaḍir is told at the spring of life: "Thou art Chadhir and where thy feet touch it, the earth will become green" (Friedländer, *op. cit.*, p. 145). Wherever he stands or performs the *ṣalāt*, it will become green (al-Nawawī, *op. cit.*; al-Rāzī, *Mafātīḥ al-Ghaib*, iv. 336). These are statements (especially the last) which remind us of a Messianic passage in the Old Testament: "Behold the man whose name is the branch and he shall grow up out of his place" (Zachariah, vi. 12). Al-Khaḍir is really connected with two Messianic figures — with Elijah (cf. the art. ILYĀS) and with Jesus; these three form with Idrīs [q. v.] the quartette of those who have not tasted death (*Taʾrīkh al-Khamīs*, i. 107).

The variations in the character of al-Khaḍir result in different views regarding his nature. If he is a prophet (see *Iṣāba*, p. 882 *sqq.*) it remains doubtful whether he is to be included among the Apostles (al-Nawawī, *op. cit.*, p. 135). He is, however, also human, angelic, mundane and celestial (al-Ṭabarī, ed. de Goeje, i. 544, 798). Popular piety as well as Ṣūfī circles readily regard him as a saint (*walī*). According to one Ṣūfī view, every age has its Khaḍir, in so far as the *Naḳīb al-awliyāʾ* for the time being is al-Khaḍir (*Iṣāba*, p. 891). As *walī*, if three times appealed to, he protects men against theft, drowning, burning, kings and devils, snakes and scorpions (*Taʾrīkh al-Khamīs*, i. 107; *Iṣāba*, p. 903). Sky and sea and all quarters of the earth obey his sway; he is God's *khalīfa* on the sea and his *wakīl* on land; he can make himself invisible at will (ʿUmāra in Friedländer, *op. cit.*, p. 145). He flies through the air, meets Elijah on the dam of Alexander and makes the pilgrimage to Mekka with him every year (cf. *Iṣāba*, p. 904 *sq.*).

Every Friday he drinks from the *Zamzam* well, and Solomon's pond and washes in the well of Silon (*Taʾrīkh al-Khamīs*, i. 107; Friedländer, *op. cit.*, p. 148 *sq.*, 151); he can find water below the ground and talks the languages of all peoples (al-Sūrī in Friedländer, p. 184).

His immortality is particularly emphasised (cf. Rückert's poem "Chidher"; ʿUmāra in Friedländer, *op. cit.*, p. 145; Abū Ḥātim al-Sidjistānī, *Kitāb al-Muʿammarīn*, p. 1; *Iṣāba*, p. 887 *sqq.*, 892, 895). According to the *Iṣāba*, p. 882, he was given immortality after a conversation with his friend, the angel Rafāʾīl, in order to establish the true worship of God on the earth and maintain it. Ibn Ḥadjar describes a meeting between al-Khadir and Muḥammad in various versions (*Iṣāba*, p. 899 *sqq.*). On meetings with individuals who lived at a later date see *ibid.*, p. 908 *sqq.*; on the table which was let down to him from heaven see *ibid.*, p. 919; on his presence at the battle of Ḳādisiya see *Murūdj al-Dhahab*, iv. 216.

He lives in Jerusalem and performs his *ṣalāt* every Friday in the mosques of Mekka, Medina, Jerusalem, Ḳubāʾ and on the Mount of Olives; his food is *kamʾa* and water-parsley (*Taʾrīkh al-Khamīs*, i. 107; *Iṣāba*, p. 889 *sq.*, 904).

On his marriages we have as early as classical Ḥadīth (Ibn Mādja, *Zuhd*, bāb 23) a legend also mentioned by al-Thaʿlabī, *Ḳiṣaṣ*, p. 193 *sqq.*, which in its main features must have come from Christian sources. It is the motif of the pious youth who married by his parents against his will persuades his young wife to preserve her virginity (cf. the Syriac Acts of Thomas, 2nd Praxis). The story links up with that of Pharaoh's daughter's handmaid.

(A. J. Wensinck)

KHWĀDJA, a Persian word of uncertain etymology, an honorific title applied to personages of a town, not of military rank, bourgeois. It was generally borne by ministers of sovereigns who were chosen from among the learned. It was later used to designate eunuchs. It is found as early as the beginning of the vith (xiith) century in a verse by the poet Anwarī. The derivative substantive *khwādjagī* in the sense of "merchant", "tradesman" is found in Meninski and the Sicilian documents published by Michele Amari (p. 212, 2).

It passed into Arabic in the forms *khawādja* and *khawādja*, the modern *khawādja* (eastern dialects) and means "Sir, Mr., Monsieur". It has been borrowed by Ottoman Turkish in the form *khodja* [q.v.] and here means "scribe, clerk, copyist, literate, private tutor"; it is found again in the western dialects of Arabic which have borrowed it with the same pronunciation and the same meanings. It is found in the *1001 Nights* (cf. Dozy, *Suppl.*). The title of Khodja, like that of Shaikh, is in Turkestān only given to descendants of the Caliphs Abū Bakr and ʿUmar and to those of ʿAlī through his wives other than Fāṭima (Defrémery, *Mémoires d'histoire orientale*, ii. 407, Nº. 1; Malcolm, *Hist. of Persia*, Lahore 1888, p. 86).

(Cl. Huart)

KHWĀDJA KHIDR (or Khizr in India), is in many parts of India identified with a river-god or spirit of wells and streams. He is mentioned in the *Sikandar-nāma* as the saint who presided over the well of immortality. The name was naturalized in India, and Hindū as well as Muslims reverence him, it is sometimes converted by Hindūs into Rādja Kidār. On the Indus the saint is often identified with the river, and he is sometimes to be seen as an old man clothed in green. A man who escapes drowning is spoken of as evading Khwādja Khizr (Temple, *Legends of the Panjāb*, i. 221). In a poem by a Balōč regarding a fight on the Indus a boat is unloosed "to float on the Khwādja's waves", and it is asserted "the Khwādja himself will remember that battle". (*Popular Poetry of the Baloches*, i. 74), and by one poet his name is substituted for that of Mīkāʾīl as one of the archangels. His principal shrine is on an island of the Indus near Bakhar, which is resorted to by devotees of both creeds (*Sind Revisited*, ii. 226). Manucci who was present at the siege of Bakhar in 1069 (1658) alludes to this shrine under the name of Cois Quitan. Burnes also mentions it in his "*Bokhara*".

The saint is believed to ride upon a fish, which was adopted as a crest by the Kings of Oudh, and appears on their coins. Possibly in this case there is also a survival of the fish-avatār of Vishnu. Muslims offer prayers to Khwādja Khidr at the first shaving of a boy, and a little boat is launched at the same time; also at the close of the rainy season. — See further khadir.

KHWĀDJŪ KIRMĀNĪ. [See kirmānī].

KHĀF, a town in Khurāsān, more accurately Khwāf, is first mentioned by al-Muḳaddasī in the form Khawāf as a district of Nīsābūr; he describes it as small, rich in pomegranates and grapes which were made into raisins, and he calls the capital Sᵉlūmak. According to Yāḳūt, the district was bounded by Būshendj of Herāt and Zūzen of Nīsābūr; it included 200 villages and three towns: Sandjān, Sīrāwand, Khardjird. Al-Ḳazwīnī says that Khawāf was near Nasā. According to him, it was large with many inhabitants, and had many villages, gardens and streams. It is perhaps to the same locality that Saiyid al-Murtaḍā refers as Khāf (without w), "a village in the land of the Persians (*'adjam*)".

The modern Khāf lies on the southern road, which does not touch Nīsābūr, from the Caspian Sea to Herāt, between Turshīz and Kelāt Nādir on a tributary of the Hari-Rūd. Prellberg, following Macgregor, gives the total population as 15,000. According to Clerk, he describes the chief town Khāf as a town of 500 houses with several forts surrounded by pretty gardens; fields and villages stretch along the river for four miles from Khāf, of which latter the largest were Nāṣirābād with 300 houses and Salama and Sangun with 400 houses. Sangun must correspond to the Sandjān of Yāḳūt; Salama may be the modern form of al-Muḳaddasī's Sᵉlūmak and would have been the capital of the district in older times. According to Yāḳūt, Khardjird lay near Būshendj and must therefore have been in the eastern part of the district of Khāf, where in modern times there is no longer any settlement except the fort of Kalaï Nādir. The total number of villages in the district of Khāf was given by Bunge as 26.

KHAFĀDJA, a subdivision of the Hawāzin tribe of 'Uḳail which remained as powerful Bedouins longer than most of the other tribes which inhabited the Arabian peninsula at the dawn of Islām. The genealogists give their affiliation to their kindred clans as Khafādja b. 'Amr b. 'Uḳail, and they were subdivided into eleven branches: Mu'āwiya Dhu 'l-Karḥ, Ka'b Dhu 'l-Nawaira, al-Akra', Ka'b al-Aṣghar, 'Āmir, Mālik, al-Haitham, al-Wāzi', 'Amr, Ḥazn and Khālid. They had their territory in the time before Islām to the south-east of al-Madīna and owned one or two villages, among which Sarw Luba and Sharā'-in are mentioned. A hundred years later we find them mentioned much further east and at war with the tribe Ḥanīfa in the Yamāma (*Agh.*, vii. 122). Probably the Ḳarmaṭian movement in the Yamāma in the early part of the fourth century of the Hidjra caused them to move farther north towards the borders of the 'Irāḳ. Here we find them towards the end of the fourth century established as masters of al-Kūfa under their amīr Thumāl and his sons. They may have been at first allies of their cousins the Banū Yazīd (not Bozid as in Wüstenfeld's *Tabellen*, or Yazīd as otherwise stated) who established themselves as rulers of al-Mawṣil and the surrounding country. They were rather in opposition to them. In the year 391 (1000) Ḳarwāsh attacked them in al-Kūfa and they were compelled to leave the country and move along the Euphrates towards Syria, where they remained only till the following year, when the 'Abbāsid general Abū Dja'far al-Ḥadjdjādj called them to his aid when the 'Uḳailis besieged al-Madā'in. This brought them again back to their ancient dwelling-places and as the Baghdād government had probably supplied them with arms they utilised these a few years later, in 402 (1011), in an attack upon the caravan of pilgrims. They had seized the wells at Wāḳiṣa to the south-west of al-Kūfa a short distance into the desert, and prevented the pilgrims from approaching to the water and then fell upon them, slaughtering and plundering, making many of the survivors prisoners. Emboldened by this success they demanded the lands to the right of the Euphrates which had been in the hands of the 'Uḳailis, and marched under the command of Sulṭān, 'Ulwān and Radjab, sons of Thumāl to al-Anbār, laying the whole neighbourhood waste and besieging the town. An army sent against them from Baghdād and supported by the 'Uḳailis drove them out and Sulṭān was actually captured, but released upon the intercession of Abu 'l-Ḥasan ibn Mazyad al-Asadī. No sooner had he been released than in the following year 403, news was received at Baghdād that they were plundering the country round al-Kūfa under Sulṭān. An army was sent against them which was aided by Abu 'l-Ḥasan ibn Mazyad and they were surprised at the river al-Rummān. Sulṭān escaped but his brother Muḥammad was made a prisoner, but this defeat had the result that many of the pilgrims who had been captured in the year 403 were liberated and reached Baghdād, where they had been believed to have been killed. Meanwhile the 'Uḳailī Amīr Ḳarwāsh had been captured and released and he now tried to make common cause with the Khafādja, trying to join Sulṭān ibn Thumāl, but after they had joined they were attacked by troops sent from Baghdād and routed. They both asked for pardon which, strangely, was readily granted. This gave a few years of comparative peace but in 417 (1026) Dubais b. 'Alī b. Mazyad al-Asadī and Abu 'l-Fityān Manī' b. Ḥassān, now chief of the Khafādja, made a plundering expedition against the lands which belonged to Ḳarwāsh in the Sawād [q. v.], assisted by troops from Baghdād, and they encountered him near al-Kūfa of which he had made himself master. Karwāsh fled towards the North and was pursued by the combined tribes of Asad and Khafādja, who actually took possession of al-Anbār, but after this success the two tribes dispersed again to the pasturing quarters. Manī' b. Ḥassān then marched, with his followers to al-Djāmi'ain a place between Baghdād and al-Kūfa, which belonged to Dubais b. Ṣadaḳa b. Mazyad and plundered the land round it; when pursued by Dubais they turned North and attacked al-Anbār. The inhabitants defended themselves for a while but

as the town was not protected by walls the Khafādja entered plundering and burning. When they learned that Ḳarwāsh was coming to drive them out assisted by troops from Baghdād they left the town, but soon returned and looted the town for the second time. When finally Ḳarwāsh was able to drive them out he spent the winter in the town and instructed walls to be built to protect the town from further surprise attacks. Now Manī' swore allegiance to the Būyid ruler Abū Kālīdjār and marched south to al-Kūfa where he had the *Khuṭba* said in the name of Abū Kālīdjār, for which he received jurisdiction over the waters of the Euphrates. This had the result that in 420 Dubais severed his allegiance to Abū Kālīdjār as he was afraid of the depredations of the Khafādja. In the following years the Khafādja held sometimes with one party and again with another and when in 425 (1033) Dubais had a quarrel with his brother Thābit they sided with the former but quarrels also arose among the Khafādja chiefs during which 'Alī b. Thumāl was killed and his nephew al-Ḥasan b. Abi 'l-Barakāt became chief of the tribe. When in 428 (1036) the ḥādjib Bāris Tughān rebelled in Baghdād, the general of the Caliph, al-Basāsīrī employed among others the tribe of Khafādja to quell the revolt, as a result of which Bāris Tughān was executed. We do not hear much about the Khafādja for some years, but in 446 (1054) they again made an inroad upon al-Djāmi'ain, belonging to Dubais, which they plundered; al-Basāsīrī came to his assistance and the Khafādja retreated into the desert. They were pursued and their stronghold Khaffān was besieged and raised to the ground, except the citadel which was a strong building of cement. When al-Basāsīrī rebelled against the Caliph in the same year he took al-Anbār after a prolonged siege and we find that among the prisoners he took there were 100 men of the tribe of Khafādja. Again followed a period of comparative peace, but when in 485 (1092) the pilgrims from Baghdād had passed al-Kūfa they were attacked by the Khafādja. The news having been received at Baghdād, troops were sent who caused great slaughter among them and this was the cause that in future they were no longer powerful enough to do serious damage. A few years later, in 499 (1105) the Khafādja came into conflict with the Ṭaiyi' tribe 'Ubāda over some stolen camels and while the latter could muster about 500 warriors, the Khafādja were unable to place a similar number into the field, but they were assisted by Ṣadaḳa b. Manṣūr [q.v.], the chief of Asad, and were victorous. This success was however of short duration as in the following year the tribe of 'Ubāda, now assisted by Badrān, son of Ṣadaḳa, utterly routed Khafādja who were compelled to forsake their pasture grounds and wander north towards Syria, while 'Ubāda in future occupied the lands adjoining the Sawād. Again in 536 we hear of Khafādja making an inroad into the 'Irāḳ, but the troops sent against them easily drove them off, killing large numbers. How weak the Khafādja had become is evident from the fact that in 556 (1161) they assembled in the neighbourhood of al-Ḥilla and al-Kūfa, asking for the relief-food and dates which had apparently been granted them. The governors of the two towns refused to grant their request and Ḳaiṣar, the governor of al-Ḥilla sent 250 soldiers to drive them off, a similar corps being sent by the governor of al-Kūfa. They pursued the fleeing Khafādja along the river Euphrates as far as Raḥbat al-Shām where the Khafādja made a stand as they could not retreat any farther and in the fight which ensued Ḳaiṣar, the governor of al-Ḥilla, was slain while Arghash, the governor of al-Kūfa, took refuge with the governor of Raḥba. Khafādja then pleaded for forgiveness stating that they were constrained to fight by being driven to extremes. Their excuse was accepted as the wazīr Ibn Hubaira who had marched out against them saw the futility of pursuing them into the desert. The last time we hear of the Khafādja is in the year 588 (1192) when they came to the assistance of the town of al-Baṣra when the latter was threatened by the tribe of 'Āmir. In addition to the events narrated we find that Khafādja were among the Arab tribes who assisted in the siege of Tiberias in 507 (1113) when Baldwin had taken refuge there after an unsuccessful raid upon Ḥalab.

According to al-Ḳalḳashandī a branch of the tribe of Khafādja was settled in lower Egypt. Among the poets of this tribe in ancient time was Tawba b. al-Ḥumaiyir, celebrated on account of his love for Lailā al-Akhyaliya and the elegies which the latter composed upon his death when he was killed in a raid.

(F. Krenkow)

AL-KHAFĀDJĪ, Aḥmad b. Muḥammad b. 'Umar al-Khafādjī, called Shihāb al-Dīn al-Miṣrī al-Ḥanafī, was born near Cairo about the year 979/1571 and received his earliest education from an uncle on his mother's side, Abū Bakr al-Shanawānī, whom he calls himself the Sībawaih of his age, and under him he studied both Ḥanafī and Shāfi'ī law; the biography of the Prophet entitled *al-Shifā'* by the Ḳāḍī 'Iyāḍ [q.v.] he read under Ibrāhīm al-'Alḳamī and he even studied medicine under Dā'ūd al-Baṣīr. Later he made the pilgrimage in the company of his father and took the opportunity to hear the lectures of the learned men in the two holy cities. After his return from the pilgrimage he made his first journey to Constantinople, where he found several teachers of outstanding merit, among whom he mentions Ibn 'Abd al-Ghanī, Muṣṭafā ibn 'Arabī and the Jewish Rabbi Dā'ūd under whom he studied mathematics and the books of Euclid. His principal master, however, was Sa'd al-Dīn b. Ḥasan, and when the latter died and his other teacher soon followed him in death, Constantinople became devoid of men of learning. He had meanwhile gained favour and received the post of Ḳāḍī of the province of Rūmeli and rising in rank he became Ḳāḍī of Usküb under Sulṭān Murād, who finally appointed him to the same office in Salonika. These offices enriched him considerably and he was ultimately sent as Ḳāḍī 'Asker to Egypt. This post, however, he did not hold for long as through intrigues at Constantinople he was dismissed. This decided him to make another journey to Constantinople and on travelling there he passed through Damascus and Ḥalab, in

both of which cities he was entertained by the men of learning. His expectations in Constantinople were not fulfilled and he gave vent to his anger in the literary outburst which he entitled *al-Maḳāmāt al-Rūmiya*. Instead of making matters easier for himself he incurred the hatred of the Muftī Yaḥyā b. Zakāriyā and was ordered to leave the city immediately. As an acknowledgment of his worth as a scholar he received the appointment of an ordinary Ḳāḍī at Cairo, but he seems to have devoted his remaining years to study and the composition of his works. He died in Cairo on Tuesday the 12th of Ramaḍān 1069 (3 June 1659). Al-Khafādjī enumerates most of his works in his autobiography, many of them of considerable size, while he himself tells us that many of his treatises were never collected in book-form. His most extensive work is a commentary upon the *Tafsīr* of al-Baiḍāwī which he entitled *ʿInāyat al-Ḳāḍī*, and which has been printed in Cairo in four large volumes. The work follows the usual tedious method of explaining almost every word, and for traditions and explanations he adduces the statements of a large number of other authors who have treated upon the same subject. The same is the case with his second largest work, a commentary upon the *Shifāʾ* of the Ḳāḍī ʿIyāḍ, entitled *Nasīm al-Riyāḍ*, which we have seen, he studied under Ibrāhīm al-ʿAlḳamī. Here again he quotes all accessible literature dealing with the biography of the Prophet, giving the various authorities who have recorded the same traditions. Neither of these works contain anything original, because the subject did not call for anything new. All that was required of the author was to bring together every detail on his subject he could find in the works on hand. This work has also been printed in Constantinople 1267 A.H. in four volumes. Of an entirely different nature are his two biographical works: *Khabāyā ʾl-Zawāyā fī mā fī ʾl-Ridjāl min al-Baḳāyā* and *Raiḥānat al-Alibbā wa-Nuzhat al-Ḥayāt al-Dunyā*. The titles prepare us for the style in which these two books are composed, the evil influence of the *Yatīma* of Thaʿālibī and the *Kharīda* of ʿImād al-Dīn is in both works apparent; we get instead of biographies an exuberance of verbosity without any noteworthy information and in most cases we can only infer that the persons named lived during, or shortly before, the time of the author, but the arrangement according to countries gives us the information where the persons lived. For biographical details both works are useless. We get however a fair amount of contemporary poetry to enable us to judge to what miserable depth the art of rhyming had sunk. While the first named work exists only in manuscript, the *Raiḥāna* has been printed three times in Cairo (1273, 1294 and 1306), which shows us that the work is appreciated in Egypt. The most valuable portion of this work is an autobiography of the author (in which he has omitted to state when and where he was born) and the *Maḳāmāt al-Rūmiya* which is directed against the learned men of Constantinople. The autobiography has furnished the material for the account of his life above and in the work of al-Muḥibbī. Of more value are his *Ṭirāz al-Madjālis* and his *Shifāʾ al-ʿAlīl*. The former is a work of the class called *amālī* in 50 sessions (*madjālis*), and he tells us in the introduction that Ibn al-Shadjarī, Ibn al-Ḥādjib, al-Ḳālī or even Thaʿlab would acknowledge its excellence if they were able to see the book. Its value consists in having preserved extracts of older works now apparently lost or undiscovered. It is interesting to find him quote from the *Kitāb al-Maʿānī* of al-Ushnāndānī (printed in Damascus 1340), the *Milal* of Ibn Ḥazm, the *Fihrist* of Ibn Nadīm or the *Ansāb* of al-Zubair Ibn Bakkār, considering how rare manuscripts of these books are. The book is in fact a curious collection of odd information from all kinds of sources. Apparently there are two editions of this book, one Cairo 1284 and a second without date printed in Tunis. The *Shifāʾ al-ʿAlīl fī mā fī Kalām al-ʿArab min al-Dakhīl* is, as indicated by the title, a work dealing with words of foreign origin in the Arabic language. The author has used for this purpose the *Muʿarrab* of al-Djawālīḳī [q.v.] and similar works, but is not content with explaining, or simply mentioning, words of foreign origin, as he also gives ample specimens of vulgar errors in correct Arabic speech. Closely resembling this book is a commentary on the *Durrat al-Ghawwāṣ* of al-Ḥarīrī, which has been printed together with the *Durra* at Constantinople, in 1299. In this work he not seldom corrects al-Ḥarīrī and frequently gives useful additional information and this work together with his *Ṭirāz* are probably the best of his compositions. His *Dīwān* is mentioned by al-Muḥibbī and has actually been preserved in manuscript in Copenhagen, but my knowledge of his poetry is confined to what al-Muḥibbī quotes or he himself cites in his own work. It is not of a high standard, but his whole works are typical of his period and vividly reflect what we may expect from his contemporaries.

Bibliography: al-Muḥibbī, *Khulāṣat al-Athar*, i. 331—343; Brockelmann, *G.A.L.*, ii. 285.

(F. KRENKOW)

KHWĀFĪ KHĀN (MUḤAMMAD HĀSHIM NIẒĀM AL-MULKĪ), historian; his title of Khwāfī Khān was given him by Muḥammad Shāh and is derived from a family connection with Khwāf, a district of eastern Persia, famous for its distinguished men. He was a son of Khwādja Mīr a confidential servant of Murād Bakhsh, youngest son of Shāh Djahān. The place and date of his birth are not known, but it seems probable that he was born in India, and a statement in his history (i. 739) implies that his birth took place about 1664. The statement is that 74 years after the death of Shāh Djahān's minister, Saʿd Allāh, he was 52 plus the age of discretion (14?). In other words he was 66 Muḥammadan years old in 1728 (1066 + 74 = 1140 A. H.). His father was Khwādja Mīr, a confidential servant of Shāh Djahān's youngest son, Murād Bakhsh, and was severely wounded at the battle Samūgarh. Khwāfī Khān possibly, like Bernier's friend Dānishmand, began life as a merchant, or as an official's clerk, and it was in one of these capacities that he visited Bombay in 1693—94 and had an interview with an English official (ii. 424, and Elliot-Dowson, vii. 350). He served under Awrangzēb, Bahādur Shāh and Muḥammad Shāh in the Deccan and in Gudjarāt, and was long stationed at Surat. He also lived at Aḥmadābād, which he defends against the strictures of Djahāngīr, and at Rahīrī, in Sīwādjī's country, and in the beginning of Bahādur Shāh's reign he was governor of Čampānīr (i. 77). Probably he ended his days at Ḥaidarābād in the service of Āṣaf Djāh Niẓām al-Mulk (hence our author's title of

Niẓām al-Mulki) about 1732—33. He was an intimate friend of Shāh Nawāz, the author of *Ma'āthir al-Umarā'* (who was also a Ḥaidarābādī officer) (v. iii. 680 of the Bibl. Ind. ed. of that work, and Khwāfī Khān, ii. 678).

Khwāfī Khān wrote a history of the Indian branch of Tīmūrid dynasties, and called it *Muntakhab al-Lubāb* (the Choice Compendium). It is a standard work and is much admired, especially by Orientals, for its style, and its accuracy and impartiality, though it is often too grandiloquent for western taste. Still, it is by far the most human and interesting of native histories of India, with the doubtful exception of Badā'ūnī, and ought to have been translated long ago. After an introduction beginning with Turk b. Yaphet, and describing the origins, etc., of the Tartars and Mongols, it gives short biographies of Tīmūr, his third son, Mīrān Shāh, and the descendants of the latter, who were the emperor Bābur's ancestors. These are followed by a history of the emperors of Āgra and Dihlī, beginning with Bābur, of whom there is a tolerably full account, and ending with the beginning of the 14th year of Muḥammad Shāh. Bābur conquered India in 1526, and the 14th year of Muḥammad Shāh was 1732, so that the history covers a period of over 200 years. The last ten years of the history are given in a very abridged form. The most valuable parts of the work are the accounts of Shāh Djahān and Awrangzēb, for both of whom the author had a high admiration. The history has been published in the *Bibliotheca Indica* (2 vols), but the edition is not complete, for it wants the first part or volume. This last, however, is very rare, and perhaps does not exist in its entirety. There is only a portion of it in the British Museum. The author refers to it in vol. i. p. 49 of the printed edition. Khwāfī Khān also wrote a history of the minor Muhammadan dynasties of India, but this too has disappeared, though a small portion is preserved in MS. in the India Office Library (Ethé, *Cat.*, No. 407). It was apparently of little value, being mainly an abridgment of Farishta.

The charm of Khwāfī Khān's history consists in his digressions and his frequent use of his own observations, and of information derived from his father and brother. He is a somewhat bigoted Muḥammadan, and he is too favourable to Shāh Djahān and Awrangzēb. Thus he slurs over Awrangzēb's treacherous capture and subsequent execution of his younger brother, Murād Bakhsh. The capture he represents as a clever manoeuvre (it certainly was to the public advantage), but he is evidently half-ashamed of it, for he declines to give the particulars. In his account of Murād Bakhsh's attempt at escape, and his trial and execution, which he got from his father, he does not plainly set down Awrangzēb's responsibility, and continues to pay him a compliment for his generosity in rewarding the man who declined to prosecute Murād for the murder of his father. He also deals lightly with Shāh Djahān's conduct to Khusraw, and to his competitors for the throne, and says nothing about his debaucheries. Still he is far more honest than Abu 'l-Faḍl. His accounts of Shēr Shāh and Djahāngīr are very fair, and in the latter of them he has a very interesting account of Nūr Djahān. He says he got it at Sūrat in 1695—96 from a very old man, who as a child had accompanied Nūr Djahān's father on his journey from Persia to Afghānistān and India. Khwāfī Khān too, though, like Tacitus, he may tell us too much about emperors and their wars, does not omit the more interesting subject of plague, and famine, and of internal administration.

Bibliography: Elliot-Dowson, *History of India*, vii. (which contains a very full abstract, by Prof. Dowson, of the 2nd volume of Khwāfī Khān); Colonel Lees, *Materials for the History of India* (Hertford 1868), p. 57 *sq.*; there is a manuscript translation of vol. i. by Major Gordon in the British Museum (Add. 26, 617).

All the feet lose their second quiescent letter when the last quiescent letter of the preceding foot is retained and vice versa. The foot *fā'ilātun* used as first *ḍarb* is often changed to *fālātun* (= *maf'ūlun*) by *tashʿīth*. (MOH. BEN CHENEB)

KHAIBAR, an oasis on the road from al-Medina to Syria, 100 miles from al-Medina. Doughty, who stayed in Khaibar from November, 1877, to March, 1878, describes Khaibar as a group of wide, well-watered valleys, which lie together like a palm leaf on the edge of the lava region (Ḥarra) and all run into one main valley. These valleys are gashes in the lava-field, beneath which lies sandstone which, wherever it crops out, has a burned and discoloured appearance. The oasis lies 2,800 feet above sea level and Doughty puts its population at about 1,000 souls. The bottoms of the valleys are covered with rushes, the springs have a slightly sulphurous taste and are surrounded by incrustations of salt. In spite of its many palm trees, the land has an uninviting aspect and great stretches of ground lie untilled. The commanding height of al-Ḥiṣn, illustrated by Doughty on p. 104, consists of a great basalt rock, which rises out of the Wādī Zaidiya, like an erratic block. The modern settlement is built on its south side. The length of the walled platform of the citadel is 200 paces and the breadth 90. The floor is deep mould, which may be partly of the old clay buildings that have melted away upon the uneven rock. In digging, potsherds, broken glass, eggshells and horse-dung are brought to light. Two ancient pyramids of clay bricks, the lower parts of which are cased with stone, enclose an ancient covered well, which was used to supply the garrison.

The name Khaibar is said by Yāḳūt to have meant "castle" in the language of the Jews who lived there; according to Salīl b. Muḥammad al-Kātib, it took its name from Khaibar b. Kāniya b. Mahlā'īl, who was the first to settle there. The ancient Khaibar, according to the old Arab geographers, lay in a very fertile district which was rich in palms and luxurious cornfields, and consisted of seven castles: Ḥiṣn Nā'im, Ḥiṣn Abī 'l-Ḥuḳaiḳ, Ḥiṣn al-Shiḳḳ, Ḥiṣn al-Naṭāh, Ḥiṣn al-Sulālim, Ḥiṣn Waṭīḥ and Ḥiṣn al-Katība. Al-Bakrī further mentions Ḥiṣn Wādjida, in which there were palms and other trees and which later belonged to the Prophet Muḥammad, and the greatest stronghold

of Khaibar, Ḥiṣn al-Ḳamūṣ, which ʿAlī b. Abī Ṭālib, afterwards Caliph, captured, the lower part of which was occupied by the mosque of the Prophet (also called al-Manzila), built after the conquest by ʿĪsā b. Mūsā. The spring in the fort of al-Shiḳḳ was called al-Ḥamma. The Prophet called it *Ḳismat al-Malāʾika* ("the angels' share"). It was much admired for the remarkable properties of its water. Two-thirds of its water flowed away in one channel and the other third in another. Both had the same direction. If three pieces of wood or three dates were thrown into the well, two went into the channel containing two-thirds and one into the other. No one could take more than a third of the spring water out of this channel and if anyone stood in the channel which took two-thirds in order to send more water into the smaller channel, the water overwhelmed him and flowed past him so that none went back into the second channel to increase its share.

The oldest mention of Khaibar in inscriptions is in the bilingual inscription of 568 A.D. of Ḥarrān in al-Ledja, of which E. Littmann has given the correct interpretation in *Osservazioni sulle iscrizioni di Ḥarrān e di Zebed*, in *R.S.O.*, 1911/12, iv. 193 *sqq.* The inscription bears the date "in the year 463 [viz. of the era of Boṣra], a year after the expedition of Khaibar". According to Ibn Ḳutaiba, *Kitāb al-Maʿārif*, ed. Wüstenfeld, p. 313, this expedition took place under King al-Ḥārith b. Abī Shamir (al-Ḥārith b. Djabala), who reigned from 528 to 569/570 A.D.; the inscription now gives as the exact date for this event the year 567 A.D. Much more serious for the history of Khaibar and its Jewish population was Muḥammad's campaign; he set out in the beginning of the year 7 A.H. (628 A.D.) with about 1600 men against Khaibar, presumably with the object of obliterating the unfavourable impression made by the treaty of Ḥudaibiya and of offering his followers a rich substitute for the booty they had lost. The Jews of Khaibar had apparently prepared for Muḥammad's attack, but they were not united among themselves. The population was not a solid body living together within one area, but was scattered among the surrounding valleys, where they occupied in little groups fortified houses in the midst of rich palm groves and cornfields. Every settlement had its own particular name. The valley was divided into three territories, called al-Naṭāh, al-Shiḳḳ and al-Katība. This strategically unfavourable mode of settlement was from the first a disadvantage, and the position of the Khaibarīs became still more precarious when their allies, the Ghaṭafān, left them in the lurch, and their 4,000 auxiliaries left Khaibar for their homes. Muḥammad thus had a free hand. The advance was carried out by night and in the morning the Khaibarīs found the Muslim troops confronting them; they had taken up their quarters behind the Ḥarra on the edge of the desert. It took Muḥammad about six weeks to conquer the whole district of Khaibar. Every strong house, every fortified place had to be besieged and stormed, frequently after heavy fighting. The castle of al-Naṭāh was the first to be attacked; it resisted for over a week. In revenge for the stubborn defence, Muḥammad had the splendid palm-trees around it cut down. 400 were destroyed before the politic Abū Bakr put a stop to further devastation. Al-Shiḳḳ was next stormed. The successes of the Muslims had already much weakened the strength of the defence. Treachery had placed al-Naṭāh in the hands of the Prophet, and as engines of war had also been captured, in the use of which a Jewish traitor instructed the Muslims, the resistance of the Jews diminished considerably so that the other strongholds fell more quickly. The last bulwark of the defence, al-Katība, fell almost without resistance. The Jews were sentenced to lose all their property and were left with their wives and children and allowed to till the soil which they had previously owned. Half of the harvest had to be handed over to Muḥammad. This tribute continued to be paid until the Caliph ʿUmar b. al-Khaṭṭāb drove the Jews out of Arabia. Later, however, the Jews returned in certain numbers to Khaibar. Benjamin of Tudela says that in 1173 A.D. a Jewish colony, 1150 strong, which must have formed a closed community, lived in Khaibar. Not too much stress need be laid on his statement. Burckhardt, who saw Khaibar at the beginning of the xixth century, mentions that the Jewish community once settled here had entirely disappeared.

(ADOLF GROHMANN)

KHAIBAR PASS, the northern route between Afghānistān and India, leading from Kābul to Peshāwar. The pass runs from Dakka to Djamrūd and is about thirty-three miles long, its centre lying in 34° 6′ N. and 71° 5′ E. Its highest point, Landī Kotal, is 3,378 feet above sea-level.

Alexander the Great probably sent the division of his army under Hephaestion and Perdiccas through the Khaibar, while he himself followed the northern bank of the Kābul river and crossed the Kūnar valley into Badjawr and Sawād. Maḥmūd of Ghazna used the pass only once, when he marched to meet Djaipāl in the Peshāwar valley. The Amīr Tīmūr used it when invading India in 1398 and when retiring in 1399.

Bābur invaded India by the pass in 1525 and Humāyūn, after capturing Kābul, on his return from exile, traversed it. It was the route regularly used by Akbar and his successors between the Pandjāb and Kābul, and Djalālābād, first fortified by Humāyūn, was named after Akbar. The pass was held in Mughal times, as now, by the Afrīdīs, a turbulent tribe extremely jealous of foreign encroachment, and in the reign of Akbar their hostility was accentuated by the establishment in this region of a heretical and fanatical sect, the Rawshaniyas [q.v.], who commanded the adherence of the Afrīdīs, Yūsufzais, and other tribes. In 1586, on the death of Mīrzā Muḥammad Amīn, ruler of Kābul and younger brother of Akbar, Rādjā Mān Singh, marching to take possession of Kābul in the name of the emperor, was obliged to force the pass, an operation which was performed with

difficulty, and the suppression of the Rawshaniyas cost much blood and treasure. In 1672 the tribes attacked Muhammad Amīn Khān Awrangzīb, governor of Kābul, in the pass, annihilated his army of 40,000 men and captured the women and children and the imperial treasure and elephants.

Nādir Shāh, advancing by it to attack Nāṣir Khān *ṣūbadār* of Kābul under the Mughal government, was opposed by the tribesmen, but led his cavalry through Bārār, took Nāṣir Khān by surprise, and overthrew him near Djamrūd. Aḥmad Shāh Durrānī and Shāh Zamān used the pass on several occasions when invading the Pandjāb.

The British first used the Khaibar Pass in 1839 in the attempt to establish Shāh Shudjā' in Afghānistān, and have since used it on several occasions, more than once suffering disasters in traversing it.

By the treaty of Gandamak (1879) between the British and the Amīr Ya'kūb Khān, the control of the pass was left to the former, who have exercised it latterly by maintaining an experienced political officer for the pass, at whose disposal are the Khaibar Rifles, a corps of militia composed of Afrīdīs under British officers. The arrangement has not been entirely satisfactory, but was probably the best that could be made with so turbulent and treacherous a tribe.

KHAIR AL-DĪN, an important Turkish architect of the time of Sulṭān Walī Bāyazīd II (1481—1512). As a result of the habit of Turkish historians of mentioning favourably every pious founder, writer of chronograms, and calligrapher, but only exceptionally giving the name of the creator of a masterpiece of architecture, or even giving any biographical notice of him, Khair al-Dīn's activities are veiled in obscurity. It is certain, however, that he is a historical personality. He is said to have been the son of the architect Ustād Murād. His masterpiece is the Bāyazīd Mosque, a vigorous piece of architecture, in Constantinople (built between 1501 and 1507) (on which see Ewliyā, *Siyāḥat-nāma*, Stambul 1314, i. 142; Sa'd al-Dīn, *Tādj al-Tawārīkh*, Stambul 1279, ii. 211; von Hammer, *Constantinopolis und der Bosporos*, Pest 1822, i. 402; Skarlatos Byzantios, *Konstantinupolis*, Athens 1890, i. 421).

The popular Turkish view of the importance of Khair al-Dīn, who is considered the real founder of Ottoman architecture and is approached by none of his predecessors (Elyās b. 'Alī, Meḥmed al-Madjnūn, Mūsā, etc.) or his successors (M. Ḳāsim, Kamāl al-Dīn) down to Sinān [q. v.], the greatest of Ottoman architects and one of the greatest of the world's architects, is confirmed by his masterpiece, the Bāyazīd Mosque.

The scheme of two half-domes supporting the principal dome is modelled, it is true, on the Aya Sofia, but dominated by another conception and deliberately developed further. Pious legends are associated with the building.

There is also a little mosque by him which bears his name, not far from the *türbe* of the Grand Vizier Sinān Pasha at Parmaḳ Ḳapusu. His tomb is in front of this *türbe*.

(TH. MENZEL)

KHAIR AL-DĪN (BARBAROSSA), the famous Turkish corsair and Beylerbey of Algiers and brother of 'Arūdj [q. v.]. In spite of the statement to the contrary by Haëdo, it is he who is referred to by the epithet Barberousse (Barbarossa, Aenobarbus) in the diplomatic correspondence of the French court. Born at Metellin about 888 (1483) he was at first a pirate under the command of his brother and acquired a great reputation for skill and bravery. When 'Arūdj set out on his expedition against Tlemcen he gave his brother the governorship of Algiers, which he had just taken. When the news of the death of 'Arūdj arrived, Khair al-Dīn was unanimously chosen by his companions to succeed him. But he soon found himself in a very critical position. The towns of Cherchell and Tenès had rebelled; the Kabyls of Ibn al-Ḳāḍī, king of Kūko, deserted him; Abū Ḥammū, king of Tlemcen, had invaded the Chelif valley; finally the Algerians, tired of the cruelty of the Turks, were only waiting an opportunity to throw off the yoke. Thus feeling unable to cope with all his opponents with the forces at his command, Barbarossa sought the help of Selīm, Sulṭān of Constantinople. He paid homage to him for the lands conquered by his brother and promised to pay him tribute. The Sulṭān, who had just conquered Egypt (1517), eagerly seized this opportunity of placing the shores of the Western Mediterranean under his sway. He accepted the homage of Khair al-Dīn and gave him the ranks of Pasha and Beylerbey (cf. the article BEG). At the same time he sent 2,000 men with artillery to Algiers and authorised the enrolment of volunteers, to whom he granted the rights and privileges of the Janissaries [q. v.]. 4,000 Turks or Levantines thus came to serve under Barbarossa and formed the *odjaḳ* or militia of Algiers.

The arrival of these reinforcements enabled Khair al-Dīn to meet the dangers which threatened him. A conspiracy of the Algerians who had agreed with the tribesmen to set fire to the fort and massacre the Turks was put down and the heads of the ringleaders fixed on the gates of the Pasha's palace. A Spanish force under Ugo de Moncade was repulsed. The Christians landing at the mouth of the Harrash (al-Ḥarrāsh) had taken up their position on the heights of Kudyat al-Ṣābūn and began to bombard the town. Barbarossa succeeded in drawing them out of their entrenchments by attacking their ships drawn up on the shore and forced them to re-embark (1519). In the east, on the other hand, he was less fortunate. A Tunisian

army was advancing on Algiers. He set out against that and met the enemy in Kabylia on the territory of the Flissat Umelil. In the middle of the battle, the Sulṭān of Kūko, secretly won over by the Ḥafṣid Sulṭān, deserted and turned against the Turks. The latter were cut to pieces and Barbarossa, with his road to Algiers barred, had to take refuge in Djidjelli [q. v.]. During this time the Kabyls laid waste Mitidja and occupied Algiers, while Cherchell and Tenès again revolted (1520).

Taking refuge in Djidjelli, Khair al-Dīn began to reconstitute his army and to gather reinforcements. He resumed his old trade of pirate and from 1520 to 1525 he ravaged the coasts of the western Mediterranean, amassing considerable booty and gathering numerous adventurers around him. He was soon strong enough to seize Collo (1521), Bône (1522) and Constantine. He also secured the help of the natives of Little Kabylia by making an alliance with 'Abd al-'Azīz, chief of the Banū 'Abbās, rival of the Sulṭān of Kūko. Thus he was able in 1525 to resume the offensive against Ibn al-Ḳāḍī. Defeated at the Wādī Bugdūra and again at the pass of the Banū 'Āisha, the latter was killed by his own soldiers. Mitidja and Algiers were reoccupied by the Turks, the rebel chiefs of Tenès and Cherchell were put to death and the inhabitants of Constantine, who had in 1527 expelled their ḳā'id and massacred the Turkish garrison, severely punished. Finally, Ḥusain, who had succeeded Ibn al-Ḳāḍī, tendered his submission and agreed to pay an annual tribute (1528).

The capture of Peñon, a Spanish stronghold built on an islet within cannon-shot of Algiers, completed the restoration of Turkish power. In the beginning of May, 1529, Barbarossa began the bombardment of this fortress, the garrison of which the Spaniards had neglected to strengthen; it was taken by storm on May 27 when there were only 25 unwounded defenders left. Khair al-Dīn had the governor, Don Martin de Vargas, put to death and ordered the outer walls of Peñon to be razed to the ground. The debris were used to build a mole joining the island to the mainland. This jetty protected the roadstead from the west winds and enabled the corsairs to leave their ships in shelter which they had previously been obliged to draw up on shore during bad weather. This created the harbour of Algiers, a refuge and base for operations for the Barbary fleets. Disturbed by this new success of Khair al-Dīn, the Spaniards tried to secure a landing place on the coast by taking Cherchell, but the expedition led against this town by Andreas Doria ended in failure (1531).

Now definitely installed in Algiers, Barbarossa set himself to increase still further his military forces by organising, alongside of the Janissaries, whose insolence and insubordination rendered them dangerous, bodies of troops personally devoted to him. He formed a guard of 500 renegades, for the most part Spaniards, raised 7,000 to 8,000 Greeks and Albanians, enrolled Kabyls, and entrusted the command of this new force and of his artillery to *ra'īs*, his old companions. He thus found himself able to undertake an expedition against Tunis, with the inhabitants of which he had long had secret negotiations. By taking this town he wished to anticipate the designs of the Spaniards and secure himself the control of all the eastern shore of Africa. The Sulṭān, to whom he had communicated his plans, gave him the required authorisation and sent him auxiliaries. Leaving the government of Algiers to his *khalīfa*, Ḥasan Agha, Barbarossa entered Tunisia, seized La Goulette (Aug. 16, 1534) and from there advanced on Tunis. Mūlāy Ḥasan, who tried to stop him, was defeated in a battle fought near the gate of al-Djazīra, and had to flee (Aug. 18). The Turks entered Tunis and plundered the town. The rest of the kingdom submitted without resistance.

Barbarossa's success was, however, of short duration. In the month of June, 1535, Charles V appeared on the coast of Tunis. On July 14th the Spaniards captured La Goulette and on the 20th became masters of Tunis. The Christian slaves, whom Khair al-Dīn had refused to massacre, burst their chains and joined the attackers. Fearing he might be surrounded by the enemy, the Beylerbey fell back on Bône, where he found his fleet, which he had sent there on receiving news of the preparation of the Spanish expedition. From there he sailed for the Balearic Islands, sacked Mahon and brought back to Algiers 6,000 captives and considerable booty.

A little later, Khair al-Dīn went to Constantinople by order of Sulṭān Sulaimān, who in 1533 had appointed him *Ḳapudan pasha* and wished to entrust him with the direction of the naval campaign against Charles V and his allies. He had not to return to Algiers, where authority was exercised in his name by a *khalīfa*. At Constantinople Barbarossa devoted himself entirely to his new office. He reorganised and increased the Turkish fleet and took an active part personally in the naval war. In 1537 he ravaged the coasts of Apulia, tried unsuccessfully to take Brindisi by surprise and took part in the siege of Corfu. Not having been able to capture the latter place, he turned his attention to the Venetian possessions in the Aegean Sea and occupied the islands of the Dodecanese. The following year he completed the conquest of the Archipelago by taking Sciatos, Scyros and Carpathos; he then made a descent on the island of Crete where he burned two towns and 80 villages. In the Ionian Sea he gained two victories over Andreas Doria, at Prevesa and St. Maura. In 1539, with the help of his lieutenants, Ḥasan Corso and Dragut, he recaptured Castelnuovo in the Gulf of Cattaro and Malvasia and Nauplia in the Morea. The Venetians were forced to submit to concluding a truce with the Porte.

These successes secured Barbarossa a position of preponderating influence in Constantinople. Honoured by the friendship of the Sulṭān, he persuaded Sulaimān to continue the war in the Western Mediterranean. He was also decidedly in favour of the French alliance. From 1534 he had been in correspondence with Francis I; after the conclusion of the treaty of Baghdād, he was the confidant of the ambassadors of the most "Christian King" and leader of the French party in the Grand Dīwān. Charles V endeavoured to win him over to his cause by secretly offering to recognise him as sovereign of the whole of North Africa on payment of a small tribute. Barbarossa, while pretending to lend himself to the Emperor's plans, at once revealed them to the Sulṭān. The disastrous end of Charles V's expedition to Algiers (1541) still further increased Khair al-Dīn's prestige, although he had taken no share at all in the defence of the town.

Hostilities, suspended since the truce of Nice (1538), began again between Francis I and Charles

V (1541). Barbarossa was given command of the Turkish fleet, which was to co-operate with the French forces. In 1543 he operated along the Italian coasts, took Reggio, ravaged the coasts of Calabria, then, after joining the Duc d'Enghien at Marseilles, laid siege to Nice. The town of Villefranche, where the Turks landed, was taken and destroyed. Nice was occupied but the castle could not be taken. The arrival of Doria's fleet and the Marquis del Vasto's army forced the Turks to withdraw. A portion of their fleet wintered at Toulon while the rest went along the Catalonian coast and sacked Palamos and Rosas. The peace of Crespy (1544) ending the war, Khair al-Dīn returned to the Levant, pillaging the islands and shores of Tuscany and the Kingdom of Naples.

After this campaign, Barbarossa retired to Constantinople. He had great wealth in this town, including several palaces on the Bosporus.

He died on July 4, 1546, at the age of 63, and was buried in the mosque which he had built at Büyük Dere (see the art. DERE). By his will he ordered all his slaves under 15 years old to be liberated and left the others, 800 in number, to the Sulṭān as well as 30 armed galleys. The rest of his wealth was divided between his nephew and his son Ḥasan, whose mother was a Moresco, and who on three different occasions filled the office of governor of Algiers (see the art. ḤASAN PASHA, above, ii. 281).

Barbarossa was not only a successful corsair and a remarkable soldier; he also possessed certain of the qualities of a statesman, an indomitable resolution which enabled him to surmount the greatest difficulties, and a very accurate sense of the conditions on which the establishment of a permanent state in Barbary depended. He understood that Turkish rule, being restricted to the coast, naturally tended to be precarious; he therefore tried to make himself master of the interior. His ambition was to unite in one vast state, of which he would be the sovereign, the whole of North Africa. If circumstances did not permit him to realise this plan, at least he finished the work begun by 'Arūdj, and he may be regarded as the real founder of the Regency of Algiers.

(G. YVER)

KHAIR AL-DĪN PASHA. [See ČENDERELI].

KHAIR AL-DĪN PASHA, a statesman of the time of 'Abd al-Ḥamīd II. He was of Circassian origin, but spent his early years in Tunis, where he rose to important offices as a result of his brilliant abilities. He ultimately became *bash mudīr*. His great aim was to achieve a closer relationship with Turkey, which was recognised in a firmān of Sulṭān 'Abd al-'Azīz. As a result of a quarrel with Ṣādiḳ Pasha, then Walī of Tunis, he left the Tunisian service and retired to Paris. In 1294 (1877) 'Abd al-Ḥamīd summoned him to Constantinople and appointed him president of the commission on financial reforms and later of the Council of State. In the difficult period after the loss of the Russo-Turkish war he was appointed Grand Vizier in 1295 (1878), the eighth in the short period 'Abd al-Ḥamīd had been reigning.

Khair al-Dīn was very liberal in his views and endeavoured to further the reform movement now beginning by introducing improvements, especially in the administration of justice, and tried to strengthen the Grand Vizier's power as much as possible in opposition to 'Abd al-Ḥamīd's wish to make the Grand Vizier a mere instrument for the execution of instructions given by the Yildiz Kiosk. He brought upon himself the opposition of the 'ulamā', who would only allow the Grand Vizier the right of presiding at the council of ministers. After only eight months of office he was dismissed. He died in Constantinople in 1307 (1889) at the age of nearly 70 and was buried in Aiyūb. He bore the reputation of being reliable, fearless, steadfast and liberal. He wrote an Arabic work entitled *Aḳwam al-Masālik fī Ma'rifat Aḥwāl al-Mamālik*, said to have also been translated into Turkish and French.

(TH. MENZEL)

KHAIRĀBĀD is a town in the District of Sītāpur, United Provinces, India. Population (1901), 13,774. It was formerly a place of importance, and is said to have been founded by one Khaira, a Pāsī, in the xith century. It is, however, more probable that the name was given by Muhammadans to an older town on the same site; and it has been identified with Masachhatra, an ancient holy place. A number of temples and mosques are situated here, some of them dating from the reign of Akbar, but none is of much

interest. It has been a municipality since 1869. Trade has suffered owing to the rise in importance of Sītāpūr, but there is a daily market, and a small industry in cotton printing survives.

At the time of Akbar the *Sarkar* of Khairābād consisted of 22 mahals or parganas, but many of these lay in the present districts of Kherī and Hardoi. This pargana consisted of the Southern portion of the country lying between the Gond and Zarayan rivers. It was bounded on the North by Hargram, on the east by Lahārpūr and Biswan, on the west by Sītāpūr and Ramkot, on the South-east by Machhrehta, and on the South-east by Pirnagar. The whole of the Southern half of the pargana is a high lying tract with a high soil and good natural drainage producing in favourable seasons fine crops of wheat. North of the road from Sītāpūr to Khairābād and from the latter to Biswan, the land lies low, the soil being stiffer and liable to flooding from numerous jhils and water-courses. However the cultivation is generally poor, the majority of the tenants belong to the inferior cultivating classes, the holdings are large, the cattle are wretched; many of the landlords are heavily in debt and means of irrigation are deficient.

(M. HIDAYET HOSAIN)

KHAIRPŪR, a state in Sind, laying between 26° 10′ and 27° 46′ N. and 68° 20′ and 70° 14′ E. The state has no separate history until the fall of the Kalhora dynasty of Sind in 1785, when Mīr Fatḥ ʿAlī Khān Tālpur, a Balūčī chief, established himself as ruler of Sind. Subsequently his nephew, Mīr Suhrāb Khān Tālpur founded the Khairpūr branch of the family. His dominions at first consisted of the town of Khairpūr and its environs, but he enlarged them by conquest and intrigue until they extended to Sabzalkot and Kashmor on the North, to the Djaisalmer desert on the East, and to the borders of Kačč̣h Gandāva on the West. About 1813, during the troubles attending the establishment of the Bārakzai dynasty in Kābul, the Mīrs withheld the tribute which they had hitherto paid to the rulers of Afghānistān and became virtually independent, but jealousy between Rustam, who had succeeded his father Suhrāb in 1811, and his brother ʿAlī Murād, contributed to the crisis which led to British intervention. In 1832 the individuality of the state as a political entity was recognised by the British government, which secured for itself the use of the Indus and the roads of Sind. The Mīrs of Sind were loth to permit the passage of British troops through their dominions during the first Afghān war, but ʿAlī Murād of Khairpūr supported the British policy, and after the battles of Miānī and Daba, his state retained its political existence.

(T. W. HAIG)

KHAIRULLĀH EFENDI, an important Turkish historian. Born in Constantinople, of a family which had over 160 years unbroken service with the Sulṭān, the son of the famous ʿAbd al-Ḥakk Efendi (d. 1270 = 1853/1854, a theologian and physician, who was thrice *Ser-i Aṭibbā* and from 1269 bore the honorary title *Ra'īs al-ʿUlamā*), he began by following in his father's footsteps and adopted a theological career, his first office being Mollā of Smyrna (1258=1842). Later he turned to science, medicine and education. In 1265 he became a member of the Board of Education, the Agricultural Council and second president of the Academy of Sciences (*Endjümen-i Dānish*), president of various learned bodies, and filled high offices in the newly formed Ministry of Education, was for long head of the School of Medicine, till in 1281 (1864) he was sent as ambassador to Ṭeherān, where he died suddenly in 1283 (1866).

His sons are ʿAbd al-Ḥaḳḳ Ḥāmid, the most important poet and dramatist of the new Turkey, and ʿAbd al-Khāliḳ Naṣūḥī, who have both served their country as ambassadors and envoys.

Khairullāh left a large number of historical, geographical, medical, scientific and agricultural works, the latter of which are mainly translations; some of them have been printed, like the *Mesā'il-i Ḥikmet*, *Bait-i Dihḳānī*, his journey to Europe (*Awrepa seyāḥat-nāmesi*). But his importance rests on his work as a historian. Besides the *Waḳāyi'-i Miṣriye*, he wrote a history, planned on a grand scale, of the Ottoman empire entitled *Dewlet-i ʿAliye-i ʿOthmānīye Tārīkhi*, which began to appear almost at the same time as the excellent 12 volume history by the historian of the empire, Aḥmed Djewdet [q.v.], which covers the period 1774—1826.

Khairullāh Efendi aims at giving the whole of Turkish history in one continuous work. He is the first Turkish historian to attempt to deal with Turkish history in its place in the world's history, in contrast to the method hitherto in vogue among Ottoman annalists of limiting themselves entirely to Turkish sources and affairs; he was actually the first to succeed to some degree in producing a *Tārīkh-i ʿUmūmī*, a world history. With the exception of von Hammer-Purgstall's *Geschichte des osmanischen Reiches*, it is almost entirely French sources that he uses, as is obvious from the fact that he always writes foreign names as they are pronounced in French. At the same time he not infrequently draws upon hitherto not fully utilised Turkish sources.

A special volume is devoted to the introduction and to the early history of the Ottoman empire, the period before the reign of ʿOthmān I. The further work is planned to have a volume to the period of each Sulṭān. At the same time a survey of contemporary Muslim and Christian rulers is always given. The treatment of the material is no longer annalistic but pragmatic. In comparison to the inflated style of early historians, his language is simple, clear and intelligible. His history is also meritoriously distinguished from those of his predecessors by the absence of bias and the lack of any fanatical hatred of non-Muslim culture and conditions.

Of his history, 15 volumes in all appeared (1271—1281 = 1853—1864), from ʿOthmān I to the time of Aḥmed I (1603—1617), when death put a stop to his work. ʿAlī Showḳī, inspector in the *Dīwān-i Aḥkām-i ʿAdliye*, then tried to finish the book, of which Khairullāh had written barely half; but only three further volumes, 16—18, appeared (1289—1292 = 1872—1875) bringing the work to the time of Sulṭān Ibrāhīm (1639—1648).

AL-KHAIYĀṬ, YAḤYĀ B. GHĀLIB ABŪ 'ALĪ, an Arab astrologer, pupil of Māshāllāh, often mentioned in Christian writers of the middle ages under the name of ALBOHALI. The exact dates of his birth and death are unknown but the latter may be put with some certainty between 210 and 230 (825—844). Of his works there still survive: *Kitāb Sirr al-'Amal* ("the book of the secret of action") dealing mainly with the formulation of astrological questions etc. (in Berlin); *Kitāb al-Mawālīd* ("book of births") (in Oxford and Cairo(?)). The book on births was translated into Latin by Plato of Tivoli (1136) and later again (1153) by Joh. Hispalensis; the latter translation was printed in Nürnberg in 1546 with the title: *Albohali Arabis astrologi antiquissimi ac clarissimi de iudiciis nativitatum liber unus antehac non editus. Cum privilegio D. Ioanni Shonero concesso.* In place of Albohali simply we find in MSS. also Albohali Alghikac, Alboali Alchait, Albonahait, etc.

Bibliography: *al-Fihrist*, p. 276; Steinschneider, in the *Biblioth. Mathem.*, 1890, 2nd Series, vol. iv. 69—70; Wüstenfeld, *Die Übersetzungen arabischer Werke in das Latein. seit dem 11. Jahrh.*, 1877, p. 41—42; H. Suter, in the *Abhandl. z. Gesch. der mathem. Wissensch.*, x. 9—10. (H. SUTER)

KHĀḲĀN, Arabic transcription of the Turkish regal title ḲAGHAN. We find this title already borne by the rulers of the earliest people who called themselves "Turk" (vith cent. A.D.) and it had been taken by them from their predecessors, the "genuine Awars" or the Žoan-Žoan of the Chinese (Kiessling in Pauly-Wissowa, *Realencyklopädie*, viii. 2587, s. v. HUNNI; also among the so-called Pseudo-Awars, cf. e. g. *Fragm. Hist. Graec.*, iv. 233). In one of the oldest inscriptions, that of Tonyukuk (W. Radloff, *Die alttürkischen Inschriften der Mongolei*, 2nd Series, St. Petersburg 1899), we find *Ḳan* alongside of *Ḳaghan* with the same meaning, perhaps only the result of a contraction of *Ḳaghan*. Later a distinction was made between *Ḳan* or *Khān* and *Ḳaghan* or *Khāḳān* and *Ḳāḳān* used in the meaning of "Khān of Khāns", like the Persian *Shāhānshāh*; this we find as early as the fourth (xth) century in Abū 'Abd Allāh al-Khwārizmī, *Mafātīḥ al-'Ulūm*, ed. van Vloten, Leiden 1895, p. 120; the word *Ḳā'ān* which appears in the Mongol period and was not used later has the same significance. *Khāḳān* is still regarded as the Turkish national title κατ' ἐξοχήν and has been used quite recently by champions of the nationalist idea in Turkey in preference to *Sulṭān* and *Khalīfa*.

(W. BARTHOLD)

KHĀḲĀN. [See FATḤ 'ALĪ SHĀH].

KHĀḲĀNĪ (AFḌAL AL-DĪN IBRĀHĪM ḤAḲĀ'IḲĪ, surnamed Khāḳānī), a Persian poet, born at Gandja (Elisavetpol) in 500 (1106—1107), the son of a carpenter, 'Alī, and a Nestorian wife whom he had purchased from a slave-dealer. His grandfather was a weaver. His uncle Kāfī b. 'Uthmān, who was his benefactor, was a physician and druggist. He was taken charge of by him when his father, sunk in poverty, abandoned him. Trained in the school of Abu 'l-'Ulā, the latter accepted him as his son-in-law and obtained from the Khāḳān Manūčihr permission to give him the *takhalluṣ* of Khāḳānī. Later they quarrelled most bitterly and exchanged scathing epigrams (between 538 and 540). It was then that the poet quitted his native town to go to Bākū where the Shirwān-shāh Akhsatān, son of Manūčihr, was settled. Obtaining, not without difficulty, permission to perform the pilgrimage to Mekka he was well received on his return by the governor of Mosul, Djamāl al-Dīn, which earned him the disfavour of his patron and imprisonment in the fortress of Shābirān. Retiring to Tibrīz after the death of his wife, he died there probably in 595 (1200) and was buried in the cemetery of Surkh Āb. Although the majority of his biographers say that his name was Ibrāhīm, it should be noted that his father called him Badīl "the substitute" because he had come to replace the great mystic Ḥakīm Sanā'ī.

The *Tuḥfat al-'Irāḳain* = "Gift to the two 'Irāḳs", a poetical description of his journey to Mekka and back, was autographed at Agra by Mīrzā Abu 'l-Ḥasan (1855). His *Dīwān* entitled *Khulliyyāt-i Khāḳānī* was lithographed at Lucknow in 1293—1295 (2 vols.); it is arranged in the order of subjects: — religious and moral poems, panegyrics, poems with refrains, funeral elegies, short mystical pieces, epigrams, satires; 44 *ḳaṣīda*'s were annotated at the beginning of the xth (xvith) century by Muḥammad b. Dā'ūd of Shādī-Ābād (= Mandū, capital of Malwa in India).

Bibliography: N. von Khanikof, *Mémoire sur Khâcâni*, in the *J. A.*, 1864, Series 6, vol. iv. 137 and v. (1865), p. 296; Muḥammad 'Awfī, *Lubāb al-Albāb*, ii. 221; Dawlat-Shāh, *Tadhkirat al-Shu'arā'*, p. 78; J. von Hammer, *Gesch. der schönen Redekünste Persiens*, p. 125; Riḍā Ḳulī-khān, *Madjma' al-Fuṣaḥā'*, i. 200—213; Djāmī, *Nafaḥāt al-Uns*, p. 707; Sprenger, *Cat. of the MSS. of the King of Oudh*, p. 461; *Mélanges asiatiques*, iii. 114; Ivanow, *Descriptive Catalogue As. Soc. Bengal*, Calcutta 1924, p. 201.

(CL. HUART)

KHĀḲĀNĪ, a Turkish poet of the second half of the xvith century. His proper name was Muḥammad Bey and he was a descendant of Āyās Pasha [q. v.] who was Grand Wazīr under Sulaimān I. His life was not eventful; according to *Sidjill-i 'Othmānī* he was *mutafarriḳa* and *mudjāb-ārş*. Khāḳānī owes his fame to a not very long *mathnawī* called *Ḥilya-i Sharīfa*, written in a tripodic *ramal*-metre. This poem is a paraphrase of an Arabic text known as *al-Ḥilya al-Nabawiyya* containing a traditional account of the prophet's personal appearance; each of the enumerated features is commented on by the poet in twelve to twenty *bait*'s. According to Nādjī the poem has acquired the same degree of popularity as the *Mawlid-i Sharīf* of Sulaiman Čelebi. It was printed in Constantinople in 1264 and almost the whole

of it is incorporated in vol. iii. of Ḍiyā Pasha's *Kharābāt* (Constantinople 1291). As Khāḳānī states at the end of his poem, it was completed in 1007 (1598—1599); at that time he had already attained a great age. The poet Djewrī (d. 1065) wrote a *naẓīra* to the *Ḥilya*. Of other poems by Khāḳānī — he is said to have composed a Dīwān — are only known a mathnawī called *Miftāḥ al-Futūḥāt* an a ghazal, both in a Gotha MS. (Cat., p. 171). He died in 1015 (1606—1607) and is buried in the cemetery of the mosque of Edirne Ḳapī.

Khāḳānī is a striking figure in the transition period of Ottoman poetry after Bāḳī, which is characterised by a growing taste for religious subjects.

(J. H. Kramers)

KHĀL (a.), maternal uncle. The *khāl*, although, according to the traditional patriarchal family law in Arabia, not actually considered a relative of his sister's son, was in popular regard equal to the latter's father and his father's relatives. It usually took a good deal of effort to fight on the side of one's paternal relatives against those of one's mother, and to avenge the death of paternal relatives also on one's *khāl*'s. Special stress was generally laid on the noble blood of one's *khāl*'s because the sister's children in particular were considered to inherit all noble or ignoble traits of character of their *khāl*'s.

The Muslim law, which, following the old Arab family law, paid most attention to paternal relationship, however forbids (on the authority of Sūra iv. 27) the *khāl* to marry his sister's daughter because the blood-relationship is too close.

The word *khāl*, which often has the more general meaning of "maternal ancestor", does not seem to go back to one of the original Semitic names of relationship.

(Th. W. Juynboll)

KHAL'A. [See khil'a].

KHALADJ, a Turkish tribe; the Turkish name was probably Ḳalač (see below). As early as the fourth (tenth) century we find the Khaladj living much farther south than the other Turks, in the southern part of the modern Afghānistān between Seistān and India. They are said even then to have come thither "in ancient times" (*fī ḳadīm al-aiyām*) (al-Iṣṭakhrī, ed. de Goeje, *Bibl. Geogr. Arab.*, i. 254). The word is variously vocalised in Arabic manuscripts, e. g. al-Khaldj in al-Iṣṭakhrī, p. 281 infra; Khaldj also in M. Longworth Dames (see the art. afghānistān). J. Marquart (*Ērānšahr*, Berlin 1901, p. 253) connects the Khaladj with the Χαλάται of the Byzantine sources and the *K'ōlas* of the anonymous Syriac narrative of the year 554—555 and proceeds to deduce an original pronunciation *Khalač*. In favour of Khalač we have two later Turkish popular etymologies, given in the legend of Oghuz Khān (cf. the art. ghuzz): *ḳal ač* "remain hungry!" in Rashīd al-Dīn, text and translation in W. Radloff, *Kudatku Bilik*, vol. i., St. Petersburg 1891, Introduction, p. xxi., and *ḳal aċ* "remain open!" (imperative) in the anonymous legend preserved in the Uighur character (*ibid.*, text p. 240, translation p. xii.). The Khaladj are never mentioned as an independent political unit but always as mercenaries or guards of foreign rulers; their leaders, like those of other Turkish guards, sometimes succeeded in founding independent dynasties, especially in India, where the pronunciation Khildjī for Khaladjī prevails (see the articles following). It is usually assumed that the Afghān speaking Ghalzai of the present day in the upper valleys of the Tarnak, Arghandāb and Afghasān are Afghanised descendants of the Turkish Khaladj. This assumption is disputed by M. Longworth Dames (cf. the art. afghānistān and ghalzai), although he grants that the Ghalzai have a good deal of Turkish blood.

(W. Barthold)

KHALAF b. 'Abd al-Malik [q. v.]. [See ibn bashkuwāl].

KHALDJĪ, the adjectival form of Khaladj, the name of a Turkish tribe which migrated from Turkistān at a period which cannot be precisely ascertained and settled in Western Afghānistān. From long residence in this country they were regarded, even as early as the end of the thirteenth century, when Fīrūz Khaldjī ascended the throne of Dihlī, as Afghāns. They bore a high reputation as statesmen and soldiers, many served the early kings of Ghaznī and Ghūr, and many afterwards attained to the highest rank in India, as, for instance, Muḥammad b. Bakhtyār, the conqueror of Bengal, Fīrūz, just mentioned, who founded the the dynasty which reigned at Dihlī from 1290 to 1320, and Maḥmūd, founder of the Khaldjī dynasty of Mālwa (1436 to 1531), who was descended from Nāṣir al-Dīn, the eldest brother of Fīrūz. The Lodīs, the dynasty founded by Bahlūl, which reigned at Dihlī from 1451 to 1526, were a clan of the Khaldjīs.

The late Major H. G. Raverty objected strongly, but with little apparent reason, to the identification of the Ghilzais with the Khaldjīs. Their identity cannot be conclusively established, but the Ghilzais claim a Turkish descent and are found in the region where we should expect to find the Khaldjīs; the corruption of the name is not unnatural among Afghāns, and if the Ghilzais are not Khaldjīs it is difficult to say where the latter are to be sought, for no trace of them is found elsewhere, and there is no record of their extermination.

Bibliography: Minhādj-i Sirādj *Ṭabaḳāt-i Nāṣirī*, and translation by H. G. Raverty, London, 1873—1881; Niẓām al-Dīn Aḥmad, *Ṭabaḳāt-i Akbarī*, and translation by B. Dhé (Bibl. Ind. Series, A. S. B.); Muḥammad Ḳāsim Firishta, *Gulshan-i Ibrāhīmī*, Bombay 1832.

(T. W. Haig)

KHALDJĪ or Khildjī, the dynasty of Dihlī, was founded by Djalāl al-Dīn Fīrūz (see fīrūz shāh khildjī) of the Ghilzai or Ghildjī tribe of Afghānistān. A Turkī descent has been claimed for this tribe but they had long been domiciled in Afghānistān and were regarded as Afghāns.

Djalāl al-Dīn Fīrūz ascended the throne in Kilokhrī on June 13, 1290, and was murdered at Karra by his nephew and son-in-law, ʿAlāʾ al-Dīn Muḥammad, on July 19, 1296. ʿAlāʾ al-Dīn ascended the throne in Dihlī on Oct. 3, 1296, and captured the two sons of Djalāl al-Dīn Fīrūz, Arkalī Khān, governor of Multān, and Ḳadr Khān, who had been proclaimed emperor in Dihlī under the title of Rukn al-Dīn Ibrāhīm. Having blinded his two cousins and imprisoned their mother, ʿAlāʾ al-Dīn punished with death and confiscation those *amīrs* who had deserted his uncle for himself. He annexed Gudjarāt, Ranthambhor, and Čitor and in a series of expeditions to the Dakhan commanded by his favourite eunuch Kāfūr Hazārdīnārī, entitled Malik Nāʾib, the Kingdoms of Warangal and Dvāravatīpūra were added to the empire. Five rebellions which occurred early in his reign were crushed with merciless severity and vigorous laws were issued with the object of suppressing disaffection. ʿAlāʾ al-Dīn was dissuaded from a design of declaring himself a prophet and promulgating a new religion. The most famous decrees of his reign were those by which he regulated the price of all the commodities of life and its most disgraceful act was the massacre of between twenty and thirty thousand Mughul converts to Islām, suspected of disaffection. After ʿAlāʾ al-Dīn's death on Jan. 2, 1316, the eunuch Malik Nāʾib, having set aside Khiḍr Khān, the heir apparent, raised to the throne Shihāb al-Dīn ʿUmar, ʿAlāʾ al-Dīn's youngest son, a boy of five or six years of age, and attempted to blind Ḳuṭb al-Dīn Mubārak, the second son, but the prince corrupted the eunuch's emissaries and persuaded them to murder their master. Ḳuṭb al-Dīn Mubārak then assumed the regency, and, on April 1, 1316, blinded and imprisoned his young brother and ascended the throne. The new emperor gained a fleeting popularity by the reversal of all his father's harsher measures but his debauchery soon converted the love of his people into contempt. Like his father he was addicted to unnatural vice and was entirely ruled by Khusraw Khān, a vile favourite belonging to one of the scavenger castes of western India. A rebellion in Gudjarāt was suppressed and in 1318 Ḳuṭb al-Dīn marched to Dewagiri, where he put to death Harpāl Dewa, son-in-law of Rāmačandra and appointed a Muḥammadan governor to Devagiri. On his return the emperor caused his three brothers, Khiḍr Khān, Shādī Khān, and Shihāb al-Dīn ʿUmar, to be put to death, and, after scandalising his court by indecent debauchery, proclaimed himself supreme pontiff and vicegerent of God under the title of al-Wāthiḳ bi-'llāh.

Khusraw Khān, who had been recalled from the Dakhan under a just suspicion of treasonable designs soon regained his master's confidence and on April 14, 1320, caused him to be murdered in the palace and ascended the throne under the title of Nāṣir al-Dīn Khusraw. His brief reign was marked by the advancement of his profligate caste-fellows and an attempt to restore the predominance of Hinduism in Dihlī, but Malik Fakhr al-Dīn Djawnā fled from the capital to Multān and persuaded his father, Ghāzī Malik, governor of that province, to march to Dihlī for the purpose of restoring the supremacy of Islām. Khusraw marched out to meet him but was defeated at Indarpat and captured and beheaded. On the following day, Sept. 6, 1320, Ghāzī Malik was proclaimed emperor under the title of Ghiyāth al-Dīn Tughluḳ Shāh.

Bibliography: Ḍiyāʾ al-Dīn Baranī, *Taʾrīkh-i Fīrūz Shāhī*, Bibliotheca Indica series of the Asiatic Society of Bengal; Muḥammad Ḳāsim Firishta, *Gulshan-i Ibrāhīmī*, Bombay lithographed edition of 1832. (T. W. Haig)

KHALDJĪ (Khildjī), the dynasty of Mālwa, was founded in A.D. 1436 by Maḥmūd Khildjī, of the same tribe as the Khaldjīs of Dihlī [q. v.]. Dilāwar Khān, founder of the Ghorī dynasty [q. v.], had been accompanied to Mālwa by his cousin, Malik Mughīth, and on the deposition of Dilāwar Khān's grandson, Ghaznīn Khān (Muḥammad Shāh), Maḥmūd offered the crown to his own father, Malik Mughīth, who declined it in favour of his son. Maḥmūd's long reign was at first disturbed by rebellions on behalf of the late dynasty, fomented and supported by Aḥmad I of Gudjarāt and the rānā of Čitor. After the suppression of these he was engaged in almost continuous warfare with Gudjarāt, Čitor, Khāndesh, Kherla, the Dakhan, Dihlī and Djawnpūr, and was usually successful, except against the Dakhan. He died on May 30, 1469, and was succeeded by his eldest son, Ghiyāth al-Dīn, a mean-spirited monarch who occupied himself chiefly with the administration of his harem, for the management of which he drew up elaborate regulations, leaving the affairs of the kingdom in the hands of his advisers and, latterly, of his elder son, Nāṣir al-Dīn, whom he made his prime minister. The later years of his reign were troubled by quarrels between Nāṣir al-Dīn and his younger brother ʿAlāʾ al-Dīn, who was supported by Rānī Khurshīd, the mother of both princes. The King, too feeble to keep the peace, fell alternately under the influence of either faction until, in the autumn of 1500, Nāṣir al-Dīn captured Māndū, put his brother to death, imprisoned his mother, and seized the crown. A few months later Ghiyāth al-Dīn died, poisoned, it was suspected, at the instigation of his son. Nāṣir al-Dīn's warlike qualities found employment in the suppression of rebellions among his *amīrs*, due to his harshness and in war with the rānā Rāyamal Simha of Čitor. His later years were disgraced by debauchery and cruelty, his victims being chiefly his most faithful servants. He nominated his second son, Shihāb al-Dīn, his heir, passing over Ṣāḥib Khān, the eldest, but Shihāb al-Dīn rebelled and fled from his father's wrath and Nāṣir al-Dīn was succeeded on his death (May 2, 1511) by his third son, who ascended the throne as Maḥmūd II. Maḥmūd was brave to rashness, but possessed no other virtue and was entirely devoid of political wisdom and administrative ability. He first forfeited the allegiance of his *amīrs* by the elevation of unworthy favourites, one of whom avenged his dismissal by proclaiming Maḥmūd's eldest brother, Ṣāḥib Khān, king, under the title of Muḥammad Shāh. Muḥammad, the creature of a faction, reigned nominally and intermittently from 1510 to 1515, and issued coins. The adherents of Shihāb al-Dīn, Maḥmūd's next elder brother, also rebelled and proclaimed their leader king, and on his death professed allegiance to his son, whom they styled Hūshang II. After the removal of these pretenders Maḥmūd II became a mere instrument in the hands of Medinī Rāya, a Rādjpūt whom he raised to the position of prime minister of the kingdom and who could command a force of 40,000 horse. He made spasmodic attempts to free himself from his ignominious

position but the result of these was to throw the Rādjpūts into the arms of Sangrama Simha, rānā of Čitor, and Mālva would have become a Rādjpūt state but for the first apprehensions of a coalition of the neighbouring Muḥammadan states. In 1517 Maḥmūd II was compelled to implore the aid of Muẓaffar II of Gudjarāt against the Rādjpūts and, having been restored to his throne, reigned as a vassal of Gudjarāt. After his restoration Maḥmūd II, aided by a contingent from Gudjarāt, made war against Čitor but was totally defeated and made prisoner by the rānā Sangrama Simha, Bābur's Rānā Sangā, who, from motives of policy and generosity, restored him to his throne. His ingratitude to Sangrama's son Ratan Singh and his foolish encouragement of a pretender to the throne of Gudjarāt, where Muẓaffar II had been succeeded by his son Bahādur II, drew on him the wrath of Bahādur Shāh, who invaded Mālwa, captured Māndū, and imprisoned Maḥmūd, who was slain on April 12, 1531, by his guards, who suspected an attempt at a rescue. The Khaldjī dynasty ended with Maḥmūd II, and Mālwa became for a time a province of Gudjarāt.

KHĀLID B. ʿABD ALLĀH AL-ḲASRĪ, governor of the ʿIrāḳ. The Ḳasr family to which Khālid belonged was a branch of the tribe of Badjīla [q. v.]; his mother was a Christian. In the year 89 (707/708) or 91 (709/710) he was appointed governor of Mekka by the Caliph al-Walīd. Here he remained during the life time of al-Walīd; after the accession of Sulaimān in 96 (715), however, he was dismissed and lived in retirement until in Shawwāl, 105 (March, 724), Hishām appointed him successor of the governor ʿUmar b. Hubaira and gave him the administration of the whole of the ʿIrāḳ. He made his headquarters in Wāsiṭ. Khālid had been brought up in the school of al-Ḥadjdjādj, and if he was not the latter's equal in ruthlessness he was not lacking in vigour or tenacity. He did not hesitate to express his opinions freely to the Caliph, and, when Hishām was planning to exclude his nephew al-Walīd from the succession in favour of his son Maslama, Khālid vigorously resisted this scheme. In place of winning military glory he preferred to devote himself to peaceful activities and to the economic development of his province, and during his long tenure of office peace and quiet prevailed generally in the ʿIrāḳ. He paid special attention to the improvement of agriculture. The marshes were drained and great stretches of virgin soil made arable. With this fertile activity for the welfare of the state he was at the same time very successful in furthering his personal interests, and in time acquired immense riches, which, however, aroused the envy and dissatisfaction of the people. Other circumstances also contributed to make the doughty Khālid unpopular. His predecessor in office, ʿUmar b. Hubaira, had been a prominent champion of Ḳaisī opinion. Khālid's appointment as ʿUmar's successor made the Ḳaisīs regard him as an intruder who had driven ʿUmar from the position to which he was entitled, and from the first created an unsympathetic feeling against him, which in spite of his impartiality estranged him from the Ḳaisīs and threw him closer to the Yamanīs. His tolerance of members of other creeds brought upon him the charge of religious indifference. To please his mother he built a church in Kūfa and granted Christians and Jews generally the privilege of building churches and synagogues, and did not hesitate to give Zoroastrians posts in the government. Khālid was very little troubled by rebels. In 119 (737) there was a conspiracy of a few Shīʿīs led by al-Mughīra b. Saʿīd in Kūfa, but it was promptly discovered and the culprits were publicly burned. In the same year a Khāridjī named Bahlūl b. Bishr preached a rebellion against Khālid in the neighbourhood of al-Mawṣil and twice defeated the troops sent against him, but was finally overcome. About the same time a certain Wazīr al-Sakhtiyānī was active around Kūfa, where he was responsible for assassinations and incendiarism. When he fell into the hands of Khālid he succeeded by his eloquence and his knowledge of the Ḳurʾān in so moving the governor that the latter wished to spare him, but the Caliph was inexorable and had him executed forthwith. In the same year the Khāridjī al-Saḥārī b. Shabīb collected a force and rendered the region of Djabbul on the Tigris unsafe, but was soon overcome and put to death with his followers.

Hishām could not in the long run resist the pressure of Khālid's enemies. In 120 (738) he dismissed him and appointed as his successor Yūsuf b. ʿUmar al-Thaḳafī, who had been for long governor of the province of Yaman. In Djumādā I (April-May, 738) the latter arrived in Kūfa. Khālid was arrested and taken from Wāsiṭ to al-Ḥīra, where he was kept in prison with his family for eighteen months, and had to defend himself against charges of embezzlement. After his release in Shawwāl, 121 (Sept.-Oct., 739), he wanted to go to the Caliph but was not allowed. In the following year he settled down in Damascus. Here also he was followed by the hatred of Yūsuf but was able to live in freedom during the last years of Hishām's reign. He was again thrown into prison by Hishām's successor al-Walīd, and sold for a vast sum to his mortal enemy, Yūsuf, who had him brought to Kūfa and there tortured to death. Khālid died in Muḥarram, 126 (Oct.-Nov., 743), and was buried in al-Ḥīra. According to another statement, he was dead by Dhu 'l-Kaʿda, 125.

KHĀLID B. AL-WALĪD B. AL-MUGHĪRA AL-MAKHZŪMĪ, a contemporary of Muḥammad and a Muslim general. In the battle of Uḥud,

where Khālid commanded the right wing of the Mekkan forces, and by his intervention at the right moment decided the battle in favour of the enemies of the Prophet he first displayed that brilliant talent for leadership to which in later days Islām owed so many successes. After Khālid had gone over to Islām with ʿAmr b. al-ʿĀṣ at the beginning of the year 8 (629) he took part in the unsuccessful campaign against the Byzantines, and after the defeat at Muʾta it was with difficulty that he succeeded in bringing back the defeated army to Medina. As a reward the Prophet gave him the title of honour "Sword of God", and in the same year he took part in the entry of the Muslims into Mekka. After the capitulation of the town he is said to have destroyed the sanctuary of the heathen goddess al-ʿUzzā by order of Muḥammad. He was soon afterwards sent as ambassador to the Banū Djadhīma [q. v.] and in Radjab of the next year (Oct./Nov., 630) he undertook an expedition against Ukaidir, the Christian king of Dūmat al-Djandal (see the art. DJAWF AL-SIRḤĀN). At the beginning of the year 10 (summer of 631) Muḥammad sent him to Nadjrān to convert the Banu ʾl-Ḥārith b. Kaʿb to Islām, which was also done without bloodshed. In the following year he was sent by Abū Bakr against Ṭulaiḥa b. Khuwailid and defeated him at Buzākha (see the art. ASAD) and next turned his attention to the Banū Tamīm who dwelled in the vicinity. One clan, which was under Mālik b. Nuwaira, was at feud with the others. When the latter submitted, Mālik also laid down his arms but was nevertheless taken prisoner and put to death and Khālid then married his widow. When an accusation was laid before the Caliph against Khālid he is said to have excused himself by saying that the incident was due to a misunderstanding. He said he had ordered warm clothing to be given to the prisoners and had therefore said to the soldiers: "*adfiʾū asrākum*" which was interpreted by the Beduins to mean "kill your prisoners". In any case Abū Bakr was satisfied with administering a reprimand to him and kept him in office in spite of vigorous protests from ʿUmar. Soon afterwards Khālid took the field against the false prophet Musailima. At ʿAḳrabāʾ, on the frontier of al-Yamāma, the latter was defeated and killed, whereupon his followers submitted (beginning of 12 = beginning of 633). Khālid was then sent against the Persians. In Rabīʿ I, 12 (May—June, 633), or perhaps some months later he conquered al-Ḥīra and soon afterwards occupied the whole Euphrates area. The Byzantines are said to have finally crossed the Euphrates and to have been defeated at al-Firāḍ (Dhu ʾl-Ḳaʿda, 12 = Jan., 634) and in Muḥarram of the following year (March/April, 634) or, according to others, not till Rabīʿ II (June) Khālid set out on his campaign against Syria. In Djumādā I or II (= summer of 634) the Byzantines were completely defeated at Adjnādain and retired to Damascus. Defeated again by Khālid, they were surrounded and besieged and in Radjab, 14 (Aug./Sept., 635), Damascus had finally to surrender. About the same time Khālid was deprived of the supreme command and replaced by Abū ʿUbaida b. al-Djarrāḥ [q. v.] but continued to take part in the military operations in Syria. In the battle of the Yarmūk on Radjab 12, 15 (Aug. 20, 636), he commanded the cavalry and contributed largely to the victory of the Muslims. Ḥimṣ was recaptured soon afterwards. Khālid then advanced against Ḳinnasrīn and after he defeated a Byzantine army under Mīnās the town had to surrender and Khālid took up his quarters here for the time. He was for a time governor of a part of Syria but was later dismissed. He died in Ḥimṣ or Medina in the year 21 (641—642). A. Müller (*Der Islam*, i. 257) has admirably described him as follows: "He was one of those characters whose military genius is the whole of their intellectual life; like Napoleon, he cared for nothing but war and did not want to learn anything else."

(K. V. ZETTERSTÉEN)

KHĀLID ZIYĀ, ʿUSHAḲĪ-ZĀDE, the leading writer of prose and fiction in modern Turkish literature. Born in 1282 (1866) in Constantinople of a prominent family which came originally from the carpet town of ʿUshaḳ — hence the epithet ʿUshaḳī-zāde — he spent his youth in Constantinople and Smyrna. He received his education from the Mechitarists in Smyrna. This laid the foundations of his love for and knowledge of the west. He translated industriously from the French and made literary attempts of his own. The collection called *Nāḳil* in 6 volumes contains stories of his own alongside of translations from the most important French writers of fiction. In Constantinople he founded the paper called *Newrūz* and published the introduction (*Medkhal*) to his never finished *Gharbden Sharḳa Seyyāle-i Edebiye* (Literary Current from West to East) in Constantinople in 1305 (1888). In Smyrna he continued his literary activity with the foundation of the periodical *Khidmet* in which his novel *Sefile* and his *Menthūr Shiʿrler* ("Poems in Prose") appeared in 1307 (1887); their unusual form aroused a storm of indignation until Ekrem defended them (specimens in Bikerman, *Tureckiy sbornik*, St. Petersburg 1909).

In Smyrna he published in five series his *Küčük Kitābler* which contain various literary productions, e. g. *Bir Mudhekkirenin son Yapraḳlarï* ("The last Leaves of a Notebook"); *Bir Izdiwādjïn Tārīkh-i Muʿāshaḳasï* ("The Love-story of a Marriage"); *Ḥikāye, Temāshā* (his *Menthūr Shiʿrler* re-appeared in it) and *Mezārdan Sesler* ("Voices from the Grave"), Smyrna 1307 (1889). At the same time he published a whole series of popularly written scientific treatises, with which he endeavoured to spread European learning, for example: *Ḥaml we-Waḍʿ-i Ḥaml*; *Ḳānūn we-Fenn-i Wilāde*; *Mebāḥith al-Kihl*; *Mebāḥith al-Kiyāse*; *ʿIlm-i Simā*; *ʿIlm-i Nudjūm*; *Ḥisāb Oyunlarï*; *Ḥikmet Oyunlarï*;

Būḳalamūn-i Kīmiyā; *Sīmiyā-i Kīmiyā*), and the anecdotal *Tuḥfe-i Leṭāʾif* (1308). It is characteristic of his versatility that he even studied Sanskrit which, however, involved him in difficulties with the ever suspicious government.

Next came the novels *Nemīde* ("The Hopeless Woman"), Constantinople 1311 (1893); *Bir Ölünün Defteri* ("The Diary of a dead Man", Constantinople 1311), still bearing the imprimatur of the Aidin censor, which has been translated into German by Ḥabīb Edīb in 1918 (*Romane des neuen Orients*, Berlin), and *Ferdī we-Shürekāsi* ("Ferdi & Co.", Constantinople 1312; dramatised by Meḥmed Reʾūf, Constantinople 1325).

A new period began with his taking over the editorship in 1896 of the periodical *Therwet-i Funūn* to which he with the poet Tewfīḳ Fikret [q.v.] gave an entirely new form. He opened the new period, which is known as the Tewfīḳ Fikret and Khālid Ziyā period, with his masterly novel *Mā'ī we-Siyāh* ("Blue and Black") (1317 second ed.; 1338 eighth ed.). In the *Edebiyāt-i Djedīde Kutub-khānesi*, a new foundation important for modern literature, appeared his next works, the novels *Bir Yazyñ Tārīkhi* ("The Story of a Summer") as Nº. 3 (Constantinople 1316) and *ʿAshḳ-i Memnūʿ* ("Forbidden Love"), Nº. 4 (1316; with *Mā'ī we-Siyāh* his best novel), and the collection of short stories *Solghun Demet* ("The Withered Wreath"), Nº. 8 (Constantinople 1317), from which a whole series of stories has been translated into French and German (Kaufmann, *Türkische Erzählungen*, Munich 1916; *Die Neue Türkei*, Constantinople 1908, etc.). The series ended with his *Ḳyryḳ Ḥayātlar* ("Broken Lives").

When, as a result of an article by H. Djāhid, the paper was suppressed, Khālid wrote absolutely nothing till the revolution and confined himself to his official work as first secretary to the Tobacco Regie. After the revolution he displayed a feverish literary activity and lent his collaboration to every possible periodical. The Novel *Nesl-i Akhīr* ("The last Family") in the *Ṣabāḥ* and many contributions to the *Iḳdām*, *Therwet-i Funūn*, *Resimli, Kitāb*, *Meḥāsin* etc. are evidence of this. At the same time for a certain period he lectured at the University of Constantinople on aesthetics and foreign literatures and wrote letters from Germany describing his travels there. His activities in this direction were interrupted by his appointment as first secretary to the palace of Sulṭān Meḥmed V in 1909.

It came as a surprise when in 1918 he suddenly entered the ranks of dramatists with his *Kübār* (1334), in which he demanded the same rights of divorce for women as for men. The play Furṭūn (1334) is one of the adaptations of the "Francillon" of Dumas fils now so popular in Turkish literature.

A third drama, *Fāre*, is now announced as well as new collections of stories: *Bir Ḥikāye-i Sewdā* (1338); *Bir Shīʿr-i Khayāl* and *Onu beklerken*, and works on literary history: *Kenārde Ḳalmyshlar* and *Eski Shāʿirler*.

With the poets Tewfīḳ Fikret and Djenāb Shehāb ed-Dīn, Khālid Ziyā is the principal founder of the modern occidentalising literature. Deliberately turning from the East, rejecting the eastern spirit and the Turkish Muslim attitude to life, they sought to create a modern literature with European affinities with the motto "art for art's sake", after the compulsion to write in Persian and Arabic forms had first been cast off by their predecessors.

With Seraÿ, Khālid is the founder of the modern literary novel. He worked especially at the short story, of which he seems to be the greatest master. He is an artist and a poet. He is marked by great sentimentality and a pessimistic outlook, which only later gave place to a more reconciled attitude. He is an acute psychological observer. But he is an absolute Westerner, a Frenchman in Turkish dress. He has not unjustly been called the Turkish Alphonse Daudet. His writings contribute little to our knowledge of the Turks. In spite of the Levantine milieu he is strictly moral. He tells a story, vividly and attractively; his style is clear. But his language is still markedly laden with Persian and Arabic words. He paid most attention to style, which owes much to him, for it is he who created the language of modern Turkish fiction.

He has taken no part in the recent nationalist development in Turkey. He has remained the old cosmopolitan.

(TH. MENZEL)

AL-**KHĀLIDĀT**, full form AL-DJAZĀʾIR AL-KHĀLIDĀT, probably with allusion to the Arabic *Khuld*, the Eternal Islands, are usually called Djazāʾir al-Saʿāda "Isles of Bliss" by the astronomers, a translation of the Greek Μακάρων Νῆσοι which probably came to the Arabs through the translation of Ptolemy. Al-Bakrī also knows the Latin name Fortunatae Insulae in the form *Furṭunātash*. They are the Canary Islands. Al-Bīrūnī and al-Idrīsī speak of six islands, al-Maḳḳarī of seven, and al-Idrīsī mentions two by name: Masfahān and Laghūs; according to Dozy and de Goeje, the former corresponds to the modern Teneriffe, the latter probably to Gran Canaria. According to al-Bīrūnī, they are nearly 200 parasangs (600 miles) from the mainland, while al-Maḳḳarī says that on a clear day they are visible from Salā.

The meaning of the name given by al-Bakrī points to the flourishing vegetation of the islands. "Trees and shrubs bring forth all kinds of pleasant fruits without it being necessary to plant or tend them, and the soil yields grain instead of weeds

and valuable fragrant herbs instead of thorns". On Masfahān as well as on Laghūs there was a high pillarlike building (*ṣanam*) of hewn stone, a hundred ells high and crowned by a figure of brass pointing backwards with his hand to the high seas. In Masfahān this red column stood on a round hill; the column on Laghūs could not be climbed. These were regarded as warnings to shipping to sail farther to the west (al-Maḳḳarī says that each of the seven islands had a similar column; according to him, they were idols [*aṣnām*] in the form of men. He distinguishes the Djazā'ir al-Sa'āda from the Djazā'ir al-Khālidāt and says that the former were north of the latter and the first of them is Britain).

Among legendary features of the Arab descriptions of the islands we may mention the following. Since in Ptolemy and the Arab geographers who follow him the longitudes are calculated from the meridian of one of these islands (cf. the older European calculation from the meridian of Ferro), it was thought that there was a race of astronomers living on the island; according to al-Maḳḳarī the "Christian Magicians" came from the Djazā'ir al-Sa'ādat, but, as he includes Britain among them, he is apparently thinking of the Druids of the Celts. Dhu 'l-Ḳarnain [q. v.], i. e. Alexander the Great, is said to have reached the Khālidāt. The Ḥimyaritic As'ad Abū Karib is said to have built the column in Masfahān and he also is given the epithet Dhu 'l-Ḳarnain. The column of Laghūs is said to have been built by another South Arabian of the legendary past, Tubba' Dhu 'l-Marāthid; his tomb is said to exist there in a temple of marble and brilliantly coloured glass. The stories regarding "terrible wild beasts" on the island of Laghūs given by the author of the "Book of Marvels", which al-Idrīsī hesitates to repeat, are probably the same as those given by al-Ḳazwīnī on the authority of Abū Ḥāmid al-Andalusī in his description of the Western Sea. There is also a description of a column on an island called Madjma' al-Ṭuru'.

We may assume that there was trade (indirect) between the Canary Islands and Arabia even in the days of the ancient Arabs, if *'andam* "dragon's blood" came from *Dracaena Draco*; probably, however, it came from another (Indian) plant.

KHALĪFA, "successor, vicegerent", title of the supreme head of the Muslim community, the *Imām* [q. v.], as successor or vicegerent of the Prophet (*khalīfat rasūl Allāh*).

I. The word appears, frequently both in the singular and the plural (*khalā'if*, *khulafā'*) in the Ḳur'ān; in the latter case, the persons referred to are called "successors" as entering into the blessings enjoyed by their forefathers (e.g. vi. 165; xxiv. 54; xxvii. 63, used of the righteous; vii. 67, 72, of the idolatrous tribes of 'Ād and Thamūd); the singular is used of Adam (ii. 28), either as successor of the angels who lived on earth before him, or as representative of God, and of David (xxxviii. 25). "We have made thee a khalīfa in the land; then judge between men with the truth, and follow not thy desires, lest they cause thee to err from the path of God." In none of these verses is there any clear indication that the word was intended to serve as the title of the successor of Muḥammad. Muslim historians commonly assert that it was first so used by Abū Bakr; it is doubtful, however, whether he ever assumed it as a title (Caetani, *Annali dell' Islām* 11 A. H., § 63 n. 1). But from the reign of 'Umar, it has been the common designation of the *Amīr al-Mu'minīn* [q. v.]. The designation *khalīfat rasūl Allāh*, "successor of the apostle of God", implies assumption of the activities and privileges exercised by Muḥammad, — with the exception of the prophetic function, which was believed to have ceased with him; the later phrase, *khalīfat Allāh*, "vicegerent of God", implies a bolder claim, and is said to have excited the indignation of Abū Bakr, but it was used as early as 35 A.H. by Ḥassān b. Thābit in an elegy he wrote on the Khalīfa 'Uthmān (ed. H. Hirschfeld, xx. l. 9), and it became quite common under the 'Abbāsids and later princes (Goldziher, *Muhammedanische Studien*, ii. 61).

In the course of Muslim history, however, the term khalīfa has not been confined to such exalted reference. As early as the first century of the Hidjra, it was used in the Aphrodito papyri for the ἀπεραιτήτης or agent at the capital through whom the local official of the finance department made payments of taxes (*Greek Papyri of the British Museum*, vol. iv., pp. xxv. 55; C. H. Becker, *Islamstudien*, i. p. 257). It has frequently been used as a personal name (see Index to Ṭabarī, etc.). In the religious orders, especially among the Ḳādiriya, the Khalīfa is the delegate of the Shaikh of the order and is invested with a certain amount of his powers and represents him in countries remote from the parent zāwiya. Among the Tidjāniya, the Khalīfa is the inheritor of the spiritual power (*baraka*) of the founder of the order, to whom alone the title Shaikh is applied (O. Depont and X. Coppolani, *Les confréries religieuses musulmanes*, pp. 104—195, Alger 1897; L. Rinn, *Marabouts et Khouan*, p. 78, Alger 1884).

In the Mahdist movements, the Khalīfa is the successor of the Mahdī; Mīr Dilāwar was thus Khalīfa of Saiyid Muḥammad Mahdī (ob. 910 A.H.) the founder of the Mahdawīs [q.v.]; 'Abd Allāh was the Khalīfa of Muḥammad Aḥmad the Mahdī of the Sūdān; and the son and successor of Ghulām Aḥmad Ḳādiyānī (s. i. p. 206) is so described by his followers at the present day. Humbler persons have also received this designation, e.g. in the household of the Emperor Bābur, khalīfa denoted a woman who exercised surveillance over other women-servants (Gul-badan Begam, *Humāyūn-nāma*, translated by A. S. Beveridge, p. 136). In more modern times, the word khalīfa was commonly applied in Turkey to any junior clerk in a public office (C. M. d'Ohsson, *Tableau général de l'Empire Othoman* [2], vii. 271), and is still a title of respect for an assistant teacher in a school. In Morocco it indicates the deputy of the governor of a city (B. Meakin, *The Moorish Empire*, p. 224). In modern India it is used even of such insignificant persons as a working tailor, a barber, a fencing master or a cook (H. A. Rose, *Glossary of the*

Tribes and Castes of the Panjab, ii. p. 490. Lahore 1911). In Togo and neighbouring parts of W. Africa, alfa (= khalīfa) denotes a Muslim teacher or even Muhammadans generally (*Die Welt des Islams*, ii. p. 200).

Bibliography: In addition to the works already quoted, see Goldziher, *Du sens propre des expressions Ombre de Dieu, pour désigner les chefs dans l'Islam* (*R. H. R.*, xxxv., 1897); D. S. Margoliouth, *The sense of the title Khalīfah* (*A Volume of Oriental Studies presented to Edward G. Browne*, p. 322—328).

II. As a distinction can be drawn between the history of the Khilāfa, or of the political institution of which the Khalīfa was the head, and the theories connected with it, and as the former was chronologically prior, it is proposed here to deal with it first.

1. **History**. The immense wealth and power acquired by the early successors of Muḥammad, through the conquest of such provinces of the Roman Empire as Syria and Egypt, together with the dominions of the Persian king, raised them to a status and a dignity which gave to the humble title they bore a new significance; so even before the Arab conquests had reached their limit, the Khalīfa had become one of the most powerful and wealthy monarchs in the world. As *Amīr al-Muʾminīn* [q.v.] he was commander of these conquering armies and as he described himself on his coins; as *Imām* [q.v.], he took the foremost place in public worship and delivered the *Khuṭba* [q.v.] in the mosque; as Khalīfa he claimed from his Muslim subjects some of the reverence that had previously been paid to the founder of their faith. The civil war that broke out in the reign of ʿAlī b. Abī Ṭālib laid the foundation for those rival theories as to the qualifications of the Khalīfa, which took definite shape in political and sectarian doctrines. Under the Umaiyads [q.v.] the religious associations of the office of the Khalīfa were not emphasised, though many of them kept up the practice of leading the public worship, for (with the exception of ʿUmar b. ʿAbd al-ʿAzīz [q.v.]) religious considerations appear to have had little weight with them, and it was mainly in Medina that the foundations of Muslim dogma and the systematisation of the *Sharīʿa* [q.v.] were laid, with little encouragement from the Khalīfa in Damascus. The claim of the descendants of ʿAlī to the leadership of the Muslim world found expression in the formation of the Shīʿa party [q.v.], but for some generations their efforts met with no political success. The ʿAbbāsids [q.v.] came into power largely through their pretended support of ʿAlid claims, and largely too through their professions of religious zeal. In Baghdād the Khilāfa took on a new character; the Khalīfa became a generous patron of the ʿulamāʾ and laid emphasis upon his function as protector of the religion of Islām, and under his fostering care the capital took the place of Medina as the chief centre of theological activity, and the great schools of law (see the art. FIḲH) received definite shape. The Khalīfa was no longer regarded as a mere secular monarch, as many of the Umaiyads had appeared to be in the eyes of devout Muslims, and the awe with which he was regarded was enhanced by the elaboration of court etiquette and ceremonial. The Umaiyads, especially in their early days, had generally been readily accessible to their subjects; Muʿāwiya [q.v.] had preserved in a great measure the frank, familiar manners of an Arab chief of pre-Islāmic times, and moved among other Arab chiefs as *primus inter pares*. But in the new capital, the traditions of the Persian monarchy reasserted themselves, the ʿAbbāsid sat on his throne in solemn majesty, surrounded by his guards, the executioner with drawn sword by his side. At the same time he emphasised the religious aspect of his office by wearing the mantle of the Prophet, and his relationship to the Prophet was reiterated in official documents and in the lucubrations of eulogists and court flatterers.

From the 9th century onwards, the direct control of the Khalīfa over the administration weakened in consequence of the increasing delegation of power to the Wazīr [q.v.] and the growing elaboration and efficiency of the government offices (v. art. DĪWĀN). About the same period began the decline of the temporal power of the Khalīfa, in consequence of the break-up of the empire and the rise of independent principalities in the various provinces, until at last his authority hardly extended beyond the precincts of the city of Baghdād. Concurrently with this decline of his temporal power, increasing stress was laid on his position in the religious order, as *Imām* [q.v.] and as the defender of religion, and the persecution of heretics and of the adherents of non-Muslim faiths increased. By the year 946 all effective power had passed out of the hands of the Khalīfa, and there were to be seen in Baghdād three personages who had held this high office, but now deposed and blinded were dependent for their livelihood upon charity. From this period until 1055 the Khalīfa for the time being was but a puppet in the hands of the Būyids [q.v.] and the Seldjūḳs [q.v.] successively. But in spite of his entire lack of administrative authority, men could not forget the great position once held by his ancestors, and the impotent Khalīfa was still regarded by theorists as the source of all authority and power in the Muslim world. Accordingly, there were to be found independent rulers who sought from him titles and diplomas of appointment, e.g. Maḥmūd of Ghazna [q.v.], when he renounced his allegiance to the Sāmānid prince in 997, received from the Khalīfa recognition of his independent position, together with the titles Yamīn al-dawla, Amīn al-milla; and about a century later, Yūsuf b. Tāshfīn, the founder of the Almoravid dynasty of Spain, received the title of *Amīr al-Muslimīn* from the Khalīfa Muḳtadī. When in 1175 Saladin [q.v.] assumed the sovereignty of Egypt and Syria, he was confirmed in this rank by the Khalīfa Mustaḍī, who sent him a diploma of investiture and robes of honour. The founder of the Rasūlid [q.v.] dynasty in the Yaman, Nūr al-Dīn ʿUmar, likewise asked the Khalīfa for the title of Sulṭān and a diploma of investiture as his lieutenant, and Mustanṣir in 1235 sent a special envoy with the required document. This same Khalīfa had in 1229 responded to the request of Iltutmish [q.v.], the Turkish ruler of Northern India, for the title of Sulṭān and for confirmation in the possession of his dominions; and succeeding kings of Dihlī continued to put the name of Mustaʿṣim, the last Khalīfa of Baghdād, upon their coins for more than thirty years after this unfortunate prince had been put to death by the Mongols.

In contrast to this recognition of the Khalīfa in Baghdād as the legitimate source of authority,

is the establishment of two rival Khilāfats; in 928 ʿAbd al-Raḥmān III of Spain assumed the title of Khalīfa, which continued to be borne by his descendants: these Umaiyads of Spain, like their predecessors in Damascus, were Sunnīs; but the Fāṭimids of Egypt, whose founder styled himself Khalīfa first in Mahdiya in 909, were Shīʿīs, and were serious rivals to the ʿAbbāsids in Baghdād until the destruction of their dynasty by Saladin in 1171.

In 1258 Hulagū [q. v.] captured Baghdād and put to death the Khalīfa Mustaʿṣim, who perished leaving behind him no heir. The catastrophe was without parallel in the history of Islām, and for the first time the Muslim world found itself without a theoretical head whose name could be mentioned in the *Khuṭba* in the mosques on Fridays. Two members of the ʿAbbāsid family, who had escaped the massacre in Baghdād, took refuge one after the other with the Mamlūk Sulṭān of Egypt; the first, an uncle of Mustaʿṣim, was invited by Baibars [q. v.] to Cairo, and was there installed with great pomp as Khalīfa in 1261. Baibars is said to have conceived the idea of re-establishing the ʿAbbāsid dynasty in Baghdād and left Cairo with a large army, but after he had reached Damascus he provided the Khalīfa with only a small body of troops, which was destroyed by the Mongols on its way through the desert, and nothing more was ever heard of the Khalīfa. The second claimant arrived in Cairo in 1262 and was similarly installed as Khalīfa, but no attempt was made to repeat the rash experiment of regaining Baghdād, and the Khalīfa was kept a virtual prisoner in Cairo, though treated with outward marks of respect. For more than two centuries and a half, his descendants one after another continued to hold this shadowy office in Cairo, dependent on the bounty of the Mamlūk Sulṭān, who found the Khalīfa useful as lending a show of legitimacy to his rule. Each new Sulṭān was ceremoniously installed by the Khalīfa, to whom he in his turn paid allegiance. But not a single one of them (with the exception of Mustaʿīn, who was made the plaything of rival political factions in 1412 and for six months was styled Sulṭān) ever exercised any function of government or enjoyed any political power. Maḳrīzī [q. v.] describes the Khalīfa as spending his time among the nobles and officials, paying them visits to thank them for the dinners and entertainments to which they had invited him (*Histoire d'Egypte*, ed. E. Blochet, p. 76).

The rest of the Muslim world outside Egypt for the most part ignored the existence of the ʿAbbāsid Khalīfa in Cairo. From the 13th century there had been Sunnī Khalīfa in the Maghrib, and from time to time various princes in the eastern lands of the Muhammadan world assumed this title, Saldjūḳs, Tīmūrids, Turkomans, Uzbegs and Ottomans.

But a small number of independent princes, desiring to legitimize their claim to the obedience of their subjects, asked for formal recognition of their position and a grant of titles from the Khalīfa, e. g. the first two princes of the Muẓaffarid dynasty in southern Persia (1313—1384); Muḥammad ibn Tughlaḳ (1325—1351) and his successor on the throne of Dihlī, Fīrūz Shāh (1351—1388); even Bayazīd I [q. v.] is said to have applied in 1394 to the ʿAbbāsid Khalīfa in Cairo for a formal grant of the title of Sulṭān (v. Hammer, *Gesch. d. Osman. Reiches*², i. 195), but doubt has been cast upon the accuracy of this report. For, from the latter part of the 14th century, when after the conquest of Adrianople, Philippopolis etc. his father, Murād I, was styled "the chosen Khalīfa of God" (Firīdūn, i. 93, l. 22), it became common for the Ottoman Sulṭāns, as for other contemporary Muhammadan potentates, to claim for themselves the Khilāfa and to find this claim recognised by their subjects and their correspondents in other lands. The qualification of belonging to the tribe of Ḳuraish was ignored and sanction was sought for the usage in such verses of the Ḳurʾān as xxxviii. 25: "We have made thee a Khalīfa on the earth", and this and similar verses (e.g. vi. 165; xxv. 37) are constantly quoted in the diplomatic correspondence of the period. So when Selīm [q. v.] made his victorious entry into Cairo in January, 1517, and made an end of the ʿAbbāsid Khilāfa, by transporting the last representative of it, Mutawakkil, to Constantinople, he had already been accustomed to the use of the title Khalīfa as applied to himself, and to his ancestors for a century and a half. The legend that Mutawakkil made a formal transfer of his dignity to Selīm was first published by Constantine Mouradgea d'Ohsson in 1788 (*Tableau général de l'Empire Othoman*, i. 269—270, ed. 8vo., Paris, 1788—1824). None of the contemporary authorities who record the conquest of Egypt make any mention of such a transference of the office, and after the death of Selīm, Mutawakkil was allowed to return to Egypt and was Khalīfa there until his death in 1543. For the next two centuries, there were only two Muhammadan potentates whose extent of territory and power could add dignity to the title of Khalīfa (in contrast to the indiscriminate use of it by insignificant princes) namely, the Ottoman Sulṭān and the Mughal Emperor in India. With the fall of the Mughal empire in the 18th century, the Ottoman Sulṭān became manifestly the greatest figure in the Muslim world; but even his power was being threatened by his aggressive neighbour on the north, and after the war with Russia (1768—1774) he was obliged to surrender territories on the north shore of the Black Sea and recognise the independence of the Tartars of the Crimea. Catherine II claimed to be the patroness of the Christians of the Orthodox Church dwelling in Ottoman territories, and the Ottoman plenipotentiaries who negotiated the treaty of Kučuk Kainardji in 1774, took advantage of the title of Khalīfa, to make a similar claim for the Sulṭān, and got inserted in the treaty a clause asserting the religious authority of the Khalīfa over the Tartars who had ceased to owe him allegiance as a temporal sovereign. From this period onwards, it became a common error in Christian Europe to regard the Khalīfa as the spiritual head of all Muslims (just as the Pope is the spiritual head of all Catholics), and to credit him with the possession of spiritual authority over his co-religionists, though they might not owe him civil obedience as Sulṭān of Turkey. There is reason to believe that this widespread error in Christian Europe reacted upon opinion in Turkey itself. Particularly in the reign of Sulṭān ʿAbd al-Ḥamīd II (1876—1909), emphasis was laid on his position as Khalīfa, and in the Constitution promulgated at the beginning of his reign it was affirmed that „H.M. the Sulṭān, as Khalīfa, is the protector of the Muslim religion." He appears to have sent emissaries

to different parts of the Muhammadan world to encourage reverence for his own person as Khalīfa, and his efforts met with a certain response, since thoughtful Muhammadans (and especially those whose minds were disturbed by the growing control of European Powers over the affairs of the Muhammadan world) recognised that Turkey was the only independent Muslim power left, which was of any account in the civilised world. But the despotic and reactionary character of ʿAbd al-Ḥamīd's government, his cruel suppression of all liberal movements and all efforts for constitutional reform, alienated the more enlightened sections of his own subjects, and when he was deposed in 1909, the affairs of Turkey passed under the control of a body of men who had little sympathy with the Islāmic spirit and realised the impossibility of reconciling an autocracy that claimed to be based on divine revelation with modern constitutional methods of government. In November, 1922, Turkey became a republic and abolished the Sultanate, leaving the Khalīfa shorn of all temporal power; but it had not become clear what were to be the functions of the new Khalīfa before, in March, 1924, his office was abolished altogether.

In the above account, attention has been confined to the historic Sunnī Khilāfa which has played the most important part in Muhammadan history. The two other Sunnī Khilāfas, that of Spain and that of the Maghrib, have been only of local importance, and did not inspire loyalty in any other parts of the Muhammadan world; nor has the assumption of the title Khalīfa by some of the princes of Java been recognised except by their own subjects.

Among the Shīʿa, the attempts made from time to time to secure for the ʿAlīds a position of power and independence, met with but scant success, and the Fāṭimids [q. v.] of Egypt represent the only Shīʿī Khilāfa of any importance. In Persia the establishment of the Ṣafawid [q. v.] dynasty in 1502 did not succeed in making Shīʿism the State religion in Persia until long after the doctrine of the hidden *Imām* had become a cardinal doctrine of the Shīʿa faith in that country.

Bibliography: An enumeration of the sources for the history of the Khilāfa would comprise the major part of the historical literature of the whole of the Muhammadan era. For the Arabic sources F. Wüstenfeld, *Die Geschichtschreiber der Araber und ihre Werke*, and C. Brockelmann, *Geschichte der arabischen Litteratur* may be consulted. Among the more important sources may be mentioned: Ṭabarī, *Annales*; Ibn al-Athīr, *Chronicon*; al-Suyūṭī, *Taʾrīkh al-Khulafāʾ* and *Ḥusn al-Muḥāḍara*; al-Maḳrīzī, *al-Sulūk li-Maʿrifat Duwal al-Mulūk* (partly translated by Quatremère in *Histoire des Sultans Mamlouks*); al-Maḳḳarī, *Nafḥ al-Ṭīb*; *Chroniken der Stadt Mekka*, ed. F. Wüstenfeld; Rashīd al-Dīn, *Djāmiʿ al-Tawārīkh*; Aḥmad Ferīdūn Bey, *Munshaʾāt al-Salāṭīn*; Muṣṭafā Ṣabrī al-Tūḳādī, *al-Nakīr ʿalā munkiri ʾl-niʿma min al-dīn wa ʾl-khilāfa wa ʾl-umma*, Bairut, 1924. Among European writers, Caetani, *Annali dell' Islām* (Milano, 1905 *sqq.*); G. Weil, *Geschichte der Chalifen*, 5 vols. (1846—1862); A. Müller, *Der Islām im Morgen- und Abendland* (1885, 1887); W. Muir, *The Caliphate*; J. von Hammer, *Geschichte des Osmanischen Reiches*; A. de la Jonquière, *Hist. de l'empire ottoman*, 2nd ed. Paris 1914; *Oriente Moderno* (Rome 1921 *sqq.*); C. A. Nallino, *La fine del così detto Califfato ottomano* (*Oriente Moderno*, iv. 137 *sqq.*); R. Hartmann, *Wesen u. Ende des osm. Chalifats*, Leipzig 1924; H. Ritter, *Die Abschaffung des Kalifats* (*Arch. f. Politik und Geschichte*, ii. 343 *sqq.*, Berlin 1924).

2. Political Theory. As stated above, the theory of the Khilāfa was largely an outgrowth from the political circumstances of early Muhammadan history, but speculation has elaborated many forms of the doctrine that have failed to secure for themselves expression in actual historical facts. Al-Shahrastānī (ed. Cureton, p. 12) says that no article of faith has given rise to such bloodshed and contention in every period of Muslim history as this. (*a*) The orthodox Sunnī doctrine first found expression in the Ḥadīth, which emphasised preeminently two essential characteristics of the Khalīfa; one, that he must be of the tribe of the Ḳuraish (*Kanz al-ʿUmmāl*, iii., Nº. 2983; vi., Nº. 3457, 3499), and the other, that he must receive unhesitating obedience, for whosoever rebels against the Khalīfa, rebels against God (id. iii., 2580, 2999, 3008). This claim on obedience to the despotic power of the Khalīfa as a religious duty was impressed upon the faithful by the designations that were applied to him from an early date, — Khalīfa of God, and Shadow of God upon earth. The first systematic exposition of the generally accepted doctrine is found in Māwardī's *al-Aḥkām al-Sulṭāniyya* (ed. R. Enger, Bonn 1853; Cairo 1298, 1327; trans. E. Fagnan, Alger 1915). Māwardī insists upon the following qualifications in a Khalīfa: — membership of the tribe of Ḳuraish, male sex, full age, good character, freedom from physical or mental defects, competency in legal knowledge, administrative ability, and courage and energy in the defence of Muslim territory. In spite of the fact that the office became hereditary in two families successively, the Umaiyad and the ʿAbbāsid, Māwardī maintained that it was elective, and was at pains to reconcile the doctrine of election with the historic fact that from the reign of Muʿāwiya (661—680) [q. v.] almost every Khalīfa had nominated his successor. The fiction of election was preserved in the practice of *baiʿa* [q. v.], the taking of the oath of allegiance, first by the nobles of the court and then by the general assembly before whom the new Khalīfa was proclaimed. The functions of the Khalīfa were defined by Māwardī as follows: the defence and maintenance of religion, the decision of legal disputes, the protection of the territory of Islām, the punishment of wrongdoers, the provision of troops for guarding the frontiers, the waging of *djihād* [q. v.] against those who refused to accept Islām or submit to Muslim rule, the organisation and collection of taxes, the payment of salaries and the administration of public funds, the appointment of competent officials, and lastly, personal attention to the details of government. About three centuries later Ibn Khaldūn [q. v.] approached the subject in a more critical spirit and discussed the institution of the Khilāfa in his *Muḳaddima* (chap. 25—8), written between 1375 and 1379; he faced the facts of history and recognised that with the disappearance of the Arab supremacy there was nothing left of the Khilāfa but the name. His account of the origin and purpose of the institution agrees with that given by

Māwardī; the Khalīfa is the representative (*nā'ib*) of the Prophet, the exponent of the divinely-inspired law (*sharī'a*), and his functions are the protection of religion and the government of the world; he must belong to the tribe of the Ḳuraish, and possess the other personal qualifications laid down by Māwardī. But there were other legists who frankly faced the fact that force had taken the place of theory in the Muslim world, and worked out a constitutional theory accordingly; of such writers Badr al-Dīn Ibn Djamā'a (ob. 733 = 1333) is a typical example; in his *Taḥrīr al-Aḥkām fī Tadbīr Millat al-Islām* (K. K. Hofbibl., Wien 1830), he lays it down that the *Imām* may obtain his office either by election or by force; in the latter case allegiance must be paid to an *Imām* who by force of arms seizes the office, and such usurpation is justified in consideration of the general advantage and unity of the Muslim community gained thereby (foll. 7—8). Another school of legists abandoned all such attempts to justify the fluctuating course of Muslim history and based their doctrine on the Ḥadīth that the Khilāfa endured for only thirty years, i. e. up to the death of 'Alī (*Kanz*, iii., N⁰. 3152); this was the view of al-Nasafī [q. v.] (ob. 537 = 1142) (see *al-'Aḳā'id*, ed. Cureton, London 1843, p. 4), and it was adopted by the great Turkish jurist, Ibrāhīm Ḥalabī (ob. 1549), whose *Multaḳa 'l-Abḥur* became the authoritative code of Ottoman law. (*b*) The Shī'ī theologians made the doctrine of the Imamate a cardinal principle of faith; they laid stress on legitimacy, and confined the office of the Khalīfa not merely to the Ḳuraish but still further to the family of 'Alī; with the exception of the Zaidīya [q. v.], they rejected the doctrine of election, and held that 'Alī was directly nominated by Muḥammad as his successor and that 'Alī's qualifications were inherited by his descendants, who were pre-ordained by God for this high office. Muḥammad is said to have communicated to 'Alī certain secret knowledge, which was in turn handed on to his son and was thus carried on from generation to generation; each *Imām* possesses superhuman qualities which raise him above the level of the rest of mankind, and he guides the faithful with infallible wisdom, and his decisions are absolute and final. According to some, 'Alī owed this superiority to a difference in his substance, for from the creation of Adam a divine light passed into the substance of one chosen descendant in each generation and has been present in 'Alī and in each one of the *Imām*'s that succeeded him. The sectarian development of Shī'a doctrine was considerable, see art. ITHNĀ 'ASHARIYA, ISMĀ'ĪLIYA, RĀFIḌA, ZAIDIYA. (*Bibliography*: al-Shahrastānī, *Kitāb al-Milal wa 'l-Niḥal*, p. 108 *sqq.*; Ibn Khaldūn, *Prolégomènes*, i. p. 400 *sqq.*). (*c*) The antithesis of Shī'ī doctrine was taught by the Khawāridj [see KHĀRIDJITES], who so far from confining the office of Khalīfa or *Imām* to any one tribe or family, held that any believer was eligible, even though he were a non-Arab or even a slave; they further separated themselves from other Muslims in maintaining that the existence of an *Imām* is not a matter of religious obligation and that at any particular time the community can fulfil all the obligations imposed upon them by their religion, and have an entirely legitimate form of civil administration, without any *Imām* being in existence at all; when, under special circumstances, it may be found convenient or necessary to have an *Imām*, then one may be elected, and if he is found to be in any way unsatisfactory, he may be deposed or put to death (al-Shahrastānī, *op. cit.*, i. p. 85 *sqq.*).

All the above classes of political theory found expression in some form or other of actual political organisation, but there were also statements of the doctrine of the Khilāfa that never emerged out of the sphere of speculation, especially those elaborated by thinkers of the Mu'tazila school, e. g. that the office of Imām should not be filled during periods of civil war but only in times of peace; that no one could be Imām except with the unanimous consensus of the whole Muslim community (al-Shahrastānī, *op. cit.*, p. 51; Goldziher, *Hellenistischer Einfluss auf mu'tazilitische Chalifats-Theorien*, in *Der Islam*, vi. 173—7).

Bibliography: The Ḥadīth can be most conveniently studied in al-Suyūṭī's *Kanz al-'Ummāl*, Ḥaidarābād 1312—1314. Muslim expositions: Māwardī (see above); 'Aḍud al-Dīn al-Īdjī, *al-Mawāḳif fī 'Ilm al-Kalām* (Constantinople 1239); Ibn Ḥazm, *Kitāb al-Faṣl fi 'l-Milal wa 'l-Ahwā' wa 'l-Niḥal*, iv. 87 *sqq.*, Cairo 1320; al-Shahrastānī, *Kitāb al-Milal wa 'l-Niḥal*, ed. (T. W. ARNOLD)

KHALĪFA SHĀH MUḤAMMAD, author of a collection of letters in Persian, entitled *Djāmiʿ al-Ḳawānīn* or *Inshā'-i Khalīfa*, written while he was a student at Ḳannawdj and collected by him at the request of his friends in 1085 (= 1674/5). It is much appreciated in India, and has been printed several times.

Bibliography: Rieu, *Cat. of Pers. Mss. in the British Museum*, i. 414.

AL-KHALĪL, the ancient Hebron, so called after the "friend of God" (*khalīl*), Abraham (see the art. IBRĀHĪM), a town in South Palestine (also called Ḥabrūn, Ḥabrā or Masdjid Ibrāhīm). It lay in an exceedingly fertile valley between the heights of the Djabal Naṣra (? reading uncertain) noted especially for its richness in fruits. According to a widely disseminated legend, Muḥammad is said to have granted the four districts Ḥabrūn, al-Marṭūm (so Yāḳūt, ii. 194; in Nāṣir-i Khusraw, *Safar-nāma*, ed. Kawiani 1923, p. 40, 14: Matlūn, var. Martūn, Martūm; in al-Ḳalḳashandī, *Ṣubḥ al-Aʿshā*, ed. Cairo, xiii. 120, 4: al-Ruṭūm), Bait ʿAinūn (i. e. *Ainon*, St. John's Gosp., iii. 23 etc., Khirbet Bet ʿEnūn) and Bait Ibrāhīm as a fief to the oil and lamp-dealer Tamīm b. Aws al-Dārī, a convert to Islām, and to his descendants. To Tamīm al-Dārī is traced the custom of having lamps continuously lighted in the mosque (Clermont-Ganneau, *Rec. d'Arch. Orient.*, viii. 216—220). Al-Khalīl is still regarded as the *waḳf* of the Tamīmīs. There is no doubt, however, that the alleged letter of the Prophet to Nuʿaim b. Aws al-Dārī, the brother of Tamīm, is a later forgery intended to confirm the claims of the Tamīmīs (Caetani, *Annali dell' Islām*, ii/1. 298, 9 a. H., § 69).

Our only information regarding the history of the town in the early centuries A. H. comes from a few scanty Frankish sources of which the most important is the full account of the examination of the sepulchral caves by Christian monks in the year 1119/1120 (publ. by Riant in the *Recueil des Hist. des Croisades*, *hist. occid.*, v. 302—316). According to this (p. 309), the Jews showed the Arab invaders the entrance to the sanctuary, which had been walled up by the Byzantines, and in return they received permission to live on in peace in al-Khalīl and to build a synagogue before the entrance to the "Abrahamium". When the Byzantine church was turned into the *Masdjid Ibrāhīm* cannot be exactly ascertained; the first information regarding the mosque is given by al-Iṣṭakhrī and Ibn Ḥawḳal in the tenth century (not the eighth, as wrongly stated by Le Strange, *Palestine*, p. 309, and Vincent, *Hébron*, p. 160). According to al-Muḳaddasī, who is the first to give us a more detailed description of al-Khalīl, Abraham's tomb was covered over by a dome built in Muslim times (according to Mudjīr al-Dīn, translated by Sauvaire, p. 12, it was already done under the Umaiyads). The tomb of Isaac was in a part covered over (*mughaṭṭā*) and Jacob's was on the opposite side. This writer is also the first to mention the rich endowments which were given to the sanctuary by pious princes from remote lands, and the hospitable reception and provision of oil and lentils which the Tamīmīs in the hospice gave to pilgrims, but he thought for purely religious reasons it better to abstain from them. The Maghribī theologian al-ʿAbdarī of Fās (d. 737 = 1336) later denounced the eating of these lentils (which were known as *ʿadas Khalīlī*) and issued a warning against praying inside the mosque (instead of in front of it), as the exact site of Abraham's grave was not known; he is particularly rigorous against the dances associated with the "parade-music of Khalīl" (from which comes the name *Khalīlīya* for a band intended for parades), which one could see every day in the sanctuary (Goldziher, *Z.D.P.V.*, 1894, xvii. 115—120; cf. also Schreiner, *Z.D.M.G.*, liii. 51 *sqq.*).

Half a century before the beginning of the Crusades Nāṣir-i Khusraw visited the town (1047), which in those days lay on the north side of the Ḥaram only; in his journal he gives a minute description of the sanctuary. According to him, a gate was first made in the middle of the north-(east) wall by the Fāṭimid Caliph al-Mahdī (918 A.D.); the Ḥaram had previously been inaccessible. The covered part of the sanctuary (*maḳṣūra*), which contained the graves (cenotaphs) of the patriarchs, was richly decorated and provided with numerous niches (*miḥrāb*).

After the capture of al-Khalīl by the Crusaders, Godfrey de Bouillon granted the seigneurie of Hebron in 1100 to Gérard d'Avesnes (d. 1102). He was followed by Hugo de Rebèque, Robardus (Rorgius), Galterius Mahomet and lastly Baldwin, in whose time (in 1119) the graves of the patriarchs were discovered (see above). He and his successors were apparently simply governors of Hebron and were at first under the King of Jerusalem, and later, from about 1155, under the Lord of al-Karak. In 1168 Hebron was made a bishopric.

ʿAlī of Herāt, who visited Jerusalem and al-Khalīl in 567 (1171/1172), says that he made the acquaintance of a Christian knight in Bait Laḥm, who had once visited the sepulchral caves of the patriarchs, when a boy of thirteen, with his father; these, he said, were afterwards restored by command of King Bardawīl (Baldwin II) by a knight named Djufrī b. Djurdj (Godfrey, son of George). It was perhaps at King Baldwin II's instigation that the buildings around the Ḥaram arose, in which the formerly flat roof of the *maḳṣūra* was replaced by a system of arches with sloping roofs (Vincent, *Hébron*, p. 166).

After the battle of Ḥaṭṭīn, al-Khalīl again passed into the hands of the Arabs. According to a supposition of Mudjīr al-Dīn (ed. Būlāḳ, p. 56 below, transl. Sauvaire, p. 16), which is not quite improbable (cf. Vincent, *op. cit.*, p. 242—250), the *minbar* which stands beside the niche (*miḥrāb*) in the Ḥaram and, according to a still extant Kūfic inscription, was originally donated by the Fāṭimid Caliph al-Mustanṣir in 484 (1091/1092) for the martyrion (*Mashhad*) of al-Ḥusain b. ʿAlī in ʿAsḳalān, was brought to al-Khalīl by order of Ṣalāḥ al-Dīn (apparently in 588 = 1192 after the razing of the walls of ʿAsḳalān) and put up in the Ḥaram (van Berchem in the *Festschrift Eduard Sachau gewidmet*, Berlin 1915, p. 298—310; Vincent, *Hébron*, p. 219—250). After the death of Ṣalāḥ al-Dīn, al-Khalīl passed to al-Nāṣir Dāʾūd of al-Karak; it was, it is true, taken from him with other towns in 1244 by the armies of the Sulṭān al-Ṣāliḥ Aiyūb but he recaptured it next year with the help of the Khwārizmīs.

To this period belong two full descriptions of the Ḥaram, that of Abu 'l-Fidāʾ Isḥāḳ al-Khalīlī, whose account written in 1351 was copied by al-Suyūṭī (1470) and Mudjīr al-Dīn (1496), and

that of Ibn Baṭṭūṭa, who visited al-Khalīl in 1355. The latter defends (as al-Idrīsī had done previously [*Z.D.P.V.*, viii. 127]) the correctness of the location of the tombs of the patriarchs (which others doubted, like his countryman al-ʿAbdarī; see above). Isḥāḳ of Hebron quotes, giving a number of intermediate sources, the story handed down by an attendant of the mosque of Abraham, Muḥammad b. Bakrān al-Khaṭīb (c. 320 = 932), which is already found in shorter form in ʿAlī Harawī. In it a benefactor of the sanctuary, Abū Bakr al-Iskāfī, relates how by his own request he was taken down into the sepulchral cave, to reach which he had to descend 72 steps. The details of the story, however, are obviously invented; the same Muḥammad b. Bakrān is responsible for the fantastic "translation" by a learned Shaikh of Ḥalab of a still extant Greek inscription (Mader, *Altchristl. Basiliken*, p. 135, note 3; Vincent, *Hébron*, p. 160 *sq.*).

The Mongols took the town in 1260 but were driven out by Baibars the same year. When Sulṭān, the latter visited al-Khalīl in May, 1266. Jews and Christians were then strictly forbidden access to the Ḥaram (Röhricht, *Gesch. d. Königr. Jerusalem*, p. 929). In 1267, by command of Baibars, the mosque was rebuilt and in 1268 the town (al-Maḳrīzī, transl. Quatremère, ii. 48, 51); this can only refer to quite unimportant structural alterations at the Ḥaram (Vincent, *op. cit.*, p. 190). Ḳalāʾūn (1279—1290), as we learn from his inscriptions in al-Khalīl, also had decorations and facings for the walls made at different parts of the Ḥaram.

Mudjīr al-Dīn gives us some further information regarding the embellishment and structural alterations in the sanctuary. The viceroy (*nāʾib*) of Syria, Tenkiz, Abu ʾl-Fidāʾ's contemporary, had the four inner façades of the masdjid covered with marble in 732 (1331/32) (van Berchem, *Z.D.P.V.*, 1896, xix. 111 *sq.*). Considerable alterations took place under Sulṭān Barḳūḳ at the instigation of Shihāb al-Dīn Aḥmad al-Yaghmūrī, governor of Jerusalem and al-Khalīl and guardian of the two sanctuaries. In 796 (1394), besides the erection of a new *miḥrāb* for Mālikīs in the Women's Mosque, a new door was put on the west side of the former Byzantine church immediately behind the tomb of Abraham and another in the west wall of the Ḥaram (in the so-called "Wall of Solomon"), the latter near the Maḳām of Joseph. This sanctuary had been built by Sulṭān Nāṣir Ḥasan (1347—61) beside the mediaeval Ḳalʿa (the later Madrasa). Its entrance lay opposite the "well of the eunuchs" (*ʿAin al-Ṭawāshī*). Al-Yaghmūrī had a dome built over the Maḳām which was similar to those over the tombs within the Ḥaram. In the reign of Sulṭān Muḥammad al-Nāṣir (1293—1341), the Amīr Sandjar al-Djāwulī had already built the mosque against the north-east wall of the Ḥaram in 718—720 (1318—1320), which is called Djāwuliya after him, into the rocky sides of the Djabal Djaʿbīra. The Mamlūk Sulṭāns al-Malik al-Ashraf, Īnāl (859 = 1454) and al-Ẓāhir Khoshḳadam (867 = 1462/63) were also benefactors of the Ḥaram and of the Djāwuliya Mosque.

We know nothing further of the history of al-Khalīl and the architectural history of its Ḥaram after 901 (1496) when Mudjīr al-Dīn wrote his book; probably building in the Ḥaram had finished about this time. From the 400 years of Turkish rule (1517—1917) we only possess a few inscriptions of the years 1008 (1599/1600) to 1313 (1895/1896, of ʿAbd al-Ḥamīd, in Vincent, *op. cit.*, p. 206, fig. 79), apart from the notices by western travellers.

The modern al-Khalīl consists of the seven quarters Ḥāret el-Shēkh (scil. Shēkh ʿAlī Bakkā), Ḥ. Bāb el-Zāwiye, Ḥ. el-Ḳazzāzīn, Ḥ. el-ʿAḳḳābīn, Ḥ. el-Ḥaram, Ḥ. el-Mashāriḳa and Ḥ. el-Ḳiṭūn. It lies in the Wādī ʾl-Khalīl between the hills of el-Rumaide, on which lay the ancient town, and Ḍahr Abu ʾl-Rummān in the south-west and the Djebel Djaʿbīre in the north-east.

The number of its inhabitants was 17,000 in 1922, of whom 1,500 were Jews. Of the buildings in al-Khalīl, the Ḥaram is by far the most important. As a result of the fanatical suspicions of the people so far only a very few Europeans have managed to make a brief visit to its interior. It was not till the week from Jan. 26 to Feb. 2, 1920, that, after some preliminary work by Major Richmond, the French archaeologist L. H. Vincent and Capt. E. J. H. Mackay were able to make a more detailed archaeological investigation and to survey the system of buildings. The tombs of the patriarchs, said, according to old tradition, to exist under the Ḥaram, have so far not been explored.

(E. HONIGMANN)

al-KHALĪL b. AḤMAD b. ʿAMR b. TAMĪM AL-FARĀHĪDĪ AL-AZDĪ, Arab grammarian and philologist, a native of ʿUmān, died at al-Baṣra, aged 75, between 170 and 175 (786 and 791).

He studied Islāmic traditions and philology with Aiyūb al-Sakhtiyānī, ʿĀṣim al-Aḥwal, al-ʿAwwām b. Ḥawshab, etc. On the advice of his master Aiyūb he abandoned the Abāḍī doctrine for Sunnī orthodoxy; he was very pious and lived in poverty. Among his pupils may be mentioned Sībawaih, al-Aṣmaʿī, al-Naḍr b. Shumail, al-Laith b.

al-Muʾarridj b. Naṣr, etc. All the biographers agree in attributing to him the discovery of Arabic prosody and its rules; and in spite of several other attempts made, it is his system that still holds sway to-day. However, there has only survived to us of his works on the subject the specimen verses reproduced in various treatises.

Al-Khalīl was also the first to compile an Arabic dictionary: *Kitāb al-ʿAin*. He seems to have followed the alphabetical order of the Sanskrit grammarians which begins with the gutturals and goes on to the labials: ʿain, ḥāʾ, hāʾ, khāʾ, ghain, ḳāf, kāf, djīm, shīn, ḍād, ṣād, sīn, zāʾ, ṭāʾ, dāl, tāʾ, ẓāʾ, dhāl, thāʾ, rāʾ, lām, nūn, fāʾ, bāʾ, mīm, wāw, alif (hamza), yāʾ. It has been asserted that al-Khalīl is not the author of the *Kitāb al-ʿAin* but his pupil al-Laith; others say that al-Naḍr compiled it on lines drawn up by his master or that he finished it. We may believe that these are only attempts to minimise the fame of al-Khalīl. In any case all that survives of this dictionary is the synopsis *Mukhtaṣar* made by the learned Spanish lexicologist, Abū Bakr al-Zubaidī (Berlin, *Verz.*, Nº. 6930—6932; Madrid, Bibl. Nac., Nº. 5; *Bibl. de la Junta*, Nos. 35 and 49; Constantinople, Köprülü, Nº. 1574; *Les manuscrits arabes de l'Escurial*, Derenbourg, Nº. 569, 570, 571).

Other works attributed to al-Khalīl have survived but their authenticity, at least in their present form, is suspect: 1. *Kit. fī Maʿnā 'l-Ḥurūf*, Cat. *Cod. Arab.*, i. 81; Berlin, Nº. 7023/7016; 2. *Kit. Sharḥ Ṣarf al-Khalīl*, fragment Berlin, Nº. 6909; 3. *Kit. fīhi Djumlat Ālāt al-Iʿrāb*, Aya Ṣofya, Nº. 4456; 4. Fragment on the conjugation of the verb, Bodl., i., Nº. 1067, 4.

(Moh. Ben Cheneb)

KHALĪL B. Isḥāḳ B. Mūsā B. Shuʿaib, Abu 'l-Mawadda Ḍiyāʾ al-Dīn, known as (Ibn) al-Djundī, commonly called Sīdī Khalīl in Algeria, a great Mālikī jurist of Egypt, died in Cairo on Rabīʿ I 13, 776 (= Aug. 22, 1374), according to others in 767 or 769.

He studied under Ibn ʿAbd al-Hādī, al-Rashīdī and notably ʿAbd Allāh al-Manūfī. Born of a Ḥanafī father, he adopted the Mālikī school at the instance of al-Manūfī. On the latter's death in 749 (1348) Khalīl devoted himself to teaching and lectured at the al-Shaikhūniya school.

He also saw service in the victorious guard and in this capacity took part in the capture of Alexandria from the Christians in 767 (1365—1366). He later lived retired from the world and devoted himself to study and works of piety. He made the pilgrimage to Mekka and spent some time in Medina.

From the legal point of view Khalīl, like his model Ibn al-Ḥādjib, represents the school of law a little affected by Shāfiʿism formed by the fusion of Egyptian and Maghribī tendencies in the Mālikī school. His *Mukhtaṣar*, in spite of its conciseness which verges on obscurity, is the manual of law which has been and still is most studied in Algeria. It was printed in Paris in 1855 and again and again till 1883; in 1900 a new edition was brought out in Paris by G. Delphin. E. Fagnan has published *Concordances du Manuel de droit*, Algiers 1889, based on the edition of 1883. Dr. Perron has given a substantial translation in which he has combined the text and the commentary: *Précis de jurispr. musulm. ou Principes de législ. musulm. civile et relig. selon le rite malékite*, Paris 1848—1854. Several partial translations have appeared since: Sautayra and Cherbonneau, *Du Statut personnel et des successions*, Paris 1873—1874; Seignette, *Code musulman par Khalil, rite malékite. — Statut réel*, Constantine 1878; Fagnan, *Le Djihād ou Guerre Sainte*, Algiers 1908; do., *Mariage et répudiation, trad. avec comment.*, Algiers 1909. — Among other works by Khalīl b. Isḥāḳ are mentioned: 1º. *al-Tawḍīḥ*, commentary on the *Mukhtaṣar* of Ibn al-Ḥādjib, Algiers, Bibl. Nat., Nos. 1077—1084; 2º. *Kit. al-Manāsik*, Brit. Mus., *Cat.*, Nº. 259, ii., Bibl. Khéd., *Fihrist*, iii. 184; 3º. *Manāḳib al-Shaikh ʿAbd Allāh al-Manūfī*, biography of his teacher, Bibl. Khéd., *Fihrist*, v. 159; 4º. *Ḍabṭ al-Muwadjdjahāt wa-Taʿrīfuhā*, Bibl. Khéd., *Fihrist*, vii. 278.

(Moh. Ben Cheneb)

KHALĪL, al-Malik al-Ashraf Ṣalāḥ al-Dīn, was the second son of Sulṭān Ḳalāʾūn; his eldest brother is said to have been poisoned by him. As he lay under this suspicion and was also of an immoral and irreligious life (he was accused of pederasty and of drinking wine in Ramaḍān), Ḳalāʾūn could not bring himself to sign Khalīl's appointment as heir-apparent. Nevertheless he was regarded as successor to the throne and acclaimed Sulṭān on Ḳalāʾūn's death in 689 (1290). His first official act was to dismiss the high officials of his father's court with whom he was on bad terms and to prosecute them and appoint his favourites to important posts. But he continued his father's foreign policy, the goal of which was the destruction of the Crusaders in Syria, and again took up the plan of besieging ʿAkkā. After

careful preparations he advanced with such superiority against the town that, in spite of a brave defence and help from Cyprus by sea, it could not hold out for long. The town itself was first taken, then the strongly fortified towers of the Knights which formed a kind of donjons within the town. The male inhabitants were put to death and the women and children deported to Egypt; but the women were later permitted to go to Cyprus. The other towns still in possession of the Crusaders offered no resistance worth mentioning. Ṣaidā (Sidon), Tyre, ʿAthlīth, Haifā and Bairūt fell. The last named alone had surrendered so that it was not destroyed like the others. The Christian inhabitants who did not migrate had to pay poll-tax. Rejoicings were held for a month in Damascus and the Sulṭān's name became celebrated as that of the final liberator of Syria for all time. Khalīl afterwards planned a campaign against the Tatars in the ʿIrāḳ, but he contented himself with the occupation of their fortress Ḳalʿat al-Rūm. The king of Armenia, who felt himself threatened, ceded him several towns to secure peace. Khalīl also carried out his father's plans for the fortification and development of the Syrian cities; in the citadels of Aleppo, Baʿalbek, Damascus and the great mosque of Tripoli we find him named as the builder.

He was after his fashion fanatical; for example he demanded that the Christian officials in Damascus should adopt Islām; those who refused were fined up to 1,000 dīnārs. He was personally hated by those around him for his evil life and his cruelty. He treated contemptuously even the highest officials, like his Atabek Baidarā. The high dignitaries therefore could stand him no longer and conspired against his life in 693 (1293) and took advantage of a hunting expedition in Upper Egypt to murder him. This able and energetic prince thus only ruled four years. As he left only two daughters, the throne passed to his younger brother Muḥammad [q. v.].

KHALĪL EFENDI ZĀDE, MEḤEMMED SAʿĪD EFENDI, one of the ʿulamāʾ of the time of Sulṭān Maḥmūd I (1730—1754). He was the son of Birgili Khalīl Efendi who was twice Ḳāḍī-ʿasker of Anatolia. He studied under his father, then passed through the usual Madrasa course and beginning as mollā of Yeni-shehir in 1135 (1722—1723) ascended the various steps of the ʿulamāʾ hierarchy to the highest office. He was appointed Shaikh al-Islām in 1162 (1749) but was dismissed within ten months in 1750 on account of his stern and unyielding disposition and banished to Brusa where he died in 1168 (1754/55) and was buried near Amīr Sulṭān.

He was regarded as a learned man, ready with his pen, and well fitted for all the claims of his office. Besides a commentary, he left the Turkish translation of a part of the history of ʿAinī († 762). Of his sons and grandsons several were notable theologians.

KHALĪL PASHA, name of three Turkish Grand Viziers:

1) ČENDERELI KHALĪL PASHA in the reign of Murād II, vide ČENDERELI.

2) KAIṢARIYELI KHALĪL PASHA, Grand Vizier under Aḥmad I and Murād IV. He was an Armenian by birth, born in a village called Ruswān in the neighbourhood of Kaiṣariya (Munedjdjim Bashi; the statement of the *Sijill-i ʿOthmānī*, ii. 286, that he came from Marʿash is incorrect). The date of his birth is not given but must be about 1560. Having been educated at court as *Iċ Oghlan*, he entered the corps of the falconers and became *doghandji bashi*, in which capacity he was in Sulṭān Muḥammad's III immediate entourage during the Hungarian campaign of 1596. In 1016/1607 he became Agha of the Janissaries and fought bravely under the Grand Vizier Murād in the campaign against the rebels in Anatolia. Next year Khalīl was appointed *Kapudan Pasha* as a successor of Ḥāfiẓ Aḥmad Pasha [q. v.]. In this office he was very successful and captured many Maltese and Florentine ships, especially in 1018/1609, when he took, in a battle with the Maltese near Cyprus, a big and famous galleon, called by the Turk *Kara Ḏjehennem* (in Europe known as "the red Galleon"). This success procured him the rank of *wezīr*. From the end of 1020/1611 to 1022/1613 he was replaced as *Kapudan* by Öküz Muḥammad Pasha, who had become a *dāmād*, but the latter, having been defeated by the Spanish when convoying Egyptian ships to Constantinople, Khalīl was made Grand Admiral a second time. In 1023/1614 he went on an important expedition, first raided Malta, and then went to Tripoli in Africa, where he captured and killed a usurper called Ṣafar Dāʾī. During his admiralship Khalīl displayed much diplomatic activity in trying to form a confederation against Spain with Holland and Morocco. Therefore he encouraged the Dutch to enter into relations with the Porte and became a powerful protector to the first Dutch ambassador Haga who arrived in 1612. Ever afterwards he showed himself a friend of the Dutch interests, although the planned confederation did not materialise.

In Muḥarram 1026/January 1617 he was appointed Grand Vizier in succession to Öküz Muḥammad Pasha, who had been unsuccessful in the war against Persia and to the disappointment of the latter's *ḳāʾim maḳām* Aimadji Zāde. In February of that year he showed his liberal-mindedness by protecting the Christian ambassadors in the capital against an attempt of the ʿulamāʾ to impose the *ḵharādj* on them. In the same year the Austrian envoy Count Czernin after the failure of his negotiations left Constantinople and in Ramaḍān [September] preliminaries were signed with Poland at Busa. Khalīl, however, seems to have been more interested in entertaining good relations with Venice, Holland, France and England and pacifying the Algerian corsairs. He did not play a prominent part in the course of events, when after Aḥmad's I death (23 Dhu ʾl-Ḳaʿda 1026/22 Nov. 1617), Muṣṭafā I was placed on the throne and three months afterwards replaced by ʿOthmān II (1 Rab. I 1027/26 Febr. 1618). In the beginning of 1618 he took command of the army sent against Persia. The vanguard of the Turkish army was defeated in the plain of Sarāw, but Khalīl, marching against Ardebīl, induced the Shāh to

negotiate a peace treaty, which was signed on the same plain (6 Shawwāl 1027/26 Sept. 1618) on the same conditions as the former treaty. On his return to the capital he was dismissed from the office of Grand Vizier and had even to take refuge with the great Shaikh Maḥmūd of Skutari, one of whose adepts he was (1 Ṣafar 1028/18 Jan. 1619). Sulṭān ʿOthmān reproached Khalīl, that he had not helped him to succeed to the throne immediately after Aḥmad's death, but, on the intercession of Shaikh Maḥmūd the ex-Grand Vizier was appointed *Ḳapudan Pasha* a third time. With an interruption of six months in 1621 he occupied this position successfully. In May 1622 ʿOthmān II was murdered by the Janissaries and Muṣṭafā restored. During the reign of terror of the Janissaries and their chiefs that followed, Khalīl did not sympathise with them and even refused three times the Grand Vizierate offered to him by al-Wālide Sulṭān (5 Febr. 1623). Two months before, he had been the object of a hostile demonstration by the Janissaries who accused him of protecting their enemy Abāza Pasha [q. v.]. Still he had great influence and protected in December 1622 the Polish ambassador against anti-Polish demonstration. But after Mere Ḥusain Pasha had become Grand Vizier, he was dismissed from the office of Ḳapudan Pasha and banished to Malghara, where he went in April 1623, not without opposition, especially from the Sipāhīs, for he was the most popular of the then living viziers. Abāza Pasha, who in Erzerūm had rebelled against the Government claiming revenge for ʿOthmān's death, was a former protégé of Khalīl's, who, as Ḳapudan, had given him the command of a galley and, as Grand Vizier, had appointed him governor of Marʿash; his rebellion, however, was contrary to Khalīl's advice. Three years after the removal of Muṣṭafā (4 Dhu ʾl-Ḳaʿda 1032/30 Augustus 1623) and the succession of Murād IV, when Abāza's rebellion continued, it was due to this fact, that Khalīl was appointed a second time Grand Vizier — in succession to Ḥāfiẓ Aḥmad Pasha [q. v.] — in a large assembly in presence of the highest *ʿulamāʾ*, as it was hoped that he would succeed in pacifying his former client (Dec. 1626). Three days afterwards he crossed the Bosporus, visited his old friend Shaikh Maḥmūd, and reached Aleppo in March 1627. In July the army went to Diyār Bekr. At first an expedition was sent against Akhiskha, threatened by the Persians, while Khalīl tried to obtain Abāza's submission and collaboration in this enterprise. But Abāza, fearing an ambush, declined and, having at first adopted a conciliatory attitude, he massacred the Janissaries at Erzerum. Khalīl was obliged to march against him and began in September the siege of Erzurum. After 70 days, however, in November, an extremely severe winter began. The army was obliged to retreat to Toḳat with heavy losses occasioned by snow and cold. This campaign was the cause of Khalīl's dismissal; he returned to Constantinople, where he kept his position as vizier (1 Shaʿbān 1037/6 April 1628). In the next year (1039/1629) he died.

Khalīl Pasha is praised by European as well as by the Turkish authors for his moderation and love of justice. His personality contrasts favourably with the other Turkish statesmen of his time, nearly all of whom died a violent death. He is described as a religious man which accounts for his friendship with Maḥmūd of Skutari; he also built in Constantinople a mosque in the neighbourhood of the mosque of Muḥammad Fātiḥ. There exists an anonymous biography of Khalīl Pasha, the *Tārīkh-i Khalīl Pasha* or *Ghazawāt-i Khalīl Pasha*. The MS. used by von Hammer is now in the National Library at Vienna (Flügel, *Die Arab. Pers. u. Türk. Handschriften der K. K. Hofbibliothek in Wien*, ii. 253, 254).

3) Arnāwud Khalīl Pasha, Grand Vizier under Aḥmad III. He was an Albanian from Elbaṣān, born about 1655, and had entered the Bostāndji corps where his elder brother Sinān Agha was Bostāndji Bashi. Having served some time in Baghdād, he returned to Constantinople as *Khāṣṣeki* and became *Bostāndji Bashi* in 1123/1711. In Muḥarram 1128/January 1716, when the war against Austria was in preparation, he was appointed Beylerbey of Erzerūm and sent to Nish to fortify this place. Six months later Khalīl became Beylerbey of Diyār Bekr and in Shaʿbān (1st July 1716), when the Grand Vizier Dāmād ʿAlī Pasha [q. v.] had entered Belgrade for the Austrian campaign, he became commander of that town. Dāmād ʿAlī having been killed in the battle of Peterwardein (Aug. 5, 1716), the Sulṭān appointed Khalīl Grand Vizier, while the Sulṭān's favourite and future Grand Vizier Dāmād Ibrāhīm [q. v.] became his *Kāʾim Maḳām*. The latter, however, was by far the more influential. After Temesvār was lost (13 October) a mutiny was feared and the army returned to Adrianople. In the next year the campaign was reopened and Khalīl marched to Belgrad, where the Austrian army under Eugen of Savoy was already awaiting the Turks. In the battle of Belgrade (16 Aug. 1717) Khalīl was completely beaten, which was due for the greater part to his own incapacity and his bad advisers. Belgrade was occupied by the Austrians and the Turks retired to Nish. Khalīl was dismissed in October 1717 and had to hide himself for two years, after which he was restored in the Sulṭān's favour. From 1133–1140 (1721—1727) he was banished to Mytilene; then he was given successively the command of several towns in Greece and Crete and died in 1136/1733. He is described as a mild, pious man, but seems to have had so little reputation, that the European historians writing on the battle of Belgrade were not aware of his existence.

KHALĪL SULṬĀN, a ruler of the Tīmūrid dynasty, grandson of Tīmūr, son of Mīrān-shāh and Sayūn-beg Khānzāda, grand-daughter of the Khān of the Golden Horde, Özbeg; born in 786

(1384), died Wednesday, Radjab 16, 814 (Nov. 4, 1411), reigned in Samarkand 807—812 (1405—1409). His education was entrusted to Tîmûr's eldest wife, Sarâi Mulk Khânum. He is said to have distinguished himself on Tîmûr's India campaign (1399) when only 15 years of age; he also took part in the so-called "Seven Years" (actually only 802—807 = 1399—1404) war in the west; in 1402 Tîmûr gave him supreme command in the east "on the frontier of Turkestân". In 1404 he aroused the wrath of his grandfather by his runaway marriage with a woman of low rank, Shâd Mulk, but was pardoned and in the same year during the preparations for the campaign to China appointed leader of the right wing mobilised in Tâshkent and the surrounding country. After the death of Tîmûr on Feb. 18, 1405, the army acclaimed him as sovereign and he entered Samarkand on Ramaḍân 16, 807 (March 18, 1405). The title of Khân was given to Tîmûr's minor great-grandson Muḥammad Djahângîr, son of prince Muḥammad Sulṭân who had been designated Tîmûr's successor but had died before him. Khalîl Sulṭân held out in Samarkand till 1409 but his rule was nowhere recognised outside of Mâ-warâ'-al-Nahr; to the north of this region, on the Sir Daryâ, he had to fight continuously against rebellious generals. The Tatars of the Golden Horde who had conquered Khwârizm in Radjab, 808 (Dec., 1405—Jan., 1406), extended their raids up to Bukhârâ. Khalîl Sulṭân was generally victorious in open battle against his enemies; even Shâh Rukh's final triumph was not so much won by military successes as by intrigues and skilful diplomacy (including negotiations with the 'ulamâ' in Bukhârâ, at the head of whom was Muḥammad Pârsâ). In the spring of 1409, when Shâh Rukh's army was ready for battle in Bâdghîs and Khalîl Sulṭân's in Shahr-i Sabz (Kash), a rising again broke out in the north under the leadership of the Amîr Khudâydâd; Khalîl Sulṭân was forced to leave his army and attack Khudâydâd but could only take 4000 men with him. On Dhu 'l-Ka'da 13, 811 (March 30, 1409), he was taken prisoner north of Samarkand by Khudâydâd and taken to Samarkand; later he was taken to Farghâna and his wife, who was left behind, was cruelly treated by Shâh Rukh; in the end he went to Otrâr and through the intermediary of the Amîr Shaikh Nûr al-Dîn concluded a treaty with Shâh Rukh by which he renounced his sovereignty over Mâ-warâ'-al-Nahr and received the town of Rayy in exchange where he lived till his death. His wife was also restored to him and on her husband's death put an end to her own existence. On account of this happening, which was embellished with all kinds of romantic touches by his contemporaries, Khalîl Sulṭân is called a "sentimental shepherd" by A. Müller (*Der Islâm im Morgen- und Abendland*, Berlin 1887, ii. 315; Khalîl Sulṭân is wrongly described there as the son of 'Umar Shaikh), a description which hardly fits the able young prince whose military skill was undoubted; his devotion to his wife and the magnanimity which he showed to all his enemies, even to traitors, were, as a matter of fact, in complete contrast to the characters of the other members of his dynasty and the manners of his time.

Bibliography: W. Barthold, *Ulugh-bek i ego wremya*, Petrograd 1918, Index (with references to the sources, for the most part still in manuscript).

(W. BARTHOLD)

KHALÎLÎ, Ottoman poet and mystic of the time of Sulṭân Meḥmed II, belonged to the neighbourhood of Diyârbakr and came to Iznik to study theology where he formed an attachment for a youth and so succumbed to this homosexual passion then so prevalent particularly in the most cultured circles that he entirely abandoned his studies and gave expression to his woes in a book which is known as the *Firkat-nâme* ("book of separation"). The title *Firâk-nâme* is equally well known, which Sehi gives first and which is also the title of a book by Kâḍî Ḥasan b. 'Alî of Monastir. The poem, which reminds one of the *Heves-nâme* of Dja'far Čelebi (d. 1514) with its sincere unaffected verses, bears witness to Khalîlî's deep passion faithfully described. The book was finished in the year 866 (1461/62). It is written in epic and lyric metres, a varied alternation of *mathnawî* and *ghazal*. Many biographers of poets interpret the poem as purely Ṣûfî, which does not seem to be correct.

Khalîlî died in 890 (1485) as superior of a monastery in Iznik. His *Dîwân* has not yet been printed. A number of his poems are contained in the *Djâmi' al-Naẓâ'ir* compiled by Ḥâdjdjî Kamâl in 918, according to Brussali Ṭâhir.

Bibliography: Laṭîfî, *Tedhkere*, Constantinople 1314, p. 147; Sehi, *Tedhkire*, Constantinople 1325, p. 64; Brussali M. Ṭâhir, *'Othmânlî Mü'ellifleri*, Constantinople 1333, ii. 159; Sâmî, *Ḳâmûs al-A'lâm*, Constantinople 1306, iii. 2060; v. Hammer, *Geschichte d. osm. Dichtkunst*, i. 225; Gibb, *A History of Ottoman Poetry*, ii. 379; Pertsch, *Katalog der türkischen Handschriften in Gotha*, p. 370, N°. 377. (The Berlin manuscript of the year 1485 is contemporary with the poet).

(TH. MENZEL)

KHALK (A.) is the term applied in the Kur'ân (Sûra ii. 159; xi. 59; lxvii. 3) to God's creative activity, which includes not only the original creation *ex nihilo* but also the making of the world and of man and all that is and happens. The verbal forms *khalaḳa* and *khalaḳnâ* are of the most frequent occurrence.

Among the most beautiful names of Allâh in the Kur'ân (cf. Sûra lix. 24) are *al-Khâliḳ* (Sûra vi. 102, et passim), *al-Khallâḳ* (Sûra xv. 86; xxxvi. 81), *al-Bâri'* (besides Sûra lix. 24 only ii. 51) and *al-Muṣawwir*. Epithets like the Almighty, the All-knowing etc. are also applied to the Creator. Their meaning is as a rule clear. The only obscure expressions are (cf. H. Grimme, *Mohammed*, ii. 44, 47) "Allâh created *bi 'l-ḥaḳḳ*" (Sûra xvi. 3; xxxix. 2—7; xliv. 39; xlvi. 2) or as "*al-Ḥaḳḳ*" (Sûra xxii. 5 sq.). If we are justified in supposing gnostic speculations in the Kur'ân it may be recalled that in the Gnosis objectified or personified truth coalesces with higher reality (cf. St. John's Gospel, xiv. 6; also S. v. d. Bergh, *Die Epitome der Metaphysik des Averroes*, p. 218 sq.).

Allâh is the Creator of all things (Sûra vi. 101 sq., et passim). He creates what He will (Sûra xxxvi. 82, et passim) but the Kur'ân describes at greatest length the creation of man from dust, earth or clay, drops of semen and congealed blood (Sûra xv. 15 sqq.; xxii. 5; xxiii. 12 sq., et passim) and the resurrection of the dead on the day of judgment, a new creation not more wonderful than the first creation (Sûra ii. 26, et passim). How important the creation of man is, is evident from Muḥammad's coming forward (in Sûra xcvi. 1,

generally regarded as the earliest revelation) in the name of his Lord "Who created, created man from congealed blood". Everything on earth was created for man (Sūra ii. 27, et passim), especially the animals (Sūra xvi. 5). The same thing is shown in the stages of the creation; it is regarded as taking place from the lowest upwards. In six days the world was completed, the earth first in two days, all that is in it in two more days and in the last two days the world of the seven heavens. Allāh is only formally called the Creator of heaven and earth (Sūra vi. 101, et passim) and it is announced as a secret (Sūra xl. 59) that the creation of heaven and earth is greater than the creation of man, i. e., according to the usual explanation, heaven and earth were created out of absolutely nothing but man was made from dust.

There is no creator but God. He is the One (Sūra xiii. 7, et passim; Sūra xxiii. 14 is no exception). He has begotten no children, only created things and beings, none of whom are like Him (Sūra cxii.). But passages like Sūra xv. 29, xxxviii. 72, where it is said that Allāh, after forming man, breathed of His spirit (*rūḥ*) into him, make the difference between the Creator and creature appear less rigidly marked.

The creation of man is above all a mark of divine power or, in so far as that which has been created is useful to man, of divine goodness. Reference to the harmony of the heavens (Sūra lxvii. 3) and the beauty of the human form (Sūra lxiv. 3) are rare. Finally we may mention that God created all things after one *ḳadar* (Sūra liv. 49 *sq.*; *ḳadar* is here perhaps a synonym for *amr*?) and heaven and earth "for a definite period" (Sūra xlvi. 2) i. e. probably to the last day.

The earlier traditions added very little to this (as Prof. Wensinck kindly informs me). Before the creation Allāh was in the clouds (al-Tirmidhī, *Tafsīr*, Sūra xi., bāb 1) and He created in darkness (do., *Īmān*, bāb 18; cf. Sūra xxxix. 8). He wrote a *kitāb* before the creation (al-Bukhārī, *Tawḥīd*, bāb 55). The *ḳalam* was the first thing created (al-Tirmidhī, *Ḳadar*, bāb 17). Allāh created man after his own image (Muslim, *Birr*, Tr. 115; cf. Sūra lxiv. 3; lxxxii. 8).

In the later traditions the process of creation is elaborated with speculations regarding God's throne, primeval water etc. and influenced by ideas of Hellenistic and Oriental origin regarding the manifestation or emanation of God in the world. The Neoplatonic expression put in Allāh's mouth is often quoted: "I was a hidden treasure but wished to be known and therefore I created the world". Knowledge (*ʿilm*) or intelligence (*ʿaḳl*) is therefore said to have been the first creation.

Just as God's superiority over man and the world is particularly apparent from the Ḳurʾān, so we find throughout the theology of Sunnī Islām the distance between the Creator and the creature emphasised. In general it is concluded from the transitory character of this world that its Creator is eternal. In favour of God's omnipotence causality in Nature (cf. *Atomic Theory* in Hasting's *Encyclopædia of Religions and Ethics*) and freedom of action on the part of man, if not absolutely denied, are suppressed as much as possible. Djahm [q. v.], one of the first Djahaṃis, wished to define God simply as the omnipotent Creator. Ibn Ḥazm (*Kitāb al-Faṣl*, i. 39; ii. 161 *sq.*) asserts that one can only show with regard to God that He is the Eternal, the Unique, the True, the Creator (*al-Awwal, al-Wāḥid, al-Ḥaḳḳ, al-Khāliḳ*) for only by these qualities is He absolutely distinguished from this world.

But misgivings against this sharp distinction were raised, particularly under the influence of Christian dogmatics and philosophical speculation, from three sides i. e. by the Muʿtazila, the mystics and the philosophers. The Muʿtazilīs emphasised the wisdom of God in His creation much more than His omnipotence and His will. According to their teaching, God only creates what is good and man is the creator of his own actions. Naẓẓām said that God could only create what is good and His creating is thought i.e. not an act of volition in the proper sense. According to others, like Abu 'l-Hudhail and Muʿammar, God's will is a kind of intermediary between the Creator and the created world. Al-Djāḥiẓ teaches that God cannot destroy the created world (arguing on Platonic lines, like Philo etc.).

In contrast to this estimation of the world and of human activity, mysticism appears as a depreciation of all that is worldly — but only of the material world. While the mystics regarded this world simply as a ladder to God, they could intensify their spiritual life of the soul up to the feeling of godlike creative activity (cf. L. Massignon, *La Passion d'al-Hallāj*, p. 513 *sq.*).

Two schools may be distinguished among the philosophers: one older, more neo-Platonic (e.g. the *Ikhwān al-Ṣafāʾ*), according to which the emanation of a series of spirits precedes the creation of a temporal material world, and a second more Aristotelian school (notably Ibn Sīnā and Ibn Rushd) which makes the development of the intellectual and material world proceed by stages, but without beginning and parallel, after the first *ʿaḳl* has emanated from the divine being. Both schools regard God only as the first cause between Whose activity and this world there are many intermediaries.

The attitude of orthodox Islām to these tendencies developed in very different ways in course of time. The Muʿtazilī doctrine of the *khalḳ al-afʿāl* could only be accepted in a modified form; a *kasb* (Ashʿarīs) or an *ikhtiyār* (according to al-Māturīdī) was ascribed to man instead of *khalḳ*. The philosophic assumption of a world without beginning was decisively rejected, but the theory of the spheres connected with it was adopted while the spirits of the stars were interpreted as angels of heaven. It was very easy to make common cause with mysticism, which, of course, always insisted that there was no creator except Allāh. The creation of man in God's image and the breathing of the divine spirit into him were of more importance to the mystic than the creation of the physical world and of human activities (see the art. ṢALĀT and ḲADAR) (cf. Massignon, *op. cit.*, p. 599 *sqq.*).

In the struggle then against the Muʿtaziliya and philosophy, the Sunnī doctrine developed — in part in alliance with mysticism — and with the greatest success in the Ashʿarī school. According to the latter, Allāh is the Omnipotent from eternity, Who can create if and when and what He will but does not need to create, Who with the creation of the material world at the same time places limits of time and space to it and every moment creates the world anew. Allāh is

also the eternally Speaking as regards the word of creation, especially the word of creation in the Ḳor'ān. If the eternalness of the word is taught contrary to the Muʿtazilī view, there is hesitation, as regards the activity of creation in calling God the eternally creating, and therefore, the so-called *ṣifāt al-fiʿl* (*khalḳ*, *rizḳ*, etc.), which are regarded as temporal relations, are distinguished from the eternal qualities of His nature. In this respect the system of al-Māturīdī differs from the teaching of the Ashʿarī school: he assumes as an eternal quality in the divine being *takwīn*, creative production. This means an approximation to the teaching of the philosophers that, because there is no cause without effect, God as the first cause created the world from eternity, and thus is really an eternal Creator, Whose being and actions are alike unalterable. Some philosophers and certainly many mystics got over the difficulty of this doctrine by the assumption that before the manifestation of His creation "the eternal Creator" was concealed in God (cf. Massignon, *op. cit.*, p. 657).

We find the bond between orthodox Ashʿarī beliefs and gnostic-mystic speculation in al-Ghazālī. On the one hand he teaches quite definitely the temporal creation of the world as an act of divine freedom. After eternal but free deliberation out of pure goodness He created this world and He is creating it down to the last day. He is also the originator of human activities; man has only a *kasb*. On the other hand, however, al-Ghazālī is fond of adopting mystic theories of intermediation. God and man are not simply to one another in the relation of Creator and creature. The world is divided (e.g. in *al-Maḍnūn al-Ṣaghīr*, on Sūra xvii. 87; cf. Sūra vii. 72) into the *ʿālam al-khalḳ*, i.e. the material spatial world, and the *ʿālam al-amr*, the non-spatial world of the angels and the human spirits (the former in the *Iḥyāʾ*, iv. 20 *sqq.*, is also called *ʿālam al-mulk wa 'l-shahāda*, the latter *ʿālam al-ghaib wa 'l-malakūt*). As a member of the world of spirits (*al-Maḍnūn al-Ṣaghīr*, on the tradition that Allāh or *al-Raḥmān* created Adam in his own image), man in his being, qualities and actions shows similarity to God. The human will acts in his body (microcosm) like the Creator in the macrocosm. Besides the above-mentioned division into sensible and supersensual world, al-Ghazālī also gives the threefold division (*al-Durra al-fākhira*, p. 2 *sqq.*; cf. Sūra v. 20 etc., where there is mention of the "kingdom of the heavens and of the earth and what is between"): *ʿālam dunyawī* (= *al-mulk*), *ʿālam malakūtī* and *ʿālam djabarūtī* (cf. the art. DJABARĪYA). Man thus appears as a citizen of three worlds, corresponding to the old triad: body, soul, spirit, as it was developed by gnosticism in the system of the heavenly hierarchy. On *mulk*, *malakūt* and *djabarūt* cf. Κυριότητες, ἀρχαί, ἐξουσίαι in St. Paul, Ep. to Col., i. 16. According to al-Ghazālī, the human spirit, related to God, will survive not only this material world and the spiritual world of the angels and *djinn* but also the spiritual world of the highest angels.

In spite of the authority of this "father of the church in Islām", the development of the idea was not yet finished. Ibn Rushd then advanced against him (*Tahāfut al-Tahāfut*) the doctrine that the world had no beginning; many theologians (from al-Rāzī, d. 605 = 1209, onwards) followed more closely the conceptions of the so-called Aristotelians, and extreme mystics, like Ibn al-ʿArabī, let the distinction between *al-Ḥaḳḳ* (the Creator) and *al-khalḳ* (the creature) disappear in the absolute primeval being (cf. the art. AL-INSĀN AL-KĀMIL).

Bibliography: There is no comprehensive work on the subject. Besides books mentioned in the text we may mention: M. Worms, *Die Lehre von der Anfangslosigkeit der Welt bei den mittelalterlichen arabischen Philosophen des Orients und ihre Bekämpfung durch die arabischen Theologen* (*Beitr. z. Gesch. d. Philos. des M.A.*, ed. by Baeumker and v. Hertling, iii. 4, Münster 1900); A. Rohner, *Das Schöpfungsproblem bei Moses Maimonides, Albertus Magnus und Thomas von Aquin*, ibid., xi. 5, Münster 1913; Tj. de Boer, *Die Widersprüche der Philosophie nach al-Gazzālī und ihr Ausgleich durch Ibn Rošd*, Strassburg 1894; do., *De Wijsbegeerte in den Islam*, in the *Volksuniversiteitsbibliotheek*, xi., Haarlem 1921. See also the articles ALLĀH and ṢIFA. (TJ. DE BOER)

KHALKHA, the name of a lake and of a river flowing from it into the Buyir-Nor on the frontier between Manchuria and Mongolia. The river Khalkha is mentioned in the xiii[th] century in the "Secret History of the Mongols" (Russian translation by Palladius in *Trudi Ross. Dukhovnoi Missii v Pekinĕ*, iv., St. Petersburg 1866, p. 90, 91, 101 and 118 (the edition of the text promised by Pelliot has not yet appeared); in Rashīd al-Dīn, ed. Berezin, in *Trudi Vost. Otd. Russkago Arkh. Obshč.*, xiii., St. Petersburg 1868, Pers. text, p. 216, vol. xv., ibid. 1889, Pers. text, p. 3 *sq.*: *Kalā*. Since the xvi[th] century the same name Khalkha has been given to the north-eastern part of Mongolia (from the western frontier of Manchuria to the eastern frontier of the district of Kobdo and from the Russian frontier to the Gobi desert) and its population. Sanang Saetsen (*Gesch. der Ost-Mongolen*, ed. I. J. Schmidt, St. Petersburg 1829, p. 191 and 197) speaks of twelve tribes of the Khalkhas; a distinction was made between five "nearer" and seven "remoter" tribes (*op. cit.*, p. 205, and p. 191 and 285). Geresen (full name and title Geresentse Djalair Khun Taidji) was considered the ancestor of all the chiefs of the Khalkhas; he was grandson of the last ruler over all Mongolia, Dayan Khān (d. 1543); on the genealogy see A. Pozdnæew, *Mongoliya i Mongoli*, i., St. Petersburg 1896, p. 472. The four *aimaḳ* (q. v.) into which the Khalkhas were nominally divided (the Manchu emperors long since deprived the chiefs of any power) have taken their names from the different branches of this dynasty; they are the *aimaḳ* (from E. to W.) of Tsetsen-Khān, of Tushetu-Khān, of Sayin-Noyon (after 1725) and of Tsasaktu-Khān. Another division is also mentioned (as early as the occasion of the submission of the Khalkhas to the Emperor K'ang-Hsi in 1691; Mongol inscription in Dolon-Nor, in text and Russian transl. publ. by A. Pozdnæew, *op. cit.*, ii., St. Petersburg 1899, p. 291 *sqq.*): Geresen is said to have had 7 sons, wherefore the population was divided into seven divisions (*khoshun*, written *ḳoshūn* in Arabic); it is not known whether there was a connection between this division and the seven "remoter tribes". Since about 1585, Buddhism has been dominant among the Khalkhas; at that date a grandson of Geresen, Abatai-Khān, was reigning, called Abtai Ghalzaghu Taidji in Sanang Saetsen, p. 253. (W. BARTHOLD)

KHALKHĀL ("anklet"), the name of a place in Ādharbaidjān. Its position nearly corresponds to 37° N. Lat. and 49° East. Long. It does not occur on modern maps, but see the map in G. Le Strange, *The Lands*, etc., facing p. 87. It was situated in the mountains which in this region were beset with fortresses. Yāḳūt passed through this region when he fled before the Tatars in 617 = 1220/21.

According to Ḥamd Allāh Mustawfī it was formerly a fair sized town, which in his days had sunk into a mere village with about a hundred hamlets belonging to it. It was the seat of the governors of the province, after Fīrūzābād had gone to ruin.

There is another place of the same name situated at the mouth of the Ozen on the Caspian.

KHALWA, KHALWATI, etc. [See TAṢAWWUF.]

KHAMR (A.), wine. The word, although very common in early Arabic poetry, is probably a loanword from Aramaic. The Hebrew *yain* has in Arabic (*wain*) the meaning of black grapes. The question has been fully treated by I. Guidi in his *Della sede primitiva dei popoli semitici* in *Memorie della R. Accad. dei Lincei*, series iii., vol. iii. p. 603 *sqq.*

Arabia and the Syriac desert are, in contradistinction to Palestine and Mesopotamia, not a soil fit for the vine; there are, however, exceptions, among which may be mentioned al-Ṭā'if (see H. Lammens, *Ṭāif*, p. 35 *sqq.*; *M.F.O.B.*, viii. 146 *sqq.*), Shibām and other parts of Yaman. Wine, probably of an inferior quality, is also mentioned in Madīna (see below). Usually, however, it seems to have been imported from Syria and 'Irāḳ; in early Arabic poetry the wine-trade is chiefly connected with Jews and Christians, who pitched their tent (*ḥānūt*, also a loanword from Aramaic) among the Beduins and provided it with a sign denoting its character. In it little orgies were held, in the company of female singers who often also belonged to the establishment. The wine was kept in jars or skins, provided with a mouth-piece which was closed by means of a string.

In the days of Muḥammad the people of Mekka and Madīna used to indulge in drinking wine as often as an occasion offered itself, so that drunkenness often became a cause of scandal and of indulgence in a second vice, gambling, which together with wine, incurred Muḥammad's condemnation. Tradition has not refrained from describing how Ḥamza b. 'Abd al-Muṭṭalib, Muḥammad's uncle, in a fit of drunkenness mutilated 'Alī's camels (Bukhārī, *Shirb*, bāb 13; *Khums*, bāb 1; Muslim, *Ashriba*, Trad. 1, 2; *Maghāzī*, bāb 12; Abū Dā'ūd, *Kharādj*, bāb 19). And the commentaries on the Ḳur'ān relate how Muḥammad's companions held drinking-parties which caused them to commit faults in ritual prayer (see al-Ṭabarī, *Tafsīr* ad Sūra xiv. 44; Muslim, *Faḍā'il al-Ṣaḥāba*, trad. 44; cf. 45; Aḥmad b. Ḥanbal, i. 185 *sq.*).

The prohibition of wine was not on Muḥammad's programme from the beginning. In Sūra xvi. 69 we even find it praised as one of the signs of Allāh's grace unto mankind: "And of the fruit of palm-trees, and of grapes, ye obtain an inebriating liquor, and also good nourishment". But the consequences of drunkenness manifesting themselves in the way just mentioned are said to have commoved Muḥammad to change his attitude. The first revelation giving vent to these feelings was sūra ii. 216: "They will ask thee concerning wine and gambling (*maisir*). Answer, in both there is great sin and also some things of use unto men: but their sinfulness is greater than their use". This revelation, however, was not considered as a prohibition. As people did not change their customs and the order of prayer happened to be disturbed in consequence thereof, a new revelation was issued, viz. Sūra iv. 46: "O true believers! come not to prayers when ye are drunk, until ye understand what ye say" etc. But neither was this revelation considered as a general prohibition of wine, until Sūra v. 92 made an end to drinking: "O true believers! surely wine and *maisir* and stone pillars and divining arrows, are an abomination, of the work of Satan; therefore avoid them, that ye may prosper".

This sequence of revelations regarding wine is the accepted one among the traditionists and commentators of the Ḳur'ān (see Aḥmad b. Ḥanbal, *Musnad*, ii. 351 *sq.*; Ṭabarī, *Tafsīr*, v. 58 ad sūra iv. 46).

The prohibition of wine may, however, also be looked upon from a wider aspect, as Islām is not the only monotheistic religion which has taken a negative attitude towards wine. It is well known that, according to the Old Testament (Numbers vi. 3 *sq.*) the Nazarite who had wholly devoted himself to Yahwe had to abstain from wine and spirits, just as the priests before administrating the sacred rites (Lev. x. 9). The Nabataeans, according to Diodorus Siculus (xix. 94, 3), likewise abstained from wine and one of their gods is called in their inscriptions "the good god who drinks no wine". Likewise, the abstention from wine belonged to the rule of many Christian monks. All this has its roots in remote Semitic antiquity which ascribed a demoniac character to wine and spirits. The same is true for music, especially singing, which is also prohibited by Islām. It is not improbable that negative feelings of this kind may have worked together with the motives mentioned above, to induce Muḥammad to prohibit wine.

The prohibition of the Ḳur'ān has been taken over by the doctors of the law; all *madhhab*'s, and also the Shī'a, call wine *ḥarām* and the wine-trade is forbidden. For an exposition of the Shāfi'ī view, see al-Nawawī, *Minhādj*, ed. v. d. Berg, iii. 241; for that of the Ḥanafīs, *Fatāwā 'Ālamgīrī*, vi. (Calcutta 1835), 604 *sqq.*; for that of the Mālikīs Zurḳānī in his commentary on the *Muwaṭṭa'* (Cairo 1280), iv. 26; for that of the Shī'a *Sharā'i' al-Islām* (Calcutta 1839), p. 404. Theology reckons the drinking of wine among the gravest sins (*kabā'ir*).

Ḥadīth has many utterances regarding this theme. Wine is the key of all evil (Aḥmad b. Ḥanbal, *Musnad*, v. 238; Ibn Mādja, *Ashriba*, bāb 1). Who drinks wine in this world without repenting it, shall not drink it in the other world (Bukhārī, *Ashriba*, bāb 1; Muslim, *Ashriba*, trad. 73, 76—78 etc.). Cursed is he who drinks, buys, sells wine or causes others to drink it (Abū Dā'ūd,

Ashriba, bāb 2; Ibn Mādja, *Ashriba*, bāb 6; Aḥmad b. Ḥanbal, i. 316; ii. 25, 69, 71, 97, 118 etc.). Who drinks a draught of wine on purpose shall have to drink pus on Doomsday (Ṭayālisī, N°. 1134). Prayer of him who drinks wine is not accepted by Allāh (Nasā'ī, *Ashriba*, bāb 43; Dārimī, *Ashriba*, bāb 3), and faith is incompatible with drinking it (Bukhārī, *Ashriba*, bāb 1; Nasā'ī, *Ashriba*, bāb 42, 44). It is even inadvisable to use it as medicine (Muslim, *Ashriba*, trad. 12; Aḥmad b. Ḥanbal, iv. 311, 317 bis etc.); and it is prohibited to use wine for manufacturing vinegar (Tirmidhī, *Buyū'*, bāb 59; Aḥmad b. Ḥanbal iii. 119, 260 bis). But times will become ever worse and there will be people who declare wine allowed (Bukhārī, *Ashriba*, bāb 6; Nasā'ī, *Ashriba*, bāb 41 etc.) and so it will be drunk by the generation of the last days (Bukhārī, *Ashriba*, bāb 1; Aḥmad b. Ḥanbal, iii. 176, 202, 213 *sq.*).

The prohibition of wine, although unanimously accepted, gave rise to dissensions between the juridical schools, dissensions which are reflected in ḥadīth, in a historical disguise. The discussions start from the question: what is wine? It is said that, when the use of wine was peremptorily prohibited, the people of Madīna poured out in the streets all that they possessed of the appreciated liquor (Aḥmad b. Ḥanbal, ii. 132 *sq.*; iii. 26, 189 *sq.*, 217, 260 bis; iv. 335 *sq.*). Ibn 'Umar declares, on the contrary, that at the time of the prohibition, there was no wine in Madīna at all (Bukhārī, *Ashriba*, bāb 2). Anas b. Mālik (*ib.*) says that there was scarcely any wine from grapes in Madīna, when the prohibition was revealed; people used wine from *busr* and *tamr* (two kinds of dates). In another tradition (*ib.*, bāb 3) wine from *fadīkh* and *zahw* (two other kinds of dates) is mentioned. 'Umar is represented delivering a *khuṭba* which was meant to settle the question; according to his son 'Abd Allāh he said: Wine has been prohibited by the Ḳur'ān; it comes from five kinds of fruits, from grapes, from dates, from honey, from wheat and from barley; wine is what obscures the intellect (*al-khamr mā khāmara al-'aḳl*; Bukhārī, *Ashriba*, bāb 2). The question remained, whether beverages prepared from grapes in a different way, were prohibited. There was e. g. a kind of syrup. "When 'Umar visited Syria, the population complained of its unhealthy and heavy climate and they added: This drink alone will heal us. Then 'Umar allowed them to drink honey. Then they said: Honey cannot heal us. Thereupon one of the natives of Syria said to him: May we not prepare something of this drink for you? It has no inebriating power. He said: Well. Then they cooked it till two thirds were evaporated and one third of it remained. They brought it 'Umar, who put his finger into it and licked it. Then he said: This is *ṭilā'* like camels' *ṭilā'* (viz. the pitch with which they smeared their skins). Then he allowed them to drink it" (Mālik, *Ashriba*, bāb 14). According to the first chapter of the same *kitāb*, however, 'Umar punishes a man who had become drunk on *ṭilā'*. Juice from grapes, prepared by pressing them only, is considered as wine. Ṭāriḳ b. Suwaid al-Ḥaḍramī said to the Prophet: We have in our country grapes which we press. May we drink the juice? He said: No. This negative answer is given three times and when Ṭāriḳ asks whether the juice may be given the sick to drink, Muḥammad answers: It is no medicine, it is sickness (Aḥmad b. Ḥanbal, v. 292 *sq.*). And not only those who drink and sell wine are cursed by Muḥammad, but also those who press grapes and have them pressed in order to drink the juice (Ibn Mādja, *Ashriba*, bāb 6).

Another question of importance arose, in connection with spirits: Had they to be considered as wine or not? All the *madhhab*'s, except the Ḥanafīs, have answered the question in the affirmative sense. They have consequently extended the prohibition of wine, in accordance with the intention underlying it. Tradition, which is the best source for the history of the origin of several institutions, shows that the question belongs to the much debated ones. The standard ḥadīth which is found very frequently in the classical collections runs as follows (I pick out Muslim's version *Īmān*, trad. 26, because it contains important details): "Some men of 'Abd al-Ḳais went to the Apostle of Allāh and said to him: O Prophet of Allāh, we are a tribe belonging to Rabī'a; between us and yourself dwell the infidels of Muḍar, so that we can only reach you in the sacred month. Tell us therefore what we have to tell our tribespeople which will open Paradise for us if we so cling to it. The Apostle of Allāh answered: I order four things and I forbid four things. Serve Allāh without associating anything with him. Perform *ṣalāt*, deliver *zakāt*, fast the month of Ramaḍān and deliver the fifth part of booty. And I forbid four things: *dubbā'*, *ḥantam*, *muzaffat* and *naḳīr*. They asked: O Apostle of Allāh, how do you know what the *naḳīr* is? He said: Well, it is a palm-trunk which you hollow out; then you pour small dates into it and upon them water. When the process of fermentation has finished, you drink it with the effect that a man hits his cousin with the sword. — Now among these men there was someone who had received a blow of the sword in this way. He says: I had concealed it out of shame before the Apostle of Allāh. Then I said: But from what vessels should we drink then, O Apostle of Allāh? He answered: From leather skins, the mouthpieces of which are smeared with pitch. They answered: O Prophet of Allāh, our country teems with mice so that no single skin can be kept whole. Then the Prophet of Allāh answered: Even though the mice should eat them, even though the mice should eat them, even though the mice should eat them".

This tradition did not meet with general approval. It is said that the Anṣār or other people complained of their difficulty in finding the skins necessary for preserving drinks without their becoming fermented. Thereupon the Prophet is said to have withdrawn his prohibition, wholly or partly (Bukhārī, *Ashriba*, bāb 8; Muslim, *Ashriba*, trad. 63—66 etc.). In some versions of this tradition there occurs the restriction, that all fermented inebriating drinks remain prohibited. Innumerable are the traditions which only contain the rule: All drinks which may cause drunkenness are prohibited in any quantity (*kull muskir ḥarām ḳalīluhu wa-kathīruhu*) and this rule has passed into many books of fiḳh (Bukhārī, *Maghāzī*, bāb 60; Muslim, *Ashriba*, trad. 67—75; Aḥmad b. Ḥanbal, i. 145; ii. 16 bis; iii. 38; iv. 87; v. 25 *sq.*; vi. 36 etc.). Of special traditions prohibiting fermented drinks may be mentioned the following. It is forbidden or disapproved of to

all raisins if they are to be used for preparing *nabīdh* (Nasāʾī, *Ashriba*, bāb 51, 52). It is prohibited to mix together different kinds of fruits so that the mixture should become intoxicating. This tradition occurs frequently; see e.g. Bukhārī, *Ashriba*, bāb 11; Muslim, *Ashriba*, trad. 16—20; Nasāʾī, *Ashriba*, b. 4—17; Ibn Saʿd, viii. 360; Aḥmad b. Ḥanbal, i. 276; ii. 46; vi. 242, 292. But each of these kinds may be used separately for preparing a non-fermented drink (Muslim, *Ashriba*, trad. 81—83. Nasāʾī, *Ashriba*, bāb 14—18 etc.).

It can easily be seen that the difficulty in this matter was caused by two circumstances. People were accustomed to prepare from all kinds of dates, from raisins and other fruits, drinks which only became inebriating if they were preserved a long time and probably also if they were prepared after special methods. Where was the line of demarcation between the allowed and the prohibited kind? Several collections of traditions went so far as to mention *nabīdh* among the drinks prepared by Muḥammad's wives and drunk by him (Muslim, *Ashriba*, trad. 79—89; Aḥmad, i. 232 *sq.*, 240, 287, 320 *sq.*, 336, 355, 369, 372; ii. 35; iii. 304, 307, 313 *sq.*, 326, 379, 384 etc.). Abū Dāʾūd (*Ashriba*, bāb 10) and Ibn Mādja (*Ashriba*, bāb 12) have preserved a tradition on this subject which is instructive. I translate Ibn Mādja's version: Says ʿĀʾisha: "We used to prepare *nabīdh* for the Apostle of Allāh in a skin; we took a handful of dates or a handful of raisins, cast it into the skin and poured water upon it. The *nabīdh* we prepared in this way in the morning, was drunk by him in the evening; and when we prepared it in the evening he drank it the next morning". In another tradition of the same bāb Ibn ʿAbbās says that the Prophet used to drink this *nabīdh* even on the third day; but what was left then, was poured out.

All this could, however, not persuade the majority of the *faḳīh*'s to declare *nabīdh* allowed; three of the *madhhab*'s as well as the Shīʿa prohibit the use of *nabīdh*. The Ḥanafī school, on the other hand, allows it, when used with moderation, for medicinal purposes etc.

It would take us too far to give here a detailed survey of the opinions of the *faḳīh*'s of all *madhhab*'s; it would be superfluous, to some extent at least, because the more important differences regard chiefly *nabīdh* only. The following rapid survey is based on the *Fatāwā ʿĀlamgīrī*, vi. 604 *sqq.* (cf. Shaʿrānī's *Mīzān*, Cairo 1279, p. 192 *sq.*).

Allowed according to the *idjmāʿ* is every non-fermented, sweet drink.

Prohibited (*ḥarām*), according to the *idjmāʿ*, are wine and *sukr* of every kind. As to wine there are six cases: to drink it in any quantity or to make use of it is *ḥarām*; to deny this is *kufr*; to buy, sell, present it etc. is *ḥarām*; no responsibility (*ḍamān*) rests on him who spoils or destroys wine (*mutlifuhu*); whether wine is a possession (*māl*) is an unsettled point; it is *nadjis* just as blood and urine; who drinks any quantity of it is liable to punishment.

Several kinds of products prepared by means of grapes (*bādhiḳ*, *munaṣṣaf*, etc.) are prohibited according to the majority (*ʿāmma*) of the *faḳīh*'s.

Allowed, according to the majority of the *faḳīh*'s are *ṭilāʾ* (vide supra) or *muthallath* and *nabīdh* from dates with the restrictions mentioned above. So is juice from grapes when the process of cooking has made to evaporate two thirds. Muḥammad [viz. al-Shaibānī, q. v.] has a deviating opinion on this point.

As to the **punishment** of him who drinks wine, tradition tells us that Muḥammad and Abū Bakr were wont to inflict forty blows by means of palmbranches or sandals (Bukhārī, *Ḥudūd*, bāb 2—4; Muslim, *Ḥudūd*, trad. 35—37). Under ʿUmar's caliphate, however, Khālid b. al-Walīd reported to him that people were indulging in prohibited drinks. Thereupon ʿUmar consulted the *ṣaḥāba* who advised him to fix the number of blows at eighty, a number suggested by the Ḳurʾān which prescribes that those who accuse *muḥṣanāt* of *zināʾ*, without being able to prove their accusation by the aid of four witnesses, shall be punished with eighty blows (sūra xxiv. 4).

Repeated drinking of wine, according to some traditions, was punished by death at Muḥammad's order (Abū Dāʾūd, *Ḥudūd*, bāb 36; Ibn Mādja, *Ḥudūd*, bāb 17; Aḥmad b. Ḥanbal, ii. 136, 166, 191; iv. 93, etc.). It is, however, added in some traditions that capital punishment in such cases is not according to the *sunna* of the Prophet (Aḥmad b. Ḥanbal, i. 125, 130; cf. Ṭayālisī, N°. 183).

The different *madhhab*'s have adopted ʿUmar's view; drinking wine is punished with eighty blows; if the transgressor is a slave this number is however reduced to forty, because in the Ḳurʾān the punishment of the handmaid's *zinā* is fixed at half the amount of blows with which the free woman is punished (sūra iv. 30). The Shāfiʿites however cling to the practice ascribed to Muḥammad and Abū Bakr; with them the number of blows is consequently forty, resp. twenty (see Zurḳānī, iv. 42; Nawawī in Muslim, iv. 156).

The prohibition of wine and spirits (according to three of the four *madhhab*'s) is one of the **distinctive marks** of the Muslim world; its consequences can hardly be overrated. This is not seriously affected by the fact that transgressions have been numerous, according to literary evidence. The praise of wine, not uncommon in pre-Islamic poetry, remained one of the favourite topics also of Muslim poets (cf. the wine-songs by Ibn al-Muʿtazz, Abū Nuwās etc.) and at the court of the Caliphs wine was drunk at revelling parties as if no prohibition existed at all (see e. g. The 1001 Nights, *passim*). Even the common people could not always and everywhere refrain from their national drink, date-wine of several kinds; the caliph ʿUmar b. ʿAbd al-ʿAzīz deemed it necessary to promulgate a special edict in order to abolish this custom (see v. Kremer, *Culturgeschichtliche Streifzüge*, Leipzig 1873, p. 68 *sq.*).

Wine has a special place in the literary products of the **mystics**, where it is one of the symbols of ecstasy. In this point they only took over the language of their Christian and non-Christian predecessors. As early as Philo of Alexandria ecstasy is compared with intoxication (see especially his *De Vita Contemplativa*). Among the Ibāḥiyya, language may have been a reflex of practice; but this cannot be said of Ṣūfī's in general, who, on the contrary, cling to the ascetic methods of the via purgativa. As to Ḥāfiẓ' wine- and lovesongs, it is an unsettled point whether they are merely metaphorical or not.

(A. J. Wensinck)

KHAMS(A) (A.), the number five. This number has a magical character, from the fact that it is the number of the fingers of the hand and that it is found in certain Muslim dogmas (five foundations of belief, five religious duties, five daily prayers, prescribed by the canon). The hand stretched out with the palm open and the fingers expanded is a symbol that protects against the evil eye; in North Africa we frequently find, among Jews as well as Muslims, a hand painted on the door with the fingers spread out. Amulets in this form are made of gold and silver, called *khamsa*, *khoms* by the natives and "hands of Fatma" by Europeans. Thursday, the fifth day of the week, is favourable for magic rites against the evil eye and is the day chosen for pilgrimages to the tombs of famous saints to destroy the effects of the evil eye.

(Cl. Huart)

KHAMSA, Khamse, the same word as the preceding, pronounced in the manner of the Arabs of the East, the Persians and the Turks; the name given to collections of five poems of which the most famous are those of al-Niẓāmī, also called *Pandj-gandj* "the five treasures": *Makhzan al-Asrār* (559 = 1164), *Khusraw u-Shīrīn* (576 = 1180), *Leilā u-Madjnūn* (584 = 1188), *Haft-paikar* (593 = 1197), *Iskandar-nāma* (597 = 1201); of Amīr Khusraw of Dehli: *Maṭla' al-Anwār* (698 = 1299), *Shīrīn u-Khusraw*, *Madjnūn u-Leilā* (same year), *Āyina-i Sikandarī* (699 = 1300), *Hasht-bihisht* (701 = 1302); of Khwādjū Kirmānī: *Rawḍat al-Anwār* (finished in 744 = 1343), *Humāī Humāyūn*, *Kamāl-nāma*, *Gul u-Nawrūz*, *Djawhar-nāma*; of Kātibī, unfinished, we have the *Gulshan-i Abrār* and a *Leilā u-Madjnūn* about 838 = 1434; of Djāmī: selection from the *Haft-awrang*, and including the *Tuḥfat al-Aḥrār* (886 = 1481), *Subḥat al-Abrār*, *Yūsuf u-Zulaikhā* (888 = 1483), *Leilā u-Madjnūn* (889 = 1484), *Khirad-nāma-i Sikandarī*; of Hātifī, probably unfinished, containing: *Leilā u-Madjnūn*, *Haft-Manẓar*, *Shīrīn u-Khusraw*, *Tīmūr-nāma* (between 917 = 1510 and 927 = 1521); of Faiḍī: *Markaz-i Adwār*, *Sulaimān u-Bilḳīs*, *Nal-daman*, *Haft-kishwar*, *Akbar-nāma* (1003 = 1595), unfinished; of Ḥasan b. Saiyid Fatḥ Allāh: to the glory of Muḥammad and the four first caliphs (of 1038/1628 to 1039/1630). The *Khamsa-i Nāfiya* of Mollā Ṭughrā-i Mashhadī is a diatribe against five persons at the court of Golconda. The author died at the beginning of the reign of Awrangzīb (about 1069 = 1659).

Turkish poetry also contains a certain number of works of the same kind such as those of Ḥamd Allāh Čelebi, called Ḥamdī, son of Shaikh Ak Shams al-Dīn, d. 914/1509: *Yūsuf u-Zulaikhā*, *Leilā u-Madjnūn*, *Mawlid-i Nabī*, *Tuḥfat al-'Ushshāḳ*, *Muḥammadīya*; of Fuḍūlī of Baghdād, d. 963/1556 (mentioned by Laṭīfī and Ḳinālī-zāde, probably wrongly); of the Albanian Yaḥyā, bey of Dukagin, d. 983/1576: *Shāh u-Gadā*, *Yūsuf u-Zulaikhā*, *Kitāb-i Uṣūl*, *Gandjīna-i Rāz*, *Gulshan-i Anwār*; of Mu'īdī of Ḳalḳandilen, contemporary of Bāḳī; of Bihishtī, d. 979/1572: *Wāmiḳ u-'Adhrā*, *Yūsuf u-Zulaikhā*, *Ḥusn u-Nigār*, *Suhail u-Naw-Bahār*, *Leilā u-Madjnūn*; of Sinān b. Suleimān, surnamed Aṭā'ī and son of New'ī, d. 1044/1634 (really only contains four poems, the fifth being the *Dīwān* of the poet): *Subḥat al-Abkār*, *Haft-khwān*, *Nafḥat al-Azhār*, *Sāḳī-nāma*). The *Khamsa-i Rūmī* of Rewānī of Adrianople, d. 930/1524, mentioned by Sehī, probably never existed. That of Nergisī is in prose.

Mīr 'Alī Shīr Nawā'ī has also collected under the same title five poetical compositions in Eastern Turkī (Catalogue Quaritch, Jan., 1916, p. 23; E. Blochet, *J. A.*, 1916, Series 11, vol. viii. 400). The name *Khamsat al-Mutaḥaiyirīn* is given to a biography of Djāmī in five parts (Belin, *J. A.*, 1861, Series 5, vol. xvii. 303).

Bibliography: Ch. Rieu, *Catalogue of Persian MSS. Brit. Mus.*, p. 504, 611, 615, 620, 637, 645, 652, 671, 680; E. J. W. Gibb, *Ottoman Poetry*, i. 145; ii. 8.

(Cl. Huart)

KHAMSA (abbreviated from *wilāyāt-i khamsa* = the five provinces), the name of a province in Persia of which Zandjān is the capital; Sulṭānīya also forms part of it. It is a small administrative division, forming quite recently a detached district of 'Irāḳ 'Adjamī; it lies between the provinces of Ādharbaidjān and Ḳazwīn and has 11,480 inhabitants. It appears in the Budget with the following statistics: revenue in cash 819,880 ḳrāns, in cereals 10,540 kharwārs (of 640 lbs.), in straw 9,000 kharwār; value of payments in kind 978,038 ḳrāns. Local expenditure, including the remissions of taxation, 19,129 ḳrāns. The five towns which gave the name of this district are Abhar, Farum, Ghelab, Arman-khāne and Terram-Ābād. The country is inhabited by the nomad tribe of Afshār.

Bibliography: [E. Dupré], *Voyage en Perse*, ii. 213—214; Jaubert, *Voyage en Arménie*, p. 197; G. Curzon, *Persia*, i. 437, 480.

(Cl. Huart)

KHĀN (T.), a Turkish title: originally a contraction of *Kaghan*, Arabic *khāḳān* [q. v.]; in this meaning *Kan* occurs alongside of *Kaghan* as early as the Orkhon inscriptions of the viiith century A. D.; cf. the Tonyukuk inscription in W. Radloff, *Die alttürkischen Inschriften der Mongolei*, 2nd Series, St. Petersburg 1899, p. 3, and

the quotations in the glossary, p. 93. In the Muslim period the word *Khān* seems first to appear towards the end of the ivth (xth) century on the coins of the Ilek-Khāns [q. v., ii. 465] and particularly in the vth (xith) century in the texts relating to this dynasty (cf. the quotations *loc. cit.*) Not till the Mongol period is a distinction made between the *Ḳaghan* or *Ḳ'ān* as supreme ruler and the *Khān* as ruler of a separate portion of the whole empire.

In course of time *Ḳaghan* and *Khāḳān* were completely ousted from the popular language by *Khān*. In the last centuries before the Mongol conquest, the Turkish *Khān* like the Arabic *Malik* and the Persian *Shāh* was used as a princely title in contrast to the supreme title *Sulṭān*, *Sulṭān* only retaining the meaning in Western Asia and Egypt. In Central Asia in the various kingdoms into which the Mongol empire broke up *Khān* was the real sovereign title and *Sulṭān* the title of each individual member of the dynasties descended from Čingiz Khān. In the administrative system of the modern Persian kingdom founded by the Safawids the *Sulṭān*, as governor of a smaller district, was under the *Khān*, who was governor of a large province. (W. Barthold)

KHĀN DJAHĀN LŌDĪ. An Afghān favourite of the emperor Djahāngīr [q. v.], who called him his son (*farzand*). His original name was Pīr Khān, and he was a son of Dawlat Khān and descended from the Dawlat Khān Lōdī, who was supreme in the Pandjāb when Bābur entered India. Pīr Khān first had the title of Ṣalābat Khān, and afterward that of Khān Djahān. When Djahāngīr died, he behaved badly, made the mistake of not recognising Shāh Djahān, and of not even answering his autograph letter, and sold the Balāghāt of the Deccan to Niẓām al-Mulk. The result was that he was superseded by Mahābat Khān, and though he got another appointment, and came to court, he was no longer a favourite, and became apprehensive that he would be arrested. So he fled at night from Agra with his family and dependents. He was pursued and attacked at the Čambal, and many of his people were killed. He continued his flight towards the Deccan, but eventually was killed in Central India in the fourth year of the reign of Shāh Djahān, to whom his head was sent.

Bibliography: *Tārīkh-i Khān Djahān Lōdī*; Djahāngīr, *Memoirs*, transl. by A. Rogers and H. Beveridge, i. 87 etc.; Elliot-Dowson, *Hist. of India*, v. 67, vi., vii.; *Āʾīn-i Akbarī*, transl. Blochmann, p. 502; *Bādshāhnāma*, i. (Elliot-Dowson, vii. 20); Khwāfī Khān, *Muntakhab al-Lubāb*. (H. Beveridge)

KHĀN KHĀNĀN, "Lord of Lords", a title given by the Dihlī emperors to their highest officer. It corresponds to the Turkish *Beglerbeg*. It was in use in Bābur's time, the title having been given to Dilāwar Khān, son of Dawlat Khān. The most famous *Khān Khānān*'s were Akbar's ministers, Bairām and his son 'Abd al-Raḥīm. — *Khān Dawrān*, "Lord of the age", and *Khān Djahān*, "Lord of the world", are similar titles. (H. Beveridge)

KHĀN-I DJAHĀN MAḲBŪL KHĀN, originally a Hindū by name Kunnū or Kattū, became a Muslim on entering the service of Muḥammad b. Tughlaḳ [q. v.], who gave him the title of Ḳawām al-Mulk and made him governor of Multān; he afterwards became *nāʾib wazīr* and distinguished himself by his administrative ability; on the accession of Fīrūz Shāh Tughlaḳ [q. v.], he was raised to the position of *wazīr* and enjoyed the confidence of his royal master for 18 years until his death in 770.

Bibliography: Shams-i Sirādj 'Afīf, *Taʾrīkh-i Fīrūzshāhī*, (Bibl. Ind.), Calcutta 1888—1891, p. 62 *sqq.*, 211 *sqq.*, 394 *sqq.*

KHĀNA (P.), house (from the root *khan*, "to dig", aspirated form from *kan-dan*); hence: "local, a square on a chessboard". It is found in numerous combinations such as *Kitāb-khāna*, *kutub-khāna*, "library"; *mehter-khāna*, "regimental band"; *ṭabl-khāna*, "kettledrum band", in the time of the Mamlūk Sulṭāns of Egypt; *top-khāna*, "arsenal of artillery", *ab-dest-khāna*, "water-closet", etc. and is also found in Anglo-Indian hybrids such as *gym-khāna*, "sports meeting" in which *gym* is an abbreviation for *gymnastics* (Yule, *Hobson-Jobson*, s. v.). (Cl. Huart)

KHĀNBALİĶ (usually written Khān Bāliḳ), the "Khān's town", the name of Pekin as capital of the Mongol Emperors after 1264 in Eastern Turkī and Mongol and afterwards adopted by the rest of the Muslim world and even by Western Europe (*Cambaluc*, variants in S. Hallberg, *L'Extrême Orient dans la littérature et la cartographie de l'Occident*, Göteborg 1906, p. 105 *sq.*). According to Rashīd al-Dīn (ed. Berezin, *Trudi Vost. Otd. Arkh. Obshč.* xv., Persian text, p. 34), Pekin (Chinese then Čungdū, i. e. the middle capital) was called Khānbāliḳ even earlier by the Mongols, apparently as one of the chief towns of the Kin dynasty (cf. the art. ČINGIZ KHĀN). As everywhere in the Mongol Empire, Muhammadans enjoyed considerable prestige in Khānbalıḳ also. Maḥmūd Yalawač b. Muḥammad al-Khwārizmī (W. Barthold, *Turkestan* etc., i. 139), who died there in Rabīʿ I, 652 (April 21—May 20, 1254), was several times confirmed in office as governor of North China (Rashīd al-Dīn, ed. Blochet, p. 85 and 309). On the assassination of the vizier Aḥmad Fanākatī in 1282 and the events that followed see ibid., p. 508 *sqq.*; Marco Polo, ed. Yule-Cordier, i. 415 *sqq.* On the town and its situation on the Imperial Canal cf. Rashīd al-Dīn, ed. Blochet, p. 455 *sqq.*; on the distances between Khānbalıḳ and other towns by the land routes see Waṣṣāf, ed. Hammer, p. 24, Indian ed., p. 12; *N. E.*, xiii. 225 *sq.* (al-ʿUmarī); Sharaf al-Dīn Yazdī, *Ẓafar Nāme*, Indian ed., ii. 219 *sq.* The name Khānbalıḳ for Pekin was also retained after the decline of the Mongol empire in Central and Western Asia and also in Europe. On the five months' sojourn (Dec., 1420—May, 1421) of the embassy of Sulṭān Shāh Rukh in Khānbalıḳ see *N. E.*, xiv. 320 *sqq.*; the original narrative, which survives in one MS. only (Elliot 422 in Oxford, Bodleiana = *Zubdat al-Tawārīkh* of Ḥāfiẓ-i Abrū, f. 390b *sqq.*), has so far not been fully investigated (brief account in W. Barthold, *al-Muẓaffariya*, p. 27; *M. I.*, p. 107). There was a mosque in Pekin even in those days. Khānbalıḳ is mentioned as late as the early years of the xviith century in an anonymous history written in Kāshghar (*Zap.*, xv. 251). In the reports of the Russian Ambassadors of the xviith century, the form Kambalıḳ (with variants) is used, under Western European influence (Ju. Arsenyew, *Puteshestviye* . . ., *russkago poslannika Nik. Spafariya*, in the *Zap. Geogr. Obshč.*, *po otd. etnogr.*, x., vip. 1,

India. Spafari (embassy 1675) is the first to write Pičin, under the influence of the North Chinese pronunciation; this pronunciation also explains the names in the modern literature of Central Asia for Pekin (Baǰin or Bäǰin) (e.g. *Tārīkh-i Amāniya*, p. 24; cf. *Zap.*, xvii. 0188 *sqq.*).

Bibliography (besides the references in the text): Ch. Schefer, *Notices sur les relations des peuples musulmans avec les Chinois, depuis l'extension de l'islamisme jusqu'à la fin du XVe siècle, Centenaire de l'École Or. Viv.*, Paris 1895, p. 1—43. (W. Barthold)

KHANDAK (P., A.), ditch, moat. On the etymology of the word see A. Siddīḳī, *Studien über die Persischen Fremdwörter im klassischen Arabisch* (Göttingen 1919), p. 73; it was taken over by the Syriac speaking population of Northern Mesopotamia in early times, as it appears already in the *Book of the Himyarites* (first half of the 7th cent.; ed. Moberg, p. 30, l. 14) in the form *Kandak*. Consequently it may be an Aramaic loanword in Arabic. Tradition, however, connects its first use in the latter language with Salmān al-Fārisī [q. v.], who, it is said, advised Muḥammad to protect Madīna in the year 6 A. H. against its beleaguerers by digging a moat, a means of defence hitherto unknown in Arabia but usual in Persia.

The episode of Madīna's beleaguerment in that year has ever since been connected with the term khandak or *aḥzāb* (allies). The *sīra* as well as other historical works give different reports concerning the extension of the moat and the part of the town it was meant to protect. Still it may taken as probable that it started from the market-place and the hill called Salʿ, and from there extended chiefly to the North and North-East, partly also to the South.

The digging of the khandak is often mentioned in tradition because Muḥammad himself took part in the work (Bukhārī, *Djihād*, b. 33, 34, 161; Muslim, *Djihād*, trad. 125—130 etc.). He is said to have hewn a large stone-block in pieces, so that flashes of light emanated from it which shone into various parts of the world (Ibn Saʿd iii./i., 59 *sq.*). Several lines of poetry in *radjaz* uttered by him or his companions during the work are recorded, amongst them the well-known *duʿāʾ* in behalf of Muhādjirūn and Anṣār. For further information see MADĪNA, MUḤAMMAD.

Al-Khandak is also the name of several places; see Balādhurī, *Futūḥ*, ed. de Goeje, p. 85; Yāḳūt, *Muʿdjam*, s. v.

KHWĀNDAMĪR, Persian historian. His real name was Ghiyāth al-Dīn, and he was the son of Khwādja Hamām al-Dīn b. Khwādja Djalāl al-Dīn b. Khwādja Burhān al-Dīn Muḥammad Shīrāzī. The historian Mīr Khwānd [q. v.] was his maternal grandfather, and Niẓām al-Dīn Sulṭān Aḥmad Ṣadr was his maternal uncle. His father was for many years the minister of Sulṭān Maḥmūd of Samarḳand, who was Bābur's paternal uncle. Khwāndamīr must have been born about 1475, and probably in Herāt, where his maternal grandfather lived. The *Haft Iḳlīm*, however, enters him under Bukhārā. His grandfather Mīr Khwānd seems to have been originally an inhabitant of Balkh. He entered the service of Badīʿ al-Zamān, eldest son of Sulṭān Ḥusain, and was with him in 1502 at Pul Čirāgh and heard him tell of his adventures after his defeat at that place by his father, five or six years before. After Sulṭān Ḥusain's death in May 1506, Khwāndamīr was with Badīʿ al-Zamān at Maral in northern Persia. In the spring of 1507 when there was an idea of opposing Shaibānī's advance, Badīʿ al-Zamān and his brother and co-king Muẓaffar directed Khwāndamīr to go to Ḳandahār and induce Shāh Beg Arghūn to join them. He got as far as Herāt, but delay was caused by the death of Djādjak Bēgam, daughter of Badīʿ al-Zamān, and also by the near approach of Shaibānī, and so he did not go to Ḳandahār. He also once went on a fruitless embassy to Khusraw Shāh at Kundūz. A feeble attempt was made at Maral to encounter Shaibānī, but the princes ran away, and the gallant Dhu 'l-Nūn Arghūn was slain. The march upon Herāt followed in March 1507, and Khwāndamīr and his brother's son ʿUthmān, who was inspector (*muḥtasib*) for the city, were deputed by the inhabitants to interview Shaibānī at his camp, and to obtain terms of surrender. The nephew went and succeeded in having an interview, though he was stripped and pillaged on the way. Khwāndamīr remained in Herāt after its capture, and he has given an amusing account of how he and his friends were squeezed by the Uzbegs. He was also in Herāt when Shāh Ismāʿīl defeated and killed Shaibānī and took possession of the city in 1510. But in 920 (1514) we find him in retirement at the village of Pasht or Basht in Ghardjistān, in northern Persia (not in Georgia, as Elliot has it; see de Sacy on Ghardjistān in *Mines de l'Orient*, i. 321), where he occupied himself in writing his books. He now attached himself to the worthless Muḥammad Zamān, eldest son of his old master, and shared his fortunes for a while, at Balkh, etc. But when Muḥammad Zamān was preparing to go to Ḳandahār, Khwāndamīr obtained leave to return to Pasht. He must have afterwards settled in Herāt, for he was there in July 1527, when he left it to go to Ḳandahār. Nor did he stay long in Afghānistān, for he went off to India in March 1528. He reached Āgra and presented himself before Bābur in September, and in 1529 accompanied him to Bengal and was with him at the *trimohini*, or junction of the Sardjū and Ganges (*Ḥabīb al-Siyar*, lith., ii. 84, end of 4th part of vol. 2). Bābur died in the end of 1530, and Khwāndamīr afterwards served his son, Humāyūn, and wrote a panegyric on the latter's buildings and devices, which he called the *Ḳānūn-i Humāyūnī*, or the *Humāyūnnāma* (there is a MS. of it in the British Museum), and an account of the book, accompanied by extracts, is given in Elliot's *History of India*, v. 116). It is commonly said that Khwāndamīr died in 941 (1534—1535) during Humāyūn's expedition to Gudjarāt. But Firishta's account shows that the death, caused by dysentery, occurred on the return march from Gudjarāt. This was in 942, and Khwāndamīr was alive in that year, and made a chronogram on the death of his friend and fellow-traveller, Shihāb al-Dīn, the riddle-maker (cf. Badāʾūnī, Ranking's translation, i. 450). Khwāndamīr probably died in 942 or 943 (1535—1537). At his own request he was buried in Dihlī, near the tombs of Niẓām

al-Dīn Awliyā and Amīr Khusraw. His age was then probably about 60.

Khwāndamīr was a voluminous writer. His first work was the *Khulāṣat al-Akhbār* (or, the Perfection of Narratives). It was written in 905 (1499—1500) and dedicated to ʿAlī Shīr, whose library furnished him with the necessary materials. It is a youthful work, and naturally there is little in it that is derived from personal knowledge. It is in fact a preliminary sketch for the *Ḥabīb*, but in some places, e.g. in the account of the capture and death of Yādgār Muḥammad it is fuller than the latter work. Khwāndamīr's most valuable work, and the only one that has been printed, is the *Ḥabīb al-Siyar*. It was begun in 1521 and substantially finished in 1523—1524, though he made additions to it after visiting India. The *Ḥabīb al-Siyar* — so called after his second patron Ḥabīb Ullāh — is a General History from the earliest times down to near the end of the life of Ismāʿīl Ṣafawī I. Naturally, it is chiefly valuable for the author's own time. The best parts are the lives of Sulṭān Ḥusain of Herāt and of Ismāʿīl I. Incidentally, he gives much information about Shaibānī and Bābur, and his account of the latter is the best source that we have for the two great gaps in Bābur's "Memoirs". He is a conscientious author, for he wrote the *Ḥabīb al-Siyar* three times over. He is also accurate, and often writes from personal knowledge. His great fault is his style. It is turgid and rhetorical, like the *Anwār-i Suhailī* of his contemporary Ḥusain Wāʿiẓ, and is sprinkled with tags of verse. He bestows too much praise on Sulṭān Ḥusain and Ismāʿīl Ṣafawī, and he is also sometimes unnecessarily prolix. For instance, he writes with wearisome detail of the adventures of Muḥammad Zamān. The *Ḥabīb al-Siyar* has been lithographed at Tihrān and Bombay. Khwāndamīr was also the author of 7th vol. of the *Rawḍat al-Ṣafā*.

(H. BEVERIDGE)

KHĀNDESH, the region bounded on the north by the Narbadā, on the east by the province or kingdom of Berār, on the south by the Adjanta Hills, and on the west by the kingdom of Gudjarāt. It became an independent state in 1382, when Aḥmad Fārūḳī, entitled Rādjā Aḥmad or Malik Rādjā, having joined the rebellion of Bahrām Khān Māzandarānī against Muḥammad Bahmanī I of the Dakan, was obliged to flee from that country and established himself in Khāndesh, which owes its name to him and his successors, who long eschewed the royal title and were content with that of Khān, whence their principality was known as "the country of the Khāns". The country, surrounded by powerful neighbours, was too small to be entirely independent, and its rulers owed some degree of allegiance at first to Mālwa and afterwards to Gudjarāt, but the mutual jealousy of these two states preserved Khāndesh from absorption in either. Mīrān Muḥammad I, the eleventh of the Fārūḳī Khāns, was closely related to the ruling family of Gudjarāt, and was elevated to the throne of that kingdom in 1537, but died on his way to Aḥmadābād to assume his new dignity. His promotion encouraged his successors in Khāndesh to use the title of Shāh.

The administrative capital of the country was Burhānpūr, but the fortress of Asīr afforded a safe refuge to its rulers when danger threatened. Asīr was captured by Akbar in 1601 from Bahādur Shāh, the seventeenth and last of the long line of Khāns, and when prince Dāniyāl was appointed viceroy of the Mughul Dakan, which included Khāndesh, his father bestowed upon the province, in his honour, the fanciful name of Dāndesh, by which it was known, in official records, as long as the Mughul empire lasted, though the newer name never displaced the older, and is now almost forgotten.

KHĀNFŪ, in the third (ixth) and fourth (xth) centuries the Arabic name for the most important seaport of China, the centre of trade by sea with the western Asiatic peoples. As is now generally believed, this town "is undoubtedly Canton" (cf. above, i. 842). On the other hand, it used to be urged (by J. Klaproth, *J. A.*, 1824, v. 40 bis, I. Hallberg, *L'Extrême Orient* etc., Göteberg 1906, p. 213) that Khānfū was not Canton but the Ganfu or Ganfu mentioned by Marco Polo (transl. Yule-Cordier, ii. 189, and note on p. 199) lying much farther north, the harbour of Hang-čou-fu. This idea is refuted by the fact that, in the Chinese annals of this period also, Canton is mentioned as the most important harbour and centre of foreign trade: in 758 A. D. Canton was plundered by Arab and Persian pirates (e.g. E. Chavannes, *Documents sur les Tou-kiue (Turcs) occidentaux*, St. Petersburg 1903, p. 173). This event is not mentioned by the Arabs. Arabic sources (Abū Zaid al-Sīrāfī in Reinaud, *Relation des voyages faits par les Arabes et les Persans dans l'Inde et à la Chine*, Paris 1845, ii. 63 [text]; al-Masʿūdī, *Murūdj*, i. 303; Ibn al-Athīr, vii. 221) report the destruction of Khānfū by the Chinese rebel Huang-č'ao in 264 (877—878) when a great number (120,000 or 200,000) of Muslims, Christians, Jews and Zoroastrians perished. According to the Chinese annals, Canton was taken by Huang-č'ao in 879: in this connection also the importance of this town for foreign trade is mentioned (P. Pelliot in *T'oung Pao*, 1923, p. 410). The statements in Ibn Khordādhbeh (*B. G. A.*, vi. 69, text) regarding the location of Khānfū (four days' journey by sea and 20 by land from the most southerly Chinese harbour Lūḳīn, now Hanoi) can, as F. Hirth and W. W. Rockhill (*Chau Ju-Kua*, St. Petersburg 1911, p. 22, with support from al-Idrīsī) observe, only refer to Canton. The reading Khānfū (Chinese Kuang [čou] fu) is now regarded as certain although the manuscripts frequently have *ḳ* for *f* and even de Goeje (*B. G. A.*, *loc. cit.*) was inclined to prefer the reading Khānḳū (for Hong-Kong). According to the Arab authorities, the town brought the government 50,000 dīnārs a day (about £ 40,000) (Reinaud, *op. cit.*, text, p. 41). After the arrival of a foreign vessel, eunuchs were sent to it by the

Emperor to pick the finest merchandise (ibid., text, p. 73 sq.); the road between Khānfū and the capital Khumdān (Si-ngan-fu) took two months to traverse (ibid., p. 77 and 103). The prince (malik), i.e. governor of Khānfū, bore the title Dīfū (ibid., p. 38; according to Reinaud, note 81 = ii. 27, for Chinese Či-fu. See also the article CHINA, especially p. 840—842). (W. BARTHOLD)

KHĀNIĶĪN, a town in the 'Irāķ, on the Ḥulwān-čai. The statement that Nu'mān V, king of al-Ḥīra, was kept here a prisoner till his death by order of his overlord, the Sāsānian Khusraw II, suggests that there was a fortress here in the Sāsānian period. The bridge of Khāniķīn must also go back to Sāsānian times; it is built of brick and plaster in several arches across the river-valley. The number of arches is said to be 24, each 20 ells wide. At the Muslim conquest a battle seems to have been fought at Khāniķīn for a "day of Khāniķīn" is mentioned in Ibn al-Faķīh. Under Arab rule Khāniķīn was a small town, which made a poor impression on the traveller compared with the splendour of Baghdād, and was an unpretentious station on the road from Baghdād to Khurāsān. Ibn al-Mu'tazz praises the wine of Khāniķīn. According to Mis'ar, a naphtha well at Khāniķīn yielded a considerable revenue to the state. Lastly the Zuṭṭ were deported to (the region of) Khāniķīn after their rising in lower Mesopotamia had been suppressed in 219 (834).

The place was often mentioned in recent years as a junction connecting a branch of the Baghdād railway with the railway system proposed by the Russians in Īrān.

(P. SCHWARZ)

AL-**KHANSĀ'** is celebrated as the greatest poetess of the Arabs; her proper name was Tumāḍir, daughter of 'Amr b. al-Sharīd of the tribe of Sulaim, from which tribe originated among others the celebrated poet Zuhair b. Abī Sulma. Her father must have been a man of considerable reputation and wealth, for an account preserved in the *Kitāb al-Azmina* of al-Marzūķī (ed. Haidarabad, ii. 168 sq.) tells us that her father visited the fair of 'Ukāẓ with his sons Mu'āwiya and Ṣakhr in the 35th year of the Elephant and transferred some landed property at al-Waḥīda in the Mikhlāf of Yathrib to Ma'mar b. al-Ḥārith, the grandfather of the poet Djamīl, and al-Aṣma'ī says that the document then drawn up was still in the possession of the descendants of Ma'mar in the time of the caliph Hārūn al-Rashīd. Assuming the document to be genuine (which I doubt) the brothers of al-Khansā' 15 years before the Hidjra, in 607 A.D., were already old enough to take part in the affairs of their father, but the year of the Elephant was probably much earlier than the date generally assigned to it by Muslim authorities.

The earliest event in the life of al-Khansā' of which her biographers make mention is the proposal of marriage made by the aged Duraid b. al-Ṣimma, who was killed in the year 9 A.H. The latter was bound in close friendship to her brother Mu'āwiya, both having promised to one another that the one surviving would mourn in an elegy the one who died first. Al-Khansā' was then a young girl and as the proposal came through her brother we may assume that her father was dead. It is significant for those times that the girl was permitted to consider the proposal of marriage, and after seeing Duraid her decision went against him. She even composed some verses against the rejected suitor in which she mocks him and his tribe and incidentally mentions that she had previously refused another man of the family of Badr, who is not otherwise known. After this she married a man of her own tribe of Sulaim named 'Abd al-'Uzzā (or, according to Ibn Ķutaiba, Rawāḥa b. 'Abd al-'Uzzā), who was the father of her son Abū Shadjara 'Abd Allāh, who took a prominent part in the apostasy after the death of the Prophet and did not come into al-Medina till the reign of 'Umar. This 'Abd al-'Uzzā probably died early and al-Khansā' married another man of her tribe, Mirdās b. Abī 'Āmir, by whom she had three sons, Zaid, Mu'āwiya and 'Amr, and probably her daughter 'Amra, who was her youngest child.

There is considerable difficulty in reconciling the chronological data and to arrive at even an approximate date for the birth of al-Khansā', but as her son Abū Shadjara took a prominent part in the *Ridda* [q. v.] in the year 13 A.H. and may have been 30 years of age we may fairly assume that al-Khansā' was then between 40 and 50, probably even older. Al-'Abbās b. Mirdās, who was one of the poets of the Prophet, was certainly not her son, but the issue of an earlier marriage of Mirdās. Mirdās, an enterprising man, had attempted with some companions to cultivate some swampy ground near a spring, and as a revenge the spirits which inhabited that place contrived to kill him slowly, i. e. he most likely contracted a fever in this unhealthy place.

The turning-point in the life of al-Khansā', however, was the double bereavement, the loss of her two brothers Mu'āwiya and Ṣakhr. Mu'āwiya, in accordance with Arab custom, went out with 18 companions to make a raid upon the tribe of Murra. He had had a quarrel with a man of this tribe, Hāshim b. Ḥarmala, at the fair of 'Ukāẓ and after one unsuccessful attempt he invaded the land of the Murrites in which he was slain by Duraid, the brother of Hāshim. The duty of avenging the death of his brother fell upon Ṣakhr and he succeeded in murdering first Duraid, who had slain his brother Mu'āwiya and was slowly recovering from the wound he had received in the combat; then another Sulamī killed the former's brother Hāshim. Not content with this double revenge for his brother, Ṣakhr continued his raids upon Murra till he was fatally wounded by a man of Faķ'as, an Asadī clan allied with the tribe of Murra. He lingered for a long time in his tent, apparently becoming a burden to his wife, and finally succumbed. All these events happened before the rise of Islām, but al-Khansā' lived long enough to see the final victory of the new faith and she is said to have been reproved both by the caliph 'Umar and by 'Ā'isha for her unreasonable mourning for her brothers, especially Ṣakhr. The new religion had no real influence upon her and her poems.

Fortunately several manuscripts of her elegies have been preserved and the indefatigable labours of Cheikho have put us in possession of a very complete collection of her verses. Naturally we find among the verses recorded in this edition many which have become ascribed to al-Khansā', because of her paramount reputation as a poetess of elegies, but there is no doubt in my mind that we have many poems which are perfectly genuine, especially as the tradition of the undoubtedly genuine pieces emanates from men of her own tribe from whom the poems were collected at a very early date. It is significant that in these genuine poems we find expressed the true sentiments of the *Djāhiliya*; there is no mention of a future life; only the blood of the slain demands retaliation and the despair is over and again expressed that no one can replace the departed, whose many manly virtues are enumerated and extolled.
